Television Digest with ELECTRONICS REPORTS
WYATT BUILDING WASHINGTON 5, D. C. • TELEPHONE STERLING 1755

Index to 1951 NEWSLETTERS and Supplements

Index to Television Digest, 1951: Volume 7

References are grouped into three major categories: General (pages 1-5), Manufacturers & Merchandisers (pages 5-6), Supplements (page 1). Index attempts to cover only items considered to be of more than passing interest. Reference numbers following each item designate issue of Newsletter in which item appeared. If number is followed by a small "n," article referred to was a note printed in small (8-pt.) type; all other references are to articles printed in typewriter type.

General

ADVERTISING
BBB proposes new standards, 1n
attacks on high TV costs, 2n, 3n, 4n, 7n, 8n
1950 TV talent cost, 2n
NBC-TV revises coverage figures, 3

HANDY INDEX TO TV NEWS OF 1950: Index to our 1950 Newsletters, Supplements, etc., included herewith, should be valuable aid in tracking down major events, trends, facts, dates, as chronicled by Television Digest during the momentous year just past. We found it impracticable to catalog everything we published -- but the important items are pin-pointed for you. Use of this Index, of course, presupposes you have maintained your file of 1950 Newsletters and Supplements (Vol. 6:1-to-52).

Note: Going into the mails next week, to full-service subscribers only, is our new 1951 AM-FM Directory -- listing all North American broadcasting stations, CPs, applications, etc., with facilities, by countries, states & cities; by frequencies, and by call letters. In about week, we'll also mail our TV Factbook No. 12 which, like the AM-FM Directory, will start new series of weekly Addenda reporting FCC decisions, changes, etc.

MATERIALS SCARCE, BUT NOT KNOW-HOW: Miracles of production ingenuity -- almost too good to be true, frankly -- were revealed this week. Claims we've heard, if fully realized, could mean continued high TV-radio production despite serious shortages of the most critical materials.

First was disclosure by Philco president Wm. Balderston, at Chicago distributors convention, that engineering-research v.p. Leslie Woods and his engineers have developed a TV receiver which uses:

25% less copper, 85% less cobalt, 85% less nickel, 25% less aluminum, and 67% less silicon steel.

Production of this set by March can be achieved if necessary, he stated.

Exact nature of set wasn't given -- size, performance, whether other scarce materials are used, ease or difficulty of production, etc. -- but Mr. Balderston did say that goal of company's "Material Conservation Program," started months ago with govt. blessing, was to "find ways and means of reducing or eliminating use of scarce materials in all our products without in any way affecting our quality."

* * * *

Then, new electrostatic picture tube was reported "ready for production" by RCA. It requires no cobalt at all, uses neither cobalt-containing alnico focus magnet nor even copper-consuming focus coil. This new tube, alone, could reduce amount of cobalt used in sets by 75%-85%.

Tube is said to be slightly bulkier than standard tubes, but apparently not enough to require cabinet changes. First unit will be 17-in. rectangular, but shouldn't be confused with 17-in. RCA has been shipping. Good guess is that similar tube contributes to Philco's spectacular savings, since engineers have talked about electrostatic focusing (really an old principle) ever since cobalt shortage loomed.

But another big tube maker is bearish about electrostatic tubes, calling them "dead as a dodo," charging that they "create more problems than they solve" --

Copyright 1951 by Radio News Bureau

JAN 8 1951

such as circuit changes, longer tube, etc. However, he conceded possibility RCA has made improvements circumventing some disadvantages.

RCA's conservation program started in July, officials say, disclosing two other fruits of developmental work:

(1) Nickel-coated steel strip replacing pure nickel receiving-tube plates (Vol. 6:49). NPA helped RCA obtain steel for this purpose.

(2) Glass, instead of copper, for exhaust tubing in vacuum tubes.

* * * *

Full story on materials conservation is yet to unfold. Since no company has monopoly on ingenuity, we should be hearing about more such tricks of the trade. Still to be indicated, too, is precisely what such savings might mean in terms of receiver production volume.

There's another face to the conservation coin, of course. Sylvania's H. Ward Zimmer puts it simply:

Engineers find substitute, save a critical material. Company tries to get some, finds it on critical list, too. Then, since company hasn't been using any, it has no base period on which to expect an allocation. Company's suppliers have same problem, so engineers' efforts are frustrated.

COMPONENTS SHORTAGES—DANGER SIGNS: Restriction ax fell this week on TV-radio's biggest entity -- and its effects, possibly portentous, were felt immediately.

RCA's component division at Camden, branch of Tube Dept., which makes speakers, coils, yokes, transformers, etc., goes on 4-day week schedule Jan. 8 -- just one week after govt. limitations on nickel, copper and aluminum (Vol. 6:46-52) went into effect. RCA officials say layoffs are virtually certain by end of week unless restrictions are loosened.

Disruption of set production seems inevitable, with stocks of some components whittled down to half-day's supply at RCA.

RCA men went to Washington, told NPA officials: Unless Govt. grants immediate relief from nickel and copper distribution orders, Tube Dept. alone will be forced to lay off 4000 employes -- one-fourth its 16,000-man work force -- during first quarter.

"Excellent reception" by NPA officials gave rise to guarded optimism of RCA executives, who pointed out, however, that any loosening of restrictions will have to come quickly to be much help.

An RCA officer listed shortage stumbling-blocks in this order: (1) nickel, (2) copper, (3) cobalt. He asserted RCA would be "much worse off" if it hadn't inaugurated intensive conservation program last July (see p. 1).

Tube production, highly dependent on nickel, will hold up fairly well this month, RCA says, but real pinch -- and layoffs at Harrison tube plant -- will begin Feb. 1 unless enough material is shaken loose to last until military orders come in.

Here's problem in nutshell, as it relates to tube production: It takes 4 months to train tube production worker. If some must be laid off, they'll take jobs elsewhere. When heavy military electronic production begins, instruction of new untrained workers will consume valuable time, materials -- if workers can be found.

There were many rumors of cutbacks at other plants, but only official announcement came from Crosley which said it has laid off 1000 workers at Cincinnati plant because of shortages -- principally in cobalt, cadmium, copper, steel, nickel. It was not indicated what lines were affected, but Crosley noted that the plant had been manufacturing TV-radios on an overtime basis for several months.

Sylvania fears it may have to cut back its TV receiver output 25-50%, let many workers go unless some relief on critical materials is afforded in next few weeks. TV lines are moving according to schedule at present, and rumors of shutdown of some lines were branded as false by company executives.

"Lead time" -- time lag between order and delivery of raw materials -- is big problem now in scheduling production. In normal times, lead time was about 3 weeks; now it's much shorter in some materials.

HOPES AND DOUBTS FOR FREEZE'S END: End-of-freeze remains clouded, both by FCC's unpredictable hearing and progress of mobilization (Vol. 6:52) -- but everyone wonders whether there's some way to break the ice jam.

Latest proposal, likely to get short shrift, came from Admiral president Ross Siragusa, during distributors' convention in Chicago this week. Said he:

"The freeze...is not only discriminatory but unnecessary. By ending the freeze...and without touching the uhf, our engineers tell us over 100 new stations could be authorized without overlapping interference with present stations."

Then he wrote off FM, urging its vhf spectrum be given over to TV, saying: "FM has never taken hold...The most charitable thing one can say about FM is that it is a dying art. The channels it is pre-empting should be put to real public service without delay by being shifted to TV." (Admiral TV combinations make FM available only on order, at $30 extra.)

These moves would bring TV to 3,000,000 more families, Siragusa estimated. "Uhf," he added, "can be opened later, when all technical problems are worked out."

* * * *

Meanwhile, FCC plans no change in hearing procedures. Educators asked for, and received, week's delay in resumption of their testimony -- from Jan. 15 to 22. Their testimony, plus a few other odds and ends, should wind up general phase of hearing by month's end.

"Mountain of work remains to be done" before freeze can end, Chairman Coy of FCC writes in Variety's Jan. 3 end-of-year issue. He lists steps remaining: specific allocations hearing, Bar Assn. oral argument on legality of fixed allocation, time to reach final decision, time for filing new applications, hearings in many cities. Then he concludes: "Even if near normal conditions prevail, it is doubtful if any stations can go on the air before the first of the next year."

Unless Coy has some shortcuts up his sleeve -- and he indicates none -- he would appear to be as unduly optimistic as ever.

TV-AM-FM STATIONS AS OF JAN. 1, 1951: TV continues locked in freeze, imposed in September 1948 and likely to continue in effect all this year (Vol. 6:52) -- but number of AM outlets grew while FM settled down to a hard core of operating stations.

Only 9 TV stations went on air in 1950, bringing total to 107. They were: WSYR-TV, Syracuse; KEYL, San Antonio; WOI-TV, Ames, Ia.; WHAS-TV, Louisville; WTAR-TV, Norfolk; WJIM-TV, Lansing; WKZO-TV, Kalamazoo; WHBF-TV, Rock Island, Ill.; WSM-TV, Nashville. Three CPs fell by default during year: WRTV, granted New Orleans Times-Picayune; WRTB, Raytheon, Waltham, Mass.; WJAX-TV, City of Jacksonville.

Detailed data on all TV stations in the U.S. and Latin America, plus list of the 373 applications pending, plus allocation tables, directories of TV-radio manufacturers, program syndicators, etc., digests of station rate cards, tabulations of monthly production and sets-in-use figures -- all may be obtained from TV Factbook No. 12, which goes into mails to all of our full TV service subscribers Jan. 13. [Extra copies to subscribers, $2.50.]

Our 1951 AM-FM Directory, which goes out to full-service subscribers next week [extra copies, $7.50], brings to light these pertinent statistics:

(1) AM authorizations reached 2351 at end of 1950 (2199 licenses, 152 CPs), 105 more than the 2246 at end of 1949 (Vol. 6:1). There were 2131 at end of 1948 (Vol. 5:2), 1961 at end of 1947, 1579 at end of 1946, 1056 at end of 1945. Included in AM total are 34 non-commercial stations.

(2) AM applications were squeezed down to 259 for new stations, 207 for changes in facilities, compared with 309 and 224, respectively, year ago. Dropped during 1950 were 17 AM licenses, 30 CPs.

(3) AM stations in other major North American countries didn't change much. Canada has 162 (160 last year), Mexico 276 (273), Cuba 104 (94).

(4) FM grantees continued making up their minds during year. In general, they either got on air and asked FCC for final license papers or quit. Of 706 grantees, 672 are on air (515 licensed, 157 with STAs). At end of 1949, there were

791 grantees, 728 of which were on air. In addition, there are 70 non-commercial FM licensees, many of them 10-watters. Dropped during year were 47 FM licenses, 64 CPs.

(5) FM applications have almost ceased coming in. There are only 8 pending, compared with 38 year ago.

Many FM operators are watching FCC for ruling soon on such life-savers as transitcasting, storecasting, etc. Fate of quite a few hangs on decision.

ELECTRONICS AGENCIES ADD EXECUTIVES: Current reshuffling of defense agencies is accelerating influx of top level business executives to Washington to work with Defense Mobilization Director Charles E. Wilson and Defense Production Administrator Wm. H. Harrison. Among those from electronics taking mobilization assignments are:

W. W. (Wally) Watts, RCA engineering products v.p. on leave, who on Jan. 8 becomes an assistant to Gen. Harrison. He was a Signal Corps colonel during war under Gen. Harrison in procurement and distribution.

Ray C. Ellis, Raytheon v.p., serving part time as special consultant on organization and personnel to Munitions Board chairman John D. Small. Ellis was WPB radio and radar director during World War II.

* * * *

Shakeup in govt. defense mobilization agencies is basically administrative --electronics industry continuing to deal with same offices and officials as before:

Electronic Products Division, NPA, directed by John Daley and Donald Parris.

Electronics Division, Munitions Board, headed by Marvin Hobbs.

Under new mobilization setup, Gen. Harrison directs new DPA, similar to old WPB, a policy-making body with some power but not complete authority over military buying, and responsible only to Mr. Wilson as head of ODM.

NPA's policy will be made by DPA, but its functions are same as before. Head is Manly Fleischmann, ex-NPA general counsel, onetime WPB associate general counsel. And Mr. Wilson picked as his general counsel Herbert A. Bergson, center of controversy while prosecuting anti-trust cases as an asst. Attorney General.

Added to staff of NPA Electronic Products Division this week was E. Mac-Donald Nyhen, ex-International Standard Electric (IT&T), onetime member of CBS technical operations staff and wartime Signal Corps lieutenant colonel.

THE RISING COSTS OF TV SPONSORSHIP: CBS's New York flagship WCBS-TV once again tops them all with base hour rate of $3250, one-minute rate of $675, effective Jan. 1. These new record rates come scant 4 months after WCBS-TV posted then highs of $2500 & $525 as of last Sept. 1 (Vol. 6:34). Hourly rate for Class A time (6:30-11 p.m.) compares with all radio's highest of $1350 for sister AM station WCBS.

NBC's New York WNBT went to $3100 on network rate card as of Jan. 1, will probably go even higher on local rate card by Feb. 1; present local rate is $2500, and $500 per spot. DuMont's WABD goes to $2200 & $500 Feb. 1. ABC's WJZ-TV has stuck to $2200 & $500 since last September.

These are by far the highest time rates in TV -- nearest being $1000 & $200 of several Chicago and Philadelphia stations -- justified by the telecasters on the basis of better-than-50% of homes with TVs in metropolitan areas (Vol. 6:51) and on claims of low cost-per-thousand viewers. By same token, if rate of TV set sales in New York area continues even at half-speed, it's conceivable $5000 an hour rate may come within year or two.

New York trend is repeated, though on smaller scale, by nearly all the 107 telecasting stations in operation, whose 1951 rates are generally considerably higher than those of last year (see TV Factbook No. 12). These higher costs, plus increased performer fees forced by new union contract 6 weeks ago (Vol. 6:47), are causing no end of conjecture in TV-radio circles as to where it's leading.

Will sponsors turn away from TV, favor radio and other media? Will subscription-TV (Phonevision) really be needed to bear the admittedly high costs of station operation? It's no secret many an advertiser and agency is wrinkling brows pondering whether the show's worth the price.

Those few who are quitting TV (like Bonafide Mills on NBC-TV, whose talent budget alone went up to $8000 after TVA contract) are quickly replaced by others. Nor do sponsors show any signs of eschewing such favorites as the multi-sponsor "Show of Shows" on NBC-TV even though talent costs went up 15%.

Possibly reassured that TV rate rises will serve as brake on defections from radio to that medium, radio broadcasters meanwhile aren't going to reduce their rates, as demanded. They even see increasing business ahead. This attitude was recognized by NBC, which dropped rate-cut plan, cancelled proposed Jan. 10 meeting with radio affiliates in TV cities -- intended to persuade them to cut night radio rates because of TV inroads on listenership (Vol. 6:50). Almost to a station, affiliates opposed move, asserting:

(1) Radio rate cuts are untimely and unwarranted. Network radio continues to offer values greater than competing media. (2) Recent changes in national economic picture indicate these values will increase in period ahead. (3) Operating expenses of radio continue to rise.

COLOR STILL GOOD CONVERSATION PIECE: Color TV still gets considerable attention -- probably will continue to do so as long as the publicity mills grind and there's even remote possibility some CBS-type sets might be built.

Congressional hearing on color was asked this week by Rep. Dolliver (R-Ia.), who served in World War I Signal Corps. He urged hearing would clear up "misunderstanding and confusion in the public mind." Actually, chances for hearing are considered slim, since Congress has more urgent problems at hand, and since Capitol traditionally abstains from investigations when matters are before courts.

RCA says it will file appeal to Supreme Court "soon" rather than wait full time allowed, following turndown by Chicago 3-judge court (Vol. 6:51). FCC lawyers are cocky about prospects before Supreme Court, one saying: "I predict the Court won't even hear oral argument; it will simply affirm lower court's decision."

* * * *

Manufacturers are still "fighting" FCC's adoption of CBS system. Said Admiral's Siragusa, at distributor's meeting in Chicago this week:

"From what I have personally seen [of RCA color], even without allowing for further progress, I haven't a shadow of doubt that if the Supreme Court gives public the opportunity to make final decision, Columbia's system will be flatly rejected."

Philco's president Wm. Balderston, also speaking to his distributors:

"We have done considerable work in this field, and our engineers have made some very substantial contributions to the color TV art. As far as commercial operation is concerned, color TV is apparently in mothballs where it undoubtedly belongs for the present. In the meantime, however, our research staff will continue work, and when color TV comes out of mothballs, I assure you that Philco will be ready."

An "Ad Hoc" color subcommittee of National Television System Committee has been laboring away with idea of pooling all knowledge and coming up with best compatible system to recommend to NTSC. Membership: David Smith, Philco, chairman; T. T. Goldsmith, DuMont; A. V. Loughren, Hazeltine; Elmer Engstrom, RCA; I. J. Kaar, GE. One member reports mobilization seriously cutting in on his staff's efforts. "Men who were on color full-time are now on it only part-time."

* * * *

Interesting comments on color, from year-end (Jan. 3) issue of Variety:

Wayne Coy, FCC chairman: "I am confident that the Supreme Court will [sustain the FCC] and that it will dissolve the temporary restraining order issued by the Chicago court...As to the threat of war, I do not wish to speculate here on the preparedness program and the materials allocation problems. However, I think it is obvious that if black-and-white TV is to be regarded as a weapon of war, color TV is many times more powerful."

Sen. Edwin Johnson: "I condemn in no uncertain terms the chortles and gurglings and glee of the manufacturing industry over delay and their well financed propaganda campaign to make it appear that the Commission refuses to look at im-

provements. Neither do I rejoice over their contention that the war mobilization picture makes moot the whole question of color TV progress and its scientific development. Nevertheless, as the electronic industry is brought more and more into defense production, manufacture of radio and TV receivers will be reduced sharply."

* * * *

CBS was soothed this week by NPA administrator Wm. Harrison, who wired reply to president Frank Stanton, who feared NPA was about to ban color set production (Vol. 6:51-52). Said Harrison: "NPA has taken no action bearing specifically on color TV, nor is any such action now under consideration."

CBS starts feeding color to Chicago Jan. 10, via coaxial, giving closed-circuit public demonstrations on main floor of Wrigley Bldg. simultaneously with New York showings. Philadelphia demonstrations were stopped Dec. 30.

Network Accounts: Campbell Soup Co. will sponsor *Henry Morgan Show* on NBC-TV, Fri. 9-9:30, starting date not yet set; replaces Bonafide Mills' *Bonny Maid Versatile Varieties* . . . Procter & Gamble Co. Jan. 29 begins sponsorship of Mon.-Fri. 2-2:15 segments of CBS-TV's *Garry Moore Show;* Quaker Oats Jan. 15 starts Tue. & Thu. 2:15-2:30 editions of same program . . . Mutual Benefit Health & Accident Assn. Jan. 21 starts *On the Line with Bob Considine* on NBC-TV, Sun. 2:30-2:45 . . . Derby Foods Inc. (Peter Pan peanut butter) to sponsor *Magic Slate* on NBC-TV, alt. Sun. 5:30-6, starting Jan. 21 . . . U. S. Army & Air Force Recruiting Service Jan. 6 starts sponsorship of 9:30-10 segment of DuMont's *Saturday Night at the Garden* . . . Landers, Frary & Clark (Universal household appliances) Feb. 1 starts *Universal Homemaking* on 23 DuMont stations, Thu. 2-2:15 . . . Conmar Products Corp. (zippers) and Maiden Form Brassiere Co. reported readying alternate week sponsorship of *Theatre of Romance* on ABC-TV, Sat. 11-11:30 a.m. . . . General Mills Jan. 5 started *Live Like a Millionaire* (child talent show) on CBS-TV, alt. Fri. 9:30-10 in lieu of previous programs.

Station Accounts: Sponsored in Los Angeles by Rosefield Packing Co. (Skippy peanut butter) new half-hour production originating at KTTV, titled *You Asked for It,* will be shown on kine-recordings in 22 markets . . . Lewis Food Co. (dog & cat foods) continuing sponsorship of *The Ruggles,* with Charles Ruggles, on KGO-TV, San Francisco; KING-TV, Seattle; KFMB-TV, San Diego; KPHO-TV, Phoenix; with Kraft Food soon placing it on KECA-TV, Los Angeles . . . Melville Shoe Corp. (Thom McAn footwear) has contracted with WPIX for co-sponsorship of 21 Madison Square Garden events, starting Feb. 4, taking Chevrolet spots; other sponsors are Webster Cigars and Standard Brands, with schedule 25% unsold . . . New spot business on WABD, New York, includes Elgin Watch Co., thru J. Walter Thompson; Chase National Bank, thru Hewitt, Ogilvie, Benson & Mather; National Sugar Refining Co., thru Young & Rubicam . . . Among other advertisers currently reported using or planning to use TV: Freemantel Voice Institute Inc. (home study courses in public speaking & singing), thru Moss Associates, N. Y.; Monarch Foods, Chicago, thru Weiss & Geller, Chicago; Standard Oil of Indiana (Red Crown gas), thru McCann-Erickson, Chicago; Manning-Bowman & Co., Meriden, Conn. (portable mixer & coffee maker), thru Foster & Davies Inc., Cleveland; Baray Pharmacal Co. (Swish mouthwash tablets), thru Olian Adv., Chicago; Holeproof Hosiery Co., thru Weiss & Geller, Chicago.

Three elections to v.p. were announced by NBC Jan. 6: John K. Herbert, appointed in November as gen. sales mgr. for radio network; George E. Frey, director of TV network sales; Frederic William Wile Jr., director of TV production.

Personal Notes: William B. Ryan named paid president of new Broadcast Advertising Bureau Inc., at $36,000 yearly salary, effective Feb. 1; he'll continue temporarily as NAB general mgr. to which $25,000 a year post he was appointed last April from general mgr., KFI & KFI-TV, Los Angeles (Vol. 6:16) . . . Ivor Kenway resigns as ABC v.p. to accept temporary appointment as public relations consultant, United Cerebral Palsy Assn. . . . Robert Ewing named TV sales mgr., Oliver Morton, radio sales mgr., NBC Central Div. spot sales dept., in move splitting up sales force in Chicago . . . George E. Sleeper Jr. has resigned as v.p. & chief engineer of Color Television Inc. (CTI), San Francisco . . . Edward Cashman, with Kudner, returns to Foote, Cone & Belding as TV-radio v.p., succeeding Robert Ballin, resigned to join J. Walter Thompson, N. Y. . . . Ralph W. Nimmons promoted to station mgr., WFAA-TV, Dallas; Alex Keese succeeds him as asst. mgr., George K. Utley taking over radio sales . . . Jack Harris, gen. mgr., *Houston Post's* KPRC & KPRC-TV, elected to newspaper's board of directors . . . Ernest Byfield Jr., ex-NBC and Weiss & Geller, joins W. Earl Bothwell Inc. as TV director . . . Jose diDonato, ex-Petry, now TV-radio director of Robert W. Orr Associates . . . Arnold Michaelis elected president of World Video Inc., Richard Lewine succeeding him as executive producer . . . William Van Praag resigns as president, General Business Films and v.p., Television Features Inc. . . . Wm. H. Ensign, veteran network executive, named ABC Eastern radio sales mgr.

"Peak danger period" of TV's impact on other media and activities passed in 1950, researcher Jerry Jordan told convention of College Physical Education Assn. in Philadelphia last week. Reason, he said, was that there probably never again will be such a large portion of TV audience in "novelty" stage (first year) of set ownership. Football attendance in Philadelphia areas was off 11% this year, he said, but he attributed only half of drop to TV. He argued vigorously against banning football telecasts in 1951, saying: "It just doesn't make sense to force a national ban on this area now and never find out whether TV will be helpful or harmful to football after the novelty has worn off." Speech is being published and distributed by RTMA, 1317 F St. NW., Washington.

ABC ordered coast-to-coast TV network facilities from AT&T Dec. 2—first TV network to do so—although hookup isn't scheduled for completion until late 1951. Other networks are expected to follow suit before end of year. New facilities will link Omaha and San Francisco, via Denver and Salt Lake City microwave relay. ABC-TV sales v.p. Fred Thrower predicted "majority of our advertisers will convert from a delayed program basis to live programs" as soon as facilities are available.

FCC Chairman Wayne Coy addresses New York State Publishers Assn. in Buffalo Jan. 16; his subject will be mainly TV.

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
January 6, 1951

OPTIMISM IN CHICAGO, TRADE WELL UP: Rugged days are ahead for TV-radio production and trade -- but optimism was prevailing note at distributor conventions this week.

Optimism persists despite the dark news from abroad, tightening Washington controls, rumblings from some factories (see p. 2).

For one thing, this week's trade took decided turn for better. Plentiful TV inventories were reported moving fast enough to hearten the hardest-hitting dealer. Reason wasn't hard to find:

Newspaper headlines about scarcities of raw materials and possible substitutes -- if, indeed, merchandise would be available at all -- have prodded many recalcitrant customers into stores to get that long-deferred TV set. They're even saying they think they'll keep the old car, buy a TV for cash with down payment an auto would require -- and they're buying upper-line models.

* * * *

Nor was that optimism dampened by what distributors heard from top factory folk at Chicago conventions this week. Though the common refrain was "defense must come first," they were told things looked right for a good first quarter 1951.

Beyond that, few would venture -- although the always effervescent Jimmy Carmine told Philco distributors that the industry is geared to serve both military and civilian requirements; that, though industry can now only figure ahead "by quarters," he thought Philco distributors could "look to a good 6 months unless things get drastic."

Hence, though many distributors-dealers have complained they're overloaded with inventory, when it came to signing on the line for proffered goods, the distributors signed for all they could get. Word was that neither Admiral nor Motorola met much resistance from distributors at their Chicago signing sessions. Philco, of course, stressed white goods at its Palmer House meets; its TVs came out several weeks ago (Vol. 6:52), as did RCA's (Vol. 6:51).

Admiral astonished everyone by boldly coming out with 35 TV models, only 3 low-end table models being held over from old line and at same prices, plus 12 new radios (for details, see Topics & Trends, p. 10). Motorola has 18 models, all new, prices up $5 to $40 (see Topics & Trends), plus complete new line of auto radios.

Westinghouse, Hallicrafters and Bendix also had new receivers this week, and several dozen more will have them this month -- some displaying at Chicago's American Furniture Mart, Merchandise Mart and hotel showrooms next 2 weeks.

* * * *

Defense emergency's impact on civilian economy was main theme of Admiral, Philco, Motorola conventions, each attended by full delegations. Most heartening words we heard came from Philco's president Balderston:

"We have every reason to believe that during this rearmament period we will have a mixed economy, part civilian and part military...We propose to reserve as much of our presently-existing facilities for civilian production as possible and use newly-acquired facilities for defense work. Of course, if at any time the Govt. requires all of our facilities, we will make them available without hesitation.

"On the basis of present govt. planning for the next 18 months, there will be $10 spent on civilian goods and services for every $1 spent for defense production. The productive capacity of this country has increased so much during the last 10 years that experts agree there is sufficient capacity to take on defense program ahead of us and still keep the civilian economy in healthy, vigorous condition."

This view was encouraged by the Washington reports that mobilization chief Charles E. Wilson had stated that, even though we may have to go through a "period

of scarcity," he wanted to "make it crystal clear that it is our intention and hope that it won't be necessary to maintain an economy of scarcity."

* * * *

Admiral's Ross Siragusa told some 1000 delegates and guests:

"Barring a complete and wholly unexpected reversal in the international situation, there is no question but what production of hard goods such as TV receivers and appliances will be sharply curtailed during the next few months." But he thought first quarter has enough manpower and materials to maintain production reasonably close to "best rates we reached in third and fourth quarters last year."

Siragusa warned against expecting goods will move without sales effort, said Admiral "looks for business in the first half of 1951 to be a slugging match for the consumer's dollar." But the demand is there, he said -- despite tightening of purse strings, credit controls, and the draft which accelerates marriage rate but actually reduces rate at which new homes are established because the new groom must return to his camp. Nevertheless --

"Not only is TV the most wanted consumer durable on the American market today, but it also has one of the lowest saturations. Only one-third of the families within a 40-mi. radius of the 63 cities [with telecasting] have TV receivers. Many sets are outmoded 7 & 10-in. models, which means that a large replacement market is rapidly building up...The TV market has scarcely been scratched. We will be years reaching the 95% saturation that radio now has."

* * * *

Motorola's convention, which we weren't privileged to attend, was told that first quarter TV output would be 20-50% below last two quarters, but company had planned it that way last Sept., has commitments assuring this year's first quarter better than last year's. Fact is, president Paul Galvin reported, the Washington procurement picture is shaping up and "the brains of the country are coming to the forefront, as always." Motorola spokesmen promised "a busy 6 months ahead."

* * * *

It may or may not be beginning of a slide -- but fourth December week, which was the full pre-Xmas week ending Dec. 22, showed exceptional drop in output. RTMA projected figures for week show only 169,635 TVs, 301,601 radios, down from preceding week's 203,290 & 351,354 (Vol. 6:52). We're told inventory-taking may account for drop. Fifth and final week figures aren't available at this writing, so that it's impossible to close year's estimates. For first 51 weeks of 1950, however, output adds up to 7,402,724 TVs, 14,186,499 radios.

SHAPE & SIZE OF 1951 PICTURE TUBES: "Tube of 1951" will be 17-in. rectangular unless something drastic happens. Last year's mass item, 16-in. round or rectangular, is well on its way out. Coming up fast is 20-in. rectangular, but 19-in. round will comprise bulk of "big end" of some receiver lines for quite a while. Second quarter may see 21-in. rectangular emerge into sizable production.

That's present outlook, as derived from current production and plans of leading glass and tube makers.

Corning's 17-in. rectangular is now its biggest item, but 20-in. rectangular already comprises some 25% of total bulb production. Demand for 14-in. is quite small, while 10, 12½ & 16-in. rounds are still being made, many for replacement.

American Structural Products Co. (Owens-Illinois' Kimble) is in heavy 17-in. production, still produces 16-in. rectangular for those set-makers who haven't yet built sets to take 17-in. Some 19-in. rectangulars are being turned out, but no great amount. Company is considering 21-in. rectangular, but hasn't yet decided it warrants expensive tooling. Increased demand for 14-in. -- nothing striking -- has been noted.

Neither glass maker is worried about shortages. Glass uses almost no strategic materials, wasn't short during last war. As one official put it: "Set production will be limited by many other materials, but not by glass."

RCA's 17-in. metal-coned rectangular is its principal item, featured in new line (Vol. 6:51). It will continue 16-in. rounds for those manufacturers who need

them. RCA's "big" tube will continue to be 19-in. round, during first quarter at least. Present plans call for 21-in. metal-coned rectangular during second quarter. It may employ electrostatic focusing, because of cobalt shortage (see p. 1).

For 1951 as a whole, biggest tube-maker RCA expects this lineup: 14, 17 & 21-in., all rectangular. They would succeed this year's 12½, 16 & 19, all round.

Pittsburgh Plate, big supplier of face plates for metal-coned tubes, says 16-in. round, which has been its major production item (19-in. close second), will shortly be nosed out by 17-in. rectangular. Company says it has been rushed, since it's only maker of rectangular face plates. One reason for slow emergence of 21-in. metal-coned rectangular, officials say, is lack of capacity for its face plates. Company has sizable expansion program under way, to be completed in spring.

* * * *

Basic sizes are foregoing. You can expect a few 24, 28, 30-in., but not many. Big question for everyone, of course, is nature of future public demand. Higher prices, credit controls, etc., tend to accentuate demand for smaller, cheaper sets. But scarce materials, meaning fewer units, encourage manufacturers to push higher-priced sets to keep dollar volume up even if unit production goes down. Ability to judge those two factors is sort of thing that separates the men from the boys in the manufacturing business.

Financial & Trade Notes: In recounting Philco's achievements during 1950—"our greatest year"—president Wm. Balderston told distributors convention in Chicago Jan. 4 that its TV business increased nearly 300% in 1950 over 1949, radio 25%, refrigerators 40%, freezers 20%, air conditioners 50%, ranges 300%, accessories 20%. Even telecasting (WPTZ, Philadelphia) has completed "its second year in the black—very substantially in the black."

Philco sales volume will run about $335,000,000, up 56% from the $215,000,000 of 1949, he reported, and profits will be about $4.18 per share on new split (2-for-1) stock after allowing for normal corporation tax and new excess profits tax. (1949 net earnings were $3.17 a share on 1,678,778 old shares.) Annual dividend rate has been set at $1.60 per share, and special year-end stock dividend of 5% is to be paid Jan. 10. Working capital is up from 1949's $33,700,000 to "well over $40,000,000 as of Jan. 1, 1951." Mr. Balderston noted that an increasing number of Philco distributors have become stockholders.

Pre-Korea, Mr. Balderston stated, Philco had an expansion plan involving $16,000,000 for increased facilities for making ranges, tubes, TV coils and tuners, TV receivers, and a multi-million dollar plan for refrigeration. "Now," he said, "in view of the tremendous demands which the Govt. is placing on us for electronic and radar equipment, we are, of course, revising our expansion program . . . [It] is being restudied and will not be released again until such time as the govt. requirements are more clearly determined."

* * * *

Avco's switch from an obscure holding company to a big hard-selling manufacturer of consumer durable goods, all in 5 quick years, is theme of article in January *Fortune* —"Avco's Expanding Universe." Article calls move "almost unique in U. S. corporate history, the more so because no shareholder blood has been spilled along the way." Article goes into personality of top management, structure of company, plans, history. Avco has grown from sales of $53,000,000 and $1,300,000 loss in 1946 to estimated $250,000,000 sales and $14,000,000 net in 1950 —with Crosley Mfg. Div. accounting for $7,500,000 of net. Story gives most space to Crosley, telling how it rose to third place from also-ran position in refrigerators; how Crosley Broadcasting Corp. continues to be big money maker; how its James Shouse ranks No. 3 in Avco, after chairman Victor Emanuel and treasurer Walter Mogensen. Besides Crosley, Avco comprises: New Idea Div. (farm implements); American Central Div. (kitchen cabinets, sinks); Lycoming-Spencer Div. (engines, boilers); New York Shipbuilding (warships); ACF-Brill Motors (streetcars, buses); and newly-purchased Bendix Home Appliances (washing machines).

* * * *

Leonard Ashbach's Wilcox-Gay Corp. and wholly-owned Garod Radio Corp., including Majestic Division, reports net sales of $6,077,227 and net profit after taxes of $525,185 from Sept. 1, 1950, date of merger, to Dec. 31, 1950. Both Charlotte, Mich. and Brooklyn plants are currently producing TV-radio receivers as well as military electronic equipment.

Sylvania president Don G. Mitchell reports company's expanded operations will result in better than $150,000,000 sales for 1950, highest ever, and comparing with $102,778,320 in 1949 when net income was $3,502,840.

Magnavox ended 1950 with sales in excess of $40,000,000, of which about $25,000,000 was produced during last 6 months, reports president Frank Freimann.

Aerovox Corp. reveals profit of $1,470,741 ($2.19 per share) on sales of $17,033,000 for first 9 months of 1950. November sales hit new high at $2,400,000.

Cornell-Dubilier reports net income of $1,757,524 ($3.96 per common share) for year ended Sept. 30, 1950 vs. $450,785 (86¢) for 1949 fiscal year.

* * * *

CBS has granted options on 7000 shares of Class B stock to president Frank Stanton and 3000 to executive v.p. Joseph H. Ream, purchase price set at $24.75 and expiration date Dec. 8, 1957. At last reports, Mr. Stanton owned 810 Class A shares, Mr. Ream 100.

ABC sold $35,124,625 worth of radio, $6,470,510 worth of TV time during 1950, compared with $42,342,225 & $1,391,991, respectively, during 1949.

Dividends: Stromberg-Carlson, 10% common stock dividend payable Feb. 1 to stock of record Jan. 15; Hoffman Radio, 25¢ payable Jan. 10 to holders of Dec. 27; Howard W. Sams & Co., 10¢ payable Dec. 28 to holders of Dec. 20; Zenith, 50¢ payable Jan. 31 to holders of Jan. 10; Olympic Radio, 25¢ payable Jan. 16 to holders of Jan. 5; Tung-Sol, 25¢ payable Feb. 1 to holders Jan. 15—paid 50¢ last August, $1.25 in November.

Topics & Trends of TV Trade: Admiral bucks trend to fewer models, showing line of 35 TVs and 12 new table radios—only 3 of TVs being carryovers—at opening of distributors convention in Chicago Jan. 4. All TV chassis are virtually same, with 20 receiving tubes, and prices (excise tax included) hold quite close to those last quoted on comparable previous models (Vol. 6:44). In fact, low end of line, the 3 plastic table models carried over, retain same prices, namely, Models 14R12, 14-in., mahogany, $199.95; 16R11, 16-in. ebony, $239.95; 16R12, 16-in. mahogany, $249.95.

Only other table models, both plastic and both new, are 17-in.—17K11, ebony, $269.95; 17K12, mahogany, $279.95. Remainder of Admiral line are all 17 & 20-in., all wood save low-end console, main feature being new gold framing of picture tube to give illusion of bigger picture, and tilted to overcome glare. The line:

TV-only consoles, 17-in.: Model 27K12, plastic, mahogany finish, $299.95; 27K15, modern, open faced, walnut, $339.95; 27K16, same, mahogany, $349.95; 27K17, same, blonde, $359.95; 27K25, modern, half doors, walnut, $369.95; 27K26, same, mahogany, $389.95; 27K27, same, blonde, $409.95; 27K35, traditional, half doors, walnut, $379.95; 27K36, same, mahogany, $399.95; 27K46, period, long doors, mahogany, $419.95.

TV-only consoles, 20-in.: 221K16, semi-modern, open, mahogany, $439.95; 221K35, traditional, half doors, walnut, $469.95; 221K36, same, mahogany, $489.95; 221K26, period, full doors, mahogany, $509.95; 221K28, Provincial, maple with fruitwood finish, full doors, $525.

Combinations are all offered with AM and 3-speed phono, FM optional and obtainable in same cabinets but with added circuit in "Dynamagic" chassis at $30 more. The combinations are topped by three 20-in. receivers called "Tele-Bar" which incorporate a completely equipped built-in bar with shelves, glass racks, storage space, etc. It's offered in mahogany, blonde or silver fox at $845, $895, $895, respectively, and its "publicity" value as a window item is regarded enormous. Admiral's combinations are:

17-in.: 37K15, semi-traditional, 2 half doors, walnut, $449.95; 37K16, same, mahogany, $469.95; 37K27, modern, half doors, blonde, $499.95; 37K35, traditional, 4 doors, walnut, $499.95; 37K36, same, mahogany, $519.95; 37K38, French Provincial, fruitwood finish, $525.

20-in.: 321K35, semi-modern, 2 half doors, walnut, $599.50; 321K36, same, mahogany, $619.50; 321K15, traditional, 4 doors, walnut, $695; 321K16, same, mahogany, $725; 321K27, modern, 2 long doors, blonde, $795; 321K18, period, long doors, fruitwood, $795; 321K46, mahogany Tele-Bar, $845; 321K47, same, blonde, $895; 321K49, same, silver fox, $895.

Admiral's all-new line of radios was predicated, said v.p. Dick Graver, on conviction that "demand will be as strong as 1950, perhaps stronger, due to international news." But no radio consoles were in line, which has five table models at $20, $23, $25, $28 & $30; two clock radios (first for Admiral) at $40 & $45; two table radio-phonographs at $80 & $90; 3 portables (not to be delivered until March) at $30, $33 & $37.

* * * *

Tele-tone moves to Bayway Terminal, Elizabeth, N. J., Jan. 31, but maintains sales offices at present New York address (540 W. 58th St.). New 250,000 sq. ft. plant will employ 2500 people at capacity, will have $1,000,000 worth of equipment, company states.

Featuring Hallicrafters' trade meetings is clever parody on recent acrimonious Halligan-Coy exchange of correspondence on color TV (see Special Report, Vol. 6:44). Verses are sung to tune of *Mr. Gallaher & Mr. Shean.*

Motorola showed all-new 18-set line to distributors Jan. 4 at Congress Hotel, Chicago. Line comprises one 14-in., eleven 17-in., six 20-in., with prices on most sets $10-30 above comparable models in last year's line after price rises last November (Vol. 6:44). Featured item is 20-in. table model with demountable legs at $379.95. Big sales gimmick is concave safety glass, said to reduce reflections by 98%. Motorola officials had distributors holding up lighted matches in darkened auditorium to prove worth of "Glare-Guard" device. Here are the sets (prices include excise tax):

14-in.: 14T3X1, mahogany plastic table, $219.95.

17-in.: 17T3X, mahogany plastic table, $259.95; 17T4, mahogany wood table, $289.95; 17K5, mahogany console, $329.95; 17K6, maple console, different cabinet, $399.95; 17K7, mahogany console, $379.95; 17K7B, blonde console, $399.95; 17F6, mahogany console, AM-FM-phono, $529.95; 17F6B, blonde console, AM-FM-phono, $549.95; 17F7B, blonde console, AM-FM-phono, different cabinet, $579.95; 17F8, mahogany console, AM-FM-phono, different cabinet, $579.95; 17F9, mahogany console, AM-FM-phono, different cabinet, $499.95.

20-in.: 20T1, mahogany table (demountable legs), $379.95; 20T1B, blonde table (demountable legs), $399.95; 20K1, mahogany console, $429.95; 20K1B, blonde console, $449.95; 20K2, mahogany console, different cabinet, $489.95; 20F2, mahogany console, AM-FM-phono, $700.

* * * *

Westinghouse showed new line of 7 sets, plus 3 held over from 1950 line, to Jan. 5 distributors meeting at Chicago's Blackstone Hotel. Sets averaged $20-$90 more than comparable models after last price hike (Vol. 6:42). Here are the sets:

16-in. rect.: 643K16, mahogany console, $375.

17-in. rect.: 635T17 (Dorset), plastic mahogany table, $259.95; 640T17 (Andover), wood mahogany table, $279.95; 639T17 (Fenway), wood blonde table, $299.95; 641K17 (Brentwood), mahogany console, $369.95; 646K17 (Shelton), mahogany console, half doors, $399.95; 647K17 (Warwick), blonde console, half doors, $425; 633C17 (Manorcrest), mahogany console, AM-FM-phono, $535; 634C17 (Lansdowne), blonde, AM-FM-phono, $560.

20-in.: 642K20 (Stratton), mahog. console, doors, $495.

Westinghouse holds next meeting Jan. 12 at New York's Barbizon Plaza; Jan. 27 at Western Furniture Mart, San Francisco.

* * * *

Bendix's 1951 line consists of 6 sets—2 carried over from last year with $20 price increases. Sets, which include excise tax, are: 17-in.: T170, plactic table, $239.95; 2070, mahogany wood table, $279.95; C174, mahogany console, $299.95; 7001, mahogany console, doors, $339.95; C172, mahogany console, doors, French Provincial, $399.95. Models 2070 and 7001 were introduced last October (Vol. 6:43). 20-in.: C200, mahogany console, doors, $479.95.

Despite fact that TV excise tax was collected for first time, Govt. received $532,000 less in 10% manufacturers' taxes on civilian electronic equipment and components in November ($5,359,960) than in October ($5,892,095). This is mainly because manufacturers have until Dec. 30 to file November's tax, so large majority of TV tax collections won't be reflected until December figures are released. Figure for November 1949 was $3,139,966.

Tele King chairman Louis I. Pokrass was reported in Jan. 5 dispatch from St. Thomas, Virgin Islands, as announcing his company has organized corporation there to make TV-radio receivers and other electronic devices.

No new Majestic sets for 1951, president Leonard Ashbach announces. Present line carries over unchanged.

New advertising standards have been added by National Better Business Bureau—result of first ad run by American Television Dealers & Mfrs. which roused storm of disapproval when it appeared pre-Xmas (Vol. 6:47). BBB says copy theme of ad was scoffed at by psychiatrists, condemned by educators, found to be more offensive to more persons than any previous published advertising known to the Bureau. New BBB "commandments" are that advertising should not: (1) Undermine child-parent relations. (2) Imply neglect of family responsibilities, or that failure to buy a product contributes to maladjustments. (3) Make use of inaccurate assumptions regarding psychological problems. (4) Use themes tending to upset stability, unity of family life. (5) Be used irresponsibly.

Appliance manufacturers are cutting back production under shortage blow. Westinghouse laid off 350 workers in Springfield, Mass., plant (refrigerator units, vacuum cleaners, milk coolers, fans). GE's vacuum cleaner division discharged 60 workers because of aluminum and other shortages. Apex Manufacturing (vacuum cleaners, washers) has laid off 200 men, 7% of working force. Frigidaire said it will have to lay off 500 temporary employes at Dayton plant next week.

Plant expansions: Utility Electronics Corp., engaged entirely in govt. contract work, has leased 90,000 sq. ft. of factory space at 900 Passaic St., Newark, tripling its present area at 240 Passaic St. . . . Stewart-Warner during March transferring Chicago TV-radio manufacturing operations to new 100,000 sq. ft. factory (former Apex Paper Box Co. plant) on city's west side, housing all division's 1500 employes . . . GE buys 5 buildings, 3 one-story warehouses at Hudson Falls, N. Y., from Union Bag & Paper Corp., will use them for manufacture of capacitors.

November retail TV-radio sales plunged 26% below October in independent stores in 45 cities of more than 100,000 population, Commerce Dept. survey shows—graphically illustrating effect of Regulation W, combined with excise tax and color confusion. Sales were 8% below November 1949 figure, with first 11 months' sales 27% higher than same 1949 period.

———■———

Trade Personals: John A. Kuneau, ex-J. Walter Thompson v.p. handling Eastman and Ford accounts, named Philco director of public relations, taking over part of duties of v.p. Courtnay Pitt . . . H. J. Allemang, senior partner of management consulting firm of Stevenson, Jordan & Harrison, elected Philco v.p. . . . Robert Brown, ex-Philco & RCA, new Capehart-Farnsworth director of purchases, succeeding E. S. Needler, resigned . . . Verne Roberts, Wilcox-Gay sales mgr., has resigned . . . Lynn Eaton, Andrea sales mgr., given added duty of mobilization director in charge of govt. contracts . . . Herbert Rosengren promoted by DuMont to head newly created cabinet styling dept. . . . A. D. Plamondon III appointed Midwest sales mgr., Indiana Steel Products.

With RCA engineering products v.p. W. W. (Wally) Watts called to staff of DPA chief Gen. Harrison, as of Jan. 8 (see p. 4), it's expected that his department's gen. sales mgr. T. A. (Ted) Smith will take over his duties. This week, RCA Victor v.p.-gen. mgr. Walter A. Buck realigned other top personnel, setting up new mobilization planning dept. to handle govt. relations and production. As of Jan. 1, distribution v.p. Robert A. Seidel became special asst. to Admiral Buck; Harold M. Winters was assigned to Joseph Elliott's staff as director of consumer products distribution; H. V. Somerville joined v.p. L. W. Teegarden's staff as director of technical products distribution; added to duties of v.p. Charles M. Odorizzi was administration of regional offices; Ralston H. Coffin was assigned as director of consumer products advertising, Julius Haber as director of technical products advertising.

Mobilization Notes: Is it secret? Commerce Dept. Jan. 5 set up clearing house to help public "guard voluntarily against release of information which would endanger national security." Commerce Dept. cites examples of questions already submitted to Govt., including this one: "A maker of electronics equipment asked whether a proposed radio broadcast on technological aspects of his products would be a security violation." Inquiries should be addressed to Office of Technical Services, U. S. Dept. of Commerce, Washington 25, D. C. OTS will check them with proper govt. specialists and agencies, then forward answer to inquirer.

Maybe you've never heard of barium carbonate, but—like almost everything else—it's in short supply and NPA is getting ready to slap limitations on its civilian use. Advisory committee from barium carbonate industry blamed shortage on rapid expansion of TV industry. It's used to coat cathodes in almost all electron tubes. For this use there are no known substitutes. It was once used to bind flourescent screens to glass on picture tubes, but was supplanted by other compounds. Large quantities of the chemical were used in munitions during World War II, but Munitions Board spokesmen said formula changes would result in lower military demand.

Defense Minerals Administration has added more than 50 minerals to list covered by anti-hoarding and anti-profiteering provisions of Defense Production Act of 1950 (DMA order No. 1). For the most part they were the raw and ore forms of those materials listed by National Production Authority in similar action last week (Vol. 6:52). Included are iron ores and concentrates, cobalt, nickel, copper, lead, zinc, tungsten, molybdenum, mica, etc. in crude form.

Civil defense communications aids, engineering and equipment will be provided communities by GE through committee headed by marketing manager E. H. Vogel and including representatives of all GE Electronics Dept.'s operating divisions. Named to new post of civil defense planning coordinator was Neal F. Harmon, former sales engineer in Atlanta. Backbone of civil defense communications is expected to be 2-way equipment, which GE proposes to make in former tube plant at Utica, N. Y.

America's civilian air transport system was authorized by NPA Jan. 5 to use "DO" (defense order) top priority ratings to procure equipment, including electronics, for maintenance and expansion of commercial airlines and Federal Airways System (NPA Delegation 6).

Labor relations and the mobilization economy is subject of RTMA's seventh annual Industrial Relations Conference scheduled for Jan. 17-18 at New York's Statler Hotel. Speakers will be Ewan Clague, commissioner of labor statistics, Labor Dept.; William A. Gomberg, management engineering director, International Ladies Garment Workers Union (AFL); Prof. George W. Taylor, U of Pennsylvania.

Hundreds of its technicians are on duty as civilian assistants to military in Korea and 16 other countries throughout world, reports RCA Service Co., through v.p. P. B. Reed, who recently returned from inspection tour of Pacific and Far East bases. He said company now has more men on military work in the field than at any time during World War II.

Govt. procurement and industrial mobilization machinery will come under scrutiny of Senate Small Business Committee in public hearings beginning Jan. 17. Top mobilization officials Charles E. Wilson, Wm. H. Harrison and W. Stuart Symington will be questioned whether National Production Authority regulations are hurting small business and encouraging grey or black markets.

Telecasting Notes: A few headlines and excerpts from 290-page 45th anniversary edition of *Variety* Jan. 3, which more or less set tone of its fulsome treatment of TV: "The TV Winter of Our Discontent. Some Reflections on the New Turbulence That's Gripped Show Business in an Era When 'Radio Is Only Half Destroyed and TV Is Only Half Built' "—by Carroll Carroll . . . "RCA Prexy Envisions Radio's Importance Anew in the 1951 War Effort; Tele's Next Big Advance"—by Frank Folsom . . . "Despite Exhibs' Gripes, the Nation's Leading Theatre Execs Seek to Harness TV" . . . "Television's Senile Celluloid, or Dragging Out Those Old Pix"—by Eugene Burr . . . Now it's official: Soviet Tass News Agency, reporting on American "depravity, decadence, pessimism and escapism from life" in 1950, observes that TV is creating "a new threat to the already low level of culture in the United States" and creating a "generation of imbeciles" . . . *Billboard* reports 4-year contract between Burr Tillstrom and NBC-TV probably makes creator of *Kukla, Fran & Ollie* the highest paid puppeteer in the world—at $10,000 per week first 2 years, $11,000 third year, $12,600 fourth . . . New Television Authority (TVA) wage scale is reported by *Billboard* to have added $2926 to Westinghouse's weekly bill, formerly about $16,000, for *Studio One* on CBS-TV . . . NBC's Los Angeles KNBH shortly will drop a.m. programs, will sign on at 12 noon and run to midnight; it's now operating 9:30-12:30 p.m., silent until 4 . . . CBS fired 3 announcers and 3 engineers of its Chicago AM station WBBM for letting profane remarks of one announcer get out over air during Rose Bowl game station-break . . . *Howdy Doody* has so impressed Wall Street that new firm, Kagran Corp., was formed, bought rights to all names and characters on program from co-owners Martin Stone and Bob Smith; new owner contracted to give NBC exclusive TV rights . . . First winner of Majestic's "Mighty Monarch of the Air" award, based on poll of TV editors, is John Cameron Swayze for his *Camel Caravan* on NBC-TV; monthly awards are backed up by Majestic ads in TV cities . . . Baltimore's 3 TV stations will combine to carry inauguration of Maryland's Governor-elect McKeldin from Annapolis Jan. 10; for WMAR-TV, key station, it's 900th remote telecast . . . WOR-TV, New York, has filed plans with city authorities for 2-story TV studio and office building at Columbus Ave. & 68th St., now parking lot, to replace present studios at 28 W. 68th . . . CBS reports 36 employes, mostly reserves, have gone into military service since Aug. 4 . . . Cincinnati's WLW (Crosley) has completed own studios in Washington's Wardman Park Hotel.

More Jan. 1 rate rises: WLWT, Cincinnati, base hourly rate from $550 to $700, one-minute rate from $70 to $100 (with special new premium $250 rate); WLWC, Columbus, and WLWD, Dayton, $375 to $500 & $50 to $75 (with special new premium $200 rate); WKRC-TV, Cincinnati, $500 to $700 & $65 to $78; WCPO-TV, Cincinnati $500 to $700 & $70 to $77; WTCN-TV, Minneapolis-St. Paul, $500 to $650 & $100 to $130. [For digests of all station rate cards, and full network rate cards, see *TV Factbook No. 12.*]

"Hoffman Plan" isn't the answer, Pacific Coast Conference said in effect Jan. 5 when it banned televising of its 1951 football games. Hoffman plan (Vol. 6:35, 51) guaranteed gate receipts of 30 games telecast last year, but conference commissioner Victor O. Schmidt said "the conference is not so disturbed over financial losses as in the fact of half-filled stadia."

Merrill (Red) Mueller, NBC newsman in San Francisco, recently news chief in London and during war NBC's correspondent with SHAEF, will shortly become personal aide to Gen. Eisenhower, handling public relations. His job, probably as an Army officer, will be comparable to that held by Comdr. Harry Butcher during war.

Jan. 1 sets-in-use reported since NBC Research's "census" of Dec. 1 (Vol. 6:51): Memphis, 70,144, up 5744; Omaha, 56,789, up 8589; Dallas, 56,456, up 4756; Miami, 50,000, up 5000; Fort Worth, 44,088, up 3888; Utica, 33,000, up 2800. Correction: Dec. 1 San Francisco sets-in-use (Vol. 6:51) should have been 127,000, not 147,000 reported.

Ashtabula (O.) Star-Beacon's WICA filed this week for Channel 8 in that city. Owners are R. B. & D. C. Rowley, also publishers of *Conneaut News-Herald, Geneva Free Press, Painesville Telegraph*, all in Ohio.

First week of Phonevision evoked many laudatory comments on Zenith's pay-as-you-look TV. Particularly praised was clarity of pictures, attributed to new prints being used. Public comments were summed up by remarks of Mrs. George M. White, of one of the 300 "guinea pig" families:

"Phonevision beats going to the movies the regular way. We like being able to relax at home while watching the show. I think we would be willing to pay $1 several times each week to see movies this way."

But Zenith itself discounted early viewer enthusiasm. In application to FCC this week, asking for extension of 90-day test to March 31, chief engineer J. E. Brown carefully explains that "little of significance" will be gained first month, since novelty effect will be high. However, after first month, after first bill for service comes in, "test families will tend to become more conservative." Therefore, third month will be "the most significant and dependable" for evaluation purposes.

Each of the 300 test families got booklet for first Jan. 1-6 week, titled *Zenith Presents Phonevision.* It listed pictures and stars, contained also reproductions of advertising previously used for exploitation when pictures were first shown in regular theatres.

Inside front cover contained statement emphasizing that tests are experimental, that FCC had not approved Phonevision commercially, that there was no assurance FCC would approve system. Back cover carries KS2XBS test pattern (Channel 2), with this "sales" message: "Phonevision can bring you the best in low cost home entertainment."

Pictures listed for first week, besides those reported last week (Vol. 6:52), were Eagle-Lion's *Lost Honeymoon*, with Franchot Tone; Warner's *The Unsuspected*, with Joan Caulfield & Claude Rains; Warner's *Silver River*, with Errol Flynn & Ann Sheridan; Paramount's *Dear Ruth*, with William Holden & Joan Caulfield; Paramount's *I Walk Alone*, with Burt Lancaster & Lisbeth Scott.

New York Times Jan. 3 quoted several reactions. Motorola president Paul Galvin said he and his wife were delighted and added: "I think it is an added feature any TV set owner would appreciate and I hope it will be approved by the FCC." CBS Chicago v.p. H. Leslie Atlass said, "It's fine, but I don't think it fits our broadcasting system or that it can be accepted by the FCC."

One father, non-subscriber, complained that his children watched the picture even though it "jiggled." But Zenith says image can be hashed up much worse.

Washington Post editorialized Jan. 1: "TV programs are enormously expensive. This means that sponsors can scarcely afford to cater to minority interests. But, if listeners are willing to pay for programs, they can get what they want. They can get symphony concerts, for example; they can get educational courses by top teachers in their own living rooms; they can get forum discussions . . ."

No Recession in Output or Trade, *page 6.*

TV FACTBOOK No. 12 NOW IN MAILS: Good idea of stature of TV and related industries can be had from these recapitulations of contents of our Television Factbook No. 12, now in mails to all full-service subscribers: 107 telecasting stations with time rates ranging from $195 to $3250 per hour, 4 networks, 5 stations in Latin America, 373 applications for new stations pending (frozen), 98 TV receiver manufacturers, 37 cathode ray tube manufacturers, 10 receiving tube manufacturers, 450 film-program syndicators. These are only part of the contents of 72-page directory, which also includes present and proposed VHF-UHF channel allocations; lists of station sales representatives, research firms, labor unions, etc.; tables of TV-radio receiver production by months since 1946; latest count of TV sets-in-use by areas. Inserted is 34x22-in. map in color, showing TV areas and present projected network interconnections. Cost of extra copies to subscribers is $2.50, to non-subscribers $5.

$3 BILLION TV-RADIO TRADE IN 1950: Recapitulating RTMA's weekly and monthly estimates of TV-radio output during 1950, we come up with grand total of 7,408,690 TV sets, 14,554,972 radios. Accepting these preliminary RTMA figures, we calculate that the factory dollar volume of TV-radio receivers combined was $1,676,852,225 -- meaning retail trade (including installations, service, warranties) of well over $3 billion.

TV receivers accounted for $1,317,635,516 (78.6%) of factory total, radios amounted to $359,216,709 (21.4%). These totals are derived by using average factory sales price of $177.85 per TV set, $24.68 per radio. Factory averages are those for first 10 months of 1950, derived from RCA licensee reports -- probably would be somewhat higher if November-December figures were available.

Interesting facts about 1950 TV-radio production:

(a) One TV was sold for every 2 radios (including table, console, combination, battery, portable and auto radios) -- despite fact telecasting service is as yet available to only 63 areas embracing not much more than half U.S. population.

(b) December was highest production month (5 weeks), accounting for 879,075 TVs, 1,602,055 radios -- final December week (post-Xmas) falling to low of 105,968 TVs, 201,482 radios.

(c) Average factory price of TV table models was $139.49, direct-view consoles $189.50, direct-view TV-radio-phono combinations $271.72.

(d) Though they seemingly have all but disappeared from market, somewhere around 12,000 projection TV sets were sold by factories during year.

(e) Phonographs only, record players, AM-FM-TV apparatus without cabinets amount to rather substantial business, though not usually reported; for first 10 months of 1950, 95,824 such units valued at factory at $16,784,305 were shipped.

(f) Cumulative total of all TV receivers produced since 1946, when industry had its postwar rebirth, can roughly be estimated at about 11,600,000. [For yearly breakdowns, see TV Factbook No. 12.]

Note: Foregoing 1950 unit production figures are subject to revisions by RTMA statistical committee, probably upward.

JAN 1 0 1951

HOW 'UTILITY' TVs CAN SAVE MATERIALS: Just about every TV manufacturer with a laboratory has a "utility receiver" (Vol. 6:47) in the works -- on drawing boards or ready for production. But, like Philco, which was first to tell about it (Vol. 7:1) no one wants to put out such a set if it can be helped. They say they'd rather cut output first -- and indeed Crosley, Hallicrafters, Motorola, Olympic, among others, have done this already.

But probability that defense requirements may make necessary such materials-conserving receivers has forewarned manufacturers. Their ingenuity has led them to such considerations as these:

(a) Selenium rectifier in lieu of transformer. Selenium rectifiers, still in good supply, are used as voltage doublers. Saving here would be copper and steel. Motorola, Emerson, et al, had transformerless sets several years ago.

(b) Electrostatic cathode ray tube in lieu of present magnetic-types (Vol. 7:1). This saves alnico (aluminum, nickel, cobalt). But circuit changes are necessary, so most want to hold out against electrostatic tube as long as possible. One manufacturing-engineering executive opined answer might be use of electrostatic tube in some sets, continuance of electromagnetic in others. Many early 7 & 8½-in. tubes were electrostatic, so there's plenty of know-how.

(c) Loudspeakers with smaller magnets (Vol. 6:52). This, too, saves alnico.

(d) Reduction in number of tubes. This could be accomplished easily, with set still suitable for metropolitan area viewing (10-20 mi. from transmitter). It would, however, cut down sale of such sets for fringe viewing.

These are the major changes in TV-radio's conservation program. There are others -- elimination of built-in antenna, use of finer gauge wire, for example.

Philco's president Wm. Balderston told Chicago distributor convention last week (Vol. 7:1) how his engineers' efforts make possible a receiver using 85% less cobalt & nickel, 67% less silicon steel, 25% less copper & aluminum.

Note: "Utility" set should not be confused with "austerity" model. Latter would actually be a degraded set; former, theoretically at least, should be not less efficient than present sets.

'MOUNTAIN-TO-MOHAMMED' EASES FREEZE: A sort of "antidote to the freeze" -- limited, to be sure, but possessing intriguing possibilities -- is the "community" receiving antenna. It received strong hypo this week.

Idea is quite simple: High-gain receiving antenna is installed on an elevated point in or near town located in valley or too far away to get good signals (fringe area). Signals are amplified, fed into homes via coaxial.

Nor is idea new: First installation we recall was that in Astoria, Ore., where engineer E. L. Parsons picked up Seattle's KING-TV, 125 miles away (Vol.5:33).

What is new is heavy weight being put behind projects. Philco is giving plan tremendous push, garnering reams of publicity (including big stories in Jan. 3 Wall Street Journal, Jan. 15 Newsweek, etc.) for itself and Philadelphia's Jerrold Electronics Corp. Latter makes the equipment ("Mul-TV"), also used for apartments, which is distributed by both companies.

Philco is publishing brochure giving details of representative installation in Lansford, Pa., 70 miles northwest of Philadelphia. Here's how it worked there:

Four radio dealers and an attorney formed Panther Valley TV Co., cleared matters legal and political, conducted engineering tests, obtained bank loan.

They installed antenna on nearby Summit Hill, fed signals into town (stringing cable on light and phone poles), began signing up subscribers who have choice of all 3 Philadelphia signals at all times. So far, about 100 sets have been connected, with installation charge of $100 plus $3 monthly service charge, at cost of $15,000. Entrepreneurs estimate "reasonable potential" of 750 homes can be hooked up within 6 months, at total expenditure of $30,000. But income would be $75,000 (for installation) plus some $2500 monthly in service charges.

Other towns also equipped: Mahanoy City & Honesdale, Pa.; Bellingham, Wash.

There may be more. Currently being surveyed by Jerrold are Wilkes-Barre & Scranton, Pa.; Palm Springs, Cal.; Olean, N.Y.

FCC is not involved -- in fact gave go-ahead -- because no radio transmissions are employed. State utility commission has said installations aren't public utilities. So legal barriers seem few.

Only 2 catches are suggested at moment, neither vital just now. First, equipment may soon be hard to get, although Jerrold president Milton Shapp is reported saying he has enough parts on hand to insure high production rate through June. Second, when and if new stations start operating, post-freeze, some of them may create intolerable interference and/or eliminate need for special installations. But new stations are long ways off, and re-engineering of community antennas may very well minimize interference.

Intense interest in new service is indicated by towns represented at recent meeting in Harrisburg sponsored by D. & H. Distributing Co. (RCA): Aquashicola, Bowmanstown, Centralia, Mahanoy City, Mauch Chunk, Palmerton, Selinsgrove, Shamokin, St. Clair, Tamaqua, Wilkes-Barre. RCA also has multiple-feed distribution system.

McDANIEL DUE TO BE RTMA PRESIDENT: Looks like presidency of RTMA, $50,000 job, will go to able, personable, 39-year-old attorney Glen McDaniel, RCA v.p. presently attached to staff of Chairman Sarnoff and president Folsom. He made such good impression, while working on industry's case during excess profits bill hearings (Vol. 6:51), that interim president Robert C. Sprague and others working on bill were sold on his qualifications. RTMA reorganization committee headed by Sylvania's Max Balcom takes up matter in few days, then presumably will negotiate with McDaniel, subject to ratification of RTMA board meeting in Chicago Feb. 15.

Mr. McDaniel is a native of Seymour, Tex., a 1932 graduate of Southern Methodist U, 1936 graduate of Columbia Law School. From 1936 to 1942, he was associated with New York law firm of Sullivan & Cromwell. In March 1942 he was named special counsel to then Undersecretary of Navy Forrestal, later that year being commissioned a Navy lieutenant, attached to general counsel of Navy. Promoted to Lieut. Comdr. in 1944, he worked on aircraft procurement in Bureau of Aeronautics, then was transferred to inactive duty and appointed chairman of Navy Board of Contract Appeals. He joined RCA Communications in 1946 as gen. counsel, was elected RCA v.p. in 1948.

PALEY'S GOVT. JOB, COY MAY SHIFT: Rumors were rife on Washington scene this week with respect to new posts for radio VIPs. Out of welter, these facts emerged:

(1) CBS chairman Wm. S. Paley is definitely slated for Presidential appointment as head of new Commission on Metals Resources, similar to recent President's Air Policy Commission, headed by now Secretary of the Air Force Thomas K. Finletter. Sponsored by W. Stuart Symington, head of National Security Resources Board, and Secretary of Interior Oscar Chapman (under whom Bureau of Mines functions), new board will make exhaustive study of strategic metals, needs, substitutes, explorations, etc., and will recommend national policy. Task may take 6 months or more.

(2) FCC Chairman Wayne Coy's associates are freely discussing possibility that, as defense work renders FCC regulatory functions less significant, he will take new govt. post more intimately connected with mobilization. He denies any present intention of resigning, but it's reasonable to expect that in govt. reshuffling he may be ordered to new duties before his FCC term expires June 30. That seems to be basis for persistent reports that he's leaving soon. Meanwhile, he speaks before N.Y. State Publishers Assn. in Buffalo Jan. 16, mainly about TV.

(3) Govt. is going to require services of many more electronic-radio experts and executives, will call top figures to civilian posts as soon as defense agencies are fully organized and duties more definitely oriented. Some may have to serve on $1 a year basis. Preference for industry rather than "New Deal" men is already manifest -- begining with appointments of Wilson, Harrison, et al (Vol, 7:1).

* * * *

Rumors of new Govt. communications agency, topping both FCC and Interdepartment Radio Advisory Committee, keep popping up. Each meeting of President Truman's

Communications Policy Board (Vol. 6:4,5,10,33), which met this week, seems to start new ones. But chairman Dr. Irvin Stewart, West Virginia U president and former FCC commissioner, says only this about names mentioned for posts for rumored organizations: "We have not approached any individual for any job for any organization -- and that doesn't even imply we're recommending formation of any new organization." He said report will be handed President Truman Feb. 17, after two more meetings to be held Jan. 26-27 and Feb. 12-13.

EDUCATIONAL TV—HOPES BUT NO PLANS: Educators certainly have stirred up flurry of activity, among telecasters as well as in their own ranks -- regardless of final outcome of their sweeping request for vhf and uhf TV channels (Vol. 6:48-49).

In spite of all the noise, though, cold historical fact remains that, with very few exceptions, educators have made pathetically small use of AM, FM or TV channels they have or had or could have had for the asking.

In TV, Iowa State College's pioneering WOI-TV, only school-owned station, is an outstanding exception -- but it proves no rule.

One immediate question puzzling FCC is: How can a practical allocation plan be devised? Educators promised, through counsel Brig. Gen. Telford Taylor, onetime FCC general counsel, to bring their ambitious but nebulous yearnings down to earth when hearing resumes Jan. 22.

Telecasters finally became apprehensive about lack of opposition to educators' ponderous presentation. NAB, TBA and, unexpectedly, CBS, petitioned FCC for permission to join hearing at resumption. All 3 were let in, presumably will oppose "wide-open" demands of educators for: (1) One vhf channel in each metropolitan center and in each major educational center. (2) 20% of uhf channels, as and when opened up to TV. (3) Shared time on commercial stations in cities where all vhf channels are now preempted.

* * * *

Schoolmen are beating drums -- in speeches, articles, letters to editors, broadcasts, interviews, etc. -- gaining considerable support, verbal at least. And the telecasters, made more conscious of their "educational responsibilities," are offering educators all kinds of time, program help, seminars, clinics, etc.

Sympathetic press coverage was garnered by publicity-conscious educators when they revealed monitoring activities conducted this week from New York's Waldorf-Astoria in preparation for hearing. Fifteen women watched all programs on all 7 stations, tabulating types of programs telecast. According to Jan. 11 New York Times, they considered it quite an ordeal, were particularly weary of daytime shows. Monitoring was supervised by Dr. Dallas Smythe, former FCC economist now at U of Illinois, and Dr. Donald Horton, U of Chicago.

Comr. Hennock, schools' standard-bearer, is obviously pleased with hubbub of activity and publicity, but doesn't consider telecasters' current offerings anything but token and temporary. "We don't want any sops," she says.

* * * *

Samples of telecaster activity:

NBC-TV plans "Operation Frontal Lobes," v.p. Pat Weaver saying: "We will address ourselves to the problems of selling the American people on the desirability and the necessity of attending the great cultural and informational events of our series." Network plans to take time from one advertiser per night, once per 44-week season, turn it over to fairly high-dome feature.

Detroit's WWJ-TV went to expense of paying coaxial cable tolls to Washington recently, just to give FCC commissioners and other VIPs a sample of its course-for-credit programs from U of Michigan. Some 700 people are now taking regular courses, offered in 20-minute segments of fixed Sunday 1-2 p.m. period.

Philadelphia's WFIL-TV announced that 19 colleges are cooperating with it in daily "University of the Air" comprising regular college courses, started Jan. 2.

Milwaukee's WTMJ-TV was to start Jan. 6 with similar college-course series, tying up with Marquette U, Wisconsin U, and Mt. St. Mary, Milwaukee State Teachers, Downer colleges.

New York's WPIX made flat offer to Board of Education of "facilities and time for the development of a regular educational program schedule."

Baltimore's WBAL-TV showed 2-way telecast, utilizing "split-screen" technique, between studio and classroom, enabling teacher and pupils to see one another.

Baltimore's WAAM has scheduled Feb. 16-17 seminar on "Career Opportunities in TV," with cooperation of several universities and U.S. Office of Education. It's also the staging station for Johns Hopkins' excellent "Science Review" on DuMont.

Many well-established educational programs continue, of course, without any great publicity splashes.

Cynical columnist John Crosby calls spurt of activity on part of the telecasters an attempt to "smother" educators' request for channels of their own.

Network Accounts: General Board of Evangelism of the Methodist Church has approved new interdenominational religious program that will start on ABC-TV March 5, Mon. 11-11:30 p.m.; sponsor will be separate corporation probably called America for Christ Inc. . . . Bonafide Mills Inc. (Bonny Maid floor coverings) Jan. 28 starts unnamed children's variety show on CBS-TV, Sun. 11:30-noon . . . Colgate-Palmolive-Peet Co. will sponsor *Hawkins Falls* on NBC-TV, Mon.-Wed.-Fri. 3-3:15, starting in February; will probably add Tue. & Thu. 3-3:15 shortly after . . . Sam Smith Shoe Corp. (Little Yankee shoes) Feb. 14 starts sponsorship of *Al Gannaway's Half-Pint Party*, Wed. & Fri. 4:45-5 on ABC-TV . . . B. T. Babbitt Inc. (Bab-O cleanser and Swerl Suds) will sponsor *Two Girls Named Smith* on ABC-TV, Sat. 12:30-1, starting Jan. 20 . . . Maiden Form Brassiere Co. Jan. 20 starts *Faith Baldwin Theatre of Romance* on ABC-TV, alt. Sat. 11-11:30 a.m. . . . Rosefield Packing Co. (Skippy peanut butter) Jan. 19 begins *You Asked for It* (kine) on DuMont, Fri. 8:30-9 . . . C. A. Swanson & Sons (poultry & margarine products) Feb. 25 starts sponsorship of first half hour of *Ted Mack Family Hour* on ABC-TV, alt. Sun. 6-6:30.

Station Accounts: At November's end, 4832 different advertisers were using the networks and 98 reporting stations (out of 107 total), according to *Rorabaugh Report on TV Advertising*, which monthly lists network and national regional spot sponsors and their agencies. This was 7.2% more than October, 120% ahead of November 1949. There were 170 network advertisers (ABC 40, CBS 73, DuMont 21, NBC 72), 939 national & regional spot, 3723 local-retail . . . New account on WABD, New York, is Flako Products Corp. (Flakies, Flakorn, Cuplets mixes), sponsoring *Susan Adams Kitchen* Tue. & Fri. 2-2:15, thru Platt-Forbes Inc., N. Y. . . . Socony-Vacuum replaces Studebaker Dealers sponsoring *Televiews of the News* on WPIX Mon.-Wed.-Fri. 7-7:15, John K. M. McCaffery replacing Ed Thorgerson, thru Compton Adv. . . . Special 3-station hookup has been engaged by Keystone Macaroni Mfg. Co. (San Giorgio macaroni products) for *Pietro's Place*, comedy about Italian-American family, Thu. 12-12:30 p.m., thru Lamb & Keen, Philadelphia; stations linked are WPTZ, Philadelphia; WBAL-TV, Baltimore; WGAL-TV, Lancaster . . . Miles Laboratories (Alka-Seltzer, Bactine, Tabcin) started first TV spots this week in 12 markets, thru Wade Adv., Chicago . . . Unusual sponsorship on WGAL-TV, Lancaster, was *Lebanon News Televiews* Jan. 1, prepared by staff of Lebanon (Pa.) News, 25 mi. distant, including interviews with local personalities; it's planned as weekly feature . . . Among other advertisers currently reported using or planning to use TV: Canada Dry Ginger Ale Inc., thru J. M. Mathes Inc., N. Y.; Waitt & Bond Inc. (Blackstone & Yankee cigars), thru Harry B. Cohen Adv., N. Y.; West End Brewing Co. (Utica Club beer & ale), thru Harry B. Cohen Adv., N. Y.; Paramount Citrus Assn., San Fernando, Cal. (Cal-Fame frozen orange juice, etc.), thru Vick Knight Inc., Los Angeles; Fan Tan Gum Corp. (Fan Tan chewing gum), thru Walker & Downing, Pittsburgh; Rival Packing Co. (Rival dog food), thru Charles Silver & Co., Chicago; Leigh Foods Inc., New York (Flamingo frozen juice concentrate), direct; F. W. Evanger (Evanger's Kennel Food), thru Kaufman & Associates Inc., Chicago; International Golf Products (Miracle adjustable golf club), thru Edgar Walter Fischer, Chicago; Howard Stores Corp. (Howard Clothes), thru Peck Adv.

Personal Notes: Brig. Gen. Edward Lyman Munson, USA ret., recently named director of NBC Film Division, appointed director of NBC-TV operations, reporting to v.p. Edward D. Madden . . . Merle S. Jones, gen. mgr. of KNX and CBS Pacific Network, named gen. mgr. of newly acquired KTSL (Vol. 6:52), whose call letters will shortly be changed to KNX-TV; Wilbur S. Edwards, ex-WEEI, Boston, becomes director of KNX and CBS Pacific operations, Charles Glett asst. to Mr. Jones . . . New board of KTTV, *Los Angeles Times*, following purchase of CBS's 49% stock ownership for reported $450,000, will include L. D. Hotchkiss, editor of *Times;* Harry W. Bowers, treas., Times-Mirror Co.; Harrison M. Dunham, KTTV gen. mgr. . . . Wm. Templeton named TV-radio director of Kudner Agency, succeeding Ed Cashman, back with Foote, Cone & Belding . . . John DeMott quits CBS to join Wm. Esty & Co. as supervisory producer of TV-radio commercials; Charles Jelnicki replaces him at CBS-TV in charge of special effects . . . Fred Kilian, ABC-TV program chief in Chicago, elected president of Chicago Television Council, succeeding I. E. Showerman, ex-NBC v.p. now with Free & Peters . . . Clarence Hatch Jr., executive v.p., D. P. Brother & Co., elected 1951 president of Detroit Television Round Table . . . Dean Fitzer, managing director, announces following promotions at WDAF-TV, Kansas City: Bill Bates, station mgr.; Vic Peck, asst. to mgr.; Randall Jessee, program director; Bob Dickhourt, film room supervisor . . . William Shadel, of CBS Washington news staff elected president of Radio Correspondents Assn. Jan. 10, succeeding NBC's Wm. R. McAndrew; he will officiate at annual dinner attended by President Truman and other notables Feb. 3 . . . Douglas H. Humm named TV-radio timebuyer, Charles W. Hoyt Co. . . . Added to expanded TV-radio dept. of Henri, Hurst & McDonald, Chicago: Lee Randon, ex-Ruthrauff & Ryan; David Rogers, ex-RCA; James Conway, ex-CBS.

Named consultants to State Dept. committee, in preparation for August international radio conference in Geneva, Switzerland, were E. K. Jett, former FCC member, now radio director of Baltimore Sunpapers (WMAR-TV), and Haraden Pratt, v.p., American Cable and Radio Corp. FCC chairman Wayne Coy is member of overall policy committee; Comr. E. M. Webster is an alternate. International sessions are for purpose of implementing world-wide allocation adopted in 1947 Atlantic City conference.

Trade Report
January 13, 1951

WHOLESALERS URGE REPLACEMENT SURETY: Replacement parts for TVs, radios, appliances -- will they be available during mobilization shortage period ahead? Yes, says NPA informally -- but without spelling out details or taking action.

However, 7-man task group from NPA-appointed Radio, TV & Household Appliance Wholesale Advisory Committee (Vol. 6:51) feels that specific action is due. Meeting in Chicago Jan. 9, group headed by Washington-Baltimore distributor James H. Simon (Motorola TV-radios, GE appliances) urged NPA to take these steps:

(a) Limit distributors' inventories of maintenance and repair parts to normal 120-day supply.

(b) Allow manufacturers exemption from NPA material distribution orders to fill NPA-certified orders for repair and replacement parts, or to make sufficient quantity of replacement parts when discontinuing manufacture of any product.

NO RECESSION IN OUTPUT OR TRADE: "Selective buying" and "price buying" are pat phrases that probably best characterize current TV trade. Distributors of brand-name receivers are taking just about everything the factories will offer, with no assurances of full deliveries. Dealers are becoming more "picky and choosy" and stocking mainly best values. Public is buying on pre-November scale, but mostly low-end-of-the-line -- models up to $300 moving best.

That's the picture today, as it seems to prevail in most areas -- but it's subject to quick change. From Chicago marts, which end this week, word is that most distributor-retail inventories range from moderate to heavy; that prices still trend upwards (see reports on new lines in Topics & Trends); that everyone's still playing by ear on day-to-day basis, hopeful that first quarter production and sales actually are as good as fourth quarter 1950, as some think. Hopeful, too, that Govt. will not slap on price controls and rollbacks, still threatened.

Canvassing the major manufacturers again this week, we find no lengthy shutdowns at any plants, some "interruptions" due to shortages or inventory-taking, some employment rolls down from peak but no large-scale layoffs reported except for Crosley plant in Cincinnati (Vol. 7:1).

As for shortages, they seem to differ at different plants. One factory head calls copper items his No. 1 headache, another says it's receiving tubes, another says something else altogether -- yokes, resistors, etc. All agree that time for components deliveries is decreasing, indicating that some of smaller manufacturers may have already cut back their production because, as one major producer put it, "We're getting some of the stuff that would otherwise go to others."

Military orders show signs of accelerating, but they're miniscule as yet and, even if large orders are placed, full-scale production isn't anticipated before mid-summer. Meanwhile, barring unexpected edicts from Washington, it looks like first 1951 quarter could approach fourth 1950 quarter's approximately 2,445,000 TVs, 4,320,000 radios -- and there are some who think second 1951 quarter, normally light, could run 60-75% of that.

That's wishful thinking, though, which all depends upon (a) whether public continues to buy, regarded likely, and (b) what Washington decrees, at best an uncertain factor leavened by fact that the electronics-wise authorities are frankly eager to keep civilian lines rolling so as to maintain skilled employment rolls.

* * * *

Westinghouse's Vale Freeland, director of dept. & furniture store appliance sales, told National Retail Dry Goods Assn. Jan. 9 that the metals shortage is "more critical than most people know" and adjured retailers not to "turn down any offers of carload lots from regular suppliers even if it requires a special program to buy

ahead." By March or April, he thinks, there will be "a great many unsuccessful bidders" for refrigerators, washers, TVs.

In Washington Jan. 9 for conference with NPA Administrator Fleischmann, Indiana Steel Products' A. D. Plamondon Jr., chairman of RTMA Electronics Parts Mobilization Committee, gave as his personal opinion that the industry this quarter can produce about 70% of average 1950 quarter -- or between 1,200,000 and 1,400,000 TVs. Said he: "While amount of raw material which will be available to the industry in the first quarter will be restricted, the ingenuity of the industry can be depended upon to turn out a good proportion of sets and components." He cited Philco president Wm. Balderston's statement quoted in these columns last week (Vol. 7:1).

In press conference at Chicago Merchandise Mart Jan. 9, both Admiral v.p. Richard Graver and Capehart-Farnsworth president Fred Wilson said supply outlook for next 3 months looks "remarkably good" but cautioned that curtailments thereafter could result in a black market in TV-radio receivers. And Westinghouse appliance sales chief T. J. Newcomb saw no shortages for 3 months. Said he: "Our objective is not to cut back anything. It is instead to produce more of both defense and civilian goods. We can't support a war economy without a good civilian economy."

* * * *

"Business as usual is out," RCA Victor consumer products v.p. Joe Elliott was scheduled to tell National Appliance & Radio Dealers Assn. at Chicago convention Jan. 15. Elliott urges dealers to prepare for shortages in near future, suggests these trends: (1) Standardization of picture tube sizes. (2) Increased demand for consoles and combination receivers. (3) Concentration on fewer models. He also promises RCA would make every effort to feed replacement market, warns it can only be done through diversion of materials from new production.

Hallicrafters president Wm. J. Halligan, reporting company produced about 220,000 TVs and will show gross sales of about $37,500,000 in 1950, in interview with Retailing Daily Jan. 9 forecast "tough time in 1951" -- with possibility of minor depression beginning in April or May if materials shortages force curtailments. He said retailers must "get used to carrying a normal inventory of one to 2 months supply of merchandise instead of the 2 or 3-day stocks so common when TV was expanding so rapidly."

Admiral booked $100,000,000 worth of orders for TV-radio and white goods for first 1951 quarter during distributors convention last week (Vol. 7:1)—just about double the $53,000,000 contracted in same 1950 period. In announcing this, sales v.p. Wallace C. Johnson said he expected only 70% to 80% of merchandise ordered would be manufactured due to materials shortages, hoped rest could be carried into second quarter. Admiral's 1950 sales totaled more than $230,000,000, approximately 80% TV.

Report of black market in TV receiving and CR tubes comes from National TV Dealers Assn. director Edwin Dempsey who says dealers and repairmen are being victimized by speculators peddling scarce replacement tubes at high prices, offering them in the bulk packages in which tubes are normally sent to set manufacturers. Dempsey suspects tubes may come from stockrooms of small set-makers, is contacting tube manufacturers asking tighter check to assure distribution of their products through normal channels.

January TV production for whole industry should be 500,000 sets, with gradual monthly tapering off thereafter for grand industry total of 3,000,000 sets this year. That's estimate of F. M. (Tod) Sloan, Westinghouse TV-radio division mgr. Sloan made this prediction while showing 1951 Westinghouse TV line (Vol. 7:1) to New York distributors Jan. 12.

November's receiving tube sales, by RTMA members, totaled 39,326,641, just under October's record 40,105,611 (Vol. 6:47). Eleven-month 1950 total was 344,236,998, compared with 198,753,295 for all 1949.

Top 10 TV brands in use in New York area, based on personal March 1949-Nov. 1950 survey of more than 12,500 homes by Advertest Research, New Brunswick, N. J.: RCA 29.2%, Philco 11.4%, DuMont 10.5%, GE 6.5%, Crosley 6.4%, Admiral 5.6%, Emerson 4.9%, Fada 4.7%, Motorola 4.5%, Stromberg-Carlson 2.2%. Altogether, 51 different brands of TVs were found in these homes, remaining 41 accounting for only 14.1%. Ownership by types was: table models 56.1%, consoles 32.8%, consolettes 9.6%, projections 1.5%. Asked if they were satisfied with performance of present sets, 95.6% of top 10 and 93.6% of other 41 replied in affirmative.

Bullfights and jai alai are chief spectacles on XHTV, Mexico City's first and as yet only TV outlet, which is on air only 3 hours nightly. Nevertheless, demand for sets, though costing twice as much as in U. S., has dealers overwhelmed, reports UP. Mexican Govt. recently lifted import ban to permit 10,000 sets from this country. Note: Only other Latin American TV outlets are two in Havana, one each in Rio de Janeiro and Sao Paulo, Brazil (for details, see *TV Factbook No. 12*).

When member went bankrupt, Philadelphia Television Contractors Assn. assumed responsibility for its TV service contracts. Company was Weber's, Bryn Mawr. Its failure led group to plan special fund to guarantee all its members' service contracts. Fund would be amassed by special membership assessment.

National Assn. of Music Merchants (NAMM) has set next board meeting for Statler Hotel, Washington, Feb. 6-7, with directors hosting congressmen at dinner Feb. 5.

Topics & Trends of TV Trade: Paradoxical drop in picture tube prices, while everything else is going up, went through industry this week. Sylvania led off, announcing "close to 5%" reduction on 90% of its output, giving as reason "lower costs resulting from new automatic equipment." Most important drop was in 17-in.—down from $27 to $26 (to manufacturers)—while 20-in. went down from $49.75 to $47.50; 19-in. remains same.

Other tube makers followed rapidly, as they usually do. GE priced 17-in. at $26, as did National Union; latter also reduced 20-in. from $49.75 to $43.75. DuMont has announced no cuts, but indicates it will. RCA says nothing about any new prices, points out that its new 17-in. metal-shell rectangular has been $25 since introduced last month.

Aside from production economies, strong reason behind cuts is simple fact that competition is fierce among tube makers, who have increased from 30 to 37 in last 6 months (see *TV Factbook No. 12* for complete list).

* * * *

GE's new TV line is noteworthy for fact that (a) it has no combinations, except that the old 16K1 is still available at $500, or $20 above old price, and (b) all but 3 of the 14 new models are 17-in. rectangulars. Prices average $10 to $135 more than comparable models in 1950 lines.

Two 20-in. models will go into production later this quarter: 20C150, mahogany console, $575; 20C151, blonde, $595. One 24-in. model, 24C101, mahogany console with doors at $775, is due for March production. Remainder of line, all 17-in. (prices include excise tax):

Model 17T1, cordovan lacquer finish table, $269.95; 17T2, mahogany table, $289.95; 17T3, blonde table, $299.95; 17C103, mahogany console, $319.95; 17C104, blonde console, $339.95; 17C105, mahogany console, different cabinet, $349.95; 17C107, mahogany console, half doors, $379.95; 17C108, blonde console, half doors, $399.95; 17C109, mahogany console, doors, $399.95; 17C110, mahogany console, half doors, different cabinet, $379.95; 17C111, blonde console, half doors, different cabinet, $399.95.

GE's new radio line has 7 AM table models, one AM-FM table, 7 clock radios, 5 combinations. Prices range from $22.95 to $279.95. AM-FM model lists at $54.95.

* * * *

Hallicrafters has added 9 new sets to bring 1951 line to 21 models. Prices of retained dozen 1950 sets were hiked $10 to $25. Full line—prices including excise tax:

16-in. rect.: 17810C, leatherette table, $249.95.

17-in. tables: 17803, mahogany, $279.95; 17814, deluxe mahogany, $299.95; 17815H, deluxe mahogany, different cabinet, $319.95; 17812, deluxe mahogany, different cabinet, $329.95; 17813, same, blonde, $339.95; 17811H, mahogany, AM, $349.95; 17816, mahogany, different cabinet, AM, $359.95; 17817, same, blonde, $369.95.

17-in. consoles: 17828, mahogany, $359.95; 17838, mahogany, half-doors, $399.95; 17848, mahogany, Colonial, doors, $439.95; 17849, same, blonde, $449.95; 17850, same, maple, $449.95.

17-in. console-combinations (AM-phono): 17860, mahogany, $550; 17861, same, blonde, $575.

19-in.: 20872, mahogany console, $399.95.

20-in.: 20882, mahogany console, half-doors, $479.50; 20990S, mahogany console, AM-phono, $695; 20990, same, maple, $695; 20994, same, mahogany, Sheraton, $695.

Correction: Westinghouse Model 643K16 is round 16-in. tube; price of 635K17 (Dorset), 17-in. plastic mahogany table, is $269.95; and of 633C17 (Manocrest), 17-in. mahogany console-combination, $530—not as we reported last week (Vol. 7:1).

Emerson's 12,000,000th radio was turned out this week, presented to president Ben Abrams at ceremonies Jan. 9.

Magnavox 1951 line has 16 different cabinet styles featuring 17 & 20-in. tubes, with prices $10-$30 higher than previous line. Here are the sets; prices now include excise tax, although Magnavox had previously announced tax-warranty separate (Vol. 6:44):

16-in. round: Windsor Bookcase, mahogany breakfront, $495.

17-in.: Metropolitan, mahogany table, $289.50 (in blonde, $298.50); Biltmore, mahogany console, $298.50; Playhouse, mahogany console, $359 (blonde, $369.50); Shoreham, mahogany console, $359; Cosmopolitan, mahogany console, $395 (blonde, $415); Contemporary, mahogany console, AM-FM-phono, $498.50 (blonde, $520); Wedgewood, mahogany console, AM-FM-phono, $525; Provincial, blonde or maple console, AM-FM-phono, $525.

20-in.: Hepplewhite, mahogany console, $525; Normandy, blonde, console, $525; Modern Theatre, mahogany console, phono-jack, $525; American Modern, mahogany or blonde console, AM-FM-phono, $795; French Provincial, blonde console, AM-FM-phono, $795; American Traditional, mahogany console, AM-FM-phono, $795; Embassy, mahogany console, AM-FM-SW-phono, $795.

* * * *

Olympic holds over 6 basic sets, offers 5 new ones to make 1951 line of 20 models—low end being 16-in. rect. mahogany table at $249.95. Here are remaining sets (prices include excise tax):

17-in.: 752 (Riviera), mahogany table, $269.95 (blonde, $279.95); 762 (Riviera), same with special chassis, $289.95; 753 (Monte Carlo), mahogany console, $319.95 (in blonde, $339.95); 764 (Broadmoor), mahogany console, half-doors, $369.95 (blonde, $389.95; Chinese, $449.95); 785 (Versailles), French Provincial console, doors, $429.95; 766 (Catalina), mahogany console, AM-FM-phono, $499.95 (blonde, $519.95); 769 (Prince George), mahogany console, AM-FM-phono, $569.95 (blonde, $599.95).

20-in.: 970WB (Marlboro), mahogany table, $369.95 (with swivel base, $399.95); 967 (Windsor), mahogany console, special chassis, $429.95 (blonde, $459.95); 968 (Lancaster), mahogany console, special chassis, doors, $489.95 (blonde, $519.95).

* * * *

Tele-tone 1951 line has 12 sets—8 new, 4 held over. They're divided into 5 regular, 7 higher-priced "Imperial" group, prices ranging from $10 to $30 higher than comparable 1950 models (Vol. 6:36). Here are the sets (prices include excise tax):

16-in. rect.: Model 335, mahogany consolette, $259.95. 17-in.: 359, leatherette table, $229.95; 345, mahogany wood table, $249.95; 352, mahogany consolette, $279.95; 358, mahogany console, $289.95.

17-in.: 357, mahogany table, $269.95; 365, mahogany table, different cabinet, $279.95; 355, mahogany console, $319.95; 331, Queen Anne, mahogany console, doors, $399.95; 332, French Provincial, $399.95; 333, Chinese Chippendale, $399.95. 20-in.: 360, mahogany console, doors, $419.95.

Models held over are 335, up $10; 331, 332, 339, up $30.

* * * *

Stromberg-Carlson raised prices on 3 sets effective Jan. 8. These are new prices including excise tax (increases in parentheses being from last prices): 17TM (Mercury), 17-in. table, $329.95 ($15); 17CM2 (Imperial), 17-in. console, $389.95 ($20); 119CM (Empire), 19-in. round console, $499.50 ($10).

Raytheon (Belmont) is adding 2 sets to old line (Vol. 6:27): 17-in. console with AM-phono and 20-in. console, both $469.95.

Starrett 1951 line has 9 models ranging from 17-in. mahogany table, $249, to 20-in. console with doors, $439.

Sparton line for 1951 comprises 7 sets in 15 models—all 17-in. Prices are $40-$80 higher than those for comparable sets in old line (Vol. 6:35). Here are the sets (prices include excise tax):

Tables: 5104 (Berkeley), mahogany plastic, $259.95; 5101 (Whitney), mahogany wood, $289.95 (blonde $294.95, limed oak $299.95).

Consoles: 5152 (Gramercy), mahogany, $349.95 (blonde $359.95, limed oak $369.95); 5155 (Sheffield), mahogany, different cabinet, $379.95 (blonde $389.95, limed oak $399.95); 5158 (Rutledge), mahogany, different cabinet, $399.95.

Combinations: 5188 (Westmont), mahogany, AM-FM-phono, $499.95 (blonde $509.95); 5182 (Nassau), mahogany, AM-FM-phono, $539.95 (blonde $549.95).

* * * *

Air King 1951 line has seven 17-in. and two 20-in. sets, with prices $20-$70 higher than last year's comparable models. Here are the sets (prices include excise tax):

17-in.: 17M1, metal table, $239.95; 17T1, mahogany wood table, $279.95; 17C7, mahogany console, $299.95; 17C5, mahogany console, different cabinet, $339.95 (in blonde, $354.95); 17C2, mahogany console, doors, $399.95; 17K1, mahogany console, AM-FM-phono, $499.95.

20-in.: 20C1, mahogany console, $399.95; 20C2, mahogany console, half doors, $469.95.

* * * *

Hoffman has raised prices from $2 to $20 on its line to cover excise tax, and is planning to drop 14-in. production and replace 16 & 19-in. tubes with 17 & 20-in. R. J. McNeely, director of sales, estimates production of 40,000 units first quarter of 1951, increase of 15,000 over same period last year.

Philco has dropped Model 1871 from new line (Vol. 6:52). It was 17-in. TV-phono in mahogany at $399.95. Instead, Philco now has Model 1833 in same cabinet, TV console only, at $369.95.

Sentinel line for 1951 is reported to be 7 sets ranging from 17-in. table at $290 to 20-in. console with doors at $500. Prices include excise tax and are said to be 2½%-3½% higher than former models.

Trav-Ler reports adding 2 new 14-in. models to line—mahogany table at $179.95, consolette $199.95. Noteworthy is fact Trav-Ler dropped 14-in. from mid-1950 line (Vol. 6:24-25).

New Jackson line for 1951, to be shipped in February, comprises 6 sets in 12 models. Prices run from $220 for 14-in. mahogany table to $600 for 20-in. mahogany console with AM-FM-phono.

Trans-Vue's 1951 line consists of 3 sets in 9 different models with prices ranging from $270 for 17-in. mahogany table to $450 for 20-in. console with half-doors.

Pathe reports having 20-in. mahogany console at $320; with doors, $379.50; in blonde, $379.50.

* * * *

Viewing after 11 p.m. goes on in 75% of New York area homes, at least one night weekly, according to Advertest Research's survey of 763 families. Poll indicates 50% of all TV sets are on 11-12 during average night. Before TV, 63% of these late viewers were in bed at that time. Sports rank high in popularity, but programs with highest cumulative audience are: WNBT's *Broadway Open House* 43.6%, WATV's *Stardust Theatre* 23.7%, WPIX's *Night Owl Theatre* 22.9%, WOR-TV's *Starlit Playhouse* 22%.

FCC's annual report for fiscal year ending June 30. 1950, released last week, is available (40¢) from U. S. Govt. Printing Office, Washington 25. It's useful primarily as permanent reference on statistics of number of stations, their income, etc.

Trade Personals: James B. Conkling, ex-Capitol Records v.p., named president of Columbia Records Inc., succeeding Edward Wallerstein, resigning Feb. 1 . . . **Gerald Light** named Emerson sales promotion mgr., succeeding Harold Deitz, resigned to head Emerson Mid-State Inc., Newburgh, N. Y. . . . A. E. Sinclair, ex-Zenith and Mallory, appointed industrial relations director, Federal Telephone & Radio . . . **John R. Howland,** ex-Zenith, now heading newly created office of product research, Stewart-Warner . . . **Curtis L. Peterson,** ex-Ecko Products Co., named Meek merchandising promotion director . . . J. D. Van der Veer named Tung-Sol sales mgr. for electron tube equipment . . . Sidney E. Warner leaves partnership in Aircraft Electronic Associates to become engineering and research director, LaPointe-Plasmocold . . . Donald B. Harris, ex-Collins, named technical asst. to president Hector R. Skifter, Airborne Instruments Laboratory . . . Leon C. Guest, from Picture Tube Div., named comptroller of Radio-TV Div., Sylvania . . . Aerovox appoints Frank Marshall director of manufacturer sales, succeeded by A. E. Quick, ex-Electrical Reactance Corp., as sales mgr.; Carl Bretz becomes sales mgr. of Electrical Reactance. In addition, J. Fraser Cocks Jr. becomes gen. comptroller of both Aerovox and Electrical Reactance, Carl Gulbranson succeeding him at Aerovox.

Veteran Wireless Operators Assn., comprising oldtime "brass pounders" or ship-shore operators, have reelected Wm. J. McGonigle, N. Y. Telephone Co., president; Wm. C. Simon, Tropical Radio, secretary; reelected FCC Comr. George E. Sterling to board; elected these other officers: A. J. Costigan, RCA, 1st v.p.; H. L. Cornell, Esso Shipping Co., 2nd v.p.; R. H. Pheysey, United Fruit, treas.; R. J. Iverson, *New York Times*, asst. secy. Elected to board: C. D. Guthrie, U. S. Maritime Commission retired; George H. Clark, RCA retired; Capt. Fred Muller, USNR retired; Jack Poppele, WOR.

New tri-color tube, patented (No. 2,529,485) by Thornton Chew, engineering v.p. of KFMB-TV, San Diego, is described by him as "a device employing a magnetic field in combination with a screen divided into discrete color emitting areas in such manner as to sequentially reproduce images in each of the component primary colors. Being a single-gun, single-raster tube with multiple color screen, it avoids difficulties with coincident scanning, keystoning, optical superposition and color wheels." He reports making arrangements with unnamed tube manufacturer to produce experimental models, gives "educated guess" tube might retail for 1½ times comparable black-and-white unit.

"Universal Color Scanner" is being advertised by DuMont. It reads, in part: "Operating on the principle of the flying spot scanner, [it provides] tri-color signals from any 35mm 2x2-in. color transparency. Available as outputs are an FCC-approved field sequential video color signal and 3 simultaneous video color signals which may be fed to any external sampling equipment for experimental work with line or dot sequential systems."

"Televised microscopy" is new technique developed by RCA Labs for observation of objects difficult or impossible to examine through ordinary means. Industrial TV camera, employing Vidicons sensitive to either red or violet light, is focused through microscope on living organisms which might otherwise require killing and staining. Other advantages: TV camera works in weak light, permits magnifications of 15-20 times.

Jan. 1 sets-in-use reported since NBC Research's "census" of Dec. 1 (Vol. 6:51): St. Louis, 239,000, up 17,000; Washington, 219,760, up 13,760; Pittsburgh, 212,000, up 22,000; Kansas City, 93,170, up 9670; Greensboro, 41,968, up 6068; Ames (Des Moines), 33,724 as of Dec. 15, up 3562 since Dec. 1.

Mobilization Notes: To keep clear of anti-trust charges, NPA this week announced formal regulations governing industry advisory committees (Vol. 6:30, 49, 51). Attorney General is quoted as outlining these requirements: (1) Agendas are formulated by Govt. (2) Meetings are led by full-time govt. officials. (3) Minutes are kept on each meeting. (4) Committees are restricted to purely advisory functions.

NPA's regulations make it clear that industry advisory committees are "the recognized, official instruments for maintaining contact between the NPA and industry on all matters relating to the defense program." The order says, however, that individuals or groups may seek discussions with NPA officials whether members of advisory committees or not. NPA said it tries to give representation on committees "to large, medium and small businesses, geographical distribution, members and non-members of trade associations, and various segments of a given industry." It assured industry that, wherever possible, "representatives of industries are consulted in preparation of NPA actions affecting them."

Munitions Board meets Jan. 15 with Electronics Equipment Industry Committee, first full-scale meeting since last August (Vol. 6:33). Major subject is setting up of industry list showing electronics companies and products they make—to determine how product of each manufacturer fits into list of military equipments. Also to be discussed will be procurement and production policies, with subcontracting a major item. Western Electric's Fred Lack and Munitions Board's electronics division chief Marvin Hobbs are co-chairmen of committee.

Munitions Board was reorganized this week into 5 offices, each to be headed by vice chairman serving without compensation under Chairman John D. Small. The offices and vice-chairmen: Stockpile Management, Roscoe Seybold, Westinghouse v.p.; Staff Management, William T. Van Atten, Dun & Bradstreet v.p. (temporary). Not yet appointed are vice-chairmen for Production, Requirements and Supply Management offices. Electronics Division is under Production Management.

"Shortage census" will be undertaken by RTMA's Electronic Parts Mobilization Committee to provide comprehensive evaluation of supply and demand for critical materials used in civilian electronics. Meeting in Washington this week, committee laid plans for survey, visited new NPA Administrator Manly Fleischmann. Committee's membership: A. D. Plamondon (Indiana Steel Products) and R. E. Laux (General Instrument), co-chairmen; Raymond G. Zender (Lenz Electric); Matt Little (Quam-Nichols); Harry A. Ehle (IRC); RTMA president Robert C. Sprague (Sprague Electric), ex-officio.

Severity of copper shortage was underscored this week by Defense Minerals Administrator James Boyd who said all known copper deposits available to U. S. would not meet American defense and civilian requirements. Zinc producers say Govt. will interrupt its stockpiling of that metal for 6 months, easing shortage situation. Zinc stockpile is believed largest of any non-ferrous metal.

Tubes and resistors won't come under govt. distribution or allocation orders in foreseeable future, NPA men indicate. Despite shortage of these items, they feel manufacturers are being scrupulously fair in distributing their output equitably among civilian users and coming to aid of users with emergency shortage problems.

President Truman's reference to cost of $3,250,000 for each B-36 airplane in his "State of the Union" address to Congress Jan. 3 can be translated into $525,000 in electronics for each B-36. That's based on general estimate that 15% of cost of plane goes for electronics gear. President Truman called for 50,000 planes a year.

Among unclassified military contracts for electronics and related equipment (more than $100,000) announced by Commerce Dept. for 2 weeks ending Jan. 10: Through Signal Corps, Philadelphia—Federal Telephone & Radio, $11,485,239, radio receiver components; Johnson Service Co., Milwaukee, $3,041,250, radiosondes (75,000 units); ARF Products, $2,276,090, radio sets (516); Lewyt, $1,732,-291, radio sets (1634); Mallory, $454,219, batteries (19,426). Through Navy Electronic Supply Office, Great Lakes, Ill.—Litten Industries, San Carlos, Cal., $2,000,000, magnetron tubes (5000); GE, $653,400, tubes (150,000). Through Navy Bureau of Ships, Washington—Hoffman, $600,000, radio sets (591); Air Associates Inc., Teterboro, N. J., $405,600, receiving sets (381). Sylvania received $1,496,300 in contracts for 69,500 tubes, Raytheon $1,375,-790 for 58,000 tubes, through Signal Corps and Navy.

Completion of Congressional assignments to Interstate & Foreign Commerce committees, responsible for TV-radio, brings this lineup: Senate Democrats—Johnson (Colo.), chairman; McFarland (Ariz.), Magnuson (Wash.), McMahon (Conn.), O'Conor (Md.), Johnson (Tex.), Hunt (Wyo.). Senate Republicans—Tobey (N. H.), Brewster (Me.), Capehart (Ind.), Bricker (O.), Williams (Del.), Kem (Mo.). House Democrats—Crosser (O.), chairman; Beckworth (Tex.), Priest (Tenn.), Harris (Ark.), Rogers (Fla.), Klein (N. Y.), Stanley (Va.), Sullivan (Mo.), Granahan (Pa.), McGuire (Conn.), Underwood (Ky.), Carlyle (N. C.), Williams (Miss.), Mack (Ill.), Thornberry (Tex.), Heller (N. Y.), Roberts (Ala.). House Republicans—Wolverton (N. J.), Hinshaw (Cal.), Hall (N. Y.), O'Hara (Minn.), Gillette (Pa.), Hale (Me.), Dolliver (Iowa), Heselton (Mass.), Hugh D. Scott (Pa.), Bennett (Mich.), Hoffman (Ill.), Chenoweth (Colo.), Beamer (Ind.). Worth noting is that Sen. McFarland now also has powerful job of majority leader, continues as chairman of communications subcommittee; that Texas' Sen. Johnson, who owns KTBC, Austin, is majority whip.

CBS and RCA plugged color—their respective brands—before convention of National Retail Dry Goods Assn. in New York Jan. 11. CBS president Frank Stanton, in addition to emphasizing color's sales appeal, stressed "no cost premium" for sponsoring color, saying the "electron-handling cost" is no greater than for black-and-white. RCA distribution v.p. Robert Seidel plugged for dual standards (Vol. 6:46, et seq), insisting that public should have right to determine system it wants "by its ballot in the marketplace." He emphasized RCA's willingness to telecast color during good commercial hours—"ready to stake its resources, its dollars, and its reputation," confident public "will make the right choice, as they always have."

Newark's WATV is seeking to join five other TV stations atop ideal Empire State Bldg. antenna (Vol. 6:48). Technically, it can be done, since structure was designed to take all 7 area TV stations, including WOR-TV. Design contemplates multiplexing WATV with WPIX. FCC approval was sought this week, but few objections are seen, since station would maintain main studio in Newark and cover city with better signal than it does now. WOR-TV would also be delighted to join up, but is deterred by investment (reportedly near $1,000,000) in present plant.

Chronological record of facts, dates and people in TV-radio history is presented in *Dunlap's Radio & TV Almanac*, published last week (Harper, 211 pp., $4) as 12th book by prolific RCA v.p. Orrin E. Dunlap Jr. Almanac's first entry concerns discovery of static electricity in 640 B.C.; last one—Nov. 1, 1950—notes there were "107 TV stations, 2160 radio broadcasting stations, 677 FM stations, 8,900,000 TV receivers and 86,000,000 radio sets." Volume features over 60 nostalgic "then and now" photos, illustrating TV-radio progress.

Financial & Trade Notes: TV may help return prosperity to movie industry, according to financial analysis of 6 "most favorably situated" concerns (Columbia, Loew's, Paramount, 20th Century, United Paramount, Warner Bros.) prepared by Gerstley, Sunstein & Co., Philadelphia, investments. Report makes these points:

(1) "Prospective use by TV industry of past film productions of motion pictures, cost of which has long since been recovered by amortization," will be "found money" for film industry. (2) "As and when film production is divorced from the operation of theatres, the latter will undoubtedly be used for telecast of live programs, special events and for educational purposes." (3) "The trend towards production of films for TV by experienced motion picture producers will probably be accelerated by the very rapid increase in cost of televising live programs." (4) "The prospective curtailment, if not elimination, of set manufacture for the duration . . . should lessen the competition from TV."

* * * *

Raytheon showed net profit of $1,278,079, or 67¢ per share of common stock, on sales of $41,050,627 for 6 months ended Nov. 30, 1950, president Charles Francis Adams Jr. reported Jan. 12. This compared with loss of $621,701 on sales of $22,088,129 in same 1949 period. Operations for full 1950 fiscal year resulted in profit after taxes of $935,000. Volume of sales to military has not yet increased, Mr. Adams reported, but research and development has expanded and current orders have been accelerated; increase in inventories in last 6 months from $15,700,000 to $21,300,000 was attributed to expansion for govt. production.

Wilcox-Gay Corp. offered 500,000 new shares of common at $1.625 a share this week, making 1,605,700 shares of $1 par value outstanding, 1,600,000 shares without par value, $247,500 in 5% convertible debentures due Dec. 31, 1965, and $749,330 of unsecured debt. New offering was through Gearhart, Kinnard & Otis Inc. and White & Co., and will be used for working capital.

Tung-Sol reports its outstanding cumulative convertible preference stock had been reduced to 53,494 by Dec. 30, resulting from conversion of 3815 shares into common on a share-for-share basis.

* * * *

Plant expansions: Kollsman Instrument Corp., wholly owned subsidiary of Standard Coil Products Inc., has acquired 2 factory buildings, each about 100,000 sq. ft., with large lot, on 47th Ave. in Elmhurst section of New York borough of Queens . . . **Teletronics Laboratories Corp.** in February will occupy new $200,000 factory in Los Angeles Airport industrial tract, tripling capacity.

Second week's Phonevision tests in Chicago (Vol. 7:1) have led proponent E. F. McDonald, Zenith president, to claim that it's movie industry's way of recapturing "lost audience". He said 180 of the 300 test families reported they had never seen first film shown, *April Showers*, with Bing Crosby, reported he's even considering showing *Hunchback of Notre Dame*, 1939 RKO horror hit starring Lon Chaney, to enable oldsters and youngsters to see top show they've missed. Movies' vital interest in tests was indicated this week in Paramount's hiring A. E. Sindlinger (Radox) to check public reaction. Second week's pictures were: MGM's *Song of Love*, with Katherine Hepburn, Paul Henreid, Robert Walker; Warner's *Voice of the Turtle*, with Ronald Reagan, Eleanor Parker; KRO's *Enchanted Cottage*, with Dorothy McGuire, Robert Young; MGM's *Tenth Avenue Angel*, with Margaret O'Brien; RKO's *Murder My Sweet*, with Dick Powell, Claire Trevor, Anne Shirley; Paramount's *Golden Earrings*, with Marlene Dietrich, Ray Milland; MGM's *Song of the Thin Man*, with Myrna Loy, William Powell.

Theatre-TV interests claimed discrimination in statement to FCC this week, saying they weren't getting look-in on AT&T intercity TV circuits because networks had preempted all choice times. Statement cites inability of United Paramount Theatres to interconnect Detroit and Chicago theatres Nov. 4 & 11 for U of Michigan football games, asks that AT&T be forced to consider threatre-TV claimants when allocating circuits. New factor might throw monkey wrench into network's carefully worked out "stagger" system, which obviated need for FCC hearing on ABC and DuMont complaints (Vol. 6:49, 50). There are now reported to be 15 theatres in 10 cities with TV installations, latest being Pittsburgh's Fulton Theatre (using General Precision Laboratory equipment, Vol. 6:47) and Los Angeles' Orpheum Theatre (RCA). Paramount Theatres, reporting this week on its theatre-TV experiments, told FCC: (1) Company confirmed belief 525-line, 6-mc monochrome is inadequate for theatre-TV. (2) It plans experimentation with 525-line, 18-mc color. (3) It surveyed all 100 New York theatres with 2000 or more seats, found 70 of them within line-of-sight of central transmission point, plans to test transmissions from several such points.

If NAB chooses new general manager from own staff, mantle may fall on Robert K. Richards, Richard P. Doherty or Ralph W. Hardy. Richards is public affairs director; Doherty, employe-employer relations; Hardy, government relations. Decision on successor to William B. Ryan, named BAB president last week (Vol. 7:1) is expected at NAB board meeting Feb. 1-2 at Belleview-Biltmore Hotel, Clearwater, Fla.

Flareup against rising TV costs (Vol. 7:1) comes from Kudner Agency president James H. S. Ellis, addressing Detroit Adcraft Club Jan. 12. He charged networks, through control of TV packages, have bid up talent prices to point where "TV is getting too rich for the average advertiser's purse, no matter how good it is."

Three years ago, said Ellis, top weekly hour-long TV show cost $10,000 ($2000 for time, $800 talent); today same show costs $100,000 ($36,000 time, more than $60,000 talent). That means a $4,000,000 ad budget for TV alone, he declared.

Competition between networks has reached point of outright "audiance stealing," he said, "with networks bidding fabulous prices which few sponsors can justifiably pay. With individual stars getting as much as $40,000 for a single performance, a lot of harm has been done."

Warning of "monopolistic control of the editorial content of the air," through network control of shows (CBS owns 70% of all its commercial shows, NBC 50%, he said), Ellis continued: "It is time for the people responsible for the destiny of TV to stop, look and listen . . . At least we can call a halt and give the independent sources a chance to find if there isn't some way to keep talent costs from going out of the reach of everyone—and thereby hurting TV, talent, TV owners and the industry as a whole."

* * * *

TV talent cost $84,229,600 for 1950 sponsored evening network programs, according to figures compiled by George M. Burbach Jr., New York advertising man, son of director of St. Louis Post-Dispatch's KSD & KSD-TV. Added to $45,000,000 TV network time cost estimate for 1950 (Vol. 6:52), this would make total of around $129,000,000 spent for network time and talent. Mr. Burbach notes his compilation "does not include special features such as World Series, football games and summer replacements."

Telecasting Notes: Network radio sales are booming, variously attributed to new excess profits tax and scarcity of TV time . . . Gulf Oil is dropping radio version of *We the People* on NBC, while retaining TV version, taking on new sponsorship of *Counter-Spy* on NBC-AM Sunday p.m. . . . Tintair's CBS-TV hit, *Somerset Maugham Theatre*, will have radio version on CBS starting Jan. 20, Sat. 11:30-12 noon . . . Add New York stations boosting rates: ABC's WJZ-TV, which Feb. 1 raises base Class A hour rate from $2200 to $3100, one-minute from $500 to $650; 20-second rate will be $550, 8-second, $350 (see Vol. 7:1 for other New York rate hikes) . . . *Variety* reports both WLWT & WCPO-TV, Cincinnati, now operating in the black, with WKRC-TV "making rapid strides to get beyond the red line" . . . Showman Billy Rose engaged by NBC under 2-year contract as consultant on TV shows . . . Kine-recordings of top TV shows, which can be screened on standard 16mm projectors, may be circulated abroad, where GIs are stationed, under plan attributed to producer Leland Hayward, RCA president Frank Folsom, RCA v.p. Manny Sacks . . . Now wholly owned by *Los Angeles Times* (Vol. 6:52), KTTV has switched representation to Blair TV Inc.; CBS's KTSL (soon to be KNX-TV) is represented by Radio Sales . . . Donald Cooke Inc., station rep, has formed separate TV dept. . . . CBS has released Robert Q. Lewis from exclusive contract, dropped his Mon. 2:45-3:30 TV sustainer—but he'll continue American Safety Razor Corp.'s *Show Goes On* and will substitute for Arthur Godfrey on Wed. Chesterfield show when Godfrey begins 2-week Navy duty Jan. 18; Godfrey also considering 3 weeks in Europe to study Eisenhower mission for "conversational" material . . . Color TV is subject of evening classes for advertising personnel starting at New York U Feb. 6, conducted by *Tele-Tech's* John Battison with lectures by CBS's Peter Goldmark, Paramount's Richard Hodgson, et al. . . . CBS Radio Sales announces exclusive representation of new TV film series, 26 half hours, titled *The Range Rider*, produced by Flying A Pictures under same direction as CBS-TV's *Gene Autry Show* . . . Decline in attendance has forced suspension Jan. 12 of Crosley-promoted wrestling matches, carried on hookup of WLWT, WLWD, WLWC . . . Current *Pageant Magazine* carries 8-page feature titled "Howdy Doody, Mr. Smith!" and featuring the NBC-TV kid show . . . Gillette sponsored Ezzard Charles-Lee Oma heavyweight title fight Jan. 12 on NBC-TV as a highlight of its Fri. 10 p.m. *Cavalcade of Sports* . . . Pabst will sponsor Jake LaMotta-Ray Robinson middleweight title bout on CBS-TV as a feature of its regular Wed. 10 p.m. boxing series . . . KMTV, Omaha, has prepared concise *Guide to Layout & Reproduction of Art for TV*, listing "do's & don'ts"; available on request.

New TV station in Cedar Rapids, Ia., is sought in application filed with FCC this week by WMT (Wm. B. Dolph). It seeks Channel No. 9. Previously, *Cedar Rapids Gazette* (KCRG) had filed for No. 7. Petition to dismiss Don Lee application for Channel 2 in San Francisco, reserved by FCC for more than 2 years for Don Lee, has been filed by Edwin Pauley's Television California. Pauley claims Don Lee is now owned by new stockholders, therefore not same company FCC favored previously (Vol. 6:50). [For details about WMT application, see *TV Addenda 12-A*.]

United Television Programs Inc. has been formed as program distributing concern by Edward Petry & Co., station reps; Standard Radio Transcription Services Inc.; Century Artists. Officers are Jerry King, Standard, president; Richard J. Dorso, Century, executive v.p.; Milton Blink, Standard, secy-treas.

Federal Communications Bar Assn. holds annual luncheon meeting Jan. 26 at Willard Hotel, Washington, annual dinner same evening in Mayflower Hotel.

CBS color piped to Chicago drew highly favorable reaction during demonstrations which began this week. Even Judge Walter LaBuy, who dissented vigorously in decision upholding FCC authority (Vol. 6:51), attended showings, said: "The commercial possibilities of color TV are tremendous. The entertainment value is self-evident." Press was uniformly enthusiastic. Said *Chicago Tribune* radio editor Larry Wolters: "Colors came through in bright, true tones with amazing detail . . . Whatever the final outcome of the color TV battle, [it is] something wonderful to see." Bill Irvin, *Sun-Times:* "Clarity and brilliance of the colors drew enthusiastic comment." Jack Mabley, *Daily News:* "Virtually perfect pictures." William Leonard, *Journal of Commerce:* "Every single picture was so amazingly clear in detail, so thrillingly deep in dimension, so pleasantly devoid of those horizontal TV wriggles and squirms, that standard black-and-white video seemed instantaneously as far behind the times as the crystal set . . . and the crank-up phonograph." Closed-circuit pictures, received from New York via coaxial at studios of WBBM in Wrigley Bldg., were shown on 12-in. (magnified) set with Webster-Chicago converter and 12-in. (magnified) Muntz slave unit, in addition to 12½-in. industrial set and 17-in. color-drum console.

Broadcasters got assurances this week from FCC chairman Coy and Air Force communication chief Maj. Gen. F. L. Ankenbrandt that there's no intention of taking control of radio and TV stations away from owners except in real emergency. Reference was to Defense Dept. request for legislation from Congress giving President control over "electromagnetic" radiation devices (Vol. 6:51). Assurances were given at second meeting of Broadcast Advisory Council Jan. 8 in Washington. Requests for additional membership were tabled until functions of Council are more clearly defined. There have been complaints (even to White House) that BAC doesn't fully represent TV-radio media. They've been made by non-NAB broadcasters, educational and farm groups, labor and other organizations (such as National Assn. of Radio-TV News Directors).

Petrillo will take up question of music on kinescope recordings at later date, personally, a union official said after Jan. 12 meeting of AFM Local 802 and networks on new contracts. Biggest demand was for elimination of all canned music between 8 a.m. and midnight. Other demands: (1) About 50% hike in pay scale. (2) Welfare fund based on 3% of payroll, to be paid by networks. (3) Minimum number of musicians for each program category. (4) Run-of-show contracts for musicians hired for a show. Present union contract with networks (and WOR) expires Jan. 31. Negotiators meet again Jan. 16.

"One-year moratorium" on live telecasts of college football games was voted, 161-7, by National Collegiate Athletic Assn., meeting in Dallas Jan. 12. Resolution, said to be "morally binding," is not outright ban and no provision for enforcement was made. Ruling provides for live TV only on "controlled experimental basis," permits delayed telecasts, and instantaneous theatre and Phonevision telecasts. Officials of pro-TV Notre Dame said they regard moratorium as moral obligation.

Ban on network telecasts of baseball games, but not local telecasts, was voted by National League, which also decided to set up supervising agency to govern National League broadcasts outside major league areas. Action was taken as result of plea by minor leagues for relief from major league radio competition. American League is expected to follow suit. Meanwhile, Washington Senators cut to 21 number of its games to be televised in Washington. Last summer all home games were televised. National Basketball Assn. banned telecasting in Minneapolis, leaving New York only city televising pro cagers.

NEW YARDSTICK FOR TV COVERAGE: What is a TV station's coverage area?

This simplest, basic question of the telecasting business, curiously enough, seems to have most complex answers of all -- with many time-buyers still mistakenly obsessed with "wattage" as a principal criterion, a hangover from AM.

Issuance of revised sets-in-use and "family" figures by NBC Research this week (p. 12) is very good illustration of how concepts change.

Network is launching new coverage concept next week -- with elaborate presentation, including maps, retail sales, effective buying income, etc. (Vol. 6:48).

New criterion is .1 millivolt-per-meter contour, replacing .5 Mv/m used heretofore. Recognizing that these figures are almost meaningless to laymen, NBC Research translates them -- with reservations -- into rough, rule-of-thumb mileage radii. In effect, average station's coverage radius has been widened from 40 to 60 miles, though areas are by no means perfect circles.

Overlap in family figures has been eliminated. Through a "strongest signal" formula, overlap areas are generally split equally among stations involved.

Some stations are bound to be unhappy about this, of course. Families credited to Providence, for example, are cut by over 50%. In addition, family count is brought up-to-date through use of Sales Management's 1950 survey of buying power.

* * * *

Considerable sweating went into new yardstick. It was arrived at after consultation among networks and between networks and manufacturers. CBS will use same figure, and its overall computations are within about 1% of NBC's. ABC and DuMont are understood to have agreed to revision. Preponderance of industry considers new coverage realistic. In fact, NBC says many sponsors urged networks into it, reporting their retail outlets, in the .1 Mv/m sticks, demanding to join in on participation shows in order to reach local viewers.

Individual stations have far greater claims, frequently, and some even urged that contour be moved out to .025 Mv/m (25 microvolts).

Here's how new factor was arrived at:

(1) Performance of receivers and antennas -- how they function in the "back country" -- was calculated by manufacturers, service companies.

(2) Actual measured .5 Mv/m contours were supplied by about half of NBC affiliates, extrapolated out to .1 Mv/m.

(3) Mail from viewer owners was analyzed, found to correspond very closely to actual distribution of population -- 4-5% beyond .1 Mv/m, 17-20% between .1 & .5 Mv/m, balance within .5 Mv/m.

(4) "Holes" in coverage within .1 Mv/m were weighed against reception beyond, determined to be about equal.

New coverage appears optimistic, when compared with FCC's existing or pro-

Copyright 1951 by Radio News Bureau

posed engineering standards. But network engineers insist that new figure is based on actual reception experience; that FCC is necessarily conservative in drawing up standards; that offset carrier (Vol. 6:42-48) is a powerful "bonus" factor; that people do go to great trouble to get a picture; that viewers do accept considerably less than optimum quality when nothing else is available.

But technical men readily admit that more stations post-freeze, meaning crowded channels, will undoubtedly change situation, as it did in AM.

Time-buyers who still interpret "power" to mean "coverage" are gradually learning that many other factors have greater importance -- height, terrain, co-channel interference, etc. Also to be remembered is that FCC has endeavored to give all stations in same city equal potential coverage. Joint use of Empire State Bldg. in New York (Vol. 7:2) is perfect example.

What do FCC engineers say, when asked how far a station reaches? They used to answer "roughly .5 Mv/m." Their current answer sounds facetious, but it's really quite apt: "As far as it can be received."

STATIONS EXEMPT FROM BUILDING BAN: There's no ban on construction or alteration of TV-radio stations -- yet.

Despite some headlines in trade press, new restrictions on commercial construction (NPA Order M-4 amended) will have no effect on building of studio or transmitter installations -- but it's good bet that station construction will eventually be controlled.

Most commercial construction is banned until Feb. 15 by NPA order. After that time, building will be authorized only if it furthers defense effort, is essential to health, welfare or safety, or relieves community hardship.

TV-radio station construction is exempt from order, NPA attorneys say. They hasten to point out, however, that broadcasters can't build office buildings without NPA authorization.

"We're going slow in restricting anything that involves communications," an NPA official told us, "but undoubtedly the time will come when building of broadcasting facilities will have to be restricted."

So anyone can build a station now -- if he can get the materials.

TV INTO NAB AS AUTONOMOUS ENTITY: Willing and eager to join -- but demanding absolute autonomy on all matters TV. That epitomizes attitude and decision of the 138 registrants representing top-level ownership-management of some 80 of nation's 107 telecasting stations who met in Chicago Jan.19 to consider whether to ally with NAB, abandon TBA. Oft-broached one-big-tent idea stuck, and this is what conferees did:

(1) Agreed to join in separate TV division within NAB, with own management, own staff, responsible only to own board of directors.

(2) Elected 9 members of projected 13-man board, agreed 4 others should be designated one each by the networks; 57 of the 80 stations cast ballots.

(3) Decided 2 board members must always represent TV-only interests.

(4) Signed up members tentatively, leaving formalization of organization, membership fees, etc. to board whose elected members are: Eugene Thomas, WOR-TV, chairman; Robert Swezey, WDSU-TV, vice chairman; Clair McCollough, WGAL-TV & WDEL-TV; George Storer, WJBK-TV, WSPD-TV & WAGA-TV; Harold Hough, WBAP-TV; Campbell Arnoux, WTAR-TV; Harry Bannister, WWJ-TV; Paul Raibourn, KTLA (Paramount); W. D. Rogers, KEYL, San Antonio.

Messrs. Raibourn and Rogers are the non-AM members. Former has long been a prime mover in TBA, exerts great influence in that organization.

Need for organization, importance of autonomy, were stressed in discussions of such current problems as educational demands for channels, ASCAP fees, sports bans, excess profits tax -- in none of which has TV been adequately represented.

Presence of so many non-members of NAB & TBA, general recognition of need for stronger TV industry leadership, enthusiasm of many, augurs well for proposed setup -- NBC president Joe McConnell arising to give it his blessing, ABC's Joe

McDonald and DuMont's Chris Witting approving, CBS's Larry Lowman indicating his company may go along. Neither ABC nor CBS is member of NAB, though all networks belong to TBA.

Board steering committee meets to work out details sometime before NAB's next board meeting in Clearwater, Fla., Jan. 31, Feb. 1 & 2. Steering committee comprises Messrs. Thomas, Swezey, Storer. NAB board must, of course, approve -- and there's some sentiment in that dominantly AM organization to avoid any "support" to TV. It's noteworthy, though, that Thomas and Swezey are members of NAB board.

COY'S HOPES FOR FREEZE-END & COLOR: Though it's no longer winning headlines, argument-as-usual continues over color TV issue -- with FCC and CBS still flailing in a virtual vacuum, mainly mobilization-created. This week, FCC Chairman Wayne Coy made another speech, talking mostly about color, while CBS continued color demonstrations on receivers not only in its Chicago Wrigley Bldg. studios but in United Paramount's Chicago Theatre and in big Carson Pirie Scott dept. store.

More significant than what he said about color, Coy took another look at his dog-eared end-of-freeze timetable, speaking before New York State Publishers Assn.

Carefully hedging this time (his last guess was between April 1 & July 1), he again pushed his prediction into the defense-shrouded future -- this time to "third anniversary of the freeze," namely, next Sept. 30. Admitting he had made many wrong predictions in past, he told Buffalo convention:

"I do hope and expect and predict that we will be out of the freeze and granting applications before the third anniversary of the freeze...unless the mobilization program is so large by late summer it will not be possible to utilize raw materials in the building equipment and construction necessary to get TV stations on the air."

Just what end-of-freeze will mean, when and if it does come, is still good question (Vol. 6:52). TV-radio stations are exempt from this week's NPA ban on new construction (see p. 2) -- but it's no secret they're under consideration, too.

And except for the few transmitters still in crates or on assembly lines, it's idle to assume equipment-as-usual will be available this fall or next winter. Not, at least, in quantities sufficient to accommodate or even make good start toward Mr. Coy's prediction that: "It is not unreasonable to expect that a matured competitive TV service for this country will have more than 1000 stations and that the annual volume of business done by these stations will exceed $1 billion."

* * * *

Reviewing TV's phenomenal growth, Coy warned the publishers of its impact on their medium, inferentially at least urged them to get into the TV swim, recounted reasons behind the freeze, progress of hearing, etc.

But attempt to "sell" FCC's color decision occupied most of his talk. As he did in recent Variety article (Vol. 7:1), he opined: "Any progress we can make in color will greatly magnify effectiveness of TV's contribution [to defense effort]."

Coy again expressed confidence courts will sustain FCC decision, seemed to think that court order is all that keeps CBS system from being put across -- despite mobilization uncertainties, compatible system progress, probable post-litigation request to reopen hearing, antipathy of virtually entire industry toward FCC decree.

He lit into RCA for attacking decision, called attention to recent NRDGA speech of RCA v.p. Robert Seidel (Vol. 7:2) suggesting dual standards and public choice of systems "by its ballot in the market place." Flatly rejecting RCA's present demands for dual standards, Coy added:

"This same fellow says that the Commission is now placing a ceiling on scientific development. Of all the balderdash! Even since the Commission approved the standards, the proponents of the field-sequential system [CBS] have announced the development of a 17-in. tube, thus meeting the criticism that their picture size was limited to 12½-in. The speaker conveniently ignores this development."

But Coy made no mention of developments in dot-sequential system [RCA] which have met most, if not all, basic criticisms -- even those of FCC. Incidentally,

NTSC "Ad Hoc" committee (Vol. 7:1), weighing contributions of all companies to compatible system, met in Washington Jan. 11 to view and discuss RCA system.

* * * *

That "Joe DiMaggio" letter on tri-color tube, sent to FCC by RCA president Frank Folsom (Vol. 6:45), still rankles Coy. He noted that RCA now calls tube the "Joe DiMaggio," said:

"Putting the name of Joe DiMaggio on this tube is somewhat unfortunate because it shows a certain amount of disrespect for DiMaggio's ability. Joe has never refused to play the game, but the tube now bearing his name is side-lined and is as inactive, so far as its potential public is concerned, as a retired ballplayer or as though the tube had suffered an attack of anemia."

While color is now considered academic by virtually entire industry, Coy makes only this concession:

"Of course, all types of broadcasting, including color TV broadcasting, will be affected by the defense effort. The exact extent cannot now be foreseen. The future of our defense mobilization effort may well hold the answer to whether color TV broadcasting makes a small or large beginning within the year in becoming the prevailing TV system of this country."

* * * *

Free competition between color systems was urged Jan. 16 by Illinois' new Republican Senator Everett M. Dirksen in address to NARDA Chicago convention (see Trade Reports). Charging that unlimited govt. restrictions could destroy free enterprise, Sen. Dirksen cited FCC color decision as example. "My inclination is to let them [CBS & RCA] fight it out," said he, "and let the best of the lot win."

CBS reports great success with its Chicago color demonstrations, states they will be extended to other cities shortly. Since equipment and personnel of current New York & Chicago demonstrations will be needed for other cities, Chicago showings will be concluded Jan. 24, New York Jan. 26.

Telecasting Notes: Whereas we "guesstimated," on basis of reported $45,000,000 worth of network time sold, that over-all 1950 TV time sales soared to around $100,000,000 (Vol. 6:52), *Broadcasting Magazine* reports its yearbook will estimate $83,000,000. Whereas NAB estimates radio broadcasting gross revenues for 1950 at $448,198,000 (Vol. 6:52), yearbook places figure at $453,000,000, up more than 6% from 1949. NAB's TV figure is estimated at between $70-$80,000,000 . . . **DuMont Network** has purchased old Central Opera House, 205 E. 67th St., New York, will convert it into TV Center, embracing 8 studios, one of them 180x70 ft.; plan is for all New York productions eventually to emanate from center, construction plans depending on NPA restrictions . . . **Free & Peters**, station reps (including 8 TV outlets; see *TV Factbook No. 12*, p. 38) is out with 7-city survey showing radio preferred over all other media for news, outstripping newspapers by 38%, TV by 268% . . . **Horace N. Stovin Co.**, Toronto, appointed Canadian sales reps for ABC's 5 owned & operated TV stations . . . Radio Correspondents Assn. has cancelled Feb. 3 dinner in honor of President Truman . . . **United Television Programs Inc.**, formed by Petry, Standard, Century Artists (Vol. 7:2) to syndicate TV films, announces it will be sales rep for Bing Crosby Enterprises Inc., including its *Fireside Theater* currently sponsored on NBC-TV by Procter & Gamble . . . American Booksellers Assn., surveying 340 leading booksellers in both TV and non-TV areas, reports effect of TV on book reading and buying "absolutely nil," cites October sales 1% ahead of same 1949 month in TV areas, 4.4% up in non-TV, November 1.8% up in TV, 2.6% up in non-TV . . . **University of Miami** has begun "Telecourses" via WTVJ, Tue. & Thu. 2:30-3 p.m., enrollment fee $5, with final tests winning certificates of credit for those who pass; first subjects are public speaking and personal finance.

Personal Notes: CBS chairman **Wm. S. Paley**, heading new President's Commission on Metals Resources (Vol. 7:2), is taking up residence in Washington for next few months . . . **Edgar Kobak**, ex-MBS president, now consultant, and **J. Harold Ryan**, Storer stations, have been added to Secy. of Commerce Sawyer's 21-man Advertising Advisory Committee . . . **Paul A. deMars**, ex-Washington consultant, now chief engineer of Pickard & Burns, Needham, Mass. . . . **Charles C. Bevis Jr.**, onetime mgr. of WNBK, Cleveland, recently director of NBC-TV stations, named mgr. of KOA, Denver, succeeding **Lloyd Yoder**, now heading KNBC, San Francisco . . . **Lewis Allen Weiss**, ex-Don Lee, ex-MBS chairman, on loan from Hughes Aircraft Co., is serving on dollar-a-year basis as special consultant to National Production Authority's Office of Civilian Requirements.

Chapter on color TV in annual report of Senate Small Business Committee created slight stir when Jan. 16 *Radio Daily* report left impression that committee had endorsed FCC decision. Actually, committee directed staff to study situation after it had received many complaints from dealers and distributors. But all staff has done is to digest FCC decision and report on subsequent litigation. As staff member puts it: "It would probably take 7 or 8 engineers to do a real study, so we're waiting for next committee meeting [Feb. 1] to see what they want. This report was supposed to be for background only, not to imply opinion of the committee one way or the other." Speculation about DuMont-CBS tieup on color in Jan. 17 *Variety*, based on recent meetings between Dr. Allen DuMont and CBS president Frank Stanton, is dismissed by Dr. DuMont who says "nothing to it." He says that meetings had nothing to do with color, that "we have some problems in common—labor, etc."

Station Accounts: Baltimore builders **A. H. Carrigan & Co.**, offering $19,800 stone ranch houses on Jan. 12 *Dream House Time* on WAAM, 6:40-6:55 p.m., reported 20 phone responses, 20 live prospects—leading adman Marx Kaufman, of Kaufman-Strouse, to release this enthusiastic statement: "I'm convinced anything can be sold on TV. It's equal to having 10,000,000 Fuller Brush men putting their feet in the front doors of homes all over America, giving demonstrations" . . . TV, films and radio reported contemplated in $800,000 **New York Stock Exchange's** "public education" budget for 1951 . . . **Washington Senators** have sold rights to telecasts of 21 home games, radio broadcasts of 154 (WTTG & WWDC, respectively), to **Christian Heurich Brewing Co.** (Old Georgetown beer), thru Henry J. Kaufman & Associates, Washington . . . **Parx Products Corp.** (plastic finger-nail cover), headed by Herbert L. Pettey, ex-mgr. of New York's WMGM, planning campaign using TV & radio, thru Henry J. Kaufman & Associates . . . **Greyhound Bus Lines** sponsoring sports roundup on KSTP-TV, St. Paul, Mon. thru Fri. 10:20-10:30 p.m. . . . **General Service Publishing Co.**, in conjunction with **Grand Union Co.**, sponsoring *Fun with Food*, cooking show, on WJZ-TV, New York, Fri. 2-2:30, thru French & Preston, N. Y. . . . New spot business on WCBS-TV, New York, includes: **Standard Brands** (Blue Bonnet margarine), thru Ted Bates & Co., N. Y.; **Purity Bakeries** (Grennan Cakes), thru Young & Rubicam, N. Y.; **Liebmann Breweries** (Rheingold beer), thru Foote, Cone & Belding, N. Y.; **Plough Inc.** (aspirin), thru Lake, Spiro & Sherman, Memphis . . . New account on WABD, New York, is **Cortley Frosted Foods**, sponsoring *You're On Your Own*, Sun. 2-2:30, thru Fairfax Adv., new spots on WABD include **Ward Baking Co.** (Ward's Tip-Top bread), thru J. Walter Thompson; **Harry Doehla Co.** (greeting cards), thru Schwab & Beatty; **California Packing Corp.** (Del Monte canned foods), thru McCann-Erickson . . . Among other advertisers currently reported using or preparing to use TV: **Richard, S. A. Morges, Switzerland** (watches, electric shavers), thru Weiss & Geller, N. Y.; **Stardust Inc.** (slips & bras), thru Norman D. Watters & Associates, N. Y.; **Chunk-E-Nut Products Co.** (peanut butter, etc.), thru C. J. LaRoche, N. Y.; **American Home Products Corp.** (Burnett's pudding), thru Earl Bothwell, N. Y.; **Sealy Inc.** (mattresses), thru Olian Adv., Chicago; **Hygrade Food Products Corp.**, thru Brooke, Smith, French & Dorrance, N. Y.; **Miller Brewing Co.** (Miller High Life Beer), thru Mathiesson & Associates, Milwaukee; **Zippy Products Inc.** (Zippy liquid starch), thru W. B. Geissinger & Co., Los Angeles; **S. C. Johnson & Sons** (Pride liquid furniture polish), thru Needham, Louis & Brorby, Chicago.

Stations Planning & Advisory Committee of NBC radio and TV networks holds first meeting, since new elections, Feb. 14-15 in New York. TV members are: Martin Campbell, WFAA-TV; E. R. Vandeboncoeur, WSYR-TV; John Murphy, Crosley; Dean Fitzer, WDAF-TV. Radio members: Richard O. Dunning, KHQ; B. T. Whitmire, WFBC; Milton L. Greenebaum, WSAM; Howard E. Pill, WSFA; Ralph Evans, WHO; Robert Thompson, WBEN; Jack Harris, KPRC; S. S. Fox, KDYL. Latter 3 also operate TV stations.

TV time and talent charges must be related to effectiveness of medium, have no standing by themselves. That's consensus of TV network and station executives contacted in connection with Kudner Agency president James H. S. Ellis' warnings that TV costs were getting out of hand (Vol. 7:2). None intend any public rebuttal of Ellis' Detroit speech, on grounds that it doesn't matter how much a show costs, if it sells the goods. Even *Variety* Jan. 17 editorial makes that point, adds: ". . . there is perhaps no ceiling on talent's real worth to sponsors for merchandising values."

Network TV-Radio Billings

December 1950 & 12 Months 1950

Network TV time billings of $6,684,363 in December (exclusive of non-reporting DuMont) brought total for 1950 to $40,453,878—but DuMont has reported separately that its 1950 billings were $4,500,000. December figure is up from November's record $6,524,858 (Vol. 6:51) and from December 1949's $1,921,166, and 12 months billings are more than thrice 1949's $12,294,513. Network radio time sales for December were $15,673,016, down from December 1949's $16,408,884; for all 1950, the 4 AM networks reported $183,358,922 as against $187,800,329 for 1949. The TV-radio figures, as reported by Publishers Information Bureau:

NETWORK TELEVISION

	December 1950	December 1949	Jan.-Dec. 1950	Jan.-Dec. 1949
NBC	$ 3,274,877	$ 1,026,366	$ 21,185,812	$ 6,500,104
CBS	2,269,022	568,713	12,797,556	3,446,893
ABC	1,140,464	219,337	6,470,510	1,391,991
DuMont	*	106,750	*	955,525
Total	$ 6,684,363	$ 1,921,166	$ 40,453,878	$ 12,294,513

NETWORK RADIO

CBS	$ 6,544,490	$ 5,774,939	$ 70,744,669	$ 63,403,583
NBC	5,063,845	5,631,643	61,397,651	64,013,296
ABC	2,752,288	3,656,492	35,124,625	42,342,854
MBS	1,312,393	1,345,810	16,091,977	18,040,596
Total	$15,673,016	$16,408,884	$183,358,922	$187,800,329

* Not available, but DuMont has officially announced total 1950 network revenues as $4,500,000.

Network Accounts: **United States Shoe Corp.** and its **Red Cross Shoe** dealers March 4 will sponsor one-time *America Applauds, An Evening for Richard Rodgers* on NBC-TV, Sun. 9-10; testimonial show preempts Philco's *Television Playhouse* . . . **Hollywood Candy Co.** (Milk Shake candy bar) Jan. 27 begins unnamed children's show on CBS-TV, Sat. 11:30-noon . . . **Pabst Sales Co.** (Pabst Blue Ribbon beer) Jan. 21 will sponsor film condensation of All-Star Professional Bowl football game on CBS-TV, Sun. 4-4:30; game was played in Los Angeles Jan. 14 . . . **Sales Builders Inc.** (Max Factor cosmetics) Jan. 20 starts *Sheila Graham Program* (kine) on NBC-TV, Sat. 11-11:15 p.m. . . . Next *Jack Benny Show* on CBS-TV will be Jan. 28, sponsored by **Lucky Strike**, Sun. 7:30-8, in lieu of one of its regular *This Is Show Business* performances . . . **Mutual Benefit Health & Accident Assn.**'s *On the Line with Bob Considine* on NBC-TV starts Jan. 20, Sat. 5:45-6, not time reported (Vol. 7:1) . . . New **Colgate-Palmolive-Peet Co.** program on NBC-TV, Mon.-Wed.-Fri. 3-3:15 starting in February will be *Susan Peters Show*, not *Hawkins Falls* as reported (Vol. 7:2) . . . **Campbell Soup Co.**'s new *Henry Morgan Show* on NBC-TV, Fri. 9-9:30, starts Jan. 26 . . . **Gibson Refrigerator Co.** has cancelled plans for *Laura Gibson Show* slated to start Jan. 20 on CBS-TV, Sat. 7:30-7:45, due to expected cutbacks.

Edward Cooper, who as Senate Interstate Commerce Committee specialist on communications advised Senator Johnson, chairman, on matters pertaining to TV-radio, particularly FCC relations and the color controversy, is leaving that job Feb. 1 to become aide to new Senate majority leader Ernest W. McFarland (D-Ariz.). He is succeeded by Nicholas Zapple, for last 18 months special counsel on communications and aviation to Johnson's committee. Zapple formerly was an attorney with Civil Aeronautics Board. Cooper, a Montanan, had formerly served with Senator Wheeler, and is an intimate friend of FCC Comr. Robert Jones, with whom he was once associated in an application for a radio station in Mr. Jones' hometown of Lima, O., while Jones was a Congressman. Senator McFarland will continue on Johnson committee.

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Mobilization Report
January 20, 1951

CIVILIAN PRODUCTION MUST GO ON: No matter how thin military electronics appropriations are sliced, there still won't be enough such business to keep TV-radio industry at necessary healthy economic levels.

It's that plain and simple fact that has turned upside down the idea prevalent in the industry that all it needs is a guarantee of enough materials to keep civilian lines rolling until military orders "take up the slack."

Short of all-out war, that "slack" may be with us indefinitely. Here's why:

Even if military services were to let contracts covering all their present monies, substantial civilian production would still be necessary to keep factories going and employes at work against dread possibility of eventual 100% mobilization.

It's that fact that led Munitions Board to report, in press release on its Jan. 15 meeting with V.I.P.-packed Electronics Equipment Industry Advisory Committee (for list of those attending, see p. 8):

"...money available for electronics procurement is not enough to alleviate all of the dislocation which may arise, although some relief should be forthcoming with the money that is now on hand and expected."

It was obviously with that knowledge in mind that Hallicrafters' military-wise Wm. J. Halligan warned of coming depression in TV-radio (Vol. 7:2), and Crosley's John W. Craig referred to unemployment problems (see Mobilization Notes).

What does it mean? It means that civilian production must be continued indefinitely. It makes conservation and substitution programs (Vol. 7:1-2 and p. 8) more than mere stopgap measures. Here's the score:

Electronics-communications share of military budget is expected to total about $8.5 billion through June 30, 1952 -- the sum of: $1.8 billion already let; definite $1.7 billion, plus probable $1 billion, yet to be let before June 30, 1951; $4 billion more (roughly 10%) out of President's military budget for fiscal 1952.

Total of $8.5 billion sounds like a lot of money, and orders will really begin hitting industry next few months -- though it will be 6 months or more before they show up on production lines. But, consider these facts:

(1) All of this money isn't for purely electronic items. Great chunk is for telephone and telegraph wire, batteries, switchboards, power units, etc. There's another big sum for non-electric parts of electronic equipment, such as radar towers, housings, motors, generators, etc.

(2) Military dollar can't be equated alongside the civilian dollar because military equipment is so much more complex, specifications more rigid, that unit cost is much higher (Vol. 6:49).

(3) Military requirements aren't big in numbers of units. Contracts generally run only in the thousands of units -- not the tens of thousands needed to keep TV-radio industry running at present high rate.

(4) Most contracts are still development and design projects -- and probably will continue to be for some time. It's unfortunate -- but a fact -- that until high policy changes (or is changed by international developments) most contracts will be for early pre-production runs. Few major TV-radio manufacturers are staffed with that kind of engineering talent.

* * * *

So, talk of spreading contracts among TV-radio manufacturers to keep manpower, maintain production lines, is unrealistic. These are factors military will face if it spreads everything:

(1) Everyone will get a little bit; none enough to make up for anticipated reduced civilian output.

(2) Many war-experienced manufacturers, who have continued to produce for

military since World War II, have spent large sums to tool up and expand for specialized military production. They'd be penalized if their contracts were reduced.

Spreading of contracts, nevertheless, is the avowed policy of Defense Dept. Recent directive from Secy. Marshall (Vol. 6:51), plus President's declaration of national emergency which permits negotiated contracts (Vol. 6:50), have helped military services widen number of contracts. In fact, some recent contracts make it mandatory for prime contractor to subcontract -- up to 50%, in some cases.

One aspect of spreading the contracts has special military merit in this atomic era -- dispersal of plant. It's military maxim to spread production geographically, have more than one or two factories making same items.

HOW GOVT. WILL CONTROL MATERIALS: NPA's piecemeal industrial mobilization program is near end of the road. Unrelated across-the-board materials cuts threaten severe inequities and dislocations in civilian industry. Present system is inadequate even for this semi-war economy. Hence --

Production authorities see answer in CMP -- Controlled Materials Plan -- most successful method developed during last war for holding U.S. industrial economy to maximum military and essential civilian production.

CMP will probably emerge by summer from planning boards of Defense Production Administration and National Production Authority. Mobilization czar Charles E. Wilson said Jan. 19 he hopes to have CMP program ready in June.

More than 20,000 govt. employes were needed to operate CMP in World War II, DPA administrator Wm. H. Harrison told Senate Small Business Committee same day. "Even if such a staff were now in existence," said Harrison, "the uncertainty as to the precise nature and extent of the military program would make it impossible to put any such plan into operation until these issues have been resolved."

* * * *

All U.S. production will be regulated -- under CMP -- through control of basic materials. During World War II, 3 metals -- steel, aluminum, copper -- formed basis for CMP's operation.

How will CMP work? Projected outline, based on World War II operation:

All purchase orders involving strategic materials must be approved by Govt. Then, each manufacturer who has an approved order -- military or "essential" civilian -- receives allotment of materials he and his subcontractors must buy to fill order.

"Claimant agencies" are set up as spokesmen for all segments of industry -- military or civilian. There were 12 in World War II. NPA has already designated 19 such agencies as claimants; they probably will serve under new CMP setup. For example: Defense Dept. is claimant for military needs; Maritime Administration, for shipping; Civil Aeronautics Board & Civil Aeronautics Administration, for civil aircraft and equipment; FCC for civil communications facilities, both Govt. and private, not covered by other agencies; NPA's Industry Operations Bureau, for consumer goods and needs of all industries not covered elsewhere.

Each agency decides how much of each strategic material is needed in the field it covers. Available materials pie is then cut by govt. production agency (probably DPA), and stream of allocations -- based on essentiality -- flows down to claimant agencies as lump-sum allotments of each controlled material.

Each claimant agency then makes sub-allocation to its prime contractor; each prime contractor makes further allocation to his subcontractor; each subcontractor allots to his sub-subcontractor, etc. Thus, allocations -- in form of certificates permitting purchase of given amount of scarce material -- follow same lines as the contracts, and are managed by group which makes the procurement.

Example: TV or radio station applies to FCC for increase in power. FCC rules increase is necessary to properly serve station's area, then takes up application with DPA. If DPA gives OK, transmitter manufacturer is allotted sufficient materials. From his allotment, he in turn doles out to his components makers certificates for required materials. Same system would apply to military orders.

Materials limitation orders in NPA's present "M" series would continue in force for "non-essential" civilian users -- those who can't get allotments under CMP.

NPA HELPING MAINTAIN PRODUCTION: There's little doubt now that National Production Authority has classified TV-radio industry -- or more properly, electronics industry -- "essential" with a capital "E".

Relief from NPA orders limiting use of aluminum, copper and nickel is being granted wherever companies have shown that the limitations would force substantial cutbacks and layoffs.

Aluminum order (M-7, see Vol. 6:46-50) has prompted most appeals by electronic firms, perhaps because it was first order issued. Many of these protests have been from capacitor manufacturers. And in practically every one of these cases, satisfactory adjustments have been made.

RCA, facing prospect of layoffs in tube dept. 2 weeks ago because of limitations on use of nickel and copper, sent emergency appeals to NPA's Electronic Products Division (Vol. 7:1). Both appeals were granted and there were no layoffs. (RCA's component division, which has been on 4-day week for last 2 weeks, is going back to 5-day production, at least temporarily.)

Relief has been granted "in all cases" where conservation measures require purchases of hard-to-get substitute materials, NPA electronics men say. "If they just let us know, we'll help them get the materials they need to substitute for more critical materials."

* * * *

Realizing that survival may depend on savings in critical materials, all manufacturers are working on conservation measures (Vol. 7:1-2).

Independent research is not enough, however. Knowledge gained must be pooled. Important step toward this goal was taken Jan. 18 when engineers from most major electronic tube firms attended conservation meeting at GE's New York office.

Conservation know-how will be shared for benefit of national defense and continued civilian production, and engineers laid groundwork for interchange of information. Companies represented are members of RTMA & NEMA and include Bell Labs, GE, Lansdale Tube (Philco subsidiary which initiated meeting), RCA, Sylvania, Western Electric, Westinghouse.

Invited to meeting was NPA Electronic Products Div. staff member Delmus J. Fagge (ex-Air Force radar man, ex-CAA and Bureau of Standards engineer) who gave pledge of all possible aid from NPA.

Featured in discussion were these critical materials which go into industrial, power and TV-radio tubes: nickel, copper, aluminum, cobalt, chrome, tungsten, barium carbonate, mica, brass, platinum, mercury.

Engineers will circulate questionnaire among all tube manufacturers to determine amount of critical materials used by tube industry. Then second meeting will be held to explore every avenue for joint conservation effort.

Note: One of the fruits of industry's conservation programs, RCA's new electrostatic-focus picture tube -- which saves copper and cobalt -- reportedly will be in full production by end of first quarter.

At Munitions Board meeting of Electronics Equipment Industry Advisory Committee Jan. 15 (see p. 6) were: Fred Lack, Western Electric, chairman; Benjamin Abrams, Emerson; Dr. W. R. G. Baker, GE; Max F. Balcom, Sylvania; A. A. Berard, Ward-Leonard; E. W. Butler, Federal; R. W. Carter, Carter Motor; Monte Cohen, F. W. Sickles; A. Crossley, Electro Products; W. J. Wind, Wilbur B. Driver; Jess Marston, International Resistance; R. C. Ellis, Raytheon; Walter Evans, Westinghouse; Adm. Walter J. Buck, RCA; Paul V. Galvin, Motorola; George M. Gardner, Wells-Gardner; Ross D. Siragusa, Admiral; Wm. J. Halligan, Hallicrafters; R. F. Herr, Philco; E. K. Foster, Bendix; H. L. Hoffman, Hoffman Radio; Al DeLeighter, Standard Transformer; W. A. McDonald, Hazeltine; Thomas Meloy, Melpar; H. L. Olesen, Weston; A. D. Plamondon Jr., Indiana Steel; Robert C. Sprague, Sprague Electric; A. E. Thiessen, General Radio; Dr. P. N. Hambleton, Superior Tube; G. E. Wright, Bliley. Also present, among other high govt. and military officials, were Munitions Board Chairman John D. Small, Under Secy. of Army Archibald S. Alexander, Asst. Secy. of Navy John T. Koehler, Under Secy. of Air Force John A. McCone.

Word is that Fred Lack, Western Electric v.p., wants to resign chairmanship of Munitions Board's Electronics Equipment Industry Advisory Committee. Feeling is that problems of committee now deal with TV-radio and components manufacturers, that committee should be headed by someone representing that segment of electronics-communications industry.

Bendix has subcontracted $20,000,000 of its military orders—with 40% going to plants employing fewer than 100 persons, radio div. purchase director John L. Winchester revealed Jan. 15. Subcontracts range from small resistor subassemblies to steel towers.

Mobilization Notes: Electronics industry, with doubled capacity since World War II, thanks to high level of TV-radio production, is well able to handle sizable amount of military procurement. Yet for certain specialized military items, it still needs expansion—e.g., subminiature tubes.

That's generally accepted implication of Defense Mobilization Director Wlison's reference to electronics in his Jan. 17 address in Philadelphia. He said:

"Expansion of production facilities in electronics is more difficult. Far greater quantities are needed than in the last war; and they are needed sooner. The devices are more complex. But, in electronics, too, the job will be done; it has to be done."

Two paragraphs after this reference, Wilson spoke of using these inducements to get industries to expand: (1) Accelerated amortization for tax purposes. (2) Loan guarantees. (3) Govt. loans.

* * * *

Electronics manufacturers hope that they can keep their employes working, despite materials shortages. But, warnings of coming unemployment continue. Latest was by Crosley's John W. Craig, who told RTMA industrial relations meeting in New York Jan. 17: "When materials shortages cut heavily into civilian production before defense orders can take up the slack, it can mean mass layoffs with the attendant problems of losing trained and skilled people at the very time they are hardest to obtain on the labor market." Paradox for TV-radio manufacturers is this, said Craig: "When the military orders take up the slack, there will be the still greater problem of getting the full number and kinds of employes needed."

Every distributor a military subcontractor—that's proposition made by Belmont's W. L. Dunn Jan. 18 to his (Raytheon) distributors—in event of "all-out mobilization." He said that in World War II Belmont found that 30% of its military production was in "simple subassemblies." His plan "proposes to shift that 30% of military production . . . from our factory to distributors and dealers' stores throughout the country," with distributors acting as production coordinators, expediters and inspectors, and retailers acting as producers. Point is that such a plan, which has been broached in one form or another by others recently, would keep distributor-retail organizations intact.

To help small business get fair share of defense orders and scarce materials, Sen. Sparkman (D-Ala.), chairman, and 12 other members of Senate Small Business Committee Jan. 17 introduced bill (S-537) to set up Small Defense Plants Corp. similar to setup of World War II. Agency would be empowered to enter into contracts with Govt., farming out work to small businesses. Bill would set up $500,000,000 fund to make loans to small businesses for expansion and reconversion.

Signal Corps Procurement Agency has opened New York branch office at 80 Lafayette St. "to expedite defense communication and electronic equipment and supplies." Main office is in Philadelphia. Construction will begin this spring on new Signal Corps depot on 1400-acre tract at Tobyhanna, Pa., near Scranton. Completion of this permanent installation, with 2,000,000 sq. ft. of floor space, is scheduled early in 1953.

Among unclassified military contracts for electronics and related equipment (more than $100,000) announced by Commerce Dept. for week ending Jan. 17: Through Air Materiel Command, Dayton—Philco, $1,500,000, microwave systems; Wilcox Electric, Kansas City, $621,741, receiver-transmitters; Gilfillan Bros., $394,985, radar components; Rauland-Borg, $315,997, amplifiers. Through Navy Electronic Supply Office, Great Lakes, Ill.—Sylvania, $195,000, electron tubes (100,000 units); GE, $151,800, tubes (200,000). Through Navy Aviation Supply Office, Philadelphia—Northeastern Engineering Co., Manchester, N. H., $297,837, radiosonde transmitters (15,792). Through Navy Bureau of Ships, Washington—Air Associates Inc., $293,912, radio receivers (271). Through Navy Ordnance Bureau, Washington—Hytron, $196,374, rocket electrical connectors (300,000). In addition, GE Jan. 18 announced receipt of $2,000,000 Signal Corps contract for improved mine detectors to operate on land and under water.

———■———

Formation of national servicemen's organization is called for in invitation to meet Jan. 28 at Washington's Hotel Hamilton. New organization, to be known as National Assn. of Electronic Technicians' Assns., has temporary organizing committee comprising David Krantz, chairman, Federation of Radio Servicemen's Assns. of Philadelphia; Max Leibowitz, president of Assn. of Radio Servicemen of New York & Empire State Federation of Electronic Technicians' Assns.; Norman L. Chalfin, executive secy., ARSNY. Arrangements committee comprises Norman R. Selinger, v.p., TV Associates of Washington; Ted Fishman, ARSNY. Among reasons given for need for new organization are: (1) Bad state of parts distribution. (2) Alleged tie-in practices on excise tax and warranties and on set sales and service contracts. (3) Service charges. Call refers to recent formation of National Alliance of Television & Electronic Service Assns. (Vol. 6:43), but not by name, claims it has failed. There has been friction among some members of NATESA.

Walter H. Stellner, Motorola v.p., is heading its newly formed Military Division. President Paul Galvin's Jan. 12 report to stockholders states military backlog is increasing, and during latter 1951 should be big factor in billings. During first half 1951, he also stated, Motorola expects to produce about same quantity of TVs turned out in first half 1950, when gross over-all billings were $70,347,399, profit $6.50 per share (Vol. 6:28). Total 1950 sales exceeded $175,000,000, profit $14.25 per share on 880,000 shares outstanding at end of year.

Keynote of IRE convention March 19-22, in New York's Waldorf-Astoria and Grand Central Palace, is "Advance with Radio-Electronics in the National Emergency." Sessions are loaded with TV—vhf-uhf transmission and reception, color papers and panels, station design, etc.

RCA has borrowed $20,000,000 more from 3 institutional investors on 3% notes maturing May 1, 1974, bringing to $60,000,000 outstanding notes as of Dec. 31, 1950.

Trade Personals: Admiral Wm. F. Halsey (ret.) elected president of Telecommunications Laboratories Inc. (IT&T) . . . Vice Admiral E. D. Foster, just retired as Navy chief of materiel, appointed RCA Victor director of mobilization . . . Sheldon R. Lewis, ex-Montgomery Ward, named traffic mgr., RCA Victor . . . Roy E. Drew, mgr. of cost analysis & control, appointed Sylvania TV Tube Div. controller at Seneca Falls, N. Y. . . . Stephen J. Welch appointed New York district representative for GE Tube Divisions . . . Harry H. Erickson promoted to service mgr. for all Admiral branches, succeeded at Appliance Distributors Inc. by Willis Wood, ex-Harry Alter Co. . . . Harry Kruse, ex-Columbia Records, now executive v.p. of London Gramophone Corp.; Joseph P. Dalaney, v.p. in charge of artists & repertoire; Leon C. Hartstone, v.p., administration . . . W. M. Kron, from Owensboro tube works, named mgr. of GE's Tell City, Ind., tube plant, succeeding J. A. Gerber, now asst. to Tube Div. mgr. L. B. Davis . . . Edward Weingarden succeeds Edward Mayer as president of Atwater Television Corp., Simon Chervin named treas., F. Robert Petrino executive v.p.

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
January 20, 1951

'SCARE BUYING' ONLY PART OF STORY: Speeches and headlines about shortages, emanating from Washington, may be main factor in continued high level of TV-radio and appliance sales -- what Wall Street Journal calls "new wave of scare buying." But in TV trade, at least, observers see other potent factors. For example:

DuMont's Walter Stickel told Chicago convention of National Appliance & Radio Dealers Assn. that 90% of the 1,160,000 TVs sold during 1946-47-48 will be replaced this year because most were 7, 10 & 12-in. sets and owners want larger pictures. He also opined that 25-40% of 1951's retail unit volume will be in used sets.

There's much to what the DuMont sales chief says, but biggest potential still is new customers from non-TV homes -- and, happily, they're coming into the stores. Inherent appeal of TV and programs people talk about, as well as expected scarcities, are bringing in otherwise recalcitrant customers. Set sales are high despite increased prices -- and the paucity of distress merchandise and special sales would indicate continuingly good near-future outlook.

As yet, defense orders aren't sufficient to interfere very substantially with production, and manufacturers are still urging retailers to stockpile in anticipation of shortages later. Those who have the credit are doing just that.

January production figures may tell eloquent story of trends -- but only the first week's are as yet available from RTMA auditors. It isn't a typical week, either, for it included New Year's Day, with its usual hangover of absenteeism. Moreover, some factories are curtailing while taking inventory. First production week of 1951 (ending Jan. 5) shows 105,699 TVs (8268 of these for private labels) and 209,792 radios turned out. Of radios, 134,079 were home, 63,188 auto, 12,525 portable units. Both TV and radio output totals are within fraction of final 1950 week, which also was 4 days because of Christmas: 105,968 TVs, 201,482 radios.

* * * *

NARDA convention elected Mort Farr, of Upper Darby, Pa., as new president, succeeding James Lee Pryor, Wilmington, Del. At same time it named new gen. manager -- Albert W. Bernsohn, now on RCA Camden public relations staff. He takes over Feb. 1, succeeding Cliff Simpson, now heading Chicago Electric Assn. He's a former newspaperman, is currently chairman of Philadelphia Television Assn. NARDA next meetings will be June 24-25 in Chicago's Stevens Hotel.

BIG FOUR DID $1¼ BILLION BUSINESS: Annual reports with specific figures will soon be forthcoming -- but, in meantime, it's interesting to note that TV's Big Four accounted for gross factory sales of $1¼ billion or more for calendar 1950, as against a little more than $803,000,000 in 1949. Figure for 1950 is derived thus:

RCA did well over $500,000,000 (Vol. 6:52). Philco has announced in excess of $335,000,000 (Vol. 7:1), Admiral in excess of $230,000,000 (Vol. 6:51). This week, in letter to stockholders, Motorola announced sales in excess of $175,000,000.

These are over-all sales, not merely TV-radio. Their 1949 reports showed: RCA $397,259,020, Philco $214,884,000, Admiral $112,004,251, Motorola $79,065,115.

How many TVs each company turned out is closely guarded secret of each -- but good guesses would be: RCA, about 1,000,000; Philco and Admiral, between 900,000 and 950,000 each; Motorola, between 500,000 and 600,000. These could be slightly off, but they ought to be pretty good guesses; in case of Motorola, guess is based on fact that its president has stated that nearly 60% of its business comes from TV, and average factory price per set is roughly $178 (Vol. 7:2).

Thus, of TV's 7,400,000-plus production in 1950 (Vol. 7:2), top 4 companies probably accounted for well over 3,000,000. Rest of the business is divided among 90-odd other manufacturers (for complete list, see TV Factbook No. 12).

Topics & Trends of TV Trade: Editor O. H. Caldwell, of *Radio & Television Retailing*, who knows the trade better than most, raises our $3 billion estimate of 1950 TV-radio retail trade (Vol. 7:2) by considerable amount in his January edition. He totes up not merely the year's TV-radio receiver sales plus installation, servicing, warranties, as we did; he adds other concomitant items to make "annual bill of U. S. for Radio-TV" reach grand total of $4,527,000,000! Here's how he arrives at that staggering figure:

Sales of time by broadcasters (and telecasters), $496,000,000; talent costs, $80,000,000; electricity, batteries, etc., to operate radio & TV receivers, $380,000,000; 14,000,000 radio receivers, retail, $650,000,000; 7,000,000 TV receivers, retail, $2,149,000,000; 199,000,000 phonograph records, $226,000,000; 60,000,000 replacement tubes, $96,000,000; TV-radio parts, accessories, etc., $200,000,000; labor, $250,000,000.

* * * *

Mr. Caldwell estimates 101,000,000 of the 193,000,000 radio-TV receivers used in whole world are in U. S. He figures 45,000,000 U. S. homes with radios, 24,000,000 with secondary radios, 4,000,000 in business places, institutions, etc., 17,000,000 in autos, 11,000,000 TVs. He also reckons 21,915,000 phono turntables in use—78rpm, 15,400,000; 33rpm, 1,065,000; 45rpm, 2,450,000; 78 & 33rpm, 400,000; 3-speed, 2,600,000. "Seems likely," he states, "that 4,500,000 phonographs of all kinds, including those in combinations, will be sold in 1951 if manufacturers can produce that number."

If Caldwell's round figure of 7,000,000 TVs sold during 1950 is accepted, it means at least 400,000 were still in trade pipelines as of Jan. 1, 1951, since 1950 production totaled slightly more than 7,400,000 (Vol. 7:2). Figure seems too low, however, when you consider NBC sets-in-use count has total of 10,549,500 (see p. 12), whereas cumulative production since emergence of TV industry in 1946 was about 11,600,000 (Vol. 7:2).

* * * *

New manufacturer is Air Marshal Corp., 12 E. 44th St., New York. Frederick G. Gearhart, ex-Wilcox-Gay board chairman, is president, W. R. Rich, sales v.p. First set is 17-in. table, $199.95, with 14 tubes. Service plans envisage removal of chassis for repair, replacing with spare. New York Telecoin Corp., located at same address, is New York distributor.

Stromberg-Carlson has new 24-in. console with phono-jack for $675. It's companion model to 24-in. console-combination at $975, introduced last fall (Vol. 6:44).

Much the cheapest 1951 TV set prices are those advertised by Muntz: 17-in. leatherette table for $189.95, same in wood consolette $244.95; 20-in. consolette, $269.95; 19-in. round console, AM-FM-phono, $399.95.

Sylvania has increased prices of all its sets $10 to $30, has new 20-in. table model at $399.95.

* * * *

Credit procedures and techniques used by credit departments of large and small stores are explained in new edition of *Credit Management Yearbook* just issued by National Retail Dry Goods Assn., 100 W. 31st St., New York. Included are credit sales promotion, collections, expense control, customer relations, smaller store credit problems, retail credit management, credit education, bureau relations, text of Regulation W.

Thompson Products Inc., Cleveland, aircraft and automotive equipment, reported entering electronics field, manufacturing coaxial selector switches and other apparatus for military and civilian TV-radio and telephony. New Electronics Div. is headed by L. W. Reeves, v.p., engineering directed by A. L. Pomeroy.

Financial & Trade Notes: Among officers' and directors' stock transactions reported by SEC for November: Kenneth D. Turner sold 72,000 Admiral, holds 1116; George E. Allen bought 300 Avco (Feb.), holds 900; John W. Craig bought 500 Avco, holds 500; William I. Myers bought 200 Avco, holds 200; K. R. Wilson Jr. bought 100 Avco (Oct.), holds 100; Wm. J. Halligan and wife sold 101,000 Hallicrafters, bought 16,200 for trusts (both Oct.), hold 200,600; Laurence B. Dodds bought 100 Hazeltine, holds 100; Henry Reeve bought 100 Hazeltine, holds 5700; Ernst E. Bareuther bought 8 Philco, holds 47; W. H. Chaffee bought 100 Philco, holds 429; Charles F. Adams Jr. bought 1000 Raytheon, holds 6000; John J. Smith bought 700 Sparks-Withington (500 in joint tenancy), holds 2900; Thomas H. Beacom (as trustee) bought 100 Stewart-Warner, holds 300; John F. Fennelly bought 100 Stewart-Warner, holds 200; Chester F. Hockley bought 500 Sylvania, holds 800.

Emerson stock transactions reported by SEC: Benjamin Abrams (plus foundations and trusts) received 26,612 shares as dividends, hold 292,739; Ferdinand Eberstadt received 100, holds 1100; Abraham Rosen received 220, holds 2420; Harvey Tullo received 198, holds 2178; Max Abrams received 7137, bought 1320 (for trusts), holds 93,029; George H. Saylor received 44 plus 220 in stock splitup (June), holds 484; Charles Robbins sold 400 (Oct.), holds 1500. In addition, N. Y. Stock Exchange reports Max Abrams bought 1491 Emerson in December, holds 80,000 in own name.

* * * *

Emerson Radio's consolidated net sales for fiscal year ended last Oct. 31 reached record $74,188,297, record net income of $6,514,716, equal to $3.70 a share on 1,759,610 capital shares. This compared with previous year's sales of $40,543,925, net income of $3,035,652 ($1.73), previous peaks. Earnings before taxes were $11,969,778 vs. $4,748,795 year before. Current assets as of Oct. 31 totaled $25,136,890, current liabilities $12,077,094, leaving net working capital $13,059,795 as against $9,641,617 year earlier.

Emerson directors this week approved additional compensation plan whereby 2½% of consolidated income of corporation and subsidiaries, but not less than $100,000 or more than $250,000, will be divided as follows: 50% to president, executive v.p. & secy.-treas.; 23% to 3 vice presidents and asst. treas.; 27% to 15 key employes. Jan. 17 proxy statement for stockholders' meeting Feb. 7 reveals Emerson officer-director stockholdings as follows: Benjamin Abrams, president, 220,000 shares plus 72,739 held beneficially for children, grandchildren, et al.; Max Abrams, secy.-treas., 80,000 plus 14,520 as trustee for children; F. Eberstadt, director, 1100; Richard C. Hunt, director, 704; Dorman D. Israel, executive v.p., 1364; George H. Saylor, director, 484.

* * * *

Hallicrafters earnings for its first fiscal quarter (ended Nov. 30) were $451,636 on 825,000 shares outstanding, or 55¢ per share on sales of $11,881,263. This compares with earnings of $229,766 (34¢) on 675,000 shares and sales of $5,560,206 for same 1949 period.

Dividends: Avco, 56¼¢ quarterly preferred, payable Feb. 1 to holders of Jan. 16; Tung-Sol, 25¢ common, 20¢ quarterly preferred, payable Feb. 1 to holders Jan. 15; Hallicrafters, 15¢ payable Feb. 15 to holders Jan. 30; American Phenolic, 20¢ payable Jan. 26 to holders Jan. 12.

Radio-TV stock price analysis, tabulating 115 stocks and their 1945-51 records, with dividends paid, percentage yields, is carried in February *Tele-Tech*, published by Caldwell-Clements Inc., 480 Lexington Ave., New York.

Packard-Bell reports gross sales of $18,329,437 for year ended Dec. 31, 1950, compared to $6,158,105 for 1949. Profit figures weren't issued. Fiscal year ends Sept. 30.

Count of TV Sets-in-Use by Cities

As of January 1, 1951

As New Year began, there were 10,549,500 TV sets-in-use in 63 areas containing 26,482,100 families, according to new NBC Research "census" released this week. That means just about 40% of the homes in TV areas have receivers. It also indicates increase of 704,200 sets-in-use since Dec. 1 count (Vol. 6:51). New family figures are now used, based on signals to .1 Mv/m line (about 60 miles) and *excluding overlaps*, in accordance with new measurement method adopted by NBC Research (see story, p. 1). The family figures are based on 1950 census and derived from *Sales Management* studies.

Interconnected Cities

Area	No. Stations	No. Families	No. Sets
Ames (Des Moines)	1	195,200	33,700

Two new applications for TV stations filed with FCC this week: WJJJ, Montgomery, Ala., seeks Channel No. 10, second from that city, other being WSFA for No. 6. *Kingsport* (Tenn.) *Times* and *News*, operating AM station WKPT, applied for No. 7, first from that city. The applications bring total pending in "freeze file" to 376. [For details about new applicants, see *TV Addenda 12-B* herewith.]

Washington's rumor mill kept grinding this week end, as (1) FCC Chairman Coy visited President Truman Friday, and (2) word seeped out of FCC meetings that some sort of inquiry into TV station licenses was in the works. As to first, Mr. Coy himself explained that he merely reported to the President his intention of taking a long vacation—a motor trip starting Jan. 24 which will take him and Mrs. Coy to Arizona and California, returning first week in March. He will definitely return to FCC job, Mr. Coy added. Comr. Walker will be acting chairman. As to second, FCC will announce facts sometime next week about a "constructive approach to important television problems." Best we can learn is that there may be investigation of certain direct-selling methods developing in TV, too little program balance on some stations as between network and local, and that an effort will be made to have TV licenses held by AM interests expire at same time as AM licenses. Timing of inquiry now is due to fact that TV station licenses (one-year) expire next Feb. 1. Meetings Thursday and Friday were marked by divergent views over procedure, with one faction opposed entirely to any "Blue Book" type of probe.

Petrillo warned each of the 107 TV stations not to help violate his contract with major Hollywood producers by showing post-1946 features. Jan. 11 telegram said he'd heard of deals pending, and after verbatim spelling out of applicable sections of AFM-movie contract, Petrillo declared no agreements had been reached with anyone. Best guess is he's getting ready to negotiate for new contract with producers when present one runs out this fall; also, that he's still adamant about 5% royalty from TV stations if feature movies are shown. Networks continued conferences this week on new contract with AFM locals in New York, Chicago and Hollywood (Vol. 7:2), with TV provisions also discussed. Network contract expires Jan. 31. Sure to be major bone of contention is networks' desire to make own TV films.

Mobilization-induced increase in activities of FCC field engineering and monitoring units account for almost all $225,000 increase President Truman asked for Commission in his fiscal year 1952 budget. President asked for $6,850,000 for FCC, which compares with $6,625,000 it got for fiscal 1951 (ending June 30). Activities of FCC's field engineering and monitoring can be gauged by fact that during World War II, it operated 102 monitoring stations, now has 21. For broadcast activities, President asked $1,062,038 vs. $1,077,000 last year. Budget estimates 1263 employes for 1952 vs. 1248 in 1951, 1325 in 1950.

Cadena Oriental de Radio, operating CMKW, Santiago, Cuba, is reliably reported to have placed order with GE for TV transmitter to operate there on Channel No. 7 Dec. 8. *Prensa Libre* says planners hope to have transmitter installed atop 12,000-ft. Puerto de Boniato by March and cover entire Province of Oriente. Santiago is about 750 miles from Havana, which has 2 stations *(TV Factbook No. 12)*. Bacardi y Cia., rum firm, is reported backing TV project.

If ASCAP's per-program terms are unfair, all-industry committee is prepared to support court action. At TV station meeting Jan. 18 in Chicago, further financial support was voted committee. Although ASCAP announced last month it was sending per-program contracts to stations, thus breaking off negotiations with committee (Vol. 6:50), none has yet received document.

Acute employe shortage will plague AM & FM stations in event of all-out global war, new NAB manpower report indicates. Study shows 37.2% of announcers and 24.6% of engineers are in draft-vulnerable 17-26 age group. More than one-fifth—21.4%—of radio's male employes are in this category. NAB is currently conducting similar survey of telecasting personnel.

NEW SETS-IN-USE & FAMILY FIGURES: Because a new yardstick of TV station coverage has been devised and generally agreed upon, and new family figures are now available, we send you herewith a new sets-in-use "census" table with breakdowns by areas as of Jan. 1, 1951. We suggest this sheet, which is gummed, be pasted over Dec. 1, 1950 table published on p. 68 of our TV Factbook No. 12. The new figures show estimated families and sets within 60-mi. radius (.1 Mv/m), displacing those previously based on 40-mi. (.5 Mv/m). Article explaining basis for new and more realistic concept of coverage appeared in this space last week (Vol. 7:3).

STRIPPED-DOWN RECEIVERS IN PROSPECT: Call it what you will -- "austerity model" or "utility" model -- the TV set of near future (radios, too) will be stripped down to bare essentials and will be replete with ingenious materials-saving developments.

Philco will unveil its answer to materials shortages to NPA officials at private Washington showing in Hotel Hay-Adams, Feb. 14. Presumably this will be the set president Wm. Balderston told Chicago distributor convention (Vol. 7:1) could save substantial quantities of cobalt, nickel, copper, aluminum and steel.

The industry is understandably shy about announcing new developments which short-cut materials bottlenecks for fear public will get impression new sets will be inferior. But there's no doubt "stripped down", materials-saving set will be vogue as year progresses -- enabling civilian production to continue and bridging gap between sparse military orders and sparse materials.

Meanwhile, distributors-dealers are quite properly urging customers to buy now and assure themselves of "pre-war merchandise."

No set manufacturer has told us he plans to make set using much-discussed electrostatically-deflected picture tube (Vol. 7:1-3). They all say they can do it, have the know-how. However, practically all CR tube makers are rushing to get this cobalt-copper-nickel-saving tube into production -- so they must have orders for it.

National Union, for instance, says it has been developing this type tube in 14, 17 & 20-in. rectangular sizes for 6 months, expects to be in full production by end of February. It says its new line of tubes "can be used in place of same sizes employing electromagnetic focusing," are "mechanically interchangeable" and have same electrical ratings as magnetic-focusing tubes they're designed to replace.

Electrostatic tube they're all talking about is new development, reported comparable in quality to present picture tube, will not degrade pictures.

Like new autos, new TVs will lose glitter. Brass, nickel, chrome will vanish from front panels. As case in point, NPA's Jan. 24 end-use regulation of nickel (M-14, as amended) provides that nickel plating cannot be used on TV-radio escutcheon plates, knobs, nameplates, decorative trim or speaker grilles.

Functional parts in TV-radio, however, continue to get good break in nickel order, being specifically exempt from end-use bans. Use of nickel-bearing stainless steel is not permitted in radio towers and radio antennas, but industry sources say little or no stainless steel is normally used in such equipment anyway.

JAN 2[illegible] 1951

TV ALREADY AMONG TOP-RANKING MEDIA: If you haven't already noted the PIB Network TV-Radio Billings table for 1950 published on page 5 of last week's Newsletter (Vol. 7:3), we commend it to your attention -- not only for its amazing revelation of some $45,000,000 in TV network billings (more than 365% ahead of 1949) but in light of these significant facts:

Among first 20 advertising media in the land, as listed in full-page New York newspaper ads placed by Life Magazine this week, two of the 4 TV networks are included -- NBC-TV ranking 8th, CBS-TV 16th. Network radio, of course, has 4 positions -- CBS 2nd, NBC 4th, ABC 5th, MBS 15th -- but remember that network radio is about 25 years old whereas network TV (on limited scale) dates back only few years.

Remember, too, that there are only 107 stations, only 80 interconnected for network service, not enough circuits for even these 80 to get full network services. Indeed, projecting 1950 final network figures, we reiterate our own rule-of-thumb estimate, based on fact local and spot always mean more dollar billings than network, that the 107 stations and 4 networks during 1950 accounted for at least $100,000,000 worth of time sales (Vol. 6:52).

As landmarks toward the inevitable day when TV networks will rank highest among all media in advertiser volume, the 1950 rankings are worth reprinting from Life Magazine's ad (figures also based on PIB):

1. Life, $80,365,507
2. CBS-Radio, $70,744,669
3. Saturday Evening Post, $63,180,611
4. NBC-Radio, $61,397,651
5. ABC-Radio, $35,124,625
6. Time, $23,793,870
7. Ladies' Home Journal, $22,485,163
8. NBC-TV, $21,185,812
9. This Week, $20,328,167
10. Better Homes & Gardens, $19,631,228
11. Look, $17,765,110
12. Collier's, $17,397,066
13. American Weekly, $17,133,298
14. MBS-Radio, $16,091,977
15. Good Housekeeping, $15,373,242
16. CBS-TV, $12,797,556
17. Woman's Home Companion, $11,775,230
18. Newsweek, $10,184,717
19. McCall's, $9,940,858
20. Country Gentleman, $8,785,551

Note: ABC-TV's 1950 volume was $6,470,510, DuMont's $4,500,000 (Vol. 7:3).

* * * *

"No matter what happens to set production, TV is going to spellbind a lot of advertisers," said ANPA advertising bureau director Howard S. Barnes to Newspaper Advertising Executives Assn. Chicago meeting this week. "It's going to sop up a lot of dollars that used to go to other media."

Mr. Barnes' main thesis was that newspapers are facing "the roughest, toughest competition this business has ever seen" and that magazines and radio, as well as TV, will force them to work hard merely to keep present advertisers. He called radio "the medium that refused to be buried."

Media Records, meanwhile, this week reported newspapers had their biggest year ever in 1950, total lineage being 2,440,149,576, or 6% ahead of 1949. Automotive gained 14.3%, financial 11.6%, general 9.8%, total display 6.1%, classified 5.5%, dept. stores 4.5%, retail 4.4%.

And Printers' Ink reports $5,684,000,000 total invested in national and local advertising in 1950, up 9.3% from 1949 -- national up 10.3% to $3,281,000,000, local up 7.9% to $2,403,700,000. Newspapers accounted for 36.2% of total, direct mail 14.7%, radio 11.6%, magazines 9.1%, TV 2.8%, outdoor 2.5%.

TO PROBE 'ANATOMY' OF TV PROGRAMS: FCC action on TV programming, much talked-about (Vol. 7:3), apparently will first take form of call for conference of telecasters to "explore" problem, develop breakdown of programs by categories similar to those required in aural radio. FCC is supposed to make known plans after Jan. 29 meeting.

Certain Commission elements wanted crackdown a la Blue Book -- perhaps the citing of an egregious offender. But some commissioners want no part of another Blue Book flurry, oppose any semblance of direct program controls. Hence "round table discussion" may precede any action.

It's no secret some TV stations are over-commercialized, have been expecting some sort of FCC check-rein. Inclination has been to give them their head during lean income years, but lately the number of direct-selling, non-entertainment programs has increased, creating demand for curbs.

FCC license renewal Form 303 requires breakdowns as between commercial &

sustaining, network & local, live & kine programs, etc. Licensees must file that form in applying for renewals of current one-year licenses, all expiring Feb. 1.

* * * *

A sort of preliminary hearing on TV renewals took place before FCC at Jan. 23-24 hearings on educators' demand for TV channels, a demand partly predicated on alleged failure of commercial stations to fulfill educational functions. Into hearing record went study of program content of New York's 7 stations (Vol. 7:2).

Educational protagonists spent $3100 on study, using 8 receivers and 24 monitors in Waldorf-Astoria suite, clocking programs under direction of U of Illinois communications professor Dr. Dallas Smythe, former FCC economist, and U of Chicago sociology researcher Dr. Donald Horton. "Typical week" of Jan. 4-10 was period of study.

Already called "TV's Blue Book," because of blue cover, study purports to put commercial telecasters in equivocal light by showing:

(1) Choice of programs is limited during many hours.

(2) Crime and western drama, variety shows, sports, quizzes-stunts-contests, comprised 49% of week's 564 hours of telecast time -- while informational, science, public service, institutional, news programs accounted for only 9%.

(3) Advertising messages occupied 10% of time, with average length of 73 seconds. There were 20 "continuous commercial" programs (allegedly selling goods solely) for total of 29 hours. Categorical breakdowns were:

Drama, 25% (of which 10% was crime); variety, 14%; children's programs, 12%; sports, 10%; homemaking, 10%; quizzes-stunts-contests, 7%; personalities, 5%; news, 5% (of which 2% was moving-tape news); music, 4%; information, 3%; public issues, 2%; religion, 1%; public events, 1% (President Truman's State of Union address).

Criteria for such classifications, naturally, came under immediate fire of attorneys representing TBA, NAB, CBS. Questioning elicited that:

(1) Program was classified by "predominant theme". Thus, if it contained 51% vaudeville, with operatic arias or classical music dominating other 49%, it was classified as variety, with no weight given other portions.

(2) What's called "continuous commercial" show might be considered a service program, not merely one long commercial -- depending on predilection of the monitor.

(3) Many commercials are "untimeable" -- so interwoven into show that their length cannot really be determined.

EDUCATORS' PROPOSALS CALLED WASTEFUL: Telecasters spoke up before FCC this week for first time on educators' proposal to reserve channels for non-commercial educational stations (Vol. 6:48-49, 7:2).

And from the titles and pedigrees of the witnesses, it was apparent commercial TV also had its own considerable quota of highly qualified educators.

Testifying against educators' proposals were: CBS president Frank Stanton, ex-Ohio State psychology prof; NAB president Justin Miller, ex-dean of Duke University Law School, ex-prof at Stanford, California, USC and Minnesota; NAB research director Kenneth H. Baker, ex-psychology prof at Northwestern, Minnesota and Ohio State; Charles F. Church Jr., education & research director of KMBC, Kansas City, ex-music instructor at Bowling Green College.

Waste of valuable channels -- that phrase sums up telecasters' reactions to educators' demand that at least one vhf channel in each major city and educational center be reserved for educational telecasting for as long as 30 years.

Most of the channels would never be used if they were reserved, telecasters indicated. They glossed over educators' request for approximately 25% of all uhf channels, gave these arguments to back contention that any vhf channels reserved would be wasted:

(1) Educational institutions have been slow and reluctant to use AM & FM, and in many cases where they had licenses they dropped them.

(2) Educational groups will find it difficult to raise money for this ex-

pensive medium, lack programming and talent resources and know-how.

(3) Appeal of "straight education" programs is too limited, can't hold any significant audience.

As alternative to channel reservation plea, telecasters suggested:

(1) Educational groups compete with commercial interests for new-station licenses before FCC.

(2) Where all available channels are filled, educational groups buy time on commercial stations -- which would be far cheaper than operating their own; and that they apply for expiring licenses of existing commercial stations.

Commr. Frieda Hennock, outspoken champion of the educators, bore down hard on the telecasters. Her cross-examination of Mr. Stanton was particularly nettling, and he felt called upon to remind her he was attending hearing at his own request.

TBA president Jack Poppele is sole witness still to testify when hearings resume Jan. 30. Cross-examination of Mr. Stanton will be completed Jan. 31 when this phase of allocation hearing is scheduled to wind up.

A tentative allocation plan drawn up by Dr. Francis J. Brown of the American Council of Education provides for 56 educational stations in 50 locations in northeastern United States, without regard to vhf or uhf. It visualizes 3 educational channels in New York plus one in Newark, 2 in Boston, 3 in Philadelphia, etc.

In event there is only one vhf channel allotted to a city, the educators proposed that the facilities be shared by commercial and educational licensees on "double license" basis.

In so-called "closed" cities (such as New York and Los Angeles), where all channels are now occupied, Dr. Brown suggested: (1) Revision of present allocation plan to assign more vhf stations to the closed city. (2) Educators share station facilities or time with all commercial stations in the area. (3) "Changing the status of one of the existing stations through transfer of license or removal."

National Assn. of Educational Broadcasters served notice it will conduct extensive campaign for TV allocations with formation of "Public Interest Committee" headed by public relations counsel Edward L. Bernays and consisting of such top-drawer names as Harold L. Stassen, author Fannie Hurst, Dean Millicent McIntosh of Barnard College, Actors' Equity president Clarence Derwent, commentator Quincy Howe.

Outside FCC and CBS, very few folk in the industry take continued talk about color TV very seriously—for every day makes it more apparent both RCA-CBS controversy and FCC decision have been rendered academic "for the duration." Nevertheless, the protagonists continue to make news:

(1) RCA and intervenors this week appealed Chicago court's 2-1 decision of Dec. 22 upholding FCC's authority to approve CBS system (Vol. 6:51)—filing necessary papers, immediately approved by court, which now take case to U. S. Supreme Court. Next step is "statement as to jurisdiction" to be printed by court for its members, docketing of case, oral arguments. It looks very much like case will be decided this term—i. e., before June—because court's calendar is rather light. Arguments may come in March or April.

Appellants actually had until Feb. 20 to appeal, so moved faster than expected. They contend that adoption of incompatible color TV system and refusal to adopt compatible system were contrary to public interest and "an unreasonable suppression of competition and beyond the Commission's jurisdiction."

(2) CBS filed suit against DuMont in New York Federal Court Jan. 23, charging patent infringement in manufacture and sale of industrial color TV apparatus, asking injunction and accounting, alleging DuMont hired G. R. Tingley away from CBS labs in 1949 and he "leaked" color secrets. Complaint states CBS offered but DuMont refused non-exclusive license (such as it has with Remington Rand), and alleges DuMont sales of industrial color apparatus diminishes value of Remington Rand license.

DuMont replied its research and development is along well known engineering principles, stated with respect to complaint about Tingley: "Nonsense . . . How could it be confidential if it's patented . . ." DuMont statement adds damages would be inconsequential since there isn't much activity in color TV anyhow. DuMont color system uses 18 mc, CBS 6 mc (Vol. 6:9-10). Suit indicates probable reasons for mysterious recent meeting of Dr. DuMont and CBS president Stanton (Vol. 7:3).

(3) CBS inventor Dr. Peter Goldmark spoke Jan. 26 before American Institute of Electrical Engineers, next day talked to Cleveland Technical Societies Council. He told AIEE that CBS system permits manufacture of either moderate cost or expensive receivers, allows for "wider or narrower color gamut, higher or lower light efficiency." CBS engineer John Christensen Jan. 25 addressed engineering alumni of New York City College following color demonstration. Next meeting of New York IRE Feb. 3 will feature CBS's A. A. Goldberg on field sequential color, Hazeltine's B. D. Loughlin on dot sequential systems.

(4) Lack of interest in color issue was manifest when relatively few from heavily-attended Chicago NAB-TV meeting last week (Vol. 7:3) accepted invitation to attend CBS Wrigley Bldg. demonstration. Apparatus from Chicago and New York demonstrations, now concluded, definitely will be demonstrated in other cities later, according to CBS v.p. Adrian Murphy.

Station Accounts: Unusual local sponsorships reported this week by stations: *High C, U.S.A.*, 3 barbershop quartets with barber and tobacco shops and appliance store background, Tue. 7:30-8 on KFI-TV, Los Angeles, sponsored by Crosley Appliances and the 3 largest Crosley dealers in area; *This Is Your Zoo*, Baltimore zoo director with "Babette the Baboon" visiting children's hospital wards, Sun. 6-6:30 on WAAM, sponsored by Hauswald Bakery; *Occupation: Housewife*, playlets on homemaking, Mon.-Wed.-Fri. 1-1:10 on KTTV, Los Angeles, sponsored by Waring Products Corp. (Waring blenders) . . . New account on WABD, New York, is Lydia O'Leary Inc. (cosmetics), sponsoring *Bess Myerson Show*, Sun. 11-11:15 p.m., thru Huber Hoge & Sons, N. Y.; new spots on WABD include A. S. Harrison Co. (Preen floor wax), thru J. M. Mathes Inc., N. Y., and Atlantic City Hotel Group Advertising, thru Dorland Adv., Atlantic City . . . Benson & Hedges (Parliament Cigarettes) buys *Televiews of the News* nightly 7-7:15 on WPIX, New York, thru Kudner Agency . . . RKO Theatres and NBC stations WNBT & WNBC have signed for TV-radio campaign sloganed "Let's Go Out to the Movies" . . . American Gas Assn. has appropriated $1,700,000 for 1951 promotion, advertising and research, stressing advantages of home appliances, advertising thru McCann-Erickson . . . Kaiser-Frazer Corp. has budget of $1,500,000 for first quarter's advertising, with TV & radio included in plans . . . Continental Oil Co. (Conoco) starting extensive winter campaign, including TV, thru Geyer, Newell & Ganger . . . Among other advertisers currently reported using or planning to use TV: Fedders-Quignan Corp. (heating, refrigeration, automotive equipment), thru BBDO, Buffalo; Harrison Products Inc. (No Doz Awakeners), thru Sidney Garfield Associates, San Francisco; Mail Pouch Tobacco Co., thru Charles W. Hoyt Co., N. Y.; Doughnut Corp. of America, thru C. L. Miller, N. Y.; Grid'L Rich Inc., div. of Home Foods Inc. (Grid'L Redi pancake mix), thru J. D. Tarcher & Co., N. Y.; LeBlanc Corp., Lafayette, La. (Hadacol dietary supplement), direct; DeJur-Amsco (movie cameras, photographic accessories), thru Grey Adv., N. Y.; Five Star Mfg. Co. (Freeman Headbolt engine heater), thru Lavin Adv. Agency, Fargo, N. D.; Steuer Laboratories Inc. (Ammovess ammoniated dentifrice & mouthwash), thru Sussman & Adler Adv., Pittsburgh.

Telecasters remained mum, but agencymen are voluble on subject of TV time and talent charges raised by Kudner Agency's James H. S. Ellis in recent Detroit speech (Vol. 7:2-3). Queried by *Advertising Age*, most were quoted in Jan. 22 issue as laying blame on unwillingness or inability of agencies to do the talent job themselves. It was also revealed that complaint was first made publicly by Harry Trenner, TV v.p. of Wm. Weintraub Agency before Jan. 12 meeting of Philadelphia TV Assn. Trenner said high rates and talent costs would drive all but very largest advertisers from TV, open way for govt. control to combat monopoly. Jan. 22 *Broadcasting Magazine* editorially warned that advertisers might go to other media "unless some equilibrium is restored." *Advertising Age* editorial concluded with these words: ". . . it is even more important for advertisers and their agencies to develop somewhat stiffer backbones which enable them to resist such practices [higher costs] not only in public addresses but in the privacy of contract-signing sessions where their influence is far more effectively felt."

Advertising from Federal tax standpoint, with particular reference to current Treasury Dept. policy, is subject of 18-p. booklet by Assn. of National Advertisers, issued Jan. 24. Booklet discusses types of advertising approved for excess profits tax purposes, also refers to labor-management advertising. Copies may be had from ANA, 285 Madison Ave., New York.

Network Accounts: Procter & Gamble will sponsor Tue. 7-7:30 edition of *Kukla, Fran & Ollie* on NBC-TV, Time Inc. (Life magazine) Thu. 7-7:30 version after Sealtest drops these periods in about month; Mon. & Fri. periods continue under RCA Victor sponsorship, Wed. under Ford Dealers . . . Kaufmann Bros. & Bondy Inc. (Kaywoodie pipes) reported considering sponsorship of second half of *Frank Sinatra Show* on CBS-TV, Sat. 9-10; Bulova Watch Co. sponsors 9-9:30 portion . . . Assn. of American Banks reported under contract with Time Inc. for *The March of Time Through the Years*, possibly to be placed as cooperative on ABC-TV, with member banks sponsoring films locally.

Personal Notes: ABC elects 4 new vice presidents: Alexander Stronach Jr., TV programs; Otto Brandt, TV station relations; Leonard Reeg, radio programs; James H. Connolly, radio station relations . . . Walter Bonwit, ex-merchandising v.p. of Bonwit-Teller, son of that store's founder, joins WJZ-TV, New York, to promote dept. store use of TV . . . Mort Weinbach, attorney formerly with CBS & MCA, joins ABC as business mgr. of program dept. . . . Robert W. Sarnoff, ex-mgr. of program sales, appointed director of NBC-TV unit productions, reporting to v.p. Frederic Wm. Wile Jr. . . . Al Constant named program mgr. of KRON-TV, San Francisco, succeeding P. H. Crafton, resigned to join Richard Meltzer ad agency; E. W. Malone promoted to promotion mgr. . . . Ralph E. McKinnie, ex-CBS-TV & DuMont, named New York sales mgr., Paul H. Raymer Co. . . . J. S. Stolzoff, ex-TV-radio v.p. of Cramer-Krasselt, Milwaukee agency, resigns to join Chicago office of Foote, Cone & Belding . . . Gene Fromherz succeeds late John H. North as media director of Aubrey, Moore & Wallace, supervising TV-radio programs . . . Edgar Kobak, ex-MBS president, owner with his son of WTWA, Thomson, Ga., has purchased half-interest in *The McDuffie Progress*, local weekly . . . NBC-TV promotes Robert E. Button, Lance Ballou, George L. Ogle to Eastern network TV sales dept.

Tom Revere, 48, veteran radio adman, since 1947 TV-radio mgr. of Biow, died Jan. 24 in New York. He is survived by his wife, Mrs. Althea Lepper Revere, professor of microscopy at Stevens Tech, a son and daughter. He was a 1925 engineering graduate of Ohio State.

———■———

First analysis of Phonevision audience indicates second week's 21 screenings pulled 569 "paid admissions"—or 27% of total possible in 300-family Chicago experiment. Submitted by Zenith to Hollywood producers whose pictures are being used, report shows low of 44 families called for service Jan. 12, high of 122 Jan. 14. Average was 81 families per day. Other interesting deductions from report, in Jan. 24 *Variety:* (1) Only 44 people asked for 4 p.m. showings—causing Zenith to change matinee to 2 p.m. on grounds later showings ran into dinner preparations. (2) Saturday night audience totaled 85 for both 7 & 9 p.m. screenings. Sunday night showings for both times totaled 95. This is considered significant since those nights are supposed to be theatre's best. (3) Most popular picture was Paramount's *I Walk Alone*, ordered by 100; next was *Voice of the Turtle*, ordered by 93.

States apparently are going to regulate theatre-TV, since closed-circuit telecasts fall into their domain rather than Federal jurisdiction. That's implication of ruling this week by New York State Attorney General Nathan L. Goldstein that theatre-TV programs can be regulated by State, just as it regulates movies shown in theatres. Ruling was at request of New York Education Board. He agreed TV broadcasts for home viewing fell within purview of Federal Govt. only.

Mobilization Report
January 27, 1951

AERO PLANTS DEEP IN ELECTRONICS: Scan their help-wanted ads in current technical journals, seeking electronics personnel, and you get hint of how deeply aircraft industry is becoming involved in electronics development and production.

While most TV-radio producers concentrated on civilian goods since last war, airplane and aero instrument manufacturers have delved so deeply into electronics that they're already major elements in procurement programs.

Guided missiles are main items, and brain of the "bird" is electronic -- ground-to-ground, air-to-air, air-to-ground.

Electronic devices guide, track, detonate.

Idea that TV-radio industry has monopoly of know-how and capacity to produce is being dispelled as electronics contracts go to new names -- and plane-making companies like Bell, Boeing, Consolidated Vultee, Douglas, Grumman, Hughes, Lockheed, Martin, North American, Northrop get into the swim. Also, instrument makers like Bendix, Delco, Sperry, Thompson. One is known to have spent $50,000,000 on electronics facilities alone.

* * * *

What does this mean to TV-radio industry?

It means they'll get fewer military contracts than some of them think, albeit an estimated $8.5 billion will be spent on military electronics during fiscal 1951 & 1952 (Vol. 7:3).

It means the TV-radio manufacturer without research and development engineers will stand way down end of line for war contracts. Air-electronics program is still primarily research and development.

It means large chunks of electronic procurement must be deleted from TV-radio industry's anticipated non-civilian "budget".

It means there will be new names in the electronics industry, and some old ones may be obscured, becoming at best mere subcontractors.

* * * *

Aviation industry's rush for electronics engineers was cogently pointed up in article in Jan. 24 New York Times, one of series on aircraft industry. It discusses radar as a new aviation field, states "the electronic engineer or technician is one of the most sought after workers in the U.S." It quotes spokesman for Glenn Martin Co. as saying:

"Thank God for the TV industry. It's trained many men who will wind up in aircraft plants if and when the production of civilian TV sets is curtailed." If TV isn't seriously cut back, or if TV-radio manufacturers find govt. contracts to "take up the slack," this spokesman sees thousands of presently self-employed servicemen "feeding into aircraft plants."

* * * *

Why electronics plays such big part in guided missile program was noted recently in Wall Street Journal:

"'Birds' are operated by remote control or radar or by mechanisms within the body of the missile...seek out their target in various ways -- 'beam riders' which follow track of radio or radar waves; by ground operators, who track missile on radar screen and direct it to target; through 'homing' devices which guide missiles automatically to target when they are within a few miles of it. Long range missiles, in addition, need navigational devices..."

Even leaving out of consideration guided missiles program, aircraft industry would be important in electronics. "Piloted planes are already becoming masses of

electronic equipment for finding and tracking targets and shooting guns at them," the Wall Street Journal stated. And New York Times noted:

"Jet-powered aircraft are packed with radar and electronic devices. Indeed, on some of today's war planes, the radar and electronic equipment aboard accounts for half the cost of the entire plane."

Mobilization Notes: President Truman named CBS chairman William S. Paley Jan. 22 as head of Materials Policy Commission to study long-range supply problems in strategic materials (mainly minerals). Five-man board was asked to report in 6-9 months on outlook for requirements and supplies, "consistency and adequacy" of present govt. policies and of private industry practices.

In a letter to Mr. Paley, President Truman wrote: "By wise planning and determined action we can meet our essential needs for military security, civilian welfare and the continued economic growth of the United States." The Commission will be responsible only to the President and reportedly was chosen from persons out of Govt. so as to be divorced from pressures of immediate defense needs. Other members: George Rufus Brown, Houston business man; Eric Hodgins, New Milford, Conn., author and editor; Arthur H. Bunker, New York, partner, Lehman Bros., bankers; Edward S. Mason, Harvard economics professor.

* * * *

Use of tin came under strict govt. control Jan. 27 with issuance of 5 distribution orders by NPA. Among restrictions applying to electronics industry: Effective March 1, capacitor foil of dimensions .00035 in. or less may not have more than 50% tin content; foil for all other capacitors is limited to maximum of 15% tin. Solder for use on electric precision instruments is permitted unlimited tin content; solder for toher hand-soldering operations is limited to maximum tin content of 40%; other soldering operations may not employ more than 35% tin (Order M-8 as amended). Govt. certification is required for all non-defense use of tinplate and terneplate (M-24). Earlier tin order (M-8), limiting civilian use to 80% of normal consumption, remains in effect.

Deliveries of molybdenum for all non-defense uses except manufacture of steel were banned temporarily by NPA Jan. 27. Small quantities of the critical metal are used in some electronic tubes. Defense priority and civilian orders for the material by high-speed steel producers were slashed by 50%. NPA Order M-33, issued simultaneously, limits molybdenum inventories to 20-day supply. NPA officials said the actions were "necessary to provide some molybdenum for highly essential production not covered by defense rated orders."

Tungsten, formerly imported from China and Korea, was placed under complete allocation Jan. 22 by NPA (Order M-30). As in case of cobalt (Vol. 6:52), all tungsten purchases will have to be cleared by Govt. after March 1 and its use in manufacture of pigments will be banned. Amount used in electron tube filaments is very small compared with quantities used in high-speed steel (including jet engines), and tube makers feel nickel and copper will continue to be far bigger shortage worry.

Gen. Wm. H. Harrison's first action as Defense Production Administrator (DPA Delegation No. 1) Jan. 24: (1) He authorized DPA, rather than National Security Resources Board, to issue tax amortization certificates permitting accelerated "write-off" of cost of new plant facilities, (2) he empowered DPA to issue certificates authorizing RFC loans for plant expansion, with agencies which previously issued the certificates (Interior, Commerce depts., etc.) continuing to make recommendations concerning loans.

Production of plastic TV cabinets and parts may be hit hard by chemical shortages, president Eli F. Jensen of Molded Plastics Co., Cambridge, O., indicated to Senate Small Business Committee Jan. 23. He said an NPA-arranged voluntary 45% cutback in amount of polystyrene available for plastics industry resulted in possibility of heavy cutbacks and layoffs in Crosley and Admiral refrigerator plants. Dr. Lowell B. Kilgore, of NPA's Chemical Division, said he expected situation to improve toward end of this year. Next day, NPA cut back by 40% civilian use of another chemical used by plastics industry, ethyl cellulose (Order M-32).

Radar-Radio Industries of Chicago Inc., 77 W. Washington St., consulting organization for TV-radio manufacturers active in World War II, has been reactivated to act as clearing house for such industry and area problems as materials allocations and priorities, manpower, selective service, pooling of hard-to-get instruments or supplies, etc. Officers are Leslie F. Muter, president; Paul Galvin, Ray W. Durst, Richard F. Dooley, vice presidents; Robert Alexander, treas.; Leonard Shapiro, attorney, secy.

Harry K. Clark, Carborundum Co. president, was appointed vice chairman of Munitions Board. He will be in charge of production management, including all defense military production programs (which includes electronics), chairman J. D. Small announced. During World War II, Clark was an official of Office of Production Management and War Production Board.

Dr. A. V. Astin, Bureau of Standards Electronics & Ordnance Div. chief, was appointed associate director of NBS. He will be responsible for activities of Divisions of Electronics, Ordnance Development, Missile Development, and the Office of Basic Instrumentation.

Price and wage control field offices of Economic Stabilization Agency are being opened in 13 cities next week, with only skeleton staffs at outset. Regional offices will be in Boston, New York, Philadelphia, Richmond, Atlanta, Cleveland, Chicago, Minneapolis, Kansas City, Dallas, Denver, San Francisco, Seattle.

Electronics, including TV, may alter 500-year-old pattern of book writing, makeup and reading, publishers fear. Ten top social scientists, summoned to New York conference last weekend, were asked by publishers to frame questions for future intensive research on this and other problems involving U. S. reading habits. Publishers conceded that book reading suffers when family first gets TV set—but they want to know whether families return to books when novelty wears off. Also under study will be possibility that magic of electronics will change future nature of books—in format, in presentation of subject matter and "in other ways now undreamed of."

Irate state legislators are stepping into dispute climaxed by National Collegiate Athletic Assn.'s one-year ban on college football telecasts (Vol. 7:2). California's state assembly voted 39-6 to ask Pacific Coast Conference schools to reconsider their new rule against televised sports (Vol. 7:1). Pending in Minnesota and Washington legislatures are measures to require state universities to televise football games. Meanwhile, Indianapolis Motor Speedway turned thumbs down on TV for this year's 500-mile Memorial Day classic.

Trade Report
January 27, 1951

STOP-GAP ORDER FREEZES WAGES-PRICES: It's much too early, as we go to press, to gauge impact on TV-radio industry of Friday night's govt. order of a general freeze on prices and wages -- but these points should be noted pending specific and detailed controls definitely on the way:

(1) There are no rollbacks, since seller can charge up to highest price for any article that was in effect between Dec. 19 and Jan. 25. Since TV-radio's recent cycles of price increases occurred prior to Jan. 25, order simply puts brake on any further hikes unless specifically authorized later.

(2) Wages and salaries are frozen at those prevailing last Thursday, though specific details as to wage controls remain to come from Wage Stabilization Board.

(3) Telecasting, broadcasting and publishing rates are exempt from price freeze, along with certain farm products, professional services (such as legal and engineering), rents, real estate prices, insurance rates, public utility and common carrier rates.

(4) General order is stop-gap, admittedly, designed to halt spiraling cost of living, and it will be followed by specific formulas applicable to individual industries. It also may be followed by other controls such as further Federal Reserve restrictions on installment buying (possibly 40% down, 12 months to pay).

Full text of new order had not been released at press time, but fact that Uncle Sam means business is manifest from penalty provisions of prison up to one year, fines up to $10,000 for violations.

OUTPUT RATE POINTING DOWNWARD: First full production week of 1951, 5 days ending Jan. 12, resulted in output of 167,859 TV receivers (13,839 of them for private brands) by industry as whole -- plus 338,520 radios. It's too early to say this betokens downward trend. Figures compare with first January week's 105,699 TVs, 209,792 radios, way down due to New Years Day hiatus (Vol. 7:3).

Yet the figures could mean the production heyday of latter 1950 is over, output now gradually diminishing to possible 25% curtailment first quarter, more later. Certainly, few expect approximate 200,000-per-week average maintained through last quarter 1950 can be achieved this year.

RTMA estimates are quite eloquent, nevertheless, in that they show exceptionally high rate of radio output continuing. The 338,520 radios counted for week ended Jan. 12 run fairly close to top weeks of record fourth quarter 1950. It's possible, though, that this particular week saw substantial amounts of materials deflected from TV to radio receivers. Week's radios, incidentally, included 220,481 home, 94,452 auto, 23,590 portable sets.

If 150,000-per-week TV rate is maintained first quarter -- as some think it can be -- that means close to 2,000,000 sets. That many more for all rest of year would bring 1951 total to fully half 1950's approximate 7,500,000 (Vol. 7:2) -- and 4,000,000 sets this year would satisfy the most hopeful, could readily be marketed.

Most TV-radio manufacturers have notified RTMA they are either already conforming or plan to conform to FCC's proposals restricting oscillator radiation (Vol. 6:34-37). Answers were in response to Dec. 14 letter by RTMA president Robert C. Sprague who wrote manufacturers: "My conversations with members of the FCC and the staff have convinced me that unless the industry as a whole conforms to the new standards and further improves upon these standards as rapidly as the art permits, a solution to the problem may be sought through govt. regulatory action, perhaps even by subjecting our entire industry to some form of certification for the products of receiver manufacturers." These words were quoted by FCC Comr. Sterling to IRE and Industrial Electronics Organization meeting in Cleveland Jan. 24, in speech devoted almost wholely to industrial-scientific-medical frequencies.

Russians have been telecasting color for nearly 3 years in Moscow, *Los Angeles Mirror* reported Jan. 26 in copyrighted story. But here's the payoff: Muscovites are still waiting for black-and-white sets!

Brig. Gen. Alfred M. Shearer, in charge of Army Signal Corps supply and formerly chief of procurement & distribution, retires Jan. 31.

Topics & Trends of TV Trade: National Credit Office Inc., 2 Park Ave., New York, finds liquid position of TV, radio and electronics industry "excellent," rate of inventory "good," relationship of earnings to sales and net worth "quite satisfactory", in survey released this week. Steadily increased production facilities, despite materials shortages, are justified by defense orders which it says will offset to large extent decline in civilian production.

"The large increase in fixed investment, which occurred during 1949," NCO report states, "was financed without any increase in long-term borrowings. In fact, deferred debt during 1949 actually declined by $1,600,000. Equity capital was readily available though not used to any great extent. Part of earnings was used to finance asset expansion. Working capital is thoroughly adequate for the needs of the industry, as indicated by the fact that the indebtedness for borrowed money is very small. The relationship of total debt to net worth is sound."

Industry earnings of 4.41¢ per dollar of sales in 1949 and 4.26¢ in 1948 will be surpassed for 1950, NCO predicts, on basis of production of 7,250,000 TV and 14,000,000 radio production—as against 2,700,000 TVs in 1949 and 1,000,000 for all years prior to 1949. [Editor's Note: NCO output figures are much too low; see tables of TV-Radio Set Production: 1946-50, p. 67, *TV Factbook No. 12.*]

* * * *

Credit restrictions are blamed for holding down December furniture store business, in Harvey E. Runner's "Buyers and Sellers" column in Jan. 24 *New York Herald Tribune*. Lines particularly affected were TVs, radios, major appliances, upholstered furniture. TV-radio sales were off as much as 36% in furniture stores, 54% in dept. stores. But stores not doing major part of their business on installment basis, Runner states, reported gains in TV-radio up to 267%, in major appliances up to 323%.

Emerson raised prices $10-$30 on 5 sets in its 20-set line, effective Jan. 22. Here are new prices (increases in parentheses): 676, 17-in. mahogany table, $299.95 ($10); 678, 16-in. mahogany console, $329.95 ($10); 681, 17-in. mahogany console, $379.95 ($10); 669, 19-in. mahogany console, doors, $479.95 ($10); 666, 16-in. mahogany console, AM-FM-phono, $499.95 ($30).

* * * *

Plant expansions: Raytheon granted govt. certificate of necessity for erection of new $4,000,000 power tube plant at Waltham, 144,000 sq. ft. structure to be ready by late Oct. or Nov. . . . **Hytron** planning new $1,000,000 plant at Danvers, Mass. . . . **Sheldon Electric** (div. of Allied Electric Products Inc.) erecting 2-story addition to main building at Irvington, N. J., adding 15,000 sq. ft. by March 1 . . . **Utility Electronics Corp.** has leased 80,000 sq. ft. at 900 Passaic St., E. Newark, N. J. . . . **Sherold Crystal Co.**, subsidiary of Espey Mfg. Co., moving plant within next 60 days from Lawrence, Kan., to Kansas City, Kan., to secure more floor space and greater pool of skilled labor.

Estimated November shipments of 716,000 TV sets to dealers in 36 states and D. C. are detailed in county-by-county table issued this week by RTMA. Parallel table gives similar detail on sets shipped during first 11 months of 1950 (total 6,377,000).

Sylvania Tube Div., to promote TV-radio servicing, has launched $1,000,000 ad campaign through Cecil & Presbrey, tying in with Sylvania's *Beat the Clock* on CBS-TV, with ads in *Saturday Evening Post*, *Collier's*, *Look*, and point-of-sale kit for distributors.

Packard-Bell unveiled "Silver Anniversary" line of 7 TV sets in 26 models last week, with emphasis on 17 & 20-in. tubes. Sets run from 17-in. mahogany table at $269.95 to 20-in. mahogany console-combination at $615.

Washington distributors and dealers opened National Tele-Vet Week by presenting 26 TV receivers to hospitalized Korean veterans, mostly in Walter Reed Hospital. Idea started when George Wasserman, of George's Radio, got request for TV set to help rehabilitate triple amputee, and suggested donations not only in Washington but in other cities . . . Washington-Baltimore distributor James Simon, Simon Distributing Co. (Motorola), was host to Motorola president Paul Galvin, J. Edgar Hoover and other celebrities at cocktail party Jan. 24 to launch his campaign for a song for the capital city, backed by Motorola and *Washington Post*.

Admiral has added to appliance line a dehumidifier selling for $149.95; unit is only 30-in. high and about 1 ft. square, plugs in like electric fan, is designed mainly for use in basements, home laundries, laboratories, etc.

TV station tube costs have been figured by WTMJ-TV, Milwaukee, based on tubes used up in period between Dec. 1, 1947 and Dec. 1, 1950. Total cost of 34 camera tubes (excluding film camera iconoscopes) used during 3-year period was $40,187.40, at cost per hour for each tube of $2.47. Here are cost estimates by types: Old field camera tube Model 2P23, 10 tubes total cost $10,789, cost per hour $1.71; first studio camera tube Model 5655, 8 tubes, $10,400 & $4.15; field and studio camera tube Model 5769, 5 tubes, $6000 & $2.38; improved field and studio camera tube Model 5820, 11 tubes, $12,988.40 & $2.28. In addition, station has figured that 5 Model 1850A iconoscope film camera tubes cost $2338.20, at 29¢ per hour; 8 Model 8D21 transmitter power tubes cost $12,222, at 71¢ per hour.

BBC's ban on commercial TV-radio was reaffirmed by Govt.-appointed committee set up in 1949 to study Britain's broadcasting monopoly. Majority (7 members) of 11-man group held that TV-radio advertising would lower public taste, introduce "ulterior motive," shun educational needs and curtail opportunities for writers and artists. Committee also recommended: (1) Allocation to theatre TV of wavelengths not needed for home TV; theatre TV would be outside BBC control and probably commercially sponsored. (2) Increase yearly licensee fee (now about $5.50 on TV sets) to make TV self-supporting. (3) Extension of TV service; present TV area is confined to 40-mile radius around London and Birmingham.

Trade Personals: Ralph Hackbusch, president of Stromberg-Carlson Co. of Canada, president of Canadian RMA, reelected president of Canadian Radio Technical Planning Board, with Gordon W. Olive, CBC chief engineer, v.p.; Stuart D. Brownlee, RMA of Canada, secy.-treas. . . . Theodore A. Smith, sales chief of RCA Engineering Products Dept. last 5 years, appointed asst. gen. mgr. of dept. by technical products v.p. L. W. Teegarden, taking over duties of v.p. W. W. Watts who is now on leave as aide to Maj. Gen. Wm. Henry Harrison, Defense Production Administrator; A. R. Hopkins becomes gen. sales mgr., Barton Kreuzer gen. product mgr. . . . N. J. Peterson named sales mgr. responsible for sale of GE Tube Divisions products to Govt.; Joseph Duffield named Eastern regional sales mgr., New York . . . Dr. E. A. Lederer, ex-RCA, joins Westinghouse to head engineering for company's new electronic tube div. . . . Gil Hafner, ex-Bell Labs & Bendix, named gen. supt. in charge of production and maintenance, Hoffman Radio . . . J. B. Swan, Philco, new chairman of RTMA traffic committee, succeeding Richard C. Colton, RCA . . . Morton P. Rome, attorney, elected Emerson v.p. in charge of contract div., handling all govt. contracts . . . Gilbert C. Knoblock, adv. mgr., promoted to sales mgr. of Standard Transformer Corp. . . . Edwin Weisl named Air King adv.-sales promotion mgr.

Telecasting Notes: Pulse reports all daytime televiewing in New York up 34% in December, with TV sets-in-use daytime averaging 12.2 per quarter hour compared with 9.1 in Nov. Biggest jump was in afternoon viewing—12 noon-6 p.m. ratings up 76% in 1950 over 1949, sets-in-use between Nov.-Dec. alone rising from 12 to 16.2 . . . Total telecast time in New York increased 36% during second half of 1950 over first half, 61% over second half 1949, Pulse survey shows. Greatest increases during last 6 months have been in feature films, women's programs, musical and comedy variety, quiz, audience participation and interview shows . . . It's obvious that an MBS-TV network is remote as ever, but Mutual's new talent and package contracts contain clause prohibiting its performers from appearing on other networks—a precautionary measure to assure first option TV rights "if and when" . . . When janitors' strike closed Minneapolis schools this week, WTCN-TV telecast series of 15-min. schoolroom programs 9-11 a.m. . . . NBC's WNBT expects to be telecasting from new 222-ft. Empire State Bldg. antenna about March 1, work now half-way done; WCBS-TV, WJZ-TV, WABD, WPIX antennas due to be shipped by RCA in early Feb., ready for use from Empire State new tower within 6 weeks, while WATV still awaits FCC approval (Vol. 7:2) . . . Barnard College (Columbia U), collaborating with NBC, will offer 6-weeks non-credit summer courses in TV-radio June 25-Aug. 3, with NBC dept. heads as instructors . . . Lots of kudos, in New York area press, particularly in his native Jersey, on occasion of Allen B. DuMont's 50th birthday Jan. 29; he's also subject of "Profile" sketch in Jan. 27 *New Yorker* . . . Newspaper Guild of New York moving in to organize white collar workers at CBS-New York . . . Kansas City's KMBC has purchased 5 kw DuMont transmitter, even though freeze precludes FCC grant and construction as yet . . . Montreal City Council has authorized use of Mt. Royal for TV station, provided there be no monopoly; CBC has announced it will build station, but private interests want to do so, too . . . Additional Jan. 1 rate raises: WSAZ-TV, Huntington, base hourly rate up from $300 to $450, one-minute from $36 to $60; WHAM-TV, Rochester, $480 to $600 & $80 to $100; WICU, Erie, $350 to $450 . . . WAVE-TV, Louisville, March 1 raises base hourly rate from $300 to $400, 1-min. from $60 to $80.

Profitability of TV, or its near profitability, reported chapter-and-verse in these columns over last 2 years (see Index to 1949 & 1950 Newsletters), is borne out in symposium in this week's *Variety*, which seized occasion of NAB-TV Chicago meeting last week (Vol. 7:3) to buttonhole station operators. These facts were adduced: KSD-TV, St. Louis, in black since 1949, TV billings nearly double sister AM's . . . WWJ-TV, Detroit, cracked $1,000,000 in 1950 billings, ended year within fraction of 1% of breaking even, started this year in black . . . WFIL-TV, Philadelphia, TV business now 1½ times AM, in black since Oct. . . . WTAR-TV, Norfolk, expects to hit profit by first anniversary April 1 . . . KRLD-TV, Dallas, only 13 months old, "within a hair" of break-even point, TV rate card still under 50-kw AM card . . . WOC-TV, Davenport, began showing profit in Nov., 13 months after debut, TV gross billings well ahead of AM . . . WATV, Newark, running in black with its 95 hours per week of local shows (no network), passed sister AM (WAAT) in mid-1950 . . . WSB-TV, Atlanta, TV still slightly behind 50-kw AM but moved into profit side of ledger in Nov. . . . WHEN, Syracuse, making money, with 30 hours of live programs out of 100 per week . . . KTTV, Hollywood, now showing $25,000 monthly profit, joining KLAC-TV (Dorothy Schiff) and KTLA (Paramount) as area's money makers; *Hollywood Variety* adds that KTTV piled up losses of $1,050,000 in 21 months before pulling out of red in October.

Ideal case for partial ending of freeze was put to FCC this week when KHON, Honolulu, MBS outlet, petitioned for waiver of freeze as it applies to Hawaii and for lifting of ban on building stations there. Petition emphasizes there's plenty of mileage separation, no problems of interference, etc., that new stations in Hawaii would have no effect on final allocation plan, however it comes out. Under FCC's proposed allocation, 20 vhf channels are assigned Hawaiian Islands. KHON said it was preparing own application for station, to be filed soon. Last December, KPOA, Honolulu, filed application, but it was returned as incomplete (Vol. 6:51). FCC this week received one new application for TV—from Knoxville's KBIR, seeking Channel No. 10. Two other applications from city are pending, filed by WNOX for Channel 6 and Charles Cornell for No. 8. [For details about KBIR application, see *TV Addenda 12-C* herewith.]

Bombing and sabotage wouldn't silence U. S. broadcasting, Arthur Van Dyck, of RCA Laboratories, told winter meeting of American Institute of Electrical Engineers in New York this week. He cited these protective measures already in force: (1) Radio stations are widely dispersed. (2) There are so many of them that interchange of facilities will keep important broadcasts on the air. (3) Staffs are fully experienced in emergency operation. (4) Emergency transmitters and antennas are available to many stations. Regarding potential use of stations for "homing" of enemy planes (Vol. 6:51), Mr. Van Dyck expressed doubt that any modern aircraft navigator "would need to use broadcast station emissions to locate any city in the United States."

Value of cross-polarization to permit use of single frequency band to transmit 2 services is indicated in report to FCC by 20th Century-Fox on tests by experimental TV station KE2XKA. Report cites 13-mi. test on 6850-6875 mc between Coty Bldg., 423 W. 55th St., New York, and Rockcliff Apts., Montclair, N. J., as showing that signal suppression of 30db is obtainable, up to 40db noted. Importance of cross-polarization for theatre-TV use would allow simultaneous feed to theatres using same frequencies. Experiments also indicated, report says, that receiving antenna icing is no drawback to reception if waveguide feed and immediate surrounding area are kept free of ice. Report suggests beam of infra-red energy be directed at end of waveguide for this purpose.

Electromagnetic Radiation Control Bill (S. 537) was subject of executive session of Senate Interstate & Foreign Commerce Committee Jan. 25, with Air Force communications director Maj. Gen. Francis L. Ankenbrandt and FCC chief engineer Curtis B. Plummer as witnesses. Bill proposes to revise President's control over TV-radio stations, other electromagnetic devices, during war or emergencies (Vol. 6:51 & 7:2).

Seeking reinstatement of CP for TV, which FCC forced it to forfeit for failure to pursue construction plans diligently enough (Vol. 6:41), City of Jacksonville's WJAX this week asked FCC to consider additional evidence regarding validation of revenue certificates to finance proposed station. Florida Supreme Court has upheld validity of the certificates.

McFarland Bill (S. 658) was approved again by Senate Interstate & Foreign Commerce Committee this week. It contains provision forbidding FCC commissioners and key staffmen from accepting jobs in private industry dealing with Commission for year after leaving govt. service, also changes FCC procedures. Senate passed bill last year, but House never got around to it (Vol. 6:31-33).

Tenant can't be evicted for installing TV antenna on roof of rented house, a St. Paul justice of the peace ruled last week in what is probably first case of its kind in U. S.

TV Facing Need for 'Morals Code', *page 3.*
Materials—Tighter Second Quarter, *page 6.*
Relacement Parts Priorities Urged, *page 8.*
Materials & Rail Strike Cloud Trade, *page 8.*
Mid-Winter Picture Tube Lineup, *page 9.*

STRIKE FORCES TV-RADIO STOPPAGES: Railway tieup took toll of TV-radio production and shipments this week, with at least 3 major producers -- Philco, Admiral, GE -- and possibly others forced to shut down assembly lines for lack of transportation. At week's end, prospects for ensuing week were tied up with hopes for end of strike.

Philco halted all civilian production Wednesday, laying off nearly 12,000 at Philadelphia plants. Next day Admiral laid off 2000 of its 7000 Chicago workers, and GE laid off about 3000 in Syracuse. GE workers returned to work Friday. Philco said Sandusky receiver plant was still operating. Both Philco and Admiral estimated their normal production was down about 75%.

RCA in Camden, Motorola in Chicago, Emerson in New York kept going -- RCA and Emerson, also DuMont, merely reporting some absenteeism due to New Jersey bus strike. These and other manufacturers said they got supplies and shipped finished products via trucks, but Philco said it was largely dependent on railroads.

There was some belief shutdowns might be due partially to materials shortages not attributable to strike, though heavy items like refrigerators and shipments of TVs to distant points are largely by rail. While outlook was uncertain, no one took seriously New York Times Feb. 2 report that shutdowns are regarded as the "beginning of near-paralysis of the TV-radio and electrical appliance industries" and that "production and outgoing shipments will virtually cease within a week, according to industry leaders, if the rail stoppage continues."

DE-ICING THE FREEZE—HOW AND WHEN: Another estimate of elusive freeze-end, and what it may mean, is in order -- now that FCC has finally wound up "general issues" phase of its long-drawn-out series of freeze hearings.

"Educational" phase ended this week, which means that it and the color, mileage separation, uhf, etc. phases are at least on the record.

If all goes smoothly -- and there's good reason to believe it won't -- these would be next steps toward thawing the 28-month-old freeze:

(1) New vhf-uhf allocation plan, replacing July 1949 plan at which everyone has been shooting during hearings (see TV Factbook No. 12), will definitely be issued by FCC engineering dept., maybe within a month. That might mean by March 1.

(2) Comments and counter-comments on new plan, as it affects specific cities, will then be accepted, requiring maybe another month. That might mean April 1. (FCC has no intention of then going into another general-issues merry-go-round, intends basic principles of new plan to be final.)

(3) Hearings on allocations to specific cities would then begin, possibly in April. Make your own guess how long that will take. Chairman Coy mentioned 2 months in his recent Buffalo speech (Vol. 7:3), but we'd guess well into the summer or fall. (There were more than 300 comments filed on old allocation proposal. New plan may nullify need for many of these -- but there's no knowing yet.)

(4) Final decision to end freeze -- maybe during fall.

Copyright 1951 by Radio News Bureau

(5) After decision, 60 days have been promised applicants for filing new requests, amending old. (For complete list of applicants to date, see TV Factbook No. 12 and Addenda to date).

(6) Actual grants of new stations and some construction -- at least where channel supply exceeds demand, which means the less attractive markets -- might begin trickling through by early 1952. Competitive situations, requiring hearings, will demand additional 6-12 months or more. Certainly, any existing TV market will be competitive.

* * * *

Foregoing sounds reasonable and logical, but there's many a hitch. Odds-and-ends will inevitably crop up -- not least of which may be:

(a) Hassle over policy decision on educational channel demands.

(b) Reopening of color issue after Supreme Court decision, with RCA and perhaps others demanding hearing on basis of new developments.

(c) FCC Bar Assn. oral arguments, already promised, on its objection to whole idea of fixed allocation plan; it wants city-by-city assignments, as in radio. FCC contends fixed allocation isn't hard to change, points to FM as example.

FCC could get the lead out of its jeans and beat this lugubrious schedule, in opinion of many observers who claim, perhaps unfairly, that staffers are wasting more time than usual lately -- point to recent educational hearing attendance of FCC personnel who have had little or nothing to do with whole hearing in past.

Somewhat cynically, Broadcasting Magazine speaks of FCC's "WPA projects... to keep its staff busy" for duration, notes particularly its new AT&T investigation (long distance rates) and its "Blue Book crusade" (probe into TV programming, see p. 3). Staffmen defend FCC by saying these moves have been in works a long time.

"There's a war on..." but it's a fact that to date FCC has had very little part to play in the mobilization program.

* * * *

Nature of forthcoming new allocation plan has everyone speculating. Almost certain is uhf allocation built around specific intermediate frequency (IF), presumably the RTMA-sponsored 41.25 mc. Many are expecting decreased station separation -- reductions from proposed 220-mi. vhf, 200-mi. uhf.

Fact is, we've yet to hear really convincing answer, from FCC, to testimony of Bernard O'Brien, chief engineer of Rochester's WHEC, that May 1948 proposed allocation (utilizing 150 mi. vhf) actually meets Commission's own current objectives better than proposed 220 mi. (Vol. 6:34).

This week, he seemed to make even more sense when he added uhf to his calculations, still found his contention valid, ended up with compromise suggesting 150-mi. co-channel separations in crowded East, 220-mi. in wide-open West.

* * * *

How much grants will mean, when they finally come, depends on many factors:

(1) Will Govt. permit construction? (2) Will station equipment be available? (3) Will receivers be available for new markets? (4) Will manpower be on hand for construction or station-manning?

Our recent roundup of World War II experience and expected station equipment availabilities (Vol. 6:52) still stands up. There may be fair chance for some construction, and there are supposed to be several dozen TV transmitters available for quick delivery -- with Latin American interests ordering some of these "frozen assets" and reported readying to order still more.

Hawaii's chance of getting exemption from freeze, qualifying for CPs right now because of great distance factor, brightened considerably this week as KHON's petition (Vol. 7:4) gained support at commissioner level.

Any such grants would undoubtedly spur continental applicants, such as those in wide-open Denver and Portland, to new efforts to crack ice. Who knows, maybe even Colorado's powerful Senator Johnson, the unpredictable, will promote end-of-freeze-in-a-hurry as assiduously as he promoted color-in-a-hurry!

NARTB AS 'ONE BIG TENT' WITH NEW PREXY: NAB becomes NARTB next April -- National Assn. of Radio & Television Broadcasters. It thus follows lead of Radio Manufacturers Assn., which recently became RTMA, and of Society of Motion Picture Engineers, now SMPTE. Up-and-coming TV industry, built around mere 107 stations, thus demands and gets due recognition from parent broadcasting, manufacturing, show businesses.

"One big tent" idea (Vol. 7:3) won complete endorsement at NAB board meetings this week in Belleair, Fla. New bylaws and financing plans were adopted, and three boards of directors are set up -- one not more than 14 members to govern TV, second not more than 25 to govern radio, combined board not to exceed 42 and including all the TV and radio directors plus association's top paid executives.

It was decided to seek new paid president-general manager, after acceptance of plan elevating president Justin Miller to chairman of board -- the 2 jobs combined budgeted for $75,000. Judge Miller will be relieved entirely of administrative duties, will advise on policy, appear at hearings, etc.

New president will be selected by committee comprising Allen M. Woodall, WDAK, Columbus, Ga.; Harry R. Spence, KXRO, Aberdeen, Wash.; Patt McDonald, WHHM, Memphis; Wm. B. Quarton, WMT, Cedar Rapids; Wm. A. Fay, WHAM & WHAM-TV, Rochester.

Respective boards will choose TV and Radio division directors. TV board set up at recent Chicago meeting includes Eugene Thomas, WOR-TV, acting chairman; Robert Swezey, WDSU-TV, vice chairman; W. D. Rogers, KEYL; Clair McCollough, WGAL-TV & WDEL-TV; Harry Bannister, WWJ-TV; George B. Storer, WJBK-TV, WSPD-TV & WAGA-TV; Harold Hough, WBAP-TV; Campbell Arnoux, WTAR-TV; Paul Raibourn, KTLA (Paramount).

Four networks are entitled to one member each. DuMont has already designated Chris Witting, NBC Frank M. Russell. They were at Florida meeting along with Messrs. Thomas, Swezey and Rogers; all indicated satisfaction with new setup.

Neither ABC nor CBS is NAB member, having quit last year -- but expectation is they will rejoin now, designating their TV members shortly.

Membership of at least 60 TV stations is said to be assured at outset. Dues are yet to be determined by board, with $50,000 initial payment pledged toward overall NARTB budget to cover rent (one whole floor of Washington headquarters) and services of existing depts. Tentative TV Division budget is $150,000, based on preliminary estimate of assessments of one-fourth of 1% of gross station income.

Television Broadcasters Assn. (TBA) will be dissolved, its manufacturer members urged to join NARTB as associate members. Joint conventions are set for Hotel Stevens, Chicago, April 15-19.

TV FACING NEED FOR A 'MORALS CODE': Better start boning up, Mr. Telecaster, on the radio and motion picture industry codes -- and better get your trade groups working on something such for TV. Otherwise, Uncle Sam may really slap you down -- and with plenty of popular backing.

You can be sure that FCC, in ordering conference on TV programming (Vol. 7:3-4), intends to go further than mere questions of "program balance" a la AM. After its own fashion, it will go into such sure-fire headline-provoking aspects as off-color jokes, plunging necklines, crime dramas during children's viewing hours.

They're even talking about arriving at some sort of definition of "taste". Agenda and date of conference hasn't been fixed yet, but such "normal" subjects as commercial vs. non-commercial time ratios, local vs. network, live vs. transcribed, shoppers guide programs, etc. are sure to be embraced.

FCC renewed 44 TV station licenses this week, in announcing conference to be scheduled soon after Chairman Coy returns from his vacation March 6. All licenses expire Feb. 1, 1952, all running one year. Seven others previously got licenses to that date, while 8 are still on "temporary" list because owners are involved in FCC investigation of anti-trust policy (Vol. 6:5,15,17). All others of the 107 operate under STAs (Special Temporary Authority), which usually precede licensing.

Program probe shoves into background, really puts in abeyance, Commission's proposal to limit hours stations in 1,2,3-station markets may take from any one network (Vol. 6:40-48). There's little enthusiasm for that plan now either among sta-

tions, networks or commissioners. If current voluntary AT&T-network circuit allocations work out (Vol. 6:50), belief is Commission will let network-time proposal die.

Interesting facet of deliberations leading to program conference plan was dissent of Comr. Jones from calling conference or any other FCC involvement in programming. He thinks Commission should pick right licensees initially and look them over at renewal time, regards program aberrations as symptoms, not causes.

Network Accounts: Blatz Brewing Co. will sponsor *Amos 'n' Andy* with new Negro stars, half-hour weekly on CBS-TV, thru William H. Weintraub & Co., N. Y.; time and starting date to be announced . . . Bohn Aluminum & Brass Corp. (castings, pistons & bearings) buying NBC-TV's *American Forum of the Air*, Sun. 1:30-2, thru Zimmer-Keller Inc., Detroit; starting date not determined . . . National Distillers Products Corp. (Italian Swiss Colony wine) has started sponsorship of *Famous Jury Trials* on DuMont, Wed. 9-9:30, thru Honig-Cooper Co., San Francisco . . . Lehn & Fink Products Corp. (Lysol) reported considering sponsorship of 8-8:15 segment of *Jack Carter Show* on NBC-TV, Sat. 8-9, thru Lennen & Mitchell, N. Y.; Campbell Soup Co. has cancelled 8-8:30 portion . . . Lever Bros. (Surf) will sponsor *Hawkins Falls* on NBC-TV, Mon.-Wed.-Fri. 5-5:15, thru N. W. Ayer & Son, Philadelphia; starting date not set . . . General Mills (Kix) is readying sponsorship of segment of *Ted Mack Family Hour* on ABC-TV, Sun. 6-7, thru Tatham-Laird Inc., Chicago; C. A. Swanson & Sons (poultry & margarine products) has contracted for alt. Sun. 6-6:30 portion, same agency . . . Cereal Institute, association of breakfast food processors, will sponsor *Mr. Wizard* on NBC-TV, time and starting date not set . . . Samson Hosiery will sponsor Faye Emerson & Skitch Henderson as husband-and-wife team on *Easter Parade* on NBC-TV, one time, Sun., March 25.

Station Accounts: Defense plant workers are recruited via Cleveland's WXEL by means of "commercials," describing jobs and flashing phone numbers taking applications, on regular 15-min. programs sponsored by Cadillac Tank Div., General Motors, *Bob Rowley with the News*, 3 times weekly; National Screw & Mfg. Co., *Sports Desk*, once weekly; Cleveland Pneumatic Tool Co., *Manpower Headlines*, once weekly, *Sports Desk*, once weekly . . . Besides Philadelphia's WFIL-TV, which accepts only established firms or requires certificates of approval from testing labs for direct-mail solicitation via its facilities, other stations reported to be imposing new rigid standards are: WPIX, New York; WNHC-TV, New Haven; WJAR-TV, Providence; WOI-TV, Ames, Ia. Chicago's WBKB requires $25,000 bond . . . Washington's big Campbell Music Co., to advertise DuMont TVs, Feb. 9 starts sponsoring on WTTG 13 full *Vienna Philharmonic Orchestra* concerts, Fri. 8-8:30, filmed in Vienna and Salzburg by Ambassador Films—regarded as an interesting test of acceptability of fine music via TV . . . Wheatena Corp., thru its Philadelphia distributor, using spots on all 3 Philadelphia stations, plus radio and newspaper ads, thru Brisacher, Wheeler & Staff . . . Unusual sponsor on KING-TV, Seattle, is Alaska Junk Co., using 1-min. slides to sell scrap metals, old machinery, other used and surplus equipment . . . Phoenix Hosiery Co. to use TV spots in 26 cities in campaign starting Feb. 28 leading up to Easter and Mother's Day, thru Hockaday Associates, N. Y. . . . New spot business on WABD, New York, includes Procter & Gamble Co. (Joy soap flakes), thru Biow Co., N. Y.; Stahl-Meyer Inc. (canned meats), thru Dowd, Redfield & Johnstone, N. Y. . . . Among other advertisers currently reported using or preparing to use TV: Yardley of London (lavender fragrance), thru N. W. Ayer, N. Y.; J. A. Wright & Co. (Wright's silver cream), thru Lambert & Feasley, N. Y.; Ballard & Ballard Co. (Oven Ready biscuits and food products), thru Henri, Hurst & McDonald, Chicago; Robert Hall Clothes Inc., thru Frank B. Sawden Inc., N. Y.; Dormeyer Corp. (kitchen appliances), thru John W. Shaw Adv., Chicago.

Promotion of hat sales, through closed-circuit store demonstrations—"see-yourself-on-TV"—is being conducted in New York's Wallachs Inc. chain by Frank H. Lee Co. (Lee hats) and RCA. First showing, Feb. 1, was in Empire State Bldg. store, featured personal appearance of actor Robert Montgomery. Demonstrations, 2-3 days each, will also be given in White Plains, Jamaica, Newark stores.

"Ad hucksters also rush to find strength in union," states *Wall Street Journal*. "A dozen mergers have come in 6 months. Little agencies with limited manpower cannot compete when servicing accounts using radio, TV, magazines and newspapers." To which it might have added that many agencies find 15% commission, albeit rates are higher, insufficient to maintain TV specialists.

New York's FM-only WABF (Ira Hirschmann) reports 17 advertisers sponsoring 55% of its 50 hours a week of "good music"—audience loyalty attested by fact that $6000 was subscribed for sponsorship of New Friends of Music concerts and station's *Program Magazine* is now self-supporting with ads at $125 per page.

Feb. 1 sets-in-use reported since NBC Research's "census" of Jan. 1 (Vol. 7:3): Dallas, 59,082, up 2582; Miami, 52,500, up 2500; Greensboro, 49,812, up 7812; Fort Worth, 46,237, up 2137.

PETRILLO is out to strangle TV's use of films, except on his own terms. That's for sure, and it makes industry negotiators fear for long, cold winter before new AFM-network contract is signed. At moment, existing contract has been extended to Feb. 15, with networks agreeing to make terms retroactive to Feb. 1 if reached by that date. Present contract expired Jan. 31 (Vol. 7:2-3).

Here's what Petrillo is asking: (1) Repeat fees for all kinescope recording showings, plus a 5% royalty fund based on each non-connected station's network rates. (2) Networks not to produce films for TV without AFM clearance. (3) No foreign pictures with music without AFM approval.

Petrillo also let it be known that his 1946 contract with Hollywood producers bans release of their films for TV whether made before that year or subsequently. This is recent AFM "interpretation." Just what it means to TV networks and stations, which have been using spate of such features, wasn't made known.

AFM czar also asked pay of 20% above AM rates for TV musicians. For simulcasts, he wants 50% above AM scale, $12 per man for costuming and makeup. Present TV scale is 95% of AM scale for network, 80% for local shows. Present AM scale is $18 for half hour, $23 for hour, $7.50 per hour for rehearsals—but union is asking about 50% hike in AM pay.

If and when new contract is signed, Petrillo agreed not to strike networks if Wage Stabilization Board turns him down. Under present price-wage freeze, all contracts after Jan 25 must be approved by WSB.

Personal Notes: Harry Stone, onetime mgr. of WSM & WSM-TV, Nashville, new gen. mgr. of KPHO & KPHO-TV, Phoenix, with Wm. Burton, ex-artist mgr., becoming program director . . . **Mike Dann**, NBC trade editor, shifted to NBC-TV sales dept. to coordinate program package sales . . . **Wm. A. Porter** elected president of FCC Bar Assn., succeeding **Neville Miller**. Other officers: **Arthur W. Scharfeld**, first v.p.; **Fred W. Albertson**, 2nd v.p.; **Russell R. Eagan**, secy.; **Quayle B. Smith**, treas. . . . **John M. Wyatt**, TV-radio chief of Grey Adv., and **Reggie Schuebel**, TV-radio chief of Duane Jones Adv., have resigned to form new program agency opening Feb. 1 as Wyatt & Scheubel, 40 E. 51st St., N. Y. . . . **Earl Ebi**, ex-J. Walter Thompson, named TV-radio director, Warwick & Legler, Hollywood . . . **C. Nelson Baker** now heading TV-radio, Ruthrauff & Ryan, Baltimore . . . **Mike Jablons**, special asst. to FCC Comr. Hennock, has resigned, left for trip to Europe, returns March 1 to resume post of v.p.-gen. mgr. of Gainsborough Associates, N. Y. . . . **Henry B. Owen**, president of KING & KING-TV, Seattle, named head of Seattle Office of Price Stabilization regional office . . . **Donald Fink**, *Electronics*, new chairman of U. S. preparatory committee on TV (CCIR Study Group 11); **Neal McNaughten**, NAB, chairman of both U. S. and international groups on broadcasting (Group 10) . . . **Roland W. Gillett**, v.p. in charge of TV-radio for Young & Rubicam, has resigned and left for combination vacation and business trip to Hollywood.

**Defying National Collegiate Athletic Assn.'s one-year ban on live telecasts (Vol. 7:2), U of Pennsylvania has invited TV networks to submit bids for carrying its 1951 home football schedule, Jan. 31 *Variety* reports. *Wall Street Journal* Jan. 31 story blames TV for "sabotaging the box office" at sporting events, cites 20-40% dip in current New York and Boston basketball gates, 57% drop in Chicago Stadium attendance, 25% lag in attendance at Boston Bruins hockey games—in contrast in increase in athletic gates in non-TV areas. Chicago Stadium press agent James Kearns is quoted: "Televising of our own games doesn't hurt us so much, but on Saturday nights we're competing with top video comics like Imogene Coca and Sid Caesar, basketball from New York's Madison Square Garden, and the comforts of the living room." Illinois State Legislature, fourth to get sports TV legislation (Vol. 7:4), is considering bill to ban theatre TV of games of tax-supported institutions unless games are also telecast for general public use.

Danish TV station, serving Copenhagen-Malmo area, is reported in February *Electronics* to be due on air any time now. Magazine says Danish-made sets have been demonstrated, that "components, with the exception of picture tubes, can be made by some 30 plants and assembled by about 20 others, the two groups at present employing 25,000-odd people."

More color speeches: CBS's Peter Goldmark defended his system, attacked manufacturers for not promoting it, in talk Jan. 30 to Cleveland (O.) Technical Societies Council. Hazeltine's A. V. Loughren and C. J. Hirsch will spread their gospel of mixed highs at Feb. 7 meeting of New York IRE in Engineering Societies Bldg., 33 W. 39th.

"Movies for TV" is subject and title of book by *Tele-Tech Magazine* associate editor John H. Battison, who also conducts course on subject at New York U. Author covers particularly difference between film for theatres and for TV. Published by Macmillan Co. (376 pp., $4.25).

William I. Kaufman, NBC casting director, and **Robert S. Colodzin**, TV director of Manhattan Adv. Agency, are co-authors of *Your Career in Television*, published by Merlin Press ($3.50).

Newspaper sales in TV areas have climbed second year in row, *Editor & Publisher* reported recently after second annual survey (for report on 1949 survey, see Vol. 5:49). Circulation gain by 438 daily and 97 Sunday papers during year ending Sept. 30 was: Dailies, 494,151 (morning, 201,301; evening, 379,582; morning-evening, 86,732 loss); Sunday papers, 534,897. TV area papers included in tally represented 35,000,000 daily circulation out of national total of 52,000,000, and 20,000,000 copies on Sunday out of total of 46,000,000. *Editor & Publisher* estimated 8,000,000 TV receivers in area covered by survey. In 1951 yearbook, *Editor & Publisher* estimates 53,829,072 newspapers sold daily in 1950, increase of 1,000,000 over year preceding. Number of newspapers decreased by 8 to total of 1772, magazine reports.

Comparing TV and film resolution, in January *Proceedings of the IRE*, 20th Century-Fox's H. J. Schlafly says TV's 360 lines of useful vertical resolution are equivalent to 12 lines per millimeter in 35mm sound motion picture film—whereas "in actual practice, film resolution having a limiting value of 30 to 40 lines per mm is not difficult to achieve." But he points out: "Some workers in the field believe that 'other factors affecting picture quality' [contrast ratio, etc.] . . . may eventually be so improved in the TV system that existing standards will permit a TV picture quality closely approximating that of the present-day 35mm motion picture film in spite of wide differences in the limiting value of picture resolution."

TV basketball league of own was formed by KFI-TV with aid of City of Los Angeles after UCLA and USC banded together to ask $80,000 for TV rights to home games of both schools. Teams in new league, to play 20-game schedule primarily for televiewers, have outstanding stars from professional, college and prep school ranks. KFI-TV sales manager Kevin Sweeney said cost of underwriting new basketball league will be peanuts compared to $80,000 asked by the college teams. Union Pacific Railroad, using one spot per game, is first to buy participations.

Competition from TV has hit—of all things—the bus companies, according to Morris Edwards, president of Cincinnati Street Railway Co., who says passenger traffic on city's buses last December was 6% below December 1949. "People work 5 days a week, but on weekends they stay home to watch TV, and most of the drop in passenger traffic occurred on weekends," he said.

David Sarnoff Gold Medal has been established by Society of Motion Picture & Television Engineers as annual award for outstanding contribution to TV engineering, counterpart of Society's Samuel L. Warner Memorial Award in movie and sound engineering.

"Impact of TV on motion picture industry," was given as reason for filing bankruptcy petition by owners of 2 Philadelphia theatres. Counsel told Federal Court Feb. 1 that TV had cut receipts so sharply that operating expenses could not be met.

New TV camera devices: Crane that lifts camera and cameraman up to 9-ft., 6-in., rotates 360 degrees, weighs only 2300 lbs., has been developed by NBC-TV engineer Sidney Sanner, formerly Warner Bros. special-effects man . . . Remote-controlled camera—turnable, tiltable, focusable, etc., from point miles away—has been announced by General Precision Labs, which seems to be coming up with a new TV device every few weeks. Camera has obvious use in dangerous industries such as atomic energy.

An electronic "prompter," brainchild of Fred Barton, member of *Mister Roberts* cast, has been developed at cost of some $50,000 to ease minds of TV actors fearful of forgetting lines. Script is typed in inch-high letters on big spool of paper which unwinds as actors speak.

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Mobilization Report
February 3, 1951

MATERIALS—TIGHTER SECOND QUARTER: If you think raw materials are short now, you ain't seen nothing yet!

That's nub of pronouncements, public and private, by officials and materials specialists of National Production Authority, the agency that distributes what's left of materials after military takes its share.

Take cobalt: This week NPA told users of this metal how much they'd get in February, first month of all-out allocation (Order M-10, see Vol. 6:52). Some users (toys, novelties, for example) got none. Civilian durable goods industries (including TV-radio) got slightly less than 35% of amount they've been using in recent months -- and a warning that they won't have it so good again for some time.

Magnet and speaker makers were pleasantly surprised by February allocation -- many had expected half of that. Gen. Wm. H. Harrison's Defense Production Administration, which cut cobalt pie, had to shave 15% from direct defense orders, 25% from defense-connected orders (machine tools to build military equipment, etc.) to give consumer durables a break this month.

But cobalt squeeze will get tighter with each passing month. Production of jet engines, armor-piercing ammunition, atomic energy projects -- all of which use cobalt in vast quantities -- will roll faster and faster from now on, requiring more and more of available cobalt supply.

That's fair warning -- and is important reason why industry is working so feverishly on conservation measures, such as small-magnet speakers and electrostatically-focused picture tubes (see story, p. 9).

Steel, copper, aluminum, too, will be scarcer next quarter, NPA told durable goods industry Jan. 29 (see Mobilization Notes). Order limiting use of steel in appliances and other consumer goods is already in hopper. And copper and aluminum restrictions will certainly be tightened by more than a few notches.

* * * *

One answer to apparent paradox of high set production, despite materials shortages, is "lead time." Taking cobalt as example, we find that, as of this week, average of 2-3 months elapses between day cobalt arrives at magnet fabricating plant and day TV set containing same cobalt comes off production line. (Another answer to paradox is fact that farsighted set and component makers initiated conservation programs as long ago as June and July.)

One full quarter elapses, in many cases, from raw material to finished set. As shortages continue, and grow worse, this lead time will decrease. But as of now, materials shortages resulting from stepped-up military program have scarcely been felt by TV-radio manufacturers, comparatively speaking.

Shortages creep up. First they're felt by materials fabricator, then by component maker, finally by end-product manufacturer.

Our check on cobalt shows that -- under present conditions -- average of 6-8 weeks elapse between arrival of cobalt at magnet foundry and its shipment to speaker maker in form of alnico magnet. Alnico stays at speaker plant average 2-3 weeks before speaker in which it's used is sent to set manufacturer. TV-radio makers are putting some speakers in sets within hours after they arrive; other speakers stay on shelf week or two.

A leading speaker maker says his first quarter production will add up to about 60-70% of fourth quarter 1950, thanks to use of smaller permanent magnets and some electromagnets.

Several TV manufacturers have asked NPA's Copper Div. for authority to buy extra copper to convert from permanent to electromagnetic speakers. Some speaker makers say they'll make electromagnetic speakers if customer will furnish copper.

Mobilization Notes: Brains of electronics and associated industries continued to lend themselves to important jobs in govt. production, control and procurement agencies. Among those who this week began work, or were reported ready to take over govt. posts:

J. A. Milling, RCA Service Co. v.p. in charge of home products servicing, loaned on dollar-a-year basis to NPA's Electronic Products Div.

Louis H. Neimann, Sylvania's sales engineering manager, reported contemplating leave of absence to accept uncompensated job in same division.

Eugene E. Smallwood, RCA consumer products div., granted leave to head up Office of Price Stabilization housewares branch, Consumer Durables Div. Branch will have a TV-radio section.

John A. Dennis, insurance engineer—component bottleneck-breaker and trouble-shooter in World War II War Production Board Radio-Radar Div.—started work with NPA Electronic Products Div., where presumably he will have similar job.

Nathan D. Golden, Commerce Dept. Motion Pictures Div. chief, has been named director of NPA's Film & Photographic Products Div.

* * * *

Senate Small Business Committee, in report on material shortages, warned that "serious shortage of subcontracting facilities" may result from fact that "NPA and the military procurement officers have not succeeded in developing a policy and mechanism which will help bridge the gulf between civilian production cutback and a fully-accelerated rate of defense buying." Committee called for "completely-controlled material allocation plan at the earliest possible moment," also urged: (1) fuller use of "public informational techniques" by all mobilization agencies; (2) augmentation of NPA staff for more expeditious handling of work; (3) "re-appraisal of military and stockpile requirements"; (4) attempt to coordinate military requirements with NPA restriction orders; (5) military procurement plan to channel contracts to industries hardest hit by material cutbacks; (6) splitting of large contracts into smaller units for maximum spreading to small plants.

Members of mobilization committee of Association of Electronic Parts & Equipment Mfrs. participating in Washington meeting (see p. 8): Arie Liberman, Talk-A-Phone Co., acting chairman; Herbert W. Clough, Belden Mfg.; Al Delighter, Standard Transformer; S. N. Shure, Shure Bros.; Abe Shanes, Talk-A-Phone; Kenneth C. Prince, legal counsel; S. I. Neiman, publicity counsel. Committee members from sales Managers Club: Sam Baraf, United Transformer; Samuel J. Spector, Insuline Corp.; Jerry Kirshbaum, Precision Apparatus; John Hauser, Sylvania.

Firms whose plants were shut down for more than 15 consecutive days during first half of 1950 will be allowed to omit the month or months during which shutdown occurred from base period computation for copper allotment, NPA ruled Feb. 2 in Direction 1 to M-12. Similar treatment was accorded aluminum users last November (Dir. 1 to M-7, see Vol. 6:48).

Curtiss-Wright Corp. has formed new Electronics Div., headquartering in Caldwell, N. J., headed by Joseph V. Miccio, ex-controller of its Airplane Div. Engineering chief is Dr. Richard C. Dehmel, who developed Curtiss-Wright's electronic flight simulators and trainers.

Brig. Gen. Eugene Y. Elder succeeded Brig. Gen. Alfred M. Shearer as Signal Corps procurement & distribution chief on Gen. Shearer's retirement Feb. 1. Gen. Elder was Gen. Shearer's assistant.

Vastly higher U. S. production of minerals that go into electronics equipment is goal of Defense Minerals Administration, which has power to encourage production of strategic minerals through loans, tax amortization, etc. As outlined in *Wall Street Journal*, these are some DMA aims: (1) Cobalt—increase U. S. production, now less than 500,000 lbs. a year, to 4,500,000 within 18 months (nearly 7,000,000 lbs. is imported annually from Africa). (2) Copper—DMA expects producers to spend $200,000,000 on expansion in next 2-3 years. (3) Mica—DMA hopes to encourage domestic production (most of it now comes from India) by guaranteeing high "price floor." (4) Tungsten —goal is to increase current U. S. production of 4,000,000 tons a year, threefold in 2 years. Most of U. S. supply used to come from China. (5) Nickel—U. S. may reopen mine in Cuba, is investigating low-grade Oregon deposits. Most comes now from Canada.

Among unclassified military contracts for electronics and related equipment (more than $100,000) announced by Commerce Dept. for week ending Jan. 30: Through Air Materiel Command, Dayton—Gilfillan Bros., $4,529,818, indicator equipment; Super Electric Co., Jersey City, $161,-379, antenna coils. Through Navy Bureau of Aeronautics, Washington—Motorola, $493,806, radar beacons; Telephonics Corp., Huntington, L I., $129,210, radar sets (500 units). Through Navy Bureau of Ships, Washington—Waterman Products Co., Philadelphia, $432,524, oscilloscopes (600); Measurements Corp., Boonton, N. J., $412,-688, signal generators (750). In addition, GE Feb. 1 announced $1,300,000 Signal Corps contract for microwave communications equipment.

All types of components have been classified into 11 major categories by RTMA, and submitted to Munitions Board. Categories, to be used as standards by military services in drawing up electronics requirements: Transducers, Transducer Accessories, Antennas, Circuit Interrupters, Resistors, Capacitors, Transformers, Housings, Piezoelectric Frequency Control Devices, Plugs & Connectors, Hardware. Similar breakdowns are due soon to cover Electronic End Equipment, Electron Tubes & Devices, Electronic Test Equipment. Work was done by task force headed by A. D. Plamondon, Indiana Steel Products.

Scarce material supply will be tighter in second quarter, NPA officials told 27 representatives of durable goods industries Jan. 29. Specifically mentioned were steel, copper, aluminum. Among those attending conference were: Crosley sales v.p. Wm. A. Blees, with Avco's B. M. Smarr and F. J. Hughes, GE's L. H. Miller and Westinghouse Appliance's J. H. Ashbaugh. Also at meeting was IUE-CIO president James B. Carey.

Another big expansion into electronics field by an aircraft firm (Vol. 7:4): Howard Hughes has leased or optioned 50 square miles near Tucson, Ariz., reportedly for guided missiles plant to cost between $6,000,000 and $9,000,000, to employ 1400-1800 workers with annual payroll possibly reaching $35,000,000.

British use projections far more than we, to get big images, and *Wireless World's* "Diallist" suggests why in November issue: "America, with an output that runs into quasi-astronomical figures, can turn out CR tubes a good deal more cheaply than we can. We, on the other hand, seem to have advanced rather further in the technique of making reasonably long-lived, small, super-brilliant projection-type tubes." He said he knows of no British-made set with tube over 15-in. He also has good word for "spot wobble" technique of removing lines from picture (Vol. 6:32). "One might expect this to lead to a rather poorly-defined image," he says, "but I cannot honestly say that it had this effect."

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
February 3, 1951

REPLACEMENT PARTS PRIORITIES URGED: Growing gaps on replacement parts shelves led to action this week by alarmed components makers.

To assure that TVs, radios and other electronic equipment are kept in operating condition, NPA will be urged to pin priority ratings on orders for critical materials used in maintenance, repair and operating supplies. Two manufacturers' groups agreed at Washington meeting Jan. 30 to make this request.

Mobilization committees of Association of Electronic Parts & Equipment Manufacturers (Chicago) and Sales Managers Club, Eastern Group (New York), framed priority plan to be presented to National Production Authority in form of resolution next week (for list of committee members, see p. 7).

Maintenance, repair and operating supplies made from priority materials would be sold to distributors who certify parts will be used for replacement only. Proposals are similar to those made by task group from NPA's Radio, TV & Household Appliance Wholesale Advisory Committee (Vol. 7:2).

There's little doubt that NPA will issue an order to help assure supply of repair parts -- but may wait until after July when Controlled Materials Plan (CMP) is expected to be put into operation (Vol. 7:3) for action on retail level. World War II CMP gave limited priority to maintenance, repair and operating supplies.

MATERIALS & RAIL STRIKE CLOUD TRADE: Outlook for TV-radio trade grew more uncertain this week as rail stoppage forced some major factory shutdowns (see p. 1) and NPA indicated raw materials shortages are bound to grow worse (see p. 6).

Everybody expected rail service would resume soon -- but, so far as raw materials are concerned, dim ray of hope came in statement attributed to one of highest govt. officials dealing with defense production. Referring to electronics industry's ability to substitute, he said:

"Those fellows are the most ingenious workers of magic in the world. I won't be surprised if they can maintain a fairly high civilian production with the substitutes they've already told us about. There's no doubt they'll have to substitute certain metals, or there won't be any television or radio sets to speak of."

Not only Philco (Vol. 6:47, 7:2-4) but most other concerns, who prefer to keep details to themselves for the present, have substitution programs on tap -- though general attitude was expressed by one thus: "We'd rather turn out good sets and less of them if we have to. Whatever else we do, we must maintain quality."

* * * *

It's manifestly impossible to reckon, with any degree of certitude, what's in store rest of year -- though first quarter was going good until strike came. For example, third week January's output estimate jumped to 188,758 TVs, 342,586 radios, from second week's 167,859 TVs, 338,520 radios (Vol. 7:4) and first week's 105,699 TVs, 209,792 radios (Vol. 7:3) -- giving industry flying start on first quarter.

There's still hope first quarter will continue good, but second quarter is imponderable. Some manufacturers are optimistic, some pessimistic -- attitudes depending on what each thinks will be available in way of materials and components and how confident they are of conservation-substitution programs.

Oddly, Midwest manufacturers we contacted seemed to think materials would continue in good supply, Eastern manufacturers were less hopeful. For example, Hallicrafters' Wm. Halligan felt so confident he predicted possible 5,000,000 TV sets this year if international situation doesn't turn worse. That's double most pessimistic guess, 1,000,000 more than our own recent guesstimate (Vol. 7:4).

Eastern set makers feared that even substitution programs would suffer from lack of right materials, worried about major changes in circuitry required. One

major told us he was preparing to pare another 200 sets per day from his schedule, having already cut 300 per day from 1950 final quarter peak level. Another expressed fear of 50% cut in second quarter. All agreed their fate depends mostly on NPA.

Some manufacturers seemed concerned lest sales be even more limiting factor than materials, but continued high purchasing power tends to mitigate this fear. Yet it's no secret many distributors and retailers are heavily stocked, and that consumers haven't exactly been storming their doors in recent weeks.

One retailer is quoted in Retailing Daily as saying a lot of this year's sales were "borrowed" from last year. Another is quoted: "Why should a customer rush out to buy if he knows the prices are not going up?"

President Truman's tax recommendations mean higher income taxes, which could affect sales -- certainly in March! -- and there's still talk of stiffer credit regulations. Proposed tax program also embraces higher excise taxes, which would inevitably be passed on to customer, regardless of price controls.

As for conservation and substitution, they're saying little about it, don't like references to "austerity models" because it implies degraded quality. But fact is that already going into new sets are such items as: (1) Smaller magnets for loudspeakers. (2) Nickel-plated steel for receiving tube plates. (3) Polished steel instead of bronze trim.

On horizon are electrostatic tubes, electromagnetic speakers, metalized cardboard for shielding, selenium voltage doublers in place of transformers.

MID-WINTER PICTURE TUBE LINEUP: Main trend in picture tubes is now unquestionably, albeit reluctantly, to electrostatic types. As tube-makers put it, they save vital metals (cobalt, copper, etc.), they work -- and that's that. But they generally mean a lot of set-design changes, although some makers say they have some exclusive tricks up their sleeves.

Among latest promising such tubes "soon" or "in a few weeks" are DuMont, Sylvania and Raytheon -- these in addition to previously reported RCA, Lansdale, National Union (Vol. 7:1,3-4). RCA says customers who've sampled its electrostatics are happy about them.

In size trends, 17 & 20-in. rectangulars are "it," as expected (Vol. 7:1). Smaller sizes and rounds continue to peter out. Corning is sole producer of 20-in. blanks, has customers on allocation. American Structural Products (Kimble) expects to have 20s in April. Surprisingly, some shrinkage of 20-in. demand is reported by one big tube-maker, but he seems to be exception. He attributes falling-off to high price of big sets, credit restrictions.

Plans for the bigger tubes (21-in. and up) are conflicting -- with GE's 24-in. and DuMont's 30-in. still mere trickle.

RCA still has 21-in. metal-shell tube in works, but doesn't venture when it will emerge -- in fact, there was conference on it in Camden at week's end. Metal supplier Spincraft indicates 21-in. shells won't be out for couple months. DuMont says "late in year" for 21-in. metal, isn't making 17-in. metal yet. Sylvania's 21-in. plans are up in air. Corning and American Structural report 21-in. "under consideration," but won't make them unless there's more demand.

Apparently fearing some steel shortage, several tube-makers seem a bit cool towards metal-shell types. This attitude is completely unwarranted, according to Spincraft's T. J. Salow Jr. He's emphatic in reiterating (Vol. 6:41) that chrome alloy type of steel is plentiful, as it was even during World War II, and asserts it will continue to be so long after shortages of other metals curtail set production. "Steel makers are crying for this kind of business," he reports.

Some foreign business is also reported by Mr. Salow. He has sold 16 & 19-in. cones to Dutch and French manufacturers, says volume isn't great, but has been quite valuable as outlet for rounds during U.S. shift to rectangulars.

Glass blowers are ready, they say, to handle all picture tube demands in event metal does become short.

* * * *

Tube life of 3000 hours can usually be expected, writes chief engineer Art

Green of Fidelity Tube Corp. in January Radio & Television Journal. His findings point up industry's consistent caution in promising long tube life. In first post-war sets, 1000 hours was thought to be good rule-of-thumb. After couple years, 2000 hours became common figure. Now, says Mr. Green:

"Darkening of the screen is so gradual that the user cannot detect the change during 2000 or 3000 or even 5000 hours of operation. The service man is in a position at this time to show his customer, by direct comparison with a new tube, how he, the customer, can add to his viewing pleasure by simply installing a new picture tube."

* * * *

Picture tube sales up 124%, receiving tubes up 93% in 1950 over 1949 -- that's gist of RTMA reports this week.

Sales of picture tubes to set makers totaled 7,473,614 units valued at $198,737,428, compared to 3,305,673 valued at $92,402,520 in 1949. Trend to larger screens was indicated by fact 72% were 16-in. and larger, whereas only 16% were 14-in. and larger in 1949. December sales were 686,815 -- 95% being 16-in. and larger.

Receiving tube sales totaled 383,960,599 in 1950 vs. 198,753,295 in 1949. Sold for new sets were 301,483,350, for replacements 69,324,540, export 10,767,831, govt. 1,384,878. December sales were 38,326,641 vs. 23,807,281 in December 1949.

Topics & Trends of TV Trade: There won't be anything specific on TV-radio price controls for some time. That's only thing certain this second week of OPS price "freeze" (Vol. 7:4). Sometime next week, first major revision of blanket controls is expected. It will set up "margin-type" controls, according to all reports. In essence, that means higher costs or wages can be passed on to consumer.

There's some question whether manufacturer-distributor-retailer will be able to realize more dollars and cents from higher costs. Decision will make that clear. OPS will stress continuance by industry of same proportion of low-end and medium-priced items in lines.

Only call for exemption of TV-radio from price controls came this week from Emerson president Ben Abrams. He pointed to special treatment accorded TV-radio industry in excess profits tax (Vol. 6:43-51), even in voluntary price regulations (Vol. 6:51-52).

Exempted from price freeze this week were special military equipment, including communications items.

* * * *

Hoffman Radio reported high bidder (at $401,000) for assets of defunct Aireon Corp., Kansas City, being auctioned by RFC. Firm did war contract work, then made radio speakers and coin-operated phonographs. Plant was sold last December, and bid covers "right, title and interest of the RFC in the lease, leasehold improvements, office equipment, names, dies, patents, good will, trade names, trucks, merchandise inventory and electronic and engineering instruments." Bids must be reviewed by RFC.

Radio excise tax collections for all 1950 totaled $52,594,623, compared with $40,638,870 for 1949. December collections on radios, phonos, etc., which included TV fully for first time, were $5,483,963, compared with November's $5,359,960, October's $5,892,095, Dec. 1949's $4,499,451.

Philadelphia retailers sold 364,233 TV sets in 1950 with retail value of $104,942,761. This compares with 220,366 sets and $73,274,529 value in 1949. Average price of 1950 set, according to Philadelphia Electrical Assn. report, was $288 compared to $322 in 1949.

Handbook for retailers of TVs, radios, FM, records, appliances has been issued under title of *Guide to Greater Profits* by dealer trade journal *Radio & Television Retailing* (Caldwell-Clements Inc., 480 Lexington Ave., N. Y.).

TV set advertising, which may eventually top automotive (as radio did several years of its heyday), was major factor in newspaper advertising during 1950, according to Advertising Checking Bureau. From records on TV and radio set copy in 49 cities with telecasting facilities, bureau found (1) that TV set lineage exceeded that for radio sets by 9 to 1; (2) that 16.7%, or about one-sixth, of year's TV set ads and 23% of radio set ads appeared during Xmas season, Nov. 26-Dec. 30; (3) that 3 leading TV brands accounted for more than one-third total space used—12%, 11.9%, 11.3%, respectively; (4) that next 14 brands divided 43.1% of total, remainder being miscellaneous makes.

Advertising notes: Emerson ad will be printed on back of 125,000,000 Western Union envelopes in year's contract said to be first of kind . . . Philco spent $28,000,000 on adv.-sales promotion in 1950, plans to continue at same rate first quarter 1951 though year's total will probably be less, will continue indefinitely *Philco Playhouse* on NBC-TV, *Don McNeill Club* on ABC-TV, *Breakfast Club* on ABC—all thru Hutchins Adv., Philadelphia . . . Hallicrafters going in heavily for outdoor display, pushing TV via posters, bulletins, traveling displays, car cards, thru Sorenson & Co., Chicago . . . Tele-tone's new agency is Dowd, Redfield & Johnstone Inc., New York . . . DuMont placing tape-recorded series of radio commentaries by Quentin Reynolds for local distributor-dealer sponsorship.

Admiral is paying $145,000 for TV and radio broadcasting rights to 3 major *Chicago Tribune* charities sporting events this year—$22,500 each for Chicago and international finals of golden gloves boxing, March 9 & 29, and $100,000 for College All Stars-Pro League Champions grid game Aug. 27. Ad mgr. Seymour Mintz says networks haven't been arranged yet, but it's likely TV will be via DuMont, radio via Mutual.

* * * *

December sales of larger TV-radio stores in 45 large cities soared 52% over November, but were 2% below December 1949, Commerce Dept. reports. Sales in same stores were 24% higher in 1950 than in 1949. Sales of TV-radio-appliance dealers were up 32% from November to December and their December sales were 3% higher than December 1949, with sales for all of 1950 reported 27% greater than 1949. Of the 45 cities surveyed, all but 2 are in TV areas.

New national servicemen's organization was formed in Washington Jan. 28 at meeting of delegates from New York, Pennsylvania, New Jersey, District of Columbia (Vol. 7:3). Name chosen is National Electronic & Service Dealers Assn., with Max Liebowitz, Associated Radio-TV Servicemen of New York, president; Norman Selinger, TV Associates of Washington, v.p.; Roger Haines, Allied TV Technicians of South Jersey, recording secy.; Richard Devaney, Philadelphia Radio Servicemen's Assn., corresponding secy.; Vance Beachley, Midstate Radio Servicemen's Assn., Harrisburg, treas. Next meeting is March 4 in Philadelphia.

Trade Miscellany: American Structural Products Co., like Corning Glass (Vol. 6:43), is preparing cylindrical face for glare reduction, but isn't yet satisfied technique is proven . . . DuMont has cut cost to manufacturers of 17-in. CR tube from $28.50 to $26; some smaller makers are reported down to $23.50 . . . Philco, for its Accessories Div., has leased 4-story building (30,000 sq. ft.) at 1208 N. Delaware Ave., Philadelphia.

Almost half the 27,680 TVs sold in Canada up to end of October are in Windsor (Detroit) area, reports Canadian RMA. About one-third are in Toronto-Hamilton area. October sales of 4267 sets had value of $1,798,621, including taxes. AM-FM receivers continue to sell well in Canada—Ottawa Bureau of Statistics reporting 516,983 sets sold at cost of $43,471,577 first 9 months of 1950.

Ottawa reports have it that Canadian Govt. may call off Parliament-approved loan of $4,500,000 to enable CBC to build telecasting stations in Montreal and Toronto, thus freezing TV prospects in the Dominion for the duration. Reports are based on stepped-up requirements of armed forces for electronics equipment. Official announcement is expected soon.

Aerovox has borrowed $3,000,000 from Prudential Insurance Co. on 4¼% note running to Jan. 1, 1966, and calling for annual repayments of $200,000 starting Jan. 1, 1952. Of the borrowing, $1,769,999 was applied to retirement of outstanding notes held by Prudential.

RCA Victor Ltd., Montreal, and Warner Alemite Corp. of Canada, Belleville, Ont., have been authorized by Canadian Broadcasting Corp. to operate low-power experimental TV stations—former on Channel 5, latter Channel 10.

International GE reports its 10-day closed-circuit demonstration of TV in Helsinki dept. store, viewed by more than 10,000, made such hit that Finnish interests hope to have TV in time for 1952 Olympic Games there.

Avco (Crosley) has sued Admiral in Chicago Federal district court charging latter's promotion of "Servador" infringes on Crosley's "Shelvador" refrigerator trademark.

Trade Personals: Earl W. Muntz, ex-executive v.p., elected president of Muntz TV Inc., Thomas E. Courtney becoming board chairman . . . Wm. D. Stroben, ex-Thor Corp., appointed adv. mgr., TV & radio div., Sylvania . . . John T. Burdick, ex-mgr. of central lighting sales div., Chicago, named director of all Sylvania Midwest sales, including TV-radio div. . . . Samuel Olchak, Air King adv. mgr., one-time with Tele-tone, promoted to asst. sales mgr. . . . John B. Taggart, ex-RCA Camden, appointed managing field engineer for Work-Factory Co., management consultants . . . Ivar G. Blackberg promoted to chief purchasing agent, Stewart-Warner Electric, TV-radio div., now in process of moving from main Chicago plant to new plant at 1300 No. Kostner Ave. . . . Arthur A. Currie named field sales mgr., Sylvania TV-radio div. . . . Allan Easton, ex-Tele-tone, appointed chief of microwave section, Radio Receptor Co.

Financial & Trade Notes: Sparks-Withington, for 6 months ended Dec. 31, or first half of its fiscal year, reports sales of $14,015,516, profit after all charges of $515,991 or 56¢ per share after preferred divided requirements. It declared dividend of 20¢ a share payable Feb. 22 to holders Feb. 7, first since recent proxy fight which resulted in changes in board and management (Vol. 6:44). Dividend is double last one paid Oct. 5, 1950. Sales for same 1949 period were $8,599,589, net profit $183,183 (19¢).

Muntz TV Inc. reports profits of $533,953 after all charges for 9 months ended Dec. 31, equal to 33¢ per share on 1,013,994 shares of common stock outstanding. Sales for period totaled $18,643,507. No comparable figures are available since company was organized as Delaware corporation in May 1950. Dividend of 15¢ has been declared, payable Feb. 28 to holders of Feb. 15. Company reports it's producing 12,500 TVs per month, average $3,000,000 gross sales monthly, with enough supplies to continue through April.

Bendix Aviation reports 1950 sales of $219,419,794, net profit of $16,954,116 ($8 per common share) vs. $182,674,462 sales and $11,086,781 ($5.23) in 1949. Aircraft equipment amounted to 49% of total volume, automotive products 30%, which means that undisclosed TV-radio volume must fall somewhere within remaining 21%. Backlog of unfilled orders was reported at $336,000,000, compared with $165,000,000 in 1949. Net working capital as of last Sept. 30 was $83,690,011 vs. $73,328,670 year earlier.

Kaye-Halbert has registered with SEC new issue of 120,000 Class A $1 par common to sell for $5, proceeds to be used for expanding production and sales. Company showed net earnings of $99,500 for fiscal year ended Sept. 30, 1950, or about 75¢ per share, and v.p. David Kaye states earnings for last 1950 quarter will compare favorably with whole of previous fiscal year.

Dividends: Avco, 15¢ payable March 20 to holders Feb. 23; P. R. Mallory & Co., 30¢ payable March 10 to holders of Feb. 21; Standard Coil Products Co., 25¢ payable Feb. 15 to holders of Feb. 5; Westinghouse, 50¢ payable March 5 to holders Feb. 13; Blaw-Knox, 25¢ payable March 13 to holders Feb. 15.

Olympic Radio's 1950 profit is indicated at around $1,250,000, or about $3.70 per share of 338,263 common shares outstanding, total sales having been about $21,500,000. This compares with 1949 net earnings of $578,163 ($1.70) on sales of $9,699,672.

General Instrument Corp., for 9 months ended Nov. 30, reports $18,509,489 sales, $769,247 net profit after all taxes ($1.58 per share), as against $9,017,196 sales, $62,652 loss for same 1949 period. Quarter ended Nov. 30 resulted in $282,080 profit (58¢) vs. $201,779 (41¢) same period 1949.

Packard-Bell first fiscal quarter earnings (Oct. 1 to Dec. 31) were reported to stockholders as $736,381 net after taxes, or $1.25 per share on 588,000 shares outstanding, compared with $221,318 for comparable 1949 period. Sales for quarter were $7,355,807, compared to $2,921,380.

Trav-Ler reports its 1950 earnings will be about $1.50 per share, not allowing for excess profits tax, compared with 53¢ in 1949.

Muter Co. reports net income of $931,299 for 10 months ended Oct. 31, 1950, equal to $1.57 per share on 592,000 shares outstanding.

New York Stock Exchange reports John B. Huarisa, executive v.p. of Admiral, has reduced his direct holdings to 89,442 shares because of gift of 6000 during December.

Sprague Electric Co. sales and earnings for 1950 are estimated at nearly double 1949 totals of $15,300,000, or $2.48 per share, in analysis by Joseph Mayr & Co., N. Y.

Telecasting Notes: TV covers markets with effective buying income of $130,898,000,000, according to NBC market data presentation issued this week in conjunction with its Jan. 1 census of TV sets (Vol. 7:3). Based on 1950 *Sales Management* buying guide, study shows TV covers: (a) 26,482,000 families, or 61.8% of U. S. total of 42,844,000. (b) 90,548,000 persons, or 60.7% of total population. (c) $84,942,000,000 retail sales, or 66.3% of U. S. total. (d) $20,455,000 food sales, or 67.7% of total. (e) $2,413,000,000 drug sales, or 66.4% . . . "Must" reading for your commercial and program depts.: Special section of Jan. 29 *Sponsor Magazine*, devoted to daytime TV, covering basic facts and figures, soap operas, daytime spot and network programming, 14 capsuled result stories . . . Lucky Strike reported cancelling all radio spots (about $1,000,000 worth) due to heavy budgeting for TV, now some $6,000,000 annually . . . Chicago White Sox and Cubs have both agreed to telecasts of 1951 games, with WGN-TV getting 58 daytime home games of former, WGN-TV & WBKB splitting Cubs schedule; sponsors will be announced soon . . . New York's WPIX signs for all Giants' home games, to be sponsored by Chesterfield . . . Detroit's WJBK-TV is latest to report educational tieup (Vol. 7:2), on Feb. 4 starts seminar called *University of Detroit Round Table* . . . Show that started 10:30 p.m. Saturday, signed off 6 a.m. Sunday, Jan. 27, got lots of DX reaction for KPRC-TV, Houston, resulted in $20,155 collected for March of Dimes . . . Purchase of several Hollywood theaters reported under consideration for expanding NBC-TV—would permit more kine-recording, too . . . Indianapolis' WFBM-TV moves into new Radio-TV Centre Bldg. about March 10, housing 40x60 ft. and 30x40 ft. studios 2 stories high . . . WHBF-TV, Rock Island, Feb. 15 raises one-min. announcement rate from $35 to $50 . . . Local high school and other *Bands in the Making* provide good Sun. 2:30 p.m. program by that title on KFI-TV, Los Angeles . . . Blair TV Inc. has opened Jacksonville office, managed by Harry E. Cummings, and has named v.p. Lindsey Spight to head San Francisco operations, now entirely separated from radio.

Long-germinating FM "inquiry" by FCC, covering special uses of stations for Muzak-like programs, transitcasting, etc., broke into open this week when Commission sent letters to several stations, asking them to tell why "functional music" operations are legal and/or in public interest—leaving strong implication FCC doesn't think they are. Stations queried: WLRD, Miami Beach; WFMF, Chicago; KDFC, San Francisco; WACE-FM, Chicopee, Mass. Similar action is expected soon in transitcasting, storecasting.

Analysis of uhf receiver performance, by FCC lab chief E. W. Chapin, was last subject in general-issues phase of FCC allocations hearing ended Jan. 31. Study was based on 5 experimental units sent FCC by manufacturers. His conclusions: "Considerable progress has been made . . . particularly in the direction of adcquate sensitivity. However, at this time it is most apparent that there is considerable difficulty with oscillator radiations and spurious responses."

Total of 41,902,700 radio families in U. S., or 95% of grand total of 44,108,100 families, is estimated by NAB—based on *Sales Management* figures. This is 1,201,000 more than Jan. 1, 1950. Total TV sets-in-use, as of Jan. 1, 1951, estimated by NBC Research, was 10,549,500 in 63 TV areas embracing 26,482,100 families (for area breakdowns, see Vol. 7:3).

Sylvania pleaded "nolo contendere" in Federal district court, Harrisburg, Jan. 30, and was fined $2500 for operating TV station in Emporium, Pa., without FCC permission (Vol. 6:42-43).

End of educational TV hearing this week found CBS president Frank Stanton insisting, under cross-examination, that educators make their justification for channels on a community-by-community basis. Flatly opposed to blanket nation-wide reservation for schools, Stanton thought FCC might want to hold a channel in a specific city while educational applicant took year or so to acquire funds, but that's as far as he'd go towards reservation. Meanwhile, Sen. John Bricker (R-O.) introduced resolution Feb. 1 (S. J. Res. 28) directing FCC to "make a full and complete study" of subject and to "give consideration to the allocation of at least one frequency within each State or suitable geographic region" for educational TV. And Rep. James Dolliver (R-Iowa) introduced H. J. Res. 148 for same purpose. Comr. Hennock plugged away for reserved channels in Feb. 1 speech before Women's National Democratic Club in Washington, while educators' counsel Telford Taylor argued for support of educational stations with tax money and private endowment in Jan. 28 *New York Times Magazine* article. On other side, *Times*' Jack Gould took educators to task for "loading" their analysis of commercial programs (Vol. 7:4).

Appeal from FCC's color decision, filed by RCA and intervenors last week (Vol. 7:4), will be answered by FCC Feb. 5 when it files motion asking Supreme Court to affirm lower court's decision in its favor (Vol. 6:51). Appellants then have 20 days in which to respond to Commission's latest motion. Since Supreme Court is in recess until Feb. 26, its action (either granting RCA, et al, oral argument or agreeing with FCC) isn't expected until March 5 at earliest. If oral argument is granted, date for hearing will be determined by condition of Court's calendar. If Commission wins, lower court's restraining order (forbidding commercial operation of CBS system until April 1) is voided immediately.

Color demonstrations: CBS and Remington-Rand collaborated in effort to "sell" system to military during showings this week in Washington's Carlton Hotel. Atlanta, Ga., public saw CBS color in Municipal Auditorium showings this week, preliminary to surgical demonstrations sponsored by Smith, Kline & French for Atlanta Graduate Medical Assembly over weekend. WSB-TV, Rich's Dept. Store and Board of Education assisted in public showings.

Revocation of 3-year-old experimental TV station KG2XBI, Lancaster, Pa., was ordered by FCC this week on grounds operation by group of RCA tube plant engineers, known as Conestoga Television Assn., didn't comply with rules. Station, put into operation in 1948, picked up Philadelphia TV programs, rebroadcast them via uhf.

Fourth week of Phonevision tests in Chicago saw 505 orders for 21 screenings from the 300 "test homes," according to Zenith analysis reported in Jan. 31 *Variety*. This compares with 561 orders third week, 569 orders second week (Vol. 7:4). Saturday & Sundays still remain top "boxoffice" days—with 195 fourth week, 206 third week.

New and Better TV Map

New Television Map of the United States, revised to Jan. 15, 1951, and considerably improved, has been published by *Television Digest*, and one copy was inserted with our Jan. 15 *TV Factbook No. 12*. It makes an excellent wall-map, or can be used as a working outline. It's 22x26 in., in color, shows locations of and lists all operating TV stations with present and projected network routes. Because of demand for extra copies, we have had more published and they're available at $1 each. Quantity prices on request.

WHAT 25% EXCISE TAX WILL MEAN TO TV: Immediate spurt in set sales, upsurge in TV audience telescoped into early months of 1951 -- then a "feast to famine" letdown.

That seems to be industry's prospect, as result of Treasury Dept.'s Feb. 5 proposal to hike manufacturers' excise tax from present 10% up to 25%, not only on TVs and radios but on phonographs, records, refrigerators, other appliances.

Inventories are available for heavy buying wave (see Trade Report, p. 8), but nobody is happy about this roller-coaster way of doing business. But, then, a sales slowdown is foreseen anyhow later in the year when war orders are expected to circumscribe all civilian production.

Treasury's plan has already started rush to buy, as same news did for several months before 10% excise went into effect last Nov. 1. Everybody agrees that after tax becomes effective, probably in mid-summer, sales will drop -- but hard.

Administration's tax program would also impose 20% excise on autos, $12 per gallon on liquor, 10¢ per pack on cigarettes, 3¢ per gallon on gasoline; would jump corporation rates from 47% to 55%; would lift current 62% ceiling on combined corporation and excess profits tax up to 70%; would levy higher personal income taxes.

It's not a fait accompli, of course, and some opposition may arise -- but President Truman has evinced his determination to raise the needed revenues by every possible means -- and the Treasury estimates foregoing categories alone will bring in about $10 billion ($3 billion from the new excises).

Building up among business men, and some Congressmen, is sentiment for general sales tax, supported by NAM. Latest in favor is National Assn. of Music Merchants, which resolved at board meeting in Washington this week to recommend "national retail sales tax" instead of higher excises -- on grounds sales tax is one public knows about whereas an excise tax is "hidden". NAMM embraces many retailers heavily in TV-radio business.

Another proposal, submitted to House Ways & Means Committee Feb. 9, asks for 5% manufacturer's excise on all products except foods -- made by Thomas N. Tarleau, Commerce & Industry Assn. of New York. Committee resumes tax hearings Feb. 14, hears more govt. and industry spokesmen.

* * * *

Impact of such a heavy excise tax would be serious, indeed. Whereas recent 10% factory excise meant about 6% price increase at retail, proposed 25% levy would mean at least 15% at retail. Thus a $300 TV, on which tax of about $18 is now paid, would cost customer $45 or more.

Retailers have various ways of hiding this tax, either absorbing it in list or combining it with installation-warranty -- but any way they do it, the customer must pay, and this is only one facet of recent wave of price increases.

Most affected industries reacted sharply to the news, TV-radio arguing:

(1) Tax becomes self-defeating, if object is revenue, since higher costs discourage buying, thus lessen income to Govt.

Copyright 1951 by Radio News Bureau

FEB 1 2 1951

(2) Tax raise is discriminatory, since no changes are recommended in levy on movie admissions, jewelry, cosmetics, furs, other luxury items. It also falls hardest on people with low incomes, to whom TV means most for home entertainment.

(3) Electronics industry must be kept free of sales obstacles, so as to keep its "army of workers" mobilized for defense jobs ahead.

Treasury's main contention is that it's best to hit consumer durable industries because they're big users of "materials that will be in short supply." It counters discrimination plea by noting other taxes are on retail prices, go as high as 17-20%. Since purpose is also to combat inflation, Treasury feels impact on low-income group is all to the good.

One govt. fiscal expert said that higher prices for other goods and their reduced output, notably of autos, might free more money for TV purchases.

'ROUGH DRAFT' OF NETWORK EXTENSIONS: AT&T's thinking about TV network expansion beyond this year is indicated in Winter 1950-51 issue of Bell Telephone Magazine by engineers Richard D. Campbell and Earl Schooley. Contemplated links, all microwave, are merely "under consideration," aren't final, aren't set for any specific date.

For this year's expansion schedule, see map with TV Factbook No. 12; it's all definite, except Rochester-Syracuse circuit which has been postponed to 1952.

Routes into "virgin" Southwest, other non-connected areas, are most interesting facets of contemplated extensions outlined in article:

Kansas City-Wichita-Oklahoma City-Ft. Worth-Dallas-Austin-San Antonio, with spur to Tulsa; Seattle-Portland; Yakima-Walla Walla-Spokane.

Additional links contemplated for interconnected cities, present circuits in parentheses: Richmond-Charlotte (2 southbound coaxial); Charlotte-Atlanta (2 southbound -- 1 coaxial, 1 microwave); Cleveland-Erie (2 eastbound coaxial); Erie-Buffalo (1 eastbound coaxial), Pittsburgh-Columbus (none direct); Dayton-Huntington-Charleston (Cincinnati-Huntington now has private microwave); Chicago-St. Louis (2 coaxial -- 1 each direction); Los Angeles-San Diego (1 off-air).

TELECASTERS COMING OUT OF THE RED: Quote from a successful TV station operator:

"Any telecaster who isn't operating in the black by now had better get the hell out of the business."

Our own list of profit-makers grows steadily (see Index to 1950 Newsletters, also Vol. 7:4) -- and it's no secret that time is at premium now on most stations, while rates continue to go up.

Best guess is that only the 4 networks, a few if any of their owned-and-managed stations (NBC 5, ABC 5, DuMont 3, CBS 2½), not more than a dozen of the 107 TV stations in the United States are still in the operating red.

Many must yet amortize past losses, and some aren't able to write off heavy depreciations yet -- but they're on the way. For example, Billboard reports that Crosley's 3 Ohio stations are now definitely in the operating black, after 27 months of losses totaling $1,314,000 on plant investments aggregating $3,500,000.

Several stations besides the network keys, or such exceptional operations as DuMont's WDTV in Pittsburgh, have gone well over gross of $1,000,000 during 1950.

And this week we learned of one station, less than 2 years old in city of less than 300,000 population, which last year achieved $1,000,000 gross, as against sister AM's $900,000 -- net unrevealed, but it's fair to assume it was substantial.

* * * *

Income outlook for TV-AM-FM stations may be good for 1951 -- but labor situation is going to be tough. That's view of NAB employer-employe relations director Richard Doherty, expressed Feb. 9 in speech before Georgia broadcasters.

Besides military draft, stations will suffer from wage freeze, expected manpower controls -- freeze encouraging employes to jump to higher-paying stations and to critical defense jobs, manpower controls nudging them toward "essential" industries. Doherty urged broadcasting-telecasting be continued on government's "essential" list, suggested stations fill vacancies "from within" if possible, develop new employe sources, call on FCC for relaxation of rules for engineers if necessary.

RCA SHARES CONSERVATION KNOW-HOW: Big RCA, which licenses practically entire TV-radio industry through its patent pool, this week sent a significant document to all set and tube manufacturers.

Entitled "Conservation of Critical Materials," it summarizes results to date of RCA engineers' intensive crusade to save scarce items and offers the fruit of 8 months research to all other manufacturers.

Riddle of January's heavy output of TV-radios (see p. 8) is at least partially solved by covering letter from RCA president Frank M. Folsom, which says, in part: "Without these important savings of restricted materials already achieved, our industry could not have attained the relatively high production of TV and radio receivers during the month of January."

No reduction in performance and quality of receivers has been forced by conservation measures, RCA assures. Rather than reduce number of components, RCA chose to redesign the components "to take full advantage of any new non-critical materials not previously used." Receiver itself has been redesigned to use "minimum amount of critical material."

* * * *

Giving credit to "many manufacturers of sets and components" for making "major contributions" to conservation of scarce materials, Folsom's letter urges others to "join us in earnestly pursuing this conservation program, not only for the resulting substantial savings in vital metals, but also to demonstrate to our govt. officials the industry's resourcefulness in this time of emergency.

"Only by doing everything possible to help itself can the industry feel morally justified in asking the help of govt. agencies in supplying sufficient critical materials to permit continued production of peacetime products, which in turn enable us to hold together our technical skills and our trained workers until they are needed to produce electronic equipment for the military services." Letter concludes with offer to answer any manufacturer's questions on conservation steps.

Meanwhile, Philco prepared to demonstrate its "conservation" TV set -- which also saves large amounts of scarce materials -- to NPA and other govt. brass in Washington next week (Vol. 7:2-4).

* * * *

Electrostatic picture tubes and redesigned speakers are two of the major developments, but by no means the only ones. Together, the two will reduce cobalt content in average TV set by almost 90%, RCA says -- a saving of more than 300,000 pounds of alnico per 1,000,000 receivers.

Redesigned speaker (Vol. 6:52, 7:2) is already in use by RCA, and electrostatically-focused picture tube (Vol. 7:1,3-5) will be used by RCA beginning in second quarter of this year in 17-in. rectangular sets. "By the end of the second quarter of 1951 it is planned to be completely changed over to electrostatic focusing on all sets," the report says.

* * * *

Here are some of the savings already worked out by RCA engineers -- many of them incorporated in sets presently in production:

Speakers: Alnico V speaker magnet (content 24% cobalt, 14% nickel, 8% aluminum, 3% copper, 51% iron), which formerly averaged 2.5 oz. per speaker, has been cut to average 0.75 oz., with largest magnet now used weighing 1 oz. This saves 70% of alnico; other speaker redesign measures save 35% steel, 90% brass.

Picture tube focusing: Electrostatic focusing (in place of alnico magnet) saves 5 oz. of Alnico V, 5 oz. of zinc, 8 oz. of steel. "When we have completely changed over to electrostatic focusing...the total [reduction in use of Alnico V in speaker and focusing] will be from 7.5 oz. to 0.75 oz.," RCA states.

Copper has been saved in these ways: Power transformer specifications have been changed, saving 0.19 lb. per transformer. (Other manufacturers are reported eliminating power transformer entirely by use of selenium voltage doubler.) Hook-up wire has been reduced from 22 to 24 gauge, a 33% saving in copper.

Savings in components RCA buys: Cup over end of picture tube on back of cabinet has been changed from aluminum to plastic. Shorter mounting bushings on some

variable controls save about 10% of brass in controls. Reduction in length of copper wire leads on capacitors saves 20% copper. Copper-clad steel wire leads are used instead of copper wire on wire-wound resistors and chokes. Alnico III magnets (no cobalt) are used instead of Alnico V for beam-benders.

Electron tubes: RCA gives details of nickel-plated steel strips (Vol. 6:49) used instead of pure nickel for tube plates. Nickel-plated Armco iron and low-nickel content stainless steel substitutes for pure nickel wire and copper wire in many tube components. Also being developed are facilities for use of 20% tin content solder in all operations -- in place of 35-60% tin.

* * * *

TV installation materials are conserved through measures already taken by RCA Service Co. Aluminum in antenna masts has been cut almost 50% during first quarter of 1951. Masts and antennas are narrower, shorter, thinner.

Copper in installations is being saved by: (1) Nation-wide program to place antenna near as possible to receiver. (2) Lighter weight lead-in wire, conserving as much as 33% in copper. (3) Splicing together and soldering short lengths of lead-in. Tests are being made with copper-coated steel wire for lead-ins, and with aluminum foil to replace copper braid in coaxial cables.

Zinc is saved through use of plastic coating material to rust-proof steel masts and brackets. Brackets, etc. are being redesigned to save steel.

* * * *

Conservation measures for future are still being planned. Among them:

(1) Redesign of CR tube deflection yoke, which, except for power transformer, is largest component user of copper. "A design using only 50% of the usual amount of copper...appears promising."

(2) This in turn will result in appreciable reduction in amount of copper in power transformer.

(3) "Chassis size and depth can also be reduced in the future."

(4) Nickel oxide in steel alloys has been reduced, with 23% saving already effected and goal of cutting its use another 50%.

Personal Notes: Walter Duncan, ex-sales mgr., WPIX, New York, joins Paul H. Raymer Co. . . . Lew Ruwitch, v.p. & gen. mgr., elected to board of WTVJ, Miami . . . Jack Bard, ex-NBC, joins DuMont Network as sales promotion mgr. . . . Wm. Lauten succeeds Mike Dann as trade news editor of NBC press dept. . . . Robert M. Flanigan promoted to mgr., NBC Chicago spot sales, succeeding late Oliver Morton . . . Edw. G. Smith, ex-General Mills, now mgr. of new program sales, ABC Central Div. . . . Hal Keith, directing *Your Show of Shows*, Bob Hope TV shows, etc., recalled to active Army duty . . . Vera Brennan, promoted to director of TV-radio timebuying for Duane Jones Co., succeeding Reggie Schuebel, resigned . . . Edgar Parsons, ex-WOL, Washington, new TV-radio director of American Automobile Assn. . . . Earl Kennedy, ex-Young & Rubicam, joins Maxon Inc., New York, in charge of TV-radio production . . . Carol Sleeper, ex-Doherty, Clifford & Schenfield, new timebuyer for N. W. Ayer, New York, succeeding Dirk Watson, recalled to Navy duty . . . H. Lawrence Holcomb, Lennen & Mitchell, new director of TV-radio dept., Tatham-Laird . . . Arnold Olin Leeds resigns as TV director of Moss Associates, New York, his work to be taken over by Joseph Moss . . .Harold J. Bock, NBC Hollywood director of talent relations, has resigned.

Wm. C. Ackerman has been granted leave as CBS Reference Dept. director and Program Dept. secy. to serve in Washington as secy. of President's Materials Policy Commission, headed by CBS chairman Wm. S. Paley (Vol. 7:4).

CARL HAVERLIN, president of Broadcast Music Inc., onetime MBS v.p. and a former Pacific Coast broadcaster, seems to be leading field of prospects for NAB presidency to succeed Judge Justin Miller when latter moves up to chairman and association changes name to National Assn. of Radio & Television Broadcasters. Changes presumably will come after April 15-19 NAB convention in Chicago's Stevens Hotel (Vol. 7:5).

Whether the BMI chief would be favorably disposed to the $50,000 job, was uncertain at week's end—but his name met with general approval at first informal meeting of 8-man committee empowered to make the selection. During last week's Florida meeting of NAB board, quite a few names were "tossed into the hat," including Harry C. Butcher, ex-CBS Washington v.p., now operating KIST, Santa Barbara; Otto Brandt, ABC station relations director; Charles R. Denny Jr., NBC executive v.p.; Harold Fellows, WEEI, Boston; Leo Fitzpatrick, WGR, Buffalo; Ed Kobak, ex-MBS president; Paul W. Morency, WTIC, Hartford; Joseph A. McDonald, ABC v.p.; Richard Shafto, WIS, Columbia, S. C.; Eugene Thomas, WOR-TV, New York; Donald Thornburgh, WCAU, Philadelphia.

There was talk of Morency's choice on an interim basis, with Brandt to head up TV Div.; also that Thad H. Brown Jr., Washington attorney, might take legal post with newly revamped association.

Choice of president will be made by this committee: Ben Strouse, WWDC, Washington, secretary; Robert Swezey, WDSU & WDSU-TV, New Orleans; James D. Shouse, Crosley stations; Allen M. Woodall, WDAK, Columbus, Ga.; Harry R. Spence, KXRO, Aberdeen, Wash.; Patt McDonald, WHHM, Memphis; Wm. B. Quarton, WMT, Cedar Rapids; Wm. A. Fay, WHAM & WHAM-TV, Rochester.

Network Accounts: Milton Berle may put his *Texaco Star Theatre* on NBC-TV alternate weeks, starting next fall, reports *Variety*, which recalls Kudner agency president James H. S. Ellis' recent Detroit speech charging networks with pricing TV sponsorships off air by higher rates and increased talent costs (Vol. 7:2-4); Texaco show is reported to cost about $40,000 weekly, Berle drawing $11,000 . . . Cluett, Peabody & Co. (Arrow shirts) is readying alternate week sponsorship of *Holiday Hotel*, Thu. 9-9:30 on ABC-TV, thru Young & Rubicam; will alternate with Packard, which now has show alone, same agency . . . March 25 is starting date of General Mills' alternate week sponsorship of 6:30-7 portion of *Ted Mack Family Hour*, Sun. 6-7 on ABC-TV, thru Tatham-Laird, Chicago; C. A. Swanson & Sons (poultry & margarine products), same agency, is alternate sponsor . . . Feb. 24 is starting date for new Lehn & Fink (Lysol, Etiquet deodorant, Hinds Honey & Almond Cream) sponsorship of 8-8:15 portion of *Jack Carter Show* Sat. 8-9 on NBC-TV, thru Lennen & Mitchell and McCann-Erickson . . . Hollywood Candy Co. (Milk Shake candy bar) has cancelled plans for children's show on CBS-TV, to have started Jan. 27, Sat. 11:30-noon, thru Ruthrauff & Ryan, Chicago (Vol. 7:3).

Station Accounts: Seeking engineers, designers, draftsmen, etc., Victor Chemical Works, Chicago, bought spots adjacent to weather reports, sports, newsreels, etc., evenings on WNBQ & WGN-TV for 2 weeks, got 270 applicants—much more than newspaper classifieds and radio spots produced. In fairness, though, it must be stated that TV announcements were spotlighted in 3-line ads in Chicago newspapers, and radio shots were daytime only. Gimmick: Applicant was instructed to phone certain number, where recording service took down job interview—a speedup method that gratified sponsor to point he says he will continue using TV in soliciting manpower . . . WTVJ, Miami, claims it has more different local advertisers booked than probably any other TV station—181 in one recent week . . . Series of 26 documentaries, all filmed by station's own staff and titled *This Is Baltimore*, depicts city's outstanding institutions and industries and are sponsored on WMAR-TV by Savings Bank of Baltimore, Mon. 7:15-8, thru Mahool Adv. Agency . . . To promote new film *Kim*, opening in 31 Loew's movie houses in New York area Feb. 21, Loew's Inc. plans "saturation" drive on WPIX that day, using every spot and participation availability, placed thru Donahue & Coe . . . Progresso Brand Quality Foods Feb. 18 starts 13-week series of *Opera Cameos*, with David Ross as commentator for operatic guest stars, on WPIX, Sun. 6-6:30, thru Carlo Vinti Adv. . . . Dow-Corning Corp. (Sight Savers eyeglass wipers) is new spot account on WCBS-TV, New York, thru Don Wagnitz Adv., Midland, Mich. . . . New idea in quiz shows is *Special Delivery* on KFI-TV, Los Angeles, sponsored by 6 Sanitone Cleaners, Mon. 7:30-8, with 6-person panel each week competing, half sponsors, other half women customers of the cleaning establishments . . . C. Schmidt & Sons (Schmidt's Beer & Tiger Head Ale) Feb. 13 started *Public Prosecutor*, filmed detective dramas, Tue. 7:30-8, on WFIL-TV, Philadelphia . . . Consider H. Willett Inc., Louisville, (furniture manufacturer) sponsoring *NBC News Review of the Week* on WTMJ-TV, Milwaukee, Mon. 4:15, thru Griswold-Eshleman Co., Cleveland . . . Among other advertisers currently reported using or preparing to use TV: Wesson Oil & Snowdrift Co. Inc. (Snowdrift shortening), thru Kenyon & Eckhardt, N. Y., and Fitzgerald Adv. Agency, New Orleans; Silex Co. (Silex coffee makers, steam irons), thru Alley & Richards Inc., N. Y.; B. Manischewitz Co. of New York Inc. (frozen kosher chicken), thru A. B. Laudau Inc., N. Y.; Terre Haute Brewing Co. Inc. (Champagne Velvet Beer & 76 Ale), thru Biow Co., N. Y.; Florida Fashions Inc., Sanford, Fla. (cotton dress mail order house), thru Jack Danowitz Adv. Inc., N. Y.; J. G. Van Holten & Son Inc. (pickles), thru Jim Baker Associates, Milwaukee; Dolcin Corp. (proprietary), thru Victor Van der Linde Co., N. Y.; O-Cedar Corp. (Dri-Glo silicone furniture polish), thru Young & Rubicam, Chicago; American Home Foods Inc. (Duff's cake mix), thru Ted Bates & Co., N. Y.; Hambro Trading Co. of America Inc. (Queen of Scots Kippers), thru Victor A. Bennett Co., N. Y.

Policy of 2% cash discount on national advertising has been adopted by 3 TV networks, all 4 radio networks, but is slow to take hold among individual TV and AM stations, reports American Assn. of Advertising Agencies, which said it regards discount as financial safeguard serving as automatic warning when client passes discount date. AAAA said its members have placed $15 billion worth of advertising in last 20 years, that media have had credit losses of only $250,000 in that time, whereas agencies have lost $5,100,000. But AAAA points out that agency losses amount merely to 1/30 of 1%. Among other media, 2% discount has been adopted by 95% of newspapers, 95% of farm papers, 93% of general magazines, 83% of business publications.

Radio and TV carry less "questionable" advertising than other media, Federal Trade Commission indicated in annual report, issued Feb. 8, covering fiscal year ended June 30, 1950. About 4.5% of newspaper and magazine ads examined were set aside as possibly false and misleading, 2.5% of mail order ads, 2% of TV continuities, 1.9% of radio continuities. FTC examined 759,729 radio scripts, 35,422 TV continuities during fiscal year. FTC chairman James M. Mead has directed Radio & Periodical Advertising Div. to "give particular attention to advertising appeals of doubtful nature which are related to the mobilization effort."

If Phonevision were national, annual income would be $950,000,000, according to first month report from Zenith's Comdr. McDonald to film producers cooperating in 300-family Chicago test. He based his estimate on 1.8 times per week per family average "attendance" (excluding first week because of novelty effect) related to 10,000,000 TV sets now in use. Under Phonevision plan, half of that would go to producers. McDonald calculated almost $1,000,000 per picture for producers in his pay-as-you-see plan. Report shows average attendance was 3.1 times per family first week, 1.9 second and third week, 1.7 fourth week. Twenty-eight pictures were screened. FCC this week extended authorization of tests to March 31, so they can run full 90 days. Critics of Phonevision say it cannot be assumed all 10,000,000 TV sets-in-use would be equipped for pay-as-you-see system, point to TOA consultant Nathan Halpern analysis last July which calculated top income of $940,000 per picture, or top of $460,000 for producer (Vol. 6:30). Doubters are also eager to see Sindlinger report to Paramount on experiment; he was hired for job (Vol. 7:2).

New and Better TV Map

New Television Map of the United States, revised to Jan. 15, 1951, and considerably improved, has been published by *Television Digest*, and one copy was inserted with our Jan. 15 *TV Factbook No. 12*. It makes an excellent wall-map, or can be used as a working outline. It's 22x26 in., in color, shows locations of and lists all operating TV stations with present and projected network routes. Because of demand for extra copies, we have had more published and they're available at $1 each. Quantity prices on request.

Mobilization Report
February 10, 1951

UPCOMING METALS CURB MAY HIT TV-RADIO: New measures to limit use of critical metals are being prepared by National Production Authority.

Aimed at auto and major appliance makers -- who use lots of steel -- they may be extended also to TV-radio industry.

Control of 3 metals basic to the economy, on industry-by-industry basis, is key to new NPA planning. Past materials limitations have been across-the-board cuts, applicable equally to all civilian users of raw materials. New orders, scheduled to take effect about April 1, will single out specific industries, tell them how much to cut their consumption of steel, aluminum and copper.

Cuts will begin at 25% of "current consumption," progressively increasing to 40%, best sources indicate. NPA says impact will be gradual, "designed to mesh as closely as possible with increasing defense work so as to create a practical minimum of dislocation and unemployment."

Behind change in policy is NPA's dissatisfaction with continued high use of steel by auto and appliance makers -- and also with inequities in present system of over-all cuts in use of strategic metals. Present limitations, which hit suppliers rather than end-product makers, favor bigger manufacturers who can corner new sources of supply at expense of smaller manufacturers or other industries.

Refrigerator, stove, auto industries have been mentioned specifically as targets for new orders. At week's end, NPA hadn't made decision whether to include TV-radio. First order in new series will probably be issued in 2 weeks, giving manufacturers time to make adjustments before April 1 deadline.

Here's example of how orders will probably work: NPA may order refrigerator manufacturers to use 25% less steel in April, 30% less in May, 35% less in June, than they did in January 1951. This would place ceiling on amount of steel available to each manufacturer, but not on number of refrigerators he could turn out.

"Metals census" of electronics industry, now being completed by Electronic Parts Mobilization Committee of RTMA, should aid NPA as well as TV-radio industry in future planning. Committee is compiling list of total amounts of critical metals used by the industry. Metals on list: aluminum, brass, cadmium, cobalt, copper, iron, lead, nickel, steel, tin, zinc.

NPA means business -- and it's good bet that TV-radios built after April 1 will be full-fledged "conservation models," regardless whether the industry is included in new metals limitations. If there aren't substantial cuts in use of scarce metals, NPA's "kid-glove" handling of TV-radio industry may come to end.

NPA TELLS NPA 'NO BAN ON STATIONS': Washington isn't noted as a manufacturing city. But it does turn out 2 products in vast quantities -- confusion and contradiction. Here's a timely example:

Most "commercial construction" was banned for 30 days Jan. 15 by Amendment 3 to National Production Authority Order M-4 (Vol. 7:3). The order also provided that after Feb. 15, none of this same type construction could be commenced without NPA authorization. It immediately touched off disputes as to exactly what construction was affected.

Part of the trade press headlined stories that TV-radio station construction had been banned. Since this was one of the points on which order was obscure, we visited NPA's Construction Div. when order first came out -- and there received these divergent answers from 4 different officials:

(1) All TV-radio transmitter, studio and office construction is banned.

(2) Transmitter installations may be built, but not studios or offices.

(3) Engineering facilities and studios are OK, but not offices.

(4) You can build studios and offices if they're housed in same building as transmitting equipment.

Construction Div. couldn't interpret own order, we concluded, and so went to NPA's legal dept., where we consulted attorneys who drew up the order and are saddled with job of interpreting it. From them we got facts on which we based our Jan. 20 (Vol. 7:3) item captioned: "Stations Exempt From Building Ban."

To clear up confusion among the public -- including its own Construction Div., which is charged with enforcing the order -- NPA Feb. 9 issued Amendment 4 to M-4, specifically stating that TV-radio stations, newspaper and printing plants can be built without NPA authorization. In accompanying statement, NPA explained its policy is "to assure the greatest possible freedom of operation to the nation's facilities for the communication of news and education material."

In black and white, Amendment 4 exempts from construction controls: "Buildings, structures or projects for radio broadcasting or television broadcasting."

Presumably, the Construction Div. knows about it now.

Mobilization Notes: There's no crisis yet in raw film supply for TV, but situation may get worse due to increasing demand of armed forces for X-ray film. DuPont has already notified customers it's cutting all film orders by 25%, with Eastman reportedly holding customers to same amount they used in 1950. TV requirements are expected to increase this year—and that's where the pinch may come in.

Use of film was limited by War Production Board during World War II. NPA officials say no such action is currently planned—but may be necessary if shortage becomes more severe. NPA is querying all users of motion picture film to determine amount used in each field (theatre, advertising, kinescope, etc.). It's estimated TV uses 300,000,000 feet of raw film each year, compared to 2 billion feet used by motion picture industry.

* * * *

Resolution requesting priorities for replacement parts (Vol. 7:5) was made public this week by Assn. of Electronic Parts & Equipment Manufacturers (New York) and Sales Managers Club, Eastern Group (New York). It urges NPA to assign, for production and distribution of maintenance, repair and operating supplies, ratings equal to defense priorities. Resolution suggests: (1) distributors who buy priority replacement parts be restricted to 180-day inventory; (2) manufacturers be permitted to use, in replacement parts, up to 150% of materials used for same purpose during first half 1950 base period.

W. Walter (Wally) Watts, RCA Engineering Products v.p. on leave, whose appointment as asst. to Defense Production Administrator Wm. H. Harrison (Vol. 7:1) was officially announced Feb. 8, will be chairman of DPA's Production Executive Committee through which Gen. Harrison will exercise over-all coordination and direction of defense production. Committee will consist of representatives of all govt. agencies participating in defense production program. Edwin T. Gibson, General Foods Corp. v.p., was named DPA Deputy Administrator in charge of staff services.

Idea of using distributors as subcontractors, recently broached by Belmont (Vol. 7:3), gave impetus for National Assn. of Electrical Distributors to circularize members with message that its membership aggregates 75,000,000 sq. ft. of floor space, as well as tens of thousands of skilled workers available for defense production.

Dr. Lloyd F. Berkner, noted radio scientist, is leaving Carnegie Institution to become president of Associated Universities Inc., formed by 9 Eastern universities to administer Brookhaven National Laboratory, at Upton, N. Y., for the Atomic Energy Commission.

NPA's Electronic Products Div., headed by John Daley, continues to expand, with addition of 2 staff members this week: Wm. S. Winter, veteran of old WPB Radio-Radar Div., formerly in wholesale & retail electronics business, including Emerson sales staff, and J. Bernard Joseph, engineer, an ex-Mass. radio wholesaler, ex-RCA & GE, who did industrial mobilization work for Signal Corps during World War II.

Glen Ireland, on leave as v.p. & gen. mgr. of Pacific Telephone & Telegraph Co., this week was appointed Deputy Administrator of National Production Authority by Administrator Manly Fleischmann. Ireland was formerly asst. to NPA Administrator. John C. Pritchard, Denver steel fabricator, Feb. 7 became director of NPA's Office of Small Business. John H. Hollands, of Buffalo, Feb. 8 was named NPA general counsel.

Robert C. Tait, president of Stromberg-Carlson, elected co-chairman, with Western Electric's Fred R. Lack, of Joint Electronics Industry Committee. JEIC was set up by RTMA and National Security Industrial Assn. to coordinate all industry mobilization activities and to serve as advisor to top govt. policy makers. (For membership, see Vol. 6:32, 36.)

Helpful booklet, *Inventory Control & Priorities,* just published by NPA, answers 85 most common questions about Regulations 1 & 2, is available free from Commerce Dept. field offices or from Office of Public Information, National Production Authority, Washington 25, D. C.

* * * *

Among unclassified military contracts for electronics and related equipment (more than $100,000) announced by Commerce Dept. for week ending Feb. 7: Through Signal Corps, Philadelphia—RCA, $2,000,000, radio sets (18,899 units); Automatic Radio Mfg., $496,764, auxiliary interphone equipment; Leeds & Northrup Co., Philadelphia, $250,000, radiosonde recorders (185); Mallory, $250,000, power supplies (6500); Park Mfg. Co., Grant Park, Ill., $250,000, power supplies (6500); Barker & Williamson Inc., Upper Darby, Pa., $180,000, radio sets (30). Through Navy Bureau of Ships, Washington—Stewart-Warner, $800,000, direction finders (46). Through Air Materiel Command, Dayton—Hammarlund, $259,505, receivers. Through Navy Electronic Supply Office, Great Lakes, Ill.—Hytron, $175,000, electron tubes. RCA was awarded contracts totaling $168,380 for electron tubes through Signal Corps and Navy Electronic Supply Office. In addition, Lewyt Corp. (vacuum cleaners) reportedly has received $4,500,000 Signal Corps contract for construction of FM ground force radio equipment; company is still working on an initial $5,000,000 order for same type equipment.

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
February 10, 1951

COMPLEX PATTERNS OF THE TV TRADE: Paradox of shrinking factory supplies but continued high production and huge inventories seems to be current pattern of TV trade.

More than 1,000,000 costly units are in trade pipelines, components are getting scarcer as Govt. tightens controls of raw materials, prices hold firm -- and people are still buying. Radios, too, are enjoying boom.

Calling its tax and credit control shots well in advance, Truman Administration turns out to be TV's best salesman. Nobody likes the long-range news, but near-term effect is to move goods -- of that there can be little doubt.

Treasury's proposed hike of excise tax from the 10% imposed last Nov. 1 to 25% was grim reminder that lush days are nearing end, for such tax must inevitably cut down buying. But it's unlikely the new excises will get through Congress and become effective before summer -- so public still has plenty of time to buy and, with piled-up stocks, you can be sure retailers will urge them aplenty.

As for tighter Regulation W, already stringent, word from Federal Reserve is expected any day, for the whole anti-inflation program is designed to discourage buying of durable goods, particularly "luxury" items. They regard TV in that category here in Washington.

* * * *

How high can prices go -- and the public still be expected to buy?

Another 15% factory excise would add about 10%, roughly, to retail cost of TV receivers. During 1950, sets went through many rounds of price increases, forced by higher labor and material costs and, after Nov. 1, by the 10% excise tax.

Demand for lower-priced units, while factories insist on loading them with higher priced, led one large distributor to remark: "I don't mind having a Cadillac franchise, but damn it all, I'd like to have a Chevrolet agency on the side, too."

It's possible now to give some idea how much prices went up during 1950, though available figures are factory level only, and we could secure them only for the first 11 months of year. The figures are derived from authoritative sources.

Leaving out of account taxes, average factory price for a TV receiver in January 1950 was $163.77, and this was progression thenceforth: February $176.06, March $174.94, April $158.80, May $170.31, June $165.03, July $162.77, August $176.64, September $190.78, October $198.47, November $199.76.

* * * *

Railroad stoppage cut heavily into outputs of Philco and Admiral, each of which is reputed to produce 4000 or more receivers per working day. Philco recalled its Philadelphia and Croydon workers for second (4 p.m.) shift Tuesday, resumed full scale next day, so that it lost just about full work week (Vol. 7:5). Admiral plant in Chicago resumed Tuesday, so that it lost 3 full days. Others may have been affected, but didn't say anything.

Philco's Sandusky plant kept going, so that company's over-all TV output was down about 75%. Philco depends heavily on rail shipments, considers freight cars its part-time "warehouses". More trucks solved Admiral's problem.

Those shutdowns and other curtailments probably mean February production figures will slide -- but January's stayed fairly high, totaling 639,176 TVs and 1,235,114 radios, compared with 879,075 TVs, 1,602,055 radios in 5-week December, 752,005 & 1,304,094 in November (for all 1950 monthly figures, see p. 67, TV Factbook No. 12).

Here's how January's 4 weeks stacked up for TVs: first week 105,699, second 167,859, third 188,758, fourth 176,860. Surprising was continued high output of radios: first week 209,792, second 338,520, third 342,586, fourth 344,216.

Where are the components coming from to keep up this rate? They tell us:

First, large companies enjoying long relationships with prime suppliers are being favored. Secondly, small companies, finding key items hard to get, have begun pulling in their horns, so that more materials are going to others. "The little guys are getting littler," we're told.

But shortages are "getting rougher" on everybody, with speakers right now the most severe, and the pinch being felt in transformers and yokes (using copper) and steel items. By April, real shortages should develop in aluminum and 300-ohm line (copper), and of course the cobalt outlook is very rugged (Vol. 7:5).

Big problem for all manufacturers is unbalanced inventory of supplies. Sets are being held up for lack of one or two components, varying from day to day. But the big fellows insist they have no factory inventories of finished sets, and some are inclined to minimize extent of their wholesaler-retailer inventories.

Example of a smaller TV producer's position is Sparton, which is now producing about third less than peak final quarter 1950, has cut down distribution to major cities (dropped 10 out of 47 field agencies), is emphasizing 26-tube chassis requiring more critical materials and longer time to make. Sparton is getting some defense contracts, expects to have 50% of capacity on war work toward end of year, has reopened 100,000 sq. ft. plant for such production.

Big and little, the manufacturers even have their salesmen out buying up needed components, are still paying list prices or better for certain items. Toughest part of materials problem, we were told by one big components maker, is to get uncontrolled items. All his executives are purchasing agents these days.

* * * *

That retail business is good, is generally acknowledged -- with the usual squawks about inadequate markups, big inventories, factories prodding to take more, etc. Reports from San Francisco Western Merchandise Mart indicate high optimism among Pacific Coast retailers. It's too early yet to gauge country-wide effect of news of proposed new excise tax -- but few doubted it would prove hypo.

Wall Street Journal Feb. 7 headed article on appliance sales thus: "Retail Stocks Tower. Supplies Keep Coming as Scare Sales Ebb. Plenty to Buy." Then it related how Macy's advertised $550 TV for $329, how big stores around country are "loaded to the gunwales with consumer goods." Expressive quote from Marvin Cossy, of Chicago's Edward B. Dublin & Son:

"TV sets are supposed to be on allocation, but it's a funny thing that manufacturers keep calling up and asking if I want more merchandise."

And a Boston dealer mourns that if slump should occur, "a lot of banks will find themselves in the TV set business."

EXPORT FIELD LIMITED BUT PROMISING: Final figures aren't available yet -- but from authoritative source we learn that U.S. TV-radio manufacturers during 1950 exported some 32,000 complete TV receivers valued at approximately $6,000,000 (average unit cost at factory: about $190) plus some 7000 TV units without cabinets valued at about $1,000,000 (average: nearly $145).

These tentative figures give idea of smallness as yet of our TV export trade -- 39,000 units being less than one-fourth of one average week's production. The 1950 radio export figure will be fully 400,000 complete sets valued at around $9,000,000. Cathode ray tube exports in 1950 totaled mere 11,184, receiving tubes only 10,767,831 out of 7,473,614 & 383,960,599 production, respectively (Vol. 7:5).

Whereas our radio exports go all over the world, and American branch or affiliated factories are prime manufacturers or assemblers in many countries, our TVs move almost exclusively to Canada, Cuba, Mexico and Brazil.

Therein lies a great potential for the U.S. industry, provided (a) that it can continue to turn out sets, (b) Mexico and Brazil relax their import restrictions, (c) demand for such high-priced item is stimulated as stations open up.

Emerson last week disclosed order for 1400 TVs from its Rio de Janeiro distributor, having shipped 1000 last December -- with 3000-4000 non-assembled units

also due to be shipped to Brazil by mid-summer if export licenses are obtainable.

That brought to light fact that Brazilian Govt. limited 1950 TV imports to 10,000 sets. Mexico similarly allowed 10,000 TVs in. Cuba is free market, and Havana claims at least 10,000 sets already. Canada has a considerable TV-radio industry of its own, so imports very few complete units from this country.

Efforts to relax import quotas are being pushed, as American firms argue with Mexico and Brazil that they cannot afford to set up complicated production lines in those countries, as they did for simpler and cheaper radios, and sell at prices comparable to the mass-produced U.S. product. Brazil's newly elected President Getulio Vargas is reported favorable to relaxing the quotas, especially as several more TV stations are planned in that country.

Except for England, with a flourishing industry of its own, few other countries have telecast services comparable to those growing up in the western hemisphere. U.S. interests have concentrated so intensely on the ripe domestic market that they've as yet evinced very little interest in exports -- that is, all but about a dozen firms -- notably GE, Philco and RCA, which are reputed to account for at least 75% of the TV export trade to date.

Aside from small size of foreign markets, other reasons why U.S. companies tend to shun them: (1) Different transmission and power standards mean too much engineering bother. (2) Aggressive competition from such outfits as sprawling Dutch Philips Company, to which such markets mean do or die.

Note: For details about the 2 stations presently operating in Havana, the one in Mexico City, 2 in Rio, others planned, see page 29 of our TV Factbook No. 12. Canada has no telecast outlets, gets fair service from some of our border stations.

Topics & Trends of TV Trade: New tax threats and the need for stronger coordination in Washington of TV-radio industry's mobilization efforts are expected to expedite RTMA board action on its reorganization committee's selection of RCA v.p. Glen McDaniel as paid president (Vol. 7:2) when board meets in Chicago's Stevens Hotel next Thursday, Feb. 15. Very little opposition to McDaniel has developed. He's strongly supported by interim president Robert C. Sprague, and won particularly favorable attention by his work on recent excess profits tax bill. Some objections were raised on grounds of his youth (39) and his RCA connection (5 years), but these are believed to have faded.

Uppermost also in minds of RTMA members, as they attend Chicago mid-winter conference Feb. 13-15, will be proposed new excise tax (see p. 1), service problems (Service Committee under Chairman E. W. Merriam meets Feb. 13), and various facets of defense effort. Committees meet Feb. 13 & 14, and at board meeting Feb. 15 reports will be submitted on work of Joint Electronics Industry Committee (Fred Lack and Robert C. Tait, co-chairmen) and Electronics Parts Mobilization Committee (A. D. Plamondon Jr. and R. E. Laux, co-chairmen).

* * * *

New Emerson line, announced this week, comprises 23 models, including 6 holdovers from previous line. Only one new set is table, 17-in. mahogany Model 696, at $299.95. Others are all consoles, all mahogany unless otherwise indicated (prices including excise tax):

16-in.: 684, $329.95; 685, with doors, $359.95.

17-in.: 686, $349.95 (blonde, $359.95); 687, with doors, $379.95 (blonde, $399.95).

19-in.: 688, $439.95; 689, with doors, $459.95 (blonde, $479.95); 690, with full doors, $479.95 (blonde, $509.95).

20-in.: 692, $459.95; 693, with doors, $479.95 (blonde, $499.95); 694, full doors, $499.95 (blonde, $529.95).

Held over were 662, 14-in. plastic table, $219.95; 676, 17-in. wood table, $299.95 (blonde, $309.95); 680, 17-in. table, better cabinet, $299.95; 666, 16-in. console, AM-FM-phono, $499.95 (blonde, $529.95).

Notwithstanding wage freeze, CIO's International Union of Electrical Workers (IUE) launched campaign for 12 to 15½¢ per hour wage increases, plus pensions and other benefits. At Feb. 3-4 meeting of TV-radio union delegates in Erie, Pa., said to represent 75,000 workers, president James B. Carey said TV-radio industry is "low man on the totem pole of the plants which IUE represents." IUE also represents electrical and machinery workers. Carey said industry could grant wage boosts from increased profits without boosting prices, cited also special provisions in excess profits tax for growth companies. IUE also announced it would act in behalf of employers in seeing they got relief when necessary from NPA limitation and allocation orders "so plants can continue full production until receipt of defense orders."

Corning Glass Works proudly announced plans for 100,000 sq. ft. Glass Center, in Corning, N. Y., to be opened this summer in connection with celebration of company's 100th year. Center will include a Steuben glass factory, research facilities, library, museum, spectators' galleries. Corning claims library and museum will be most extensive in world. It will be open to scientists, students, historians, artists, etc. Handling public relations is Steuben admanager E. P. H. (Jimmy) James, former Mutual v.p.

New service plan, with warranty on picture tube only, is being sold by Television Engineers Inc., 1539 W. Harrison St., Chicago. Customers pay $7.95 to $12.95, depending on tube size, are protected for year against large replacement costs of picture tubes.

Sheldon Electric Co., division of Allied Electric Products Inc., Irvington, N. J., is latest to announce development of electrostatically-focused picture tube, which saves copper and cobalt (Vol. 7:1, 3-5).

Canadian manufacturers during 1950 sold 37,823 TVs valued at factory at $16,276,583, and 731,345 radios valued at $57,320,400, reports RMA of Canada. During 1949, they sold 729,970 radios.

Bendix Radio Div. has appointed Radio Engineering Products Ltd., Montreal, as Canadian distributor.

Plant expansions: GE plans to build $200,000 warehouse at its Buffalo TV tube plant, 55,000 sq. ft. structure to be started in fall . . . GE also announces construction has begun on new 4-story addition, 117,000 sq. ft., costing $2,000,000, to its Owensboro (Ky.) tube works for manufacture of miniature, subminiature and metal receiving tubes; should be ready for occupancy by July 15 . . . Hallicrafters leasing new 100,000 sq. ft. plant about 3 mi. from present Chicago factory, to be used for military production . . . P. R. Mallory & Co. new plant scheduled for completion July 1 . . . Cornell-Dubilier has leased 81,000 sq. ft. warehouse at Fuquay Springs, N. C., 18 mi. southeast of Raleigh, and in about 60 days expects to have it ready for manufacturing vibrator-type power supplies.

RTMA statisticians have revised upward their 1950 TV-radio set production estimates, placing total TVs at 7,463,800, radios at 14,589,900. Previous accumulated monthly figures came to 7,408,690 TVs, 14,554,972 radios (Vol. 7:2). Breakdown of 1950 radios is now given as 8,174,600 home units, 4,740,600 auto, $1,674,700 portable.

New publications firm, preparing technical material for electronics companies seeking govt. or other business, is Manual Publishers Inc., 96 Elm St., Buffalo. Company is associated with distributor W. Bergman Co., offers "complete service for the preparation, editing and production of technical literature."

———■———

The color inventors still appear—FCC receiving letters from two recently. Cage Projects Inc., 393 Grove St., Upper Montclair, N. J., onetime producer of custom TV receiver installations, told Commission it had acquired pending patents on color camera and receiving tubes, wanted to know whether FCC approval of them is necessary. Commission said it couldn't tell from description. Meguer V. Kalfaian, 962 Hyperion Ave., Los Angeles, filed long, complex description of 12-mc color system involving multiplex, said it is compatible. FCC answered by calling his attention to portion of color decision which outlines how new systems will be considered.

Uhf and color, covered by experts, will be featured in April 14 conference of Cincinnati IRE section: Uhf—NBC's Raymond Guy on Bridgeport experience; Philco's R. G. Clapp on reception; Measurement Corp.'s Jerry B. Minter on uhf megacycle meter. Color—Crosley's Harold L. Brouse on colorimetrics; GE's R. B. Dome on "Methods of Adding Color to TV Images"; Hazeltine's A. V. Loughren on "Some Fundamental Considerations on Color TV."

More Feb. 1 sets-in-use reported since NBC Research's "census" of Jan. 1 (Vol. 7:3): St. Louis, 254,000, up 15,000; Washington, 233,910, up 13,910; Memphis, 75,117, up 5017; Omaha, 62,904, up 7104; Norfolk, 56,783, up 6283; Utica, 36,000, up 3000; Kansas City, 100,600, up 7400.

Trade Personals: S. M. Finalyson, gen. mgr., Canadian Marconi, succeeds A. H. Ginman, retired, as president . . . Glen L. Logan, ex-executive asst. to sales v.p. of Packard Motor Car Co., named managing director of Electric League of Los Angeles, succeeding Wm. J. Quinn, retired . . . Dr. R. M. Bowie, ex-mgr. of Sylvania physics labs, appointed to staff of Sylvania engineering v.p. E. F. Carter . . Henry Esterly promoted to Magnavox district sales mgr., New York City, with John Hogan succeeding him as state mgr. out of Syracuse . . . Walter S. Lefebre appointed Sylvania Buffalo-Cleveland-Detroit district sales mgr. . . . Harold J. Schulman appointed service director of DuMont teleset service control dept. . . . Newly elected GE executive vice presidents are Roy W. Johnson, in charge of appliance and electronics group; Henry V. Erban, apparatus group; Hardage L. Andrews, industrial products and lamp group.

Financial & Trade Notes: New Federal income and excess profits taxes pushed CBS net earnings down from $4,184,100 ($2.44 per share) in 1949 to $4,105,300 ($2.39) in 1950, according to report to stockholders Feb. 7. The 1950 Federal and excess profits taxes amounted to $5,450,000, as against $3,450,000 income tax only in 1949. In 1948, net earnings were $5,041,700 ($2.94); 1947, $5,920,100 ($3.45); 1946, $5,795,900 ($3.37); 1945, $5,346,200 ($3.11). Complete financial report for fiscal year ended Dec. 30, 1950 will be distributed on or before April 1.

Among officers' and directors' stock transactions reported by SEC for December: Cy S. Rossate bought 200 Admiral, holds 1400; Charles M. Thorp Jr. gave 200 Blaw-Knox as gift, holds 1800; Isaac D. Levy gave 280 CBS (Class B common) to charities, holds 20,475; Allen B. DuMont received 2000 DuMont Laboratories as gift, holds 56,500; John S. Timmons sold 3000 Philco, holds 17,000; Leslie G. Woods gave 300 Philco as gift, holds 10,305; William B. Yoder bought 100 Philco, holds 1124; Robert A. Seidel sold 100 RCA, holds 500; Carl J. Gilbert bought 200 Raytheon, holds 200; Charles J. Kayko bought 500 Sparks-Withington (Nov. & Dec.), holds 800.

Magnavox reports highest 6-mo. sales and earnings in its history for period ended Dec. 31, first half of its fiscal year—$25,788,921 net sales, $1,814,500 estimated net earnings after all taxes, equivalent to $2.53 per share on 706,974 common shares outstanding. Sales for corresponding 1949 period were $13,776,892, profit $775,700 ($1.17). Net sales for Dec. 31 quarter were $15,575,083, estimated net earnings $1,033,878 vs. $9,451,994 sales and $727,016 profit for same 1949 quarter.

Emerson's sales and earnings before taxes for quarter ended Jan. 31 were about 50% higher than same period in 1949-50, president Ben Abrams told annual stockholders meeting Feb. 7. No figures were given. Mr. Abrams said current production is 15-20% ahead of a year ago, but less than fourth quarter 1950. He predicted sales this fiscal year will equal last year's $74,188,297 (Vol. 7:2), but said "we'll have to go some" to achieve 1950's earnings of $6,514,716.

General Instrument Corp. is offering 121,715 shares of common stock at 9½ to common stockholders, on basis of one additional share for every 4 shares held. Each holder is also entitled to subscribe at same price for any additional shares remaining after Feb. 21. Proceeds will be used primarily to reimburse company for recent acquisition of additional plant facilities and equipment. Offer is underwritten by group headed by Hirsch & Co., which will buy any shares not subscribed for by common stockholders.

John Meck Industries Inc., for fiscal year ended Nov. 30, 1950, reports sales of $12,749,552, net profit of $343,455, or 62¢ per share, compared with sales of $4,316,857, profit of $80,960 for comparable 1949 period. Scott Radio, wholly owned subsidiary acquired last year, for 6 months ended Nov. 30 showed sales of $1,563,128, net profit of $155,065 vs. $213,739 sales and $87,663 loss for same 1949 period.

Hytron Radio & Electronics, owner of Air King, Feb. 8 reported 1950 earnings of $3,500,000, equal to $1.75 on 2,004,892 common shares—more than fivefold increase over 1949 profits of $565,170 (89¢ on 631,211 shares). Sales in 1950 totaled $41,500,000 vs. $16,226,000 in 1949.

Television-Electronics Fund Inc., in declaring dividend of 15¢ payable Feb. 28 to holders of record Feb. 16, states net assets as of Jan. 31 were $6,125,746 ($12.74 per share) compared with $5,560,023 ($12.01) as of Oct. 31, 1950 and $4,000,726 ($10.98) as of Jan. 31, 1950.

National Assn. of Music Merchants 1951 trade show has been scheduled for July 16-19 in Palmer House, Chicago.

Telecasting Notes: Crosley stations WLWT Cincinnati, WLWC Columbus, WLWD Dayton conducting 2-week promotional campaign to Feb. 18, at cost of $90,000, to sell 100,000 to 150,000 TV sets before possible defense-induced production shutdown or curtailment. Idea is not only to help dealers unload some 70,000 sets in warehouses but also to build up audience. Free TV shows are being staged in each city, with distributors-dealers handing out tickets and holding displays in local auditoriums . . . Early-morning viewers of Los Angeles KTLA & KTTV saw flash of fifth atomic explosion from Nevada Feb. 6, shot by cameras atop 5710-ft. Mt. Wilson—the glare visible from 300-mi. away despite local mist . . . ABC's KECA-TV, Los Angeles, Feb. 3 added 2 hours daily to its program schedule, 11 a.m. to 1 p.m. . . . U of Utah extension div. has arranged with KSL-TV, Salt Lake City, to telecast *The World U Live In*, credit course, every Thu. at 8:30 p.m. . . . Philco is relinquishing its *Philco Playhouse* time to United States Shoe Corp. (Red Cross shoes) on NBC-TV for *An Evening with Richard Rogers*, Sun., March 4, 9-10 p.m., during program will donate 25 large-screen TV sets to 18 Army hospitals designated by Secretary of the Army . . . DuMont has signed affiliation contract with Union Radio, Havana . . . Canadian Assn. of Broadcasters meets in Quebec, Feb. 26-March 1 . . . "No pictures" is theme of promotion by AM station WSTC, Stamford, Conn., which offers "wonderful words and music" instead . . . Kagran Corp., which bought merchandising rights to *Howdy Doody* (Vol. 7:1), has obtained similar rights to Gene Autry and Willie the Penguin merchandise . . . Because of alleged lottery implications, WICU, Erie, and WBEN-TV, Buffalo, have discontinued taking Admiral-Old Gold *Stop the Music* show from ABC-TV, Thu. 8-9 . . . Six Milwaukee colleges and universities have joined to present *Education on Parade* on WTMJ-TV, Sat. 1:30-2, each taking turn in covering different college subject . . . Exclusive theatre-TV showing of basketball game between Siena College and Georgetown U in Washington has been arranged for Fabian's Palace Theatre, Albany, Feb. 20. Game will be picked up by WNBW cameramen, relayed 350 mi. via AT&T facilities.

New Feb. 15 rate raises: WNBT, New York, base hourly rate up from $2500 to $3250, one-minute rate from $500 to $675; WNBQ, Chicago, from $1000 to $1300 & $200 to $260; WNBK, Cleveland, $525 to $750 & $120 to $150 . . . WNAC-TV, Boston, Feb. 1 raised base hourly rate from $750 to $1000, 1-min. from $150 to $200 . . . WENR-TV, Chicago, March 1 goes from $1000 to $1300 & $200 to $250.

Three applications for new TV stations filed with FCC this week: KSCJ, owned by *Sioux City* (Ia.) *Journal-Tribune*, applied for Channel 5, first applicant from that city. WMSC, Columbia, S. C., applied for Channel 10, second from city, other by WIS being for No. 7. WROV, Roanoke, Va., applied for Channel 5, first from city. [For further details about these applicants, see *TV Addenda 12-E* herewith.] John L. Booth, owner of WJLB, Detroit, in letter to Commission, signified intention of applying for Detroit at end of freeze, but urged against intermixture of vhf-uhf in same city; he's already applicant for TV in Saginaw and Flint (see *TV Factbook No. 12.*)

San Diego's KFMB & KFMB-TV are being sold by Jack Gross to John A. Kennedy interests (Vol. 6:46) for total of $925,879 plus other considerations, according to transfer application filed with FCC this week. On FCC approval of deal, Kennedy would pay $200,000, week later $350,000, within 18 months of closing date $50,000, 6 months thereafter $50,000—plus quarterly payments of $25,000, plus interest, until paid in full.

Columnist Drew Pearson started new chain of rumor and conjecture regarding FCC Chairman Wayne Coy, now on vacation until March 6, when he predicted Coy's shift to an as-yet-unplanned job of "coordinator of defense communications." Gossip was compounded into rumor of appointment of Comr. Frieda Hennock as chairman. But careful check, including White House sources, indicate no such appointments either broached or being considered. Miss Hennock laughs off rumor by saying it's idle to think chairmanship would ever go to a woman. Pearson report porbably was deduction from stories that President's special Communications Policy Board, under chairmanship of ex-FCC Comr. Irvin Stewart, now president of U of Virginia, will recommend permanent board above FCC sitting on high policy respecting nation's wire and wireless facilities (Vol. 7:2). Stewart group's report is scheduled to be submitted Feb. 17.

Senate passed McFarland bill (S. 658) Feb. 5, but House apparently isn't in any hurry to move it. Despite Sen. McFarland's statement that FCC Chairman Coy is anxious to have bill passed, Rep. Crosser (D-O.), chairman of House Interstate & Foreign Commerce Committee, says he understands Commission still has plenty of objections to it. He also says he can't visualize bill going through House without hearing "since we have a lot of new members on our committee who would want to learn all about it." As passed by Senate, bill has 4 minor amendments offered by Sen. Francis Case (R-S. D.), who also gave this warning: "A body of law seems to have been growing up with reference to specific programs, rather than the overall program content of a given station. If this practice should continue . . . the Commission will have specifically approved or disapproved various specific types of programs notwithstanding the provision of the act, that 'No regulation or condition shall be promulgated or fixed by the Commission which shall interfere with the right of free speech by means of radio communication.' "

FCC's color decision is a "classic case for judicial non-intervention," Commission (plus Justice Dept. and CBS) told Supreme Court Feb. 5 when it asked court to affirm lower court's decision in FCC favor (Vol. 6:51). "It is elementary that in such circumstances, the Court will not substitute its judgment for that of an administrative agency," Commission said. To RCA's contention FCC failed to reopen hearing for its post-hearing progress report and Condon Report, FCC answered: "This may well have been because neither report contained anything which would have warranted such action." RCA and intervenors have 20 days to respond to this. Supreme Court action isn't expected before March 5.

Hearing on electromagnetic radiation bill (Vol. 7:2, 4) was set for Feb. 21 by Senate Interstate & Foreign Commerce Committee. Asking to appear, so far, are FCC, Air Force, NAB, RTMA, a few stations. Stations are fearful of too much military control, though they've received assurances from FCC Chairman Coy and Air Force communications chief Maj. Gen. F. L. Ankenbrandt.

Three more illegal TV stations, with miniscule powers (10 watts or so), have been found and closed down by FCC —none of them stature of Sylvania, which was fined $2500 for operating unlicensed outlet in Emporium, Pa. (Vol. 7:5). One was in Williamsport, Pa., other 2 in Texas, towns undisclosed, but said to be within rebroadcast range of commercial stations.

First annual volume of best scripts written especially for TV—*Best TV Plays of the Year*, edited by NBC-TV casting director Wm. I. Kaufman—will be published Feb. 15. Book also includes articles on acting and production by experts in the field.

I—CONSERVATION: TV LEADS THE WAY: Spark of hope for continued high TV production glows brightly -- thanks to ingenious materials-saving efforts.

RCA fanned it strongly last week when it released to entire industry the fruit of its critical materials conservation program (Vol. 7:6).

Philco applied a bellows this week when it demonstrated its finished product -- the "performance-conservation" set (Vol. 7:1-4,6) -- to govt. officials and newsmen, offered circuit diagrams and technical data to all comers.

Same or similar conservation techniques, it was noted, apply as well to radios, phonographs, tubes, installation materials.

Significance of events of last 2 weeks, obviously, is not who got there "fustest with the mostest," but fact that the tremendous know-how and multi-million dollar research facilities of electronics industry -- as exemplified by the leadership of 2 giants -- will be combined, and shared, for the sake of keeping plants humming until such time as military orders are industry's main business.

Entire conservation issue was summed up by Philco engineering-research v.p. Leslie J. Woods, when he said question is one "of survival of this industry...to keep our plants going and personnel together until we get enough defense orders."

* * * *

Other industries might do well, govt. mobilizers were heard to observe, to heed progress of TV-radio industry in its self-started campaign to save substantial quantities of critical materials without degrading quality of product.

John Daley, chief of NPA Electronic Products Div., among those attending demonstration, told us he was "very much impressed with the savings effected" in the Philco set. He said he was especially pleased with Philco's -- and RCA's -- "willingness to make their developments available to the entire industry."

Marvin Hobbs, director of Munitions Board Electronics Div., called Philco's achievements an "initial step in the right direction, which certainly is well warranted." He pointed out that military orders won't get into mass-production stage until late 1951 or early 1952 and further efforts -- especially in cutting down amount of scarce materials in electron tubes -- will be necessary.

II—CONSERVATION: PHILCO DEMONSTRATES: Philco's new TV receiver -- completely redesigned -- is an improved set, Mr. Woods told govt. brass and the press at separate showings in Washington's Hotel Statler, Feb. 14-15. The demonstrations certainly appeared to bear this out.

Two-year engineering program is climaxed in Philco's "new concept of design," Mr. Woods said, emphasizing that "most of the set is the result of direct planning prior to Korea and is in no respect a hurry-up, makeshift job."

New circuits eliminate use of cobalt entirely, reduce amount of aluminum by 68%, silicon steel (power and low frequency transformer cores) by 58%, ferrite (high frequency transformer cores) by 51%, copper by 26%, nickel by 15%.

Production of new set is scheduled to begin latter April in 17 & 20-inch

FEB 1 0

models, with all savings of material due to be in effect by end of June. Some of the conservation measures are already being realized in current production.

Cost of new set will probably be "approximately the same" as comparable current models, according to Mr. Woods. It's known that electrostatically-focused picture tube (Vol. 7:1,3-6), heart of the set, costs more to produce than current magnetically-focused tube because focusing components must be built into tube. Manpower requirements are about same.

"This is it" -- so far as Philco is concerned. For the present, at least, Philco has reached "irreducible minimum" in conservation progress, Mr. Woods said. "The big job has been done," he said. "Any further steps will be minor."

* * * *

New receiver is built around 3 major developments:

(1) New deflection circuits, using lower voltage and employing new Philco 6V3 damper tube, saving copper and ferrite by eliminating width and linearity coils.

(2) New power supply, employing 2 selenium rectifiers in voltage doubler circuit, eliminating power transformer with big saving in steel and copper (Vol. 7:3). Plate voltage has been cut from 320 to 250 volts. (Motorola, Emerson and others used transformerless voltage doubler power supplies several years ago.)

(3) Electrostatically-focused picture tube, eliminating need for cobalt or copper magnet in focus circuit.

Weight of set has been cut more than 12 lbs. -- from present 39 lbs. 10 oz. to 27 lbs. 8 oz. for new type chassis and picture tube assembly.

Built-in antenna is retained -- obviating fear this might be early casualty of any conservation program -- because sometimes it's the only antenna needed.

* * * *

There was nothing "austere" about looks or performance of new set at the Washington demonstrations.

Two 17-inch table models, one of the new type and one from current Philco production, were placed side-by-side, connected to same antenna at Statler Hotel in midtown Washington. From front of cabinet, they appeared identical.

On local reception (test pattern) there was no noticeable difference between performance of the 2 sets.

In simulated "fringe area" test -- reception of Baltimore station some 30 miles away -- contrast was somewhat better on new "performance-conservation" set.

Then line voltage was dropped to 90 volts, without readjustment of focus control. Picture on conventional set became fuzzy. Picture on the new type set remained in sharp focus. Mr. Woods called this the result of "self-compensating" nature of electrostatic focusing -- an advantage where line voltage fluctuates.

Field tests have proved Philco's new circuits "superior to existing designs under the most severe conditions," according to president Wm. Balderston -- reporting on "fringe area" tests conducted in Morrisville, Pa., across river from Trenton, N.J., where marginal signals are receivable on 10 channels and electrical interference from nearby industries is strong. He said:

"The new Philco chassis produces clear, sharp pictures and consistently outperforms all other TV receivers tested in this area of difficult reception."

III—CONSERVATION: HOW THEY DID IT: Many of the conservation steps taken by Philco are similar to those outlined by RCA in its Feb. 9 report on "Conservation of Critical Materials." Examples: shorter copper leads on tubular and mica capacitors; hookup wire size reduced from 22 to 24 gauge; aluminum cup on rear of picture tube replaced with fibre; brass reduced in control bushings; brass hardware and screws replaced by steel; electrostatic focusing; Alnico III (no cobalt) replacing Alnico V beam bender on CR tube.

Complete elimination of cobalt from set is accomplished through use of: (1) electrostatically-focused picture tube, and (2) electromagnetic speaker.

Most manufacturers have shied away from electromagnetic speaker as substitute for permanent magnet (24% cobalt) type. They have preferred to reduce size of

the magnets, cutting them by as much as two-thirds. This is principally because: (a) electromagnetic speaker requires circuit redesign, and (b) many speaker makers can't get copper, and some of them lack coil-winding equipment (Vol. 6:52).

But Philco says that, because it has eliminated power transformer, it can easily borrow the half-pound of copper required for speaker field and still realize vast copper saving -- at the same time emancipating itself from the cobalt blues.

Philco originally intended to use permanent magnet speaker in its new set, changed its mind as recently as a month ago. This is borne out by fact that early in January president Balderston told Chicago distributors convention new receiver would use 85% less cobalt than present models.

In view of ever-tightening cobalt restrictions (Vol. 6:52, 7:5), it's probable industry will reluctantly switch to electromagnetic speakers. A National Production Authority official told us it's a wise idea to end all dependence on cobalt because -- as he put it -- "cobalt is out of the picture."

* * * *

Highlights of material savings in new Philco chassis:

Aluminum, 0.563 lb. saved per receiver: Picture tube frame assembly straps replaced with fabric; amount of aluminum foil in electrolytic capacitors reduced by use of low-voltage power supply; one electrolytic eliminated by use of new CR tube.

Copper, 1.236 lb. saved: Power transformer removed, replaced with smaller filament transformer; wire in audio output transformer decreased "with special compensation to maintain sound quality;" width and linearity coils removed through use of new deflection circuit; horizontal output transformer coil reduced; ribbon-type ground and mounting straps replaced with wire.

Cadmium: "Non-strategic materials" used for plating wherever possible.

Ferrite, 0.529 lb.: Horizontal output transformer core reduced; deflection yoke core replaced with "non-critical" flake iron; width and linearity control cores removed -- new set using resistor type width control, no linearity control.

Silicon steel, 7.399 lbs.: Power transformer core reduced through use of voltage doubler power supply; output transformer core reduced.

Thus, on basis of 1950 production of 7,463,800 TVs (Vol. 7:6), if this type of conservation program had been used by the entire industry last year, these approximate savings would have been realized: copper, 4600 tons; silicon steel, 27,600 tons; cobalt, 440 tons; nickel, 224 tons; ferrite (20% nickel oxide), 2950 tons; aluminum, 2100 tons.

New-model phonograph, also announced by Philco, will result in these savings of scarce metals: Aluminum, 100% or 100,000 lbs. per 200,000 record changers; brass, 100% or 74,400 lbs. per 200,000 units; phosphor bronze, 100% or 600 lbs.; stainless steel, 50% or 9700 lbs.; zinc, 83.5% or 200,000 lbs.

COLOR SIMMERS IN COURTS & LABS: Color issue is quiescent -- except for little geysers of speeches and publicity which seem to have negligible impact on trade or public.

But it would be wise to gear for another big eruption sooner or later -- because there seems to be a veritable obsession, among a very powerful FCC clique, to put across the field-sequential system (CBS).

This despite war, the daily-more-obvious superiority of dot-sequential system (RCA, et al), and the total rejection of Commission decision by very nearly the entire electronics industry.

Much depends on Supreme Court and timing of its action. Aside from fact that every black-and-white set built is another hurdle for any incompatible system, more time gives chance for industry to wrap up compatible system into a package so impressive that FCC must inevitably institute new color hearings.

There's talk, even now, that Comr. Jones, probably Hyde, are willing to consider "dual standards" being plugged by RCA, despite Chairman Coy's flat rejection of idea (Vol. 7:3). Jones, you'll remember, was ardent multiple standards advocate early in hearing, when he thought that was only way CBS might be shoe-horned in.

But if Supreme Court rules in FCC favor, by March 5 or 12, you can expect

Commission to cut loose with every promotional means it commands. CBS will feel obliged to plump with all its might. And some manufacturers or advertisers, envisaging a fast buck or some publicity, may stir up some fuss -- though all the big set makers, now more concerned than ever with materials shortages and defense demands, are more adamant than ever against any incompatible system.

* * * *

Supreme Court's action and timing, as it affects implementation of FCC decision, is by no means predictable. Govt. lawyers are betting even money on whether it will simply affirm lower court or grant RCA & intervenors oral argument.

If argument is granted (only ½ to 1 hour per side, normally), it would probably be heard in latter April, with final decision near end of Court session -- late May or early June. Also, there's no way of knowing whether Court will lift ban on commercialization of CBS color (imposed by lower court until April 1) if case is still pending after that date.

Further, certain obviously partial govt. lawyers say decision of 3-judge court (Vol. 6:51) is so bad that Supreme Court may want to issue "spanking," remanding case back to lower court and saying, in effect: "What do you mean by sloughing this case off on us? It's your job to give a final decision." If that happens, final action may be shoved into nebulous future -- perhaps far into fall or winter.

What worries CBS proponents is not ultimate Court decision but delay. They have little doubt Court will affirm FCC's legal authority to make such decisions -- be they good or bad -- as did the Chicago court.

Midst of all these legalities, RCA and/or others may request and possibly get new hearing on recently-demonstrated improvements (Vol. 6:49-50) and still others as yet unrevealed. This would throw all time-element guessing out of whack.

Speculation about investigation by Senate Small Business Committee (Vol. 7:3) is dismissed by Chairman Sparkman (D-Ala.) who says: "We don't plan any intensive study -- hearings and the like -- but I have directed the staff to watch it. We don't have sufficient staff to go into it and we have lots of more pressing matters to cover."

* * * *

In addition to RCA, at least Hazeltine, Philco, DuMont and GE are doing intensive work on dot-sequential systems. We understand that Philco, particularly, has something hot and secret up its technical sleeve -- possibly new tri-color receiving or camera tube. NTSC's Ad Hoc color committee (Vol. 7:1) expects to complete "synthesis" of best in color systems by spring.

Finest "educational job" on color today is being accomplished by Hazeltine -- notably by its respected research v.p. Arthur V. Loughren. In a series of addresses to technical groups around country, he's talking kind of language FCC cannot ignore and still claim devotion to public interest. And it's the kind of language that Congressional committees generally don't ignore.

Loughren doesn't even mention compatibility, or use the terms "mechanical," or "small screen," etc. He sees no need for discoursing on those factors, though he doesn't minimize their importance. His theme:

Best color system, putting most information in narrowest possible band, making most efficient use of limited natural resource -- the radio spectrum -- is one that employs mixed highs, dot-interlace (or related method), constant-luminance, plus certain other techniques.

Apparatus difficulties, such as RCA's early 3-tube receivers, can't be ignored, Loughren readily admits. But he insists that apparatus problems always drop away -- as indeed they have -- if system is basically sound. "System capabilities, not apparatus, should provide the ceiling on performance," he maintains. He chides FCC, but not too roughly, for not looking beyond apparatus to the system, admits its job wasn't envious.

Loughren's latest talk, before Washington IRE Feb. 12, was heard by some 300-400 keenly interested technicians, including FCC's Comr. Sterling, chief TV engineer Cyril Braum, asst. lab chief Willmar Roberts.

Course in color, for licensees, starts March 5 at Hazeltine. About 60 licensees have already signed up for 2-week, 20-session series.

Industry has good reason to regret Hazeltine didn't appear during color hearing. But if and when FCC goes into hearings again, it would seem to be better part of strategy to have Loughren on tap.

Pure science isn't Hazeltine's only motive in its efforts -- and no one pretends that it is -- since company has claim to important patents involved. It is cross-licensed, though competitive, with RCA, et al -- and, presumably, that will "taint" Hazeltine in some Commission eyes.

* * * *

Meanwhile, CBS is still trying -- in speeches and well-publicized demonstrations. President Frank Stanton this week told San Francisco Electric Club that movies are shifting heavily to color, that "costs in TV will be so tremendous in the future that advertisers may not be as attracted to TV without color." CBS also showed color this week to Lehigh Valley IRE section in Reading, Pa.

CBS's suit against DuMont, alleging patent infringement in industrial color equipment (Vol. 7:4), was answered by DuMont. Latter refuted everything, said all CBS wants to do is to gain publicity, injure DuMont, discredit ex-CBS engineer G. R. Tingley, now with DuMont.

Another tri-color tube popped into news this week, when Dr. Irving Rehman, U of Southern California X-ray expert and anatomist, was reported by AP as having developed one with cooperation of Singer TV Mfg. Co., Los Angeles. Firm, so far as we know, doesn't make TV receivers. Dispatch says tube has color phosphor disc rotating inside tube, that picture is projected, that it's best for CBS system but can also be adapted for RCA's.

MORE MOVIEGOING DESPITE TV THREAT: TV gets much of the blame for declining movie attendance -- but gloom among moviemen is giving way to new feeling of optimism already reflected in upsurge in film company shares on the exchanges.

That's because boxoffice, in recent weeks, has begun to creep up from disturbing lows of last few years.

Not only that: Moviemen see TV held down for quite some time -- due to receiver production cutbacks forced by defense mobilization, FCC freeze keeping new stations off air for several more years at least (Vol. 7:5), continuance of color imbroglio, possible snafus over vhf-uhf allocations, etc. All these in addition to claim that "novelty of TV is wearing off."

The TV spectre has been halted -- or is about to be -- in its meteoric stride. At least, so they say -- though without yet producing supporting statistics.

Recent attendance figures betoken possibility that lush boxoffices of World War II days may be on way back. Trend certainly is similar: war economy, inflation, growing military camps, all conducing to more spending for entertainment.

But 1950 boxoffice was down quite a bit. Audience Research Inc. (Gallup) estimates year's average weekly attendance was 57,000,000, compared to 62,000,000 in 1949 and 80,500,000 in peak 1946.

Wall Street Journal's recent 10-city survey noted these 1950 declines from 1949: New York 15%, Chicago 25%, Philadelphia 33 1/3%, Cleveland 25-40%, Detroit 34-40%, Southwest 10-15%. Disgruntled exhibitor was quoted as placing blame thus: "There are too many TV sets in people's living rooms."

Most commonly heard reasons for improvement, says Journal: "A few more top-notch pictures, TV's novelty wearing off, more people with jobs, bigger paychecks." In addition, some exhibitors believe stiffer credit regulations, cutting installment buying, are shunting money to entertainment. And many individual theatres are benefiting from shutdowns of marginal houses -- an estimated 600 closing down last year.

* * * *

Upsurge is lending zest to promotional campaigns in which movie industry is really beating the bushes. For example, quite aside from using more TV-radio advertising to plug individual pictures (see Station Accounts):

They're also enlisting hotels, restaurants, bowling alleys, even clothing stores and transportation utilities in national ad campaign whose theme is "get 'em out of the house." This was urged upon exhibitors by Arthur L. Mayer, executive v.p. of Council of Motion Pictures Organizations (COMPO), who in recent letter said newspapers should also be interested -- not only for increased revenue from concomitant advertising but because TV is their competition, too.

COMPO has reported agreements with 80 candy, soft drink and equipment companies to plug "go to the movies" theme in their newspaper, radio, TV advertising. It noted most of them benefit from sales in theatre lobbies, etc.

All motion pictures in color was urged recently by Gael Sullivan, head of Theatre Owners of America, as a means of combating TV inroads. He also plumped for 3-dimensional pictures and theatre-TV.

Point made for third dimension is that, if feasible, it would make all flat-screen projections (movie or TV) literally "flat" by comparison. A major company in this field is Cinerama Inc., controlled by same interests as Reeves Soundcraft, which also manufactures TV equipment (TV Factbook No. 12).

* * * *

Theatre-TV is still white hope of exhibitors. Get public in to see exclusives, is main idea of theatre-TV enthusiasts.

Latest big news about theatre-TV is agreement of 20th Century-Fox with Swiss Federal Institute of Technology covering latter's Eidophore system of large-screen video (Vol. 1:13). It's reported 20th Century will provide funds for the continued development of 12-year-old system using arc light and liquid-filled magnifier, in exchange for exclusive commercial rights on royalty basis.

But system apparently is far from finished. Spyros Skouras is quoted in Feb. 11 New York Times:

"For purely technical reasons, from 18 months to 2 years must pass before we can be in full swing...It is not impossible that ultimately home TV will also benefit, but that is not foreseen in the immediate future."

Swiss system may be used in 24-theatre Fox hookup on West Coast, according to trade reports (Vol. 6:17).

* * * *

RCA offered reduction, not so long ago, in $25,000 price of its theatre-TV installations if it gets enough orders to permit mass-production. Negotiations with TOA are in progress, and it's understood enough firm orders may be written soon to permit reduction to $15,000. At moment, only about 15 houses in U.S. have such systems installed and operating.

Theatre-TV proponents have high hopes FCC will soon fix date for hearing on their request for frequencies (Vol. 6:29). There's some talk among engineers that system might work all right on common carrier frequencies, without need for any exclusive frequencies.

* * * *

Possible source of conflict among motion picture people -- only in talk stage yet -- is fact that divorcement of producer-exhibitor interests forced by Govt. may turn former to rentals to TV as source of income. On other hand, there's inescapable fact mere 107 stations in only 63 areas are presently operating, and freeze stays on; there's Petrillo; there's theatre-TV as threat from exhibitors.

Nobody seriously thinks producers, in near future at least, will seek deliberately to alienate their main source of rentals, the movie house. At any rate, the big producers continue to keep their run-out pictures in vaults, albeit they too would like to get even the limited revenues TV rentals might bring in.

CIVIL DEFENSE EFFORTS STIRRING: Communications aspects of civil defense, like most other facets, are again primarily state and municipal responsibilities -- as in World War II. Frequency assignments, of course, are under FCC control.

Many states have made good progress, while still-forming Civil Defense Administration only recently got a boss (former Florida Gov. Millard F. Caldwell) and has yet to get appropriation from Congress.

On technical side, only TV-radio station participation planned is broadcasting alerts or in maintaining "radio silence" if necessary. CDA, along with FCC and Air Force, is also studying stations' "homing" value to enemy aircraft.

States and cities are expected to supply own communications equipment (mobile, walkie-talkie, etc.), but CDA hopes to get funds to buy gear for a few critical "target" cities, is asking NPA to give it same priority as military.

Amateurs are being counted on. Characteristically, they're straining at leash to assist. Presumably, CDA would go to bat for them for spare parts, etc.

On programming side, CDA plans to feed TV-radio material to stations when it gets funds. Stations are offering all kinds of facilities for CDA's use.

Heading up technical side is Robert Burton, who did same job in last war, worked for Voice of America since. Top man in program field is Jesse Butcher, veteran of networks, stations, ad agencies, USO radio activities. A top figure in CDA is Clem J. Randau, named executive director this week -- third in command. He's former United Press business v.p., director of Marshall Field stations, president of Wichita's KFBI. Currently, he's stockholder and a director of New York's WNEW and co-publisher of weekly New Milford (Conn.) Times.

Station Accounts: Radio Daily reports major movie firms turning more to radio and TV—"as a stimulant to sagging boxoffice returns"—with Columbia Pictures planning big TV spot schedule for upcoming new film *Valentino;* Paramount using TV for buildup of *Molly,* soon to be released, based on CBS-TV show *The Goldbergs;* Paramount also planning TV-radio campaigns for *Mating Season, The Lemon-Drop Kid, Appointment with Danger;* United Artists using trailers from *Cyrano de Bergerac;* RKO's *Cry Danger* and *His Kind of Woman* due for heavy TV spot promotion next month . . . Chase National Bank first sponsor reported signing for *March of Time Through the Years,* films, starting Feb. 23 on WJZ-TV, New York, Fri. 10-10:30, other times on WENR-TV, Chicago, and WXYZ-TV, Detroit, thru Hewitt, Ogilvy, Benson & Mather, N. Y. . . . Celanese Corp. of America March 2 starts new *Wendie Barrie* show on WJZ-TV, Fri. 8:15-8:30, thru Ellington & Co. . . . National Shoes Inc. (women's shoe store chain) Feb. 18 starts *Time for Adventure,* children's stories, on WNBT, New York, Sun. 10-10:30 a.m., thru Emil Mogul Co. . . . Weston Electric Instrument Co., Newark, latest to plan using TV to recruit personnel (Vol. 7:5-6), thru United Adv., N. Y. . . . Kellogg Co. reported to have purchased 26 *Wild Bill Hickok* pictures to be produced by Wm. Broidy, to be placed thru Leo Burnett Co., Chicago . . . Forest Lawn Cemetery in Los Angeles is financing production of thirteen 30-min. films on inter-denominational Biblical subjects, each costing about $15,000 and shot by Crusader Films, with plugs for own local placements but open-ended for syndication to other cities thru Ziv . . . Among other advertisers currently reported using or preparing to use TV: Crescent Chemical Co. (Gre-Sol), thru Hal Stebbins Co., Los Angeles; Meyenberg Milk Products Co. (condensed milk), thru Mayers Co., Los Angeles; P. Lorillard Co. (Muriel cigars), thru Lennen & Mitchell, N. Y.; Marlene's Inc. (hair waving shampoo), thru O'Neill, Larson & McMahon, Chicago; All-American Airlines, thru Buchanan & Co., N. Y.; Mars Television Inc. (TV receivers), thru Moselle & Eisen, N. Y.; Borden Co. (Hemo beverage), thru Duane Jones Co., N. Y.; Bank of America, thru Chas. R. Stuart Adv., San Francisco; Gibson-Hohmans Co. (calking), thru Gregory & House, Cleveland; Donna Lo Co., St. Louis (permanent wave shampoo), thru Olian Adv., St. Louis; Rockwood & Co. (candy), thru Platt-Forbes, N. Y.; Coffee Time Products Inc., Boston (carbonated coffee drink), thru Harry Paul & Associates, Boston; Air France, thru J. M. Mathes, N. Y.; Bovril of America Inc., thru Victor A. Bennett, N. Y.; Frank Bownes Co. (Modern Paints), thru Harry M. Frost Co., Boston.

Network Accounts: America for Christ Inc., non-profit organization of Christian laymen under guidance of Methodist Church's board of evangelism, March 5 starts *Circuit Rider* on ABC-TV, Mon. 11-11:30 p.m., thru Turner & Dyson, N. Y. . . . Lutheran Laymen's League Feb. 25 will present another special religious program on ABC-TV, *Bringing Christ to the Nation,* Sun. 4-4:30, thru Gotham Adv. Co., N. Y. . . . Corn Products Refining Co. (Linit starch) March 1 starts sponsorship of Thu. 1:45-2 segment of *Garry Moore Show* on CBS-TV, thru C. L. Miller Co., N. Y. . . . Next of Coca-Cola's *Edgar Bergen-Charlie McCarthy* shows on CBS-TV will be April 27, Fri. 9:30-10, thru D'Arcy Adv. Co., N. Y. . . . Bea Lillie March 18 replaces Bob Hope one-time on Frigidaire's *Star Spangled Revue* on NBC-TV, Sun. 8-9 . . . Pall Mall Cigarettes March 9 moves *Big Story* on NBC-TV, from alt. Fri. 9:30-10 to Fri. 9-9:30, thru Sullivan, Stauffer, Colwell & Bayles.

Personal Notes: Lester Gottlieb, CBS radio and TV producer, named director of network radio programs originating in New York, succeeding Robert Heller, resigned . . . Paul McCluer quits March 1 as NBC Central Div. radio sales mgr. to become asst. gen. mgr., Wade Adv., Chicago . . . Eugene S. Thomas, WOR-TV operations mgr., named chairman of program committee for St. Louis convention of Advertising Federation of America, June 10-13 . . . Edward Bleier, DuMont Network program service coordinator, recalled to Army duty . . . John F. Noone, ex-Meredith Publishing Co., appointed sales director of WPIX, New York . . . Robert Lambe, ex-WFMY-TV, Greensboro, N. C., named gen. sales mgr., WTAR & WTAR-TV, Norfolk . . . Julian Kaufman promoted to commercial mgr., KPHO-TV, Phoenix . . . Jack W. Rogers appointed regional sales mgr., WBAP & WBAP-TV, Ft. Worth, succeeding Jack Holmes, now with Ziv; Thaine Engle promoted to promotion chief . . . Eric Harris, TV recording technician, promoted to supervisor of special effects of CBS-TV, replacing John DeMott, now with Wm. Esty Co. . . . Everard E. Meade, TV-radio v.p., Young & Rubicam, with staff have taken over duties of Roland Gillett, resigned . . . Arnold Olin Leads resigns as TV director, Moss Associates, his duties being taken over by Joseph Moss . . . Earl G. Thomas named TV-radio v.p., Bennett, Walther & Meanadier Inc., N. Y. . . . Leslie G. Arries Jr. promoted to asst. to C. G. Alexander, DuMont program production dept. director.

Frank B. Scott, member of Congress who helped frame original Radio Act of 1926, later a prominent Washington radio attorney, died Feb. 12 in Palm Beach. Funeral was held Feb. 16 at his home in Alpena, Mich.

Trade Report
February 17, 1951

RTMA COMMAND MOBILIZES FOR CRISIS: TV-radio industry ready and willing to do Uncle Sam's bidding this week faced up to paradox of (a) continued high production, and (b) not-so-high military orders, even as (c) more and more restrictions were being imposed on critically needed raw materials.

How to correlate these problems was main preoccupation of RTMA committees, divisions, board, et al, at this week's annual midwinter conferences in Chicago. These were the general conclusions:

(1) Civilian production must be maintained, as much for need to keep vital "electronics army" mobilized, ready for any eventuality, as for selfish interests of this big segment of the business economy.

(2) Military orders, as presently envisaged in Washington, aren't enough to "take up the slack" between lessening civilian output and military production (Vol. 7:3). All TV-radio firms face rough going, some even may have to go out of business -- no one can entirely escape the shoals ahead.

(3) Individual companies must go to Washington to slug it out for themselves for more materials, relief from restrictions, govt. orders. RTMA can't do it for them. All RTMA can do is keep membership advised, through committees dig up facts and figures to aid them, and of course work on legislation.

* * * *

To accomplish first objective, in addition to conservation and substitution programs already launched, RTMA board authorized general expansion with larger staff, possibly own building, new paid president. Appointed to job, due to take over on or about April 1, was Glen McDaniel, RCA v.p., attorney, wartime Navy radio contract officer (Vol. 7:2). He succeeds Robert Sprague, who remains chairman.

To keep pace with military orders problems, RTMA will set up new supreme Policy Committee to operate as sort of industry "high command." It's set up to be more functional than Joint Electronics Industry Committee (Fred Lack & Robert Tait, co-chairmen), whose job is too high-level for detail work, and superior to Electronic Parts Mobilization Committee (A. D. Plamondon & Robert Laux, co-chairmen).

New Policy Committee is headed by McDaniel, includes Benjamin Abrams, Emerson; Dr. W. R. G. Baker, GE; Paul V. Galvin, Motorola; L. F. Hardy, Philco; Leslie F. Muter, Muter Co.; A. D. Plamondon Jr., Indiana Steel Products; Robert C. Tait, Stromberg; R. G. Zender, Lenz. RTMA chairman Sprague is ex-officio member.

First job will be to correlate all information on conservation and substitution measures, disseminate data to industry and to proper govt. officials. For example, it will take metals survey already made by Plamondon-Laux group, and decide how to use it, what govt. agency to contact, etc. As yet unreleased survey shows amounts of scarce metals used by industry in 1950, compared with total supply.

* * * *

Industry leaders agreed they're "living off fat" in current outpouring of TVs, foresee diminution of supplies certain by second quarter, real hardships third and fourth quarters. In view of material savings successes of RCA & Philco, remarks of one components maker were revealing:

"TV-radio has been profligate in its production processes for a long time. Plenty of savings are possible, not only in materials but also through tightening up of production techniques. But maybe it has all been for the best; the profligacy of the industry gives it the leeway to save now when it's needed."

RTMA will "aggressively" oppose proposed 25% excise tax (Vol. 7:6), basing case on "equity," stressing importance to defense and economy that no more roadblocks be put in TV's way, pointing to station freeze, shortages, etc. as obstacles already faced. New Tax Committee was named, headed by RCA's A. M. Freeman.

GOVT. CONCERN FOR SMALL BUSINESS: "Small business" has become sacred phrase at all defense mobilization agencies -- ever since Senate Small Business Committee accused National Production Authority of ignoring fact that material shortages threaten "large segment of American small business" with bankruptcy (Vol. 7:5).

NPA acknowledges that many small firms are finding it difficult to get materials necessary to stay in business without military orders. So, Defense Production Administration is getting ready to do something about it. For example:

Reward to prime contractors as incentive for increased subcontracting is one proposal being considered. Plan would place responsibility for subcontracting squarely on prime contractors, giving them more liberal allowances for "getting the business out" when their contracts are renegotiated.

Increased use of competitive bidding -- rather than negotiated contracts -- is another method being explored. Competitive bidding would be official govt. policy in cases where items involved are "standard."

Further evidencing Govt.'s concern for small business, DPA Administrator Harrison Feb. 16 appointed John C. Pritchard, Denver businessman, as Special Asst. for Small Business. Last week, Pritchard was named director of NPA's Office of Small Business (Vol. 7:6). He will serve in both posts.

NO TAX-BUYING SPURT, TRADE 'NORMAL': Maybe we called the shots a bit too quickly, putting too much emphasis on headline news from Washington, in reporting (Vol. 7:6) immediate effect of proposed 25% factory excise tax would be to stimulate set sales.

Some markets felt upsurge, to be sure, but it would be wrong to imply any tidal wave of business is resulting. Even in Washington, strong TV market, the news caused only slight buying flurry -- nothing comparable to that which resulted just before 10% factory excise went into effect last Nov. 1.

TV-radio business can best be described as good, by and large -- "normal," as some prefer to describe it. There's plenty of merchandise, more is piling up, but it continues to move to the public at satisfactory pace. That, at least, is condition among name-brand manufacturers and distributors we contacted this week.

* * * *

The 25% excise is long way off, probably well into summer, since Congress wants to review whole tax structure. Public apparently is wise to that fact. At any rate, threat of excise is not an important sales-impetus now, we're told, and many don't want to use it as an advertising come-on for fear of being accused of lack of patriotism. For, after all, Treasury proposes tax -- and tighter credit controls are threatened -- to discourage buying as one way to curb inflation.

There are some really bad trade spots. Los Angeles, for example, is in throes of price-cutting siege and special deals -- sales reported by Retailing Daily to be off 50-60% from last July-September peak. Situation is aggravated by spectre of county inventory tax, due March 28, and stocks held are reported to be 150-200% more than last year at this time.

In New York, January TV retail sales were reported by New York Times as up 10-25% over same month last year, 27-store Davega chain reporting sharp upturn currently due (a) partly to "rush" to beat possible excise hike, and (b) partly to liberal trade-in allowances on old sets, which enjoy "substantial and lively market among consumers whose income precluded purchases of higher priced new models."

* * * *

Factories meanwhile continue to turn out TVs and radios at amazing clip. RTMA first February week figures (actually, week ending Feb. 2) showed 167,315 TVs (4073 of them private brand) plus 322,855 radios (209,955 home, 100,944 auto, 11,956 portable). This compares with fourth January week's 176,860 TVs, 344,216 radios; third's 188,758 & 342,586; second's 167,859 & 338,528; first's 105,699 & 209,792.

First February week's drop was notably small, when you take into account Philco's stoppage 3 days that week, Admiral's 2-day shutdown, GE's one-day, due to rail strike (Vol. 7:5). Previously unreported, also, was fact that week before RCA plants in Indianapolis & Bloomington, Ind., lost day each due to storm.

Topics & Trends of TV Trade: Dislocations may occur here and there—but enough parts are available to keep all the nation's 11,000,000-plus TV sets operating. So say the manufacturers, who are pledged to turn out proportionate amount of replacement parts for every set they produce, and intend to continue doing so.

Shortages, their service executives say, usually reveal that servicemen aren't contacting local distributors. They usually buy from jobbers, and many seem unaware they can get parts from franchised wholesalers.

DO's from local military posts, in a few instances, have temporarily diminished local parts stocks (Vol. 6:50), but directives have gone out from manufacturers that this type of order henceforth should be filled by air freight from factory whenever feasible.

To show good intent, RTMA Service Committee got together with National Better Business Bureau officials during Chicago RTMA conferences this week, agreed to work with BBB whenever parts situation arouses beefs from local set owners. Modus operandi will be worked out at Feb. 27 meeting in Chicago with RTMA subcommittee comprising: A. T. Alexander, Motorola, chairman; Frank Smolek, Zenith; N. J. Cooper, Hallicrafters; L. E. Priscal, Sentinel.

RTMA Service Committee got $15,000 budget to promote TV-radio servicing courses in secondary and vocational schools. Need for servicemen is acute, says chairman E. W. Merriam, DuMont, not only because of military drains but because TV production has outstripped concurrent increase in needed technicians.

* * * *

Community antenna successes (Vol. 7:2) have precipitated flood of inquiries, Philco and Jerrold Electronics report. For example: Philco says president of Sacramento Chamber of Commerce flew to Philadelphia expressly to investigate system's possibilities for his city; and WBOC-FM, Salisbury, Md., losing money, was willing to go off air if necessary (it wasn't) to place community antenna on its tower. Jerrold has now tailored system specifically for community service; formerly, it was same gear used for apartments. New equipment features maximum gain of 7000 instead of previous 500, conversion of high channels (Nos. 7-13) to low (Nos. 2-6) to reduce line losses, plus use of RG/59U cable instead of scarcer RG/11U which costs 3 times as much. In addition to distribution, Philco is assisting Jerrold in design work, procurement of tubes and other materials. One Philco distributor foresees "struggle for power" in acquiring rights to install community antennas. He says: "We're trying to land some deals, but Philco and Jerrold each claim national distribution. Installations could be nice plum, but there are lots of bugs—including advance survey ($2000, only ½ recoverable) and acquisition of rights to utility poles."

* * * *

Majestic introduced new line of 19 models at Jan. 15 distributors convention in New York where it revealed 15% of its present production is already on govt. contracts. Only 3 models are tables: Model 70, 17-in. leatherette, $239.95; 72, same, mahogany, $289.95; 73, same, blonde, $299.95. Others, all consoles, all mahogany unless otherwise specified, are (prices include excise tax):

17-in.: 712, plastic front, $299.95; 700, $329.95; 701, blonde, $339.95; 1710, doors, $359.95; 715, maple, doors, $369.95; 717, blonde, $379.95; 1720, doors, $389.95; 1721, blonde, doors, $409.95; 7PR12, AM-FM-phono, doors, $489.95; 7PR13, blonde, AM-FM-phono, doors, $509.95.

19-in. (all with doors): 902, $469.95; 903, blonde, $499.95; 9P4, phono, $539.95; 9P5, blonde, phono, $569.95; 9PR8, AM-FM-phono, $599.95; 9PR9, blonde, AM-FM-phono, $629.95.

Opposition to hiked TV-radio excise tax proposed by Administration (Vol. 7:6), to be heard March 7-15 by House Ways & Means Committee, includes following who filed appearances by Feb. 15 deadline: RTMA (Glen McDaniel, Robert Sprague or F. Cleveland Hedrick, possible Admiral witness), NAB (Ralph Hardy), Florida Assn. of Broadcasters (Garland Powell), WIOD, Miami (James Legate), possibly United Electrical, Radio & Machine Workers (Russ Nixon). Also scheduled to be heard on excise is Capitol Records (Glen Wallichs). Protesting admissions tax on radio & TV shows will be League of N. Y. Theatres (James Reilly).

Greatest shortages at moment, according to corridor conversation at RTMA Chicago meetings this week, seem to be loudspeakers, transformers, receiving tubes—and talk naturally drifted to how to get DO's and relief from NPA. Parts makers are mainly concerned over critical metals, although some wire and resistor makers seemed fairly smug about situation inasmuch as they're selling to producers with military orders, to military services for stockpiling, and to non-radio producers such as electrical equipment firms, power and telephone-telegraph companies, etc.

Shun the word "substitution" when showing customers new conservation sets. That was advice of RCA Victor consumer products v.p. Joseph Elliott, speaking to dealers and distributors Feb. 15 at TV Town Meeting in Cleveland. He warned that inferior quality is presumed automatically, by average customer, when he hears any mention of substitutions—yet changes may even make better sets. Citing conservation measures, such as those accomplished by RCA and Philco, he ventured that "a surprising quantity" of sets would be produced this year despite shortages of critical materials.

Mexico has ended ban on imports of radios, phonographs, radio-phonos and TVs with radio or phono, effective Jan. 20. Import duty on TVs has been raised. List of new import duties on these and some 400 other commodity classifications, including washing machines, records, irons and stoves, is available for 45¢ from Office of International Trade, Department of Commerce, Washington 25, D. C., or from Commerce Dept. field offices.

* * * *

Sports-minded TV manufacturers, who know sports telecasts are prime inducements to set sales, breathed sighs of relief at Chicago RTMA meeting this week when they learned 1951 baseball season was going to be broadcast and telecast. Manufacturers decided to develop program to aid dealers in promoting interest in local games—also in observance of anniversaries being celebrated by major and minor leagues. To help in campaign, this subcommittee was appointed: Dan Halpin, RCA; Fred Lyman, DuMont; V. C. Havens, Crosley. Committee heard that more than 1000 radio and TV stations were covering baseball this season—several hundred more than last year.

Petitions in bankruptcy have been filed in New York Federal district court by Vidcraft Television Corp., and in Los Angeles Federal district court by Richmond Television Corp.—former proposing to pay general credits 100%, payable 4% cash and rest in monthly installments of 3%; latter proposing to pay labor and tax claims in full, all other unsecured claims in full with interest-bearing notes.

Cadillac Electronics Corp. is name of latest venture of I. R. Ross, ex-Atwater, ex-Major, and other companies. He's president of new firm, which announces it will market line of TVs nationally. Address: 3 W. 61st St., New York.

Next meeting of RTMA board will be April 12-13 at Seaview Country Club, Absecon, N. J., at which board of RMA of Canada will be guest.

Mobilization Notes: NPA's Electronic Products Div., headed by John Daley, is proceeding with its organizational work. There are now only 20 people on staff—but more than 60 expected by April 1. Two section chiefs have been appointed:

Tube Section—Louis H. Niemann, Sylvania sales engineering manager on leave, who joined division this week.

End Product Section—J. A. Milling, RCA Service Co. v.p. on leave.

Mr. Daley plans to divide division into 12 sections, each representing subdivision of electronics industry. He has invited industry to form two 12-member advisory committees—an Electronic End Products Industry Advisory Committee and an Electronic Components Industry Advisory Committee. Combined, the 24-man group will function as Electronics Industry Advisory Committee.

Seven other 6-man advisory committees will be formed from industry to advise each section of the division.

Division hopes to get staff member from ranks of labor. Ten union representatives are due to join NPA divisions, including Electronic Products Div. Union men who have been selected are those with broad knowledge of industry, and will serve not as special labor consultants but as regular staff members, with same duties as other staffers, an NPA spokesman stressed.

* * * *

DPA appointed Charles E. Wampler, AT&T asst. v.p. for operations & engineering, as Director of Program & Requirements this week. Economic Stabilization Agency made these appointments: Nathan Colwell, in charge of Treasury's TV-radio bond promotion, to similar job on Eric Johnston's staff; former Massachusetts Congressman Joseph Casey, chief legislative counsel; Ernest Heilmann, ex-OPA radio branch chief, acting director of OPS Consumer Durable Goods Div.; Charles M. Gilbert, ex-Simon Distributing Corp., Baltimore & Washington (Motorola TV-radio, GE appliances), onetime OPA Consumer Durables Div., to OPS home furnishings branch; B. Bion Howard, Northwestern U economist, loaned to OPS Consumer Durable Goods Div.

Col. Harry L. Vitzthum, ex-commanding officer of Signal Depot, Sacramento, Cal., has been named Assistant Chief of Signal Corps Procurement & Distribution, succeeding Brig. Gen. E. V. Elder, new div. chief (Vol. 7:5).

* * * *

To avoid raw film shortage this year, NPA Motion Picture Div. Director Nathan D. Golden Feb. 14 warned movie industry that consumption of film stock must be cut 5-10%. He said TV's use of film—which has reached 5% of total output—together with Defense Dept.'s need for 6%, State Dept.'s requirement of 2%, add up to shortage risk. Earlier in week, DuPont rescinded planned 25% cutback in raw film production (Vol. 7:6). Decision to cut X-ray film output rather than movie film followed meeting of duPont officials with Golden and Motion Picture Assn. v.p. Joyce O'Hara.

War of ideas was recognized as important part of defense effort this week when National Production Authority authorized DO (defense priority) ratings for acquisition of radio and electronics, motion picture and press equipment and materials needed to maintain and expand *Voice of America* (NPA Delegation No. 8).

To bring subcontractors and contractors together, Air Materiel Command's New York Procurement Field Office, 67 Broad St., beginning Feb. 19 will sponsor one-week exhibit by 27 manufacturers having total of more than 300 Air Force contracts valued at $250,000,000. Manufacturers will display parts and equipment they need from subcontractors, and their representatives will be present to discuss specifications with prospective suppliers.

Financial & Trade Notes: RCA financial report for 1950, due to be released Feb. 27, is expected to show gross income well over $600,000,000. Consolidated sales for first 9 months of 1950 were $395,741,391 (Vol. 6:43), compared with $275,673,666 for same 1949 period and $397,259,020 for whole of 1949 (Vol. 6:8).

Webster-Chicago sales in 1950 were $19,300,000 vs. $11,250,000 in 1949, executive v.p. Charles P. Cushway told Society of Security Analysts luncheon in Chicago Feb. 14. He said $1,000,000 of $1,300,000 realized from recent stock distribution (Vol. 6:51) has been earmarked for building program, and company is negotiating for 25 acres near Chicago as site of 250,000 sq. ft. one-story building to replace present plant. Firm was reported to have $2,500,000 in govt. contracts and expects new $1,500,000 contract soon —mainly involving multiple-channel magnetic recorders for Air Force and Atomic Energy Commission. Goal is $10,000,000 in govt. contracts this year.

Strong position of electronics firms in peace or war is pointed up in reports by Shearson, Hammill & Co., New York, and Dean Witter & Co., New York; also in report on Sylvania by Paine, Webber, Jackson & Curtis, New York. Reports make these points: (1) Electronics has become vastly more important to military program since last war. (2) TV's enormous potential assures postwar prosperity.

Avco's common stock outstanding increased to 8,615,649 shares as of Feb. 1, compared with 8,231,236 as of Nov. 30, 1950, according to report to SEC. Increase of 366,614 shares resulted from acquisition of Bendix Home Appliances, 37,311 shares from conversion of preferred stock, 900 from exercise of options.

Trade Personals: Frank Freimann, Magnavox president, elected member of RTMA board, succeeding Richard A. O'Connor, now Magnavox chairman . . . Harry D. Hanafus appointed purchasing agent of Westinghouse's newly formed Electronic Tube Div., headquartering at lamp plant in Bloomfield, N. J., where he has been asst. purchasing agent since 1945 . . . Wm. Garstang, ex-Midwest sales mgr., Belmont-Raytheon, appointed contracts coordinator for technical products . . . Edward L. Mayer, ex-Atwater Television Corp., has organized Television Supply Corp., 334 Furman St., Brooklyn, dealing in components . . . Carl Holys, ex-Motorola, now factory mgr., Wilcox-Gay, Charlotte, Mich., succeeding E. E. Chapman, now with Grand Rapids Store Equipment Co.; Donald Sexsmith, ex-asst. to executive v.p. G. F. Langford, named asst. to Mr. Holys and Ed Morey named director of recording dept. sales under Milton Benjamin . . . George Krakora named personnel director, Stewart-Warner TV-radio div. . . . RCA Tube Dept. promotes W. L. Rothenberger from asst. gen. sales mgr. to mgr. of sales operations, L. J. Battaglia to mgr. of renewal sales field force, L. F. Holleran to mgr. of sales administration, Howard S. Gwynne to asst. to gen. sales mgr. L. S. Thees . . . Julius Haber, adv.-sales promotion director for all RCA technical products, named acting adv.-public relations mgr. of Tube Dept., with Lawrence LeKashman as aide . . . Robert McQuiston heads new RCA Victor Specialized Employment Div., set up to recruit experienced engineers . . . John S. Mills, who resigned as Tele-tone sales v.p. in 1949 to become president of its subsidiary Rico Television Corp. of Puerto Rico, later merged, has returned to Tele-tone as v.p. in charge of production . . . Henry Fogel, ex-Tele-tone chief engineer, ex-Electromatic gen. mgr., named executive v.p., McMurdo Silver Co., 417 Lafayette St., N. Y. . . . Henry van Rensselaer, sales mgr., DuMont Electronics Parts Div., recalled to duty as an Air Force major . . . James Richard Oberly, ex-Pope & Ballard, joins Admiral as asst. gen. counsel under v.p. Frank Uriell.

Telecasting Notes: Another voice added to chorus of protest against mounting time and talent costs is that of Howard O. Hildreth, Mohawk Carpet Mills ad mgr. (*Mohawk Showroom*, NBC-TV), who told Syracuse Ad Club that costs "may force TV to topple of its own weight"—echoing views of Kudner's James H. S. Ellis (Vol. 7:2-4). Hildreth sees solution in lifting of freeze on new stations, thus removing heavy burdens from present oversold stations, forcing costs down . . . CBS and KTTV formally part company April 1, when KTSL (purchased from Don Lee estate) becomes exclusive Los Angeles TV outlet for that network, adding some 22 hours to present KTSL schedule. Presumably, deferred change in KTSL call letters, to KNX-TV, will then be effected . . . Complaints of radio affiliates have led CBS program dept. to instruct its New York and Hollywood directors to "play down" plugs of TV shows on AM network programs, particularly sustainers . . . Wayne Cody takes his famed 28-year-old Gimbel-sponsored *Uncle Wip* program off Philadelphia's WIP (AM) Feb. 19, starts Mon.-Wed.-Fri. 5:30-5:45 version on WFIL-TV, same sponsor . . . Los Angeles Angels home baseball games purchased by KLAC-TV for reported $60,000, and it's now believed Hollywood Stars will cut its $150,000 asking price . . . KLAC-TV taking over Beverly Hills Music Hall, movie house, for production and audience shows . . . Born of TV-stimulated interest in wrestling, new magazine, *Official Wrestling*, with Gene Tunney as chairman, due on stands next month, guaranteeing 200,000 circulation, getting free plugs on TV wrestling shows . . . WJZ-TV extended daytime schedule with half-hour *Ladies Daily*, which started Feb. 12, Mon. thru Fri. 11-11:30; it's designed as participating show in women's magazine style . . . Unique show idea on KPIX, San Francisco, is *KMA 438*, which is local police dept. radio call; inspectors Mon. 7:30 take citizens backstage to show how police work on everything from traffic to serious crime . . . Among awards of National Conference of Christians and Jews this week, DuMont Network's *Captain Video* got the TV accolade . . . John Cameron Swayze, of NBC-TV's *Camel News Caravan*, ex-Kansas City newsman, becomes 5-a-week columnist for McNaught Snydicate starting Feb. 26 . . . Dancing has become such important feature on TV that Cincinnati's WLWT has engaged Cecile Lindsay as staff choreographer, believed to be first such outside networkers . . . WGN-TV, Chicago, raises base hour rate March 1 from $900 to $1000, announcements from $150 to $200.

Civilian Defense Administration has given "blessing" to number of one-reel films, to be privately produced and marketed, but hasn't yet decided just how they'll be offered to TV stations. Present thinking is to supply them gratis for first showing, graduated scale thereafter. For showings in theatres and other places, films are to be sold and rented through ordinary commercial channels. First film, due in March, is *Survival Under Atomic Attack*. To follow are *Fire Fighting for Householders*, *What You Should Know About Biological Warfare* and other pertinent subjects. Producers are United World Films, 1445 Park Ave., and Teletran, 480 Lexington Ave., both New York. Top CDA movieman is Howard Johnson, ex-Navy film division.

That illegal TV station in Williamsport, Pa. (Vol. 7:6), brought suspension of amateur license (W3KJI) to John M. Vandling, who operated station in conjunction with couple local dealers. He has right to request hearing. FCC hasn't yet said anything about 2 reported Texas "bootleg" stations.

More Feb. 1 sets-in-use reported since NBC Research's "census" of Jan. 1 (Vol. 7:3): Cleveland 422,503, up 26,503; Louisville 78,553, up 5253; Johnstown 68,125, up 6825; Boston 674,323, up 32,323.

Wages of TV-radio broadcasting employes are frozen under the general wage freeze, Wage Stabilization Board emphasized in question-and-answer release this week—even though telecasting-broadcasting rates are exempt from controls (Vol. 7:4). WSB answers first question this way: "This regulation covers all employes and employers who pay or receive wages, salaries or other compensation, including employes and employers in the following industries: Books, magazines, periodicals, newspapers, motion pictures, radio broadcasting, television, common carriers, public utilities and non-profit institutions. . . ."

Industry criticism of military-backed electromagnetic radiation bill (Vol. 7:2, 4, 6), which would give President power to "control or use" TV or radio stations and receivers—in fact, anything that gives off a signal—will be heard Feb. 21 by Senate Interstate & Foreign Commerce Committee. Industry believes President already has adequate emergency powers, finds bill unnecessarily confusing, wonders who would administer it and how. Appearances: Defense Dept. (Maj. Gen. F. L. Ankenbrandt), FCC (George Sterling), RTMA (GE's Dr. W. R. G. Baker, possibly Philco's David Smith, et al.), NAB (Justin Miller, Neal McNaughten, Ralph Hardy).

Legislation of interest to FCC will be discussed Feb. 19 in closed session of House Interstate & Foreign Commerce Committee, by acting chairman Paul Walker, rest of available commissioners, top staffmen. To be considered: monitoring stations, electromagnetic radiation, McFarland bill, educational TV, color—in fact, anything that Committee or Commission want to bring up. Committee has been querying all agencies under its wing about their emergency legislative requirements.

Communications Policy Board (Vol. 7:2, 6) submitted 350-page mimeographed report to President Truman Feb. 16 and disbanded after completion of year's work. Contents of report weren't disclosed, won't be until March 15 or 20, when printed copies are available—unless President makes comment in interim. Rumor persists that among recommendations is one to establish super-board, above FCC and Interdepartment Radio Advisory Committee, and that FCC Chairman Coy may be asked to head it.

Tests of directional TV operation, an important and controversial factor in TV allocations, are objectives of experimental applications filed this week by TV applicants Easton Publishing Co. (WEEX-FM), Easton, Pa., and Lehigh Valley TV Inc. (WSAN), Allentown, Pa. They've hired directional expert Paul Godley, who favored directionals during hearing, to conduct experiments with 500-watt installation, 700 ft. above average terrain on Gaffney Hill, 5 mi. southwest of Easton. Stations will share time.

A $1000 award for best piece of research on sociological effects of radio and/or TV has been announced by Edward L. Bernays Foundation, established by the noted public relations counsel. Studies must be submitted by June 15, comprise work completed or nearly completed since Jan. 1, 1949. Reports should be sent to chairman of judging committee, Clyde W. Hart, director of National Opinion Research Center, 4901 S. Ellis, Chicago 15, Ill.

Petrillo has extended until Feb. 22 existing contract with networks, with negotiations continuing on almost daily basis. Crux of impasse is still question of film and kinescope usage. Unofficially, Petrillo is seen agreeing to "parity" for radio-TV musicians' wages; he was asking 20% premium over radio rates (Vol. 7:5).

And finally—Smellovision! Feb. 19 *Time* reports that one Emery Stern has been granted Patent No. 2,540,144 for device which will automatically release odors "appropriate to the type of program, e.g., peach blossom for romance."

CONSERVATION, THE KEY TO SURVIVAL: TV-radio production must go on. Military orders, under present govt. planning, won't occupy more than a minor percentage of the industry's vast productive capacity. Meanwhile, shortages and restrictions will squeeze tighter and tighter the supply of materials available for civilian production. RCA and Philco have prepared summaries of their comprehensive programs to conserve critical materials (Vol. 7:6-7) -- developments which they have offered to share with the entire industry. We include with this issue a special report devoted to outlines prepared by RCA and Philco, detailing their methods and results.

HOW NEW CURBS WILL AFFECT TV OUTPUT: How wide a swath will NPA's forthcoming "durable goods" restrictions cut in TV-radio output?

There's no pat answer to any question about electronics -- or about NPA. But key lies directly -- now more than ever -- in answer to a second question:

How far can the industry stretch its supply of scarce materials?

Previous NPA orders have served, by and large, to help TV-radio get fair share of scarce materials -- by rationing them equally among virtually all civilian users. Forthcoming steel-copper-aluminum restrictions are designed to make sure the industry doesn't get more than its share.

New series will be first NPA limitations applying directly to end-product manufacturers. They will hit these industries: transportation, furniture & fixtures, utensils & cutlery, jewelry, games & novelties, amusement machines, household appliances (including TV-radio).

During second quarter, each manufacturer in those categories will be limited to 80% of amount of steel, 75% of copper, 65% of aluminum which was incorporated into products he turned out during an "average quarter" in first half 1950.

There will be no limitation on number of units manufacturer is permitted to produce, as there was in World War II. NPA wants him to make as many as he can -- so long as he stays within the metals limitations.

Percentage cutbacks will be jacked up each quarter, under present NPA plans, meshing as closely as possible with increasing military production, in order to cause minimum unemployment.

In addition to new limitation orders, present across-the-board regulation cutting use of copper by 20% of average use during first half 1950 (M-12, see Vol. 6:48) will be stepped up to 25%, and aluminum restriction will be retained at 35% (M-7, see Vol. 6:46), during second quarter.

Prime difference between present orders and forthcoming ones: Old orders affect only fabricators, by limiting quantities of copper and aluminum they may use. New restrictions hit directly at end-product makers (Vol. 7:6).

Every manufacturer will have to know exactly how much copper, steel and aluminum his finished products contain -- and how much they contained during first half 1950. Although details of orders haven't been spelled out yet, presumably this

Copyright 1951 by Radio News Bureau

FEB 2

includes such data as amount of aluminum in capacitors, steel in ferrite transformer cores, copper in electron tubes.

* * * *

Don't get the impression picture is entirely gloomy one. It depends on how you look at it. Consider these facts:

TV-radio is in better position than most consumer durable industries. Amply-displayed ingenuity of electronics industry, as well as adaptability of its products to design changes, act in its favor.

New restrictions will be aimed primarily at auto and major appliance industries, where steel is biggest item -- and biggest problem. But electronics industry, through conservation measures, can cut steel content of TV receiver by more than 50%, aluminum by as much as 70% (as some manufacturers already have done).

Copper, then, is limiting item, so far as forthcoming orders affect TV-radio. Philco claims its new model uses 26% less copper than current sets, even though it has added copper speaker field in place of alnico magnet (Vol. 7:7). It isn't outlandish to assume other manufacturers can make similar savings.

Since NPA is cutting back use of copper by 25%, and at same time industry can turn out sets with 26% less copper, we may assume that -- barring unscheduled disturbances, super-shortages or total war -- second quarter TV-radio output can equal NPA's "average quarter" of first half 1950.

Production in first half 1950 was 3,000,000 TVs, 6,500,000 radios, compared to 4,500,000 TVs, 8,000,000 radios in second half.

Assuming that industry saves 25% of the copper in all TVs and radios alike, and continues to produce TVs and radios in same proportion as first half 1950, we divide first half 1950 production figures by 2 to get "average base period quarterly output," and we have:

Production of 1,500,000 TVs, 3,250,000 radios as a "guesstimate" of potential second quarter ouput. This compares with 2,445,000 TVs, 4,320,000 radios in peak fourth quarter 1950, and 961,265 TVs, 1,880,277 radios already turned out in first 6 weeks of 1951.

* * * *

Official govt. objectives for American industry as whole, as outlined in Feb. 23 broadcast by Defense Mobilization Director Charles E. Wilson:

Production curtailments will be temporary -- for perhaps 2 years -- while U.S. expands its output of vital raw materials. By 1953, civilian production should return to 1950's high level, coincident with large volume of military production -- because of tremendous expansion of American industry. As Mr. Wilson expressed it:

"As an inevitable result of transferring metals to defense materials, we are cutting down the quantities of basic metals that are going into durable consumer goods, such as automobiles, refrigerators, washing machines, radios and TV sets.

"Americans can hardly look on this temporary curtailment as a calamity."

SENATORS DON'T LIKE 'RADIATION' BILL: Military's "shotgun" bill (S. 537) to control electromagnetic radiations of all kinds (Vol. 7:2,4,6,7) is definitely spiked. That much is quite clear from Feb. 21-22 hearings before Senate Interstate & Foreign Commerce Committee.

A slight amendment to Communications Act, perhaps none at all, is likely upshot of whole worrisome proposal.

No one questioned military's purposes, which were simply to give President emergency control of all devices capable of being used as homing devices by enemy.

Communications Act already gives him this power over "radio communications," but military wanted to be sure he had it over radar or any other radiator which could conceivably be used by enemy.

Senators Johnson (D-Colo.) and Magnuson (D-Wash.), only members attending, made it obvious from start that they felt military was actually asking for more than it really wanted or needed. "Arbitrary and unnecessary action," said Sen. Johnson.

So Senators offered brief amendment to Communications Act Sec. 606(c), asked

witnesses for comment on it at later date. Both FCC and industry witnesses made it evident they liked Senators' proposal -- if indeed any legislation at all is needed. And even witness for Defense Dept. didn't seem unduly insistent on S. 537. (For text of Senators' proposal, see p. 11).

Principal criticisms, as expressed by NAB, RTMA, Civil Defense Administration, International Assn. of Fire Chiefs:

(1) S. 537 would give President power to act at almost any time to control almost any device -- rather than restricting him to "proclaimed emergencies" and devices actually of possible use to enemy.

(2) Duplication of FCC's role of control would be possible -- with President able to delegate sweeping powers to military, Civil Defense Administration, or any other agency of his choosing.

(3) Literally billions of devices (actually anything radiating from 10 kc to 100,000 mc), even if they can be detected only few feet away and are obviously of no use to enemy, would be subject to direct control at any time.

(4) Enemy has far better navigational and homing tools at his command anyway, e.g., radar, celestial navigation, **Loran.**

Witnesses at hearing were: Maj. Gen. F. L. Ankenbrandt, Air Force communications chief; Comr. George Sterling and Curt Plummer, FCC; Dr. W. R. G. Baker and David Smith, RTMA; Judge Miller, Neal McNaughten and Ralph Hardy, NAB; Herbert Friede, International Assn. of Fire Chiefs.

* * * *

Revealing sidelight of hearing came in questions propounded to Philco's David Smith by Sen. Johnson. Departing from purposes of hearing, Sen. Johnson asked:

"Are you opposed to giving FCC authority over devices causing interference, aside from the question of devices useful for homing?" He was interested in oscillator radiation problem (Vol. 7:4).

Smith said he didn't know legalities, but pointed out that FCC and industry have always worked together to clean up low-power radiations of that type and that considerable success has been achieved.

"Well," said the Senator, "I think someone ought to have power to make manufacturers produce equipment with low radiation. The law ought to be clear on that."

After hearing, we asked Sen. Johnson if he thought that legislation is needed on the matter. "I don't know," he said, "that's up to the technicians. I'm asking questions, trying to find out."

CAPACITY GROWS IN SPITE OF SHORTAGES: Great post-war expansion of electronics industry, almost entirely TV-fostered, continues at remarkable clip. In last 3 months alone, we've reported 50-odd projects started or completed.

Apparently, manufacturers are betting either that (1) military demands will increase faster than civilian output will shrink, or (2) it's best to get plant capacity now, even if lull does develop in civilian-to-military shift.

GE seems most active of all, building plants in Auburn, Utica, Buffalo and Hudson Falls, N.Y., Owensboro, Ky., Toronto, etc. Most-recently announced is $15,000,000 project in Utica (see p. 9). And v.p. Dr. W. R. G. Baker tells us there are more in the works. RCA, Westinghouse, Philco, Raytheon, dozens of others, have sizeable programs under way.

"Military work" is announced purpose of some expansions, yet many companies simply say they need more civilian capacity -- largely TV and its components.

Manufacturers' own initiative, not govt. prodding or assistance, is prompting most construction. NPA and Munitions Board are frankly dubious of expansions to take care of military production. Says one official:

"There's plenty of capacity in components useful for both civilian and military production -- under the present military program. Facilities are short in only a few instances -- for highly-specialized components.

"It's something of a paradox that manufacturers urge release of materials for civilian production to keep their working forces together until military orders

are large enough, and at the same time are expanding facilities and personnel."

Such govt. financial assistance and inducements as 5-year tax amortization, etc., are currently rare in electronics industry. One NPA official puts it this way:

"We're going slow until we know more about the possibilities of converting existing facilities to military production. Here you have an industry which produced some 20,000,000 TV and radio sets last year and is now getting less materials for civilian production. Suppose we rushed in and granted a lot of 'certificates of necessity' to write off new plants in 5 years? Wouldn't our faces be red if it turned out that these companies didn't have enough business to keep existing plants in production, let alone new ones?"

So DPA has granted very few certificates of necessity, although NSRB authorized some earlier. About 80-100 applications are pending, but Govt. seems to feel that many are filed simply because companies "have nothing to lose."

Only instances of Govt. inducement to expand are in components which have little or no peace-time sales value -- principally special-purpose transmitting and receiving tubes. Example:

A big World War II radar producer suffered heavily trying to find peace-time sales, keep its special-purpose machinery going. Now, military wants company to gear up again, but latter is naturally reluctant to invest heavily in such equipment. So Govt. grants certificate of necessity, even buys equipment (but retains ownership) for company use.

Processing of applications has been on something of a catch-as-catch-can basis, but agencies expect to smooth it out shortly.

NPA's Facilities and Construction Bureau, under Frank R. Creedon, refers applications to agency's electronics or communications divisions and to various military departments, for approval or rejection, then passes them to DPA for final action. Up to now, military action hasn't been coordinated. Soon, however, all military recommendations will funnel through single office at Munitions Board.

Mr. Creedon's staff includes assistant William R. Davlin and division directors John L. Haynes (building materials), R. R. Britton (construction controls), Harvey M. Harper (loans), Ross A. Gridley (tax amortization).

WAR ORDERS BEGIN PICKING UP WEIGHT: Speed-up in military procurement is finally being felt by electronics industry.

But because industry is so vast, impact on its $3 billion TV-radio production potential is scarcely noticeable. Nevertheless, contracts are going out, and names of some companies which have been strangers to procurement lists are beginning to appear.

Signal Corps sent out $500,000,000 worth of "letter orders" during first 3 weeks of January, authorizing research and development prior to submission of bids for 300 items of equipment. This is the breakdown:

Radio-communications, $237,000,000; wire-cable, $119,000,000; electronics-radar, $35,000,000; telephone, $22,000,000; photo, $7,000,000; other, $39,000,000.

Step-up in orders is reflected in long list of Signal Corps contracts on p. 10. This listing, prepared by Commerce Dept., doesn't include subcontracts or classified (secret) orders. Thus it reflects unknown percentage of total.

* * * *

Civilian production must continue to be main business of TV-radio industry. RTMA made survey in mid-January of 36 firms with 138,000 employes, which produced 75% of dollar value of TV-radio equipment in 1950. Results were turned over to Munitions Board. From non-military govt. source, we learn that of these 36 firms:

Thirteen, or 36%, had no defense contracts at all.

Twenty-one, or 58%, had orders totaling less than 5% of their 1950 volume.

Two companies, or 6%, had 57% of defense contracts held by all 36 firms. And they had only 6511 employes between them.

Hallicrafters, whose communications equipment is military standby, reported Feb. 21 that it had received $8,800,000 in new Signal Corps contracts since Jan. 1,

bringing its total unfilled military orders to $22,600,000. Military items will constitute 11% of Hallicrafters' production during first quarter, and v.p. Raymond Durst estimates figure will climb to about 25% in April and May.

Magnavox reports military work at about 2%. Emerson's Ben Abrams recently said his company's defense output was of "minute proportions." This week, however, Signal Corps announced Emerson had received $4,600,000 worth of contracts for radios and detectors.

Electron tube makers are in better position than set makers in regard to war work. Just as civilian demand for their products is at all-time high, so is military demand heavy. Hytron, for instance, says its defense work now amounts to 10% of output, expects it to climb to 25 or 30% by August.

Network Accounts: Ralston Purina Co. (Instant Ralston cereal, Wheat Chex, Ry-Krisp, Rice Chex) March 11 starts *Pets and Pals*, children's participation program, on ABC-TV, Sun. 4:30-5, thru Gardner Adv. Co., St. Louis . . . Next *Jack Benny Show* on CBS-TV is March 18, Lucky Strike sponsoring Sun. 7:30-8 in lieu of regular *This Is Show Business* . . . Recently announced changes in NBC-TV's *Saturday Night Revue* include new sponsors Bymart Inc. (Tintair) and Lehn & Fink Products Corp.; cancellations by Snow Crop Marketers, Campbell Soup Co. & Wildroot Co. New line-up on show: Lehn & Fink 8-8:15 segment; Bymart 8:15-8:30; Crosley March 10 moves to 9-9:30; Minnesota Mining & Mfg. Co. (Scotch tape), Benrus Watch Co. & S.O.S. Co. remain as sponsors of 9:30-10; Swift & Co. March 10 takes 10-10:30. Only segment unsold is 8:30-9 . . . Wildroot Co. (hair tonic) April 18 moves *Charley Wild, Private Detective* on CBS-TV from alt. Fri. 9-9:30 to Wed. 9-9:30; Bymart Inc. (Tintair) April 21 shifts its *Somerset Maugham Theatre* to Sat. 7:30-8 . . . March 5 is starting date of Colgate-Palmolive-Peet (Fab) sponsorship of *Susan Peters Show* on NBC-TV, Mon.-Fri. 3-3:15, thru William Esty Co., N. Y. . . . Starting April 2 is new Lever Bros. (Surf) *Hawkins Falls* on NBC-TV, Mon.-Fri. 5-5:15, thru N. W. Ayer & Son, Philadelphia . . . New Cluett, Peabody & Co. alternate week sponsorship of *Holiday Hotel* on ABC-TV, Thu. 9-9:30, starts March 22.

* * * *

Lexington, Ky., had 3000 TV sets, as of last September, even though 70 miles from Louisville, 80 from Cincinnati, according to study by Elmer G. Sulzer, head of radio arts dept., U of Kentucky.

All TV films would be censored by Ohio education dept., according to bill introduced into State legislature last week. Bill brings TV films under same category as theatre films. Several weeks ago, New York attorney general ruled that State legislature could authorize New York Board of Education to censor TV films, as it does theatre films (Vol. 7:4).

NLRB will conduct election March 7 among 700 CBS office workers to determine which union, if any, they want to represent them; already qualified for ballot are Newspaper Guild of N. Y. (CIO) and Radio Guild, Distributive Processing & Office Workers of America (independent, whose contract with network expired Jan. 31), with Office Employes International Union (AFL) yet to decide whether to participate.

Directory of college radio & TV courses (33 pp.) has just been issued by Federal Security Agency's Office of Education, Washington 25, D. C. In last 2 years, according to editor Gertrude Broderick: number of schools has increased to 420; schools offering TV programming courses increased from 33 to 60, TV engineering courses from 28 to 40. TV workshops are featured by 18, radio workshops by 284. Degrees in radio are offered by 65 institutions.

Will wages be unfrozen in broadcasting, publishing and entertainment industries? Congress specifically exempted these fields from price controls, so their employes maintain it's unfair to freeze their wages (Vol. 7:4,7). Wage Stabilization Board had scheduled hearing on this question for next week, but—like all WSB activities—it's been indefinitely postponed because of labor members' bolt from board.

Educators' chances of getting TV channel reservation (particularly in vhf) are still up in air, since there's no indication FCC has reached any decision. And announcement of new vhf-uhf allocation plan (Vol. 7:5), including educational reservation if any, isn't likely until after return of Chairman Coy first week in March.

Educators are making public-relations hay, meanwhile while public's memory of FCC hearing argument is still fresh, encouraging letters-to-FCC, etc. Comr. Hennock is making speeches every few days—most recently in Washington, Philadelphia, East Lansing, Mich., Atlantic City.

Telford Taylor, educators' counsel during hearing, made energetic pitch during ABC's *America's Town Meeting of the Air* Feb. 13. NAB's Ralph Hardy marshalled industry arguments. Others on program were New York U's Charles Siepmann, of FCC Blue Book fame; Robert Landry, editor of *Space & Time;* Edwin Falk, TBA and DuMont counsel, and U of Illinois' Dallas Smythe, ex-FCC, laid educators' case before Chicago TV Council Feb. 14.

Stations are obviously stepping up educational programming and publicity, too. NBC-TV is probing *Operation Frontal Lobes* (Vol. 7:2) plan whereby network preempts one week out of 44 from various sponsors in order to present public service programs. Supervisor of programs is Davidson Taylor, ex-CBS, operating under TV v.p. Pat Weaver. Network's WNBT, New York, will have own series, too, featuring museums, music appreciation, YMCA-American Jewish Committee films on brotherhood, etc., Police Athletic League juvenile talent, etc.

Baltimore stations resemble a campus nowadays, what with WAAM sponsoring seminar on "Career Opportunities in TV," WBAL-TV planning programs presented by 12 colleges, all 3 stations (including WMAR-TV) supplying facilities for Johns Hopkins TV workshop course.

Other workshop activities: CBS and Fordham U have tieup providing 3-months training, in university course, for network's personnel with aptitude in TV directing. Newark's WATV announced workshop arrangement with Seton Hall College, South Orange, N. J.

Panel discussion of education and TV, which included Comr. Hennock, other educational prime movers, plus TBA counsel Thad Brown, is featured in Feb. 26 *New Republic.* Half-hour tape recording of discussion is being distributed for broadcasts over educational AM & FM stations.

Station Accounts: Snow Crop Marketers is switching from network nighttime (NBC-TV's *Saturday Night Revue*) to local daytime TV with half-hour filmed show to be placed in about 40 cities one or two afternoons weekly, starting next month, thru Maxon Inc., N. Y. . . . Curtis Publishing Co. which has been sponsoring Tex & Jinx McCrary *New York Closeup* on WNBT, Wed. 6:30-6:55 is buying other TV markets for show, thru BBDO . . . Latest merchandising stunt, cashing in on Hopalong Cassidy popularity, is children's savings clubs being worked out by Bar 20 Inc., Chicago, franchise holder, with promotional package being assembled by Bozell & Jacobs. Individual banks will be franchised in each city, with children being encouraged to join thru commercials on 63 TV stations carrying Hoppy movies . . . Los Angeles Evening Herald & Express will use series of filmed TV messages to promote $35,000 circulation contest, thru C. B. Juneau Inc. . . . Getting viewers to tell about their most prized possessions is tied in with display of rare jewels and commentary on them by authorities in new *Gem Session* on WTOP-TV, Washington, Mon. 7-7:15, sponsored by Charles Schwartz & Sons, jewelry store, thru Kronstadt Agency . . . Vim Television & Appliance Stores, New York chain, March 10 will start new show on WCBS-TV, starring violinist Florian ZaBach, Mon. 11-11:15, thru Frederick-Clinton Co. . . . Wine Growers Guild (Guild wine) March 2 starts new filmed series *Front Page Detective* on KTTV, Los Angeles; WABD, New York; WXEL, Cleveland; WGN-TV, Chicago; KGO-TV, San Francisco; WCAU-TV, Philadelphia, thru Guild, Bascom & Bonfigli Adv., San Francisco . . . Among other advertisers currently reported using or preparing to use TV: Fisher Bros. Co. (Fisher foods), thru Griswold-Eshleman Co., Cleveland; Glenwood Range Co. (ranges, washers, refrigerators), thru John C. Dowd Inc., Boston; Drake America Corp. (food importers), thru Colman, Prentis & Varley, N. Y.; G. R. Kinney Co. (Educator footwear), thru Gordon Baird Associates, N. Y.; Apple Distillers Ltd. (Apple Vat 36), New York, thru Ben B. Bliss Inc., N. Y.; U. S. Fifth Army (recruiting), thru Schoenfeld, Huber & Green Ltd., Chicago; Oakite Products Inc. (cleaners), thru Calkins & Holden, Carlock, McCilton & Smith, N. Y.; Parsons Ammonia Co. (Parsons' Sudsy ammonia), thru Brisacher, Wheeler & Staff, N. Y.; Boyer Bros. Inc. (Mallo-Cup candy bar), thru Hening & Co., Philadelphia; General Foods (Post Krinkles), thru Foote, Cone & Belding, Chicago; Southern Biscuit Co., thru Lindsey & Co., Richmond; National Textile & Chemical Laboratory (Perma Starch), thru Henri Hurst & McDonald, Chicago; Prince Macaroni Mfg. Co., thru H. C. Rossi Adv., N. Y.; Seapak Corp. (frozen seafoods), thru Gordon Baird Associates, N. Y.

* * * *

"TV Heaven," where video fan Virgil H. Ruppenthal pulls in 15 TV (and 60 FM) stations, was subject of Feb. 11 illustrated Sunday AP feature. "Heaven" is $10,000 "shack" built by Cumberland juke-box distributor Ruppenthal atop Dan's Rock (elev. 3000 ft.), highest point in western Maryland. Where co-channel interference occurs, Ruppenthal brings in the station he wants by means of directional antennas placed on opposite sides of a boulder, which blocks out unwanted signals. He claims perfect reception on 6 channels, with other 9 giving "perfect reception only about 95% of the time." Ruppenthal's "Heaven" is about 190 air miles from Philadelphia, 170 mi. from Wilmington, 160 mi. from Richmond, 135 mi. from Lancaster, 130 mi. from Baltimore, 100 mi. from Washington, 85 mi. from Pittsburgh, 50 mi. from Johnstown. FCC last year ran 400 mc. tropospheric tests from Dan's Rock.

Criticizing Big Ten TV ban, Ohio House of Representatives Feb. 14 passed 39-36 resolution demanding Ohio State U permit televising of all football—at home and away.

Telecasting Notes: Films "actively booked in the past year" by theatres are to be sponsored on KLAC-TV, Los Angeles, by Hoffman Radio Corp. Among them: *The Macomber Affair*, with Gregory Peck, Joan Bennett, Robert Preston; *Girl from Manhattan*, with Dorothy Lamour, Charles Laughton, George Montgomery; *The Crooked Way*, with John Payne, Ellen Drew, Sonny Tufts; *The Chase*, with Robert Cummings, Michele Morgan, Peter Lorre . . . Daytime New York Yankee games, Ballantine-sponsored, will be carried by both WABD and WPIX, but only by latter at night—DuMont having night time network commitments. WPIX has 5-year contract to carry games, beginning next year, since DuMont dropped option. WPIX will also carry Giants (Chesterfields) for third consecutive year . . . Charles-Walcott fight, in Detroit March 7, 10 p.m., will be sponsored on CBS-TV by Pabst, which did same for Charles-Louis fight in September and LaMotta-Robinson bout Feb. 14 . . . Hooper plans expansion to "all major cities" of city-by-city TV & radio program ratings, giving monthly reports, most ready by October . . . Interchange of ideas by 14 southern TV stations, via monthly confidential letters, is proposed by Lee Ruwitch, WTVJ, Miami. Similar plan is used by Assn. of Independent Metropolitan Stations (AM) . . . Two new studios, one with model kitchen, have been completed by WTMJ-TV, Milwaukee, as part of $200,000 expansion program. Station now has 4 studios and will soon finish 2-story, 86x35-ft. addition which is to be used for TV scenery storage . . . Telecasts of Kefauver Committee hearings on crime in Detroit last week, over WWJ-TV and WJBK-TV, had bartenders reporting attendance rivaling that achieved by World Series . . . Orpheum Theatre, Los Angeles, is picking up regular 10 p.m. TV newscast from KLAC-TV, projecting it on screen via theatre-TV equipment; commercials remain . . . Novel survey by New York's WOR-TV comprises station breaks asking viewers to write in and express AM preferences—what they'd like to hear on radio and when . . . KTSL, Los Angeles, Feb. 20 raises base hourly rate from $600 to $900, one-minute announcements from $120 to $190 . . . WCAU-TV, Philadelphia, March 1 raises base rate from $900 to $1200, announcements from $150 to $220.

* * * *

TV film will be $10,000,000 business in New York area alone this year, in opinion of Robert L. Lawrence, v.p. of Jerry Fairbanks' East Coast branch, while Fairbanks himself ventures the belief that 1200 hours of TV film will be shot this year—twice output of entire Hollywood movie industry. TV's appetite for film, even with mere 107 stations, is well-covered in Feb. 12 *Newsweek* which illustrates success of films by pointing out that *Amos 'n' Andy* will start (June, CBS-TV) on film, that *Fireside Theater* (NBC-TV) is third most popular TV show, that Groucho Marx (NBC-TV) gains greatly in film editing, etc. Such successes, magazine says, have even encouraged some to deprecate need for coast-to-coast networks. But growth of films-for-TV has been rough: "Since the TV Neanderthal days of 1946, upward of 800 promoters had tried to set up the business of making TV film. Most of them had closed up shop with the first rent bill. For movies made by Hollywood standards were at first more expensive than live shows."

Denver-San Francisco microwave link of AT&T's transcontinental TV-telephone network, comprising 37 stations, is now under construction. AT&T reported that whole Omaha-San Francisco hookup should be ready for telephone by summer, for TV late this year. Stations average 32 miles apart in last leg, with highest on 10,000-ft. Mt. Rose, near Reno.

Television Digest WITH AM-FM REPORTS

Trade Report
February 24, 1951

TRADE WARY OF CONSERVATION PUBLICITY: TV merchandisers are getting apprehensive at publicity given Philco and RCA "conservation" sets.

Most news stories carried words like "austerity" and "ersatz," left worried frowns on brows of retailers. They're afraid public, which reads while it runs, will shy away from such sets, make it that much more difficult to sell.

But, from one large distributor, who went through World War II selling refrigerators, ranges, whatever appliances he could get his hands on, comes these reassuring words:

"If they haven't got TV and want it, it doesn't make the slightest bit of difference what the set looks like or what's inside. They'll buy, as long as the picture is good."

Same man made another observation on subject of material-saving sets. It's possible, he thought, that big manufacturers may have to take a back seat for a short spell -- when they've sold out their pre-conservation models. The public, he figures, will go for "pre-war" sets, will begin buying off-brand names.

But, as soon as all manufacturers are on same "conservation-savings" footing, back will come public for brand name.

APRIL 1—CONSERVATION DEADLINE: Fruits of the laboratory and drawing board -- conservation of critical materials -- will be harvested at the TV-radio marketplace in heavy measure beginning April 1.

Electrostatically-focused picture tubes (Vol. 7:1,3-7) will be heart of new product turned out by industry's giants, RCA and Philco, starting in April. Both companies have announced this, along with other substantial material-saving measures already taken or about to be adopted (see special Conservation Report, herewith).

While practically all TV-radio firms have taken big steps in past 6 months to slash use of scarce items, most have chosen to do their conservation work in silence, lest "austerity" publicity backfire in wave of consumer resistance. Although both Philco and RCA have emphasized that conservation won't degrade set -- indeed, Philco demonstration helped bear out contention that new set is improvement -- stories in newspapers and even trade press have made public "ersatz" conscious.

Good example of "silent approach" is General Electric, which revealed -- after Philco announced last week (Vol. 7:7) its forthcoming sets would be transformerless -- that GE has used similar selenium rectifier-voltage doubler circuits in lieu of power transformers in its TV sets for more than 2 years.

General Electric told its district managers this week that GE's "continuing program of simplification...conforms with NPA recommendations that TV-radio manufacturers reduce the use of critical materials required for defense needs.

"Recent trends in the industry toward the development of transformerless chassis, and the statements that these sets appear to give better performance," the GE memo says, "point up the fact that GE pioneered the development of such a set more than 2 years ago, and has been making refinements continuously, based on field experience with the simplified circuits.

"Today's [GE] chassis, compared to a conventional transformer-type receiver of our design, uses 37% less copper and 78% less silicon steel...Further studies in this direction are continuing, and look promising."

Practically every set on the market today is a "conservation model" -- in the sense that it uses less of the critical metals than its counterpart did 6 months ago. Three months from now, the industry's product will use even less, a large proportion using electrostatically-focused picture tubes.

Three big tube makers, and probably others, are now ready to produce new

type CR tubes. DuMont and RCA are on verge of production, can start any time -- and both feel that entire industry will switch to electrostatics during second or third quarter. Sylvania, getting set for electrostatic production, expects more than half its picture tube output during second quarter to be electrostatic.

With new NPA restrictions on durable goods industries going into effect in second quarter (see p. 1), April 1 should be target date for maximum conservation effort. After that date, the more material a manufacturer saves per set the more sets NPA will let him turn out.

HIGHER PRICE LEVELS SEEN UNAVOIDABLE: Prices can go only one way -- up. Every factor in sight prompts industry's ablest merchandisers to that conclusion, despite fact today's prices are already 35% greater than those of last summer and fall. Many top producers agree with Crosley's savvy William Blees, who addressed San Diego appliance meeting last week and stated flatly:

"TV receivers are going to retail around $400 instead of $199 or $249, and it's going to be extremely difficult to sell them. We are never going back to cheap stuff." Here's reasoning of the market experts:

(1) Prices go up when volume goes down, and materials limitations can't help but cut volume, despite even most ingenious conservation measures.

(2) Costs of labor and materials are going up -- no doubt of that.

(3) Excise tax increase is almost a certainty -- even though it may not be full 15% hike recommended by Treasury Dept.

(4) Conservation-substitution measures mean higher production costs, despite use of less materials -- more labor, more processing. As one manufacturer puts it: "You have to do it the hard way."

And forthcoming govt. price controls, they say, just won't hold the line at present levels.

Meanwhile, business is good. Manufacturers continue producing at high rate, distributors taking all they can get, retailers selling well -- few serious kicks.

DuMont's January sales were 33% above same month last year, Dr. Allen DuMont told New York Security Analysts this week. Later, he told us January sales were "slightly above" December, his best 1950 month.

Hoffman Radio's H. Leslie Hoffman ventured that production will be 20-25% greater, through July 1, than corresponding 1950 period. But after that, he said in speech at San Francisco Winter Market last week, look for a radical drop. He foresaw 4,000,000 sets for year. We know another, more sanguine manufacturer who feels certain TV output will reach 5,500,000 this year.

Radio production will suffer even more, Hoffman predicted, since he expects more and more manufacturers to concentrate critical materials on TV. He has already entirely eliminated radio production, himself.

How near right they are may best be judged by set production for second week of February (ending Feb. 9), reported by RTMA: TVs 154,774 (4853 private brand), radios 322,300 (198,700 home, 104,284 auto, 19,316 portable). This compares with first February week's 167,315 TVs, 322,855 radios (Vol. 7:7). Yet second February week includes 4 days lost by Philco, one by Admiral, due to rail strike. Year's total TVs to Feb. 9: 961,265.

Labor doesn't like excise tax hikes, proposed by Treasury Dept. (Vol. 7:6). Officials from AFL, CIO, UEW, appearing before House Ways & Means Committee this week, told congressmen excise tax fell most heavily on low income groups, plumped for increased corporation taxes. Meanwhile, RTMA tax committee was named, comprising following in addition to A. M. Freeman, RCA, chairman: Max Balcom, Sylvania; T. M. Blake, Littelfuse; John W. Craig, Crosley; J. J. Frendeis, Hallicrafters; B. L. Graham, DuMont; Raymond Herzog, Emerson; G. Richard Fryling, Erie Resistor; S. Kaplan, Zenith; George R. MacDonald, Motorola; R. E. Norem, GE; W. Myron Owen, Aerovox; Maurice G. Paul Jr., Philco; John S. Sturgeon, Magnavox.

Trade Personals: Howard Halbert, secy. of Kaye-Halbert, has resigned, with his stock interests being repurchased by corporation. Mr. Halbert's future plans are indefinite . . . Rinaldo DeCola named director of engineering for Admiral, succeeding Robert Jones, on leave of absence in Arizona . . . Charles R. Lunney, ex-Westinghouse Electric Supply Co., named asst. advertising mgr., Belmont (Raytheon) . . . GE electronic dept. engineers Kenneth Fowler and Harold B. Lippert, together with 5 others got Charles A. Coffiin awards for work of outstanding merit during 1950; Fowler and Lippert got award for text of TV service course . . . Harry Van Rensselaer, sales mgr., electronic parts div., DuMont, recalled to duty with Air Force.

Topics & Trends of TV Trade: Industry probably couldn't sell 10,000,000 TV sets this year, even if it could make them, according to market analysis by top-level National Industrial Conference Board in current issue of its *Business Record*. Economict Shirley S. Hoffman reasons:

"If the TV cutback should be 35%, a rough average of the estimates, there will be about 5,000,000 sets made this year. There are about 26,000,000 families within range of TV service today. Since the FCC freeze [is] still in force, it is unlikely that the market could be expanded in 1951.

"About 10,500,000 of these families now own sets. That leaves about 15,500,000 who still have not bought a TV set. However, a sizeable proportion of these families may not be able to buy sets at current prices [and many] live in areas where there is only one station telecasting a limited number of programs . . .

"Even in the heavily populated metropolitan areas having a relative abundance of TV programs, there are many families that are nevertheless disinterested in a set. Credit controls are also pulling some potential buyers out of the market.

"So, of the 15,500,000 families within telecasting range who still have not been 'sold,' a good many are not in the market to buy sets either because they cannot afford one or are not interested. All things considered, an output of 5,000,000 sets, together with a portion of retailers' and manufacturers' stocks, which total about 1,000,000, might satisfy a substantial segment of this year's demand."

Note: Foregoing reasoning is clear enough, but 35% cutback figure seems plucked out of hat, replacement and second-set market is entirely ignored, and estimating "those who can't afford" and "those disinterested" among non-set owners would be sheer guesswork.

* * * *

Because it found itself overpriced in today's market, Crosley Feb. 21 cut prices of 11 TV sets from $40 to $60 each. Prices include excise and warranty, as did previous lists. Sets affected include 16-in. round consolette, cut from $399.95 to $359.95; 17-in. consolette, from $409.95 to $369.95; 19-in. console, half-doors, from $519.95 to $479.95. New 20-in. sets will replace 19-in. models, but prices remain same.

Majestic distributors and dealers ordered $12,000,000 worth of TV-radio at last week's meeting in New York, according to president Leonard Ashbach. He said sets would be delivered over next 4 months, that sufficient materials and facilities were available to handle orders.

Paradox of excellent TV trade is distress selling here and there (Vol. 7:7). New York's Vim chain, in *New York Times* Feb. 18, advertised 16-in. table model at $150, 19-in. console $200. Ad also showed 10-in. console $80, 12½-in. table $140.

Trade Miscellany: Frank A. D. Andrea, veteran TV-radio manufacturer, subject of "Business and Finance Leaders" personality sketch in Feb. 13 *New York Herald Tribune* . . . Air King appoints Bennett, Walther & Menadier Inc., New York, as ad agency handling its TV-radio and wire recorder lines . . . DuMont launches 2-month ad campaign in 8 national magazines, in newspapers in 34 major TV areas, in trade papers, cued to distributor-dealer drives, thru Campbell-Ewald . . . Sparton running 4-color page ads in *Saturday Evening Post* & *Collier's*, beginning in March, running through 1951.

Sales of retail TV-radio & household appliance dealers zoomed to record $3,493,000,000 last year, 25% greater than previous high in 1949, Census Bureau reports in monthly *Trends in Electrical Goods Trade* for December 1950. War-buying wave in August made it biggest month —$386,000,000. December's $358,000,000 was 33% over November, 2% over December 1949.

Financial & Trade Notes: DuMont sales for 1950 topped $75,000,000, Dr. Allen B. DuMont revealed Feb. 20 in talk to New York Society of Security Analysts. This compares with $45,267,000 sales in 1949. Net was about $7,000,000 ($3 a share), more than double 1949's $3,269,880 ($1.49). DuMont Television Network losses in 1950 were $400,000 less than those in 1949, Dr. DuMont reported. Working capital at end of 1950 was $17,200,000, net worth $23,000,000.

Federal income and excess profits tax absorbed about 48½% of pre-tax net income of $13,500,000, he said. Under present law, 1951 taxes would amount to about 58½% of income before taxes. Dr. DuMont said company's excess profits tax would have been about $1,250,000 more if it weren't for growth clauses in excess profits tax law (Vol. 6:43-52). Company's excess profits tax credit is above $8,000,000 before regular corporation taxes, he said.

* * * *

Allied Electric Products Inc., including CR tube manufacturing subsidiary, Sheldon Electric, reported sales of $6,502,451 for 6 months ended Dec. 31 vs. $1,571,140 for same 1949 period. Net earnings were $552,634 (84¢ on 625,141 common shares) vs. $34,490 (7¢ on 500,000 shares).

Kaye-Halbert reports net income of $147,678 (48¢ per share) for 3 months ended Dec. 31. No comparable 1949 figures are available.

Arvin Industries, in preliminary report, shows 1950 net profit of $3,605,126 ($4.04 per common share) vs. $3,093,840 ($3.47) in 1949.

Dividends: Westinghouse, 50¢ payable March 1 to holders Feb. 13, up 10¢ over 1949 quarterly rate; Stromberg, 50¢ payable April 1 to holders March 10; CBS, 40¢ payable March 9 to holders Feb. 23; Hytron, 10¢ payable March 15 to holders Feb. 28; Bendix Aviation, 75¢ payable March 31 to holders March 10; Magnavox, 37½¢ payable March 15 to holders Feb. 26, Class A preferred 25¢ payable March 1 to holders Feb. 15; Philco, regular quarterly 40¢ on new split shares, payable March 12 to holders March 1 (equivalent to $1.60 per share on annual basis) and 93¾¢ on preferred 3¾% Series A stock, payable April 1 to holders March 15; Cornell-Dubilier, 20¢ common, payable March 28 to holders March 20, and $1.31¼ preferred quarterly, payable April 15 to holders March 20; Webster-Chicago, 25¢, payable March 20 to holders March 10; Hazeltine, 25¢ payable March 15 to holders March 1; Sprague Electric, 50¢, payable March 14 to holders Feb. 28; Wells-Gardner, 15¢, payable March 15 to holders March 1; DuMont, 25¢ on Class A & B common, payable March 26 to holders March 12, and 25¢ preferred quarterly, payable April 1 to holders March 15.

———■———

Plant expansions: Hallicrafters has exercised $225,000 purchase option on building at Tripp & Arlington, Chicago, which it has leased and occupied since Jan. 1, 1950 . . . Kaye-Halbert has acquired new plant at 5037 Exposition Blvd., Los Angeles, its fifth building . . . Hoffman Radio has purchased 40,000 sq. ft. building adjoining its TV plant on Avalon Blvd., Los Angeles, plans centralizing all TV production shortly . . . Magnavox, nearing completion of $400,000 expansion of plant in Greeneville, Tenn., shortly starting 20,000-sq. ft. addition to Fort Wayne factory costing $350,000 . . . GE plans new $15,000,000 plant in Utica for military equipment, 338,000 sq. ft. on 50-acre site, to employ about 2500; GE is also leasing 120,000 sq. ft. former Utica & Mohawk Cotton Mills 4-story building.

Prices of Macy's private label Hyde Park TV sets, during week of dept. stores' TV & Music Festival, are being advertised as follows: 16-in. console, doors, $269; 19-in. console $299, with doors $349. All have round picture tubes.

Mobilization Notes: Contractors met subcontractors by the hundreds at Air Force's New York procurement exhibit this week (Vol. 7:7). Twenty-seven manufacturers, who have total of more than 300 Air Force contracts valued at $250,000,000, displayed equipment and parts they need from subcontractors—who are expected to turn out more than 60% of total value. Because more than 3500 visitors registered at exhibit, Air Force decided to continue display for another week at 67 Broad St., and to plan similar exhibits in Boston, Chicago, Detroit, Fort Worth and Los Angeles. Among New York exhibitors prominent in electronics manufacture:

Bendix Radio, seeking facilities for aircraft radio and radar subassemblies.

Philco, seeking subcontractors to manufacture ceramic, plastic, sheet metal parts and transformers, resistors, plugs and jacks, capacitors, nuts and bolts, screws, copper piping, as well as small machine production.

RCA, seeking screw machine capacity, cable harnesses, specialized machines and parts.

Other electronic manufacturers seeking subcontractors at the exhibit: Avco, Espey, Weston Electrical Instrument, Specialty Assembling & Packing Co. (radios).

Six additional manufacturers will join New York display next week. They include Federal Telephone & Radio Corp. and several aircraft firms seeking electronic devices and subassemblies. Influenza outbreak may prevent RCA from continuing its exhibit next week.

Rep. Abraham Multer (D-N. Y.), attending the exhibition Feb. 23 for House Small Business Committee, said he would recommend similar "clinics" for Army and Navy prime contractors.

* * * *

TV-radio price controls will be administered by Lee McCanne, Stromberg-Carlson v.p. He's due in Washington Feb. 27 to confer with OPS officials about heading up TV-radio section, Housewares & Accessories Branch, Consumer Durables Div. New appointments in other mobilization agencies: Edward William Glacy, ex-GM engineering executive, ex-Navy Lt. Comdr. in charge of special projects (guided missiles, underwater weapons etc.), ex-Bureau of Standards, holder of 12 electronic and mechanical patents, now directing conservation activities for NPA's Electronic Products Div. . . . Dean O. Bowman, ex-Commerce Dept. asst. director of Office of Industry & Commerce, named Assistant NPA Administrator in charge of newly-created Policy Coordination Bureau . . . Carl W. Gabel, ex-Emerson Electric, appointed Director of Civil Defense Administration's Facility Self-Protection Div.

* * * *

Copper stockpiling has been cut 50% by Munitions Board, Rep. Patterson (R-Conn.) was told Feb. 15 by Munitions Board chairman John Small. He said reduced rate of stockpiling will continue indefinitely, subject to review every three weeks, and "should materially assist the industries suffering from inadequate supplies of copper."

Trouble for electron tube industry looms if tungsten supply situation is not eased soon, filament wire makers advised NPA Feb. 20. Some 75% of U. S. tungsten supply has been cut off with loss of Far Eastern sources. Among industry representatives meeting with NPA were: J. B. Merrill, Sylvania; Jack Gelok, Westinghouse; W. P. Kiernan, Elmet Div., North American Philips.

Lead and antimony, important ingredients in solder, Feb. 16 were placed under inventory controls in NPA Orders M-38 and M-39. Orders limit inventories of the 2 metals or materials containing the metals to 60 days' supply or a "practical minimum working supply," whichever is less.

Copper and zinc—scarce metals essential to many electronic parts—will probably substitute for nickel-bearing chrome-plated stainless steel, which is even scarcer, to keep new autos resplendent with glittering trim this summer, Ray Vicker reports in Feb. 23 *Wall Street Journal.*

Concern over supply of Kovar, a cobalt alloy essential to manufacture of power tubes for broadcast, industrial and X-ray uses (Vol. 6:47), was expressed by members of X-Ray Equipment & Accessories Industry Advisory Committee, meeting Feb. 19 with NPA officials. Committee members said frequent production bottlenecks due to lack of small components—such as resistors, relays and circuit breakers—threaten to delay X-ray equipment production. GE, Westinghouse and Machlett Laboratories are among 9 firms represented on committee.

Munitions Board is publishing *Munitions Board Progress Reports*, a periodic review of unclassified information concerning military procurement and production programs of interest to industry. You can get on list to receive *Reports* by sending request to Munitions Board, Progress Reports Div., Pentagon, Washington 25, D. C.

To encourage exploration for strategic minerals by private firms, $10,000,000 has been allocated by Defense Production Administration. Exploration program will apply to these electronically-important metals, among others: Antimony, chrome, cobalt, columbium, copper, lead, mercury, mica, miscellaneous ferro-alloy ores, molybdenum, nickel, tungsten, zinc. In another development relating to materials, Magnetic Metals Co., Camden, N. J., manufacturers of magnets and magnet cores for electronics-communication equipment, announced expansion of its plant to provide 15,000 sq. ft. additional floor space and permit production at 6½ times pre-Korean level. Approximately 40% of firm's business is now defense.

* * * *

Among unclassified military contracts for electronics and related equipment (more than $100,000) announced by Commerce Dept. for 2 weeks ending Feb. 21: Through Signal Corps, Philadelphia—Federal Telephone & Radio, $8,686,327, transmitting and receiving equipment and tubes; Emerson, $4,617,927, radios, detector sets; J. & H. Smith Mfg. Co., New York, $1,952,014, antenna equipment; Presto Recording Corp., $1,808,562, sound locating sets; ARF Products, $1,659,500, radio relays, signal generators (Motorola is subcontractor); Hallicrafters, $1,250,000, radios; GE, $1,000,000, rawin sets (meteorological); Rauland Borg, $800,000, radio terminal sets, relay sets, transmitters; Raytheon, $688,710, radios, tubes;Barker & Williamson, $500,000, radios; Molded Insulation Co., $128,843, radiosondes; Westline Electronics, Los Angeles, $136,940, crystal units; Service Corp. of America, New Hyde Park, N. Y., $247,500, radio sets; Triplett, $472,313, tube testers; Midland Mfg. Co., Kansas City, $100,000, crystal units; Radiomarine Corp., $130,000, radios; Sylvania, $268,000, tubes; Chatham Electronics, $188,000, thyratron tubes; Machlett, $132,000, thyratron tubes; RCA, $211,748, power supplies, repair of radios; Minshall Estey Organ Inc., Brattleboro, Va., $100,000, public address sets; Johnson Service Co., Milwaukee, $572,400, radiosonde modulators; Garod (Majestic-Wilcox-Gay), $100,000, radiosondes; Lewyt, $300,000, radios; Tele King, $400,000, radios; Espey, $300,000, radio relay sets; W. L. Maxson (Langevin), $200,000, power supplies; Crosley, $400,000, radios; Kollsman Instrument, $100,000, radiosondes (increase in unit cost); Brunswick Radio & TV, $150,000, control boxes; Cornell-Dubilier, $150,000, power supplies. Through Navy Electronic Supply Office, Great Lakes, Ill.—Raytheon, $901,150, tubes. Pacific Mercury TV Mfg. Co. announced $731,105 in military contracts for glide-path receivers.

NAB-TV needs 75-80 stations to meet $150,000 budget, under dues structure evolved at board meeting Feb. 19 in New York, has pledges from 57 already. Monthly dues were set at station's highest published 5-min. rate—or half of 15-min. rate if station has no 5-min. scale. Dues for networks are flat $100 per month. Board hired Thad H. Brown, son of late FCC comr., member of Washington law firm of Roberts & McInnis which represents TBA, on full-time basis as counsel. Following committee was named to hire $35,000 a year general mgr.: George Storer, Fort Industry, chairman; Harry Bannister, WWJ-TV; Clair McCollough, WDEL-TV & WGAL-TV; Campbell Arnoux, WTAR-TV; Paul Raibourn, KTLA (Paramount). Meanwhile, industry music committee, headed by Dwight Martin, Crosley, is trying to get ASCAP to reopen negotiations on per-program license terms. ASCAP terminated talks last December (Vol. 6:50), said then it was sending contracts to stations, but none has received them as yet.

* * * *

Bell Labs able Axel Jensen, chief TV researcher, says war has put color "back in the laboratory again," doubting whether manufacturers would be able to get materials for color. Therefore, he said, in talk at U of Buffalo this week, if research is "allowed to go on a little longer, it may be possible to come up with a system superior to anything we have at present."

Reporting on its color tube patents, Sightmaster announced that tube-maker Zetka paid $250,000 for "the right to purchase an interest in Sightmaster Corp.'s patent position." It also says RCA and others are negotiating for use of patents said to permit greater brightness in color tube.

Latest CBS "road show" color demonstrations: In New Orleans, Municipal Auditorium, Feb. 28 & March 2, in connection with meeting of affiliates advisory board, prior to March 5-8 medical showings; in New York, Feb. 22-25, at 71st Reg. Armory, for National Photographic Show.

* * * *

Looks like Petrillo-network contract (Vol. 7:5-7) may be settled next week. Compromises will be in order on most issues, but troublesome question of film and kinescope use may not be settled for a while. In fact, many observers feel it may have to wait until new agreement between AFM and motion picture producers is worked out; union's contract with Hollywood runs out Aug. 31.

Two TV-radio legal snarls are being analyzed by Washington attorney Harry P. Warner. Writing in summer and fall issues of Washington U (St. Louis) *Law Quarterly*, he concludes that rights to program content will be protected through common law or statutory copyright, rather than through law of unfair competition which courts have employed so far. This fall, Warner expects to have published *The ASCAP Story*, history of the organization and music rights in general.

Latest TV "scenery saver" is device called "Vistascope," French invention to which movie producer Sol Lesser has obtained rights. It's a box, containing scenic photograph, fitted to front of camera lens. Photograph is cut out so that actors, on whom camera is focused, appear to be surrounded by scenery.

Navy's reserve training program over New York's WOR-TV, started last Oct. 10, proves that "a well presented lesson over TV is more effectively absorbed than the same lesson presented by the usual classroom method of teaching." That's conclusion of Capt. D. D. Hawkins, in Feb. 18 *New York Times* article. Program also proves, he says, that "instructors are going to have to learn to be TV actors, or actors will have to turn instructors, if TV is going to do much teaching." Navy tested 65 people before finding right instructor.

Closed session between FCC and House Interstate & Foreign Commerce Committee to discuss legislation (Vol. 7:7) seemed to elicit little, although FCC again tendered proposed reorganization bill it prefers to McFarland bill (Vol. 7:4, 6). Commission proposal is about same as bill issued as Committee Print No. 1 last year (Vol. 6:31), but never introduced. Commission hadn't anything new to say about freeze, color, educational TV. Much time was spent explaining NARBA details to Committee.

Changes in Communications Act, suggested by Senate Interstate & Foreign Commerce Committee, to replace S. 537, electromagnetic radiation control bill advocated by Defense Dept. (see story p. 2), read as follows—new language in italics: "Sec. 606(c). Upon proclamation by the President that there exists war or a threat of war, or a state of public peril or disaster or other national emergency, or in order to preserve the neutrality of the United States, the President, *if he deems it necessary in the interest of national security or defense*, may suspend or amend, for such time as he may see fit, the rules and regulations applicable to any or all stations *or devices capable of emitting electromagnetic radiations* within the jurisdiction of the United States as prescribed by the Commission, and cause the closing of any station for radio communication, *or any device capable of emitting electromagnetic radiations between 10 kilocycles and 100,000 megacycles*, and the removal therefrom of its apparatus and equipment, or he may authorize the use or control of any such station *or device* and/or its apparatus and equipment, by any department of the government under such regulations as he may prescribe upon just compensation to the owners."

* * * *

Resignation of Murray Grabhorn, ABC v.p. in charge of O & M stations, sparked these changes: **Otto Brandt**, v.p. for TV station relations, now has supervision over all owned TV stations, plus national spot and local TV sales. **Richard R. Rawls**, regional mgr., promoted to mgr. of TV stations dept., reporting to Brandt. On program side, **Burke Crotty**, executive TV producer, named asst. national director of TV program production; **William Phillipson**, attorney, named asst. director TV programming and operations (handling negotiations, contracts, etc.); James S. Pollak, ex-Souvaine Co. and WPIX, named program mgr., WJZ-TV. All report to Alexander Stronach, ABC v.p. in charge of TV programs. Other changes include appointment of James Connolly, radio stations relations v.p., in charge of all owned radio stations and national spot and local sales; **William Wylie**, mgr., radio stations dept.

Civil defense contributions of stations, growing rapidly, include: Sponsorship of March 6 session on *TV's Role in Civilian Defense* by Detroit's TV Council (formerly Round Table), featuring talks by Jesse Butcher, chief of audio-visual section, Civil Defense Administration; Col. Edward Kirby, chief of TV-radio branch, Army information; Col. Lawrence Wilkinson and Brig. Gen. Clyde Dougherty, of New York and Detroit civil defense agencies, respectively. One-time program by Louisville's WHAS-TV drew such response that it grew into series comprising films, interviews, etc. New York's WCBS-TV, Feb. 26 starts *Self Preservation*, "course of action for the housewife and her family," daily for 3 weeks, with assistance of Civil Defense and Red Cross officials. Baltimore's WAAM March 3 carries *Your Atomic Future*, featuring atomic scientist and city school civil defense training director.

Anxious about TV's impact, radio documentary writer Robert Lewis Shayon has written new book, *Television and Our Children*, in which he terms children's viewing excessive, puts blame on adults, places faith in "listener council movement," plumps for educational TV stations.

NBC Count of TV Sets-in-Use by Cities

As of February 1, 1951

Note: Estimates are by NBC Research for network use only, based on NBC affiliates' coverage to .1 Mv/m contours. Coverage of families is calculated on a net basis, with duplication removed. For individual station coverage, which in most cases exceeds these figures, consult station.

January TV set sales totaled 593,000, lowest since last August's 587,700, bringing grand total of sets-in-use to 11,142,500 as of Feb. 1, according to NBC Research's monthly "census" report released this week. NBC adjusted some of its family estimates since it began using new basis for TV set count (Vol. 7:3); total families covered by TV signals now amount to 26,495,700. For Los Angeles, 13,600 families were added; for Wilmington, 28,800 families were added, all from Philadelphia and Baltimore.

Interconnected Cities

Area	No. Stations	No. Families	No. Sets
Ames (Des Moines)	1	195,200	42,000
Atlanta	2	311,300	91,500
Baltimore	3	461,600	273,000
Birmingham	2	252,400	42,200
Bloomington, Ind.	1	49,300	14,300
Boston	2	1,084,000	674,000
Buffalo	1	309,400	182,000

Total Interconnected and Non-Interconnected	107	26,495,700	11,142,500

Personal Notes: Harrison M. Dunham has resigned as general mgr., KTTV, Los Angeles, no successor yet appointed . . . Theatrical and industrial design expert Benjamin L. Webster appointed asst. to Fred Shawn, NBC-TV director of production services . . . Frank Young, ex-WPIX public relations mgr., joining NBC in special public relations capacity, reporting to public relations v.p. William F. Brooks . . . Joseph A. Chambers, ex-partner, Chambers & Garrison, Washington consulting engineers, joins Motorola military research labs in Phoenix, Ariz., about March 1 . . . Hollis Seavey, MBS coordinator of Washington news and special events, named director of Washington operations for network . . . George Baker, ex-Hughes-Peters Inc., Cincinnati Emerson distributor, joining WLWT, Cincinnati, in charge of hard goods sales . . . Lewis M. Marcy, ex-Advertising Research Foundation, joins NBC as supervisor of sales planning dept., succeeding Lance Ballou Jr., recently named to network's sales staff . . . J. R. Poppele, v.p. and chief engineer of WOR-TV, New York, received Marconi Memorial Medal of Achievement from Veteran Wireless Operators Assn. at New York dinner meeting Feb. 24 . . . Ralph Taylor, KNX-Columbia Pacific network sales promotion mgr., named sales promotion mgr., KTSL, Los Angeles . . . Harry Black, ex-*Televiser Magazine*, appointed program director of WXEL, Cleveland . . . Wally Schwentser named engineering supervisor, KMTV, Omaha.

Edward P. Morgan, partner in Washington radio law firm of Welch, Mott & Morgan, ex-counsel Senate subcommittee investigating Reds in State Dept., ex-FBI, named chief enforcement officer of Office of Price Stabilization . . . Arthur R. Treanor, part owner of WOOD, Grand Rapids and WFDF, Flint, to become director of NPA Printing & Publishing Div.

* * * *

TV production costs are not out of line with other media costs, asserted Don McClure, McCann-Erickson, at TV-radio seminar Feb. 20 sponsored by Washington Ad Club. Costs can be held within bounds, McClure said, by (a) pre-planned production, (b) every-other-week sponsorship, (c) use of Tele-prompter—which can cut rehearsal costs by 25%, (d) use of latest techniques in filming—such as Vidicam and Multicam processes.

New radios were bought by 17% of TV owners, by 19% non-TV owners during 1950, Dr. Sydney Roslow, The Pulse Inc., told TV-radio seminar in Washington Feb. 20. But, during last 6 months, new radios were bought by 28% of TV owners (placed mostly in bedrooms), and by only 23% of non-TV owners (placed mostly in living rooms), reported Dr. Roslow.

Sunday is best evening for group televiewing, Trendex reports on basis of data from 20 TV cities. In December and January, average of 3.3 persons watched each set Sunday nights, while average number of viewers per receiver for all nights of week was 2.95, according to survey.

First TV application for Mobile, Ala., was filed this week by WKRG, for Channel 5, bringing total on file to 381. Owners are local businessmen Kenneth R. Giddens and T. J. Rester. (For details, see TV Addenda 12-G, herewith.)

More than 80% of TV set owners in the Carolinas also own their own homes, according to survey by WBTV, Charlotte. Other conclusions: 74% of owners live in urban areas; 44% make less than $5000 a year, 42% from $5000 to $10,000 and 13.5% over $10,000.

"TV snob" is subject of *Printers' Ink* editorial in Feb. 26 issue, which gleefully (but not nastily) makes point that novelty factor wears off rapidly, after which TV viewers turn to other pursuits—like reading newspapers, magazines and books.

Wonder Workers of TV

Conserving Critical Materials -- Two Approaches

Reports on Materials Conservation Programs of RCA and Philco

Offering Full Data to Entire TV-Radio Manufacturing Industry

For News Reports and Comments, see *Television Digest* Newsletters, Vol. 7:6-7

Editor's Note: *For some months the industry has been buzzing with reports of amazing savings of critical materials through new techniques in conservation and substitution. So successful have the efforts been, that one of the top govt. mobilizers has said: "These electronic fellows are the most ingenious workers of miracles I've ever seen," and to suggest that other crisis-affected industries might well profit by their example. Two leaders, RCA and Philco, have spelled out their conservation programs, offering their findings to all other manufacturers without restrictions. Philco actually demonstrated a TV receiver that not only saves critical materials but, its developers say, performs better than current models (Vol. 7:7). The following are official reports—Philco's prepared at our request, RCA's taken from its report on 'Conservation of Critical Materials,' sent recently to all set and tube manufacturers (Vol. 7:6):*

PHILCO'S REPORT

TWO years ago, the management of Philco Corp. initiated a long-range program of research and engineering development in television. The objective was to develop a TV receiver with improved performance at no increase in price, despite rising costs.

Considerable success had been achieved toward this goal by last summer, when it became apparent that many materials would become scarce because of the national emergency. At that time, the objective of the original program was broadened to include conservation of critically scarce materials.

In recent months, Philco management has emphasized material conservation and accelerated this aspect of the development of a new television chassis design, while continuing to insist on improved performance.

The new Philco TV chassis, which was first demonstrated to officials of the National Production Authority on Feb. 14, 1951, is the culmination of the company's 2-year development program. In this one phase of Philco's extensive over-all research and engineering work in various fields of electronics, refrigeration and thermodynamics . . . in the evolution of this new TV chassis . . . over 100 technically trained personnel took an active part.

The result is an entirely new television receiver, which has proved its superiority in numerous field performance tests, and which also conserves many critically scarce materials.

This report provides essential technical information on this new Philco TV chassis, and also presents the principal savings of scarce materials. Supplementary sections of the report indicate similar materials savings that are being achieved in the design and production of TV picture and receiving tubes, TV installation materials, and automatic record changers.

Before presenting this report on the new TV chassis, however, it should be mentioned that notable savings in critical materials have already been made in current production of TV sets as compared with similar models produced during the latter part of 1950. Such savings as a smaller speaker magnet, smaller and more efficient transformers, lighter-gauge copper hook-up wire, and many other minor changes have made it possible *already* to effect the following conservation of scarce materials:

(Continued on page 4)

RCA'S REPORT

EVER since the outbreak of war in Korea, RCA engineers have been working aggressively to search out every possible means of saving critical materials in the production of television receivers, radios, and other electronic equipment without sacrificing the company's high standards of quality.

Some of our engineering accomplishments, such as the newly designed RCA speakers which reduce alnico content by 70%, brass by 90%, and steel by 35%, and the new RCA electrostatic kinescope which completely eliminates the use of alnico magnets, have already been passed on to the industry. These two RCA developments alone, when fully applied to the industry's television production, will reduce the cobalt content in the average receiver by almost 90%—a savings industrywise of over 300,000 pounds of scarce alnico per one million receivers produced.

Many manufacturers of sets and components have made major contributions in the conservation of scarce metals.

The attached summary of conservation steps already adopted, or to be adopted shortly by RCA, has been prepared for your information. While many of the savings in critical materials listed by our engineers apply to the manufacture of tubes and components, and to the materials used in the installation of television receivers, they nevertheless will be of interest to the industry, because when these conservation steps are applied industry-wide they will save millions of pounds of cobalt, copper, nickel, aluminum, brass, steel, and other metals.

Without these important savings of restricted materials already achieved, our industry could not have attained the relatively high production of TV-radio receivers during the month of January.

I know you will join us in earnestly pursuing this conservation program, not only for the resulting substantial savings in vital metals, but also to demonstrate to our government officials the industry's resourcefulness in this time of emergency. Only by doing everything possible to help itself can the industry feel morally justified in asking the help of Government agencies in supplying sufficient critical materials to permit continued production of peace-time products, which in turn enable us to hold together our technical skills and our trained workers until they are needed to produce electronic equipment for the military services.

(Continued on next page)

Our engineers are continuing their efforts, and as additional methods of conserving scarce metals are developed we will keep you advised. In the meantime, if you have any questions on the conservation program outlined, I invite you to direct your inquiries to Mr. S. W. Seeley, director of our Industry Service Laboratory, 711 Fifth Ave., New York City.

Sincerely,

(s) Frank M. Folsom.

* * * *

Report on Conservation of Critical Materials

The conservation of critical material in the manufacture of receivers, tubes, and material required for installation can be approached from two separate and different viewpoints:

(1) Reduce the use of critical material by reduction of the number of components, thereby reducing the performance and quality of the receiver;

(2) Maintain quality and performance by redesigning components to take full advantage of any new non-critical materials not previously used. Where this is not possible, completely redesign the components and the receiver to use the *minimum amount* of critical material, even though it may be necessary to add components.

RCA engineers are committed to following the second approach. We believe this is imperative in order to produce receivers of highest quality and performance. It is our viewpoint that it would be harmful to the industry to produce TV receivers that would affect conservation of scarce materials at a sacrifice in quality.

We have made important savings of critical material and, at the same time, have continued production of high quality tubes and receivers. This is particularly important in that it permits keeping trained employes who will be needed to design and manufacture armed services equipment when needed.

The following tabulation is a summary of the savings based on production of 1,000,000 receivers. The first column shows savings in present production of 17-inch TV receivers. The second column shows the material savings which we expect will result from the application of electrostatic focused kinescopes to these receivers.

Material Saved Compared to Second Half 1950 Typical 16-17" Television Set

Material	*Pounds saved per 1,000,000 sets, Present Production based on 17" TV set*	*Pounds saved per 1,000,000 sets—electrostatic focused 17" TV set*
Alnico V Speaker (Saving based on 2.15 oz. magnet 8" table model speaker)	72,000 lbs.	72,000 lbs.
Alnico V Speaker (Saving based on 3.16 oz. magnet 12" console speaker)	135,000	135,000
Alnico V Focus Magnet (Based on 5 oz. magnets)	.....	310,000
Alnico V Beam Bender	4,400	4,400
Steel in 12" Speaker	142,000	142,000
Brass in 12" Speaker	50,000	50,000
Zinc in Focus Magnet	.....	310,000
Steel in Focus Magnet	.....	500,000
Brass in Focus Magnet	.....	22,000
Aluminum—Cup Over Back of Kinescope	62,000	62,000
Brass in Volume Controls	12,200	12,200
Copper-Shorting Band in Power Transformer	190,000	190,000
Copper Hook-up Wire	47,000	47,000
Copper—Leads on Paper and Ceramic Capacitors	11,850	11,850
Aluminum Shield	100,000	100,000

The following tabulation summarizes the metal savings which are in effect in the manufacture of tubes and ferrite magnetic cores used in the manufacture of 1,000,000 TV receivers. A typical 23-tube receiver was used in these calculations.

Material	*Savings per 1,000,000 Television Receivers*
Nickel	
(a) Nickel content in ferrite cores	12,400 lbs.
(b) Nickel in receiving tubes and kinescopes	33,600
Copper in receiving tubes and kinescopes	33,000
Tin content in solder	50

The more important conservation steps that have been taken are as follows:

Redesign of Speakers

When it became known that practically all of the available cobalt would be required by the government for defense items, a study was immediately started to see what could be done to eliminate cobalt from our instruments. Alnico V magnets were used in focus magnets and speakers. (Alnico V contains 24% cobalt, 14% nickel, 8% aluminum, 3% copper, and 51% iron.) The average focus magnet contained 5 ounces of Alnico V, and the average speaker contained 2.5 ounces of Alnico V, or a total of 7.5 ounces per instrument.

The problem of reducing or eliminating cobalt used in speakers could be attacked by changing to an electromagnetic speaker to save the 2.5 ounces of Alnico V. To solve the problem in this way would have resulted in the addition of approximately 1 pound of copper for the field coil. Instead, it was considered more advisable to retain the Alnico V magnet, but to reduce its size as much as possible consistent with maintaining acceptable performance. A complete study and redesign of speakers was made with the result that the largest magnet now used is 1 ounce and the average is approximately 0.75 ounce. This redesign also resulted in a saving in the accompanying steel and brass parts, so that from the speaker standpoint, the savings are as follows:

Alnico V—70% saving compared to early 1950
Steel —35% saving compared to early 1950
Brass —90% saving compared to early 1950

This program is currently in effect and the speaker manufacturers are aware of it.

Elimination of Focusing Magnet

A reduction of alnico used in the focusing magnet of the kinescopes is a slightly longer range change which is being very actively worked on. The focus magnet can be removed completely by continuing the use of electromagnetic focused kinescopes with electromagnetic focusing coil, or by changing to electrostatic focused kinescopes.

Electromagnetic focusing would require the use of a focusing coil with approximately 2 pounds of copper wire and with an adjustable D.C. current flowing in the coil. The D.C. power supply handling capacity would have to be increased in order to furnish this current. This in turn would require more copper and iron in the power transformer, or more electrolytic capacitors and selenium rectifiers which require alminum. This program would obviously be impractical because, although it would save cobalt in the magnet material, it would use much more copper, aluminum and steel. It was therefore decided to change to electrostatic focusing. The change to the use of electrostatic focused kinescopes will cost slightly more per instrument because of the cost of the special components involved, but these special components do not involve critical materials.

The timing for introducing electrostatic focusing in production is determined by the availability of kinescopes, since the kinescope must be changed to permit this type of operation. The 17-inch rectangular sets (which is the largest item of production in the industry this year) will be changed to electrostatic focusing in the second quarter of 1951. By the end of the second quarter of 1951 it is planned to be completely changed over to electrostatic focusing on all sets.

The resultant saving is 5 ounces of Alnico V, approximately 5 ounces of zinc, and approximately 8 ounces of steel.

When we have completely changed over to electrostatic focusing, and assuming that we continue to average 0.75

ounce of Alnico V for the speaker, the total saving in Alnico V will be from 7.5 ounces to 0.75 ounce, or a saving of 90%.

Copper has become a very critical item; and we have effected savings in various ways. Our power transformers originally specified a shorting band 40 mils thick and approximately 2 inches wide. The specifications have been changed cutting the thickness in half, with a resultant saving of 0.19 pound per transformer. Hook-up wire has been reduced from 22 to 24 gauge, resulting in a saving of 33% in the amount of copper used. Certain screw machine parts which are used in the 45-rpm record changer and other places, and which were originally made of brass, are now made of steel.

Since RCA Victor does not manufacture all components, but purchases many parts that go into its instruments, changes in specifications of purchased components to save critical materials are made in cooperation with the various suppliers. Some of the changes which have been authorized are as follows:

(1) The cup over the end of the kinescope on the rear of the cabinet has been changed from aluminum to plastic.

(2) Shorter mounting bushings on some variable controls, saving approximately 10% of the brass in these controls.

(3) Reduction in the length of copper wire leads on paper and ceramic capacitors (20% copper saving).

(4) The use of copper clad steel wire instead of copper wire leads on wire-wound resistors and chokes.

(5) The use of Alnico III magnets (no cobalt required) for beam benders, instead of Alnico V magnets.

For future designs we are continuing to work in the direction of improved components and circuit efficiency, in order to further reduce the amount of materials used. Except for the power transformer, the deflection yoke is the largest component user of copper. Design work has been under way for some time to effect a saving here, and a design using only 50% of the usual amount of copper in the high-voltage coil and yoke appears promising. This in turn will still further reduce the amount of copper in the power transformer by an appreciable amount. The chassis size and depth can also be reduced in the future.

If these developments are entirely successful, we will be able to make additional important savings in steel, copper and transformer steel, over and above the savings shown in the above tabulation. We expect these developments will be completed by the end of April 1951, and we will then issue further information.

Conservation in Ferrite Cores

The conservation efforts and accomplishments given above relate to the metal content in TV receivers. Another important component used in a receiver is the ferrite cores, used as a magnetic core material in deflection yokes, IF coils, etc.

NICKEL OXIDE: Throughout the second half of 1950 our engineering organization has been engaged in an active program to conserve nickel oxide in ferrites by changes in the chemical and metallurgical formulation of the ferrite. The following progress has been made to date:

(1) A change in formulation from 13% to 10% NiO has been successfully developed, and after final tests on end products, will be effected in production in February 1951. This results in a reduction of approximately 23% in NiO content. This saving of approximately 23% in nickel oxide content results in a saving of 12,400 pounds of nickel in the nickel oxide, per 1,000,000 TV sets produced.

(2) Additional engineering and laboratory work to reduce our NiO consumption by another 50% is now in process and is expected to be effected in the second quarter. This is based upon a formulation using magnesium oxide to replace a certain amount of the nickel oxide, reducing the NiO content to only 5%. If we are successful in this further reduction to 5% nickel oxide, an additional saving of 20,000 pounds of nickel content in the nickel oxide will be made per 1,000,000 TV sets.

Materials Savings in Electron Tubes

Very active development programs have been persued to reduce the use of critical materials in the manufacture of tubes.

NICKEL: Nickel, for years, has been an essential material of the electron tube industry. An intensive effort on the part of our engineering organization to conserve nickel and to substitute alternate materials, has brought outstanding results. The following substitution materials for pure nickel are now being used:

(1) *Carbonized Nickel-Plated Steel Strip:* After three years of intensive effort a new plate (anode) material has been developed and tested by RCA engineers to the point where it seems to meet all of the requirements of a substitute for pure nickel strip in tube manufacturing. This new material, known as S8S1, is produced by RCA. The raw material—aluminum-deoxidized, cold-rolled steel strips, 10% nickel-plated, is coated with nickel oxide, which is then bonded to the strip, and carbonized.

(2) *Carbonized Steel Strip:* In some applications a satisfactory carbonized strip can be made using the foregoing process of nickel-oxide coating and carbonizing, but using plain steel (without nickel plating) as the base material.

(3) *Nickel-Plated Iron Wire (Nipron):* Nickel-plated Armco iron—a steel containing less than .05% carbon—is now being widely used by RCA as a substitute for pure nickel wire in the manufacture of a significant number of electron tube components.

(4) *Stainless Steel Wire:* We are now substituting 18-12 stainless steel wire with 18-8 stainless steel wire wherever possible throughout our operations. This permits a 33% saving in nickel content. In addition, we are now attempting the substitution of 18-8 stainless steel wire for nickel wire in certain non-critical tube components; such as getter loops.

COPPER: The quantity copper used in tubes is relatively small as compared to circuit and component uses. Nevertheless, every effort has been made to conserve and substitute alternate materials wherever possible.

Our program for conservation and substitution of copper is as follows:

(1) *Receiving Tubes:* Approximately 90% of our total copper requirements for receiving type tubes is for use as copper grid side rods which are used in about 10% of the receiving types produced. It now appears that, during the first quarter of 1951, we shall be able to effect a 30% reduction in our present usage of copper grid side rods through further usage of nickel-plated iron wires. Copper is also used in the lead wires which connect the elements of the tube to the base. It now appears probable that we can effect a saving of approximately 19% in the use of copper for this purpose by a reduction in the diameter of the leads used.

(2) *Cathode-Ray Tubes:* The principal use of copper in cathode-ray tubes is in the exhaust tubulation which is "pinched-off" upon completion of evacuation of the tube. A program for the substitution of glass for copper is under way which will be instituted by stages during the first quarter of 1951.

(3) *Transmitting and Power Tube Types:* Primary usage of copper in transmitting and power tube types is for anodes and radiators. High electrical and thermal conductivity are required in order to dissipate the great amount of heat generated in such types. No satisfactory substitute for oxygen-free, high-conductivity copper is currently known. It should be noted, however, that nearly all tubes of this type are used in such essential applications as commercial communications, broadcasting, industrial oscillators, and the like.

Similar programs have been instituted with respect to other critical materials. For example, tin is used in solder. The common percentages for tin for such purposes range from 35% to 60%. In tube manufacture the percentage of tin content for all solders has been reduced to 35%, and provision is now being made so that nearly all production can use a 20% tin content solder.

Conservation of TV Installation Materials

While manufacturers of TV receivers are not generally directly concerned with the specifications of installation materials, very important conservation programs can be adopted to substantially reduce the amounts of aluminum, copper, zinc and steel used in installation materials such as masts, brackets, lead-in wire, etc. The industry must bear in mind that antennas in most instances are a necessary part of TV receiver installation. A great deal can be done to guide dealers and servicing organizations in the conservation of installation materials.

Following are some important savings of scarce materials which have been accomplished by the RCA Service Co. as the result of an intensive conservation program:

(1) ALUMINUM: The use of aluminum for masts has been reduced almost 50% during the first quarter of 1951. If this savings can be attained throughout the industry, it would represent a reduction of more than two million pounds of aluminum per one million receivers installed with an outdoor antenna. This conservation of aluminum by the RCA Service Company was accomplished through the following means:

(a) Standard 8′ aluminum masts were replaced by 6′ steel masts wherever possible.

(b) Tall masts using large-size aluminum tubing are being constructed of one-size smaller tubing.

(c) Standard 12′ x 1⅜″ x .083″ wall aluminum masts weighing 4.75 lbs. were replaced by 10′ x 1⅜″ x .072″ wall weighing 3.46 lbs. for a savings of 1.29 lbs. per unit or 27%.

(d) Standard 12′ aluminum masts are also being changed over wherever possible to 10′ x 1⅜″ x 16 ga. steel tubing saving 4.75 lbs. of aluminum per installation.

(e) Standard antennas have been lightened by reducing the wall thickness of aluminum tubing, used for the elements, at the same time retaining strength by using a stronger alloy even though this increases the cost. The ½″ x .042″ wall tubing has been reduced to ½″ x .035″ wall resulting in an aluminum savings of 10.4% per installation.

(2) COPPER: The major use of copper for TV installation is in the transmission line of the 300-ohm ribbon and coaxial types. Substantial reductions in the use of copper have been accomplished by the RCA Service Co. in the following manner:

(a) A nation wide program has been instituted to reduce the footage of cable used per job by placing antenna as near as possible to the receiver, by measuring the required length of line accurately and by splicing together and soldering short lengths. These steps have resulted in reducing the transmission line usage from 123′ per installation to 83′ per installation currently. This represents a net reduction of 32% in the use of copper lead-in wire.

(b) The standard 300-ohm transmission line in the past consisted of 7 strands of No. 28 copper wire which will yield 147.5′ of transmission line per pound of copper. Anticipating the shortage of copper, the RCA Service Company's Engineering Department designed several lighter weight types of transmission line which have proved adequate. The latest type which will be adopted as a standard has 7 strands of No. 30 wire which will yield 234′ of lead-in cable per pound of copper for a net savings of 33%.

(c) Anticipating the probable future reduction of copper useage, tests have been conducted using 300-ohm transmission line with conductors of "copperweld" wire. This is a steel wire coated with a thin layer of copper. While the total weight of the metal content would be approximately the same, the major part of the copper will be replaced by steel with a net reduction of 82½% in copper usage.

(d) Coaxial and twin-ax cable use considerable amounts of copper. In cooperation with the Anaconda Wire and Cable Company, the RCA Service Company is conducting tests on the use of a thin aluminum foil sheath to replace the copper braid shield on these cables. A typical example would be the coaxial cable used on multiple antenna systems. This cable now uses 22.5 lbs. of copper per 1,000′. Twenty pounds of this total are in the shield. The coaxial that is being tested will replace 22.5 lbs. of copper with a cable that contains 2.5 lbs. of copper and ¾ of a pound of aluminum per 1,000′.

(3) ZINC: In order to conserve zinc normally used for plating steel masts and brackets, a plastic coating material is being used for rust-proofing steel masts and steel brackets. The total amount of zinc saved through this process is approximately 320 lbs. per 1,000 antenna installations.

(4) STEEL: The total usage of steel will be increased by the substitution of steel for aluminum masts wherever possible. However, it has been found that such items as roof-mounting brackets lend themselves to redesign for conservation of steel. One typical instance, for example, a mounting bracket weighing 7.4 lbs. has been replaced by two alternate types weighing 5.75 lbs. and 4.9 lbs., respectively. This redesign provided brackets of adequate strength with a net savings in steel of 29½%.

PHILCO'S REPORT

(Continued from page 1)

Materials Savings Already Achieved in Pounds per Million Television Receivers

Materials	*Current Production vs. Fall 1950*
Alnico V { 24% cobalt 8% aluminum / 14% nickel 3% copper }	135,000 lbs.
Copper	456,000
Ferrite { 20% nickel oxide / 25% zinc oxide }	342,000
Silicon Steel	192,000
Tin	550
Zinc	333,000

Principal Design Changes in New Chassis

While it is relatively easy to make minor changes in design and achieve materials savings such as those enumerated above, the evolution of basically new circuitry takes a much longer time. It requires work in research laboratories by specialists in many fields; then a major program of combining numerous new ideas in a complete experimental TV chassis, and proving and improving the performance of this prototype. Next, this first model must be studied and redesigned by engineers familiar with mass production techniques, so that the new receiver can be manufactured efficiently in mass production. The final step, before the design can be released for production, is an exhaustive program of field tests to examine every characteristic of the new receiver in various locations where difficult problems of TV reception are encountered.

The new Philco chassis has undergone this entire process of development. It is field-tested, proved and engineered for production in quantity.

The basic design of the new chassis, which has brought about most of the savings in critical materials, is a direct result of planning long before the Korean war started. There are three major improvements in the new Philco TV design, which may be briefly described as follows:

(1) A new and more efficient horizontal deflection circuit has been developed. This new output circuit includes a new diode damper tube, the 6V3, developed by Philco engineers. The new circuit makes it possible to use a smaller fly-back or horizontal output transformer, and permits operation at lower plate supply voltage than was previously possible. Comparing this circuit with a typical previous circuit, the plate supply voltage required in the new circuit is about 250 volts as compared with 315 volts required by the old design.

The new deflection circuit requires a diode damper tube which will withstand a pulse voltage between heater (filament) and cathode in the order of 5000 volts. Such a

tube had never been commercially produced, and the design was accomplished by using an entirely new type of construction. In the new 6V3 tube, the filament is suspended independently inside the cathode, without touching it at any point, and the cathode receives its heat by radiation from the filament rather than by conduction as in the ordinary tube. This new design makes it possible for the 6V3 to withstand pulse voltages well in excess of 6000 volts. This new tube design has already found other important applications.

(2) With the new efficient deflection circuit, it is possible to use a new plate power supply similar to a design already successfully used by Philco. This new power supply utilizes two selenium rectifiers in a voltage doubler circuit and makes it possible to eliminate the heavy power transformer used in the conventional previous circuit. In the new power supply, a small transformer is employed to supply filament power; this transformer could also have been eliminated, but this would have required connecting the filaments of all tubes in series, and Philco engineers decided against such a design because of its obvious vulnerability.

(3) A third major improvement in the new Philco TV chassis is the use of a newly developed cathode ray picture tube with electrostatic focus. By focusing the electron beam electrostatically, it has been possible to eliminate both previous types of focusers: the heavy permanent magnet focuser made of Alnico V; or the alternative, an electromagnetic focuser with a copper coil requiring a considerable amount of rectified power to energize it.

In addition to these major design improvements, all of which also achieve substantial savings in critical materials, there are numerous other changes in the new Philco chassis which combine conservation and better performance.

* * * *

Materials Savings Possible with New Philco Chassis Per Million Television Receivers

Materials	*New Chassis vs. Fall 1950 Sets Savings in Pounds*	*% Saved*
Alnico V	599,000 lbs.	100%
Aluminum	563,000	68
Copper	1,263,000	26
Ferrite	529,000	51
Silicon Steel	7,397,000	58
Tin	80,260	50
Zinc	792,000	75

It should be noted that ultra-scarce cobalt is entirely eliminated, while the amount of other scarce materials needed is reduced by substantial percentages. Now to consider the specific details of savings under various headings.

ALNICO V, which contains scarce cobalt, nickel, aluminum and copper as indicated, is entirely eliminated in the new chassis design, because of the following changes:

(a) Permanent magnet speaker removed, and replaced by electromagnetic speaker.

(b) Permanent magnet focuser removed; replaced by new electrostatic focusing circuit.

(c) Beam bender of Alnico V removed; replaced with beam bender of Alnico III, containing no cobalt.

ALUMINUM content of the new Philco chassis has been reduced by .563 lb. per receiver by the following changes:

(a) Aluminum frame assembly straps for picture tube are replaced by fabric straps.

(b) Aluminum protective cup for picture tube is replaced by a plastic-and-fibre cup.

(c) One electrolytic condenser, containing aluminum foil, eliminated by use of electrostatic-focus picture tube.

(d) Amount of aluminum foil in other electrolytic condensers reduced by use of lower voltage plate power supply.

COPPER used in the present TV chassis has been reduced by the substantial total of 1.236 lbs. per receiver, even though it has been necessary to add copper wire for the electromagnetic speaker to eliminate Alnico V. Savings of copper in the new design are achieved by:

(a) Large power transformer is removed, and replaced with much smaller filament transformer and voltage doubler power supply using selenium rectifiers.

(b) Amount of wire in audio output transformer reduced, with special compensation to maintain sound quality.

(c) Wire used for hook-ups throughout chassis reduced from size No. 22 to No. 24.

(d) Wire leads on tubular and mica condensers shortened.

(e) Width and linearity coils removed because of use of new efficient deflection circuits.

(f) Size of horizontal output transformer coil reduced through use of new circuits, including new 6V3 damper tube.

(g) Copper ribbon-type ground straps removed and replaced by wire.

FERRITE, which contains 20% nickel oxide and 25% zinc oxide, is a scarce material and the amount used in the new Philco chassis has been reduced 51% by the following changes:

(a) Size of horizontal output transformer core reduced, thanks to new circuit and new 6V3 diode damper tube.

(b) Ferrite core removed from deflection yoke; and replaced with new yoke of flake iron, which is a non-critical material.

(c) Width and linearity control cores eliminated by use of new efficient circuits which include resistor-type width control and require no linearity control.

SILICON STEEL is conserved in substantial quantity in the new chassis, which reduces the amount required per receiver by 7.399 lbs. by these changes:

(a) Large power transformer removed, replaced by small filament transformer and voltage doubler power supply, with selenium rectifiers.

(b) Size of audio transformer core reduced, maintaining high quality of sound output by special compensations.

TIN will be conserved in considerable quantity in producing the new Philco chassis by using a new solder with 20% tin content, instead of the present solder with 40% tin; and by using a new flux with this solder to make permanent soldered joints. The resultant saving amounts to 80,260 lbs. of tin, a strategic material, per million TV receivers.

ZINC is being conserved by means of eliminating some zinc die castings (notably one in the focuser); by the savings noted above under ferrite; and also by eliminating brass (an alloy of copper and zinc) wherever possible. All brass hardware and machine screw parts are being replaced with steel, wherever ferrous metals can be employed. The amount of brass in control bushings has been reduced about 10%. All brass formerly used for decorative purposes on the cabinet is also being removed.

CADMIUM, another scarce metal, is being conserved by changing the plating of the new deflection chassis and other metal parts to a plating of non-strategic materials wherever soldering requirements permit.

Total Weight Savings

In view of the impressive list of changes enumerated above, it is not surprising that the new Philco TV chassis and picture-tube mounting frame weigh considerably less than the comparable current model now in production. It should be noted that ever since early 1950, Philco design has divided the chassis into two parts; one contains tuner, IF and other circuits; the second includes the power supply and associated circuits. The new design continues this highly efficient "duplex chassis" and achieves savings in critical materials — and weight — in both parts of the chassis, as well as in the picture tube frame assembly.

Savings in Weight Achieved by New Philco Television Chassis

	Present Receiver	*New Receiver*
R-F, I-F Chassis Section	6 lbs. 15 oz.	6 lbs. 3 oz.
Power Chassis Section	28 lbs. 8 oz.	18 lbs. 3 oz.
Frame Assembly, Yoke, Focuser	4 lbs. 3 oz.	3 lbs. 2 oz.
Totals	39 lbs. 10 oz.	27 lbs. 8 oz.

Thus the new Philco design saves a total of 12 lbs. 2 oz. per receiver. This weight saving means not only a substantial conservation of critically scarce materials. It also means that new, lighter chassis will be easier to handle in production, thus reducing the fatigue of workers. Further the lighter chassis will appeal to future owners of the new

sets, especially table models which are often moved from room to room, or from one location to another in a room.

Materials Savings in Associated Fields

While the comprehensive program described above has resulted in the development of an entirely new Philco TV chassis, with improved performance and conserving important amounts of scarce materials, other engineers of the company have been active in similar conservation programs. For example, Philco tube engineers are engaged in a long-term project to reduce use of such materials as nickel and copper in both cathode ray picture tubes and in various types of receiving tubes. Company engineers working with antennas and other installation materials have also achieved remarkable results, practically eliminating the aluminum used for outdoor antennas and saving important quantities of copper and zinc.

Many TV-radio receivers are sold in "combinations" containing automatic record changers. Philco mechanical engineers have redesigned the highly successful M-22 three-speed automatic changer to conserve many critical materials.

Materials Savings in TV Tubes

Although the total amounts of critical materials involved in making cathode ray picture tubes and receiving tubes are extremely small, in the aggregate the savings that may be achieved are well worthwhile.

Materials Savings with One Million 17" Cathode Ray Picture Tubes

	Present Design	*Future Design*	*Saving*
Nickel	4,000 lbs.	2,000 lbs.	2,000 lbs.
18-12 Stainless Steel	12,000	8,000	4,000
Copper	3,000	2,500	500

Specific savings include:

Nickel

(A) *Receiving Tubes*

(1) Wherever possible, carbonized nickel-plated steel strip has been, or is being substituted for nickel used for the plates of receiving tubes.

(2) Research work is going on to replace nickel for the plates of certain tubes with aluminum-clad steel strip. This has already been done in Europe, and as soon as a sufficient supply of aluminum-clad steel strip is available, more substitution will be achieved here.

(3) Nipron, or nickel-plated iron wire, is being used for inside stem leads to replace nickel wire. Research is also under way to use Nipron for outside stem leads.

(B) *Cathode Ray Picture Tubes*

(1) Nipron is being used for inside stem leads, and is saving 60-70% of the nickel required for this application.

(2) Philco has changed the bulb-spacer design in 90% of cathode ray tubes, reducing the 18-12 stainless steel required by 50%. This represents a saving of 50% in nickel requirement.

(3) The gun design on one type of picture tube has been changed, reducing the amount of 18-12 stainless steel required by 70% over conventional gun designs.

(4) A new gun is being developed by Philco tube engineers for all cathode-ray tubes, which will reduce usage of 18-12 stainless steel by 40%.

Copper

(A) *Receiving Tubes*

Copper-clad steel wire is being used to replace copper for grid side rods, wherever this change is feasible.

(B) *Cathode Ray Picture Tubes*

(1) Philco has completely eliminated the use of copper in exhaust tubulation on the one type of picture tube where this technique was employed. Glass has been substituted, and Philco has always used glass extensively for exhaust tubulation, thus conserving copper.

(2) The diameter of Dumet stem leads has been reduced, saving 15% of the copper used in these leads.

(3) Philco has concentrated entirely on glass envelopes for picture tubes, thus conserving large amounts of chrome steel—savings in chromium—as compared with other major producers.

Savings in TV Installation Materials

Ever since early 1950, Philco has taken the lead in reducing the amounts of critical materials used for installing TV receivers, including the aluminum, copper and zinc used in TV antennas, mounting hardware, and transmission or lead-in line.

Savings in TV Installation Materials per 1,000,000 Receivers Installed with Outdoor Antennas

	Savings By New Philco Designs
1. Aluminum	6,800,000 lbs.
2. Copper	120,000
3. Zinc	350,000

Details of these savings in installation materials are as follows:

Antennas

Masts: The use of aluminum for antenna masts has been eliminated by Philco since the middle of 1950, with steel masts having been introduced early last year. The standard masts sold by Philco are now made of steel tubing in 5′ and 6′ lengths, 1¼″ O.D. and .030″ wall thickness. These steel masts replace the standard 6′ aluminum masts formerly sold by Philco. On the average, two of these aluminum masts were required for the typical installation, or a total weight of about 4 lbs. of aluminum per installation, all of which is saved.

Cross-Arms: In all standard Philco antennas for the past eight months, steel cross-arms have been used, saving about 1 lb. of aluminum per antenna. (Standard antennas account for 94% of total Philco antenna sales.) In deluxe Philco antennas, the cross-arm has been made of aluminum or manganese iron, but steel cross-arms will be used from March 1, 1951. (Deluxe antennas—6% of sales.)

Dipoles, Fans and Hardware: Receiving elements of standard antennas, and mounting hardware have been made either of dural or butt-seam welded aluminum. This is being entirely replaced with steel, including steel tubing, saving about 2 lbs. of aluminum per antenna.

Savings in Zinc: To conserve zinc normally used for coating steel masts and mounting hardware, special rust-proofing and painting processes are now being employed which will save about 350 lbs. of zinc per 1,000 antenna installations.

Use of Steel is being increased by substituting steel for aluminum in all antenna masts. However, some savings in use of steel are being achieved by redesign of mounting brackets.

Transmission or Lead-In Line

Practically all line supplied by Philco through distributors and dealers for TV installations is 300-ohm ribbon line. Here there has been a reduction from 7-strand line, using No. 28 copper wire, to line with 7 strands of No. 30 wire. This amounts to a saving of 33% in copper.

Also, all installations are made with the minimum footage of transmission line required for each specific job.

Savings in Philco Automatic Record Changers

The savings shown below have been achieved by Philco mechanical engineers, by such methods as substituting steel stampings for zinc die castings, etc.

Material Savings in Pounds per 200,000 Record Changers

	Current Production vs. New Series Changers	*Savings in %*
Aluminum	10,000 lbs.	100%
Brass	74,400	100%
Phosphor Bronze	600	100%
Stainless Steel	9,700	50%
Zinc	200,000	83.5%

Output & Stocks Up But Sales Lag, *page 8.*

'MRO' AIDS BROADCASTERS, INDUSTRY: NPA's new maintenance, repair and operating (MRO) program (Regulation 4) is made to order for all phases of broadcasting and electronic industries. It gives these assurances:

(1) No TV-radio station will be forced to leave the air for lack of maintenance equipment or parts.

(2) Police, fire, aircraft, marine and emergency communications systems will not be interrupted because of shortages.

(3) Replacement parts will be available for intercom, public address and other electronic equipment used in any business, industry or governmental agency.

(4) Electronic distributors, jobbers, wholesalers will be able to obtain and stock replacement parts.

(5) Electronic parts makers will be able to get materials required to turn out parts and equipment to keep America's electronic and communications systems operating at full capacity.

(6) TV-radio, electronic and all other manufacturers can keep their machinery and plants in top operating condition, despite shortages and restrictions.

* * * *

Much credit for MRO order goes to John G. Daley and Donald Parris, director and deputy director of NPA's Electronic Products Div. As defense-induced shortages increased, division personnel spent more and more of their time listening to tales of woe from police and fire departments and businessmen whose operations were being held up by unavailability of a couple of tubes, a transformer or other repair parts. Realizing importance of maintaining existing equipment, division had been issuing special directives for each individual complaint.

These parts may now be procured automatically, without red tape. Regulation 4 gives all businesses, institutions and Federal, State and local governments right to use DO priorities for MRO equipment and supplies of all kinds. But order does not pin priority on repair parts for homes or home equipment, including TV-radio.

New regulation is similar to -- but more limited than -- system urged in January by mobilization committee of Chicago's Assn. of Electronic Parts & Equipment Mfrs. (Vol. 7:5-6). Committee Feb. 28 applauded NPA action which it said "goes a long way toward alleviating what threatened to be a dangerous bottleneck in maintenance and repair of communications equipment, radio and TV..."

Application of order to home TV-radio was urged by committee, whose chairman, Talk-A-Phone Co. president Arie Liberman, asked "adoption of specific interpretations necessary to insure that home, auto and amateur radio and TV receivers and intercommunications equipment can serve designed functions of entertainment, dissemination of news and communications as an indestructible link in a national network of civilian defense."

It appears probable that order soon will be extended to apply to "ham" radio operators -- whose service to nation in time of distress is well known -- but it will take considerably more selling to convince NPA that no American home is com-

Copyright 1951 by Radio News Bureau

MAR

plete without an A-1 priority to keep the family TV or radio set working.

MRO priorities are equal to all other priorities, including those used by armed services for military equipment.

Priority for MRO supplies is known as "DO-97." To use this priority, purchaser merely writes on his order for equipment: "DO-97, certified under NPA Regulation 4." He needn't notify NPA, but is required to keep records of DO purchases.

Priority is "extendible", in that supplier who fills order may use same priority to replenish his stock of the items ordered; manufacturer may use it to procure materials to make more of same type products.

No firm is permitted to issue these priority ratings in any quarter in excess of its average quarterly dollar purchases for such supplies in 1950 or the fiscal year ending nearest to Dec. 31, 1950. If an establishment needs more than that amount of MRO supplies, it must get NPA's permission. Firms spending less than $1000 for MRO supplies in any quarter may disregard quota restrictions.

Nobody is required to use priorities to obtain MRO supplies. But once an establishment takes advantage of the new rating to get any of this equipment, total acquisition of MRO supplies -- both rated and unrated -- becomes subject to quarterly limitations.

During remainder of first quarter, establishments are permitted to use ratings to buy up to one-half their quarterly quota. For additional details on this important order, obtain copy of NPA Regulation 4 and "Questions and Answers Regarding Regulation 4" from National Production Authority, Washington 25, D.C., or from nearest Commerce Dept. field office.

COY SOUGHT FOR NAB-TV POST: It's a big job the telecasters have cut out for head of their newly authorized TV division within NAB (soon to be renamed National Assn. of Radio & Television Broadcasters) -- and this week they undertook (1) to inquire whether FCC chairman Wayne Coy might consider taking the $35,000 post, and (2) to sign up as many of the 107 stations and 4 networks as they can for membership.

Coy is due back in Washington in about week, is being sounded out over week end (while in New Orleans attending CBS affiliates advisory board meeting) by chairman George Storer of committee authorized to make appointment (Vol. 7:8). Should he accept, his FCC post may go to Neville Miller, onetime Louisville mayor, ex-NAB president, now Washington attorney, who is particularly close to Vice President Barkley and who recently came into a large inheritance, making it possible for him to accept. Others mentioned for FCC chairmanship are Comr. Frieda Hennock, backed by Democratic women's boss India Edwards; Don Fink, editor of Electronics Magazine.

Should Coy be amenable to offer, as against seeking reappointment and a possible Senate fight over confirmation when his term expires next June 30, he would inherit task of handling such tough issues as excess profits tax, proposed 25% excise on TVs, per-program ASCAP licenses, allocations hearings, AT&T rates for TV, films for TV, station costs and rate studies, etc. These are some of subjects on agenda of TV division, which has own board, own dues structure, own budget -- will operate utterly independent of numerically dominant NAB-AM membership.

Opposition may develop because of Coy's stand on color, though telecasters haven't been quite so bitter on that issue as manufacturers who once also considered him for presidency of their association. There's also some fear among broadcasters because of his vote in WBAL "Blue Book" test case, favoring giving that Baltimore station's license to Drew Pearson & Robert Allen. He's known to be mainly interested in TV, convinced radio's big future is in visual medium, has excellent background of radio management and journalism as well as govt. administration and politics.

It's reasonable to believe networks would favor choice -- certainly CBS and perhaps even NBC (whose parent RCA is leading battle against FCC's color edict). Association would necessarily remain neutral on color issue.

Unless he has other plans, undisclosed, Coy would return to heavy FCC agenda with virtually no defense aspects as yet -- an agenda embracing more long hearings on allocations looking to end of freeze; FCC policy on color after Supreme Court

decides; educational channel policy; unpopular hearing on TV program content, etc. To be set up soon will be new Broadcast Bureau, with Harry Plotkin, asst. general counsel, who swings plenty of weight on FCC policy, apparently slated as director.

* * * *

NAB-TV is due to begin operation April 1, with Thad Brown already engaged as counsel and old TBA virtually disbanded this week. Memberships are now being solicited, with most stations expected to join, probably all networks. (NBC pledged its 5 stations this week; CBS & ABC, non-members of NAB, are fairly sure to join.) Of $150,000 initial budget, $100,000 is to be spent entirely on TV projects, $50,000 to go toward NARTB overhead. Dues are highest one-time 5-minute rate or half one-time 15-minute rate monthly.

Quest for new president of over-all NAB setup, to succeed Judge Justin Miller, who becomes chairman (Vol. 7:5), led to definite offer of $45,000 post this week to Carl Haverlin, now president of Broadcast Music Inc. (Vol. 7:6). He has promised answer to NAB committee within week.

WHERE 1950 TV SETS WENT: From the State and county tabulations below, you get a reasonably good idea where the TV receivers made during 1950 went -- although transshipments, sales and swaps as between manufacturers, distributors and dealers may mean that a goodly number didn't always go into homes of these particular areas.

Figures are RTMA's estimates of sales to dealers during year, covering geographical shipments by entire industry. RTMA explains disparity between its 1950 production estimate of 7,463,000 TVs, its factory sales estimate of 7,355,100, and its total shipment figure of 7,068,000 herewith is due to normal lag in distribution from factory to dealer.

Following were TV set shipments last year to 36 States, the District of Columbia and areas unlisted (export & non-TV areas), as estimated by RTMA:

Station Accounts: Pittsburgh's Duquesne Brewing Co. this week began first elaborate live programs from new studios of WDTV, bringing Kyle McDonald to town for show's Feb. 28 debut. Sponsor will rotate 4 different musical shows per month, Wed. 8-8:30, catering to all tastes—symphony, popular orchestra with chorus, hillbilly band, variety—placed thru Walker & Downing . . . WDTV also signed big Kaufmann's dept. store for *Something New*, merchandising film, Thu. 1-1:15 . . . More and more beer sponsors turning to TV, latest reported being Jacob Ruppert, New York, for its new Knickerbocker Beer, thru Biow; Piel's, New York, thru Kenyon & Eckhardt; Rheingold, New York, thru Foote, Cone & Belding; Adam Scheidt, Philadelphia, thru Ward Wheelock; Maier, Los Angeles, for its Brew 102, thru Biow, L. A.; Jacob Schmidt, Minneapolis, thru Olmsted & Foley Adv. . . . Knickerbocker Textile Corp., thru Sterling Adv., New York, will use TV with other media in early fall campaign tying in with motion picture *Quo Vadis*, featuring textile designs based on movie's Roman background . . . Sinclair Refining Co. (anti-rust gas) starting extensive spring campaign, including TV, thru Morey, Humm & Johnstone, N. Y. . . . Eversharp begins new campaign this month with TV included, thru Biow Co., N. Y. . . . Among other advertisers currently reported using or preparing to use TV: Welch Grape Juice Co. (sweet wine), thru Al Paul Lefton Co., Philadelphia; Rushmore Paper Mills Inc. (Vanity Fair cleansing tissues), thru Paris & Peart, N. Y. (WCBS-TV); National Carbon Co. (Eveready batteries), thru Wm. Esty Co., N. Y. (WTMJ-TV); C. H. Runciman Co. (Hallmark beans), thru Goodkind, Joice & Morgan, Chicago (WTMJ-TV); Allen B. Wrisley Distributing Co. (Wrisley soap), thru Earle Ludgin & Co., Chicago (WABD); D. Goldenberg Inc. (peanut chews), thru Clements Co., Phildelphia (WPTZ); Hathaway Mfg. Co. (curtains), thru Abbott Kimball Co., N. Y. (WCAU-TV); Wm. S. Scull Co. (Boscul coffee), thru Lewis & Gilman, Philadelphia (WPTZ); Best Foods Inc. (Nucoa margarine), thru Benton & Bowles, N. Y. (KTLA); O-Cel-O Inc. (cellulose sponge products), thru Comstock Duffes & Co., Buffalo (WPTZ); Hudnut Sales Co. (hair coloring), thru Dancer-Fitzgerald-Sample, N. Y.; J. L. Prescott Co. (shoe polish), thru Monroe F. Dreher, N. Y. (WCAU-TV); Sundial Branch, International Shoe Co., thru Hoag & Provandie, Boston (WCAU-TV); Kaye-Halbert Corp. (TV sets), thru Calkins & Holden, Carlock, McClinton & Smith, Los Angeles; Walt Disney Productions (*Alice in Wonderland* movie), thru C. J. LaRoche & Co., N. Y.

Program costs are up 33⅓% over last year, *Ross Reports on Programming* states in 17-page program cost study dated Feb. 1. Average cost of hour drama has gone from $15,000 to $25,000; hour comedy-variety show, from $15,000 to $45-50,000; half-hour situation comedy, from $7500 to $10,000; quarter-hour childrens' show, from $750 to $1000. Ross lists 3 major reasons for jump in costs: (1) More lavish productions. (2) Use of name performers and more costly properties. (3) Higher union scales.

Advertisers' attitude toward radio rates in TV cities will be closely watched by broadcasters when Assn. of National Advertisers meets March 28-30 in Hot Springs, Va. ANA last year sparked unsuccessful drive to cut radio rates because of TV's impact on listening (Vol. 6:29-31, 39). NBC burned its fingers on same proposal last December, dropped it month later (Vol. 6:50, 7:1).

March 1 sets-in-use reported since NBC Research's "census" of Feb. 1 (Vol. 7:8): Washington 244,260, up 10,260; Fort Worth-Dallas 109,264, up 4264; Memphis 79,277, up 4177; Norfolk 61,459, up 5759; Charlotte 61,312, up 4712; Greensboro 57,455, up 7655.

Network Accounts: CBS-TV considering moving into morning schedules, offering Steve Allen and other features, possibly beginning as early as 10 a.m. . . . General Foods reported buying DuMont's *Captain Video*, Mon.-Fri. 7-7:30, with 7-year contract . . . Wamsutta Mills (textiles & sheets) will sponsor 12:30-1:30 portion of *Easter Parade* on CBS-TV, Sun. March 25, thru McCann-Erickson, N. Y.; Bulova Watch Co. will take 1:30-2 segment, thru Biow Co., N. Y. . . . Colgate-Palmolive-Peet reported readying simulcast of *Strike It Rich* on CBS-TV, Mon.-Fri. 4:30-5, thru Wm. Esty Co., N. Y. . . . Next Bob Hope appearance on Frigidaire's *Comedy Hour* on NBC-TV will be April 8, Sun. 8-9.

———■———

Temporary licenses for 19 FM stations have been handed out by FCC, pending "study" of special services such as transitcasting, storecasting, functional music (Vol. 7:5). About 20 more stations are rendering such services but their licenses haven't yet come up for renewal. Stations on temporary permits: WEAW, Evanston; WWDC-FM, Washington; WSAI-FM, Cincinnati; KBON-FM, Omaha; KCMO-FM, Kansas City; KTNT, Tacoma; KXOK-FM, St. Louis; WEHS, Cicero, Ill.; WGTR, Boston; WHAV-FM, Haverhill, Mass.; WJHP-FM, Jacksonville, WJLB-FM & WLDM, Detroit; WLRD, Miami Beach; WMMW-FM, Meriden, Conn.; WTOA, Trenton; KQV-FM & WKJF, Pittsburgh; KRKD-FM, Los Angeles.

Quadrupled use of FM channels is claim of Multiplex Development Corp., 70 Pine St., New York, (Wm. S. Halstead), in reporting results of field tests to FCC this week. Company says tests of its multiplexing system (via facilities of former WGYN) show that regular FM program can be broadcast uninterrupted while same channel carries another program of AM quality, plus mobile radio service, plus facsimile or teletype. Company's interest is patents and equipment manufacture, has petition to amend FM rules pending before Commission. It reports Navy greatly interested, particularly in facsimile weather map possibilities. It also thinks system may be way off FCC "hook" for FM stations now rendering transit, storecasting or functional music service.

Lamenting failure of FM to grow as anticipated, and saying that "quality of radio reception in most parts of the country has deteriorated greatly in the last 5 years," editorial in Feb. 14 *New York Times* puts blame on manufacturers. It states that "only a few have had the foresight and courage to promote and sell FM sets," but points with pride to increase, from 585,000 to 838,000, of FM sets in New York area during 1950. Editorial concludes: "As the guardian of the public's right to good radio reception, it is time for the FCC to find out whether the opposition to modern FM broadcasting is inspired by selfish motives, and if it is, to do something about it." The *Times* owns WQXR & WQXR-FM.

Extremely valuable engineering tool, engineers say, is new "RF Micropotentiometer" developed by Bureau of Standards' M. C. Selby. Their only reservation is that it may prove "laboratory-bound," i. e., too expensive or delicate for ordinary use. Bureau says device provides "accurate voltages from 1 to 10^5 microvolts without the use of attenuators" up to 1000 mc, should prove particularly useful in measuring receiver sensitivity.

Another "scenery saver": "Scenescope," like "Vistascope" (Vol. 7:8), employs photographs in box in front of camera lens to make actors appear to be moving in scenery difficult or impossible to reproduce in studio. Invented by Frank Caldwell and used on WOR-TV, New York, Scenescope employs several transparencies and number of mirrors, whereas Vistascope uses single photo with cutouts.

Personal Notes: Will Baltin, TBA secy.-treas. since its inception in 1944, resigns as of March 9 to join Screen Gems Inc., subsidiary of Columbia Pictures Corp., as sales mgr. of new film series titled *Disc Jockey Toons* to be made especially to synchronize with playing of standard records . . . Lowry H. Crites, General Mills adv. comptroller and director of media, adds duties of TV-radio program director under adv. v.p. S. C. Gale; Henry Cox, ex-ABC, appointed his aide . . . Bill Hodapp, continuity editor of WAVE, Louisville, becomes director of Teleprograms Inc., New York, newly formed by Alfred P. Sloan Foundation and NBC-TV to produce documentaries . . . George M. Halbert, from Legal Dept., named TV contract negotiator for NBC's TV talent & Procurement Dept. under Carl M. Stanton, mgr. . . . Walter D. Scott, NBC Eastern radio sales mgr., promoted to national radio network sales mgr., and Gordon H. Mills upped from Eastern sales to Midwest radio network sales mgr. . . . Peter Finney promoted to v.p., Erwin, Wasey & Co., in charge of Admiral account . . . Frank E. Mullen, ex-NBC, now residing in Los Angeles, retained as management consultant for *Los Angeles Times*' KTTV, expected to advise on choice of successor to mgr. Harrison Dunham, resigned . . . David Taft, brother of executive v.p. Hulbert Taft Jr., named managing director of WKRC & WKRC-TV, Cincinnati . . . Wm. O. Crampton, ex-WSYR-TV, now production mgr., WAFM-TV, Birmingham . . . Roy Wilson, New York radio producer, appointed program director of WLWC, Columbus, succeeding Tom Gleba, resigned . . . Robert Seal, ex-NBC & KOB-TV, Albuquerque, appointed chief of program operations of KTTV, Los Angeles . . . Edgar Kobak named permanent chairman of BAB . . . Helen Mobberley, prominent in Washington radio circles for many years, has resigned as asst. to gen. mgr. of WWDC to join DuMont's WTTG . . . Ivor Kenway, ex-ABC v.p., now with Grey Adv. Agency, N. Y.

———■———

That sharp observer of the amusement business, *Variety*, in Feb. 28 issue, puts finger on several noteworthy trends: (1) NBC, probably others, finding candy-popcorn sales prospects too valuable to resist, are planning to open up their studios and TV theatres to concessionaires. Famed Radio City Music Hall has capitulated, after having been one of last theatre holdouts. (2) "The radio programming market is going begging. Not even the ratings appear to matter these days, when the average sponsor has become so TV-happy that you can't even give him a radio show for free." Examples of well-rated programs hard to sell are NBC's *Big Show, Nero Wolfe, Sam Spade, Hedda Hopper, Magnificent Montague, Duffy's Tavern* and CBS's *Hear It Now, Songs for Sale.* (3) TV now has more network sponsors than AM, 173 vs. 129, therefore "this diversity of sponsorship means that economic shakeups are less likely to disrupt the TV pattern." *Variety* also points out that 74 of the TV sponsors haven't been in radio for at least 5 years, quotes ABC v.p. Fred Thrower's opinion that this means radio hasn't as much to fear from TV as first thought.

TV quirks & curios: Opportunity for TV "bootleggers" or "wavetrappers," living between TV microwave stations, is visualized in March *Tele-Tech:* "The temptation must be strong for would-be viewers who, while denied TV service through the freeze of the FCC, know that main trunk lines carrying video pass close by them." Magazine sees no great difficulty in building 4000-mc receiver to utilize signals . . . Reason for chilly house of Eben Thompson, Lexington, Mass., turned out to be heat from TV set, which threw oil-burner thermostat out of kilter . . . Experimental stove with a built-in 7-in. TV set, to sell for about $500, was displayed by Western Stove Co. to test buyer reaction at recent Chicago Furniture Mart.

Supreme Court forbids censorship of TV films by States or localities, in refusing Feb. 26 to review decisions of Federal courts in Philadelphia denying State Board of Censors' efforts to preview TV films as it does motion pictures. Courts had held Congress set up FCC to regulate broadcasting and had thus "occupied fully the field of TV regulation." State Board's appeal was opposed jointly by Philadelphia's WPTZ, WFIL-TV, WCAU-TV, Pittsburgh's WDTV, Lancaster's WGAL-TV (Vol. 6:36, 50).

"Invasion of privacy" was charged in St. Louis this week by "betting commissioner" James J. Carroll, who refused to testify before Kefauver Crime Committee as long as KSD-TV's cameras were on. Sen. Kefauver said Carroll would be cited for contempt, starting debate among lawyers and jurists as to whether such telecasts are violation of constitutional rights and whether they're conducive to "quest for truth," even if legal. Detroit stations covered hearings last week, got terrific viewer response, no legal repercussions. Los Angeles' KECA-TV was set to carry them next.

Censorship of TV by FCC was advocated by Rep. Thomas J. Lane (D-Mass.) in Feb. 28 speech on House floor. He accused TV of "abusing the hospitality of American homes with lewd images and suggestive language that . . . excite those who are underage and distress every decent adult." He told of recent criticisms by Archbishop Cushing, of Boston, who warned TV, particularly comedians, to clean up or face concerted action of clergy, and Bishop Wright, of Worcester, who deplored "poor taste of a sexy-voiced and hip-twisting torch singer who belongs in a barn."

House hearing on McFarland Bill to streamline FCC (Vol. 7:4, 6, 8) is likely, now that Interstate & Foreign Commerce Committee is lining up hearings on measures involving various agencies under its jurisdiction. Senate and House committees have been playing ring-around-the-rosy with bill: Former wants House to pass McFarland bill, latter wants Senate to pass FCC-advocated bill to expand Commission's monitoring activities. Senate is willing to pass monitoring bill, but only if "amended" to include McFarland measure. House committee held hearings on McFarland bill last year, but says fresh one is needed because of new members on committee.

Substitute for radiation bill—suggested by Senate Interstate & Foreign Commerce Committee in lieu of military's sweeping measure (Vol. 7:8)—has drawn comment only from NAB so far. NAB agreed in general with Senators' idea—brief amendment to Communications Act Sec. 606(c)—but wanted to make sure that (a) President could close down or take over control of stations and other electromagnetic devices only after issuing proper proclamation, and (b) owners would be assured "just compensation" when stations and devices are either closed down or controlled.

Experimental TV station in Emporium, Pa., is now being sought by Sylvania, which was recently slapped down by courts for illegal transmissions (Vol. 7:5). Company filed application with FCC this week, asking authority to experiment on Channel 7, and on 520-540 & 870-890 mc for purposes of testing tubes and circuits, particularly in fringe areas. Station would operate 84 hours weekly—half test pattern and monoscope, half rebroadcasting signals of WJAC-TV, Johnstown. Powers planned are 42 watts for No. 7, 168 for 520-540 mc, 300 for 870-890 mc.

Series on TV station design, by noted designer Dr. Walter J. Duschinsky, 425 E. 53rd St., New York, is being featured in 4 successive issues of RCA's *Broadcast News.* Illustrated articles develop subject from basic planning to specific application.

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Mobilization Report
March 3, 1951

NEW SHORTAGES LOOM, WAR ORDERS FEW: Govt. officially acknowledged this week, for first time, that military orders, under present planning, will require only minor fraction of electronic industry's capacity (Vol. 7:3) -- therefore civilian production must continue indefinitely. Meanwhile, materials outlook continues to worsen.

More than a score of electronic equipment and component manufacturers, summoned hastily by wire, were told in Washington March 1 by Defense Production Administrator Wm. H. Harrison that only small part of nation's vast electronic plant is now required for military production. (For list of those attending, see p. 7.)

Conference was called ostensibly to discuss effect of coming steel-copper-aluminum durable goods limitations (Vol. 7:8). Gen. Harrison said TV-radio industry should be less affected by these restrictions than by shortages of other materials.

Ingenuity and know-how of industry -- as already demonstrated in TV-radio conservation programs -- should keep civilian production going, Gen. Harrison said. But he could give no assurances materials will be available to do the job. He did say DPA and NPA will continue to give the industry sympathetic consideration to help keep plants operating.

Govt. officials painted dismal picture of materials outlook. Cobalt, they hinted, may eventually be cut off entirely from the civilian industry. And they couldn't promise extra copper to substitute for cobalt in speaker magnets.

Tungsten and selenium were singled out for special mention as critical items -- pointing up new shortage problems facing industry later this year.

* * * *

First all-out allocation of tungsten supply (Vol. 7:4) -- scheduled to begin this month -- was postponed until April. But tungsten processors and NPA officials this week characterized shortage of that metal as serious.

Far Eastern supplies of tungsten have been cut off. What's worse, there is no known substitute for the metal in vacuum tube and incandescent lamp filaments. Large quantities of tungsten are also used in compounds for sealing broadcast and power tubes. In addition, tungsten is used heavily in making tool steel, carbide and jet plane engines.

So you can expect crisis in electronic tube supply in 3-6 months. Previous tube shortages have been largely due to lack of plant capacity. Most tube makers by now have enlarged their plants, but shortages -- first nickel, then tungsten -- are creeping up. Ever-increasing military and essential civilian demand for tubes (new MRO priorities will be big factor) will leave smaller and smaller amount for original and replacement equipment in home TV-radio sets.

* * * *

Cobalt-copper-selenium shortage will put 3-way squeeze on TV manufacturers. Speaker makers have been allotted 4-5000 lbs. more cobalt this month than last (Vol. 7:5), but their ration is enough for little more than one-third of normal production. With appropriate circuit changes, set manufacturers could use copper-wound electromagnets instead of cobalt-containing alnico speaker magnets -- but 35 lbs. of copper is needed to do the magnetic work of a pound of cobalt.

Some manufacturers are using selenium rectifier voltage-doubler circuits to eliminate power transformers, with resultant large saving of copper and steel. Some of the copper saved is used in electromagnetic speakers, replacing the alnico type. This cobalt-saving method may backfire if selenium shortage becomes severe as more manufacturers turn to voltage-doubler circuits.

New electrostatically-focused picture tubes (Vol. 7:1,3-8), scheduled to be in production next month, will add materially to savings of cobalt. But don't get idea that switching to the new tube will release more cobalt for speaker magnets.

It's far more probable that NPA will progressively tighten TV-radio cobalt allocation -- as industry, through its own conservation program, devises ways to use less and less of the critical metal. Thus, cobalt saved by the industry won't be available for the industry's use. It will go into war materials.

Silver lining in cobalt-copper cloud is possibility of development of new speaker using little or no critical metal. Laboratories are at work on this project. Under active study is capacitance speaker -- variation of ancient capacitance microphone and earphone -- whose major metallic part is sheet of aluminum foil.

Mobilization Notes: Defense Dept. has obligated $23.1 billion in expenditures for first 7 months of fiscal 1951 (July through January). Procurement obligations for so-called hard goods (aircraft, ships, ammunition, electronics-communications) amounted to $14.1 billion, although additional electronics-communications are obviously included in additional $800,000,000 for military construction and facilities expansion. Remaining $8.2 billion went for clothing, subsistence, pay, research & development, etc.

Industry-wide conservation program will be sparked by RTMA. President Robert C. Sprague March 2 asked all member companies to cooperate in materials-saving plan, and announced industry's engineers will meet soon under direction of RTMA Engineering Dept. director Dr. W. R. G. Baker to implement program. Such a program, Sprague wrote RTMA members, will enable industry "to obtain the materials it needs to keep production of TV-radio sets at a healthy level," thereby assuring "that a vigorous and efficient industry will be in existence against the day when all-out production for war may be needed."

Mobilization Personals: Arthur S. Hawthorn, ex-RCA fabricated products sales mgr. and production expert, named special asst. to W. W. Watts, RCA v.p. on leave, Assistant to DPA Administrator . . . **Eric D. Bovet**, statistical expert, ex-Navy authority on production and procurement scheduling, author Bureau of Ships booklet, *Standardization of Electronic Equipment*, named to staff of NPA Electronic Products Div.

* * * *

Among unclassified military contracts for electronics and related equipment ($100,000 or more) announced by Commerce Dept. for 2 weeks ended Feb. 28: Through Signal Corps, Philadelphia—Federal Telephone & Radio, $1,252,992, electron tubes; Johnson Service Co., Milwaukee, $572,400, radiosonde modulators (40,000 units); Eastern Co., Cambridge, Mass., $100,000, public address sets (225); Wilcox Electric Co., Kansas City, $100,000, amplifiers (51). Through Air Materiel Command, Dayton—GE, $365,750, radio components. Through Navy Aviation, Philadelphia—Hazeltine, $112,700, attenuator and modulator load, and 100 absorbing screens. RCA was awarded $272,700 in contracts—$197,700 for tubes through Navy Electronic Supply Office, Great Lakes, Ill., $50,000 for 50 search receivers through Signal Corps and $25,000 for tube development work through Navy Bureau of Ships, Washington. Rudolph Wurlitzer Co. announced March 1 that it has been awarded more than $5,000,000 in defense contracts through Signal Corps and Army Quartermaster Dept.

"Civil Defender" is name GE gives new receiver (30-50 mc & 152-174 mc) designed for police, fire departments, power companies, etc., to pick up broadcasts from local civilian defense headquarters. Through use of special tone, operator at headquarters can activate selected groups of receivers, if desired.

Subcontracting exhibits similar to Air Force's New York display (Vol. 7:7-8) will be sponsored by Army Ordnance Dept. at its 14 district offices throughout nation. Date not yet set.

Electronics industry representatives who attended March 1 meeting called by NPA Administrator Manly Fleischmann (see p. 6) probably will be nucleus of new Electronic Industry Advisory Committee. End product manufacturers present included: Richard Graver & Frank Uriell, Admiral; Frank Hughes & W. A. Blees, Crosley; H. C. Roemer, Federal Telephone & Radio; Ray Durst, Hallicrafters; Howard C. Briggs, Hoffman; J. B. Elliott, RCA; Ray C. Ellis, Raytheon; Franklin Lamb, Tele King; W. V. Bennett, Wells-Gardner; Fred Lack, Western Electric. Among electronic component manufacturers present: W. E. Wilson, Acme Electric; A. D. Plamondon Jr., Indiana Steel Products; H. A. Ehle, International Resistance; R. F. Sparrow, Mallory; A. P. Hirsch, Micamold; L. F. Muter, The Muter Co.; Sarkes Tarzian, Sarkes Tarzian; R. S. Sprague, Sprague Electric Co.; Al Delighter, Standard Transformer; Max Balcom, Sylvania; H. L. Oleson, Weston Instrument.

Theatre TV was demonstrated to military and civilian govt. officials in Washington Feb. 26-28 by General Precision Laboratory. Film-using system is semi-portable and company officials think military may be interested in the equipment for troop entertainment as well as for training and direct military applications. Compact cameras are made to GPL specifications by Pye Ltd., Cambridge, England (Vol. 6:15). Military recently viewed 2 other TV demonstrations: Philco's "conservation" set (Vol. 7:7) and CBS-Remington-Rand color show (Vol. 7:5). Paramount reports that military has recently inspected both its tri-color tube (Vol. 6:18-36) and big-screen theatre TV equipment. Paramount says that tri-color tube is now in pilot production at Machlett; that sizes ranging from 12½-in. to 20-in. have been made; that CBS has seen it, but that Paramount isn't selling any.

"Planned compliance program" was begun this week to determine how well NPA orders are being carried out. Federal Trade Commission will make spot surveys to find out how well orders are understood and followed, with aluminum fabricators scheduled to be first group checked. Individual complaints are being probed by NPA compliance staff, which has agents in Commerce Dept. field offices throughout nation.

Telephone and telegraph industry is reviewing its requirements for strategic materials such as copper, nickel and zinc at NPA's request, so that allowances can be provided for communications equipment in forthcoming controlled materials plan (Vol. 7:3).

* * * *

What's new in electronics? Commerce Dept.'s Office of Technical Services supplies some of the answers in *Electronic Equipment Construction—New Objectives, New Techniques and New Components*, 300-page illustrated report prepared by Stanford Research Institute under contract to Office of Naval Research. Copies of the report, PB 101 745, are available for $7 each from OTS, Dept. of Commerce, Washington 25, D. C. Report is reviewed in February *Technical Reports Newsletter*, available free from OTS or from Commerce Dept. field offices.

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
March 3, 1951

PRICE (NOT MARGIN) CONTROL FOR TV: TV-radio manufacturers anticipated rollbacks when price controls went into effect -- rollbacks which haven't materialized.

Thus, when TV-radio are included under Ceiling Price Regulation No. 7 (CPR-7), it isn't going to hurt. In fact, the industry should be sitting pretty.

TV-radio will be brought under CPR-7 in week or so. Under Sec. 43 of CPR-7, manufacturers are allowed to establish dollars-and-cents ceiling prices. This means makers of "branded articles" may ask OPS for ceilings on prices, rather than on margins such as CPR-7 applies to soft goods like shirts, dresses, shoes, etc.

Base date for TV-radio will be Jan. 25, which is when over-all freeze on prices became effective (General Ceiling Price Regulation), still applicable to all except soft goods.

Most TV-radio manufacturers raised prices late last fall and in January when new lines were introduced. Therefore, Jan. 25 freeze won't affect them adversely.

New models can be priced on same basis as old. Under Sec. 43, manufacturer must furnish OPS with reasons for suggested price. This can be higher if costs have risen. But margin relationships, percentagewise, must remain same as under former markup practices.

Major purpose of CPR-7 is to keep margins on branded articles at levels prevailing at Jan. 25 cutoff date.

Private-label sets may be priced for retail in 2 ways:

(1) Group of manufacturers making same "name" item for individual merchandiser can get together, under Sec. 43, and do as manufacturers of brand names do.

(2) Retailer can follow procedures covering soft goods set up in CPR-7. This involves individual retailer calculating his Feb. 24 markup percentage, that being base date for soft goods.

Essence of OPS philosophy is to hold same markups or pricing structures as before -- as bulwark against inflation. This doesn't preclude higher prices, for allowances will be made for increased costs (as was done this week for autos).

By same token, prices could be rolled back to pre-Korea levels -- in OPS discretion -- if it's found markups have been increased without justification. But that won't happen for some time. OPS must study many individual industries and their current practices, compare their margins with pre-June 1950, then decide whether they're out of line.

According to Michael V. DiSalle, price stabilization director, CPR-7 is intended to "take prices out of refrigerator [the Jan. 25 price freeze], take a good look at them, then put them in the deep freeze -- and keep them there."

* * * *

Lee McCanne, Stromberg-Carlson v.p., is OPS official in charge of TV-radio controls, taking over March 5. He reports to Eugene E. Smallwood, ex-RCA, chief of Houseware & Accessories Branch, Consumer Durables Division. Chief of that division is Harold B. Wess, ex-Macy's & Alexander's, New York, appointed this week.

OUTPUT & STOCKS UP BUT SALES LAG: Continuing high production, lagging retail sales, mounting inventories -- that, in a nutshell, is the current TV trade picture.

Yet nobody seems particularly worried about outlook, except for the well-justified fears among manufacturers that defense orders won't take up eventual slack in civilian production forced by materials cutbacks (see p. 6).

Key manufacturers seem agreed that production will continue at high level until middle of second quarter at least, i.e., mid-May. The "thinning out" is seen through spring and summer, "very thin" in fall -- and, after that, who knows?

Retail trade is described as "quite soft" throughout most of country, with

hypos being applied by way of heavily stepped-up advertising campaigns.

Distributor-dealer buying has been extremely heavy in recent months in anticipation of shortages which haven't materialized -- yet. Result is piled-up inventories, less disposition to take from factories, and "tremendous push" now to dispose of stocks -- in face of normal resistance at income-tax time.

There's plenty of money, nevertheless, to finance the inventories, one of the biggest producers tells us, for nobody believes saturation point is anywhere near -- despite FCC's freeze on new stations, new markets.

"We've been living off the fat for a long time," said another big set maker, referring both to manufacturing and selling, "and we must expect a leveling off. It's too much to hope for, in this economy, to keep running at last year's accelerating pace. We're in for production restrictions anyhow, and as for moving today's inventories we aren't at all worried. TV will always be a healthy business."

Another top producer admitted his production is down 20% from last-quarter 1950 (yet 25% ahead of first quarter 1950). He thought gradual drop in whole industry's output will be evident during next 60 days. He particularly noted "very strong demand for radios of all kinds" which he attributed to shortages last year because so many manufacturers concentrated on TV.

Stores are cutting TV orders, meanwhile, especially consoles and combinations -- many refusing to buy off-brands altogether. Published reports this week that RCA is cutting back higher-priced models as of April 1 are elucidated thus:

Second quarter normally means higher ratio of low-priced to high-priced models. Same goes for third quarter. Best season for high-priced sets is September through December. "We're making as many sets as we can," spokesman said, "and that includes no more cutbacks than normal for second and third quarters." He agreed last half of year "will be rough" but said the industry now faces "job of selling" whereas heretofore things have largely come its way.

* * * *

RTMA production figures continue well up -- 7th week of first quarter (week ending Feb. 16) showing 181,945 TVs, of which 4970 were private brand. This compares with preceding weeks' 154,774, 167,315, 176,860, 188,758, 167,859, 105,699, respectively -- makes total of 1,143,210. It's flying start toward 5,000,000 predicted for all 1951 by Zenith's Henry Bonfig this week.

Radios in 7th week leaped to 353,689 from preceding week's 322,300 -- and total radios to Feb. 16 were 2,233,958. Of Feb. 16 week's radios, 213,833 were home sets, 112,363 auto, 27,493 portables. Week was best since early December.

Average weekly output of TVs for first 7 weeks this year is approximately 164,000, as against average 188,000 for the 13 weeks of fourth quarter 1950; for same periods, radios were 319,000 vs. 333,000.

Trade Personals: David Sarnoff, RCA chairman, guest of honor Feb. 27 at private party in Waldorf-Astoria, with RCA president Frank Folsom as host and top RCA executives attending, on occasion of his 60th birthday. Gen. Sarnoff currently is devoting most of his time to chairmanship of 1951 American Red Cross fund campaign . . . Don G. Mitchell, Sylvania president, named special consultant to Air Force, aiding Undersecretary John A. McCone in electronics procurement . . . Zeus (Zeke) Soucek, onetime president of old Philharmonic Radio Corp., now Washington representative of DuMont, handling govt. contracts . . . Edwin B. Hinck succeeds Maj. Harry Van Rensselaer, recalled to Air Force, as sales mgr., DuMont electronics parts div. . . . M. M. Heymann named sales v.p. Colortone Television Co. Inc., parent company of International Television Corp. (private brands) . . . Jerome L. Strauss named v.p., Lewyt Corp. contract manufacturing div., now heavily into electronics . . . Wm. R. Holt has retired as president of Eureka Television & Tube Corp., will reside in Florida . . . Chester A. Bejma, former Chicago mgr., promoted to Capehart-Farnsworth distribution mgr. . . . John Meck Industries elects 5 v.p.'s: Russell G. Eggo, executive v.p.; B. L. Bethel, purchasing; Charles E. Palmer, production; Lewis G. Woycke, engineering; Charles L. Hubbard, planning . . . Leo Neumann, ex-Triumph Mfg. Co., Chicago, named purchasing director of Kaye-Halbert . . . Bert C. Tievy succeeds Bob Lieberman, resigned to start own business, as asst. to Don Ferraro, president of Jewel Radio . . . F. J. Cooke, ex-Remington Rand, named gen. mgr. of Reeves Soundcraft's colorcraft and magnetic tape div.

Philo Farnsworth, famed TV inventor now with IT&T subsidiary bearing his name, outlined "shape of TV to come" in recent talk to joint IRE-AIEE meeting in Ft. Wayne. He predicted: reversal in picture tube trend from large direct-view to small projections 6-in. long and "15,000 times brighter" than direct-view; camera tubes 100 times as sensitive as present; pictures without visible line structure; television-telephone service; TV stations on shf (around 3000 mc). Regarding projections, he said: "As tubes approach their potential performance, projection TV will come into its own and may relegate direct-view tubes to scientific museums."

Topics & Trends of TV Trade: Somebody's missing good bet in not piling more low-priced TV receivers into the free (unrestricted) Cuban market—meaning Havana and environs, with 2 telecasting stations already serving population area of well over 1,000,000 and several more outlets due to be erected this year (see p. 12).

TV has made big hit in Cuba's capital, now enjoying sugar boom, but trouble is there's very small middle class. Upper classes are doing most buying of plentifully-supplied large sets and combinations. More poorer people could be sold on time-payment plans, but they simply cannot afford kind of payments required on higher-priced units. There are no credit limitations.

TVs retail at nearly twice as much as in U. S.—what with 20% duties, export fees, shipment costs, etc. Wholesaler pays just about 50% more for receivers than his American opposite number, and prices posted in Havana shops indicate cost to public very nearly 100% more than in U. S. A 14-in. table model, for example, retails at about $450, including installation and year's guarantee.

Dealer markups generally are 30%, but there's plenty of price-cutting. Distributors of old-line products, usually family businesses dating back many years, do own banking. Dealers are mostly exclusive, with distributors having some retail shops of their own. Uniformly, they say they're eager to crack low-price market but simply can't get enough table models. They all forsee big TV boom in Cuba, especially when third and fourth stations get going this year and satellite outlets parallel AM networks.

Leading brands thus far seem to be Philco, RCA and Zenith, with Admiral lately beginning to push them hard. Other brands shown in January import records are Arvin, DuMont, Emerson, GE, Hallicrafters, Midwest, Motorola, Philips (of Holland), Stewart-Warner. It's estimated 12,000 TVs are in use, import figures totaling 10,210 sets for October (when first station went on air) through January. February imports continued good, and quite a few sets are said to be "bootlegged" into the country.

* * * *

New sets: Stromberg-Carlson has 24-in. console with AM-FM-phono (Stancliffe) at $975 (tube and parts warranty $15 extra) . . . Air King has new Model 17M2, 17-in. blonde metal table at $259.95, $20 more than same mahogany metal set (Vol. 7:2) . . . Canadian GE has 17-in. walnut table at $459.50; compares with U. S. mahogany table at $289.95 . . . Bendix has several new models on tap for release at Chicago Furniture Mart in June, will disclose them to its TV steering committee of sales and field men in Baltimore March 16 . . . Stewart-Warner showed new 17 & 20-in. sets to district sales managers this week; they will be released after April 1 . . . Zenith reported showing several new sets with rectangular tubes to distributors at regional meetings.

Trade Miscellany: When Army begins filling up training centers, says *Radio & Television Retailing*, watch for heavy demand for TVs and phono records for recreation centers; also, watch for rush of soldiers to buy portable radios . . . Mahogany Assn. reports TV industry second only to furniture industry as consumer of that wood . . . RCA Victor Distributing Corp., Chicago, parent-owned, as hedge against possible curtailments in TV-radio, adding to appliance line by taking on American Stove Co. space heaters . . . Motorola first-half 1950 ad plans contemplate rate $1,000,000 higher than same period last year, using nearly all media; during 1950, about $15,000,000 was spent on national and local advertising . . . Philco president Wm. Balderston subject of biographical sketch in "Business and Finance Leaders" column of Feb. 28 *New York Herald Tribune*.

Govt. orders reported in 1950 by RTMA members, obviously incomplete, presumably for security reasons, totaled $298,381,350 with this breakdown: radar $180,139,104, communications $94,508,589, sonar $11,122,115, laboratory & test equipment $6,421,326, navigational aids $6,178,734, crystals $11,482. Station equipment sales in 1950 (AM & FM only, TV unreported): AM transmitters $1,668,197, FM transmitters $257,889, studio equipment $1,500,146, antennas $242,133, miscellaneous $971,895. Total value of exported station equipment was $1,748,048. Civilian aviation equipment sales billed were $938,058, marine billings $2,628,154.

Magnavox sales for fiscal year ending June 30 could exceed $50,000,000, compared with $31,716,630 last fiscal year, according to president Frank Freimann. Addressing 3-day meeting of district sales managers in Fort Wayne this week, he said loudspeakers are today's most critical component. In all other components, company is in better shape now than 3-5 months ago, he said. Magnavox makes own speakers. "But, even with credit restrictions, excise taxes and every other conceivable obstacle before us today, we are able to sell a console TV receiver right now for less than price of a table model just 2 years ago," Freimann said.

January picture tube sales by RTMA members (for new sets) totaled 580,317, worth $16,272,654, down from December's 686,815. Value of all CR tubes sold in January, including renewal, govt. and export, was $18,981,031. Over 95% of picture tubes were 16-in. and up—16 & 17-in. rectangulars accounting for 67%. Month's receiving tube sales numbered 37,042,303, of which 25,550,275 went into TV or radio, balance into other devices, replacement, export, Govt. December total was 38,326,641.

Vidcraft Television Corp., New York, lists liabilities of $485,482 and assets of $159,096 in schedules filed in Federal district court in New York this week, offering to pay creditors 100% on installments in Chapter XI plan (Vol. 7:7). Liabilities include $367,323 unsecured claims, $71,179 secured, $41,871 taxes, $3798 notes, $1310 wages. Assets include $76,377 stock in trade, $51,590 receivables, $28,162 machinery & fixtures, $1766 autos, $1200 prepaid insurance.

Plant expansions: Crosley has started work on new building at its Richmond, Ind., plant, providing 211,200 sq. ft. of space for military production, to be ready by Oct. 1 . . . Philco has leased 5-story structure, about 2 mi. from its Philadelphia plant, providing 140,000 sq. ft. . . . Insuline Corp. of America has acquired 50,000 sq. ft. factory, its third, in Long Island City, is now equipping it with $100,000 worth of machinery.

"Negative selling" in Springfield, Mo., doesn't discourage customers, despite fact nearest TV station, Kansas City's WDAF-TV, is 148 miles away. So reports *Retailing Daily*, which says dealers assure shoppers they can expect decent reception only 50% or less of the time. Dealers estimate some 500 sets within 30-mi. radius of Springfield, say that people would buy more if they could get better supply of less expensive models.

Another Admiral "spectacular"—this time on Miami bayfront, between MacArthur & Venetian Causeways. It's an electric sign 65-ft. high, 50-ft. wide, uses same skyrocket effect as Chicago display installed last August (Vol. 6:35). Cost of Miami sign is approximately $100,000.

Shortages and likely lack of new models of TV sets, as well as other electrical merchandise, has led Chicago Electrical Assn. to cancel its 1951 National Television & Electrical Living Show.

Western Summer Market will be held at San Francisco Merchandise Mart July 16-20.

Financial & Trade Notes: Admiral earned $18,767,551 on record sales of $230,397,661 during 1950, according to president Ross Siragusa's annual report Feb. 28. Sales were up 106% from 1949 volume of $112,004,251, earnings up 129% from 1949's $8,206,153. Per share earnings for 1950 were $9.73 on 1,928,000 shares outstanding, as against $4.26 on equivalent number of shares in 1949.

Total income was $38,563,506, but Federal, State and Canadian taxes took $19,405,900—more than the final net profit figure. Net worth increased to $32,751,011 from $18,024,048 at same time preceding year. Dividend disbursements were $1,982,000, as against $1,000,000 in 1949, explained by Siragusa as "a conservative dividend policy in 1950 because larger sums were required to finance the more than 100% sales gain achieved, because of the present expansion program and the possibility of acquiring further plant facilities . . . should favorable purchasing opportunities arise."

As for outlook for defense production, Siragusa stated Admiral's military manufacturing potential today approaches $400,000,000 annually (with 8 plants) as compared to $40,000,000 at its 1944 peak (2 plants).

Starting with TV output of 2700 sets daily in 1950, Admiral reached approximately 5000 daily in September, held that rate until year's end, Siragusa stated.

* * * *

RCA's biggest business year, 1950, resulted in $586,393,000 gross sales, up 47.6% from 1949's $397,259,000 which was well ahead of 1948's $357,617,000. Net profit after all taxes was $46,250,000 ($3.10 per common share) in 1950 vs. $25,144,000 ($1.58) in 1949 and $24,022,000 ($1.50) in 1948. During 1950, Federal taxes totaled $50,743,000 vs. $16,783,000 in 1949 and $17,049,000 in 1948.

Foregoing is gist of RCA annual report, released this week, which also pridefully points out that dividends totaling $13,857,000 were declared on common stock during 1950, representing $1 per share as against the 50¢ paid in 1949 and 1948—this in addition to $3,153,000 paid on preferred stock. Also noted were total current assets at end of 1950 of $209,959,000, as against $154,831,000 at end of 1949; and net working capital of $130,902,000 as against $96,553,000.

Only phase of RCA operations that failed to show increase was NBC-AM, down about 4%, but NBC as whole, adding in TV, showed $92,373,000 gross revenues as against $72,867,000 in 1949. Biggest revenue makers, largely due to TV, were RCA Victor, RCA Laboratories and RCA International which combined grossed $476,091,000 in 1950 vs. $307,309,000 in 1949.

* * * *

Westinghouse reveals its first quarter TV-radio production is 20% below last 1950 quarter, but expects to maintain 60-70% of 1950 TV-radio-appliance volume throughout 1951. Annual report shows over-all sales and earnings at all-time record in 1950: sales $1,019,923,051 vs. $945,699,382 in 1949; net income $77,922,944 ($5.36 a common share) vs. $67,266,555 ($4.95). Consumer goods enjoyed over-all increase in sales of about 50%, major appliances up about 40%, TV-radio up some 30%.

President Gwilym A. Price disclosed that more than 35% of Westinghouse's 1951 production will be for military requirements, but long-range program contemplates doubling facilities for consumer goods production because of expansion in "electrical living." He said present rate of TV-radio output "is possible only because of improvements in chassis design and circuits which have reduced the amount of copper needed for each set." Consumer products v.p. John H. McKibben said there has been no letup in consumer goods sales.

Avco's Crosley Div. sales (TV-radios, refrigerators, ranges) during 1950 were double those of 1949, president Victor Emanuel reveals in annual report showing Avco earnings of $12,635,633 or $1.65 per common share—more than 3 times last year's $4,150,466 (54¢). Avco's record sales in 1950 were $256,966,971 vs. $137,398,554 in 1949, with Crosley believed accounting for more than half of total (Vol. 7:1). Mr. Emanuel verified recent report (Vol. 7:6) that Crosley's 3 Ohio TV stations (WLWT Cincinnati, WLWD Dayton, WLWC Columbus) moved into profit column in recent months. Report noted Avco has "substantial defense contracts," but actual production is months away due to time required for tooling and equipment.

Stromberg-Carlson, in preliminary report to stockholders Feb. 23, shows total sales of $37,672,385 in 1950, up 27% from $29,597,011 for 1949. Net earnings for 1950 were $974,731, or $2.53 per common share after allowing for 10% stock dividend paid Feb. 1, 1951, as against net loss after tax carry-back of $478,056 in 1949. By retaining earnings, working capital was increased $1,039,000. All operations were profitable, notably company's 50-kw AM outlet WHAM and its WHAM-TV "which has operated in the black since March of last year, only 10 months after opening [and] continued steadily to increase its earnings."

Dividends: Admiral, 25¢ payable March 30 to holders March 15; Aerovox, 15¢ payable March 15 to holders March 1; GE, 75¢ payable April 25 to holders March 16 (paid 60¢ in previous quarters plus $1 extra last Dec. 6); Oak Mfg. Co., 35¢ payable March 26 to holders March 9; Canadian GE, $2 payable April 2 to holders March 15; Stewart-Warner, 35¢ payable April 7 to holders April 16; WJR, The Goodwill Station Inc., 10¢ payable March 20 to holders March 13; Sylvania, 50¢ on common, $1 on preferred, payable April 2 to holders March 20; Allied Electric Products, 20¢ on common, 11¼¢ on preferred, payable March 28 to holders March 15; Muter, 15¢ payable March 31 to holders March 15; Raytheon, 60¢ on preferred, payable April 1 to holders March 15.

Aerovox annual report for 1950 shows consolidated net sales of $23,750,000, up 270% from $8,750,000 in 1949. Net income after taxes was $1,753,000, equal to $2.53 per share on 692,906 shares outstanding, vs. $675,000 in 1949, or $2.10 on 312,850 shares then outstanding. Working capital as of Dec. 31, 1950 was $4,437,000. Expansion of TV and additional sales volume of subsidiary Electrical Reactance Corp. were mainly responsible for growth.

Western Electric's 1950 sales were $758,064,000, of which $662,049,000 (87%) were to parent AT&T and its other subsidiaries. This compared with 1949 sales of $858,191,000. Net income for 1950 was $38,646,951, compared with $42,565,511 in 1949.

International Resistance Co. 1950 sales were $11,236,825, up 73% from $6,483,149 in 1949. Earnings in 1950 are reported about $1 on common, as against 39¢ in 1949.

———■———

Heaviest buying gains in any single merchandise classification among New York City dept. stores were shown for TV-radio during their fiscal year ended Jan. 31, 1951, according to *New York Herald Tribune's* Harvey E. Runner. Average increase for all merchandise was 3.3% over preceding fiscal year, but "year's star department" was TV-radio—11 stores surveyed showing these percentage gains: 116, 98, 91, 59, 57, 50, 48, 47, 34, 26 and 26.

Radar will be tested for 9 months in New York harbor to determine its feasibility in transmitting ship positions. During tests, Raytheon and Sperry Gyroscope will furnish and maintain instruments without charge for shore installation on Staten Island. Port of New York Authority authorized $45,000 for the tests.

Telecasting Notes: Havana's third TV station, we learned during visit there last week, will be one backed by U. S. broadcaster-telecaster George B. Storer, and it's promised on air "by end of May." Caribbean Television Co., Storer-financed but headed by Jose Luis Meneses, president of Banco Agricola de Cuba, originally was to get Channel 2, but that went to Telenews Co. (Manuel Alonso), now planning December start. Storer station gets Channel 7 or 11; RCA equipped, it's being built by M. D. Autran, builder of Radio Havana Cuba's 25 kw CMCY . . . Two TV outlets presently operating in Havana, Union Radio's CMUR-TV on Channel 4 and Goar Mestre's CMQ-TV on Channel 6, plan networks via repeaters covering Cuba, while CMKW, Santiago, plans Channel 7 outlet—all depending on financing and availability of equipment . . . Carrying network commercials only, no local or spot (Vol. 6:7), Iowa State College's WOI-TV, Ames (Des Moines) will show income of $75-80,000 for first year of operation ending Feb. 21, according to president Charles E. Friley in *Des Moines Tribune* interview. It cost $175,000 to put station on air, and it's staffed mainly by engineering students . . . Johnstown's WJAC-TV claims some kind of record in fact that 68,125 TVs in service area as of Feb. 1 represents tripling of 22,000 count as of July 1, 1950, when it joined networks . . . Schaeffer Brewing Co. signs 7-year contract for TV-radio rights to Brooklyn Dodgers games, club reported to be getting $3,000,000 for first 5 years, with WOR-TV negotiating to carry them from Ebbets Field . . . WPIX reports programs and spot adjacencies preceding and following Ballantine-sponsored Yankees and Chesterfield-sponsored Giants home games will represent $250,000 in added revenues . . . Detroit's WWJ-TV is expanding its "telecourses" to elementary school level, aiming special Wed. 11-11:30 programs to receivers in classrooms. Station reports 1415 registrations received so far for its Sun. 1-2 college courses originated by U of Michigan (Vol. 7:2) . . . NBC-TV March 5 starts showcasing Detroit poet Edgar Guest in *A Guest in Your Home*, Mon.-thru-Fri. 3:15-3:30; ABC-TV March 6 starts offering *Ozmoe*, puppets worked by gears rather than strings, Tue. & Thu. 5-5:15 . . . WJBK-TV, Detroit, March 1 raises base rate from $1000 to $1100, 1-min. announcements from $190 to $200.

Four applications for TV stations filed this week brought total pending to 385: Eugene P. O'Fallon's KFEL, Denver (MBS), seeking Channel 2, eighth from that city, third seeking that channel; Charleston (S. C.) Post-News & Courier's WTMA (NBC), Channel 2; WUSN, Charleston, S. C. (MBS), Channel 7; South Texas Television Co., Houston, Channel 4, fifth application for city, second for Channel 4. [For further details about these applications, principals, etc., see *TV Addenda 12-H* herewith; for listings of all applicants to date, see *TV Factbook No. 12* with Addenda to date.]

Oscillator radiation of TV and FM receivers, and question of FCC's power to control them (Vol. 7:4), may be implications of court test of Commission's authority to regulate industrial electronic equipment—first such test. Yonkers (N. Y.) Cabinet Co., maker of TV cabinets, was interfering with Coast Guard aeronautical frequency of 7530 kc through use of dielectric heater, failed to suppress radiation when ordered to by FCC. After March 2 oral argument in New York Federal district court, Judge Samuel Kaufman told FCC and cabinet company engineers to work on offending radiator, report to him March 7. Judge said he thought company was acting in good faith.

NBC planning big promotion, starting July 1 and running through rest of year, to commemorate its 25th anniversary, will also make gala occasion of its own fifth annual convention Nov. 28-Dec. 1 in Boca Raton, Fla.

"Judicial review" of FCC color decision is still lacking, despite decision by 3-judge Chicago court (Vol. 6:51). That's a principal argument of latest briefs filed with Supreme Court by RCA and Emerson this week. Says RCA (John T. Cahill, chief counsel): "For all practical purposes, appellants have not been given their day in court." Said Emerson (Judge Simon Rifkind, counsel): "Resolute to unravel the last faded remnant of its authority, the District Court completed its own abdication and its careful frustration of the statutory scheme by shifting to [Supreme Court] the District Court's primary and prescribed responsibility for the judicial review of administrative action." Another major argument is that Supreme Court has never ruled on whether FCC has "authority to rule out color signals which do not interfere with the signals of other broadcasters, which can be received on all existing sets, and which do not hurt anyone." Supreme Court action isn't expected before March 12, possibly April 2 (Court has 2-week recess between). If oral argument is set, it could come week of April 23.

Ban on college football telecasts came under close scrutiny this weekend as National Collegiate Athletic Assn.'s TV Committee looked into possibility of "controlled video projects." Network representatives, invited to committee's Chicago meeting, are believed to have proposed system of televising games outside of area where they are played. Meanwhile, Nebraska and Texas legislatures joined list of those considering resolutions to force televising of games played by state institutions. RTMA enlarged its Sports Committee, named as chairman Joe Elliott, RCA, who was Georgia Tech All-American in early '20s. Other members: A. A. Brandt, GE; L. F. Cramer, DuMont; H. L. Hoffman, Hoffman Radio; John F. Gilligan, Philco; L. C. Truesdell, Zenith; W. H. Kelley, Motorola. And TV manufacturer John Meck sent NCAA his plan for solving problem: College alumni and friends in TV areas would be asked to pay college $10 each year for "TV rights" to their schools' games and to buy complimentary ticket to each game for youngsters, disabled vets, etc.

Precarious position of telecasters, if Congress raises ceiling limitation on taxes, was stated before House Ways & Means Committee Feb. 28 by TV tax committee's John A. Kennedy (WSAZ-TV, Huntington). He objected to Treasury proposal to raise ceiling on what Govt. can collect through both corporation and excess profits taxes from present 62% of corporation's earnings to 70%. His thesis: All telecasters had red-ink balances during base 1946-49 period, therefore they would have to pay top limit of 70%. That would be crippling to many who still owe substantial sums for equipment, construction, etc. Kennedy revealed 16-month-old WSAZ-TV lost $110,-222 for first 12½ months of operation.

GE outlined uhf test program in application filed with FCC this week, asking permission to operate within 480-890 mc at Syracuse. Company proposes to feed 5-kw transmitter into new type of 4-bay helical traveling-wave antenna with estimated gain of 20, giving 100 kw ERP. Program will cover tests of transmitters, antennas, propagation, receivers. General supervisor of program will be J. E. Keister, with H. B. Fancher heading up transmitters, A. D. Haedecke receivers, A. E. Smoll receiving antennas.

Musicians meet in New York and Los Angeles next week to vote on networks' counter-proposals on pay, etc., subject of negotiations last 5 weeks (Vol. 7:5-8). Networks offered 3-year contract with (a) 10% raise in staff salaries, (b) parity for TV and radio, (c) kinescope arrangements continuing, subject to individual agreements with Petrillo. Question of films for TV probably will be left for future (Vol. 7:8).

NEW ALLOCATION, FREEZE-END ESTIMATES: Release of FCC's long-awaited allocation plan is expected next week. Publicity attending its issuance will undoubtedly give impression freeze is about to be lifted. This isn't so, of course, since many months of laborious hearings and FCC deliberations are yet to come.

Some features of new plan are known, and number of industry recommendations have been recognized. Plan is supposed to include these provisions:

(1) Vhf co-channel spacing of 200 miles, uhf 180 (compared with previous proposal specifying 220 for vhf, 200 for uhf). Adjacent-channel spacing to be around 65-75 miles for vhf, less for uhf. In Gulf area and West Coast, spacing will be somewhat greater wherever possible -- because of greater troposphere trouble.

(2) Vhf power 100 kw, uhf 200 kw, at 500 ft. -- more height "encouraged".

(3) Use of offset-carrier to be required in "tight" areas.

(4) Vhf and uhf to be intermixed -- number of cities to have both.

(5) Uhf not to be totally allocated now, apparently to be allocated on "open end" basis, starting from low end of band.

(6) "Recognition" of standard 41.25 IF in allocating uhf.

* * * *

There's still a lot of cynicism about ending freeze, now 30 months old, some terming it "as academic as color" in light of the mobilization efforts. Yet others point to recent "guns-and-butter-by-1953" prediction of mobilization chief Charles E. Wilson (Vol. 7:8) and see no reason for giving up now.

Applicants continue to order transmitters, in fact, in hopes of getting on air regardless of mobilization picture at time they get FCC go-ahead.

End-of-freeze-guessing thus remains a lively industry pastime -- though no one's public predictions have been worth the proverbial hoot. Nevertheless, here's latest and best information and speculation to be gleaned inside and outside FCC:

(1) Assuming release of allocation plan next week, everyone will have month or so to comment on it as it affects their particular cities.

(2) Hearings on allocations to specific cities then start, possibly in mid-May, running perhaps into fall.

(3) Final decision ending freeze -- late fall or winter.

(4) Applicants then have 60 days to file new requests or amend old.

(5) CPs may then be parceled out, but only in cities where available channels outnumber applicants -- obviously none in the more attractive markets, where applicants inevitably will exceed supply of channels.

First grantees could get on air by end of 1952. But where hearings are required, 6-12 months can be added. In some instances, even more delay may be expected, since stakes are so high that losing applicants may take decisions to court.

Foregoing timetable and trends could be knocked out of whack by any number

Copyright 1951 by Radio News Bureau

MAR 12 1951

of factors. It's not inconceivable that someone might take allocation itself to court. Even the educators, if disappointed, might do it.

Of course, if Wilson's prediction proves wrong, and receiver production is down to mere trickle or non-existent at freeze's end, there will be no point in building stations in non-TV areas. But present TV cities will be hotter than ever -- if Govt. permits any station construction at that time.

IRE SERVES UP FEAST FOR TV ENGINEERS: This year's IRE convention is loaded with TV -- vhf, uhf, transmitters, receivers, color -- and shapes up as finest yet. Brief sample of papers and exhibits at March 19-22 sessions at New York's Waldorf-Astoria and Grand Central Palace is enough to show why 18,000-plus attendance is expected:

Vhf: Every possible angle -- from "The Empire State Story" (multiple antennas) to "Internal TV Receiver Interference" -- explored by scores of experts.

Uhf: Numerous papers throughout, on transmitters, tubes and receivers, by men from RCA, Machlett, Westinghouse, Sylvania, DuMont, Stanford U.

Color: Two sessions, with host of engineers from DuMont, Philco, Bell Labs, Sylvania, Hazeltine, GE. (Note absence of CBS.)

Exhibits exciting particular interest, in light of high powers to be permitted by FCC's new allocation plan (see page 1), will be Eimac's 20-kw tube for Channels 2-13, GE's ceramic tube giving 1 kw at 900 mc, high-power (20 & 30 kw) amplifiers, high-gain antennas.

These topics are mere hint of agenda, which also includes propagation, microwaves, industrial TV, antenna design, interference, etc.

Keynote of convention is "Advance with Radio-Electronics in the National Emergency" -- main speaker at March 21 banquet to be RTMA chairman Robert Sprague.

COLOR GETS DAY IN SUPREME COURT: RCA and Emerson won skirmish in color litigation this week when U.S. Supreme Court decided to grant oral arguments, to be heard Monday, March 26. Had court ruled in favor of FCC-CBS, simply upholding 2-1 judgment of Chicago court (Vol. 6:51), it would have meant "sudden death" to legal hopes of appellants. Big questions now, aside from what Court will finally decide, are:

(1) When will decision be forthcoming?

(2) What happens to restraining order of lower court, which forbids commercial operation of FCC-approved CBS system and remains in effect "until April 1, 1951, or until terminated by the Supreme Court"?

Decision can come any time after argument and before tentative June 4 adjournment date. Court plans a March 27-April 9 recess, but that doesn't prevent decision from coming out during that period if it's ready.

When Court would lift restraining order, if it decides to, is anyone's guess. But most lawyers think "one-package" decision, covering whole case, will be rendered. This could come as early as April 2.

Court's speed was really unusual. Normally, clerk sets oral argument date, and parties' briefs must be in 3 weeks before hearing. This time, Court itself set date, leaving parties under terrific pressure to prepare briefs in time. And deadline for their submission is still uncertain.

One hour of argument per side is usual Supreme Court procedure, but parties are asking for two, may get it since court actually has rather light calendar and case is fraught with so much human interest.

Court opens at noon; hearing is open to public. Same top-flight counsel -- including John T. Cahill for RCA, former Federal Judge Simon Rifkind for Emerson, former New York State Judge Sam Rosenman for CBS -- are expected to participate. Solicitor General of U.S. (Philip Perlman) decides who shall argue govt. side, may handle this case himself or designate counsel from FCC.

* * * *

RCA released tri-color tube manufacturing details in confidential bulletin to its patent licensees this week. Other tube makers didn't seem too excited about it, saying generally that if there's demand for such tubes they'll make them and

Trade Report
March 10, 1951

'INDUSTRY MUST GO BACK TO SELLING': Bargain sales, liberal trade-in and free-service offers, plenty of price-cutting -- these are the inevitable aftermaths of continued high TV production and mounting inventories while retail sales still lag (Vol. 7:9).

Current advertising splurges throughout the country attest to fact that brand-name as well as lesser known and private-label sets aren't moving very fast. It can't be called "dumping" or "distress-selling" -- yet -- but there's danger.

Dealer trips to Bermuda as prizes are even being revived by at least one distributor, and there are plenty crying calamity. Some local advertising plays up impending production cutbacks, possible price hikes due to further excise taxes, even implies poorer quality sets when conservation-substitution goes into effect.

Calmer heads are counseling more attention to selling, less to production figures, still less to griping.

"I think the entire industry has to go back to selling and pioneering the same as in 1948, with home demonstrations, better programming, etc.," writes one medium-sized manufacturer who is promoting heavily via TV itself -- with shows that "retail salesmen can really talk about to a prospective set buyer."

Business is normal for this time of year, sales manager of another set manufacturer claims. He believes the industry went into 1951 with about 2,000,000 sets in inventory (made 7,500,000, sold 5,500,000). Coupled with continued high rate of production, he thinks this accounts for tremendous current inventories -- many distributors and dealers stocking up for shortages that didn't occur.

John Meck angrily charges that publicity about materials-saving, talk of "emergency sets", is responsible for current retail sales sluggishness. Public is confused, he says, because it gets impression degraded sets are coming on market. "The public thinks that if future sets can actually give improved performance on fewer materials, there must be something wrong with present sets."

* * * *

Production, meanwhile, shows no signs of slackening -- first 1950 quarter's 8th week (ending Feb. 23) resulting in 183,438 TVs, 9th week (ending March 2) climbing to 190,291 TVs or highest for any week this year. [See Vol. 7:9 for each preceding week's RTMA estimate.] Thus, up to March 2, industry turned out 1,516,939 TVs, which is average of very nearly 190,000 per week, annual rate of about 8,800,000.

Radio output also continues big -- totaling 326,606 in 8th week, then leaping to 367,322 in 9th week; latter is highest figure for any week this year, was exceeded only 3 times during boom last-half 1950. That means 2,927,886 total radios in 9 weeks up to March 2, average of more than 325,000 per week.

Of 8th week's TVs, 5085 were for private label; of 9th week's, 8804. Of 8th week's radios, 193,553 were home sets, 105,795 auto, 27,258 portable; of 9th week, 217,800 were home sets, 117,537 auto, 31,985 portable.

MEETING TV SERVICING RESPONSIBILITY: Service segment of TV-radio industry has been taking it on the chin recently -- what with parts and manpower shortages on one hand, not-so-ethical technicians and contractors on the other.

Complaints from public, which provoked proposals for restrictive legislation (including licensing of servicemen) in several States and cities, in last few weeks have induced these activities:

(1) National Better Business Bureau has suggested plan of action.

(2) Manufacturers have stepped up service clinics, repair information data, other aids to servicemen and service companies.

Better Business Bureau plan, worked out last week in Chicago with RTMA service subcommittee (A. T. Alexander, Motorola, chairman), envisages separate activi-

ties by manufacturers, distributors, retailers, service companies. Still to be approved by RTMA board, it calls generally for:

(a) Definite proportion of production for replacement, with strict supervision of supplies through all levels of distribution.

(b) Cessation of practice of shipping sets minus some components or tubes -- widely done by some manufacturers during hectic boom days of last fall. Also, discontinuance by manufacturers of buying hard-to-get components in retail market.

(c) Sale of replacement parts by distributors, retailers and service companies on a "turn-in" basis only.

(d) Improved inventory controls on part of distributors, retailers and service companies -- to overcome "artificial" shortages.

BBB local offices have been advised to check complaints of shortages with local distributors, and, if unsuccessful in overcoming problems, to notify national headquarters. Latter will check with individual manufacturers.

Planned is issuance of RTMA consumer booklet, telling public what to expect -- and what not to expect -- from a TV set. RCA soon will issue compilation of replacement parts with index of alternates when standard components aren't available. This will be made available to all service companies.

* * * *

To help overcome manpower problems, an RTMA-sponsored campaign is being pushed to include TV-radio repair courses in curricula of the nation's vocational schools (Vol. 7:7). RCA Institutes is putting out special TV home study course, and RCA is continuing its highly successful service clinics -- more than 500 of which were held during 1950 with attendance over 350,000. Sylvania started series of TV-radio servicemen's meetings in Baltimore Feb. 13, with more than 300 attending.

Gaining momentum are various bonding programs -- such as Raytheon's, which bonds a qualified service company with American Mutual Liability Co. Bond is for $400, with not more than $200 liability for any single customer. It covers usual 90-day repair guarantee given by most servicemen. NARDA is attacking problem through its Certified TV Installation & Service Plan.

* * * *

That TV servicing problems must be overcome soon, is pointed up in current publicity on subject. In March American Magazine, Victor H. Nyborg, president of Assn. of Better Business Bureaus, calls TV "newest field for the repair quack." Article titled "Quacks of the Electronic Age" states: "Because of its bewildering complications, TV has become one of the lushest fields for racketeers; with the new color devices, it will be lusher."

Trade Personals: Leonard F. Cramer, DuMont v.p., takes on additional duties of head of new govt. liaison dept., handling defense contracts . . . C. M. (Buck) Lewis, chief of broadcast field sales, named mgr. of broadcast-communications sales section, RCA engineering products dept., under gen. sales mgr. A. R. Hopkins, with J. F. O'Brien appointed mgr. of theatre, visual and sound sales . . . Hallicrafters appoints Randolph W. Westerfield, ex-chief purchasing agent, as director of procurement; J. Clifford Mathews, ex-Capehart-Farnsworth, purchasing agent; Robert F. Halligan, ex-Air Force & West Point, chief purchasing expediter; Hector Castellucci, ex-Capehart-Farnsworth, N. Y. expediter . . . Bruce T. DuMont, gen. supt., DuMont Laboratories and brother of president Allen B. DuMont, will be married in April to Miss Bernice Hazel Pellington, of Upper Montclair, N. J. . . . Anthony D'Ambrosio, ex-Tele-tone and Air King, appointed production mgr., Jewel Radio . . . George K. Smith, of Akron, one-time Crosley v.p. & treas., elected to board of Sightmaster . . . Capt. George F. Shecklen, executive v.p., Radiomarine Corp. of America, awarded 1951 Marconi Medal of Achievement . . . RCA Service Co., technical products div., names George F. Sandore, mgr. of sales and merchandise section; Carl E. Johnson, mgr. district operations; Adolph Goodman, mgr. commercial operations; C. L. Swinney, mgr. Atlanta district succeeding Sandore . . . D. W. Gunn promoted to equipment sales mgr., G. V. Bureau, ex-Amperex, becomes govt. sales mgr., Sylvania, reporting to H. P. Gilpin, asst. gen. sales mgr. . . . Belmont-Raytheon technical products div. has named Paul H. Frye mgr., Washington office; Allen Henry, contracts administrator in addition to duties as adv. mgr.; Carl Schmidt, ex-Lear, mgr., Dayton office; W. K. Trukenbrod, ex-Montgomery Ward radio dept. head, regional sales mgr., Chicago area . . . R. O. Bullard, asst. to division mgr. J. M. Lang, appointed manager of tube manufacturing, GE tube divisions . . . John C. Herber named chief broadcast equipment engineer of Standard Electronics Corp., subsidiary of Claude Neon . . . James B. Lindsay elected engineering v.p. of Thomas Electronics Inc.

* * * *

Trade Practice Conference has been called by Federal Trade Commission (date not yet set) to discuss revision of 1939 rules to include TV. RTMA committee, headed by Benjamin Abrams, Emerson, will draw up suggested revisions, submit them to RTMA board for approval. After recommendations go to FTC, it will set date for meeting. Distributors, jobbers, dealers will also be invited.

that it would take many months and plenty of costly tooling up to mass-produce them.

Tricks of manufacturing tube are fascinating. For example, 200,000 holes .009-in. in diameter, .023-in. apart, are etched in .004-in. sheet of copper-nickel alloy by photo-engraving process. Then, an arc light is placed in position of blue gun and aimed through the perforated sheet at Kodalith photographic plate. Plate is developed, producing dots of proper size, properly-placed. This plate is used to make stencil which is in turn used in printing phosphor dots on face-plate of tube.

* * * *

CBS continues its "spot" campaign of color demonstrations, meanwhile, with Boston latest city on itinerary. Jordan Marsh dept. store is featuring one week of closed-circuit shows beginning March 26. Store is planning color as permanent fixture when it gets delivery of equipment from Remington-Rand (Vol. 6:49).

ACTION SOON TO ASSURE REPAIR PARTS: NPA has come up with scheme to lick distressing shortage of replacement parts for home TVs, radios and appliances.

Plan is simple, logical -- requiring, at least for time being, no special orders such as last week's MRO regulation (Vol. 7:9), which gave priorities to business and public establishments (including broadcasting and other types of communications) for maintenance, repair and operating supplies.

NPA's parts program -- as devised by Office of Civilian Requirements (see p. 6) -- involves insertion of clause in each material limitation order, to permit use of extra quantities of material for manufacture of replacement parts. Fabricators and manufacturers generally will be permitted to use materials for replacement parts at 100-150% of rate they used them for same purpose during first-half 1950.

Here's example: Manufacturers of coils are now permitted to use only 80% of the copper wire they used during first-half 1950 base period (Order M-12). To encourage manufacture of replacement coils and other copper products, NPA will soon let users of copper have as much wire as, or even more than, they used for replacement parts during base period.

If this system doesn't work, NPA men say, they'll tackle parts shortage with special order. Incidentally, in announcing limitations on use of steel in consumer goods (Order M-47, see p. 7), NPA took pains to make clear that "no limitation will be placed on use of steel for manufacture of replacement parts" -- in order to "encourage production of parts to assure continued operation of present facilities."

Replacement parts policy follows general recommendations by members of National Electronic Distributors Assn., called to Washington March 5 to form an NPA Electronic Parts Distributors Advisory Committee (list of those attending on p. 8).

Distributors asked NPA to enable parts makers to continue manufacturing at present rate -- plus an additional 50% to maintain existing sets as production of new TV-radios is slowed down by shortages and increased military production.

Five-man distributor task group (p. 8) was named by NPA to study conservation, salvage, simplification and standardization measures and to make further recommendations for repair parts program.

Other developments at distributor-NPA meeting:

(1) Distributors urged Govt. not to establish distribution agency for electronic parts and components. They said their own facilities are adequate -- and if their warehouses and equipment aren't used for defense work, parts distributors may be forced out of business in large numbers as civilian production slackens.

(2) NPA said it has asked State Dept. to slap import quotas on items whose manufacture is restricted in U.S., and to try to sell foreign governments on idea of placing same limitations as U.S. on raw materials. This would prevent foreign parts and components manufacturers from getting foot in door at expense of domestic manufacturers and distributors.

(3) All-out allocation of nickel -- vital in tubes -- is planned, probably beginning May 1. Under this procedure, Govt. would dole out nickel supply individually to each user, as it does now with cobalt.

(4) Practice of selling speakers to TV-radio manufacturers has been discontinued by distributors, who told NPA they are now selling them only for replacement.

Network Accounts: CBS-TV moves into morning network schedules March 26 with *Steve Allen Show*, Mon.-thru-Fri. 11:30-12:30, shifting him from present 7-7:30 p.m. strip . . . NBC-TV getting ready to open up 10 a.m. to 1 p.m. network time with across-the-board strips . . . Brewing Corp. of America (Carling's Red Cap ale) April 7 starts *Carling's Take You to the Races*, telecasts of feature races from Eastern tracks, on NBC-TV, Sat. 4-4:30, thru Benton & Bowles, N. Y. . . . Jacques Kreisler Mfg. Corp. (men's jewelry) March 21 starts *Kreisler's Band Stand TV*, different name band weekly, on ABC-TV, Wed. 8:30-9, thru Hirshon-Garfield Inc., N. Y. . . . Hollywood Candy Co. March 11 begins *Hollywood Junior Circus*, children's variety show, on NBC-TV, alt. Sun. 5:30-6, thru Ruthrauff & Ryan, Chicago; will alternate with Derby Foods' *Magic Slate* . . . Camel Cigarettes March 10 begins sponsorship of 8:30-9 segment of *Jack Carter Show* on NBC-TV, Sat. 8-9, thru Wm. Esty Co., N. Y. . . . Procter & Gamble March 27 begins sponsorship of Tue. & Fri. editions of *Kukla, Fran & Ollie* on NBC-TV, 7-7:30, thru Benton & Bowles, N. Y.; Tue. time was sponsored by Sealtest, Fri. by RCA Victor, which retains Mon. segment while Ford Motor Div. has Wed. & Life Magazine Thu. . . . Simulcasting of second half of ABC's *Ted Mack Family Hour* will end March 11. TV program will remain in Sun. 6-7 time, with 6:30-7 period sponsored on alternate weeks by C. A. Swanson & Sons and General Mills, while new sustaining radio edition goes into Sun. 7:30-8 period . . . Next *Jack Benny Show* on CBS-TV, sponsored by Lucky Strike has been postponed from March 18 to April 1, Sun. 7:30-8, due to star's illness.

Station Accounts: Automotive business, shaky on networks, is also thinning out in spot—due to production curtailments by Washington . . . When Ringling Bros.-Barnum & Bailey Circus takes to road this spring, its advance advertising will go in heavily for TV spots, equalling last year's big radio budget, which won't be curtailed, reports *Billboard* . . . Curtis Candy Co. placing *Happy Felton's Knot-Hole Gang*, boys from sandlots playing with pros, just ahead of Dodgers games on WOR-TV; Braves on WNAC-TV; with plans also for Philadelphia and Chicago, and in Atlanta (WSB-TV), Fort Worth (WBAP-TV), thru C. L. Miller Co., Chicago . . . Boston's WNAC-TV & WBZ-TV, Ballantine sponsoring, will share home games of Braves, also to be carried on WJAR-TV, Providence . . . Snow Crop Marketers, thru Maxon Inc. and Best Foods Inc., thru Benton & Bowles using TV spots in joint campaign to promote use of Snow Crop frozen strawberries & Presto cake flour for strawberry shortcake . . . General Foods, to introduce new Jell-O lemon pudding suitable also for lemon pie, will use TV with other media shortly, thru Young & Rubicam, N. Y. . . . Hearn's Dept. Store April 2 starts *The International Chef* on WPIX, New York, Mon. 1:30-2, thru Furman & Feiner, N. Y. . . . Kiplinger Washington Agency, publishing monthly magazine *Changing Times*, sponsored WPIX *Night Owl Theatre*, movies, for short term, thru Albert Frank-Guenther Law . . . Sears Roebuck sponsoring newscasts on KFI-TV, Los Angeles, just preceding feature films Mon. thru Fri. at 11 a.m. & 2 p.m. . . . Among other advertisers currently reported using or preparing to use TV: Blackstone Corp. (electric washers & ironers), thru Warman & Co., Buffalo (WDTV); Gold Medal Candy Corp. (Bonomo's Turkish Taffy), thru Duane Jones Co., N. Y.; Breyer Ice Cream Co., thru McKee & Albright Inc., Philadelphia (WJZ-TV); Ivano Inc. (Ivalon Miracle sponge), thru Henri, Hurst & McDonald, Chicago; Acme Breweries, thru Foote, Cone & Belding, San Francisco (KTLA); Old Dutch Coffee Co., thru Peck Adv., N. Y. (WJZ-TV); Hachmeister Inc. (Hako asphalt floor tile & Coronet plastic wall tile), thru Walker & Downing, Pittsburgh (WDTV); Eppens Smith & Co. Inc. (Holland House coffee), thru St. George & Keyes, N. Y. (WJZ-TV); Zonite Products Corp., thru Erwin, Wasey & Co., N. Y. (WJZ-TV); Hamm Brewing Co., thru Campbell-Mithun, Minneapolis; Northam Warren Corp. (Cutex nail preparations), thru J. M. Mathes Inc., N. Y. (WJZ-TV); Grand Union Co. (food stores), thru French & Preston, N. Y. (WJZ-TV); National Bakers Service, thru Scheck Adv., Newark (WJZ-TV); Anthracite Institute, thru J. Walter Thompson, N. Y. (WPIX); R. B. Semler Inc. (Kreml hair preparations), thru Erwin, Wasey & Co., N. Y. (WPIX); Halldon Co. (Ocubelle eye-care kit), New York, thru Grant Adv., N. Y.; American Stove Co., thru Krupnick & Associates, St. Louis; Modern Food Process Co. (Thrivo pet food), thru Lavenson Bureau of Advertising, Philadelphia; Pizza-Fro Corp. (frozen pizza pies), thru Presba, Fellers & Presba, Chicago; Tappan Stove Co. (gas ranges), thru Griswold-Eshleman Co., Cleveland; Planter's Nut & Chocolate Co. (salted peanuts & cooking oil), thru Goodkind, Joice & Morgan, Chicago.

Personal Notes: John I. (Bud) Edwards, ABC western div. program director, has resigned to become adv. mgr. of Maier Brewing Co., Dresser Dahlstead promoted to his post . . . Colin M. Selph has resigned as sales v.p. of KPIX, San Francisco . . . Blayne Butcher, recently with KTTV, Los Angeles, joins Cecil & Presbrey Inc., N. Y. . . . Robert Oakley, Hollywood packager, named KTTV director of program development . . . Norman Heyne, TV-radio director, Ruthrauff & Ryan, Chicago, named v.p. . . . E. C. Page, Washington consulting engineer, returned last week from trip to Europe and Far East in connection with Voice of America broadcast installations.

"What to do about FM?" seems to be animating FCC and Sen. Johnson lately, but FM operators complain that every recent FCC move has hindered rather than helped. Commission received strong answers, particularly from Marshall Field's WFMF, Chicago, to its letters questioning legality of functional music operation (Vol. 7:5). If FCC goes through with clampdown, court test is expected. Meanwhile, transit and storecast operators fear ax.

Even as 2 FM pioneers surrendered licenses—Everett Dillard's KOZY, Kansas City, and International Ladies Garment Workers' WVUN, Chattanooga—Commission denied requests of 3 stations to sign off FM same time as their daytime AMs: WAUX-FM, Waukesha, Wis.; WRFD-FM, Worthington, O.; WWOL-FM, Buffalo. Another, WDEM-FM, Providence, was denied requested permission to close down for 6 months. WSAV-FM, Savannah, was turned down on request to operate from 5 to 12 p.m. only.

Sen. Johnson's worries were expressed in letter to *New York Times* March 4, commending its Feb. 14 editorial (Vol. 7:9). He agrees FCC should investigate to determine whether "the opposition to modern FM is inspired by selfish motives." He also wonders whether FM might be encouraged by the inclusion of FM tuners in all TV sets and whether it would be "feasible to authorize the use of TV sound channels for aural broadcasts during the idle [telecasting] periods." FM operators say idea is totally impractical.

Industry confab on FM problems, particularly manufacture of FM sets, comes at March 13 meeting of 3 committees at NAB headquarters. They comprise FM committees of NAB, RTMA and special group headed by station consultant Morris Novik.

NETWORK TV time billings for January jumped to $8,082,876 from $1,901,294 in January 1950 and $6,684,363 in December 1950 (Vol. 7:3)—all exclusive of non-reporting DuMont—according to Publishers Information Bureau. January was highest TV month yet reported by either NBC or CBS. Coincidently, AM network billings went down in January to 16,629,928 from $17,084,896 in January 1950, but were well ahead of the $15,673,016 in December 1950—with CBS continuing to maintain its commanding lead. The PIB January TV-radio figures follow:

NETWORK TV	January 1951	January 1950
NBC	$4,187,222	$1,042,153
CBS	2,613,915	625,072
ABC	1,281,739	234,069
Total	$8,082,876	$1,901,294

NETWORK RADIO	January 1951	January 1950
CBS	$ 6,855,930	$ 6,133,624
NBC	5,215,947	5,733,893
ABC	3,015,164	3,538,491
MBS	1,542,887	1,678,888
Total	$16,629,928	$17,084,896

Reaffirming one-year moratorium on live telecasts of college football, National Collegiate Athletic Assn. TV Committee March 3 took under advisement "experimental telecasting" proposals by RTMA, Phonevision, Skiatron and theatre-TV spokesmen. Meanwhile TV-radio manufacturers and broadcasters prepared to better their relations with organized baseball via promotion campaigns. National Assn. of Professional Baseball Leagues named Memphis public relations counsel Matty Brescia as TV-radio consultant, on recommendation of NAB. RTMA announced baseball promotion program for use by TV-radio manufacturers, distributors and dealers, to "sell baseball and TV—not one at the expense of the other." Subcommittee which prepared program: Dan Halpin, RCA; Fred Lyman, DuMont; V. C. Havens, Crosley.

Charges of "invasion of privacy" by TV cameras during Congressional investigations are set for court test, now that Kefauver Crime Committee has issued contempt citation against St. Louis "betting commissioner" James J. Carroll for his refusal to testify when KSD-TV's cameras were focused on him last week (Vol. 7:9). Telecasts of hearings have been "sellouts" everywhere. Viewing was so widespread in Los Angeles that theatres reported slump in matinee attendance. Next committee session is in New York March 12, WPIX carrying it on pooled basis, other stations cutting in during day. Hearing room in Federal Bldg., Foley Square, is too small to accommodate all of press, so DuMont is placing 19-in. set close by for press overflow.

Columbia Pictures seems to be poised for first actual plunge by a major studio into feature production for TV. Reports following arrival in Hollywood of Ralph Cohn, Screen Gems president, indicate that Columbia subsidiary is readying for half-hour and hour TV features. Heretofore, it has concentrated mostly on commercials. Lending credence to reports are recent personnel appointments: Will Baltin, ex-TBA (Vol. 7:9); John Gilmour, ex-Transfilms; Peter Keane, ex-Sarra.

RCA reduced price of theatre-TV equipment from $25,000 to $15,800, reveals for first time that PT-100 apparatus was in mass production. One reason for cut apparently was Polaroid Co. development of 22½-in. plastic lens for RCA system. Cost is a "small fraction" of similar all-glass unit, Polaroid said. Cut in RCA price came shortly after 20th Century-Fox had bought into Swiss Eidophore system (Vol. 7:7).

That illegal Texas station (Vol. 7:6) was in Madisonville, had been picking up KPRC-TV, Houston, 80-90 miles away, and rebroadcasting between Channels 4 & 5, apparently providing signals that TV sets could use. FCC is expected to announce action in case in week or so.

Financial & Trade Notes: Tung-Sol Lamp Works Inc., Newark, proposes to change name to Tung-Sol Electric Co. at board meeting March 26—the better to reflect scope of its operations, which are heavily in cathode ray and receiving tubes as well as miniature incandescent lamps, headlight lamps and flashers. Company this week reported 1950 sales and earnings best in 25-year history—$29,425,022 sales and $3,058,151 income after all taxes, or $6.61 per share on 445,262 shares outstanding. In 1949, sales were $15,530,969, net profit $867,469, or $2.26 on 322,284 shares of common then outstanding. Preference shares at end of 1950 were 53,494, reduced from 171,628 in 1949. Working capital rose to $6,080,656 from $3,272,235. Proxy statement shows chairman Harvey W. Harper only stockholder with as much as 10%, being beneficial owner of 83,014 common shares (18.6%). President Louis Rieben holds 13,586 shares, drew $31,916 in salary and bonus last year; v.p. Raymond E. Carlson holds 772 shares, drew $29,291 total compensation in 1950.

* * * *

Monarch Radio & Television Corp., 2430 Atlantic Ave., Brooklyn, originally incorporated as National Polytronics Inc., is currently offering 600,000 shares of common stock at 50¢ per share through George J. Martin Co., New York. Authorized capital stock is 2,000,000 shares, par 5¢, of which 800,000 have been issued. President is Vincent S. Acunto, v.p. Julius Rivman, directors Herbert D. Scharf and Lawrence H. Rivman. Martin Co. letter says Monarch is one of largest makers of coin-operated TV and radio receivers.

Arvin Industries Inc. (formerly Noblitt-Sparks) reports 1950 sales of $53,684,137 and earnings after Federal taxes of $3,605,126, or $4.04 on 890,625 shares outstanding—its biggest year and a year marked by opening of new 102,000 sq. ft. factory turning out 23 different TV-radio models. This 1950 record compares with preceding year's $37,128,658 sales, $3,093,843 profit ($3.47 on 593,750 shares outstanding). TVs and radios accounted for 29% of 1950 volume; electrical appliances, auto heaters and metal furniture, 26%; automotive parts, 45%.

Bendix Aviation reports operating income of $67,044,706, net income of $2,578,458 ($1.21 a share) for quarter ended Dec. 31, 1950 vs. $52,379,209 gross and $3,798,919 net ($1.79) for same 1949 quarter. Company's fiscal year ended Sept. 30.

Emerson's 13 weeks ended Feb. 3, 1951 resulted in net profit of $1,518,856 (78¢ a share) compared with $1,225,912 (63¢ on equivalent shares) for comparable period 1950.

Clarostat reports $5,985,240 sales, $407,908 profit in 1950 vs. $2,331,970 sales, $102,113 loss in 1949—losses incurred largely through moving its plant from Brooklyn to Dover, N. H.

Olympic reports $1,370,221 net income ($4.05 per share) for 11 months ended Nov. 30, 1950.

* * * *

Dividends: RCA, 87½¢ on preferred payable April 2 to holders March 12; Collins Radio, 68¾¢ quarterly on preferred payable April 2 to holders March 21; DuMont, 25¢ payable on "A" common payable March 26 to holders March 12; Decca Records raised quarterly dividend from 12½¢ to 17½¢ payable March 30 to holders March 16; Arvin, 50¢ payable March 31 to holders March 19; Trav-Ler, 10¢ payable March 28 to holders March 17; Davega Stores, 35¢ on common payable March 31, 25¢ on convertible preferred payable April 2, both to holders March 19; General Instrument, 20¢ payable May 15 to holders May 1; Corning Glass, 25¢ payable March 31 to holders March 19.

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020

KEY MOBILIZATION JOB HANDED WEISS: Guardian of the civilian economy -- that's the big assignment Uncle Sam has given Lewis Allen Weiss. As newly-appointed director of NPA's Office of Civilian Requirements, he's the man in Washington who must see that civilian needs aren't neglected when materials pie is divided.

"Lew" Weiss, 58, until recently was $140,000-a-year president of Don Lee Network in Los Angeles, his home. A pioneer broadcast executive, he's former chairman of Mutual Broadcasting System, was a World War I cavalryman, has latterly been a consultant to Hughes Aircraft Co., now heavily in electronics.

OCR isn't a high "policy" agency. It's sleeves-rolled-up working division, and as its chief, Weiss is responsible to NPA director Fleischmann, whose agency in turn carries out policy made by Defense Production Administrator Wm. Harrison.

But Weiss' division is a "watchdog" -- to make sure that mobilization boss Wilson's policy of keeping civilian production high (Vol. 7:8) is carried out. OCR's importance will increase as U.S. swings deeper and deeper into military production and as shortages threaten to pinch on home front.

Officially, OCR is the "claimant agency" to assure "maintenance of goods and services essential to the civilian economy." This means that Weiss' duty is to "speak up" for civilian industries liable to be hurt by proposed materials and distribution orders -- and to battle it out with any other division or agency that proposes actions that might injure the civilian economy.

Already, for example, Weiss has acted to assure adequate supplies of raw materials to producers of baby carriages, flatware, electric ranges and metal furniture. His division listens to businessmen's complaints, then confers with other NPA divisions and officials to nip shortages in the bud.

OCR will keep eye on wholesalers and retailers to see they get even break when NPA clamps distribution curbs on civilian goods. Right now, it's completing survey of what's needed to keep civilian economy at high level of productivity.

It's inevitable that TV-radio manufacturers and distributors will come in contact with OCR. Presently, OCR is working out scheme to keep parts flowing for repair of home TVs, radios and appliances (see p. 3).

Present OCR plans envisage staff of 150 by July 1, with specialists to serve as claimants for all civilian products and services -- including a TV-radio man.

Of interest to TV-radio industry are these OCR officials: Lester P. Doidge, special asst. to the director, in charge of end products, and Nelson Miller, head of parts and components branch.

FEW ELECTRONICS FIRMS GET GOVT. AID: Uncle Sam isn't sold on idea that TV-swollen electronics industry must build new plants for war work (Vol. 7:8).

National Security Resources Board has granted 258 certificates of necessity for rapid tax amortization of new plants and facilities -- but only a dozen of them, mostly for small dollar amounts, have been for electronic and related items.

Defense Production Administration, which Jan. 25 took over job of issuing the certificates, has granted 189 more to unnamed companies -- believed to include very few, if any, electronics firms.

Under amortization program, Govt. pays part or all of cost of new plant by allowing owner to deduct specified percentage of plant's cost from his taxes over 5-year period. The 447 certificates granted to date by NSRB and DPA have provided average amortization of 74%.

Very few certificates have been granted for 100% amortization -- and most of those are for manufacture of items with little or no civilian use. DPA boss Wm. Harrison disclosed this week his agency's amortization grants range from 50-100%.

In revealing handful of electronic firms getting govt. tax amortization aid for expansion, NSRB doesn't disclose percentage of amortization allowed, merely states total cost of expansion. These are the firms:

Raytheon, $2,007,720, for manufacture of magnetron tubes, and $720,000, electronic tubes; Lewyt Corp., $2,894,783, communications equipment; Sylvania, $1,065,000, electronics; Machlett, $555,000, electronic tubes; Radio Receptor Co. (no dollar amount approved at time of listing, but firm applied for $490,000 for electronic equipment); Seeburg, $127,230, radio & radar; Tung-Sol, $60,400, tubes.

Certificates granted for related equipment: Minneapolis-Honeywell, $2,316,-618, electronic aircraft controls; American Lava Co., $712,140, ceramic cores; Allied Control Co., $56,149 and $35,430, relays & coils; Blaw-Knox, $50,900, towers.

Loans, tax amortization, govt.-furnished plants and equipment are responsibility of Maj. Gen. Thomas F. Farrell, ex-Army Engineers, named this week DPA Deputy Administrator for Resources Expansion.

COPPER-ALUMINUM END-USE CURBS VETOED: TV-radio manufacturers will be permitted to use all the copper and aluminum they can get in second quarter. At least that's how things stand at moment with unpredictable National Production Authority.

When NPA issued steel end-product order March 7 (M-47), it revealed it had reversed itself, abandoned plans for copper-aluminum end-product curtailments (Vol. 7:8), announced 2 weeks ago by Administrator Manly Fleischmann.

"Administratively impossible to enforce" -- is an NPA official's explanation of surprising reversal. Original plan, which would have been rough on some TV manufacturers, was to limit durable goods makers in second quarter to 75% of copper, 65% of aluminum they used during average quarter of first-half 1950 base period.

Steel order does apply to TV-radio, however -- limits each manufacturer in second quarter to 80% of steel used in his output during average quarter of first-half 1950 if he makes any of his own parts from iron or steel products (i.e., punching chassis from sheet steel). Manufacturer who buys all his steel-containing parts ready-made is forced by order to hold his total unit output of TV-radios in second quarter to 80% of number he turned out during average quarter in first-half 1950.

So if you're merely an assembler -- not manufacturing any parts which contain iron or steel -- you'll find your unit output limited by Govt. next quarter. Order applies to phonos and record players as well as all types of home receivers and broadcast-band auto receivers.

* * * *

To cover up omission of copper-aluminum curbs, NPA says steel limitation will automatically save copper, aluminum, zinc, rubber, nickel -- because in most "hard goods" industries (i.e., auto, refrigerator), cutback in steel means cutback in total unit output of products.

This isn't true of TV-radio. Amount of steel available here doesn't govern total output. But copper could. That's why plans as originally announced worried some segments of industry. Conservation measures, in many cases, can cut use of steel per receiver much more than required 20% -- thereby not affecting unit output. Far more serious to TV-radio than steel restriction are shortages of copper (wire-coils-transformers), cobalt (speakers), nickel & tungsten (receiving tubes).

As aid to small business, NPA permits manufacturers who used 100 tons of steel or less per base period quarter, to use equal amount during second quarter. Roughly, this dispensation would apply to manufacturers with annual output up to 50,000 TVs and radios. There's no limit on steel for replacement parts (see p. 3).

Copper and aluminum fabricators -- as distinguished from end-product manufacturers -- will remain under limitations during second quarter, as they have been since Jan. 1. This, of course, will continue to be felt by manufacturers in curtailed supply of copper and aluminum products -- especially in case of copper, where permitted use by fabricators has been cut from 80% in March to 75% of base period rate in second quarter (M-12 as amended). Copper wire mill products will still be limited at 80%, however. Aluminum fabricators will continue to be limited to 65% of base period use (M-7 as amended).

Mobilization Notes: Mounting evidence that aircraft firms are going more and more heavily into electronics production (Vol. 7:4) is contained in recent announcements by 2 large airplane manufacturers:

North American Aviation is setting up new electronics division, at Downey, Cal., to design and manufacture electronic equipment and complete guidance control systems for missiles and aircraft made by North American and other companies. L. L. Waite, asst. to president, will head division, Dr. N. E. Edlefsen will be technical director.

Fairchild Engine & Airplane Corp., announcing similar move, revealed it will build $1,750,000 plant for its guided missiles division near Babylon, L. I. to turn out complete electronic missile control systems.

Other recent aero-electronic developments:

All electronic components of new Martin P5M-1 Marlin anti-submarine seaplane—electronically one of the most completely equipped planes ever built—will be produced by subcontractors. Fourth production order, of unstated amount and dollar value, was announced March 7 by Navy. Marlin's "electronic equipment will discover submarines under nearly all conditions during over-water flight," Navy says.

Westinghouse is producing "radar-directed airborne control systems, far more powerful than any ever built before, for aiming and firing guns and rockets," president Gwilym Price told stockholders in annual report (Vol. 7:9).

Gilfillan Bros., Los Angeles, has developed for Air Force new electronic device which can keep track of 3 planes simultaneously from point 5 miles from end of runway. *American Aviation Daily*, authoritative aircraft industry journal, reports Automatic Traffic Control Monitor was developed and delivered in 4 months at total cost less than $12,000, will cost less than $4500 in production quantities.

* * * *

No cobalt at all for civilian use this summer—that's the word from a top NPA official. "It's a sad fact," he said, that "the military program will require all available supplies of cobalt by this summer." He added that big challenge to TV-radio industry is to develop non-critical substitute speaker material by that time (copper, also critical, is only practical substitute now)—to prevent "widespread unemployment which we [the NPA] will be unable to do anything about."

Tight nickel supply—tube manufacturers' biggest worry at moment—was under discussion on at least 2 govt. fronts this week. At Munitions Board Receiving Tube Industry Advisory Committee meeting March 9, tube makers appealed for help in easing nickel situation. Board asked for estimate of requirements for next 90 days, promised to do what it could. Meanwhile, it was learned NPA is planning all-out allocation of nation's nickel supply—probably beginning May 1. Tube makers told Munitions Board of growing shortages of tungsten and plastic. Defense Dept. officials asked manufacturers to tighten up on tube specifications, since military requirements are more exacting than civilian.

Now it's selenium that's due to be short—and just when industry was preparing to use great chunks of it as substitute for copper-consuming transformers in TV sets (Vol. 7:7-8). Because of impending selenium shortages (Vol. 7:9), this RTMA committee has been appointed to investigate problem, meets March 15 in Washington: Darwin C. Brown, RCA, chairman; Walter Bonner, Federal; James Brothers, Philco; R. E. Caron, American Smelting & Refining; Hugo Cohen, Radio Receptor; G. J. Eannarino, Sarkes Tarzian; Eric Lidow, International Rectifier; Glen Ramsey, Fansteel; E. H. Wavering, Motorola.

Mobilization Personals: Frank Langstroth, on leave from Lansdale Tube (Philco), named special consultant to set up organization for study on reliability of electron tubes under Research & Development Board of Joint Chiefs of Staff . . . Mrs. Ethel Gilbert, pre-World War II program-talent sales representative for NBC, appointed director of Office of Industry Advisory Committees, Office of Price Stabilization; she held same post in OPA during World War II days . . . Charles H. Kendall, for 20 months general counsel of National Security Resources Board, named to same post in Defense Production Administration . . . Rufe B. Newman Jr., Florida consulting engineer, appointed director of National Production Authority's Construction Controls Div.; Melvin Cole, on leave from Bethlehem Steel, heads Iron & Steel Div.

Distributor task group set up by NPA to study conservation and repair parts problems (see p. 3): W. D. Jenkins, Richmond, chairman, National Electronic Distributors Assn.; Arthur C. Stallman, Ithaca, N. Y., NEDA president; Hoyt C. Crabtree, Dallas, NEDA secy.; Wm. E. Harrison, New York; Joseph A. DeMambro, Boston. Other members of Electronics Parts Distributors Advisory Committee: Lew Bonn, Minneapolis; Lealis L. Hale, Monroe, La.; Elmer Kinkade, Tampa; Dahl W. Mack, Scranton; John Stern, Philadelphia; R. R. Legg, Los Angeles.

Supply of electronic engineers must be maintained, RTMA president-chairman Sprague wrote Senate & House Armed Forces Committees March 9. He put industry on record as favoring the recommendation of NSRB's Scientific Manpower Advisory Committee to set up Reserve Specialist Training Corps, numbering 75,000 top students per year (mostly science), keep them from military service. Sprague reported electronics industry snapped up entire 50,000 graduates of both 1949 and 1950 classes, is hot on trail of 30,000 due to be graduated in 1951.

NPA Electronic Products Div. has moved to temporary quarters at 801 E St., N. W., Washington. Mailing address remains same: Electronic Products Div., National Production Authority 445, Washington 25, D. C. Routing number, 445, used in addressing mail, helps delivery.

Auto radio antennas made after April 1 can't contain copper, NPA ruled March 9 in amendment to Order M-12. No other TV-radio items are on list.

———■———

Security lid was clamped this week on dollar values and number of units involved in unclassified govt. contracts as listed weekly by Commerce Dept. Following are contracts ($100,000 or more) for electronics and related equipment as listed by Commerce Dept. for 4 days ending March 5, in last synopsis giving dollar value: Through Signal Corps, Philadelphia—Hallicrafters, $1,000,000, radios (66 units), increase in cost of 197 radios in previous contract, 126 radio terminal sets; Collins, $750,000, radios (1917); Wurlitzer, $429,000, converters, mountings; Hoffman, $400,000, radios (1747); Transmitter Equipment Mfg. Co., New York, $200,000, transmitters (126); Federal Telecommunication Laboratories, Nutley, N. J., $196,000, electron tube research and development; General Electronics, Paterson, N. J., $187,200, electron tubes; American Television and Radio, St. Paul, $150,000, increase in unit cost of 3500 power supplies; Harvey-Wells Electronics, Southbridge, Mass., $110,000, RF signal generators (275); Packard-Bell, $100,000, amplifiers (659). Through Navy Bureau of Ships, Washington—DuMont, $200,000, oscilloscopes (300). Through Navy Electronic Supply Office, Great Lakes, Ill.—Sonotone, $215,000, electron tubes (100,000). To receive weekly list of unclassified contracts (without dollar values), write U. S. Commerce Dept. Field Service, Chicago, Ill.

Topics & Trends of TV Trade: Freed Radio Corp. filed petition under Chapter XI of Bankruptcy Act in Federal district court in New York this week, proposing to pay creditors 100% in 12 equal installments to start 6 months after confirmation. About 300 creditors were indicated. Schedules are to be filed by end of month.

Company's present inventory was stated as $923,000. Assets were said to exceed liabilities, arrangement under bankruptcy law being forced mainly by excess inventory and retarded sales. Among reasons given for latter, by company counsel George C. Levin, were uncertainties of color, 10% excise tax, credit restrictions. Company will continue operation, said Mr. Levin; in addition to civilian output, it is working on govt. contracts.

Freed is third and largest manufacturer to file bankruptcy proceedings in recent weeks, others being Vidcraft Television Corp., New York (Vol. 7:7-8) and Richmond Television Corp., Los Angeles (see below). Largest Freed creditors are reported as: Henredon Furniture Industries Inc., approximately $60,000; RCA, $37,000; GE, $40,000; Edwin H. Armstrong, $19,000; Pyramid Electric Co., $15,000; Jensen, $14,000; Standard Coil, $12,000; Trinity Operating Co., $11,000; Sylvania, $8700; Wheeler Insulated Wire Co., $6600.

* * * *

Richmond Television Corp., Los Angeles, lists liabilities of $175,033, and assets of $418,831 in schedules filed in Los Angeles Federal district court, offering to pay creditors in full by interest-bearing notes in 12 equal installments (Vol. 7:7). Liabilities include $108,350 unsecured claims, $39,292 secured, $27,390 taxes. Assets include $239,000 inventories, $92,991 unliquidated claims, $65,000 machinery & equipment, $11,719 bank & other deposits, $6,251 accounts receivable, and right to use name "Natalie Kalmus" in connection with TV sets. In Chapter XI petition, firm listed 163 creditors.

Objections to higher TV-radio excise tax (Vol. 7:5-8) are scheduled to be heard March 15 by House Ways & Means Committee, with these appearances: RTMA, NAB, IUE-CIO, Florida Assn. of Broadcasters, WIOD, Miami. Also slated are Capitol Records, Diamond Power Specialty Corp., Lancaster, O. (industrial TV), and League of New York Theatres. This week, National Committee for Fair Emergency Excise Taxation plumped for national sales tax, ran into strong objections from chairman Rep. Robert L. Doughton (D-N.C.) who said that House would never pass such a measure. Business men's committee included such TV-radio members as Glen McDaniel, RTMA president-elect; J. H. Carmine, Philco; J. W. Craig, Crosley; Ross D. Siragusa, Admiral; F. A. Holme, GE; Robert C. Tait, Stromberg-Carlson.

* * * *

"Set of 1950," in terms of greatest production, was a 16 or 17-in. TV-only console, according to statistics compiled by RTMA. Here's breakdown of year's 7,463,800 total: 3,820,060 consoles (252,000 with AM and/or FM), 2,941,560 table models (52,600 with AM and/or FM), 702,180 TV-phono combinations. FM was featured in 756,120 of total.

Breakdown by sizes didn't start until April, but of the 5,858,600 turned out April-December, 4,117,140 were 16 & 17-in., 1,185,610 were 12½ & 14-in., 532,480 were 19-in. and over, 14,820 were 10-in. Only 6620 were 7 & 8½-in., and 1920 were projections.

Of 14,589,900 radios, 4,740,600 were auto, 1,674,700 portable. Home table models numbered 7,294,100, consoles 880,500. FM was included in 793,100 table sets (900 FM-only), 678,800 consoles—making 18% of total home sets.

DuMont's ad splurge on its 30-in. "Royal Sovereign" model, listing at $1795, in March 7 *New York Times* and *Herald Tribune*, brought out huge crowds to see 12-15 samples displayed by dealers, mostly in New York. In fact, police were called out to control mob at Concourse Music store. Ads were in form of full-size screen, spread over 2 pages, with "apology" for inability to get whole screen on pages. DuMont expects to build 300-400 of the big sets, which contain FM & phono-jack, by July 1. After that, production will be stepped up, with supply of materials governing output. Chassis is standard top-of-the-line, modified to handle 24 kv. Tube is 22-in. long, which compares favorably with length of early 19-in.

Novel promotion of DuMont's luxurious $1750 "Westminster Series II"—19-in. TV-AM-FM-phono set with tape recorder and clock—was devised by dealer Milton Rabovsky, Baltimore. Sales talk on tape is unobtrusively switched on by salesman showing set to customer. Tape concludes spiel with "Now, won't you let my salesman explain my services in greater detail?"

* * * *

NPA will act to prevent manufacturers from shifting emphasis to high-priced lines, if it gets evidence that shortages are prompting such moves. High official said March 9 NPA "won't hesitate to take allocation action to force each company to devote the same proportion of its output to low and medium-priced lines as it did before the shortages." Joint machinery is being set up by NPA, Defense Production Administration and Economic Stabilization Agency to analyze shortage-induced price problems.

Scott Radio (John Meck) plans new line about June 1, called "Limited Editions," including models listing from $1000 to $2000. Latter price will go on 20-in. combination with which will go guarantee that no other set like it will ever be sold in each city. Present line will be continued, and $2000 number may be most expensive on market.

Westinghouse's new electronic tube division (Vol. 6:51) will be located at Elmira, N. Y.; will have working force of 1000, be contained in one-story factory covering 8 acres of floor space. It's due to begin operating early next fall. Plant will produce tubes for military services, Westinghouse says. If military requirements drop off, plant will manufacture commercial radio and TV transmitting and receiving tubes, as well as industrial and X-ray tubes. E. W. Ritter is mgr. of division.

That unfortunate ad concerning children and TV sets, sponsored pre-Christmas by group of manufacturers (Vol. 6:44-47) is a "closed subject" as far as Federal Trade Commission is concerned. FTC had started investigation, but called it off this week after receiving assurances that it won't happen again from 22 manufacturers. Agency commended manufacturers for stopping ad promptly, reported that several manufacturers said ad hadn't been submitted to them for approval before publication.

January excise tax collections for radio sets, phonographs, components (now including TV) totaled $19,439,774, almost four times December collections of $5,483,963 (Vol. 7:5). January was first month which included complete returns on 10% TV manufacturers' excise tax, put into effect last November. For all 1950, excises for radio industry totaled $52,594,623.

Plant Expansions: Sylvania plans new $1,000,000 plant at North Woburn, Mass., 100,000 sq. ft. factory to employ about 600 . . . GE has purchased about 30 more acres adjacent to its Electronics Park, Syracuse . . . RCA cabinet plant at Pulaski, Va. to spend about $250,000 on 6000-ft. expansion for veneer panel output . . . Standard Coil's new 80,000-sq. ft. plant at 1919 No. Vineburn, Los Angeles, to employ 1200, almost completed.

Telecasting Notes: Hats off to Detroit Television Council, its live-wire president Clarance Hatch Jr. (executive v.p., D. P. Brother & Co.) and *Detroit News'* WWJ-TV for being first to plunge into problem of TV's inevitably big role in civilian defense in event of atomic attack (Vol. 7:7) . . . Big conference March 6 with Washington, State and city brass let Detroit folks in on problem via full-hour telecast (9-10 p.m.), for which WWJ-TV cleared prime time right after Milton Berle . . . Detroit would be main target in event of attack, it was agreed, so TV is natural medium for defense instruction. "As Detroit goes, so may well go the nation," said one defense chief . . . Clarence Hatch, whose agency handles Oldsmobile, took this tack: "Thank God for TV, the most effective means of mass communications yet devised. It's our feeling that TV has been making a lot of enemies, that Ellis' talk out here several months ago [about excessive TV rates; Vol. 7:2] did TV a great disservice, that Washington is becoming ruthless in its attempted limitations on TV [and] the Council is attempting to combat the idea that TV is merely a plaything, a luxury and an entertainment medium" . . . Top level Advertising Council takes up advertising's role in atomic problems as first campaign under newly elected chairman Fairfax Cone, of Foote, Cone & Belding, elected this week to succeed General Mills' Samuel C. Gale . . .KFI-TV, Los Angeles, completes separation from AM-FM, with TV engineering staff now autonomous, headed by Curtis W. Mason (H. L. Blatterman becoming chief engineer for AM-FM) . . . WKY-TV, Oklahoma City, moves into morning schedule Saturdays, starting at 10, plans more forenoon telecasts shortly . . . WPIX, New York, spending $120,000 on new facilities, including new 50x48-ft. studio and control room, in New York News Bldg. . . . *Variety* reports NBC-TV about to sign up Hollywood's big El Capitan Theater . . . Phillies and Athletics home games, daytime only, will be carried on rotation basis by WCAU-TV, WFIL-TV & WPTZ, Atlantic Refining and Ballantine sponsoring; no night games will be telecast . . . Chicago National Bank's *News and What It Means to You*, with Austin Kiplinger as analyst, carried regularly on WGN-TV, originated from new banking quarters March 9, with public invited to opening . . . NBC president Joseph H. McConnell subject of biographical sketch in "Business and Finance Leaders" column in March 5 *New York Herald Tribune;* he was grid star at alma mater Davidson College, coached freshman football at U of Virginia while attending law school . . . Worth reading: "Top TV in Town" in March 17 *Collier's*, recounting how "in Chicago they don't lavish money on costly trappings [but] turn out quiet, casual little shows—and audiences love 'em." Among them: *Kukla, Fran & Ollie, Garroway at Large, Stud's Place, Wayne King Show, Zoo Parade, Don McNeill's TV Club, Al Morgan Show* . . .Los Angeles KTTV, recently severed from CBS-TV, has signed affiliation contract with DuMont.

NAB-TV job is Wayne Coy's, apparently (Vol. 7:9)—that is, if he's willing to take it. That may not be known for several weeks, for the FCC chairman faces enormous pileup of work when he returns to his desk Monday (March 12) from his long vacation. He may also be asked to consider presidency of NAB itself, BMI's Carl Haverlin having definitely declined this week—but he's known to be most interested in TV. Chairman Coy wants to leave govt. service, but it can be presumed he would not do so without first consulting President Truman, who isn't due back from Key West before end of month. Meanwhile, committeemen of autonomous TV board (Vol. 7:8) authorized to make appointment will discuss job with him—last week's proposed meeting with chairman George Storer having failed to materialize due to latter's illness.

ASCAP per-program contracts submitted to TV stations this week are being met with such indignant exclamations as "unreasonable" and "preposterous"—but industry music committee headed by Crosley's Dwight Martin intends to keep trying to negotiate. Meanwhile, stations are asked to keep committee advised about their individual thinking and planning and about court actions taken, if any. Licenses in blank were sent to all stations following failure of music industry committee to get ASCAP to continue negotiations last week (Vol. 7:3,8). Per-program terms call for flat 9½% of published one-time rate for commercial programs and announcements using ASCAP music. It compares with AM commercial rate of 8% of net paid broadcasters by sponsors (after deductions for time and sales charges, etc.). Stations have 30 days to tell ASCAP whether they'll sign or not; another 60 days for further negotiations if they object to terms. If still unsettled, stations can then take pleas to Federal district court in New York, which has power to set rates under recent consent decree.

Musicians' strike on networks, both AM and TV, called for next Wednesday (March 14), is expected in informed circles to be avoided by deal between Petrillo and the network presidents. That's been pattern in past, could be repeated in current AFM impasse (Vol. 7:5-8). Musicians' demands not only concern wages, but involve canned music, networks' refusal to limit use of kinescopes, and their rejection of proposed 5% royalty payments on TV films. Among other union troubles, TV stations in Chicago and Los Angeles were at issue with TVA over local scales and terms. And in New York, NBC's WNBT was off air for hour from 11:30 a.m. March 8 when jurisdictional dispute arose between NABET and Local No. 1 of Technicians & Theatrical Protective Union over which should operate lighting switchboards in studios.

As Binghamton's WNBF-TV was linking into networks March 7, served via microwave from midpoint in Albany-Syracuse relay, 2 applications for new TV outlets in upstate New York were filed with FCC this week. Syracuse's WFBL applied for Channel 10, Utica's WIBX for Channel 3. Also applying this week was *Wichita Eagle's* KFH, Channel 5. Total applications now on file number 388. [For further details about these applicants, principals, etc., see *TV Addenda 12-I* herewith; for listings of all applications to date, see *TV Factbook No. 12* with Addenda to date.]

Indicating strong support for new NAB-TV is fact that, of some 50 stations pledging memberships at recent organization meeting (Vol. 7:3,5), 31 have already signed, including NBC-TV's 5. To meet proposed $150,000 budget, new TV association needs about 75 of the 107 stations. Stations signed: WCAU-TV, WMAR-TV, WJAR-TV, WAFM-TV, WBRC-TV, WOC-TV, WAVE-TV, WHAS-TV, WJAC-TV, WTAR-TV, WTCN-TV, WKZO-TV, WFBM-TV, WSYR-TV, WBAP-TV, KRLD-TV, KPRC-TV, WSAZ-TV, WGAL-TV, WDEL-TV, WNBF-TV, KEYL, KTTV, WTVJ, WBTV, WWJ-TV. The 5 NBC stations: WNBT, WNBW, WNBK, WNBQ, KNBH.

Alfred I. DuPont Radio Awards for service to national and local community during 1950 were tendered at New York dinner March 10 to WFIL-TV, Philadelphia; WAVZ, daytime AM local in New Haven, Conn.; and John Cameron Swayze, commentator on NBC-TV *Camel Caravan*. Judges: Mrs. Alfred I. DuPont, Jacksonville; Dr. Francis P. Gaines, president, Washington & Lee; Mrs. Hiram C. Houghton, president, National Federation of Women's Clubs; Ben McKelway, editor, *Washington Star;* M. H. Aylesworth, former president of NBC.

Editor's Note: *News of electronics in the mobilization effort ran so heavy this week that, for convenience sake, we are separating it in a special Electronics Reports section herewith.*

HENNOCK HOLDS UP THE TV ALLOCATION: FCC's new allocation plan hit snag this week -- in shape of Comr. Hennock, who is said to have raised hob with fellow commissioners mainly because of allegedly inadequate channel reservations for educators.

Plan is ready for release (Vol. 7:10), but she said she needed more time to study it, presumably is preparing a blistering minority report inasmuch as it's unlikely she can muster majority to agree to her demand for reservation of flat 25% of all channels, vhf and uhf, for "educators" (Vol. 7:4,5).

Should FCC chairman Wayne Coy resign soon, there seems to be little doubt Comr. Hennock is hell-bent to get chairmanship -- possibly crusading on her record of advocacy of TV channel priorities for educational institutions.

There are "hopes" now of getting plan (called "Third Report") out next week. Said one commissioner: "If there's any holdup from now on, don't blame me. I was ready last week and I'm still ready."

Provisions of plan, in addition to those listed last week (Vol. 7:10), are understood to include:

(1) Quick unfreezing of vhf in territories -- Hawaii is only one with applications to date (Vol. 7:4,5).

(2) Uhf to thaw "soon," whereas vhf must necessarily go through number of additional legal steps (Vol. 7:10).

Again: Don't jump to conclusion that issuance of allocation plan means vhf freeze is over. It's just another step towards freeze end -- an important one, to be sure -- but one of several more to come before freeze can truly be considered over. "Year's end" is still good guess...and no new stations until well into 1952 -- if mobilization doesn't interfere.

TRANSMITTER OUTLOOK—NOW & POST-FREEZE: True meaning of freeze-end -- actual station construction -- when? -- how many? -- remains plenty tough to forecast. But we're glad to report we've put reasonably accurate finger on one extremely important factor -- transmitter availabilities.

Prospects appear surprisingly good, the defense program permitting.

A check among Big 3 transmitter makers -- RCA, GE, DuMont -- all terribly skittish about revealing figures of possible use to competitors -- produces these statistics, which we believe to be close to true figures:

35-40 transmitters built, awaiting end of freeze, some already in hands of applicants, most of balance sold, very few if any left. Of course, some have been exported, and several more will be, mainly to Latin America.

50-70 more planned for completion by early 1952, with orders already being placed for some of these.

Copyright 1951 by Radio News Bureau

MAR 1 195

Output of Federal is believed to be quite small, though it, like Raytheon, began making pitch for this lush business (then ranging from $100,000 to $250,000 per station order) just before freeze stopped things.

High-powered amplifiers are planned by all 3 makers -- DuMont 50 kw, GE 30 kw & 20 kw, RCA 20 kw. But production apparently awaits demand, and demand awaits FCC's new engineering standards and allocation plan (see p. 1).

A few applicants have revealed transmitter purchases, but majority is keeping quiet. Purchases have been disclosed by KMBC, Kansas City; WMBD, Peoria; KGW, Portland, Ore.

* * * *

Recent surge of transmitter orders, probably working to peak at next week's IRE convention, led one manufacturer to halt sales Feb. 1 to March 15.

Like the others, he was selling to all comers during FCC freeze, glad to get orders. Lately, however, he began to get so many firm orders that he feared older customers, with contracts contingent on grants of CPs, might be left out in cold. Therefore, he held up all sales, asked contingent contract holders whether they wanted to place firm orders before all transmitters were gone. They've "over-subscribed," he reports. Other manufacturers are in about same shape.

Associated equipment, such as cameras, monitors, antennas, etc., are also being snapped up, by existing stations as well as applicants. But such gear isn't considered critical; a station, especially if it gets network hookup, can get on air with transmitter and very little else. Besides, associated equipment can be produced far more quickly than transmitters.

Prospects for new transmitters are dependent on availability of materials and components, of course -- subject to defense priorities. Manufacturers usually build "batch" of transmitters at one time, and "manufacturing cycle" used to be about 6-9 months, pre-Korea. Now, it's 9-12 months or more.

Plans for uhf are naturally more nebulous, depending entirely on demand which develops after issuance of FCC standards. But all transmitter manufacturers -- plus Westinghouse, reportedly, perhaps others -- are hard at work designing units. Achievement of high power is the bugaboo.

KEEP YOUR EYE ON 'COMMUNITY ANTENNAS': Don't kiss off the community antenna idea (Vol. 7:2,7) as a mere flash-in-the-pan novelty -- not yet, at any rate. This "antidote to the freeze" is getting plenty of quiet scrutiny lately -- in addition to all-out promotion by marketer Philco and manufacturer Jerrold Electronics.

It's a "natural" as a TV "market expander," currently very much needed.

Nor can FCC be written out of the picture. It has been querying everyone in the business, with an eye to deciding whether such systems are common carriers and thus subject to Commission regulation. FCC decision, one way or other, could come in matter of weeks.

Principle of system, you'll recall, is simply that of using lofty receiving antenna (atop mountains, buildings, etc.) to pick up distant stations and feed the amplified signals into homes via cable. System may also give uhf an assist, since it can take uhf signals, convert them to vhf -- obviating need for uhf tuner and antenna for each home receiver.

Regardless of system's future, it's certainly intriguing. As one very perceptive distributor says: "It's either going to be one of the biggest deals in TV -- or the biggest bust. I can't decide which. But in any event it will be big."

Whether system burgeons or poops out probably depends basically on answers to these questions:

(1) Will new TV stations, which can service these towns with "free' signals, come on air soon enough to render too risky the necessary heavy investments in community antenna systems?

(2) Are many towns unlikely to get decent telecast signals even after many new stations are on air, thus justifying community installations now?

Only way to get answers to these questions is by guessing when new stations

will get going and by conducting exhaustive engineering surveys of individual towns and the station reception they're likely to get.

Question of equipment shortages, of course, overhangs all estimates. In one small town surveyed, for example, some 300,000 ft. of cable would be needed.

Only Philco and Jerrold are out in the open right now, encouraging installations wherever they can. Jerrold advertising manager Sydney Mass addressed Kiwanis Club in tiny Cuba, N.Y. March 12, attracted audience of about 100 from many towns.

In addition to towns mentioned in our Vol. 7:2, he revealed that there are projects in various stages of development in Cuba, Dansville, Olean, Corning, Wellsville, Bradford (all New York); Omega, Kan.; Manois, Pa. Duluth entrepreneurs are also known to be considering project.

Costs involved, according to Mass, include: $4000 per mile from antenna to first group of homes, $1.50-$2.50 annually for rental of utility poles. Customers pay $100-$125 for installation, $2.50-$3.50 per month for service.

Other companies, bigger but slower than Jerrold, are getting into act. It's known that RCA, for example, has been exploring Pottsville, Pa. in collaboration with local distributor Trans-Video Corp. (Michael Malarkey).

* * * *

What FCC will decide about its role is of course unknown. But common carrier experts outside Commission believe that Communications Act probably could be stretched to cover community antennas -- thus empowering FCC to fix rates, quality of service, etc. Yet, says one lawyer, question is sufficiently "marginal" that Commission could easily decline jurisdiction. This legalist said if he were advising FCC, he'd tell it to leave operations alone for a while, see whether they'll grow and provide service, before starting policing action.

System's promoters hope, at any rate, the Commission won't take this ingenious device for bringing TV to small towns and tie it up in the usual snail's-pace of administrative procedures.

There are other legal problems -- local and state governments, utility commissions, etc. In fact, Panther Valley TV Co., Lansford, Pa. (Vol. 7:2) this week got orders to remove antenna from Summit Hill within 10 days. Town council said company had violated agreement to pay $100 installation tax and 20% tax on revenue. Panther Valley contends tax is illegal, told subscribers service will continue.

RADIO RATES IN TV CITIES HIT AGAIN: Advertisers aren't letting up in their drive to get radio rates lowered in TV cities.

That's obvious deduction from ANA's 22-page April report on "Radio Time Values," to be submitted at March 28-31 Hot Springs, Va. convention.

Report recommends reduction of night-time radio rates in TV cities from as much as 60% in Baltimore, Boston & Philadelphia to as low as 5% in Des Moines, Kansas City, New Orleans & San Antonio. For networks, it calls for NBC cut of 19.2%, CBS cut of 19.4%.

Radio broadcasters knew what was coming -- apparent when broadcasters' spokesman Broadcasting Magazine this week played up CBS study showing radio better value than ever.

ANA tried to get networks to go along in night-time radio cuts last year -- but they wouldn't play (Vol. 6:29-31,39). NBC advocated same thing last December, hurriedly retreated when affiliates howled (Vol. 6:50, 7:1).

* * * *

Here's what latest ANA study purports to show:

(1) Cost-per-thousand listeners on CBS for sponsored night-time programs during Oct.-Nov. 1949 and same period 1950 rose 24.6%. For NBC, it rose 27.7%. This compares with increased cost for March-April 1949 and same period 1950 of 21% for CBS, 18.4% for NBC. Programs all occupied same time spots during periods studied.

(2) Downward trend of radio listening in TV cities is at rate of 1½% per month. Average ratings for sponsored CBS night-time shows dropped 18% between March-

April 1949 and same period 1950, 21% between Oct.-Nov. 1949 and same period 1950. NBC figures were 18% and 24%.

(3) TV's impact affects even most popular radio programs. Lux Radio Theater ratings in 5 TV cities during comparable 1948, 1949, 1950 periods fell as follows: 25.9, 18.1, 10.7. This compares with these rises in 5 non-TV cities: 22.5, 24.7, 23.0. Jack Benny ratings went down in same TV cities as follows: 24.1, 17.7, 12.7; compared with following rise in same non-TV cities: 20.0, 27.6, 29.9.

(4) TV's share of total broadcast audience for 6-11 p.m., Nov.-Dec. 1950 hit incredible top of 70.5% in Philadelphia -- these cities having 50% or more: New York, Baltimore, Providence, Dayton, Detroit, Washington, Chicago, Columbus, Cincinnati, Boston, Buffalo, Toledo, Milwaukee, Cleveland, Los Angeles, Syracuse, Atlanta, Rochester.

* * * *

CBS radio story asserts that average advertiser on its night-time radio network reaches 62% more prospects-per-dollar than magazines, 137% more people than metropolitan newspapers. ANA report states CBS radio reaches 591 people per dollar, compared with 365 for magazines, 249 for newspapers.

NEW PHASE IN THE TV REVOLUTION: An entirely new body of law may be built around the electronic eye that is TV.

For TV can, in effect, crowd millions of spectators into a Congressional hearing room or a courtroom -- indeed, almost any kind of meeting -- as easily as it can show theatrical and sporting events.

Indeed, public trials can be "good theater," as evidenced by smash-hit telecasts of Senate Crime Investigating Committee hearings in every city the "show" has played thus far (see p. 12). Court test is already in prospect over whether a witness can be forced to testify before a TV camera.

When St. Louis "betting commissioner" James J. Carroll recently refused to testify before Senator Kefauver's committee while KSD-TV cameras were focused on him (Vol. 7:9-10), he was charged with contempt of Congress. Sen. Kefauver, himself a lawyer, took position that:

"Television is a recognized medium of public information along with radio and the newspapers."

At New York hearings this week, Frank Costello, reputed king of New York's underworld, objected to telecasts as forcing him "to submit himself as a spectacle," won Senatorial ruling his face should not be shown. So cameraman focused on his nervous hands, his shirtfront, knot in his necktie, etc., while voice of course was carried. And stations that evening carried full views via newsreels.

Costello, too, took a walk out of hearing March 15 -- complaining he was ill, his counsel expostulating against cameras, etc. He may also be cited for contempt, providing still another test case over the TV issue.

Best legal minds are divided on TV's role and rights -- Rep. Clifford Case (R-N.J.) even proposing code of fair procedure for Congressional investigations which would provide "no photographs, moving pictures, television or radio broadcasting...shall be permitted while any witness is testifying."

Among legal questions pointed up by Kefauver probe:

Is traditional principle of open hearings limited by number of persons who can physically be seated in Congressional committee rooms -- or are the people entitled to be present by proxy via the TV eye?

Is presence of TV camera conducive to justice -- or will it, as Washington Post editorialized, "encourage the inquisitors to put on a show instead of calmly seeking information" and tempt some witnesses "to resort to spectacular stunts and colorful charges?"

Does telecasting of such events "make for a better informed citizenry," as New York Herald Tribune claims, or does it place the unfortunate witness on a freak-show platform and brand him as guilty though he may be innocent?

Can a witness be forced "to perform," as Scripps-Howard columnist Robert

Ruark puts it, "as an unpaid actor for private enterprise...for somebody else's personal gain?" After all, he writes, TV is private business for profit.

Is the merciless TV lens -- which spotlights every gesture and grimace, and does the actual viewing for the spectator -- an invader of privacy and a hawker of editorial bias rather than an impartial recorder?

Is TV entitled to same reporting privileges as press, newsreels and radio, which actually do select and edit? Should TV also be given access to courtrooms?

Just as it's revolutionizing radio, the movies, merchandising -- indeed, home life itself -- TV may bring about brand new legal procedures.

LOOK for more color publicity—as March 26 Supreme Court showdown nears (Vol. 7:10), as reporters find news in March 19-22 IRE convention color sessions, as CBS intensifies promotional campaign, and as reports seep out that RCA has achieved important refinements in its system.

Meanwhile, for the long pull—legalities and technicalities aside—industry attitude is probably epitomized by statement in Motorola's annual report released March 14:

"The progress that a color TV system could make at this time is questionable in our judgment because engineering staffs in our industry are, and will be for some time, primarily engaged in essential military work. We . . . believe that color should not be formalized as a system until such time as it can be done electronically. This again involves more engineers and more time. As we see it, no matter which way the [Supreme Court] decision goes, color TV for the public will be several years in the future."

On the other hand, some within FCC seem to rely on this sort of development: Freeze will end and Commission will favor applicants promising to telecast CBS color. These will get on air in new markets. Manufacturers will find existing markets near saturation, turn to new areas where people will insist on color sets.

Such thinking involves some big assumptions—including one to effect that Commission can ignore merits of compatible system. This line of thought also assumes Supreme Court will endorse FCC decision.

* * * *

Lineup for oral argument (Court opens at noon) is as follows: 2 hours per side (instead of usual one), meaning sessions may run into next day. Both sides are furiously writing briefs, will be swapping them right up to day of argument. Solicitor General Philip Perlman plans to handle argument himself, with slight possibility of assistance from staff, perhaps Stanley Silverberg who has done the spade-work—none from FCC. Judge Samuel I. Rosenman will be on tap for CBS, John T. Cahill for RCA, Judge Simon H. Rifkind for Emerson.

Flavor of Emerson's argument is well-illustrated by Judge Rifkind's statement in his brief:

"[FCC decision] may irrevocably congeal the character of TV for generations to come. Once the system contemplated by the order is established, it can no more readily be changed than the gauge of United States railway trackage. A commission possessed of a modicum of respect for the opinion of others, or exhibiting the normal humility of any finite mind which entertains the philosophical question whether it might be wrong, would not obstruct, but would indeed solicit the most careful review of its judgment in order to afford the country the maximum degree of assurance that its decision is free of detectible error . . .

"Congressional policy as reflected in the Administrative Procedure Act and the debates which led to its enactment is designed to put a tight curb upon claims to administrative omniscience rather than to give those claims the free rein sought by the FCC."

Court's decision, which could come as early as April 2 or as late as June 4, would end litigation if it upholds FCC. If RCA and Emerson win, case could be sent back to 3-judge court whence it came (Vol. 6:51) or returned directly to FCC for further consideration.

* * * *

Neither RCA nor CBS will present papers or sit in on color symposia during IRE convention. However, CBS will conduct daily closed-circuit demonstrations, placing camera in booth of Gray Mfg. Co., receivers in booths of Reeves Soundcraft and Rangertone—using Remington-Rand equipment. RCA will display cut-away sample of tri-color tube.

CBS went to town with demonstrations for major advertisers all this week, reaping kudos from them as they observed closed-circuit colorcasts of their products. CBS put out daily press releases with quotes from representatives of companies whose products were shown:

Kroger, General Mills, Colgate-Palmolive-Peet, Canada Dry, Northam Warren (Cutex), Sealtest, Cannon Mills, Bristol-Myers, Pond's, Ballantine, Hudson Pulp & Paper, Manhattan Soap, Bulova Watch, National Biscuit, Standard Brands, Continental Baking, Sterling Drug, Owens-Corning-Fiberglas, Bymart, Alexander Smith & Sons Carpet, C. H. Masland & Sons, Lever Bros., Esso, Wildroot.

* * * *

RCA won't give details of latest developments, except to say: "We've made improvements in several directions." But it's said to have done striking work in "sampling", affecting fidelity, registration, resolution, etc. RCA admits other manufacturers are "doing excellent work," but nobody's elaborating. IRE sessions may shed light.

Personal Notes: Broadcasters elected to Advertising Council's board, headed by Fairfax Cone, Foote, Cone & Belding: Niles Trammel, NBC; Frank Stanton, CBS; Mark Woods, ABC; Frank White, MBS; Paul W. Morency, WTIC; Ralph W. Hardy, NAB . . . Garth Montgomery succeeds Wm. Chalmers as TV-radio director and v.p., Kenyon & Eckhardt . . . Lloyd Griffin, partner in Free & Peters Inc., station reps, shifts April 1 from Chicago to New York to direct sales; John A. Cory takes over Chicago office . . . E. D. Johnston, formerly with Caldwell-Rollo law offices, Washington, has joined Roberts & McInnis . . . Dixie B. McKey, ex-Washington consulting engineer who recently joined RCA, appointed field representative for microwave and mobile communications products, Dallas . . . Robert W. Breckner promoted to executive director, Edwin C. Metcalfe to sales service coordinator, KTTV, Los Angeles . . . Jerry Lee, program chief of WOAI, shifted to sales mgr., WOAI-TV; Perry Dickey promoted to program mgr. of both AM-TV outlets, Ed Hyman to production director . . . Morgan Ryan, ex-ABC, has joined Kiesewetter Associates, N. Y. . . . Walton Butterfield resigns as v.p., H. B. Humphrey Co., Boston, to start own New York adv.-public relations firm specializing in TV-radio.

Network Accounts: NBC-TV is offering noon-1 p.m. period in quarter-hour across-the-board strips, but no buyers reported yet . . . April 2 is starting date of General Foods (Post Cereals Div.) sponsorship of *Capt. Video* on 22 DuMont outlets, Mon.-Fri. 7-7:30, thru Benton & Bowles, N. Y.; some 50 manufacturers have been franchised to sell Capt. Video ties, shirts, dolls, holsters, belts, etc., in big merchandising tieups . . . Gillette June 16 will sponsor *Belmont Stake Race* on NBC-TV, thru Maxon Inc., Detroit; time to be announced . . . Borden Co. April 5 substitutes *Treasury Men in Action* for *Peter Lind Hayes Show* on NBC-TV, Thu. 8:30-9, thru Doherty, Clifford & Shenfield, N. Y. . . . Arthur Murray Studios April 2 moves *Arthur Murray Show* from DuMont to ABC-TV, Mon. 9-9:30; will replace American Safety Razor Corp.'s *College Bowl* . . . Bauer & Black (surgical products) reported readying summer sponsorship of 5:30-6 portion of *Super Circus* on ABC-TV, Sun. 5-6, thru Leo Burnett & Co., Chicago; will replace M & M Ltd. (candies) and Peters Shoes (International Shoe Co.), current alt. week sponsors of segment . . . Carter Products Inc. (Arrid cream deodorant) April 19 starts new show on CBS-TV, Thu. 10:30-11, thru Sullivan, Stauffer, Colwell & Bayles, N. Y.; replaces *Nash Airflyte Theatre*, cancelled by Nash-Kelvinator Corp. (Nash cars) as of March 15 . . . Florsheim Shoe Co. sponsored *Chicago Daily News Relays* March 17, 10:30 p.m., on ABC-TV outlets, thru Gorden Best Co., Chicago.

Upshot of FM receiver conference, between station and manufacturer representatives at NAB headquarters March 13, was that each group would survey national FM set demand, meet again late next month after NAB convention. Station conferees contended that FM sets are being underproduced despite lively demand. Manufacturers agreed that FM sets are scarce, but insisted AMs are too and that FMs were overabundant until this year. As for future production, they said materials shortages made commitments impossible. Station men told manufacturers that charges of "conspiracy" have been made against them. Latter laughed, insisted their industry has more cutthroat competition than almost any other. Consultant M. S. Novik told group that Walter Reuther, president of UAW-CIO which operates WDET-FM, Detroit, said he would request Congressional investigation if FM stations "were being kicked around." Chairman of NAB committee is Ben Strouse, WWDC-FM, Washington; RTMA group was headed by Crosley's John W. Craig; Novik is chairman of special FM station committee.

One of first FM stations on air, WSM-FM, Nashville, which started April 1941, surrendered license this week. So far this year, 14 stations have dropped licenses, 9 relinquished CPs. Six applications have been filed, including one for facilities of powerful WMIT, atop Mt. Mitchell, N. C., closed down last year by owner Gordon Gray. [For specific stations, applicants and cities, see *AM-FM Addenda A to J*].

Costs of TV-FM station construction, in terms of dollars per square mile, are given treatment in interesting chart form by Richard G. Singleton, Stanford U graduate student, ex-MIT, in March *Electronics*. Charts cover average antenna and tower costs, cost of ERP in terms of transmitter size, etc.

Involuntary petition in bankruptcy was filed by Tressel Television Products, Chicago, manufacturer of Projectall studio projector, distributed by INS, in Federal district court in Chicago this week. Liabilities were reported more than $10,000.

New York subway advertising slumped some $66,600 in 1950, blamed by Board of Transportation experts on TV competition.

Station Accounts: Scheduled airlines will spend $16,000,000 on advertising this year, mainly to promote passenger traffic, mostly in newspapers—but TV-radio will get close to $2,000,000, according to Air Transport Assn., Washington . . . Quiet tests in collaboration with 3 dept. stores in undisclosed cities brought immediate increases in sales of Wooster Rubber Co.'s Rubbermaid housewares by 40%, 30% & 25%, respectively; spots featured "Rubbermaid Girl" trademark, placed by Ketchum, MacLeod & Grove, Pittsburgh . . . Omaha's biggest dept. store, Brandeis, goes into daytime TV with 10 participations per day on Tue. & Thu. half-hour *Show Window* on WOW-TV . . . Marshall Field, Chicago, names Calkins, Holden, Carlock, McClinton & Smith to handle its TV-radio advertising . . . N. Y. Telephone Co. using film spots and station breaks on WOR-TV, New York, thru BBDO . . . Ward Baking Co. (Tip Top Bread) buys Ziv's *Cisco Kid* films for WNBK, Cleveland; WMBR-TV, Jacksonville; WBRC-TV, Birmingham, thru J. Walter Thompson . . . To promote new film *Bird of Paradise* opening in 85 first-run theaters on Easter Day, 20th Century-Fox is using national TV spot campaign built around "bird of paradise" fashions . . . Banks in 28 cities have bought *March of Time Through the Years*, sold by March of Time (Vol. 7:7) . . . Among other advertisers currently using or preparing to use TV: Vic-Art Inc. (Sun-Magic & K-O skin creams), thru Vic Decker Adv., Canton, Ohio; Vitamin Corp. of America (B-complex capsules), thru Harry B. Cohen Adv. Co., N. Y.; McKesson & Robbins Inc. (Tartan suntan lotion), thru J. D. Tarcher & Co., N. Y.; G. Krueger Brewing Co., thru Charles Dallas Reach Co., Newark; Wynn Oil Co., thru BBDO, Los Angeles (WOR-TV); Chicago Show Printing Co. (Mystik Tape), thru George H. Hartman Co., Chicago (WOR-TV); General Shoe Corp. (Flagg Brothers shoes), thru L. W. Roush Co., Nashville (WOR-TV); Glidden Co. (paints, shortening & salad dressing), thru Meldrum & Fewsmith, Cleveland (WTVJ); Richman Bros. (chain clothing stores), thru McCann-Erickson, N. Y. (WWJ-TV); Morton Co. (frozen foods), thru Griswold-Eshleman Co., Louisville; Grocers Biscuit Co. (Dixie Belle crackers & cookies), thru Zimmer-McClasky, Louisville.

"Early morning TV is here, and here to stay," says sales mgr. Alexander Dannenbaum Jr., of Philadelphia's WPTZ, reporting 22 sponsors currently using participations on daily 7:30-9 a.m. disc jockey show titled *Three to Get Ready*, featuring Ernie Kovacs with recorded music, time, weather, news, comedy bits. "I sincerely believe that by this time next year all TV stations will be programming and selling shows from early morning until very late at night." First 13-week cycle, just concluded, brings claims of audiences as high as 150,000. Both local and national sponsors buy time, including among former Snellenburg Store (advertising Sylvania TVs), Gimbel Bros. (Silex), Arthur Murray School of Dancing, Pennsylvania Wine Co. (Sylvania Wines), Weather Seal Inc. (storm windows); and among latter RCA, thru J. Walter Thompson Co., N. Y.; American Steel Wool Mfg. Co., thru Needham & Grohmann, N. Y.; American Chicle Co. (Chiclets), thru Badger, Browning & Hershey, N. Y.; American Crabmeat Co. (3 Little Kittens Cat Food), thru Harry M. Frost Co., Boston; Luden's Inc. (5th Ave. candy bars), thru Richard A. Foley Adv., Philadelphia; P. J. Ritter Co. (Vege-Crest), thru Lamb & Keen, Philadelphia.

Skiatron demonstrates Subscriber-Vision system for FCC members and top staff March 20 at WOR-TV's North Bergen transmitter and at Skiatron labs, 30 E. 10th St., N. Y. Planning to attend are all available commissioners —Coy, Webster, Sterling, Jones, Hennock—plus staff members Plotkin, Braum, Allen, perhaps others.

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
March 17, 1951

ADMIRAL CUTS LOW-END TO SPUR TRADE: Admiral pulled stops on low end of its line -- notified its distributors March 16 that, as stimulant to lagging sales, it has reduced prices of 16 & 17-in. table models by $30 & $40. That others may be forced to follow suit seems probable in light of depressed retail market (see below).

Heretofore boasting leadership in sale of console combinations, now dragging, Admiral promised "plenty" of the small sets and "only slight" reduction in dealer discounts. Model 16R11, ebony finish table with 16-in. tube, goes down from $239.95 to $199.95; 16R12, same in mahogany, from $249.95 to $209.95. Table model 7K12, 17-in. rectangular, mahogany, goes from $279.95 to $249.95. All are plastic.

Main idea is "to get people into the stores," said sales v.p. Richard Graver: "These aren't just leaders they're not going to get. We're making plenty of these sets. With mass production savings and curtailed profits, we think we can give trade a bump. By creating store traffic, we also figure the dealers will be able to sell more higher-priced models."

Negligible inventories of these sizes were held by distributors-dealers when Admiral quietly began to shift production emphasis to lower-priced units last week. Rest of 35-model line (Vol. 7:1) remains unchanged.

TV-RADIO PRODUCTION PACE SLACKENING? TV output slipped somewhat in 10th week of current quarter (week ending March 9) -- went down to 178,696 units (6324 private label) from high of 190,291 the preceding week.

Whether this means beginning of cutbacks, it's too early to tell. RTMA also puts factory inventories as of March 9 at 180,615 sets vs. 180,727 preceding week.

Total TVs for first 10 weeks of 1951 thus are 1,695,635, which is some 90,000 ahead of the 1,605,200 reported for whole of boom first quarter 1950 and compares with 1,531,100 second quarter, 1,891,900 third, 2,435,600 fourth.

Average weekly output so far this year is close to 170,000 (we erred last week in reporting 9-week average at 190,000). Average weekly output by quarters last year: first 123,000, second 118,000, third 145,000, fourth 187,000.

Radio production went down, too -- 355,044 units week ending March 9 (home sets 208,313, auto 116,469, portable 30,262) vs. 367,322 the preceding week. Factory inventories were 146,848 vs. 139,524 week earlier. Total radios for 10 weeks to date: 3,282,930 -- average of 328,000 per week.

Note: For monthly tables of TV and radio production 1946-through-1950, see p. 67 of TV Factbook No. 12.

TV SALES FALLING FAR BEHIND OUTPUT: Short-range, the current TV trade letdown looks serious indeed -- and an over-riding fear seems to have gripped some distributors and dealers that manufacturers themselves may order unloading of huge inventories by way of list-price cuts. Meanwhile, dealer sales and price-cutting are rampant.

Long-range, the consensus among manufacturers and govt. electronic authorities is that current amazing high rate of production cannot possibly continue -- what with the 20% steel limitation order on end products effective April 1, and the cumulative impact of cutbacks already in effect on raw materials such as cobalt (under strict allocation), aluminum and nickel (cut 35%), copper (cut 25%), copper wire, zinc and pig tin (cut 20%).

Granted a brake on production, forced by defense requirements, can today's enormous inventories, plus such production as is maintained, be "siphoned off" and "evened out" to make for a more orderly and profitable trade?

You get every kind of reply -- depending on whom you talk to. Manufacturers, by and large, are optimistic but cautious; distributors and dealers worried. Latter

blame factories for overloading them, some expecting the worst as they contemplate normal spring and summer seasonal slumps.

Summarized, these seem to be the main factors, favorable and unfavorable, governing current trade -- as stated to us by key people who should know:

(1) Higher cost of living, depreciated dollar, make buyers less interested in TV. March is income-tax month, and weeks just before Easter always find people less susceptible to purchases of hard goods than to soft goods.

(2) Regulation W is a rugged obstacle, cutting installment buying to great extent. Moreover, TV is competing with car buying and refrigerators, ranges, etc.

(3) Trade has had it so good over the last year that it panics too easily, should think in long-range terms, cannot blame manufacturers for turning out as much merchandise as they can while materials last.

(4) Distress selling would be foolhardy now, in view of inevitable factory cutbacks and shorter supply of sets to come. Moreover, baseball season is coming up, always a stimulant to TV trade; and programs are improving and should continue reasonably good this summer as telecasters acquire more know-how and sponsors line up for ever-scarcer time.

(5) Industry must promote and sell harder than ever.

* * * *

Foregoing are general sizeups, admittedly. Very few will permit quotation by name (an advantage, to some extent, in that they speak their minds more freely). But here's what they're saying:

"If the dealers had any idea of the cutbacks in production due the second and third quarters, they wouldn't do what they're doing," said operations head of one of biggest manufacturing concerns. "Beginning next quarter, we won't get the parts. The steel order looks worse than first indicated. As for tubes, they're really going to get scarce later this year. [See Electronics Reports section].

"We'll lean on conservation measures second quarter, civilian output will be hard hit third quarter, and I won't even venture to predict last quarter. Certainly, we cannot possibly maintain present rates of production for long."

Another big manufacturer (sales chief): "Known brands are still enjoying a very nice business. We've overproduced the higher priced stuff, perhaps, and the industry as a whole is so far overproduced that somebody may get hurt. But this slump is seasonal, and for our part we planned for it."

Still another: "The trouble seems to have started in Washington, which has never been a good index to the country as a whole. Sure, we've all been building to beat hell, but the pace will soon slacken and we think shortages are inevitable, and that will even things up."

Medium-sized manufacturer: "We've had abnormal production, plus much bigger carryover of last year's 7,500,000 sets than we're willing to admit. Everybody was willing and anxious to stockpile up to now. I see a buyers' market through the summer, then a sellers' market when production will be cut either by forced or voluntary measures. Remember, too, that the market isn't as big as it was, with 60% saturation in some areas. Now we must stress replacements and second sets."

* * * *

Permitting quotation, Emerson's Benjamin Abrams said he foresees further pileup of stocks. He suggests the mobilization agencies order ceiling on TV output, which he thinks would not only conserve materials that the Govt. wants but permit orderly marketing during crisis. (This latter idea, incidentally, was advanced by another set maker, but most other industry spokesmen seem to want to steer clear of any such govt. controls as long as possible.)

Among distributors, there's everybody from plain worry-warts to smug name-brand boys who still say they're moving all they ordered. In between are those who simply sit back and wait for the situation to clarify. All admit an unaccustomed customer resistance. Some would like to refuse or are refusing deliveries on stocks they ordered in early January for delivery through April.

NARDA president Mort Farr, a suburban Philadelphia dealer, in Washington March 15 for tax hearing, testified decline of 40-50% in sales has been evident for month, but that large-scale markdowns had so far appeared only in Washington and New York. In interview later, he expressed fear that new conservation sets may be priced lower than present models, due to savings in materials.

If manufacturers cut prices, he said, distributors and dealers are really going to get stuck and "many banks are going to find themselves in the TV business." Even now, he said, manufacturers are handing out extra discounts through floor plans, easy payment plans, allowances, etc.

25% EXCISE TAX WOULD HURT EVERYBODY: There were perceptible nods of agreement -- notably among Republican Congressman -- as RTMA president Robert C. Sprague detailed vital role electronics industry would be called upon to play in an all-out war.

He was stressing importance of keeping the industry on even keel during present emergency while testifying March 15 before House Ways & Means Committee hearing on Treasury's proposal to hike TV-radio excise tax to 25% (Vol. 7:6).

"The Munitions Board has told us," said Sprague, "that in the event of all-out war military requirements would amount to twice the present capacity and 3 times the present dollar volume of the industry."

Hence, he argued, it's important not to upset the industry, already gearing gradually to the defense economy, by pushing up TV-radio receiver prices, reducing sales, forcing curtailments of technical staffs and production lines. That's exactly what Treasury proposal would do, said he.

For IUE-CIO, Benjamin Sigal testified the tax discriminates against low-income buyers, contended that TVs, radios (and refrigerators) are not luxuries but necessities. And for the telecasters, NAB's Ralph Hardy testified tax discriminates against TV-radio as purveyor of news while newspapers, magazines, etc. are exempt.

* * * *

If there must be new taxes, electronics spokesmen go along with other industries in favoring retail sales tax. Sprague calculated that TV-radio sales, under a 25% tax, would decline 40% -- so that Treasury, instead of getting the additional $87,000,000 it estimates, would actually get less than now under present 10% levy. It would also lose out in reduced corporate and personal income tax revenues.

Sprague estimated TV-radio factory sales at $1 billion for fiscal year July 1, 1951-June 30, 1952, forecast drop to $600,000,000 under proposed 25% tax. Factory sales were $1.6 billion for calendar 1950.

Among other arguments against tax: It's higher for auto radios than for autos (7-14%) or auto clocks and heaters (5%); higher for TV-radio furniture than for same furniture without TV-radio (tax-free). It discriminates against buyers in new TV markets, penalized because FCC has imposed freeze and they couldn't buy when taxes were lower. It will cost average dealer $10,000 more to carry normal stock -- and he's having plenty of trouble now selling against high cost of living, Regulation W, other factors retarding demand (see p. 7).

* * * *

Only discordant note from industry came from W. P. Thomas, of Diamond Power Specialty Corp., Lancaster, O., manufacturer of "Utiliscope" industrial TV systems (Vol. 5:18,36). He suggested annual license tax on home TVs, a la BBC, asked only that industrial TV not be taxed, vouchsafed no objection to other excise hikes. For RTMA, fight is being conducted by committee headed by A. M. Freeman, RCA (Vol. 7:8).

1950 TV FACTORY PRICES BELOW 1949: Factory prices of TVs -- hence retail prices -- went up steadily during 1950, due to higher manufacturing costs and the excise tax. But they were still lower than in 1949 -- and continue to be.

Typical example: RCA 17-in. rectangular table model today costs $269.95, including tax. As of Jan. 3, 1950, comparable 16-in. round model cost $299.55.

From most authoritative of all sources, we're able to draw some interesting comparisons between average 1949 and 1950 factory prices for industry as whole. During 1950, it's interesting to note first, the nearly 7,500,000 TVs represented

factory volume of something more than $1.35 billion, as against 1949's approximately 3,000,000 receivers costing some $600,000,000 at factory.

TV in 1950 represented 78% of dollar volume of TV-radio; in 1949 it was 66%.

Average factory cost of TV table model was $154.54 in 1949, went down to $141.47 in 1950. Average direct-view console in same period went from $211.92 to $192.86; average direct-view combination with radio-phono, from $293.58 to $275.43.

That projections are still being made, though in very small numbers, is indicated by tally of nearly 13,000 during 1950, about same number as in 1949. Average factory cost of projection, TV only, was $392.21 in 1949 and $232.02 in 1950; projection with AM-phono (only handful made) cost $578.42 in 1949 and $356.62 in 1950.

In sum, average TV cost $181.70 at factory in 1950, vs. $189.55 in 1949. At retail, price is roughly 40% more.

Topics & Trends of TV Trade: Reminiscent of World War II factory drives, RCA Victor March 15 launched what it calls "Triple S" campaign among its 42,000 employes in more than 100 plants—slogan being "Save Materials. Save Jobs. Save Your Country." It's second phase of RCA's TV-radio conservation program (Vol. 7:4-9), idea being to get all employes thinking about ways of saving critical materials, avoiding waste, helping maintain civilian production and keeping trained workers at jobs against days of "expanding requirements of the defense program."

Big drive is said to be first of kind since Korea, is bolstered with posters, stickers, buttons, employe suggestion cards, etc. Slogan contest offers prize of 17-in. console combination with $50 worth of records and year's service contract or $600 in U. S. Savings Bonds.

Says RCA, in urging similar drives in other plants: "Applied industry-wide, millions of pounds of cobalt, copper, nickel, aluminum and other critical materials can be saved in the manufacture of radio and TV sets."

Sylvania last month conducted "quality conscious" program among employes of its Buffalo TV-radio plant, discovered in some instances that defect levels had been reduced as much as 90%.

* * * *

Ad splurges in Washington newspapers this week, aimed at reducing bulging inventories, offered reductions of as much as 35% & 50% from lists, were countered with "we won't be underpriced" by competing retailers, aroused nation-wide trade interest and not a little consternation among some manufacturers. Latter insist Washington isn't typical. These were sample sales reductions for brand-name "1951" models splashed in capital newspapers: Admiral 19-in. combination, cut from $600 list to $360; Hallicrafters 17-in. combination, $500 to $325; Motorola 17-in. combination, $480 to $319, and 19-in. console, $400 to $280; Philco 16-in. console, $320 to $230, and 17-in. combination, $550 to $358; Zenith 16-in. console, $370 to $241.

Private label "Harleigh" TV sets advertised this week by Hecht Co., Washington, maker unidentified: 17-in. table, $180, console $200; 20-in. consolette $250, console $280, with doors $330.

New 17-in. AC-DC private label "Gotham-Visionaire" receivers made by Harold Shevers for Colen-Gruhn Co., New York distributor, are table at $300, console $340, with doors $400. Company sees 200,000 market for DC receivers.

Canadian manufacturers sold 3809 TVs valued at $1,979,075 during January, reports RMA of Canada, bringing total TV production since it began there to 41,632 units valued at $18,255,632. Windsor (Detroit) area accounts for 43% of shipments, Toronto-Hamilton 36%.

Trade Miscellany: RCA Victor radio plant at Canonsburg, Pa., with 1200 workers operating 6 radio chassis and 2 console lines, has tripled radio production since begun last August, reports mgr. Frank E. Stouffer; plant's record dept. has boosted production of 45rpm discs from 70,000 to 90,000 per day . . . Jerrold's "Mul-TV" antenna system has gone "well past the $1,000,000 sales mark," with more than 2000 retailers using equipment to demonstrate sets, according to Sydney J. Mass, adv. director . . . Hytron employes in Salem, Mass., plant voted 352-245 to retain independent union, as against IUE-CIO . . . Murphy Ltd. radios, imported from England through John Carroll, International Trade Mart, New Orleans, is reported to have acquired 16 U. S. distributors, sold 6-7000 units thus far . . . Westinghouse reported negotiating with Doernbecher Mfg. Co., Portland, Ore., for TV cabinets . . . Jackson Industries moves national sales office to 58 E. Cullerton St., Chicago, opens regional office at 550 W. Lafayette, Detroit . . . GE's Fred P. Beguin, from Syracuse electronics plant, reported on survey tour of Europe in quest of components.

National Credit Office chart captioned "Business Embarrassments: 1940-50" shows 19 manufacturers of radios, TVs and related equipment failed in 1950 for total of $3,568,000; 3 manufacturers of electrical appliances, $295,000; 5 wholesalers of radio parts, $576,000. Worst years for TV-radio failures were 1947 (39 for $15,805,000); 1948 (25 for $11,026,000); 1949 (19 for $5,540,000).

Electronic Parts Manufacturers Assn. elected last week Charles C. Koch, Merit Transformer, president; A. P. Hirsch, Micamold, v.p.; J. Gerald Mayer, Washington attorney, v.p. and general counsel; James B. Guttridge, Carol-Ed Co., treasurer. Additional directors are: Nicholas Reinholz, Mohawk Electronics; Nat Leonard, Leonard Electric; Joseph B. Schaefer, New York Transformer; Bert E. Smith, Automatic Mfg.; Neil Washburn, Tel-Rad; Henry Winston, Super Electric; Paul Ziegler, Mid-West Coil & Transformer.

Hearing on FTC complaint against Sylvania regarding its tube-price differentials (Vol. 6:2) resumes March 20 in Washington, after one-day session this week was adjourned to permit FTC and Sylvania to agree on stipulations of facts. FTC complaint charges Sylvania sold tubes to Philco for less than to its own distributors.

Victory for service industry is seen in last week's action by Massachusetts State legislature's committee on state administration rejecting bill to license servicemen; also, in action by Miami city council vetoing similar plan. Still pending are similar bills in legislatures of Rhode Island and Wisconsin, in city council of New York.

American Television (U.A. Sanabria) is selling "DeForest" 17-in. table at $159.50, console $179.50; "Sanabria" 20-in. console at $199.50. Company sells through own retail outlet in Chicago.

Financial & Trade Notes: Tripled radio tube and TV set production, doubled output of auto radios, big increases in fluorescent lamps and fixtures and photoflash lamps—all added up to record 1950 for Sylvania, whose annual report released this week said company didn't even feel usual summer sales decline last year as each quarter exceeded each preceding quarter.

Sylvania consolidated net sales were $162,514,814, up 58% from 1949's $102,539,866 and considerably better than previous record (1945) of $125,750,512. Net earnings were $8,221,185, or $5.37 per share, after provision of $11,000,000 for Federal taxes, compared to 1949 earnings of $3,052,840 ($1.82). Assets increased to $92,880,534 at end of 1950 from $69,920,977 in 1949. Inventories increased to $31,266,269 from $20,980,450. Payroll has increased 6100 to total of 19,600.

Sylvania report says company has sizable defense contracts and "is confident that defense orders will be available to more than absorb the capacity released by restrictions on civilian production." It's one of few electronics firms which flatly predicts its "sales volume for 1951 will be substantially larger than . . . 1950."

* * * *

Motorola achieved records in both sales and profits in 1950, with TV "exceeding our most optimistic estimates" and communications, auto and home radio divisions all reaching new highs, president Paul V. Galvin reported March 14. Sales for year totaled $177,104,669, up 116% from 1949's $81,803,358. Net earnings were $12,809,247, or $14.56 a share on 879,605 shares outstanding, including the 10% stock dividend in December. Earnings were thus up 142% from the $5,280,196 ($6.60) in 1949. Dividends paid in 1950 totaled $4.50; in 1949 they were 75¢. In 1950, Motorola invested $1,722,322 in new plants and equipment, working capital increased to $21,079,362 from $14,558,505 the preceding year. Mr. Galvin said first quarter 1951 will be only "normal quarter" this year, so that year's sales cannot be estimated. Latter 1951 and early 1952 will mark start of output on substantial military contracts that will continue into 1953, he said.

* * * *

Hazeltine reports consolidated net income for 1950 of $1,428,431, or $4.08 a share, after provision of $1,355,310 for Federal taxes. Gross income from sales, less costs, royalties and engineering services, was reported as $4,078,000. As of Dec. 31, 1950 amount invested in work in process totaled $7,337,076 compared to $2,969,456 year earlier. The 1950 statement compares with 1949 profits of $985,072 ($2.81) on gross income of $2,843,213 (Vol. 6:11). Proxy notice to stockholders for annual meeting April 10 discloses these 1950 salaries and bonuses to officers: Jack Binns, president, $35,610 salary plus $19,500 bonus; W. A. MacDonald, v.p., $35,005 & $19,500; L. B. Dodds, v.p., $24,563 & $9000; J. B. Dow, executive v.p., $20,349 & $8000; Fielding Robinson, v.p., $19,349 & $10,000.

James D. Shouse, Avco director and chairman of its subsidiary Crosley Broadcasting Corp., is disclosed as holder of 5350 shares of Avco common, 150 preferred, with options to purchase 12,500 shares of common at $8.39 and 7500 at $8.12, in proxy statement accompanying annual report (Vol. 7:9) and notice of annual stockholders meeting in Wilmington, April 12. He's also second highest salaried officer, with 1950 salary of $62,500 plus bonus of $66,500. President Victor Emanuel's salary was $127,800, bonus $75,000; W. A. Mogensen, v.p. & treas., $54,166 plus $75,000; R. S. Pruitt, v.p. & secy., $50,200 plus $60,000; L. I. Hartmeyer, v.p., $30,000 plus $8000.

Belden Mfg. Co. reports 1950 profit of $1,528,839 ($4.77 a share) vs. $617,293 ($1.93) in 1949.

Among officers' and directors' stock transactions reported last week by SEC for January: Martin W. Clement bought 550 Avco, holds 1050; W. A. Rudolphsen bought 100 Belden, holds 670; Robert W. Galvin gave 3000 Motorola as gift (Dec. 1950), holds 64,258; Lawrence F. Hardy gave 200 Philco as gift (Dec. 1950), holds 7809; Thomas A. Kennally gave 5 Philco as gift (Dec. 1950), sold 2000, holds 25,973; Oscar O. Schreiber bought 785 Philco (Dec. 1950), sold 10, holds 1489; R. Schneidewind bought 300 Sparks-Withington (Dec. 1950), holds 500.

Among reported Westinghouse stock purchases by company executives: George H. Bucher bought 217, holds 2441; Walter C. Evans 326, holds 1394; John M. McKibbin Jr. 434, holds 1445.

* * * *

Packard-Bell reports sales first 5 months of its current fiscal year, Oct. 1, 1950-March 1, 1951, totaled $11,619,561, estimated half-year ending March 31 will exceed $13,000,000. Five-month figure more than doubles $6,124,000 for comparable period preceding year. "Several million dollars" in Army-Navy contracts were reported by executive v.p. Robert S. Bell.

Dividends: Zenith, quarterly 50¢ plus extra 50¢, both payable April 30 to holders of record April 9; Sylvania, 50¢ on common, $1 on $4 preferred, both payable April 2 to holders March 20; Motorola, 50¢ payable April 16 to holders March 30; Cornell-Dubilier, 20¢ payable March 28 to holders March 20; Packard-Bell, 25¢ payable April 25 to holders April 16.

Philco's annual report is due March 21 or 22, is understood to show sales exceeding $335,000,000—some 60% ahead of the $214,884,000 of 1949 (Vol. 6:12) and setting new record over 1948's $275,424,000.

Trade Personals: Dr. Paul J. Selgin, ex-Farnsworth, since 1947 with Bureau of Standards ordnance development div., named chief of Bureau's engineering electronics section . . . Wm. P. Short, ex-Raytheon, appointed chief engineer of General Precision Laboratory Inc., supervising electronic and optic equipment . . . Andrew F. Stanier, chief engineer, becomes president of Eureka Television & Tube Corp., succeeding Wm. R. Holt (Vol. 7:9); Frank X. Wells, maintenance chief, promoted to chief engineer . . . Joseph F. Bozzelli, ex-Brach Mfg. Co., named gen. sales mgr., Haydu Brothers . . . Charles A. Nichols promoted to Packard-Bell director of engineering; Richard G. Leitner, recently with Lear Inc., returns to Packard-Bell as chief research engineer . . . Carl Volpe named technical asst. to president R. D. Burnett, Starrett Television Corp. . . . Irving M. Sandberg resigns as gen. sales mgr., Crosley Distributing Corp., N. Y. . . . Leonard F. Cramer, DuMont v.p., elected president of Weimaraner Club of America, composed of fanciers of that breed dog . . . Thomas J. Fleming promoted from plant engineer to asst. purchasing director, Bendix Radio Div., Thomas M. Murphy Jr. succeeding him with J. Russell Sandstrom as asst. and Robert E. Wine new mgr. of subcontracting . . . Herbert J. Allemang, management consultant recently appointed by Philco, named v.p. and head of forward planning.

Champion angler Ross Siragua, who holds international tuna title, landed 11 lb. 1 oz. bonefish off Bimini last week, playing quarry for 45 minutes, beating previous record for spinning equipment with 10-lb. line by 11 oz. It's new international record, and this one plus 2 other bonefish he caught—10 lb. 4 oz. & 9 lb. 8 oz.—also top 1951 Miami tournament. Youthful Admiral president, whose hobby is fishing and who has home at Cat Cay, with similar light tackle also boated 20-lb. permit (pompano family) which took him 28 minutes to land.

Telecasting Notes: New York area TV stations gave Senator Kefauver's crime investigating committee hearings "the works" this week, playing to record audiences (as they did in Los Angeles, San Francisco, St. Louis, Chicago, Detroit)—but New York outlets managed schedules so that they needed to clear minimum of commercials. In fact, ABC's WJZ-TV, WENR-TV & WXYZ-TV plus WFIL-TV got sponsor for all-day telecasts—Time Inc., using own Washington correspondent as commentator. WPIX's Ted Estabrook handled cameras for all stations, drew plenty of kudos . . . Indicating intensity of dramatic interest in Kefauver committee "show," Walter Winchell said witness Frank Costello (see p. 4) "made Schmeaux out of the Godfreys, Berles, Caesars, et al., this week by becoming a TV star (using just his hands)" . . . Kefauver telecasts were said to have affected theatre attendance, and there were some who even blamed fact people stayed at home to see them for unseasonal slump in pre-Easter retail trade . . . Theatre-TV picked up portions of testimony, with good reactions from matinee audiences in Fabian's Brooklyn Fox, Century's Marine and Queens Theatres . . . In St. Louis early this month, both GOP and Democratic candidates in special Congressional election used KSD-TV—Republican Claude I. Bakewell winning out. Both sides said Kefauver telecasts had considerable influence on outcome, admitted by criminal lawyer Morris Shenker, power in local Democratic politics, who represented some of gamblers at hearing . . . Though it has been operating regularly and commercially since last Dec. 10, Havana's CMQ-TV made big occasion of inaugural of its new "Radio City" studios March 11, with Cuba's President, Mexico's Emilio Azcarrago (currently building own TV) and big delegation of U. S. radio and newsmen on hand . . . Richmond's WTVR, bursting its seams, broke ground this week for another $750,000 addition to present $110,000 addition now being completed on half-block tract it owns adjacent to studio building . . . World Video filming for TV the Katzenjammer Kids, 50-year-old comic strip, under title of *The Captain and the Kids* . . . Edison film library of one and 2-reel silents, vintage 1906 to 1914, getting sound tracks for release to TV under title *Hello Yesterday* by Killiam Shows Inc., distribution thru Ray Block Associates.

Use of Empire State Bldg. for theatre TV antennas, being investigated by number of movie interests, is technically quite feasible, according to Empire State's consultant Dr. Frank Kear. If and when FCC grants microwave band to theatre TV, he says, at least 4 antennas can be accommodated along with present TV station antennas (5 now, perhaps more later). He's had talks with Paramount; Fabian and 20th Century-Fox are also reported interested. Application to join other stations on tower, filed with FCC by Newark's WATV, has been objected to by WPIX. WATV apparently failed to clear up question of sharing WPIX's antenna before filing.

Only application for new TV station this week was by KAKE, Wichita, seeking Channel 10, fourth applicant for that city. *Milwaukee Journal's* WTMJ-TV this week asked FCC to approve 985-ft. antenna, plans to ask for maximum power from this height when new allocation plan is effective. [For further details, see *TV Addenda 12-J* herewith; for listings of all applications to date, see *TV Factbook No. 12* with Addenda to date.]

Hearing on McFarland Bill to "streamline" FCC (S. 658) has finally been scheduled, for April 3, by House Interstate & Foreign Commerce Committee, which has been considerably less than enthusiastic about the measure. What puzzles Committee, members say, is why industry has shown so little interest in bill.

Networks came to terms with Petrillo at eleventh-hour meeting March 13, precluding strike, agreed to 3-year contract with these major terms: (1) 15% wage hike for AM staff musicians with TV pay brought to same level; 10% boost is retroactive to Feb. 1 and added 5% when approved by Wage Stabilization Board. (2) Payment to AFM welfare fund of 5% of gross revenues (excluding time charges) from films made by networks for TV. This is reversal of networks' attitude, explained by one network official as best compromise in order to get Petrillo to accept principle that time charges should not be counted for this purpose. Number of independent TV film producers have agreements with Petrillo whereby they pay 5% on all revenue, including time charges. (3) Kinescopes can continue to be used one-time in non-interconnected cities. AFM receded from demand that networks ban all transcribed music between 8 a.m. and midnight.

There will be live telecasts of some college football games next fall, according to Dr. Hugh C. Willett, president, National Collegiate Athletic Assn. He said March 15 that NCAA's TV committee will meet soon to "work out plans for controlled live TV," but added that the group's "controlled TV experiment" will principally involve filmed games, screened week after game is played. Earlier this week, Eastern College Athletic Assn. went on record as favoring NCAA's "moratorium" on live telecasts of college football (Vol. 7:2). But U of Pennsylvania athletic director Fran Murray spoke in favor of televising games, saying "live TV offers a boost to our public relations." He confirmed that Penn is "taking bids on TV," but has made no decision on TV for this fall. U. S. Congress March 14 joined large number of legislative bodies considering action to force football telecasts when Rep. Clemente (D-N. Y.) introduced bill to televise "regularly scheduled football games" of Army and Navy.

NAB's April 15-19 convention in Chicago's Stevens Hotel will devote all of last day to TV. This year, engineering sessions will run concurrently with management. TV topics include: sales, low-cost operations, morning programming, allocations. Other sessions will cover: defense mobilization, BAB, labor-management problems, sports telecasting-broadcasting, FM, research, legislation. NAB-TV has initiated "Profitable Program Ideas for TV" contest, inviting all stations to participate. Seven winners will receive awards at convention's TV session.

Portable cable-less TV camera, to free camera from clumsy "umbilical cord" attachment to truck during remote pickups, will be shown for first time when RCA demonstrates new units at March 19-22 IRE convention in New York. Transmitters used with camera will emit about 5 watts at 500 mc for TV signal, 10 watts at 152 mc for control signal. A big question about future of devices is that of obtaining enough frequencies. It will probably use spectrum above 1000 mc.

More March 1 sets-in-use reported since NBC Research's "census" of Feb. 1 (Vol. 7:8): St. Louis 268,000, up 14,000; Kansas City 107,919, up 8919; Omaha 68,577, up 7877; Miami 55,000, up 2500; Utica 38,500, up 2500; Cleveland 453,575, up 30,575; Milwaukee 224,721, up 11,721; Louisville 82,858, up 4258; Johnstown 75,100, up 7000; New Orleans 52,150, up 2650; Baltimore 284,985, up 11,985; Ames (Des Moines) 47,625, up 5625.

Tax those attending TV-radio studio shows—that was plea of James F. Reilly, executive director, League of New York Theatres, at March 15 hearing of House Ways & Means Committee. Reilly quoted *Variety* estimate that NBC and CBS would distribute 8,000,000 tickets to New York TV-radio originations, claimed such untaxed ducats were unfair competition to legitimate theatres.

Mobilization Electronics Reports
March 17, 1951

(Editor's Note: This is a special section of regular edition of *Television Digest*, Vol. 7:11)

SUPER ELECTRONICS BOARD IN WORKS: Top agency to oversee all phases of electronics production and procurement will soon be set up by DPA chief Wm. H. Harrison.

Electronics Production Board, 7-man policy agency with "last word" power, will be part of DPA, will direct all military and civilian mobilization agencies presently dealing with electronics.

Chairman, as yet unnamed, is expected to be chosen from industry's highest echelon -- though there's talk that Gen. Harrison himself may take over nominal chairmanship. Agencies to be represented on board are NPA, Munitions Board, Atomic Energy Commission, Army, Navy, Air Force.

Board's membership hasn't been revealed, but it's good guess NPA will be represented by its Electronics Division chief John G. Daley, and Munitions Board by its Electronics Division director Marvin Hobbs.

Harry A. Ehle, International Resistance v.p. now serving as consultant to Army Undersecretary A. S. Alexander, is mentioned as possible Army member. And Sylvania president Don Mitchell, also presently serving part time in Washington on consulting basis, may represent Air Force.

NICKEL SHORTAGE FORCING TUBE CRISIS: Electronic tube plants are humming -- with production high, demand even higher.

Under these conditions, in normal times, tube men would be happy.

But not today. At least, that was gloomy impression given by tube manufacturers and their vendors, representing some 30 companies, who made special trip to Washington this week to plead for enough nickel to keep tube plants going.

Shortage ax will fall with full fury, in matter of weeks, on production of civilian receiving tubes -- and military orders won't come anywhere near "taking up the slack." Cathode ray tubes are bound to be affected, too.

Though his plants are now going full blast on 6-day week, one tube maker's comment summed up general outlook: "Damned black."

Tube factories are coming to end of their supply of nickel parts. Present high production is due to fact they're rapidly using up what's left to fill backlogged orders from set manufacturers and replacement parts distributors.

* * * *

NPA nickel limitation (M-14, see Vol. 6:48) went into effect Jan. 1. It limited primary users of nickel in first quarter 1951 to 65% of amount they used during average quarter of first-half 1950 base period. Tube manufacturers, who are secondary users, are now about to bear full brunt of this cutback -- 3 months after it went into effect.

The 65% limitation, when passed down from manufacturer of nickel tube elements to tube makers, in effect becomes much more than 35% cutback from current production rate, so far as tube industry is concerned. Here's why:

Cutback is 65% of first-half 1950 production. But receiving tube production increased from 170,000,000 in first half to 213,000,000 in second half 1950 -- a jump of 25%. Therefore, effect of nickel cutback may be to chop civilian tube production by as much as 50% in coming months.

* * * *

Military services are dissatisfied with performance of currently produced tubes. They demand closer tolerances, tighter specifications. Requirements for military tubes will soon be even stricter than now. Tube men point out that some nickel conservation measures produce tubes that are satisfactory for civilian use

but won't pass inspection by the military -- thereby requiring 2 separate production runs for same type tube.

NPA is considering emergency appeals from tube manufacturers whose plants are not now needed for military production but must be kept in operation with an eye toward the day they may be vital to our nation's defense.

And if it comes out of this crisis unscathed, tube industry can look forward to similar situation in tungsten in 3-6 months.

IMPACT OF THE APRIL 1 STEEL ORDER: To some TV-radio firms, last week's durable goods steel limitation which begins April 1 (NPA Order M-47, see Vol. 7:10) speaks this stern warning: Conserve or cut back.

To others, it says: Conserve and be damned. You must cut back anyway.

Just as the order is confusing, so is reaction from TV-radio industry -- with comments varying from predictions of impending doom to "So what?"

Some of the confusion caused by the order may soon be swept away. There are strong indications NPA will wipe out a section which clearly discriminates against some manufacturers, mainly small ones. Order's main provisions:

(1) "Manufacturers" of durable goods (including TV-radio, phonos) will be permitted to use in second quarter 80% of total amount of steel (by weight) that they used during average quarter of first-half 1950 -- and they can't use more than 40% of their quarterly allotment in any one month.

(2) Durable goods "assemblers" -- those who don't "manufacture" any steel parts -- will be prohibited from turning out more than 80% of end product units they made in average quarter of first-half 1950.

Among TV companies which fit definition of "manufacturers," reactions were varied. One large manufacturer said it will mean 40-50% cut in his output next month. Another said he expects it to have no noticeable effect.

Section of order applying to "manufacturers" is rational. It's designed to put premium on conservation efforts. It merely tells them to redesign sets to use much less steel, or else cut their total output.

Immediacy of order apparently took many manufacturers aback. Although it was announced early in February along with similar copper and aluminum restrictions which didn't materialize (Vol. 7:6), many TV-radio producers obviously are unprepared for it.

What makes steel order appear so stark is that, for first time, the Govt. points finger directly at TV-radio manufacturer and says, "You! Use less steel!" Previously, finger had been pointed at his suppliers and the fabricators who supply them -- affecting end-product maker only indirectly.

* * * *

Those who have steel conservation measures ready (lighter weight and smaller chassis, transformerless sets, smaller output transformers and speaker baskets, etc.) are in much better position than manufacturers who thought Govt. was talking through its hat when it told them long ago that conservation is a business necessity as well as a patriotic duty.

To maintain anything like present production, manufacturers would have to cut back considerably more than 20% in use of steel per receiver, since first-half 1950 base period saw far lower TV-radio output rate than recent months.

But manufacturers who have been planning on maintaining present production rate during second quarter have been living in dream world -- regardless of steel cutback -- govt. sources unanimously agree. As long ago as last November, when Korean war was mere "police action," defense production officials predicted impact of mobilization program on TV-radio production would really begin to be felt during second quarter of 1951 (Vol. 6:45).

Though steel may be chief headache during first weeks of second quarter, it could turn out to be least of industry's worries later, when shortages of speakers, copper, tubes -- rather than steel -- begin to take their toll.

There's a joker in the steel order that was as unexpected as the rest of the order was expected. It's the clause dealing with so-called "assemblers".

By NPA's definition, manufacturer is one who "puts into process, machines, fabricates or otherwise alters materials by physical or chemical means."

If you alter form of one steel part -- such as punching hole in chassis -- you're a "manufacturer" within meaning of order, and the steel you can use is limited by weight.

But if you happen to buy all your steel parts ready-made, Order M-47 says your total output of TV-radio sets must be 20% less than it was during average quarter of first-half 1950 -- and in many cases that would be mighty low compared to current production. And NPA says it's too late now for "assembler" to start "manufacturing" and escape restrictions on output.

Two obvious flaws in this provision are:

(1) It places no premium on conservation efforts by so-called "assemblers", who may be using fewer and lighter steel parts than they did during base period.

(2) It strikes directly at small business, which NPA is sworn to protect -- although one very large TV-radio company is said to come within "assembler" category, and a second isn't sure whether it's an "assembler" or a "manufacturer".

This snafu will probably be rectified soon, following protests by those hit and by some NPA officials who were as chagrined as the "assemblers".

Mobilization Notes: Have most TV manufacturers been violating NPA's restrictions on use of cadmium? That question was thrashed out in conference March 15, and this decision reached:

Cadmium Order M-19 is loosely worded and subject to varying interpretations; therefore, TV makers are in the clear on this issue.

In what was probably one of first actions by NPA compliance officers, agents of NPA's New York office recently walked into electroplating plant which supplies several TV firms with cadmium-plated chassis. They said such operations violate M-19, which since Jan. 1 has banned many uses of the corrosion-resisting metal (Vol. 6:51-52).

Those present at follow-up conference in Washington included: Official of large TV company (identity withheld) whose supplier was visited by the NPA men; Whitman W. Hopton, chief of NPA Tin-Lead-Zinc Div.; representatives of NPA Electronic Products Div., Navy representative, and NPA and industry attorneys. All agreed that, regardless of original intent of order, it can be interpreted as permitting cadmium-plating of TV chassis, but not radio chassis—because of technical characteristics.

The TV manufacturer made 2 additional points: (1) Entire TV industry may be forced to shut down if cadmium supplies are suddenly withheld; (2) There apparently is no shortage of cadmium; he has had no trouble getting it.

Govt. spokesmen said military will be requiring more and more cadmium in near future, and put it directly up to industry to develop cadmium conservation plan, and to suggest basis for amending Order M-19.

TV industry leaders reportedly agreed to make cadmium conservation one of principal topics of discussion at RTMA conservation meeting March 21 at New York's Commodore Hotel, and to make recommendations to NPA. Chairman will be GE's Dr. W. R. G. Baker, RTMA engineering dept. director.

NOTE: Manufacturers who use zinc to replace cadmium in electroplating are exempted from 20% zinc cutback by Order M-15.

* * * *

Mobilization Personals: Former members of NSRB Electronics & Communications Div., headed by **Leighton Peebles** and now disbanded, have been snapped up by other mobilization agencies. **Peebles** has been assigned to NPA's Communications Equipment Div., under Brig. Gen. **Calvert H. Arnold. Walter H. Campbell** joined DPA Office of Program & Requirements. **Dr. R. D. Parker** became chief of capacitor section of NPA Electronic Products Div. . . . **Cornelius W. Middleton**, Babcock & Wilcox executive, appointed Munitions Board vice chairman for production & requirements. As such, he's in charge of Electronics Div., which recently added following as consultants: For tubes, **Robert S. Bolan**, retired engineer, formerly with Sylvania and Raytheon; for equipment, **J. Kelly Johnson**, New York consultant and ex-Hazeltine & Wells-Gardner, special consultant to Undersecretary of Navy during World War II . . . **Robert B. McCurdy**, just named chief of test equipment & instrument section, NPA Electronic Products Div., held same job in WPB.

Of 228 certificates for rapid tax amortization on expansions of defense production facilities (Vol. 7:10), issued by Defense Production Administration Jan. 25 through March 7, only 3 were identified as being for production of electronic equipment. Two went to GE—one for plant at New Hartford, Conn., certified at $15,693,000; other for new tube facilities at Owensboro, Ky., certified at $336,306. Third certificate went to Crosley Div. of Avco, for fire control systems plant, certified at $1,909,000. Certification amount is value of new facilities. Percentage of tax write-off in each case was undisclosed by DPA, but average individual write-off granted is 74%.

Top personnel of DPA's Office of Program & Requirements, which will be responsible for allocation of nation's resources, were announced this week. Serving under Director Charles E. Wampler, AT&T executive, as assistant directors are Melvin Ashen, Indiana U business professor; George H. Lilygren, Carrier Corp. v.p.; J. J. Scanlon, Pa. Bell Telephone executive. Program Requirements Staff director is Robert E. Johnson, Western Electric economist. Planning Staff chief is Glenn McLaughlin, who held similar posts in NSRB and World War II WPB.

Plea for expanded supply of selenium—now becoming scarce—was made March 15 by special RTMA committee (Vol. 7:10) to NPA Electronic Products Div. Committee pointed out that rectifiers containing small amount of selenium can save tons of copper and steel when used to replace power transformers in TV sets (Vol. 7:7-8).

Value of TV in military operations is unquestionable, in opinion of Maj. Robert E. Collier, who writes "Take TV Out of the Bar—and Put it to Work" in March *Marine Corps Gazette*. Thinking particularly of amphibious attacks, he writes: "Through the use of TV, the commander can actually project his eyes to a moving platform above the battle area to see for himself and judge the progress of the operation. Once again, as in the days of old, the commander can view his troops in battle—this time from a chair rather than a horse." He feels that equipment weight and picture fidelity are principal problems, that helicopter is ideal "platform" for camera. Author says Marine Corps tested TV some 5 years ago "with inconclusive results"—but he's apparently unaware of fairly successful work of Navy, using "Block" system in Pacific action late in World War II.

Radio-controlled bombs are being used in Korean war —improvements of the 12,000-lb. Tarzon and 1000-lb. Razon bombs developed during World War II, which are considered crude compared to models presently under development. Bombs are fitted with radio equipment and movable tail-fins so that course can be altered after released from plane. Air Force sources said radio bombs are being used partly for test purposes to gather information on this type of weapon.

Combat camera crews in the field down to corps headquarters, who would "service" TV stations with local-interest film footage, are contemplated by Army's Public Information Division's Radio-TV section headed by Col. Edward Kirby. Plan has been approved by chief of information, awaits higher authority. Army's Astoria motion picture center, meanwhile, has been authorized to set up special handling for TV stations because of conflict in release dates with newsreels (Vol. 6:29).

Court test of FCC's authority to regulate "incidental" radiations (Vol. 7:9), stands at this stage: After Yonkers (N. Y.) Cabinet Co. and FCC attorneys reappeared before Federal district court Judge Samuel Kaufman March 7, 30-day injunction was issued requiring company to fix dielectric heater which had been interfering with 7530-kc Coast Guard aircraft frequency. Company hired consultants to clean up problem, will again appear in court, with FCC, on April 7. FCC is anxious that its authority be clearly upheld, since case is first of kind, may have bearing on Commission's powers concerning all non-broadcast radiations—including those from TV and FM receivers.

Note on TV supply picture, as quoted in "As Business Leaders See It" column in *New York Journal of Commerce:* "During the past 45-60 days," said Ben Rice, ex-Tele-King, Regal, now head of own Television Materials Co., "TV components have become more abundant. I see no serious shortages in 1951. The reasons . . . (1) Many manufacturers have made commitments with foreign suppliers and this merchandise has done much to ease the domestic situation. (2) Set sales have dropped considerably and many manufacturers have cut production."

Pacific Electronic Exhibit scheduled for Aug. 22-24 in San Francisco Civic Auditorium. Annual western convention of IRE will be held same place same time.

Pig tin, used in solder, was placed under complete allocation by NPA, effective May 1 (M-8 as amended). At the same time, NPA designated Reconstruction Finance Corp. as sole importer of tin, price of which has soared since beginning of rearmament program.

Ray of Hope Dept.: "Cobalt production will be substantially increased late in 1951 when the Blackbird Mine in Idaho will be brought into production."—From press release by Defense Dept. Industrial Services Branch.

Plant Expansions: Motorola purchases 200,000 sq. ft. plant at Kilbourn & Augusta, Chicago, for expansion; it had occupied about 20,000 sq. ft., rest formerly occupied by Tropic-Aire Inc. and Greyhound Motors . . . **Canadian Westinghouse Ltd.**, Hamilton, Ont., forming new electronics div., to be housed in 180,000 sq. ft. building, employ about 1000 . . . **Sylvania** to build new $1,500,000 radio receiving tube plant in Burlington, Ia., occupying some 100,000 sq. ft., employing about 800 . . . **Mattison** has acquired new 12,000 sq. ft. cabinet plant at 742 Wythe Ave., Brooklyn . . . **Corning Glass** to build new 270,000 sq. ft. glass plant in Danville, Ky. "to meet the glass and specialized tubing requirements of electronic devices used in the expanding defense programs," among other things.

Electromagnetic radiation bill (Vol. 7:2-9) remains suspended in air—may even evaporate—as Senate Interstate & Foreign Commerce Committee impatiently awaits response from Defense Dept., sponsor. NAB, FCC and RTMA have already given opinion on Committee's recommendation that slight amendment to Communications Act be enacted. All 3 agree with Senators, latter two adding that devices of no navigational use to enemy should be exempted. RTMA suggests that language of amendment exclude devices not detectible beyond 5 miles. FCC thinks military can specify the mileage factor.

White House will release report of President's special Communications Policy Board (Vol. 7:7) on March 27. Meanwhile, speculation continues that Board recommends permanent board superior to FCC and government's Interdepartment Radio Advisory Committee. There's talk that FCC Chairman Coy will be asked to head board, that Comr. Webster may become member. Coy says nothing; Webster says: "No one has asked me to become a member of any such board, and I doubt whether I'd do it if asked. I've got a job to do here."

A 16-line picture, based on 1884 TV patent, will be shown at NAB's April 15-19 Chicago convention by AT&T Long Lines engineer M. E. Strieby. He built whirling disc from patent specifications, uses projection lamp and photo to simulate TV picture. His purpose is to show that basic principle of TV—scanning—has remained basic throughout years. Among other TV papers at conference: "Maximum Economy TV Broadcasting," Carl Lee, WKZO-TV, Kalamazoo, and Martin Silver, Federal; "5-kw uhf Transmitter," Howard Crosby, GE; "Video Switching," John Brush, DuMont; "Allocations," Bernard O'Brien, WHEC, Rochester; "Transmitter Maintenance During Emergency," RCA Service Co.; *Tele-Tech's* John Battison on system of TV filming to replace kines; NBC's Raymond Guy on Bridgeport uhf experience; GE's Lloyd Krause on high-gain uhf antenna; Federal's A. J. Baracket on flying spot scanners; NAB's Dick Dougherty on labor relations.

———■———

Awards at March 19-22 IRE convention: V. K. Zworykin, RCA, Medal of Honor; R. B. Dome, GE, Morris Liebman Memorial Prize; A. B. Macnee, U of Michigan, Browder J. Thompson Memorial Award; M. J. E. Golay, Signal Corps, Harry Diamond Memorial Award; W. W. Harman, U of Florida, Editor's Award. *Named Fellows:* Robert Adler, J. G. Brainerd, C. G. Brennecke, R. D. Campbell, R. W. Deardorff, J. H. DeWitt Jr., H. F. Elliott, C. G. Fick, E. L. Ginzton, W. M. Goodall, J. T. Henderson, C. J. Hirsch, W. E. Jackson, J. B. Johnson, A. G. Kandoian, C. E. Kilgour, T. J. Killian, J. B. Knox, V. D. Landon, George Lewis, H. R. Lubcke, D. C. G. Luck, J. F. Morrison, G. A. Morton, G. W. Olive, O. W. Pike, L. E. Reukema, H. W. G. Salinger, O. H. Schade, D. F. Schmit, W. E. Shoupp, P. F. Siling, H. R. Skifter, B. R. Teare, G. N. Thayer, H. P. Thomas, W. C. Tinus, Ernst Weber, R. H. Williamson, W. T. Wintringham, G. A. Woonton.

PRINTED COPIES OF ALLOCATIONS REPORT: Detailed city-by-city channel allocations (with educational assignments) are tabulated in FCC's proposed new "VHF-UHF Rules, Standards & Allocations" issued this week. Important, too, are the legal and technical whys and wherefores, as spelled out in proposed orders, commissioners' separate statements, engineering data and charts, etc., all contained in FCC's mimeographed release of 60-odd pages. For easier reading and reference convenience of our subscribers, and with cooperation of Commission, whose supply of copies is limited, we have printed the full text in a 28-page TV Allocation Report, making one copy available herewith to each subscriber. Extra copies cost $2 each -- or $1 per copy in quantities of 25 or more.

HOW FCC PROPOSES TO END THE FREEZE: Excellent engineering -- diluted with weak judgment. That's industry's snap sizeup of long-awaited TV allocation plan issued by FCC this week. [For full text, see TV Allocation Report herewith.]

Freeze remains solid -- till fall or winter, at very least -- though FCC hopes for sort of "partial" freeze-lifting, not too significant, in couple months. Another lengthy hearing, beginning May 23, must still be completed.

The educators got their way -- a substantial chunk of vhf as well as uhf. Thus, there's widespread feeling that FCC has given with one hand and taken away with other, that nation's TV will be afflicted with great gaps if FCC goes through with plan. [For analysis of what plan would do to major markets, see p. 3.]

The "ins" -- the existing stations -- are delighted, as they visualize great increases in power, height, coverage. Educators may be happy, too, until they get into the business of trying to operate stations without income.

But the "outs" are fiercely resentful, as they see themselves foreclosed from doubly attractive channels. The 31 existing stations which would be moved to other vhf channels may grumble, but no way near as loud as the "outs".

In basically 4-2 decision and with obvious qualms (see their separate opinions in Allocation Report), commissioners may have lit fuse to keg of political TNT when majority agreed to hold choice channels in choice cities for chosen educators.

Station applicants now regret their lackadaisical attitude towards educational hearing -- some may fight proposal tooth-and-nail, hoping it's not too late.

There's political dynamite, too, in fact that Connecticut, Indiana, New Jersey, Ohio, Pennsylvania, among others, get so very few vhf -- in New Jersey's case only the one already in use in Newark -- outside of a few big cities. Their towns are relegated to dependence on uhf, no fault of the allocations but it may take some tall explaining to outraged local sensibilities.

Commission's action isn't final. Basically, it's a proposal -- but a very firm one -- subject to a month of comment by industry before FCC closes door to further discussion of basic policy.

Here's what FCC intends to do, unless comments received within next month change its mind:

EDUCATION: Reserve approximately 10% of vhf and uhf channels indefinitely,

Copyright 1951 by Radio News Bureau

MAR 27 1951

subject to FCC scrutiny "from time to time" to make sure channels aren't going begging or wasted.

VHF: Provide for reduced station separations, greater powers and heights, as compared to previous proposals (Supp. No. 64). Permit increases in powers for existing stations, and actual construction of new stations in Territories, before end of freeze, if no serious objections arise within month. Move 31 stations to different vhf channels to reduce interference. Retain general freeze on all new U.S. stations until close of further hearings and final decision on whole allocation.

UHF: Open whole uhf band (either 65 or 70 channels, depending on whether 470-500 mc is given to common carrier service), with hopes of actually permitting station construction before long without further hearing. Uhf is mixed with vhf in most cities, all major markets.

* * * *

Hosannas might have greeted plan, despite its tough local impacts, had it not been for educational gimmick -- a complete victory for crusading Comr. Frieda Hennock. Comrs. Sterling and Webster were opposed to flat reservation and Chairman Coy indicated some doubt but went along. Comr. Hennock is still dissatisfied, still plumping for more channels, more vhf.

But technical provisions are good, in opinion of able engineering observers, one of whom said: "It ought to be good. They had 2½ years to correct the last one." Consider these facets particularly:

(1) Minimum vhf co-channel spacing was reduced from previously proposed 220 miles to 180 miles city-to-city, 170 miles transmitter-to-transmitter (allowing flexibility in station location). Uhf co-channel mileage was cut from 200 to 165 miles for cities, 155 for transmitters.

Not yet generally realized, however, until consultants start drawing circles, is fact that FCC has actually made most vhf co-channel assignments well in excess of 180 miles -- most of them 200, 220 miles or even more. Engineers may find fertile field for juggling here.

Only a few existing stations violate minimum. The worst -- Davenport-Milwaukee and Columbus-Indianapolis -- run 150-160 miles. The "horrible example" of Cleveland-Detroit has been cleaned up. No new assignments violate 180-mile minimum.

(2) Minimum vhf adjacent-channel spacing was reduced radically from 110 miles to 70 for cities, 60 for transmitters. Uhf was cut from 100 to 65 and 55.

(3) Power maximum for vhf was hiked to 100 kw for Channels 2-6, 200 kw for Channels 7-13 (latter was surprise). Uhf is allowed 200 kw. No one may go over these powers, but great many stations can jump antennas to 1000-1500 ft. or more and still retain maximum. This permits enormous improvement in service, applies even to some stations on Empire State Bldg. and Mt. Wilson.

(4) Minimum powers are eminently realistic, dropping down to as little as 1 kw, at 300 ft., for cities under 50,000 population.

(5) Offset carrier is mandatory, extending every station's service.

(6) Uhf is tailored to minimize many ills, avoid the problems of oscillator radiation, intermodulation, image, IF beat -- making possible cheaper, better sets.

(7) "Flexibility" uhf channels, 13 or 18 of them (depending on 470-500 mc decision), are set aside for assignment where need arises and for experimentation with Stratovision, Polycasting and the like.

* * * *

Procedure in "partially" lifting freeze and finally cleaning up whole problem will be as follows:

Comments on whole plan will be accepted until April 23. Opposition to these must be filed by May 8. Then, FCC decides whether it can start granting vhf power increases, vhf stations in Territories, uhf in U.S. -- all before new vhf stations are unfrozen.

On May 23, hearings on each city will begin in Washington, with FCC open to "persuasion" on channel shifts which would not affect "priorities" (see text of Allocation Report) or raise interference levels beyond those stipulated.

Educators will have to put up or shut up during these hearings. If they don't defend channel reservations, they may lose out. As one FCC source put it:

"Every asterisk [indicating reservation in allocation table] is subject to hearing." Incidentally, educators can compete for non-reserved channels against commercial applicants. "Educational" institutions are defined same as in FM rules; they can't sell time, can't sell station to commercial interests. They may join together to build and operate stations.

Oral argument will then be held, upon FCC Bar Assn. contention that FCC can't legally make fixed allocation plan and require rule-making to change it. Comr. Jones, incidentally, feels same way -- basis of his partial dissent. But lawyers wonder whether new plan already renders such oral argument meaningless.

Allocation plan is self-explanatory in regard to many other details, but industry is bound to come up with questions and comments, reflect them in papers filed with FCC. As in the past, we'll digest all comments, report them weekly.

VHF—MANY WILL SEEK, FEW CAN GET: Not enough vhf for inevitable demand, plenty of uhf -- that's the standout fact of the new TV allocations. Vhf assignments to education, particularly in the larger metropolitan areas, aggravate the shortages even more -- and there will be many a bitterly disappointed commercial aspirant.

By actual count, only 342 of the 1250-odd communities listed in the table of allocations are to get total of 557 vhf channels. But 107 of these are already spoken for by existing stations in 63 communities (see p. 12), and 73 more are reserved for educators. That means commercials can get mere 377 new vhf stations.

Few in the big cities will be pleased with sop given to them in way of uhf channels, which are freely intermixed; e.g., among the 50 most populated cities (Vol. 6:29), every one save Miami gets from 1 to 5 uhf channels. But FCC may find it hard to get "customers" for these in alrady heavily vhf-served cities.

Among top 50 cities, these have no more vhf channels available: New York, Philadelphia, Los Angeles, Detroit, Baltimore, Cleveland, Washington, Cincinnati, Columbus, Louisville, Dayton, Syracuse.

Good many vhf educational channels go to larger cities, in some cases shutting out any more commercial outlets. Chicago, Dallas, Omaha, Birmingham are instances where single remaining unoccupied channels are earmarked for education -- and it would appear that Chicago shutout blanks CBS's hopes for own key vhf outlet there, just as Cleveland and Cincinnati shutouts doom DuMont vhf applications.

Education gets a vhf channel not only in foregoing 4 big cities, but also in: St. Louis, Boston, San Francisco, Pittsburgh, Milwaukee, Houston, Minneapolis-St. Paul, Seattle, Kansas City, Indianapolis, Denver, San Antonio, Memphis, New Orleans, Portland, Ore., San Diego, Miami, Oklahoma City, Jacksonville -- to scan top 50 cities only.

[For analysis of any particular city, consult State and city channel allocation tables in our TV Allocation Report herewith.]

After subtracting educational allocations, there aren't very many vhf left for commercial newcomers -- and a scramble for these can be expected. Portland and Denver, with no stations now, can get 3 commercial outlets each. Major cities with 2 left: Seattle, St. Louis, Minneapolis-St. Paul, Miami, New Orleans.

But only one commercial vhf channel each is available to such big towns as San Francisco (presumably still reserved for Don Lee), Pittsburgh, Milwaukee, Houston, Buffalo, Kansas City, Ft. Worth, Indianapolis, San Antonio, Rochester, San Diego, Toledo, Providence, Oklahoma City, Richmond, Jacksonville, Norfolk.

Akron and Worcester, also among top 50, also without TV now, are left out in cold. They get no vhf, are given 3 & 2 uhf, respectively. It's an interesting fact that all others among top 50 save Miami get uhf -- plus their vhf.

* * * *

As for the uhf allocations, nobody expects much of a scramble for them in areas already vhf-served (though some may apply for them in hopes they turn out to be bonanza). Their great promise is in non-TV areas, where both telecasting and

receiver business can start from scratch. Otherwise, they mean adapting existing sets or buying new ones capable of dual tuning. Some think color may eventually give uhf needed "oomph" in well-served vhf markets.

Allocation table puts 1357 uhf channels in 1139 towns, 127 of the channels to go to educators -- or about 9½% of total uhf as against some 13% of vhf. Comr. Hennock herself got realistic about uhf when she stated in her dissent:

"Up to now, uhf operations have been completely experimental, and we have no assurance as to when uhf equipment will be available." She points to "conversion" problem among existing vhf sets, noting that the 2,250,000 sets in New York "will be lost to education on uhf unless additional tuners and antennas are added to them. In these circumstances," she adds, "the Commission quite properly indicates concern that even commercial interests in uhf will be required to face substantial economic problems beyond those ordinarily faced by a vhf operation."

ENGINEERS FERRETING OUT UHF ANSWERS: Immediate future of uhf is in hands of defense mobilizers -- availability of materials playing large part in plans for building stations, transmitters, receivers. Nevertheless, FCC is obviously doing all it can in way of encouragement and pressure to bring out uhf, and fierce competition among manufacturers is beginning to bear fruit.

At IRE convention this week, it was evident that manufacturers are open for business in the uhf transmitter market. They can't give delivery dates yet, but they're ready for orders.

GE made biggest pitch, with 3 approaches (Vol. 7:11). One was new metal-ceramic tube giving 1 kw at 900 mc (about same at 500 mc), now in pilot production, ready for placement in transmitters; unit is about 7-in. high, 3-in. diameter, weighs only 1 lb. Second is experimental klystron, built by Varian Associates, San Carlos, Cal., good for 5 kw throughout whole uhf band, shortly to be tested in Syracuse transmitter; tube engineers say that 5-kw metal-ceramic tube should be easy to make, now that bugs in 1-kw unit have been licked. Third approach is 4-bay helical antenna featuring gain of 20.

Westinghouse revealed work on reflex resnatron, already good for 1.5 kw, with potential of 10 kw or so. RCA is said to have achieved 10 kw by combining output of 40 small tubes. And DuMont stands ready to build 1-kw transmitter.

In uhf receiver field, DuMont, Sylvania and Zenith engineers described several developments, but many more manufacturers (including tuner makers) are known to have units in the works, playing cards close to chest, seeking competitive advantage. Also, nature of FCC's allocation had to be known definitely before final designs could be fixed.

CRIME HEARING TV STILL TALK OF TOWN: TV apparently has firmly established itself as the No. 1 medium for reporting Congressional hearings -- in fact, any news event falling within the ken of its lens.

The electrifying impact of Kefauver Crime Committee telecasts from New York and Washington -- fascinating even to those who may skip news pages or ignore radio public service programs -- gave more than hint of TV's potentialities, was subject of countless news stories, editorials, columns.

It revived suggestions that Congress itself be telecast, led Rep. Javits of New York to assert on House floor that hearings have proved desirability of "figuratively enlarging Congress visitors' galleries to accommodate every citizen of U.S."

But still left open is legal question whether a witness can be forced to testify before TV cameras (Vol. 7:11), for St. Louis "betting commissioner" James J. Carroll, who walked out on St. Louis hearing because of TV cameras, returned to Washington hearing March 22, asked and got same privilege as underworld figure Frank Costello -- namely, that his face be kept off screen.

It purged Carroll of contempt charge -- but robbed TV of test case. Sen. Kefauver took occasion, after 45-minute wrangle at which Carroll protested not only TV but radio and newsreels, to give us his views on TV's place in public hearings:

"TV is a great means of public communication. So long as the lighting, heat

and other physical conditions are not obnoxious to the witnesses, TV should have the same rights as movie cameras, radio and the ladies and gentlemen of the press. I can't see any difference between accommodating all the people the hearing room can hold and televising the proceedings."

As dispute over ethics and legality of televised hearings continued, Sen. Wiley (R-Wis.) suggested voluntary code to assure fairness and help make TV "the greatest constructive force for public education achieved in this century."

* * * *

There's little doubt hearings have been TV's biggest show to date -- as illustrated by these items:

Hearings earned 26.2 Hooperating Monday morning in New York, with TV audience 18½ times size of average weekday morning audience. Afternoon session had 31.5 rating, 86.2% share of TV audience, evening session getting 29.2 & 39.9.

Effects were felt heavily, New York and Washington stores alike reporting sagging sales, non-TV bars empty, TV bars filled to capacity -- even Red Cross blood donations falling off in New York until TV sets were installed at donor centers.

NBC's formal request that ban on televising Costello's face be lifted, asking same privileges as newsreels (run off on TV later anyhow), was turned down by Sen. Kefauver with observation that "it is more important [that] we have his testimony than that he be televised in the act of giving it."

* * * *

Sidelights on the televised hearings made good newspaper copy: Chicago gangster Jake Guzik, who refused time after time to answer Committee questions on grounds that "it might incriminate me," was asked by Sen. Wiley where he learned the phrase. "I heard it on TV," he replied. Likewise, students at a Queens public school were reported replying to teachers' questions, "I refuse to answer on the grounds that it may incriminate me."

APPROACHES to compatible color system featured all 10 highly technical papers at two IRE convention sessions. Tenor of discussion was that basic outlines of system are agreed upon and that specific details will be written out soon.

Authors of papers—from Bell Labs, Philco, DuMont, Hazeltine, GE, Sylvania—seemed to feel RCA is on right track, but doesn't necessarily have the only answer. Fundamental agreement of symposium participants makes it probable that single compatible system will emerge, eventually be presented to FCC.

CBS felt it was being ignored—though it (with Remington-Rand & Gray Mfg. Co.) conducted well-attended demonstrations daily. So v.p. Adrian Murphy got up during question period at March 20 evening symposium, attended by some 1500, said:

"I'd like to remind this group that another group—the Supreme Court of the United States—will hear about color next Monday [March 26]. You may have heard that the FCC held hearings on color during 1949 and 1950. You may recall that it adopted the field-sequential system.

"Compatible systems are very interesting and are a bright spot for the future—if they can be achieved. I thought you might be interested in this further information." A few applauded.

* * * *

Depth of the cleavage over color that exists between FCC and the TV-radio engineering and industrial fraternity was indicated in blunt March 21 IRE banquet address by RTMA president Robert Sprague—a sort of valedictory before turning RTMA post over to Glen McDaniel as of April 1 (Vol. 7:2,7). He aimed it largely at accusations by FCC Comr. Jones in First Color Report (Vol. 6:35).

"It is obvious," said Sprague, "that were it not for the engineers there would be no TV. Less widely known is the fact that there would be no TV as we know it today except for the unselfish work of a large number of engineers who have consistently sought to protect the public interest, as well as the interests of the industry, by resisting experiments conducted at the expense of the consumer's pocketbook.

"It is certain that if the action of these engineers, and of the industry generally, had been only self-seeking, or faulty, or erroneous—as has been recently implied by a member of the FCC—the public would have rebelled and TV would not be the multi-billion industry it is today . . .

"Comr. Jones stated that [color] hearing had made it 'crystal clear that the industry's engineers were unsound analysts' and in 1946 and 1947 had given testimony which was 'completely worthless' because 'their economic interests blinded their engineering judgment.' He added moreover that there was 'grave doubt' that these engineers could 'be relied upon to predict the potential performance of any system whose adoption might prejudice their economic interest.'

"If wholesale indictment of your great profession . . . were not so damaging and unfair, it would be ridiculous . . . I only urge you to continue to be guided in the future, as in the past, by your own high standards, as I venture to offer you this credo and code for engineers:

"Differences of engineering opinion can and should honestly exist. Unanimity of engineering judgment is not necessarily desirable.

"Changes in engineering opinion resulting from the passage of time and the gaining of experience are healthy, and normally to be expected.

"It is improper and futile to ask engineers to reach final and valid conclusions at too early a stage in the development of new systems or equipment."

Applause of conventioneers and congratulations Sprague received left little doubt of engineers' feelings.

Station Accounts: Seventeen sponsors, mostly national, are participating in *Come into the Kitchen*, Mon.-thru-Fri. 3-3:30 p.m. feature on KTTV, Los Angeles, among them: Blair Milling Co. (Ezy angel food cake mix), thru Jerome G. Galvin Adv., Kansas City; Converted Rice Inc. (Uncle Ben's rice), thru Leo Burnett, Chicago; American Maize-Products Co. (Amazo instant dessert), thru Kenyon & Eckhardt, N. Y.; Purex Corp. (bleach), thru Foote, Cone & Belding, L. A.; A. E. Staley Mfg. Co. (Sta Flo starch), thru Ruthrauff & Ryan, Chicago; American Molasses Co. (Grandma's molasses), thru Charles W. Hoyt Co., N. Y.; Tea Garden Products Co. (jellies and preserves), thru BBDO, San Francisco . . . New York State Dept. of Commerce, to promote state, is placing 1-min. films thru BBDO . . . Goebel Brewing Co., Detroit, expanding to Pacific Coast, has bought new Vitapix half-hour time-talent package, *The Jerry Colonna Show*, reportedly costing $6000 weekly, for placement on KGO-TV and KECA-TV, possibly other stations, thru Russell, Harris & Wood, San Francisco . . . Hotel Utah, Salt Lake City, sponsoring Tue. & Thu. 4:30 show on KSL-TV titled *Uncle Roscoe's Playtime Party* . . . Among other advertisers currently reported using or preparing to use TV: Somnyl Pharmacal Corp. of America (Nu-Pax sedative), thru Emil Mogul Co., N.Y.; Sunnyvale Packing Co. (Rancho soups), thru Russell, Harris & Wood, San Francisco (KECA-TV); Flex-Let Corp. (Flex-Let watch bands), thru Ben Sackheim Inc., N. Y.; Airmaid Hosiery Mills, thru J. B. Taylor Inc., Dallas; Chunk-E-Nut Products Co. (home popcorn pack), thru C. J. LaRoche & Co., N. Y. (WABD); Grosset & Dunlap Inc. (books), thru Madison Adv. Co., N. Y. (WABD); Austin Motor Co. Ltd. (Austin cars), thru J. M. Mathes Inc., N. Y. (WABD); Herbert M. Adler (shoes for men), thru Frederick-Clinton Co., N. Y. (WABD); Foremost Dairies Inc., thru Fletcher D. Richards Inc., N. Y. (WABD).

Network Accounts: Time Inc. extended its sponsorship of Kefauver Crime Committee telecasts through New York and Washington sessions on 19 ABC-TV stations, will continue to conclusion, thru Young & Rubicam, N. Y. . . . Sponsored Easter Day specials on TV networks included: Philco Corp.'s *Uncle Miltie's Easter Party*, starring Milton Berle, on NBC-TV, 3-4, thru Hutchins Adv. Co., Philadelphia, and Lutheran Laymen's League's *Bringing Christ to the Nation* on ABC-TV, 3:30-4, thru Gotham Adv. Co., N. Y. . . . Easter Parade was sponsored by Sanson Hosiery Mills on NBC-TV, noon-1, thru Dorland Inc., N. Y.; by Old Gold on DuMont, 11:30-1, thru Lennen & Mitchell, N. Y.; by Wamsutta Mills, thru McCann-Erickson, N. Y. and Bulova Watch Co., thru Biow Co., N. Y. on CBS-TV, 12:30-2 . . . Bymart Inc. (Tintair) March 19 moves *Somerset Maugham Theatre* from CBS-TV to NBC-TV, alt. Mon. 9:30-10:30, thru Cecil & Presbrey, N. Y.; will replace Procter & Gamble's *Musical Comedy Time* cancelled March 19 . . . Starting April 28 Bymart will also sponsor *Sam Levenson Show* on CBS-TV, Sat. 7-7:30, thru Cecil & Presbrey, N. Y.; will replace Oldsmobile cancelling April 21 due to cutbacks . . . Emerson Drug Co. (Bromo-Seltzer) March 18 started sponsorship of *Rocky King, Detective* on DuMont, Sun. 9-9:30, thru BBDO, N. Y.; replaced Arthur Murray Studios' *Arthur Murray's Party Time* moving to ABC-TV April 2 (Vol. 7:11) . . . Ford Dealers April 5 substitute *James Melton Show* for *Ford Star Revue* on NBC-TV, Thu. 9-10, thru J. Walter Thompson, N. Y. . . . Texas Co.'s *Texaco Star Theatre*, starring Milton Berle on NBC-TV, Tue. 8-9, June 12 starts a 13-week hiatus.

Robert S. Peare, 50, GE advertising and publicity v.p., and as such in charge of its Schenectady TV and radio stations, died of heart attack March 17 in Schenectady.

Telecasting Notes: Song pluggers are turning to TV (as they did to AM) as "prime exploitation factor, one which is likely to outweigh radio in the long run," reports *Billboard*, which recalls that ASCAP once charged the broadcaster with "the murder of music" . . . Milton Berle, 42, gets 7-figure contract "for 30 years" from NBC, covering exclusive services as actor, producer, writer or director; it's either a capital gains or spread-the-income deal, though neither side will discuss matter . . . TV's high pay and good hours (daytime rehearsals) have created shortage of chorus girls for night clubs and stage, says *New York Times*, citing these weekly union minimums for experienced performers: night clubs $70, Broadway shows $75, one-hour TV show $125 . . . Remotes direct *From the Governor's Office*, with Gov. Kohler and legislators participating, are latest public service on WTMJ-TV, Milwaukee; it's 90-mi. haul from Madison, and show is Sat. 5:30 . . . Hollywood's KTSL, now operated by CBS, has added 20 engineers under TV technical chief Herbert A. Pangborn . . . United Television Corp., Paramount Bldg., New York, organized to book movies for TV, reports 300 features, 60 westerns, 200 cartoons, etc., available; Arche Mayers is president, Robert Wormhoudt sales mgr., Connie Lazar program mgr. . . . NBC producer-director Herbert Bayard Swope Jr. acquires TV-radio rights to Sax Rohmer *Fu Manchu* stories, giving NBC first refusal . . . NBC "O&O" v.p. James M. Gaines subject of "New York Close-Up" sketch in March 23 *Herald Tribune* . . . Series on Navy history from previously unreleased Allied and enemy film, will be carried by NBC-TV starting late this year, first 26 weeks as recruiting aid; supervising program will be Henry Salomon Jr., asst. to Capt. Samuel Eliot Morison in compiling official *History of U. S. Naval Operations, World War II*, basis of series . . . Aimed at 6th grade classrooms (with 6 schools picking first show up and very enthusiastic), series of 8 music appreciation shows began on Washington's WNBW March 14, will continue Wed. 10-10:30; it's experiment resulting from year's study, says station, and "did not come about merely as a sop to the current advocates of educational TV." The producers had tough choice to make March 21, but decided to break into Kefauver telecasts "because of advance commitment"—interrupted Costello highlight.

Personal Notes: DuMont Network appoints Clarence G. Alexander, onetime NBC-TV, director of network operations, upping Norman W. Drescher to director of station relations, and Joseph W. Hess to director of budget and general services . . . John M. Boyland, ex-NBC, joins ABC-TV station relations as regional mgr. . . . Forrester Mashbir, ex-KPIX, joins KTTV, Los Angeles, as sports director . . . Dr. Joe Zimmerman, TV Workshop director of Temple U, named production supervisor of WFIL-TV, Philadelphia . . . James G. Cominos, ex-v.p. and TV-radio director of LeVally Inc., Chicago agency now liquidating, joins Needham, Louis & Brorby as v.p.

More rate increases reported: WSB-TV, Atlanta, March 1 raised base hourly rate from $325 to $500, one-minute announcements from $52 to $80. On April 1, WNBW, Washington, goes from $450 to $550 & $100 to $120; WDAF-TV, Kansas City, from $400 to $450 & $80 to $90; WFAA-TV, Dallas, from $300 to $400 & $45 to $60; WBAP-TV, Fort Worth, from $300 to $400 & $45 to $60. On June 1, WTVJ, Miami, goes from $375 to $550 & $65 to $95. On July 1, WBTV, Charlotte, raises rate from $300 to $400 & $50 to $65.

Main NARTB (NAB) convention speakers during April 15-19 sessions in Chicago's Stevens Hotel will be Gen. Omar Bradley, April 17, with off-the-record session afterward, and FCC Chairman Coy, April 18.

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
March 24, 1951

FIRST QUARTER OUTPUT 2,000,000: Looks like first 1951 quarter TV output will run somewhat over 2,000,000 units, as against 1,605,200 for same 1950 quarter and very nearly 2,500,000 for fourth 1950 quarter. Output was 181,008 in 11th week (ending March 16), RTMA reports, holding close to preceding week (Vol. 7:11) but staying down from peak of 190,291 in week ending March 2. Total for 11 weeks thus far reported is 1,876,643. Factory inventories as of March 16 were 196,326 as against approximately 180,000 each of preceding two weeks.

Radios went up slightly -- 364,916 units for 11th week, as against 355,044 preceding week (Vol. 7:11). Factory inventories were 142,247 vs. 146,848 week earlier. Total radios for 11 weeks: 3,647,846. Production for week ending March 16 was 213,441 home radios, 122,125 auto, 29,350 portable.

TRADE BECALMED, AWAITS APRIL PUSH: TV trade continued too slow this week to clear glut of inventories of high-priced units -- even Kefauver telecasts (see p. 4) and prospect of baseball failing to serve as sufficient buying stimulants.

Easter over, merchandisers are praying they can bring business into calmer waters as (1) production falls off and factory shipments reduce; (2) production is concentrated on lower-priced sets; (3) "powerhouse promotion," to quote one leader, is put behind big sales drives in April.

There's plenty of worry but nothing like panic -- and such distress selling as occurs is highly localized.

* * * *

Despite the blues -- felt in other appliance lines, too, and blamed more on Regulation W than any other single factor -- no major manufacturer up to this writing has followed Admiral's lead in ordering list reductions (Vol. 7:11).

They're all concentrating now on the smaller and cheaper models that sell easier and bring customers into stores -- but Emerson, Crosley, DuMont, GE, Philco, RCA, Zenith flatly state they have no intention of cutting prices.

Several say they anticipated pre-Easter slump, so weren't hit too hard -- noting that the Admiral cuts were all on its low-end plastic models against which they're competing with wooden units. RCA, Philco, Emerson, DuMont -- and it can be presumed Admiral and others, too -- will burgeon forth shortly with huge advertising campaigns, and some are going to push hard on radios now. Motorola expects to make up lower second quarter TV production with auto radios and portables.

"There's nothing wrong with this business," one big manufacturer told us, "except too much high-priced stuff and not enough low-end merchandise. We'll simply give them more low-end, and go back to normal selling." "Normal selling" appears to mean vigorous promotion, liberal trade-ins, public prize contests, salesmen's trips to Miami or Bermuda or Mexico, giveaways of lamps, record albums, etc. etc.

Table models weren't too plentiful, even when Admiral broke its prices. Admiral's troubles weren't with that item; it's rebating on only a few thousand in pipelines when $30-$40 reductions were ordered.

* * * *

It's a curiously ironical turn of events that news of production cutbacks, apparently inevitable as Washington mat rials controls tighten, should actually be hailed with pleasure by some of same folk who not long ago were bemoaning inability to get enough sets to meet demand.

That's how it is in TV today. Some distributors and dealers are actually begrudging manufacturers their big 1950 sales and earnings, blaming them for (a) failing to give them benefits by way of better discounts, and (b) loading them up while failing to foresee current dip in demand.

At factories, they're still waiting for flood of defense orders -- expected

long before now. Most are quietly cutting back. DuMont announced 4-day week for receiver and parts divisions (not tubes), starting March 26, attributed this to steel limitation order (Vol. 7:11), stating this was preferable to laying off personnel. It was disclosed by union sources in Chicago that Admiral had shut down 2 production lines March 14, resuming them March 22.

Emerson is resuming production of 14-in. plastic table at $179.95, frankly as price leader, and Hallicrafters this week announced 14-in. ebony leatherette table at $199.95, in mahogany finish $219.95.

Philco probably won't hold usual big convention this summer, encouraging instead regional dealer conventions (including Bermuda cruises already arranged).

Nobody's talking "new" spring or summer lines yet, though there probably will be some such items by time of Chicago Furniture Mart in June.

As for substitute materials, they're simply being "inched into" current lines, with minimum of fanfare even by their prime promoters.

* * * *

Few think second quarter, even if it gets good push from April-May promotions, will equal first quarter's production -- or even sales. Nearly everybody seems sure materials shortages really will begin to pinch third quarter, some even fear for civilian supplies at all fourth quarter. Normally, it's calculated year's production and sales should be 25% first quarter, 15% second, 25% third, 35% fourth.

Topics & Trends of TV Trade: Competition for engineers reached almost frantic stage at IRE convention in New York this week. Men were wooed by hundreds of companies; many carried half dozen tempting offers around in their pockets.

Giant bulletin board in Waldorf-Astoria headquarters carried scores of placards extolling life in "Sunny California," etc. Company representatives took hotel suites, enticed engineers up for drink and subtle suasion. Not only electronic engineers are being sought. Hunt is on for physicists, chemists, draftsmen, mechanical engineers, too.

The aircraft companies—Hughes, Fairchild, et al—were in there pitching, with blandishments as great or greater than those of strictly electronic firms. Striving with the rest were govt. agencies—Defense Dept., Bureau of Standards, etc.

Kids just out of school felt like high-school girls dancing with All Americans—and old-timers blushed at calculated compliments.

* * * *

Retail sales of TV-radio and household appliance dealers dipped 14% from December 1950 to January 1951, Census Bureau reports in its January *Trends in the Electrical Goods Trade*. This is considerably less, percentagewise, than the 40% drop from December 1949 to January 1950 or the 41% drop from December 1948 to January 1949. Estimated total U. S. sales by retailers in this category were $307,000,000 in January 1951, or 45% higher than the $212,000,000 reported in January 1950.

TV panel will be feature of Canadian Assn. of Radio & Appliance Dealers' convention April 1-4 in Royal York Hotel, Toronto. Panel speakers include Crosley v.p. W. A. Blees. Other convention speakers include NARDA president Mort Farr, RCA TV sales mgr. D. D. Halpin and GE traffic appliance merchandise mgr. A. L. Scaife.

Sheldon Electric this week posted price reductions from $2 on 10-in. CR tubes to $10 on 20-in., said to be result of new speed-up equipment making Irvington (N. J.) plant capable of producing up to 5000 units daily.

Next Chicago Furniture Mart is scheduled for June 18-28. San Francisco's summer mart set for July 16-20.

Trade Miscellany: RCA Victor's big ad campaign breaks April 15, timed for start of National Baseball Week, will urge attendance at games "but if you can't make the game today, see it on TV" . . . Emerson's factory-paid advertising includes full-page newspaper ads plus radio and TV promotion, and big schedule of magazine space . . . DuMont for first time is authorizing trade-ins, part of promotion tied in with its 20th anniversary; also going heavily into consumer magazines and TV . . . Big sponsor of TV time, particularly sports, Hoffman Radio has own staff TV program producer—John More, ex-Brisacher, Wheeler & Staff . . . Crosley's Wm. A. Blees subject of biographical sketch in March 20 "Business and Finance Leaders" column in *New York Herald Tribune*.

Plant Expansions: Philco has acquired 3 new plants in Bedford, Ind., adding about 175,000 sq. ft. to its present 4,200,000 sq. ft., anticipating use for govt. work; they're one-story buildings, never before occupied, purchased from Tecumseh Products Co., Emerson Electric Mfg. Co., Acklin Metal Products . . . Tung-Sol has acquired 100,000 sq. ft. plant in Washington, N. J. formerly occupied by Pohatcong Hosiery Mills, will use it for defense tube production . . . Hytron closed deal for 60-acre tract in Danvers, Mass., plans to build new plant there (Vol. 7:4).

Nation-wide publicity, including full-page reprints of songs, also kudos from civic interests, were rewards reaped by Washington-Baltimore Motorola distributor James H. Simon for sponsoring, in conjunction with Motorola, contest for "state" song for District of Columbia; winner was professional songwriter Jimmie Dodd, of Hollywood, who got $1000 plus all royalties. There were 3627 other entries, 4 other winners (of Motorola sets).

Gabriel Co., Cleveland, which manufactures shock absorbers, coil springs, thermostats, etc., and of which Ward Products (TV antennas) is a subsidiary, has taken over Radio Workshops Inc., Needham Heights, Mass., specialists in antennas, and will operate it as a wholly-owned subsidiary.

FTC hearing on its complaint against Sylvania tube pricing practices (Vol. 6:2, 7:12) postponed to April 27, when Sylvania and Philco attorneys will argue motion to dismiss charge Philco was favored with special prices.

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Mobilization Report
March 24, 1951

DOLLAR VOLUME OF MILITARY ORDERS: Military electronics production will reach peak annual rate of $2.5 billion in fall of 1952, said RTMA president Robert Sprague in IRE convention address March 21 -- first such estimate to be made public by such an authoritative source. Thereafter, he said output will fall back to $1.5 billion annual rate. He was referring to military electronics-communications program as whole, noted military production dollars have "about half the impact [of] civilian production dollars" because of higher specifications and non-electronic parts.

"These figures indicate," he said, "that our industry will not be so heavily loaded with military contracts but that it will be able to maintain a substantial amount of civilian production, even at the peak of the military output -- except in the unfortunate event of an all-out war. Apparently only the shortages of certain critical materials will prevent manufacturers from turning out as many radio and TV sets as their plant facilities and military orders will permit.

"It is, therefore, highly important that govt. officials make provision in their planning for the healthy continuation of our civilian economy, for we do not know when all of the present manpower and production facilities in our industry may be needed for the nation's defense."

Study of TV industry by broker Fahnestock & Co. says that, since Korean War started, $1.8 billion of military electronics orders have been placed, estimates total of $3.5 billion by mid-1951, more than $7.6 billion by mid-1952.

That's not far off -- if you use rule-of-thumb estimate that electronics-communications account for roughly 10% of all military procurement. Official Defense Dept. report for first 8 months of fiscal 1951 shows $19.7 billion obligated overall, another $3 billion soon to be let. Defense Dept. also revealed recently that $87 billion out of total of $123 billion military appropriations for fiscal 1951 & 1952 would be for materials procurement, which indicates $8.7 billion for electronics-communications (Vol. 7:3).

Recent estimate by Wall Street Journal put actual deliveries of overall military items at $20 billion in 1951, figured $50 billion each in 1952 & 1953, then decreasing amounts.

RTMA MARSHALS CONSERVATION SKILLS: RTMA's "share the know-how" plan to conserve critical materials (Vol. 7:11) received full stamp of approval from members at big March 21 meeting in New York's Hotel Commodore. RTMA's attitude was well summed up by meeting chairman Dr. W. R. G. Baker (GE), RTMA engineering dept. director:

(1) "No company has a monopoly on brains."

(2) "If we show Washington exactly what we have achieved and will achieve, we'll get a hell of a lot more help from down there."

Some 100-plus attendees, mostly top engineers, agreed to following organizational setup:

Chairmen of existing major RTMA engineering departments become chairmen of "Material Bureaus" for their respective departments, appoint other members of their Bureaus, set up task forces. An Advisory Council will coordinate Bureaus.

Chairmen are: M. R. Briggs, Westinghouse, transmitters; L. M. Clement, Crosley, receivers; R. J. Biele, GE, components; O. L. Angevine Jr., Stromberg-Carlson, sound equipment; V. M. Graham, Sylvania, Joint Electron Tube Engineering Council (of RTMA & NEMA). Chairman for special equipment is to be named later.

Advisory Council comprises foregoing -- plus D. B. Smith, Philco, RTMA vice director of engineering; Ralph Batcher, RTMA chief engineer; D. D. Israel, Emerson, chairman of general standards committee. Mr. Clement heads up Council.

Discussion of conservation problems during rather brief session brought out several things on engineers' minds:

(1) Those manufacturers who've always conserved fear that NPA, through its "base period" materials limitations, may actually be rougher on them than on wasteful producers.

(2) Standardization of "conserved" components will be a major topic from now on. For example, how much should resistor leads and bushings be shortened? Some end-product makers (TV or otherwise) can't use them if they're too short, would have to redesign sets or other devices.

(3) Ample warning of shifts to new types of components must be given to everyone, lest component makers find demand outrunning productive capacity. Example: Sudden big demand for copper-clad steel wire would swamp wire makers.

(4) When and how to "go the whole hog" -- redesign sets, rather than snip off a little here and there without changing basic design -- worries many. One engineer suggested designers speed up industry's historical trend to smaller, less complex sets. He placed considerable hopes in hiked TV transmitter power.

(5) Underwriters Laboratories must be consulted before various conservation measures are adopted.

* * * *

Engineers themselves are surprised at continued availability of components. One smaller producer said he'd given his suppliers go-ahead on shorter leads, copper-clad wire, etc., but continues to get all the conventional types he can use. Another insisted that nothing has yet become really tight, said:

"I'm naturally pessimistic, but my fears have continually proved unfounded. I've just quit worrying. If shortages come, they come, but I haven't seen any yet."

Nice military backlogs are keeping some manufacturers happy -- and giving them new worries. One reports that engineers are the only "component" he needs: "Both conservation measures and military development use a lot of engineers. It's not like production of established goods."

Mobilization Notes: Newly planned top-level Electronics Production Board (Vol. 7:11) will get chairman from high in the electronics industry, probably next week. Representatives of govt. units that will come under this overall defense agency held first meeting March 19, with DPA Administrator Wm. H. Harrison acting as chairman.

Gen. Harrison officially announced formation of board March 21 in statement pointing out that use of electronics equipment has reached such widespread proportions in industry, defense and communications that any lag in electronic production could affect entire mobilization program. He said operation of ships, tanks, planes, missiles, guns and atomic devices would be impossible today without electronics.

Board's primary function "is to make certain that no electronic bottleneck stymics any element of the defense effort," DPA announced. "This requires intensified attention to research and development, facilities expansion and production engineering if the required equipment is to be available at the time that it is needed for . . . basic weapons of war."

As announced, board will consist of chairman appointed by Harrison, NPA's Electronic Products Div. director (John Daley), general manager of Atomic Energy Commission (Marion W. Boyer) and "representatives of DPA and Defense Dept., and such additional representatives of the Munitions Board and the Armed Services as may be agreed upon."

Board will determine total requirements—military, industrial, civilian and foreign—for electronic products, and will recommend to various agencies methods for their distribution. Board will also "recommend policies and procedures for insuring required production, including plant expansion, conservation and standardization of products."

Details of controlled materials plan (CMP) are expected to be announced by NPA next week (Vol. 7:3). Under CMP, Govt. will ration steel, copper and aluminum, beginning July 1. Best information is that planners now favor "open-ended" CMP, with the 3 important metals being doled out for defense and defense-supporting requirements only. To ease scramble for remaining supply, proposed limitation system would grade essentiality of civilian requirements. Avalanche of govt. forms and red tape may come shortly after April 1.

Two big orders for radar equipment highlighted list of unclassified contracts negotiated by Air Force week ended March 9. Although Defense Dept. recently clamped security lid on dollar values of contracts awarded (Vol. 7:10), Air Force spokesman said this list had been prepared and cleared before new restrictions went into effect. Awards on list for electronics and related equipment (over $100,000): Bendix, $13,000,000, radar equipment and sets; Gilfillan Bros., $9,500,000, radar equipment; Federal Telephone & Radio, $6,373,475, ground radio transmitters; Raytheon, $1,116,808, magnetron tubes; Webster-Chicago, $142,000, radar receivers.

Electrostatic 30-in. tube is planned, presents no unusual difficulties, according to DuMont engineer H. Grossbohlin. During IRE convention press conference, he said company doesn't plan rectangulars with same picture area. Tube has 90-degree deflection, compared with 66 for 19-in. tube, yet is only 24-in. long—2 inches more than 19-in.

Full-scale congressional probe of administration of mobilization program will start April 4, with more than 50 witnesses, including Defense Mobilizer Charles E. Wilson. Joint Senate-House Defense Production Committee chairman Burnet R. Maybank (D-S. C.) indicated tax amortization program will be one of inquiry's focal points.

Trade Personals: Frank Folsom, RCA president, due back in New York April 2 from month's vacation visiting daughter and grandchildren in Palm Beach . . . Rear Admiral Stanley F. Patten, USN ret., asst. to president Allen B. DuMont since 1947, named DuMont Govt. Dept.'s director of mobilization planning, handling Federal controls, security matters, etc. . . . Donald N. Berry, ex-Hathaway Instrument Co., Denver, named new Hoffman Radio chief mechanical engineer under engineering v.p. John A. Rankin . . . R. M. Butler appointed asst. sales mgr., International Resistance Co., succeeded as jobber contact man by J. F. Whitaker . . . F. J. Cooke, chief engineer of Remington Rand's electronic tube laboratory, recently sold to Reeves Soundcraft Corp., now gen. mgr. of Reeves colorcraft and magnetic tape divisions . . . Maurice L. Levy, ex-Stromberg-Carlson, Emerson, Philco, named Tele-tone director of engineering . . . Darwin Brown, attorney for RCA tube dept., has left to join Washington law firm of Ginsburg & Leventhal, now Ginsburg & Brown, Ring Bldg.

Mobilization Personals: Four men have been added to staff of NPA Electronic Products Div. Named to radio-TV section under E. MacDonald Nyhen: **John A. Pfau,** ex-FCC radio intelligence and for 14 years utility industry engineer; **O. W. McDaniel Sr.,** ex-WPB Radio-Radar Div. To end products section under J. A. Milling: **Noble Harris,** ex-lieutenant commander in Navy electronics work, Bureau of Aeronautics. To test equipment section, under Robert B. McCurdy: **George G. Hoye,** ex-WPB Radio-Radar Div. . . . **Dr. Robert F. Bacher,** ex-Atomic Energy Commissioner, named chairman of Committee on Atomic Energy in Defense Dept. Research & Development Board . . . **Charles Franklin Kells,** asst. president of West Penn Electric, appointed director of NPA Power Equipment Div.

———■———

Some smaller TV manufacturers are worried over their ability to fill defense orders because of loss of skilled labor due to materials cutbacks and market conditions, *New York Times* reported March 19. Other small TV firms, however, maintain loss of labor won't impair their ability to fill military contracts because they can keep skeleton staff of essential employes during transition period.

In another development, NPA Administrator Manly Fleischmann met with Small Business Advisory Committee, summarized their problems as "shortage of materials and lack of defense contracts," and pledged that preservation of small business will be major goal of his agency. Committee asked NPA to review availability of scarce materials toward possible relaxation of limitation orders in light of curtailed stockpiling, lower military demands than anticipated, and increase in raw material production.

New TV picture tube which conserves critical materials was displayed at IRE convention by Rauland Corp. Like other electrostatically-focused tubes, it makes possible savings of cobalt and copper. But unlike the others, Rauland claims, it doesn't require re-engineering of present receivers. Focusing is done with power from regular DC power supply and only added equipment needed is voltage control, according to Rauland. RCA plans to begin production of its electrostatic tubes April 1, but they may not be incorporated into RCA's sets until later date. GE says its electrostatic 17-inch tubes are being made in limited quantities at Syracuse and larger-scale production can begin on "several weeks' notice" upon demand.

Molybdenum, used in some electron tubes, will be placed under complete govt. allocation according to end-use essentiality, NPA officials told tungsten and molybdenum fabricators March 22. Among 8 industry representatives present at meeting were W. P. Kiernan, North American Philips; J. B. Merrill, Sylvania; Jack Gelok, Westinghouse.

Financial & Trade Notes: Philco sales of $335,318,000 in 1950 represented 56% increase over the $214,884,000 of 1949, with each of its divisions up. Net earnings in 1950 also went to record high of $15,484,000, equal after preferred dividends to $4.50 on 3,357,556 shares of common stock outstanding after December's 2-for-1 common stock split. In 1949, profit was $5,692,000 ($1.58).

Total taxes of $18,220,000 exceeded earnings by considerable margin, and during year $1.27 per share plus 5% in common stock were paid as dividends, as against $1 dividend in 1949. Working capital at end of 1950 was $41,929,069, total net worth $68,499,947, up from preceding year's $21,910,066 & $57,670,345, respectively.

Most noteworthy rise in year was 300% in TV receiver sales (reported in trade circles as around 950,000 units), with substantial increases also in radios, radiophonos, refrigerators, freezers, etc. President Balderston's report ventures no prediction for this year beyond indicating "gradual reduction in civilian business and a substantial increase in production for the Govt."

* * * *

Zenith annual report released this week discloses profit of $5,627,003, or $11.43 a share, after normal and excess profits taxes totaling $5,900,000 for "fractional fiscal year" or 8-month period from May 1, 1950 to Dec. 31, 1950. This compares with $5,268,001 ($10.70) for preceding 12-month fiscal year ended April 30. Sales were $87,704,071 for 8-month period, compared with $99,210,746 for preceding 12 months. Company changed fiscal year to conform to calendar year as of Jan. 1, 1951. Report shows sales were $134,012,595 for calendar 12-month period ended Dec. 31, 1950, net income after taxes $8,479,390.

Hallicrafters did $37,000,000 worth of business in 1950, of which 80% was TV, 20% govt. and communications equipment, according to president William J. Halligan. Halligan compared 1950 volume with $15,500,000 in 1949, predicted volume of $60,000,000 in 1951—with $22,600,000 in military orders booked at end of February. Known to be better fixed in military procurement than most, Hallicrafters topkick told distributor meeting in Chicago that first 3 months this year govt. orders are 11% of total billings; that April-May they should amount to 25% of production.

* * * *

Final CBS report on 1950 operations, issued this week, shows record gross income of $124,105,408, net profit of $4,105,329 ($2.39 per share), compared with 1949 gross of $105,397,580 and net of $4,184,079 ($2.44). Federal income taxes of $4,850,000 and excess profits tax of $600,000 held earnings down in 1950 to lowest point in 6 years (Vol. 7:6), Federal taxes for 1949 having been $3,450,000.

Trav-Ler reports net profit of $1,156,851, or $1.52 per share on 761,995 shares outstanding, on sales of $13,892,485 during 1950. Preceding year, when company was privately owned, its profit was $299,121 on sales of $7,014,870.

Avco's first quarter 1951 sales totaled $86,380,616, profit $3,590,976, or 40¢ per share. This compares with $37,919,344 sales, $1,137,581 profit (15¢) same 1950 period.

Standard Coil Products Co. reports net profits of $5,266,442 on 1950 sales of $35,632,396, compared with 1949 profit of $2,579,279 on $16,594,626 sales.

Hoffman Radio 1950 sales were $29,580,510, net profit $1,923,052 ($3.37 per common share) vs. 1949 sales of $11,987,000, profit $1,276,036 ($2.24).

Decca Records reports net profit of $1,004,177 ($1.29 a share) on 1950 sales of $21,408,618 vs. $830,870 ($1.04) on $19,820,987 in 1949.

ABC reports 1950 profit of $84,605, as against net loss of $519,085 in 1949 after tax credit then of $327,000.

NBC Count of TV Sets-in-Use by Cities

As of March 1, 1951

Estimates are sets within .1 Mv/m contours (60 mi.), excluding overlaps

BECAUSE each TV station has a different pattern of coverage, and because so much dispute has arisen over estimates of total families within range, *The Digest* is reluctantly constrained to eliminate family figures in these monthly tabulations by NBC Research. Henceforth, we shall publish only estimated sets-in-use within .1 Mv/m contours (roughly, 60 mi.), as compiled by NBC Research each month—only such statistics gathered within the industry that bear any semblance of scientific effort. It should be noted, too, that *overlaps in coverage* of neighbor-city stations are eliminated, viz., Boston-Providence, Baltimore-Washington, etc.

March 1 tabulation shows increase of 601,900 over Feb. 1 (Vol. 7:8), brings total sets-in-use to 11,748,400. These are the breakdowns (consult individual stations for estimates of number of families within range):

Interconnected Cities

Area	No. Stations	No. Sets
Ames (Des Moines)	1	47,600
Atlanta	2	96,500
Baltimore	3	285,000
Birmingham	2	46,400
Bloomington, Ind.	1	15,000
Boston	2	701,000
Buffalo	1	191,000
Charlotte	1	61,400
Chicago	4	890,000
Cincinnati	3	243,000
Cleveland	3	454,000
Columbus	3	137,000
Davenport-Rock Island	2	49,600
Dayton	2	120,000
Detroit	3	437,000
Erie	1	44,400
Grand Rapids	1	76,900
Greensboro	1	57,500
Huntington	1	38,000
Indianapolis	1	117,000
Jacksonville	1	28,000
Johnstown	1	75,100
Kalamazoo	1	35,000
Kansas City	1	108,000
Lancaster	1	84,600
Lansing	1	46,000
Louisville	2	82,900
Memphis	1	79,300
Milwaukee	1	225,000
Minneapolis-St. Paul	2	251,000
Nashville	1	24,800*
New Haven	1	144,000
New York	7	2,240,000
Norfolk	1	60,300
Omaha	2	66,500
Philadelphia	3	814,000
Pittsburgh	1	240,000
Providence	1	139,000
Richmond	1	68,800
Rochester	1	77,200
Schenectady	1	147,000
St. Louis	1	268,000
Syracuse	2	108,000
Toledo	1	87,000
Utica	1	38,500
Washington	4	244,000
Wilmington	1	59,900
Total Interconnected	80	9,950,200

Interconnected Cities—(Cont'd)

Non-Interconnected Cities

Area	No. Stations	No. Sets
Albuquerque	1	7,900
Binghamton	1	34,400
Dallas	2	109,000
Fort Worth	1	
Houston	1	69,500
Los Angeles	7	877,000
Miami	1	55,000
New Orleans	1	52,200
Oklahoma City	1	79,500
Phoenix	1	37,400
Salt Lake City	2	39,000
San Antonio	2	41,500
San Diego	1	87,000
San Francisco	3	168,000
Seattle	1	75,800
Tulsa	1	65,000
Total Non-Interconnected	27	1,798,200
Total Interconnected and Non-Interconnected	107	11,748,400

* February 1 estimate for Nashville was erroneously published as 28,000 (Vol. 7:8); correct figure should have been 24,000.

Five applications for TV stations filed this week brought total pending to 394. WEEK & WIRL, both Peoria, Ill., both asked for Channel 12; former once had CP, dropped it in 1949 (Vol. 5:22). Others were WSAV, Savannah, No. 3; WALA, Mobile, No. 3; KXEL, Waterloo, Ia., No. 3. [For further details about these applicants, principals, etc., see *TV Addenda 12-K* herewith; for listings of all applications to date, see *TV Factbook No. 12* with Addenda to date.]

Terms of ASCAP per-program licenses may have to be decided in detail by court. That's best industry opinion, following appointment last week of ex-Federal Judge Simon H. Rifkind as special counsel for all-industry music committee, and its call for contributions from all TV stations. According to best sources, if ASCAP remains adamant, New York Federal district court can set terms, under provisions of recent anti-trust decision against ASCAP. Judge Rifkind represents Emerson Radio in current color TV case.

PRIME promoter of TV, nevertheless NBC was quick to counter ANA's report on TV's impact on radio listening (Vol. 7:11)—making public this week its elaborate presentation titled "Forecast for Fall 1951" shown recently at affiliates meetings around country.

Theme of NBC study is that network radio is "greatest channel of communication to buying public"—flexible, mature, proved, not threatened by materials shortages such as face TV and publications. For October 1951, NBC foresees:

(a) TV in 14,500,000 homes—3 out of 10—but radio in 9 out of 10 as against *Saturday Evening Post* in one out of 10, *This Week* in 2 out of 10.

(b) Radio will cost $1.03 per 1000 listeners for network night half-hour, as against TV's $2 per 1000, *Life Magazine's* black-and-white page $3.55 per 1000, same in *Saturday Evening Post* $3.06, in *This Week* $2.53. Network radio will deliver 8,600,000 people for $19,484, newspapers same number for $38,530.

That's NBC's current pitch, while other trade spokesmen attacked ANA study on premise that: (1) It doesn't give radio credit for out-of-home listening, second set listening, radio listening in TV homes. (2) It doesn't show what TV does to newspapers, magazines, billboards, other media.

Meanwhile, new battle royal for AM network business seems to be shaping up—pointed up by ABC's offer to 5 NBC afternoon radio sponsors to move their 13 soap operas over to that network. Bait held out is said to be 45% discount on time charges, $1000 per week contribution toward production costs.

Pittsburgh fares none too well in allocation plan, having one vhf station on air, one channel reserved for education, only one left for commercial use—plus allotment of 2 uhf (see TV Allocation Report). But Comr. Hennock reports that city's Mayor David L. Lawrence, who is a power in Pennsylvania Democratic politics, had wired congratulations to her and stated he would urge support of her campaign for educational channels by U. S. Conference of Mayors, of which he is president. In contrast, officials of 5 Lehigh Valley colleges and number of high schools met in Easton, Pa. recently to campaign for a commercial vhf channel in area. Group doesn't intend to become licensee, but wants to present a "TV University" over commercial station. Group was headed by Dr. Levering Tyson, ex-NBC, now president of Muhlenberg College.

FCC observers of Skiatron system of coded-card subscription-TV had "no comment" on what they saw on junket March 20 to witness demonstration. At WOR-TV transmitter they saw closed-circuit demonstration, and at Skiatron New York shop they saw off-air reception. Attending were Comrs. Coy, Hennock, Hyde, Jones, Sterling, Webster, staffers Cottone, Plotkin, Braum, Allen. Only other pay-as-you look system, Phonevision, is nearing end of its FCC-authorized tests due March 31, hasn't yet indicated next step.

New Orleans will be interconnected by middle of 1952. AT&T this week announced start next July of $6,000,000 coaxial cable installation from Jackson, Miss. Circuit from Memphis to Jackson and then over to Birmingham is scheduled for completion late in 1951 (see map in *TV Factbook No. 12*). AT&T also reported that Charlotte-Atlanta microwave relay, scheduled for completion late this year, has been postponed to early 1952.

National Assn. of Broadcasting Engineers & Technicians (NABET), heretofore independent, has voted to join CIO. NABET Chicago headquarters says its 3000 members have contracts with ABC, NBC and about 80 radio and TV stations.

Proposed VHF-UHF Rules, Standards & Allocations

with

Table of TV Channel Assignments to States and Cities

(In United States & Possessions, Canada and Mexico)

Full Text of FCC Report 51-244 issued March 22, 1951 (Adopted March 21)

As Basis for hearing scheduled before Commission en banc, May 23, 1951

WITH FULL TEXTS OF SEPARATE OPINIONS OF COMRS. COY, HENNOCK, WEBSTER, JONES AND STERLING

This supersedes FCC Report 49-948 adopted July 8, 1949, published by *Television Digest* as Supplement No. 64

In the Matters of

Amendment of Section 3.606 of the Commission's Rules and Regulations.	Docket No. 8736 and 8975
Amendment of the Commission's Rules, Regulations and Engineering Standards Concerning the Television Broadcast Service.	Docket No. 9175
Utilization of Frequencies in the Band 470 to 890 Mcs. for Television Broadcasting.	Docket No. 8976

Third Notice of Further Proposed Rule Making

1. Notice is hereby given of further proposed rule making in the above-entitled matters. For purposes of identification the proceedings to be conducted pursuant to this Notice shall be designated as "Part III". The proceedings heretofore conducted pursuant to the "Notice of Further Proposed Rule Making" (FCC 49-948) issued by the Commission on July 11, 1949, have been designated as "Part II". The proceedings heretofore conducted pursuant to the "Notice of Proposed Rule Making" (48-1569) issued by the Commission on May 6, 1948, have been designated as "Part I".

2. "Appendix A" of the Commission's Notice of July 11, 1949 (FCC 49-948) is revised to the extent set forth in "Appendix A" attached hereto. "Appendix B" of said Notice is revised to the extent set forth in "Appendix B" attached hereto.* Appendices C and D of said Notice are withdrawn and new Appendices C & D are attached hereto.

3. In view of the withdrawal of the proposals set forth in Appendices C and D of the Commission's Notice of July 11, 1949 (FCC 49-948) all comments, counterproposals and oppositions filed by interested parties with respect to said proposals are rendered moot and will not be considered further in these proceedings. All petitions heretofore filed with the Commission requesting leave to file late appearances, comments and engineering statements with respect to the Commission's proposals in Appendices C and D of the Commission's Notice of July 11, 1949 (FCC 49-948) are likewise rendered moot. Interested parties may hereafter participate in the proceedings initiated by this Notice only by complying with the procedures set forth herein.

4. The Commission proposes to amend Parts 2 and 3 of its Rules and Regulations, and its "Standards of Good Engineering Practice Concerning Television Broadcast Stations" as set forth in Appendices A, B, C, and D attached hereto.

5. It is evident that an understanding must be reached between the United States of America and Canada and Mexico with respect to the assignment of television channels along their mutual borders. Such an understanding is necessary in order to prevent undue interference between television stations in the respective countries and in order to provide a fair, efficient and equitable assignment of television channels between the United States and the above countries. Accordingly, in Appendix D herein the Commission has included certain assignments for Canada and Mexico which might be allocated on the same basis as the overall proposal if the borders between the countries did not exist.

6. As indicated above, the assignments set forth in Appendix D of the above Notice were included in the proposal only for illustrative purposes and to show the effect on the above "Table" of a reasonable number of assignments to Canada and Mexico. A series of conferences have been held with representatives of the Government of Mexico and the Dominion of Canada relating to the allocation of television channels along the United States-Mexican and the United States-Canadian borders. No formal agreements have been entered into but views are being exchanged with respect to these matters and it is expected that satisfactory understandings will be reached.

7. In preparing the "Table" of television channel allocations set forth in Appendix C attached hereto, the Commission proposes to alter existing television authorizations in 31 instances. The alterations with respect to Channel 9 in the city of Cleveland, Ohio, Channel 5 in the city of Syracuse, New York, and Channel 6 in the city of Rochester, New York, resulted from the Commission's efforts to arrive at an equitable distribution of television channels between the United States and the Dominion of Canada. The remaining 28 channel substitutions resulted from the Commission's efforts to reduce interference, make available a reasonable number of channels and to effect the maximum utilization of VHF television channels in the United States. The changes proposed by the Commission with respect to these 31 stations are set forth in the following paragraph.

8. The changes which the Commission proposes to make with respect to existing authorizations are set forth in the following table [see p. 2] which contains the name of the licensee or permittee who presently holds a grant of television facilities, the city in which such facilities are located, the channel presently assigned to the licensee or permittee, and the channel which the Commission proposes to substitute for the existing channel.

* New Appendices A and B are self-contained documents and replace old Appendices A and B [See *Television Digest* Supplement No. 64, July 11, 1949] in their entirety.

PROPOSED CHANNEL SHIFTS OF EXISTING STATIONS

Licensee or Permitee	City Affected	Present Channel Assignment	Proposed Channel Assignment
(a) Iowa State College of Agriculture and Mechanical Arts (WOI-TV)	Ames, Ia.	4	5
(b) Atlanta Newspapers, Inc. (WSB-TV)	Atlanta, Ga.	8	11
(c) Birmingham Broadcasting Co. Inc. (WBRC-TV)	Birmingham, Ala.	4	6
(d) Sarkes Tarzian Inc. (WTTV)	Bloomington, Ind.	10	4
(e) Balaban & Katz Corp. (WBKB)	Chicago, Ill.	4	2
(f) Crosley Broadcasting Corp. (WLWT)	Cincinnati, O.	4	5
(g) Radio Cincinnati Inc (WKRC-TV)	Cincinnati, O.	11	12
(h) Scripps-Howard Radio Inc. (WCPO-TV)	Cincinnati, O.	7	9
(i) Empire Coil Company Inc. (WXEL)	Cleveland, O.	9	8
(j) National Broadcasting Co. Inc. (WNBK)	Cleveland, O.	4	3
(k) Crosley Broadcasting Corp. (WLWC)	Columbus, O.	3	4
(l) Crosley Broadcasting Corp. (WLWD)	Dayton, O.	5	2
(m) Miami Valley Broadcasting Corp. (WHIO-TV)	Dayton, O	13	7
(n) Central Broadcasting Co. (WOC-TV)	Davenport, Ia.	5	6
(o) Leonard A. Versluis (WLAV-TV)	Grand Rapids, Mich.	7	8
(p) WSAZ Inc. (WSAZ-TV)	Huntington, W. Va.	5	8
(q) WJAC Inc. (WJAC-TV)	Johnstown, Pa.	13	6
(r) WGAL Inc. (WGAL-TV)	Lancaster, Pa.	4	8
(s) WAVE Inc. (WAVE-TV)	Louisville, Ky.	5	3
(t) WHAS Inc. (WHAS-TV)	Louisville, Ky.	9	11
(u) Memphis Publishing Co. (WMCT)	Memphis, Tenn.	4	5
(v) The Journal Co. (WTMJ-TV)	Milwaukee, Wis.	3	4
(w) The Elm City Broadcasting Corp. (WNHC-TV)	New Haven, Conn.	6	8
(x) WTAR Radio Corp. (WTAR-TV)	Norfolk, Va.	4	10
(y) WKY Radiophone Co. (WKY-TV)	Oklahoma City, Okla.	4	7
(z) Allen B. DuMont Laboratories Inc. (WDTV)	Pittsburgh, Pa.	3	2
(aa) The Outlet Co. (WJAR-TV)	Providence, R. I.	11	10
(bb) Stromberg-Carlson Co. (WHAM-TV)	Rochester, N. Y.	6	5
(cc) General Electric Co. (WRGB)	Schenectady, N. Y.	4	6
(dd) Central New York Broadcasting Corp. (WSYR-TV)	Syracuse, N. Y.	5	3
(ee) WDEL Inc. (WDEL-TV)	Wilmington, Del.	7	12

9. Should the proposals set forth in attached "Appendix C" be adopted by the Commission, in whole or in part, it is hereby proposed to modify the licenses and construction permits held by the licensees and permittees listed in paragraph "8" above so as to substitute in their respective authorizations the proposed channels in place of their present existing assignments as set forth in Paragraph "8" above. In the light of the information set forth in paragraphs "5", "6" and "7" herein, it is the judgment of the Commission that its actions will result in a better utilization of television channels in the United States, Mexico and the Dominion of Canada by increasing the service area of the stations already on the channels in question and reducing the interference which would be caused to new stations that will be added to the channels in question; will promote the public interest, convenience and necessity; and will more fully and completely carry out the provisions of the Communications Act of 1934, as amended. Accordingly, pursuant to the provisions of Sections 303(f) and 312(b) of the Communications Act of 1934, as amended, the licensees and permittees listed in paragraph "8" above are directed to *show cause* in these proceedings and in accordance with the procedures hereinafter set forth why their licenses and permits should not be modified as set forth in paragraph "8" above in the event the Commission deletes from their respective cities the channels listed under the heading "Present Channel Assignment" and substitutes therefor the channels listed under the heading "Proposed Channel Assignment".

10. The most important single factor which induced the issuance by the Commission of its "freeze" order of September 30, 1948, was the desire to ascertain whether sufficient mileage spacing had been provided between assignments set forth in its Table. On the basis of the data contained in the record of this proceeding the Commission is proposing the separations specified in the attached Appendix A. In the light of these separations the Commission proposes to take the following actions upon the expiration of the time specified in paragraph 12 herein for the filing of comments and oppositions thereto:

(a) The Commission will determine whether any issue has been raised which would prevent the lifting of the "freeze" with respect to channel assignments in Alaska, Hawaiian Islands, Puerto Rico and Virgin Islands. These Territories are sufficiently removed from the continental United States so as not to be involved in the separations problems of continental United States and present no assignment problem with any neighboring countries. Separations have been maintained within the Territories which are in accordance with the Commission's proposals in Appendix A. Accordingly, in the absence of any issue with respect to these separations, the Commission proposes to lift the "freeze" with respect to the above Territories without waiting to reach a final determination on all the assignments proposed in Appendix C.

(b) The Commission will determine whether any issue has been raised with respect to the Commission's proposed assignments in the UHF band. In the absence of such issue, and where serious procedural or practical objections do not exist, the Commission will consider lifting the "freeze" on applications which specifically request a UHF channel.

(c) The Commission will determine whether any issue has been raised with respect to applications by existing

television licensees and permittees to increase power in accordance with the proposals set forth in Appendix A. In the absence of such issue the Commission will consider lifting the "freeze" so far as existing stations are concerned on a case-to-case basis where it appears that a grant of increased power not in excess of the maximum specified in Appendix A will not affect channel assignment proposals offered by the Commission or by interested parties and will not unduly restrict the Commission's flexibility in reaching final determinations with respect to assignments still in issue.

(d) Should the Commission take action in accordance with the views expressed in sub-paragraphs (a), (b), and (c) above, a reasonable period will be provided for the filing of appropriate applications.

11. Based on the record compiled in these proceedings, attached Appendices A and B reflect changes in the Commission's proposals from those set forth in Appendices A and B of July 11, 1949. As indicated in paragraphs "12" and "13" which follow, the hearing scheduled herein will be limited to proposals relating to Appendices C and D. Accordingly, persons who are of the opinion that the record does not substantiate the proposals set forth in attached Appendices A and B may file statements setting forth their objections not later than April 23, 1951. Such objections shall state with particularity the specific proposal to which objection is made and the volume and page number of the transcript or exhibits containing the evidence on which their objection is based.

12. (a) On or before April 23, 1951, any interested person who is of the opinion that the proposals herein with respect to Appendices C and D should not be adopted, or should not be adopted in the form set forth herein, may file with the Commission written comments (including data, views or arguments) concerning said proposals. Interested persons favoring the proposals herein may file such written comments in support thereof. All written comments must be clear and specific as to the proposals made therein *and must be accompanied by supporting engineering statements.* Comments not accompanied by engineering statements and engineering statements which are not accompanied by comments of the interested parties will not be accepted. No comments or statements will be accepted after April 23, 1951, unless a later date is provided by Commission Order.

(b) On or before May 8, 1951, interested persons desiring to submit written comments (including data, views or arguments) in opposition to comments or counterproposals filed with respect to the Commission's proposals herein may file such opposing comments which *must be accompanied by supporting engineering statements.* Oppositions to counterprosals will not be accepted by the Commission if they advance new proposals nor will they be accepted after May 8, 1951, unless a later date is provided by Commission Order.

(c) Comments which merely *support* the comments, counterproposals or oppositions previously filed by other interested parties pursuant to this notice will not be accepted.

(d) Comments and statements directed toward specific assignments in the Commission's proposed "Table" in Appendix C herein shall show not only the effect which the proposals in said comments and statements will have on the service in the particular communities involved but also the overall effect thereof with specific reference to the priorities set forth in paragraph "II" of Appendix A herein.

(e) A copy of this Notice will be mailed to counsel for each party who appeared in Part II of the proceedings in the above-entitled matters, or to the party directly if not represented by counsel. All future notices mailed herein by the Commission will be sent only to persons who have filed comments, statements or oppositions pursuant to this paragraph. The notices will be sent to the attorney, except where a party is not represented by counsel. In such event, notices will be sent to the party. The name and post office address of each party and his attorney shall be set forth clearly on each comment filed as provided above.

(f) *An original and 14 copies* of all written comments and statements shall be filed with the Commission, as required by Section 1.764 of the Commission's Rules and Regulations.

13. (a) Notice is hereby given that a hearing will be held in the above-entitled matters before the Commission *en banc* commencing on May 23, 1951, at 10:00 a.m. in Washington, D. C. (at a place to be designated by subsequent notice of the Commission) for the purpose of hearing testimony and receiving evidence regarding the Commission's proposals in Appendices C and D herein, and such other proposals as are duly and timely filed by interested persons with respect to Appendices C and D. Any interested person who has filed written comments with respect to Appendices C and D in accordance with the provisions of paragraph "12" herein may participate in said hearing.

(b) Persons who have failed to file timely written comments or statements as required by paragraph "12" herein will not be permitted to adduce testimony or to offer any exhibits in evidence at the hearing, nor will such persons be permitted to cross-examine any of the witnesses appearing at the hearing.

(c) In view of the comprehensive nature of the proceedings herein and the desirability of concluding the hearing as soon as possible, it is requested that parties incorporate as much evidence as is practicable in the exhibits which they plan to submit. In this connection participants will be required to submit at the hearing at least 20 copies of each proposed exhibit to the Commission. In addition, participants should plan, if possible, to have available at the hearing, 100 additional copies of each exhibit for distribution to interested persons. Each exhibit should contain on the face thereof the docket numbers of the instant proceeding which may be abbreviated as follows: "Docket 8736 et al."

(d) In appropriate instances the Commission will permit participants at the hearing to incorporate by reference portions of the records of prior rule-making hearings provided that notice of intention to make such offer at the hearing is set forth in the written comments filed by the offering party and that the docket number and transcript pages are specifically identified in said written comments. Parties *may not* incorporate by reference any comments or statements heretofore filed pursuant to the Commission's "Notice of Proposed Rule Making" (FCC 48-1569) issued May 6, 1948, or to the Commission's "Notice of Further Proposed Rule Making" (FCC 49-948) issued July 11, 1949.

14. Following the closing of the record, the Commission upon consideration of all proposals, counterproposals, and evidence in this proceeding will adopt such rules, regulations and standards, as will best serve the public interest, convenience or necessity.

15. Except where other provisions are made by the Commission pursuant to paragraph "10" herein, persons who are contemplating filing applications for new television broadcast stations, or filing amendments to pending applications for new television broadcast stations, are requested to postpone the filing of such applications or amendments pending a final determination on the rules, standards and assignments proposed in this proceeding. Upon the issuance of final rules, standards and assignments in this proceeding, the Commission will issue an announcement providing a reasonable period of time during which new applications may be filed and pending applications may be amended, in conformity with the new rules, standards and assignments. Applications are requested to comply with this paragraph in order to eliminate unnecessary administrative effort and to save themselves the possibly needless expense of preparing and filing applications and amendments which may not be in conformity with the rules, standards and assignments as finally adopted.

16. Authority to issue the proposals herein is vested in the Commission by Sections 4(i), 301, 303(b), (c), (d), (e), (f), (g), (h), (r), and 307(b) of the Communications Act of 1934, as amended.

ADDITIONAL VIEWS OF COMMISSIONER COY

I AGREE with the action of the Commission in adopting the Third Notice of Further Proposed Rule Making together with Appendices A through D attached thereto. I desire, however, to express additional views with respect to Paragraph VI of Appendix A and that portion of Appendix C which relates to the reservation of specified VHF and UHF television channels for non-commercial educational television stations.

It seems unnecessary for anyone to point to his belief that television has great potentialities in the field of education. I think there is universal awareness with respect to this fact. There is, however, a startling lack of data concerning the willingness and readiness of educational institutions—their boards of trustees, administrative officials and faculties—to use television as an educational tool. The funds required to build and operate a non-commercial television station are not inconsequential. In the light of other needs of higher educational institutions—new facilities, improved salary schedule for faculty personnel, retirement programs, etc.—it is understandable that such a decision is not easily taken. The continuing cost of operations without any income is perhaps a more difficult hurdle than the funds required to build the transmitter and studios.

Television frequencies constitute an important and large part of a great national resource, the radio spectrum. It is essential that such a resource be utilized in the public interest. It certainly cannot be regarded as being in the public interest if television frequencies, now proposed to be reserved by the Federal Communications Commission, are not utilized within the reasonably near future. What is the reasonably near future with respect to this problem? It is my opinion that the reasonably near future is the time required for educational institutions to make up their minds as to whether or not they will utilize television in their educational program and in so doing decide to become an operator or a joint operator of a non-commercial educational television station. Governors of the various states, state legislatures, boards of trustees, administrative officers and faculties are all involved in this decision making. Certainly the participation of state-supported schools in this proposal to use television as a part of their educational program requires decision by state legislatures which may not meet until approximately two years from now. It certainly would be unreasonable to attempt to force decisions in such cases without allowing sufficient time for state legislatures to meet and consider the problem. Indeed, because of the magnitude of the problem more than one session of a state legislature might be required for this problem. But it does not seem unreasonable to expect boards of trustees and administrative officials of educational institutions to declare their intentions at an early date, subject to action by state legislatures.

I am of the opinion that if the proposed reservation is made final it is important for the Commission to emphasize that the reservation of channels for educational stations in no way relieves the licensees of commercial television stations of any responsibility to render a well rounded program service, including a reasonable proportion of time devoted to programs that meet the educational needs of the community. Perhaps many educational institutions will decide to use television in cooperation with commercial broadcasters rather than as operators or joint operators of a non-commercial educational station.

I believe that there are television broadcasters now operating stations in this country who are beginning to make substantial contributions in the field of meeting the educational needs of their community. In some of those cases those needs are being met upon the initiative of the television broadcaster in seeking out the cooperation of educational institutions. I realize that many of these programs are not in choice viewing hours when a large audience is available. In this connection, commercial stations already make provisions for periodic interruptions in a series of commercial programs in order to provide for the seasonal needs of the sponsor or to provide time for the program of another sponsor. There is no reason why commercial stations cannot utilize the same technique in interrupting a series of commercial programs to make way on a regular basis for a series of educational programs. For example, if arrangements can be made for Jack Benny and Bob Hope to present their television shows *in choice viewing hours* normally occupied by other talent, it would seem easy to make arrangements for educational programs to be substituted for commercial programs in choice viewing hours, thus giving such programs wide circulation and greatly increasing their effectiveness.

I do not want anyone to think that I am satisfied that commercial television stations are now meeting or in the future can meet all of the educational needs of the people of this country. However, I do know that they can do much along this line and it is my belief that they will do more in this field under the impact of competition from educational television stations than they would do without such competition. But that competition will not be a reality merely by reserving channels for educational stations. It can only become a reality if there is a clear and immediate response on the part of the educational institutions of the country indicating that they intend to utilize television in the educational process.

I am concurring in the action of the Commission in the proposed reservation of VHF and UHF channels for educational stations as set forth in Appendix C with the hope that the evidence in the ensuing proceedings will give the Commission further and more certain information than it now has as to what we may expect with respect to the utilization of the frequencies proposed to be reserved for educational stations.

SEPARATE VIEWS OF COMMISSIONER HENNOCK

I

THE Commission, in its proposed allocation plan, recognizes and adopts the principle of reserving television channels for non-commercial educational use. I believe, however, that the reservation provided for by the Commission is inadequate and ineffective in many vital respects and certainly not a sufficient recognition of the need and merit of educational television.

The Commission's proposal, by failing to give the schools a sufficient share of the remaining television spectrum, will adversely affect the course of education in the United States for generations to come.

Television, the most dynamic and effective means of mass communication that modern science has devised, enables the educator to reach into millions of American schools and homes. By now everyone has come to recognize the revolutionary changes that visual education has brought about in teaching methods. Television is uniquely qualified to utilize and spread the benefits of this modern and efficient method of education at a minimum cost. As the educators' tool, television can bring about as great an expansion and revitalization of education as did the development of printing in the early days of the Renaissance.

Our daily experience furnishes the evidence of television's amazing growth, as well as its extraordinary impact upon the minds, habits and lives of all Americans, particularly upon children and youths. Anyone who has observed a young child sitting captivated before a television receiver needs no further proof of this fact. For this reason, the Commission has a special responsibility to insure that these children, as well as adult listeners, have full access to the best in education and culture, in addition to the general fare offered by commercial broadcasters. In the hands of the educator, television can become an unparalleled instrument for developing and spreading knowledge and enlightenment—the foundations of a strong and free America.

An adequate home in the television spectrum must there-

fore be provided by this Commission for education. Without sufficient television channels at their disposal, schools and educators in all parts of our country will not be able to take full advantage of the unprecedented opportunity which television offers them. Inadequate provision for educational television primarily penalizes, not the educators, but rather the American people, who own these airwaves.

The Commission now proposes to allocate and open up for licensing all of the remaining frequencies that are available for telecasting, and, as far as we know, all that will ever be available. Provision for educational television and adequate recognition of its needs must therefore be made now or never. The reservoir of television channels is virtually being exhausted by this allocation and, for all practical purposes, future provision for educational-television channels is now being foreclosed.

In view of these facts, the Commission is particularly obligated to bear in mind the future needs and demands of the country as well as those apparent at the present time. We must think here not in terms of months or years, but of generations. We must not permit ourselves to be unduly swayed by the entreaties of those whose interest is the immediate commercial use of the medium. Foresight as to the television service of the future allows these present demands to be weighed in proper balance.

The uniquely valuable services that the educator is willing to offer on a non-commercial basis should not be lost to the American people. The Commission's duty, laid upon it by Congress, to encourage the larger and more effective use of television in the public interest, appears almost specially designed to fit the particular problems presented by educational television. The true test of a technological innovation lies in the ultimate uses to which it is put for the public benefit. I firmly believe that without full provision for education, the electronic marvel of television will not gain the respected place on the American scene and throughout the world that it should hold.

II

As I have already stated, the Commission has recognized the principle of reserving channels for educational television, but has made inadequate provision for it. We ought not, while conceding the principle of educational television, kill it in practice. Mere recognition of a principle will not of itself produce practical results. Adequate means must be supplied to properly effectuate the broad policy adopted.

I recognize that the Commission's action is in the form of a proposal and I hope that the inadequacies within it will be remedied before the action is made final. To do so, I would extend the reservation of channels for educational purposes to eliminate the following defects of the proposed plan:

The Commission's proposal does not provide suffieient channels for a nation-wide system—a minimum requirement for adequate use of television by educators.

At the outset I should like to make clear that I fully support the principle that the television spectrum in the main should be devoted to use by commercial broadcasters, in accordance with the traditional concepts of American broadcasting. Commercial broadcasters serve a very important function which non-commercial broadcasting cannot fulfill. With full respect for the scarcity of available frequencies and the acknowledged needs of commercial operations, I firmly believe that the Commission has struck an imbalance of the various interests here involved and has not provided education with the proportionate share of the channels it deserves.

The Commission, in reserving approximately 10% of the total assignments in the 48 states, has failed to provide facilities for education in a large number of cities of substantial size. Thus, there is no frequency reserved in more than one-fourth of the 168 standard metropolitan areas in the United States, although these cities range from Pittsfield, Massachusetts, with a population of 65,000, to Youngstown, Ohio, with a population of 525,000. The absence of a reservation is particularly serious in those cities where important colleges and universities and successful educational broadcasters are located. These include Lansing, Michigan (the home of Michigan State College), Lexington, Kentucky (the home of the University of Kentucky), and Springfield, Massachusetts (the home of Smith, Mt. Holyoke and the University of Massachusetts).*

The basis for the Commission's action in failing to reserve one frequency for education in the many cities where two frequencies have been assigned, can only be that such reservation would leave but one commercial station in that city and thus encourage a potential monopoly. This basis is inadequate in light of the record and the public policies here involved.

The total exclusion of educators from television and the resultant loss to these communities is too high a price to pay for the encouragement of competition between the two commercial stations in a two-channel city. These two stations, on the basis of our experience in radio as well as television, will to a large extent broadcast the same general type of programs, with too little recognition or attention to the needs of education on the air. Certainly, cultural monopoly of this kind is as much, if not more, to be abhorred than economic monopoly. As guardian of the public's airwaves and entrusted with their regulation in the public interest, the Commission should be no less concerned about cultural monopoly than about its commercial counterpart. Educational and non-commercial television, insofar as this Committee can provide, should be made readily available to every community in the United States.

The Commission's proposal in many of our largest cities, such as New York, Los Angeles, Philadelphia, Washington, Detroit, Cleveland and others, confines the reservation for education to the ultra high frequency (UHF) band, and makes no provision for educational broadcasting in the very high frequency (VHF) band now in use.

It is common knowledge that some of our greatest educational needs are to be found in these giant metropolitan centers. It is equally obvious that educational television can be most effectively used in such metropolitan areas where one station can serve from 300,000 to a million school children as well as a total population of from one to eleven million people. Furthermore, in these cities, there are available the most ample educational resources, such as funds, program material and large numbers of educational institutions and civic and community organization able to cooperate in the building and operation of educational-TV stations.

To restrict education in these cities solely to an outlet in UHF is to place it at a fundamental disadvantage, cut sharply into its potential effectiveness and add an unusually heavy burden to those already carried by the local educators. Up to now, UHF operations have been completely experimental, and we have no assurance as to when UHF equipment will be available and UHF stations in operation. In each of these cities, however, there are at least three or more VHF stations already in operation; in addition, a large proportion, if not a majority, of the families there already own VHF receivers that cannot without extensive conversion, receive telecasts in UHF. For example, there are already over two and one-quarter million VHF sets in the New York metropolitan area that will be lost to education on UHF, unless additional tuners and antennas are added to them. In these circumstances, the Commission quite properly indicates concern that even commercial interests in UHF will be required to face substantial economic problems beyond those ordinarily faced by a VHF operation. How then can the Commission, consonant with the practical realities of the situation, force educators in these localities to carry the additional burden of UHF operations, which they clearly are ill-equipped to do?

In such circumstances, it is extremely unwise for the

* In addition, there are other omissions in the Commission's proposed reservation. For example, the state of New Jersey, with its large cities, with its millions of residents plus its many fine educational institutions, has not been given a single channel for education. Still another example is Stillwater, Oklahoma, the home of Oklahoma A&M, a college which has an outstanding broadcasting record.

Commission to fail to make some provision for education on VHF in these "closed cities." The same is true, for reasons stated above, in those cities with less than three TV assignments for which no reservation at all has been made. In both situations, the effect of the Commission's action may very well be to forever deprive the people of educational television.

The record is replete with evidence as to the need for educational television in the "closed cities" and with solutions offered to meet this obvious problem. Yet despite such evidence, and its own recognition of the public policy requiring a reservation, the Commission completely ignores this question—makes no mention of it, nor any attempt to meet and solve it. No one can be unaware of the substantial difficulties involved in this problem, but I cannot believe them to be, with attention and effort, incapable of solution.

The Commission improperly provides that it will review the general situation of the reservation "from time to time . . ."

I believe, however, that the reservation of television channels should be stated unconditionally without any suggestion at all of a possible time limitation. There is no question that the Commission may review its action to determine if adequate use, in the circumstances, is being made of reserved facilities. It is equally true that the Commission may review *any* of its prior actions, including this very allocation plan in full; but while it makes no express reference to this power elsewhere in its decision, it singles out educational reservations as a subject for further scrutiny. For the Commission to expressly state the intention to review the educational reservations as a basic condition of its action, gives the reservation the flavor of being temporary as well as invites pressures on educators, as well as on the Commission, which would make the reservation a short-lived and abortive policy.

In view of the practical dynamics of the broadcasting industry, the Commission's attachment of an implied time limitation to the reservation is not a complete fulfillment of its statutory obligations. I do not suggest that the Commission will be lax in its responsibility to afford education a full opportunity to use the reserved channels. I hope, however, that the Commission's disposition to give the reservation a temporary character does not indicate a basic attitude of disbelief and distrust towards education. Education must not be given the giblets of the television turkey.

III

The Commission now faces the same problem which was presented to it in 1935 with respect to the reservation of standard broadcast radio facilities for educational and other non-profit institutions. The Commission, pursuant to a Congressional directive, held a hearing after which it recommended to the Congress that there was no need for Congressional action to reserve radio frequences for such purposes.

It should be noted that the Commission's recommendation was based upon the expectation that Commercial broadcasters, "under the direction and supervision of the Commission," would cooperate with educators and make facilities available to them for service to the public. Yet, it is well known that the Federal Radio Education Committee, which was set up soon afterwards to effectuate the Commission's purpose, was, whatever its good intentions, largely unable to achieve the hoped-for objectives concerning educational broadcasting. Its effectiveness ceased long before it became moribund, which, as evidence of the untenableness of the entire arrangement, was due to the withdrawal of its financial support by commercial broadcasters.

The Commission, in its 1935 Report to Congress, went on to say:

"The Commission feels, in particular, that broadcasting has a much more important part in the educational program of the country than has yet been found for it. We expect actively to assist in the determination of the rightful place of broadcasting in education and to see that it is used in that place."

The slightest familiarity with the history of radio since that time makes clear the error of setting up committees for cooperation instead of providing the necessary channels for education. It establishes beyond question that education requires its own broadcasting facilities and that it cannot, with any assurance of success, be left solely to the bounty of commercial operations.

It is to this Commission's credit that it makes provision for education on television and does not repeat the grievous error of 1935. Yet, I am forced to conclude that the Commission is again selling education short in its current allocations plan, and I believe that the future will similarly prove it short-sighted in its failure to provide sufficient channels for a nation-wide system of educational TV.

In a democracy such as ours, particularly one in crisis, there is nothing deserving of higher priority than education, nothing more important than a full understanding of the processes that nourish and sustain our form of government. Knowledge made men free; more and greater knowledge is needed to keep them free.

This Commission today holds the power of insuring that our newest and most powerful mass medium—television—is placed at the service of our educators to provide a future America with a modern and effective educational system. Television has brought to broadcasting the wonderful gift of sight—we must have the vision to make full and proper use of it.

OPINION OF COMMISSIONER WEBSTER, DISSENTING IN PART:

I do not agree that on the basis of the record so far made a reservation of channels for non-commercial educational purposes should be made. In my opinion, such a reservation is warranted only if a specific showing is made that there is a reasonable probability that if an educational channel is reserved it will be utilized in the reasonably near future. As I understand the action of the Commission, such a showing can be made on a community-to-community basis in the hearing which is being held with respect to specific assignments contained in Appendix C. If a sufficient showing is made in such hearing, I would be in favor of making reservations for educational institutions in those communities as to which such a showing is made.

OPINION OF COMMISSIONER JONES, DISSENTING IN PART:

COMMISSIONER Jones, for the reasons set forth in his dissenting opinion in the Matter of Yankee Network, Inc. (F.C.C. 48-631, decided March 22, 1948), dissents from paragraphs II-B-2 and II-B-3 of Appendix A which require rule-making proceedings in order to make changes in said Table.

OPINION OF COMMISSIONER STERLING, DISSENTING IN PART:

I concur in the action of the Commission in reserving channels for non-commercial educational television stations in the UHF band, subject to review from time to time as to their demand and utilization. I doubt the wisdom of making a reservation of VHF channels for non-commercial educational television stations except in the territories and island possessions where VHF channels are in ample supply.

The representatives of educational institutions have requested a reservation of channels until such time as they can obtain funds to proceed to establish a station, whereas industry is prepared immediately to build stations in the VHF band and a limited amount of transmitting equipment is available and receivers for this band at this time are not in short supply. It would seem to me that it is in the public interest to make available the greatest number of VHF channels at the earliest date possible so

as to provide increased competition in several markets and make available service to the public in those areas of the country that have been denied a television service because of the color issue and the "freeze".

It should be noted that our decision makes all channels available on a competitive basis to both industry and educators on a commercial basis. If an educational institution desires to compete for a VHF channel in a given city it is free to do so and if successful could program its station as other educational institutions are doing both in aural and television broadcasting. The TV station operated by WOI-TV (Iowa State) in Des Moines is a good example of the latter. If the pattern, now being set by several television licensees, is followed by others, including new stations, time will be made available on VHF channels to schools and colleges as a public service.

Appendix A—Allocations Philosophy

Proposals to Amend Rules, Regulations and Standards

THE Commission proposes to amend its Rules and Regulations, and Standards of Good Engineering Practice Concerning Television Broadcast Stations so as to effectuate the following proposals:

I. NUMBER OF CHANNELS

A. Distribution

In addition to the twelve VHF six-megacycle channels (numbered 2 through 13) presently assigned for television broadcasting, the Commission proposes to add 65 or 70[1] UHF 6-megacycle channels:

Channels in Group	*Frequency Range*[1]	*Channel Numbers*	*Assignment*
12	54-216 Mc.	2 through 13	Commercial, or non-commercial educational television.
52	470-782 or 500-812 Mc.	14 through 65	
13 or 18	782 or 812-890 Mc.	66 through 78 or 83	Flexibility channels.[2]

B. Utilization of Entire UHF Band

In its Notice of Further Proposed Rule Making issued on July 11, 1949, the Commission proposed to assign forty-two 6 megacycle channels (14 through 55) in the lower portion of the UHF band for commercial television broadcasting. The Commission proposed to assign 32 of the above UHF channels for use by metropolitan stations and the remaining 10 channels for use by community stations. During the hearings conducted by the Commission with respect to the General Issues in the pending television proceedings, testimony was presented which favored the allocation of the entire UHF band for commercial television broadcasting. Although some testimony was presented which favored the allocation of a portion of the UHF band at this time pending the acquisition of additional data, greater support was given to the proposal to assign television channels in the entire UHF band for immediate use. It was urged that a need existed for additional commercial television channels; that such an allocation would encourage developments in UHF equipment; and that due to problems not previously considered, i.e., oscillator radiation, intermodulation, image interference, etc., more channels were necessary to provide an adequate number of usable channels. Some testimony was presented to the effect that the allocation of the lower portion of the UHF band was preferable because better coverage and equipment performance could be expected there. On the other hand, there was testimony to the effect that differences would not be appreciable throughout the entire UHF band. In any event, the effect of such differences on the optimum utilization of the band are likely to be small. Accordingly, the Commission has concluded that allocation of the entire UHF band for television broadcasting on a regular basis would result in the maximum utilization of television channels in the United States and would be in the public interest.

[1] The Commission has not yet reached a determination concerning the proposal in these proceedings to allocate the band 470-500 Mc. to multichannel broad band common carrier mobile radio service in lieu of television broadcasting. A Report and Order with respect to this matter will be issued at a later date. If the Commission rejects the proposal, Channel 14 will begin at 470 Mc. and there will be 18 flexibility channels beginning at 782 Mc. If the Commission grants the proposal, Channel 14 will begin at 500 Mc. and there will be 13 flexibility channels, beginning at 812 Mc.

[2] See paragraphs II, A1, IV and V.

C. Intermixture of VHF and UHF Channels

The Commission's proposed Table of July 11, 1949, was based to a considerable degree on the assignment of VHF and UHF channels in the same city. During the hearing on the General Issues, it was urged by some witnesses that the elimination of intermixture would simplify receiver problems and would minimize the broadcasters' competitive problems. It was argued that intermixture would tend to deter the construction of UHF stations and that until a large number of VHF-UHF receivers were distributed, such UHF stations as were constructed would have difficulty in surviving. On the other hand, many witnesses favored intermixture on the ground that it was impracticable to avoid it; that UHF stations would be constructed in cities located within the service areas of VHF stations and television viewers would expect their sets to receive both signals; and that receiver manufacturers would be obliged to build combination VHF-UHF receivers for such areas.

It is reasonable to assume that economic problems will be faced by UHF broadcasters in areas where VHF broadcasting exists. Similar problems confronted the VHF broadcasters prior to increased receiver distribution in their respective areas. It is reasonable to assume that if the entire UHF band is allocated for regular television broadcasting, television receivers will be built to receive VHF and UHF signals. If inter-mixture were avoided, it would be necessary to limit many areas to one or two VHF stations even though UHF assignments were available for those areas and additional stations could be supported financially. Moreover, VHF stations are capable of providing a greater coverage than UHF stations. Hence, a more extensive television service is made available where some VHF assignments are made in as many communities as possible than where only VHF assignments are made in some communities and only UHF assignments are made in the other communities. The Commission has concluded that the adoption of an assignment Table based on non-intermixture constitutes a short-term view of the problem and is inadvisable. Accordingly, the proposed Table attached herein has been prepared on the basis of intermixture of VHF and UHF channels.

II. ASSIGNMENT PRINCIPLES

A. Table of Assignments

1. The television channels available for use in the various communities are set forth in the "Table" in Appendix C.[3] In setting up this table, the Commission has endeavored to meet the two-fold objective set forth in Sections 1 and 307(b) of the Communications Act of 1934, to provide

[3] Persons desiring to file an application for a community which is not listed in the Table and which is not eligible for assignment pursuant to "II B" below, may file an application for one of the flexibility channels or a petition for rule making pursuant to "II B" below. Flexibility channels may not be applied for in any community for which any channel is provided in the Table of Assignments or which is eligible for such an assignment pursuant to "II B" below.

television service, as far as possible, to all people of the United States and to provide a fair, efficient and equitable distribution of television broadcast stations to the several states and communities. The Commission has set forth below the principles, in terms of priority, which form the basis of the Table of Assignments. These priorities are as follows:

Priority No. 1—To provide at least one television service to all parts of the United States.

Priority No. 2—To provide each community with at least one television broadcast station.

Priority No. 3—To provide a choice of at least two television services to all parts of the United States.

Priority No. 4—To provide each community with at least two television broadcast stations.

Priority No. 5—Any channels which remain unassigned under the foregoing priorities will be assigned to the various communities depending on the size of the population of each community, the geographical location of such community, and the number of television services available to such community from television stations located in other communities.

B. Changes in Table

1. A channel assigned to a community in the Commission's Table of Television Assignments shall be available, without the necessity of rule making proceedings, to any other community located within 15 miles of the assigned community provided the minimum separations set forth in paragraphs "E" and "G" herein are maintained.[4]

2. Upon adoption in the instant proceedings of the Table of Asssignments, said Table shall not be subject to amendment on petition for a period of one year from the effective date of the Commission's final order amending said Table. Upon the expiration of said one year period the Commission will consider petitions filed during said period requesting changes in the Table. Thereafter, where the Commission has conducted a rule making proceeding in which it amended or refused to amend said Table, no petition concerning the amendment granted or denied may be filed within one year after the effective date of the Commission's final order amending or refusing to amend said Table.[5]

3. Except as provided for in Paragraphs "II A1" and "II B1" above, no application for a television station in a community specified in the Commission's Table will be accepted for filing if said application requests a channel which is not contained in the Table. Persons desiring to apply for a channel not specified in the Table must first secure an amendment thereof through appropriate rule making proceedings. Petitions proposing changes in the Table must show the extent to which changes conform to the priorities listed in subparagraph "II A1" above, based upon stations operating in accordance with the Table of Assignments and employing the maximum power specified in subparagraph "D2" herein.

C. Grades of Service[6]

In its Notice of Further Proposed Rule Making issued on July 11, 1949, the Commission proposed to classify television broadcast service into three grades of service. In the Commission's opinion, there is no need for more than two grades of service. Grade A service is so specified that a quality acceptable to the median observer is expected to be available for at least 90% of the time at the best 70% of receiver locations at the outer limits of this service. In the case of Grade B service the figures are 90% of the time and 50% of the locations.[7] The field strengths and interference ratios are as follows:

1. Required median field strengths in db above 1 uv/m:

Grade of Service	*Channels 2-6*	*Channels 7-13*	*Channels 14-83*
A	68 db	71 db	74 db
B	47 db	56 db	64 db

2. Permissible co-channel ratios in db of median desired field strengths to 10% undesired field strengths:

Grade of Service	*Channels 2-13*		*Channels 14-83*	
	Non-offset	*Offset*	*Non-offset*	*Offset*
A	51 db	34 db	53 db	36 db
B	45 db	28 db	45 db	28 db

3. Permissible adjacent channel ratios in db of median desired and undesired field strengths:

Grade of Service	*Channels 2-83*
A	0 db
B	0 db

4. a. Prediction of Service Areas and Interference

Methods for describing service areas and interference are set forth in Appendix B. The methods therein described include the propagation of radio waves through the lower atmosphere only. These propagation charts are based on an extensive number of measurements made at various locations over a long period of time. It is recognized that these charts may have to be revised from time to time as more measurements are made, and interested persons are encouraged to make as many measurements as possible and submit them to the Commission. The Commission is satisfied that on the basis of the data presently available to it the data underlying the propagation charts are sufficient to afford an adequate statistical basis for describing field intensities under average conditions, but it is expected that there may be substantial variations in individual areas.

b. Long Distance Skywave Interference

It is also realized that propagation to distances of the order of 500 to 1500 miles via the sporadic E layer and to distances beyond via the F2 layer may occur in certain of the channels. However, since such interference may occur over extremely large distances, it is not possible to protect stations against such interference unless operation on such channels is limited to one or at the best a few stations. In order to provide stations for the various communities, the Commission has determined that the overall public interest is better served by not protecting television broadcast stations against this type of interference.

D. Classes of Stations

The Commission's Notice of Further Proposed Rule Making issued July 11, 1949, provided for three classes of stations, i.e., community, metropolitan and rural stations. During the hearings on the General Issues relatively little comment was offered concerning the proposed classi-

[4] In determining separations between cities for the purpose of this provision, the city mileage separations set forth in the publication of the U. S. Department of Commerce entitled "Airline Distances between Cities in the United States" shall be utilized. Where cities are not listed in the above publication, separations shall be computed on the basis of the distance between the main post offices in the respective cities.

[5] In applying this provision, each area specified in the Table shall be considered separately so that the provision is applicable only if the Commission's action related to an assignment for the area in question. For example, if the Commission denies a petition for rule making requesting that television channel X be removed from City B to City A, no petition for rule making to move a channel from City B to City A will be eligible for filing for one year, even though the request may he to remove Channel Y or Channel Z from City B. However, a petition may be filed before the expiration of one year to remove a channel from City C to City A.

[6] The Commission proposes the use of iso-service contours which express service in terms of the ratio between desired and undesired signal in decibels, or the minimum required signal levels in decibels above one microvolt per meter. This has been done in order to facilitate computation of service and interference field strengths. Likewise, the same terms may be carried over to the output of the transmitter, transmission line loss and antenna gain. This has the advantage of using the same unit throughout the service whether in the transmitting equipment or in the field and has the additional advantage that a decibel of power added at the transmitter results in a decibel of increased field strength. In order to place these matters on a related basis, the decibels with respect to transmitter power and antenna gain as well as field strength must be expressed as decibels with reference to some given level.

Field strength is expressed either in decibels above an undesired signal or decibels above a reference level which has been chosen as one microvolt per meter. A convenient reference level of transmitter power is 1 kilowatt. The propagation charts attached to Appendix B and identified as "Appendix V, Figures 1-4" are based upon the radiation in the equatorial plane of a half wave dipole antenna having an effective radiated power of one kilowatt. Antenna gain is expressed as the ratio in db of the maximum radiation from the antenna to the radiation in the equatorial plane of a half wave dipole with equal power input.

[7] For the specialized case that exists in the case of adjacent channel interference, see Paragraph "II E2" below.

fications. In reviewing this proposal, the Commission has concluded that it is desirable to reduce station classifications to a minimum and that more than one class of station is unnecessary if provision is made for appropriate power ranges for the various sizes of cities and rural areas. Accordingly, only one class of television broadcast station is proposed, with provision for minimum and maximum effective radiated powers in accordance with the respective tables set forth below:

1. **Minimum power**

Population of City (excludes adjacent metropolitan areas)	*Minimum Effective Radiated Power*[8] *(in db above 1 kw)*
1,000,000 & above	17 db[50 kw]/500 ft. ant.
250,000 - 1,000,000	10 db[10 kw]/500 ft.
50,000 - 250,000	3 db[2 kw]/500 ft.
Under 50,000	0 db[1 kw]/300 ft.

2. **Maximum power**

The maximum effective radiated power to be authorized on the respective channels is set forth in the following table:

Channels	*Maximum Effective Radiated Power (in db above 1 kw)*
2 - 6	20 db[100 kw]/500 ft. ant.
7 - 13	23 db[200 kw]/500 ft. ant.
14 - 83	23 db[200 kw]/500 ft. ant.

3. Any station may be authorized on appropriate application to increase its power to the maximum set forth above without the necessity of a hearing so far as interference to other stations is concerned. The use of antenna heights greater than 500 feet above average terrain is encouraged as a means for improving the quality of service. If an antenna height greater than 500 feet is used, the effective radiated power shall be limited to that value which will avoid interference within the Grade A service radius of any other station, either existing or provided for in the Table of Assignments, on the basis of operation of such station with the maximum power and antenna height of 500 feet as set forth above. Where antenna heights of less than 500 feet are utilized, the effective radiated power shall not exceed that listed above.

E. Station Separations

1. Co-channel Separation

The Table of Assignments contained in the Commission's Notice of Further Proposed Rule Making, issued July 11, 1949, had as its objective co-channel separation of 220 miles in the VHF band and 200 miles in the UHF band. At the hearing on the general issues, testimony was offered that these separations could be reduced considerably by utilizing offset carrier operation. Evidence was also offered that more television service could be made available to the country if the separation objective were reduced to 150 miles for VHF channels.

The Commission has carefully considered the above evidence and has concluded that some reduction in co-channel separation is possible because of the improvements which result from offset carrier operation. It is not deemed advisable to effectuate a reduction to 150 mile VHF separation as suggested at the hearing. In the first place, the evidence upon which the 150 mile separation is based is the theoretical computations of what coverage can be achieved. On the basis of the evidence in the record, it is clear that considerations of terrain and other propagation factors will materially affect many of the theoretical computations. In the second place, much of the propagation data—although the best available—upon which the Commission relies is necessarily quite meager. Postponing a decision in these proceedings would not materially aid this problem since it has been the Commission's experience that substantial amounts of propagation data do not become available until stations are authorized on a regular basis. Hence, the Commission is faced with the practical problem that if it postpones assigning stations until sufficient propagation data are available, such data may never become available, while on the other hand if stations are assigned before sufficient propagation data are assembled, more interference may result in actual operation than was anticipated. In the Commission's view, the best method of handling this problem is to assign stations as soon as a reasonably sufficient amount of data is accumulated but in doing so assignments should not be made on the barest minimum separation which exact calculations would indicate. Instead, a safety factor should be included. In this way, if as a result of actual experience more interference results than was indicated by the earlier calculations, the safety factor will prevent extensive damage to overall service. If actual experience shows that the amount of interference is approximately that predicted by the calculations, then the rules and standards can be amended to reflect the new data. In the Commission's experience, it is much easier as a practical matter to reduce station separations which are somewhat larger than were originally thought to be necesary than it is to increase separations which are smaller than were originally thought to be necessary.

With the foregoing in mind, the Commission has provided for a minimum co-channel separation between cities of 180 miles on Channels 2-13 and 165 miles on Channels 14-83. In order to provide for flexibility in the location of transmitters and in order to give communities within 15 miles of the city in question a reasonable opportunity to utilize channels as set forth in paragraph "II B1" above, minimum separation between transmitters on the same channel is provided for at 170 miles for Channels 2-13 and 155 miles for Channels 14-83.[9] These separations are based on offset-carrier operation by the stations.

2. Adjacent Channel Separation

Under the present television Standards, objectionable adjacent channel interference results when the ratio of the desired to the undesired signal falls below 6 db. The Commission's proposals of July 11, 1949 did not recommend any change in this ratio. Considerable data presented to the Commission indicate that this ratio is too conservative and that it could be 0 db or —6 db. In general, adjacent channel interference has not been of a serious nature and such problems as do exist can be solved to a very considerable extent by improvements in receiver design which are neither difficult nor costly. Experience has shown that many receivers are giving satisfactory adjacent channel performance in areas where interference is predicted under the present Standards.

The Commission's proposals of July 11, 1949, provided for a normal adjacent channel separation of 110 miles in the VHF band and 100 miles in the UHF band — one-half the distance provided for the normal co-channel separations. Since adjacent channel interference is so readily subject to being controlled by adequate design and production methods by manufacturers, the Commission believes that adjacent channel separations should be reduced, thus making possible a greater number of assignments. The Commission is of the opinion that these separations should be based upon receiver performance which may reasonably be expected of manufacturers and not on the characteristics of the poorer receivers. Separations have been based on the assumption of receivers having an adjacent channel rejection ratio of —6 db. Thus, a median field strength ratio of 0 db should provide service from one station or the other, at each receiver location for at least 90% of the time, irrespective of signal fading. The Table of Assignments has been based upon an adjacent channel separation between cities of 70 miles for

[8] Or equivalent, based on the same Grade A service radius as with these values of effective radiated power and antenna height above average terrain. A chart showing this relationship is attached to Appendix B and identified as "Appendix IV." No minimum antenna height is specified. However, wherever feasible, high antennas should be used to provide improved service.

[9] In each case, the above figures are minimum separations. Greater separations are utilized in the sparsely settled areas of the country in order to secure a maximum amount of service. In addition, greater separations are also utilized in Gulf coast areas and in other areas where high levels of tropospheric propagation may be expected. This should be kept in mind by persons desiring to suggest changes in the Table of Assignments.

Channels 2-13 and 65 miles for Channels 14-83. The separations between transmitters are 60 miles for Channels 2-13 and 55 miles for Channels 14-83.[10]

3. Summary of co-channel and adjacent channel separation requirements:

	Channels 2-13		*Channels 14-83*	
	Co-channel Station Separation	*Adj. Channel Station Separation*	*Co-channel Station Separation*	*Adj. Channel Station Separation*
Minimum separation city to city	180 miles	70 miles	165 miles	65 miles
Minimum separation transmitter to transmitter	170 miles	60 miles	155 miles	55 miles

F. Transmitter Locations

Transmitter locations shall be so chosen that the following median field intensities as calculated in accordance with the methods and procedures described in Appendix B are provided over the entire principal city to be served:

Channels 2 - 6	*Channels 7 - 13*	*Channels 14 - 83*
74 db	77 db	80 db

G. Limitations on UHF Assignments[11]

1. Oscillator Radiation

a. VHF—The Commission's proposed Table of television channel assignments set forth in its Notice of Further Proposed Rule Making, issued on July 11, 1949, did not take into account the effects of receiver oscillator radiation on assignments in the VHF or UHF band. Evidence has been presented to the Commission concerning interference caused to receivers as a result of the use of a 21 mc. I.F. by manufacturers of receiving sets. In order to avoid such interference, Radio-Television Manufacturers Association has adopted as standard an I.F. of 41.25 mc. in the VHF and UHF bands. No oscillator radiation problems are involved for these VHF receivers so far as television stations operating in the VHF is concerned. Because of the large number of television receivers now in use employing the 21 mc. I.F., efforts have been made to minimize such interference without reducing the number of VHF assignments in the attached proposed Table.

b. UHF—There was general agreement at the above hearings that oscillator radiation is likely to be more severe in the UHF band that in the VHF band, due to the difficulty in suppressing such radiation in the higher frequencies. Further, because of the wide span of the UHF band it is not possible to place the oscillator outside the band and still employ an I.F. which is practical in the present state of the art.

Evidence was offered concerning a method of dealing with the oscillator radiation problem based on the "fold in" principle. It was proposed to divide the UHF band into four equal parts; to employ the lower and upper quarters for most assignments; to confine all oscillator radiation within the two center quarters; and to employ an I. F. of 111 mc. The Commission believes that the use of an I. F. of 111 mc. in television receivers is not feasible at this time. Existing tubes and those available in the foreseeable future will not permit adequate amplification with a reasonable number of I. F. stages. The use of the proposed I. F. will reduce adjacent channel selectivity. Further, setting up one-half of the UHF band as a repository for oscillator radiation would provide little incentive for receiver manufacturers to reduce such radiation. Accordingly, the "fold in" principle has not been adopted in preparing the proposed Table.

Although the Commission expects that continued improvements may eliminate the problem of oscillator radiation in the future, it does not appear practicable to expect such receivers in the near future.[12] Hence, the UHF table has taken into account the standard I.F. of 41.25 mc. adopted by the RTMA. Thus stations in the UHF which are 7 channels apart are required to have their transmitters separated by a minimum of 60 miles. This separation affords substantially the same protection as does the co-channel separation provided for above.

2. Intermodulation—The Commission's proposed Table of July 11, 1949, did not take into consideration the effects of intermodulation. Although interference resulting from intermodulation has not been a problem in the VHF band, it is generally agreed that intermodulation is likely to be a more serious problem in the UHF band. Various arrangements have been proposed for reducing intermodulation such as a staggered arrangement of channels, or by wide frequency separation. Testimony in the record indicates that a three or four channel separation would serve as adequate protection against intermodulation. The Commission has concluded that the best method of avoiding problems of intermodulation is to use a normal minimum separation of six channels in a city, thus allowing for a desirable safety factor. There is general agreement that a distance separation of 15 to 20 miles is sufficient to provide protection against intermodulation since sufficiently high field intensities from two or more stations would not normally exist at any point between stations so separated. Accordingly, in preparing the UHF assignments in the attached Table, stations closer than 20 miles have not been assigned channels less than six channels apart.

3. Image Interference (Picture and Sound)—Image interference has raised no problems in the VHF band since a signal from another television station removed from the desired channel by twice the I.F. does not normally fall in another television channel. In the UHF band, however, where there is a large number of contiguous channels, image interference is expected to present interference problems. No allowance was made for this factor in the Commission's proposed Table of July 11, 1949. The record indicates that image rejection of 30 to 40 db can be provided by UHF receivers of reasonably good design which employ a 41.25 I.F. There was general agreement that image interference should be avoided in making channel assignments. Accordingly, a minimum separation of 75 miles is provided between transmitters where UHF stations are separated by fifteen channels to provide against *picture* image interference, and a minimum separation of 60 miles between transmitters where UHF stations are separated by fourteen channels to provide protection against *sound* image interference. This separation provides substantially the same protection to the picture of a desired station as does the co-channel separation provided for above. A slightly smaller separation is provided for in the case of the sound image than the picture image because of the lesser interfering effect of the former.

4. I.F. Beat—It is recognized that when two stations in a city are separated by an I.F. it is possible that the two signals will combine to provide a beat signal which will be picked up by the I.F. Amplifier. Where a 41.25 mc. I.F. is in use, such signals may exist in channels which are separated by seven or eight channels from the desired station. The effect is similar to that of intermodulation. As indicated above the seven channel separation is taken care of by the separation which is used to avoid oscillator interference. Accordingly, stations in the UHF band which are separated by eight channels are required to have a minimum separation of 20 miles between transmitters.

[10] It is recognized that some existing operations do not comply with the minimum separations for co-channel or adjacent channel operation that are set forth above. It has not been possible to remove all of these cases without extensive dislocation. The Commission will study each such operation on a case-to-case basis in the hope that eventually they may all be brought up to the minimum separations.

[11] Certain separations between UHF stations are provided herein in order to afford protection against interference resulting from oscillator radiation, intermodulation, images and I.F. beats. It should be pointed out, however, that these separations do not provide for protection against interference of the above character which is caused by radio services operating outside of the television band.

[12] This same observation is also applicable to intermodulation, image interference and I.F. beat problems discussed below.

5. Summary of Minimum Transmitter Separation in the UHF:

Channel No.	Adjacent Channel	Oscillator	I.F. Beat	Intermodulation	Image Picture	Image Sound	Co-channel
	55 miles	60 miles	20 miles	20 miles	75 miles	60 miles	155 miles
14	15	21	22	16-19	29	28	14
15	14, 16	22	23	17-20	30	29	15
16	15, 17	23	24	14; 18-21	31	30	16

83	82	76	75	78-81	68	69	83

H. Multiple Interference

In preparing the attached Table of Assignments, a study was made of several cases of multiple interference involving relatively uniform co-channel station separations in congested areas. This study based on information and data presently available, indicates that the Grade A service areas obtained with the maximum powers as specified above are not infringed by combined interference from more than one signal when non-directional receiving antennas are assumed to be used. Moreover, if receiving antennas are assumed to have 6 db rejection in the directions of the undesired stations, the multiple interference under these conditions is not expected to exceed the single station case where no receiving antenna directivity is assumed. Thus, it appears that interference from more than one station may be accounted for satisfactorily by plotting a composite interference-limited contour on the basis of the most severe limitation in each direction due to any single interfering station. This approximation appears to be sufficiently accurate for the purpose of determining station separations and power limitations. Accordingly, it is proposed that interference from each station will be determined on an individual basis and that calculation of the effects of multiple interference will not be required.

I. Offset Carrier Operation

The Commission's proposals of July 11, 1949, did not provide for the use of offset carrier operation either in the VHF or UHF band. Testimony presented at the hearing on the General Issues in the proceedings herein substantially favored offset operation and tests have indicated that such operation resulted in an improvement of approximately 17 db over non-offset carrier operation. A survey conducted by the Joint Technical Advisory Committee of stations engaged in offset carrier operations indicates practically unanimous support therefor. Although a question has been raised concerning possible frequency stability of transmitters used in these operations, it appears that this problem is not serious and that frequency stability can be provided which will insure adequate and proper offset carrier operations. Accordingly, the Commission has concluded that separations should be based upon stations employing offset carrier operation. When these rules are adopted as final, the Commission will specify the exact frequency to be utilized by each station for offset carrier operation. In the VHF band, stations will be offset from each other by plus or minus 10 kc and 1 kc tolerance will be specified. Similar requirements will be applied to UHF stations, but the specific values will be determined at a later date.

III. DIRECTIONAL ANTENNAS[18]

There are two aspects to the questions which have been raised concerning the use of directional antennas. In the first place the Commission's Rules, Regulations and Standards do not prohibit the use of directional antennas as such. If a channel is available in any particular community in the Commission's Table, a directional antenna may be authorized upon an appropriate showing. Such authorizations have been granted in the past. It should be pointed out, however, that at the time of such grant, a channel was available in the existing Assignment Table. The second aspect of the problem concerning directional antennas arises when a request is made that another channel be added in a community by means of a directional antenna. This situation differs from the first one because in this instance no channel assignment is possible unless a directional antenna is employed, that is, the use of a directional antenna is compulsory as a matter of channel assignment. This question was considered by the Commission in 1945 when the first Assignment Table was adopted. At that time the use of directional antennas as a basis for making assignments in the Table was rejected by the Commission when a proposal to that effect was offered by the Television Broadcasters Association. In its Report of November 21, 1945, the Commission stated, among other things:

". . . An examination of the T.B.A. proposal reveals that there are several disadvantages in attempting to accomplish this objective by the use of directional antennas. In the first place, the Commission desires to avoid as much as possible the resort to directional antennas for television. With the great increase in civil aviation as a

[18] A directional antenna is defined as an antenna having 3 db or more difference in effective radiated power in the azimuthal directions of minimum and maximum radiation.

result of the war, it is going to be increasingly difficult to find suitable antenna sites that do not constitute a hazard to air navigation. If directional antennas are used, there is much less flexibility in choosing antenna sites, thus increasing the possibility of conflict with air navigation requirements. Moreover, directional antennas will have to be located away from cities with the result that problems of shadows and multi-path distortion in rendering service to cities will be much greater than where the antenna is located in the city itself—in most instances antennas can be located in the city itself where no directional antenna is required.

"In the second place, the directional antenna patterns proposed by T. B. A. result in many instances in highly artificial service areas with a good part of the station's signal strength being directed out to sea. Moreover, the service area of the stations using directional antennas would be no larger than that of a community station but such stations would be as expensive to construct and operate as metropolitan stations."

The Commission's Proposed Table of July 11, 1949 made no provision for the use of directional antennas except with respect to two existing stations. It was pointed out, however, that directional transmitting antennas may be useful in certain situations in order that a particular site may be utilized or overall service improved. It was then concluded that directional transmitting antennas would be permitted in appropriate cases for use on channels contained in the Assignment Table, provided that this did not excuse compliance with the service area requirements or permit reduction of basic service areas. It was also indicated that nulls greater than —10 db (compared to the maximum value of radiation) may not be practicable because of reflections. During the hearings on the General Issues, limited testimony was presented generally favoring the use of directional antennas principally for the purpose of improving service rather than reducing station separations. Some testimony was offered in favor of the use of directional antennas with nulls greater than —15 db.

The Commission is not satisfied that in the present state of the art, directional antennas are practicable with nulls greater than —10 db; the policy set forth in the Notice of July 11, 1949 is adhered to. If future available data indicate that the performance of directional transmitting antennas can be properly predicted, particularly in areas where reflections occur, their use for interference protection can be given further consideration.

As indicated, directional antennas may be employed for improving service or for the purpose of using a particular site; they may not be used for the purpose of reducing the minimum station separations set forth in paragraphs "II E and G". Where a directional antenna is proposed, the effective radiated power in any direction shall be contained in the range permitted in paragraphs "II D 1 and 2", provided that the difference between maximum and minimum radiation shall not exceed 10 db.

IV. STRATOVISION

The Commission's proposed Table of July 11, 1949, did not provide channels for stations operating in accordance with the stratovision method of television broadcasting utilizing air-borne transmitters. The Commission afforded interested persons an opportunity of presenting evidence on this point. Only one party presented evidence in support of stratovision. From the evidence offered, it appears that five UHF channels would supply about 81% of the area of the United States with one signal. Two of the five channels would be used as guard bands. Consequently, in order to supply all areas of the United States with four services about twenty channels would be required. This figure does not include the channels which would have to be added in order to provide proper protection between stratovision stations and ground stations in the light of the separations required to avoid oscillator radiation, image interference, or I. F. beats. The studies presented at the hearing did not include these factors.

The Commission appreciates that stratovision, if feasible, would be a most useful instrument in providing service to the sparsely settled areas of the country. Indeed, many areas of the country can undoubtedly receive service only from wide area coverage stations, such as stratovision would provide. The Commission, however, does not believe that channels should be assigned to stratovision at this time. As can be seen from an examination of Appendix C, it is not possible to assign television channels to many important communities and other communities have an inadequate number of assignments. This situation occurs when relatively close separations are utilized based upon ground located transmitters. With the much wider separations that air-borne transmitters would require, the problem of providing a fair, efficient, and equitable allocation of television facilities to the various communities would be aggravated. The demands for television service require that all available channels be assigned for proven ground station operations, particularly when no substantial demand was shown for air-borne transmitters. However, as indicated above, proposed Channels 66 through 83 have not been assigned to particular communities but are flexibility channels, which may be used for various purposes, including further stratovision experimentation. The door remains open for further consideration of this proposal by the Commission if it can be shown that stratovision can operate successfully within the above flexibility channels, without causing interference to ground-based stations operating on Channels 14 through 65.

V. POLYCASTING

Evidence in support of this proposal was presented by one witness who advocated the principle of using a number of low-power transmitters on one or more channels in the UHF band instead of attempting to cover a large area with a centrally located high-power transmitter. He expressed the belief that his proposed system would result in improved service at lower cost and was the only feasible method whereby stations in the UHF band could serve large areas. It was contemplated, for example, that four transmitters could be located in as many directions to give service to a large city with the North and South transmitters operating on one frequency and the East and West transmitters operating on another frequency; by using directional receiving antennas and taking advantage of the wide variations in signal intensity over a small area there would be adequate rejection of the undesired co-channel signal. The use of FM was favored for polycasting to improve the ability to reject the undesired signal.

No evidence was presented concerning previous or existing operations carried on in accordance with the above proposals, and the Commission has no information that such operations have been conducted. It appears that the proposed system has never been field tested and hence an adequate determination as to its feasibility cannot be reached at the present time. To devise an assignment Table at this time which would provide for polycasting in many areas would be impractical and unwarranted since such an undertaking would require prior knowledge of the number, location and power of the various stations in a city. Further, it would involve consideration of possible interference such as oscillator radiation, image interference and intermodulation not only between stations in a city but between stations in adjacent areas. Accordingly, the attached proposed Table does not contain assignments of channels for stations to operate under the polycasting system on a commercial basis. Further experimentation concerning polycasting can be carried on in the flexibility channels.

VI. NON-COMMERCIAL EDUCATIONAL TELEVISION

The existing television channel assignment Table adopted by the Commission in 1945 did not contain any reserved channels for the exclusive use of non-commercial educational television stations, and no changes in this respect were proposed by the Commission in its proposed Table of July 11, 1949. However, in the Notice of Further Proposed Rule Making issued on the latter date the Commission

pointed out that it had "received informal suggestions concerning the possible provision for non-commercial educational broadcast stations in the 470 - 890 Mc. band". Interested parties were afforded the opportunity to file comments in the proceeding concerning these suggestions.

Prior to the hearing on this issue, a number of the parties supporting the reservation of channels for non-commercial educational purposes joined together to form the Joint Committee on Educational Television. This Committee offered testimony in support of a request for reservation of channels in both the VHF and UHF portion of the spectrum.

In general, the need for non-commercial educational television stations was based upon the important contributions which non-commercial educational television stations can make in educating the people both in school—at all levels—and also the adult public. The need for such stations was justified upon the high quality type of programming which would be available on such stations—programming of an entirely different character from that available on most commercial stations.

The need for a reservation was based upon the fact that educational institutions of necessity proceed more slowly in applying for broadcast stations than commercial stations. Hence, if there is no reservation, the available channels are all assigned to commercial interests long before the educational institutions are ready to apply for them.

Some opposition to the reservation was presented at the hearing. In general, none of the witnesses opposed the idea of non-commercial educational stations. On the contrary, there was general agreement that such stations would be desirable. Objection was made to the idea of reservation because as stated by some witnesses, the experience of educational institutions in the use of AM and FM radio does not furnish sufficient assurance that the educational institutions would make use of the television channels. However, there was no objection even by these witnesses to a certain form of reservation provided it was for a reasonably short time.

In the Commission's view, the need for non-commercial educational television stations has been amply demonstrated on this record. The Commission further believes that educational institutions of necessity need a longer period of time to get prepared for television than do the commercial interests. The only way this can be done is by reserving certain channels for the exclusive use of non-commercial educational stations. Obviously, the period of time during which such reservation should exist is very important. The period must be long enough to give educational institutions a reasonable opportunity to do the preparatory work that is necessary to get authorizations for stations. The period must not be so long that frequencies remain unused for excessively long periods of time. The Commission will survey the general situation from time to time in order to insure that these objectives are not lost sight of.

Accordingly, the Commission in its Table of Assignments has indicated the specific assignments which are proposed to be reserved for non-commercial educational stations.[14] Rules concerning eligibility and use of the stations will be substantially the same as those set forth in subpart C of Part III of the Commission's Rules and Regulations. The reservation of the non-commercial educational stations is not in a single block as in the case of FM since the assignment problems discussed above would sharply curtail the usefulness of a block assignment.

The following method has been employed in making reservations: In all communities having 3 or more assignments (whether VHF or UHF) one channel has been reserved for a non-commercial educational station. Where a community has fewer than 3 assignments, no reservation has been made except in those communities which are primarily educational centers, where reservations have been made even where only one or two channels are assigned.[15] As between VHF and UHF, a UHF channel has been reserved where there are fewer than 3 VHF assignments, except for those communities which are primarily educational centers where a VHF channel has been reserved. Where three or more VHF channels are assigned to a community, a VHF channel has been reserved except in those communities where all VHF assignments have been taken up. In those cases, a UHF channel has been reserved.

It is recognized that in many communities the number of educational institutions exceeds the reservation which is made. In such instances the various institutions concerned must enter into cooperative arrangements so as to make sure that the facilities are available to all on an equitable basis.

---

[14] The procedure set forth in paragraphs "12" and "13" of the Notice is applicable to any specific assignment proposed to be reserved or to any request that a channel not proposed for reservation should be reserved.

[15] Forty-six communities were considered to be primarily educational centers in accordance with the testimony presented by the Joint Committee on Educational Television. However, this enumeration is not binding and consideration will be given to any proposal filed pursuant to paragraphs "12" and "13" of the Notice providing for additions to or deletions from the enumeration.

Appendix B—Technical Specifications

Proposals Regarding Station Coverage and Interference

With Charts of Minimum Permissible Powers and Field Strength Calculations

PREDICTION OF AREAS OF SERVICE AND OF INTERFERENCE[1]

I. Grades of Service

Television broadcast service is classified into two grades of service which are defined in the tables below:

A. *Required median field strengths in db above 1 uv/m:*

Grade of Service	*Channels 2-6*	*Channels 7-13*	*Channels 14-83*
A	68 db	71 db	74 db
B	47 db	56 db	64 db

B. *Permissible co-channel ratios in db of median desired field strengths to 10% undesired field strengths:*

Grade of Service	*Channels 2-13*		*Channels 14-83*	
	Non-offset	*Offset*	*Non-offset*	*Offset*
A	51 db	34 db	53 db	36 db
B	45 db	28 db	45 db	28 db

C. *Permissible adjacent channel ratios in db of median desired to undesired field strengths:*

Grade of Service	*Channels 2-83*
A	0 db
B	0 db

II. Specifications of Required Field Strengths

The required field strengths specified in Section IA were determined in accordance with the following assumptions and procedure:

A. *Grade A Service—Required Field Strengths, in db above 1 microvolt per meter:*

(a) To overcome receiver noise:

		Channels 2-6	*Channels 7-13*	*Channels 14-83*
(1)	Thermal Noise (db)[2]	7 db	7 db	7 db
(2)	Receiver Noise Figure	12	12	15
(3)	Peak Vis. Car/RMS Noise	30	30	30
(4)	Trans. Line Loss[3]	1	2	5
(5)	Antenna Eff. Length[4]	—3	6	8
(6)	Local Field Strength	47	57	65
(7)	70% Terrain Factor[5]	4	4	6
(8)	90% Time Fading Factor	3	3	3
(9)	Median Field Strength (db)[6]	54 db	64 db	74 db

(b) To overcome local noise and interference under urban conditions:

	Channels 2-6	*Channels 7-13*	*Channels 14-83*
Median Field Strength (db)	68 db	71 db	74 db

(c) Required field strengths to overcome (a) or (b), whichever is the greater:

	Channels 2-6	*Channels 7-13*	*Channels 14-83*
Median Field Strength (db)[7]	68 db	71 db	74 db

B. *Grade B Service—Rural Field Strengths, in db above 1 microvolt per meter, required to overcome receiver noise:*

		Channels 2-6	*Channels 7-13*	*Channels 14-83*
(1)	Thermal Noise (db)	7 db	7 db	7 db
(2)	Receiver Noise Figure	12	12	15
(3)	Peak Vis. Car./RMS Noise	30	30	30
(4)	Trans. Line Loss	1	2	5
(5)	Antenna Effective Length[8]	—9	0	3
(6)	Local Field Intensity	41	51	60
(7)	50% Terrain Factor	0	0	0
(8)	90% Time Fading Factor[9]	6	5	4
(9)	Median Field Intensity (db)	47 db	56 db	64 db

III. Specification of Permissible Co-channel Interference Ratios

The permissible interference ratios specified in Section IB were determined in accordance with the following assumptions and procedure:

A. *Grade A Service:*

		Channels 2-13		*Channels 14-83*	
		Non-offset	*Offset*	*Non-offset*	*Offset*
(1)	Local Desired/ Undesired Ratio	45 db	28 db	45 db	28 db
(2)	70% Terrain Factor[10]	6	6	8	8
(3)	50% Location d/u Ratio	51 db	34 db	53 db	36 db

B. *Grade B Service:*

	Channels 2-13		*Channels 14-83*	
	Non-offset	*Offset*	*Non-offset*	*Offset*
50% Location d/u Ratio	45 db	28 db	45 db	28 db

IV. Specifications of Permissible Adjacent Channel Ratios

The permissible adjacent channel ratios specified in Section IC were determined in accordance with the following assumptions and procedure:

A. *Grades A and B Service:*

	Channels 2-83
Local desired/undesired ratio (db)	—6 db
90% time fading factor (db)	6
Time median desired/undesired ratio (db)[11]	0 db

V. Propagation of Television Signals

For the purpose of predicting the propagation of television signals for the estimation of service and interference areas under the rules proposed in Part III of these proceedings, the following procedures have been observed:

A. *Prediction of Service Field Strengths:*

The minimum field strengths of the service field which will be available at any percentage of receiving locations

---

[1] There are attached hereto six figures which constitute proposed amendments to the Standards of Good Engineering Practice Concerning TV Broadcast Stations. Proposed Appendix IV thereto is a family of curves entitled, "Minimum Effective Radiated Power versus Antenna Heights above Average Terrain." Proposed Appendix V consists of five figures relating to radio propagation effects, specific references to which are made herein.

[2] Reference level db above 1/uv across 300 ohms impedance.

[3] Transmission line is assumed to consist of 50 feet of 300 ohm twin-lead cable.

[4] The antenna is assumed to consist of a half-wave dipole for channels 2-13 and an antenna with 8 db gain for channels 14-83.

[5] The terrain correction factor for channels 2-13 is taken from the curve R(L) and the factor for channels 14-83 is taken from the curve r(L) of Figure 5 of proposed Appendix V, attached hereto.

[6] The median field strength is equivalent to the field F′ (50, 50) specified in Section V-A herein and will provide grade A service under suburban or rural conditions where receiver noise provides the service limitation.

[7] It is realized that it may not be desirable nor practical in some heavily built-up areas to meet the assumptions of an outside antenna, and that inside antennas will be used. If it is assumed that the inside antenna will have an effective length equal to that of a half-wave dipole and that the transmission line loss is negligible, the instantaneous local field strength required will be 46, 55 and 68 db above one microvolt per meter, respectively, for channel groups 2-6, 7-13, and 14-83. However, the median field strengths required under these conditions cannot be stated with assurance, because the average terrain distributions which have been calculated from available measurements apply only to exterior conditions in suburban and rural areas. If the range of signal variation in building interiors is comparable to the exterior range, the median signal levels specified to overcome local noise and interference in (b) will be adequate. Until reliable data are available to indicate otherwise, the specified median field strengths are considered adequate for urban service other than in the principal city.

[8] Antennas with a 6 db gain compared to a dipole are assumed for channels 2-13, and an antenna gain of 13 db for channels 14-83.

[9] The time fading factors decrease with increasing frequency because the grade B service radii decrease.

[10] The terrain factor for channels 2-13 was taken from the curve r(L) and for channels 14-83 from the curve x(L) of Figure 5 of proposed Appendix V for 70% of the receiver locations.

[11] The median field strength ratio of 0 db is based upon an assumed receiver terminal ratio of —6 db. With an acceptable terminal ratio of —6 db, at least one service or the other is available at any particular receiving location at any particular time, provided that the field strengths are otherwise satisfactory for service. By specifying a permissible time median field strength ratio of 0 db, a particular receiving location is expected to have service available for at least 90% of the time from one station despite fading. Although this does not assure 70% of locations to each station at the Grade A contour, owing to the terrain distribution the areas of actual service will overlap. Each station will on the average recover from the other station as many locations beyond the indicated 0 db contour as it loses to the other station within the 0 db contour.

for any percentage of the time may be described by the following relation:

(1) $F'(L,T) = P' + F(50,50) + R(L) + R(T)$

Where $F'(L,T)$ is the minimum field strength to be expected at the poorest location of the best L percent of locations for T percent of the time, expressed in decibels above 1 microvolt per meter, P' is the effective radiated power in db above 1 kilowatt, $F(50,50)$ is the minimum field strength in decibels above 1 microvolt per meter expected at 50 percent of the locations and 50 percent of the time for a radiated power of one kilowatt, $R(L)$ is the terrain distribution factor for L percent of locations, and $R(T)$ is the time distribution factor.

The effective radiated power, P', is expressed in decibels above 1 kilowatt radiated from a half-wave dipole and may be calculated by means of the following formula:

(2) $$P' = 10 \log_{10} P - P'' + G$$

In the above, P denotes the actual transmitter power delivered to the transmission line expressed in kilowatts, P'' denotes the transmission line and antenna power loss expressed in decibels, and G denotes the gain of the transmitting antenna array in the direction of the receiving location expressed in decibels relative to that of a half-wave dipole.

Approximate values of $F(50,50)$ are shown in Figures 1 and 2 of proposed Appendix V, and appropriate values of $F(50,10)$ are shown in Figures 3 and 4 thereof. Figures 1 and 3 are to be used for channels 2 through 6. Figures 2 and 4 are to be used for channels 7 through 83. The charts show the field strengths in db above one microvolt per meter for one kilowatt of effective radiated power to be expected at 50% of the receiving locations for 10% and 50% of the time, for antenna heights from 100 feet to 10,000 feet. The field strengths are based on an effective power of one kilowatt radiated from a half-wave dipole in free space, which produces an unattenuated field strength at one mile of about 103 db above one microvolt per meter (137.6 millivolts per meter). The antenna height to be used with these charts in any particular case is the equivalent height of the center of the radiating element above the average height of the profile between 2 and 10 miles from the transmitter along the desired radial.

The time distribution factor $R(T)$ for fields exceeded for 10% of the time, $R(T=10)$, is found by subtracting the value exceeded for 50% of the time $F(50,50)$ from the value exceeded for 10% of the time $F(50,10)$.

(3) $$R(T=10) = F(50,10) - F(50,50)$$

No charts are included to show the service fields for 90% of the time, but these fields lie below the 50% curve by the same amounts that the 10% curves lie above the 50% fields.

Thus, the time distribution factor $R(T=90)$ is numerically equal but opposite in sign to $R(T=10)$, and

(4) $$F(50,90) = F(50,50) + R(T=90)$$
$$= F(50,50) - [F(50,10) - F(50,50)]$$

In order to determine the field strengths to be expected for other percentages of time, T, use may be made of the relation: $R(T) = R(T-10)\, k(T)$. The value of $k(T)$ for any percentage of time T is given in Figure 5 of proposed Appendix V. In order to determine the field strengths which will be exceeded at some percentage of the receiving locations other than 50%, use is also made of Figure 5. For channels 2 through 13, the curve labelled $R(L)$ is to be used; for channels 14 through 83, the curve labelled $r(L)$ is to be used. The departure from the 50% value in db, shown on the left scale, corresponding to the desired percentage of locations on the bottom scale, is to be added to the field intensity in db above one microvolt per meter existing at 50% of locations.

For channels 2-13,

(5) $$F(L,50) = F(50,50) + R(L)$$

For channels 14-83,

(6) $$F(L,50) = F(50,50) + r(L)$$

Thus, as shown in Figure 5, the terrain factor for 70% of locations corresponds to −4 db for channels 2-13 and −6 db for channels 14-83, as used in Section II above.

B. Prediction of Interference from One Undesired Station:

The percentage of receiving locations, L, at any given distance from a desired station and one undesired station at which an acceptable ratio, A, of desired-to-undesired signals is exceeded for at least 90% of the time may be determined from the following equation:

(7) $$r(L) = A + P'_u - P'_d + F_u(50,50) - F_d(50,50) + \sqrt{R_d^2(T=90) + R_u^2(T=90)}$$

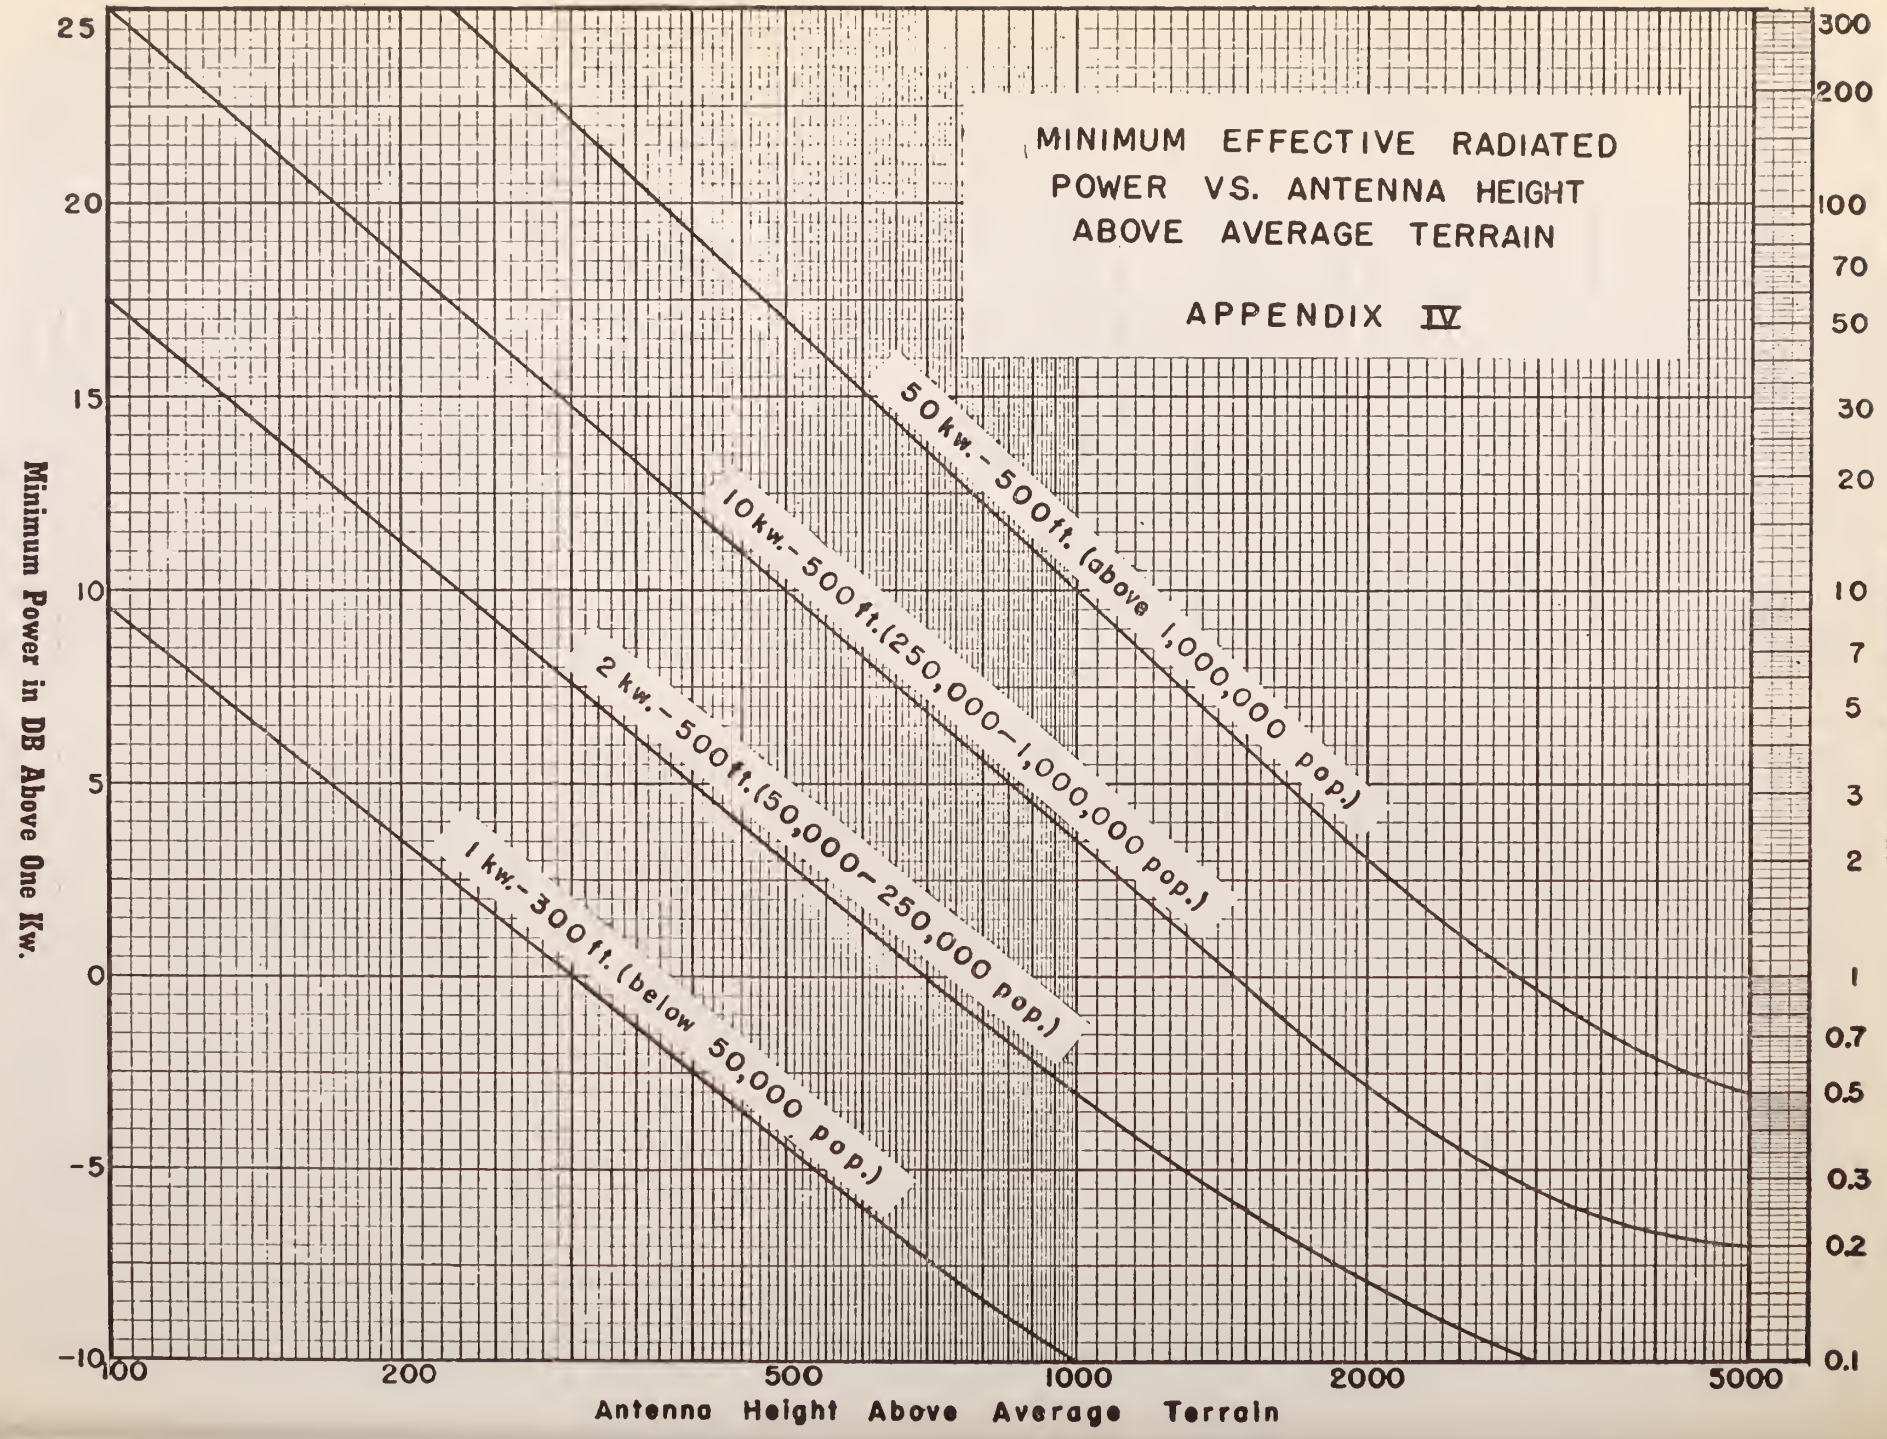
The subscript d denotes values applicable to the desired signal and the subscript u denotes values applicable to the undesired signal. As explained above, the effective radiated powers of the desired and undesired stations P'_d and P'_u are expressed in db above one kilowatt radiated from a half-wave dipole. $F_u(50,50)$ and $F_d(50,50)$ are taken from the appropriate curves of Figures 1 or 2 of proposed Appendix V. $R_d(T=90)$ and $R_u(T=90)$ are the time distribution factors for 90% of the time for the desired and the undesired field strengths, respectively. These may be determined by subtracting the (50,10) field strength from the (50,50) field strength indicated for the proper distances on the appropriate curves of Figures 1 through 4 of proposed Appendix V.

For channels 2 through 13, the percentage of locations at which the ratio A is exceeded may be read from the probability distribution, $r(L)$, as a function of L in Figure 5 of proposed Appendix V. For channels 14-83, the function $x(L)$ is to be used.

If the distance at which an acceptable ratio A is to be obtained at a given percentage of locations and for a given percentage of time T is to be determined rapidly, the solution using the above exact expression may be too laborious. A useful approximation is based on the fact that $R^2_d(T=10) + R^2_u(T=10)$ approaches $R_u(T=10)$ when $R_u(T=10)$ is much larger than $R_d(T-10)$. The approximation gives values which are low by less than 3 db when $R_u(T=10) = 2.5\, R_d(T=10)$. This will always be the case in co-channel interference computations, and sometimes for adjacent channels, when considering service of the order of 90% of the time or 70% of the locations. This is tantamount to assuming for the purposes of rapid calculation that the desired signal is steady and equal to its median value, and that the undesired signal alone is variable.

This makes possible simple graphical methods of computing iso-service contours completely around the desired station. For example, at a point where $F_d(50,50)$ is A decibels greater than $F_u(50,10)$, the ratio A will be exceeded at 50 percent of locations for at least 90 percent of time. Thus, the charts for the desired signal $F(50,50)$ and the tropospheric charts $F(50,10)$ of Figures 1-4 can be used to determine directly the service contours for 90 percent of the time, and 50 percent of the locations.

This approximate method can also be applied to the case where it is desired to locate the contour at which an acceptable ratio is exceeded for a percentage of the locations other than 50 percent, by subtracting from the ratio A in db the value of $r(L)$ or $x(L)$ from Figure 5 corresponding to the percentage of locations for which it is desired to determine the service contour. For example, if it is desired to determine the contour at which the ratio A=28 db (25:1) will be exceeded at 70 percent of the locations for at least 90 percent of the time for channels 2-13, the value (−6) db should be subtracted from the 28 db ratio, giving an adjusted ratio of 34 db. The desired contour is found to exist at the locus of points for which $F_d(50,50)$ exceeds $F_u(50,10)$ by the adjusted ratio of 34 db, as taken from the appropriate figures of Proposed Appendix V. For channels 14-83 the proper value of $x(L)$ should be used, in conjunction with Figures 2 and 4 of proposed Appendix V. This procedure may be used with the definitions of service set forth in Section IB, for which the ratios, adjusted for the required percentages of locations, are tabulated.



MINIMUM EFFECTIVE RADIATED POWER VS. ANTENNA HEIGHT ABOVE AVERAGE TERRAIN
APPENDIX IV
50 kw. - 500 ft. (above 1,000,000 pop.)
10 kw. - 500 ft. (250,000 - 1,000,000 pop.)
2 kw. - 500 ft. (50,000 - 250,000 pop.)
1 kw. - 300 ft. (below 50,000 pop.)
Minimum Power in DB Above One Kw.

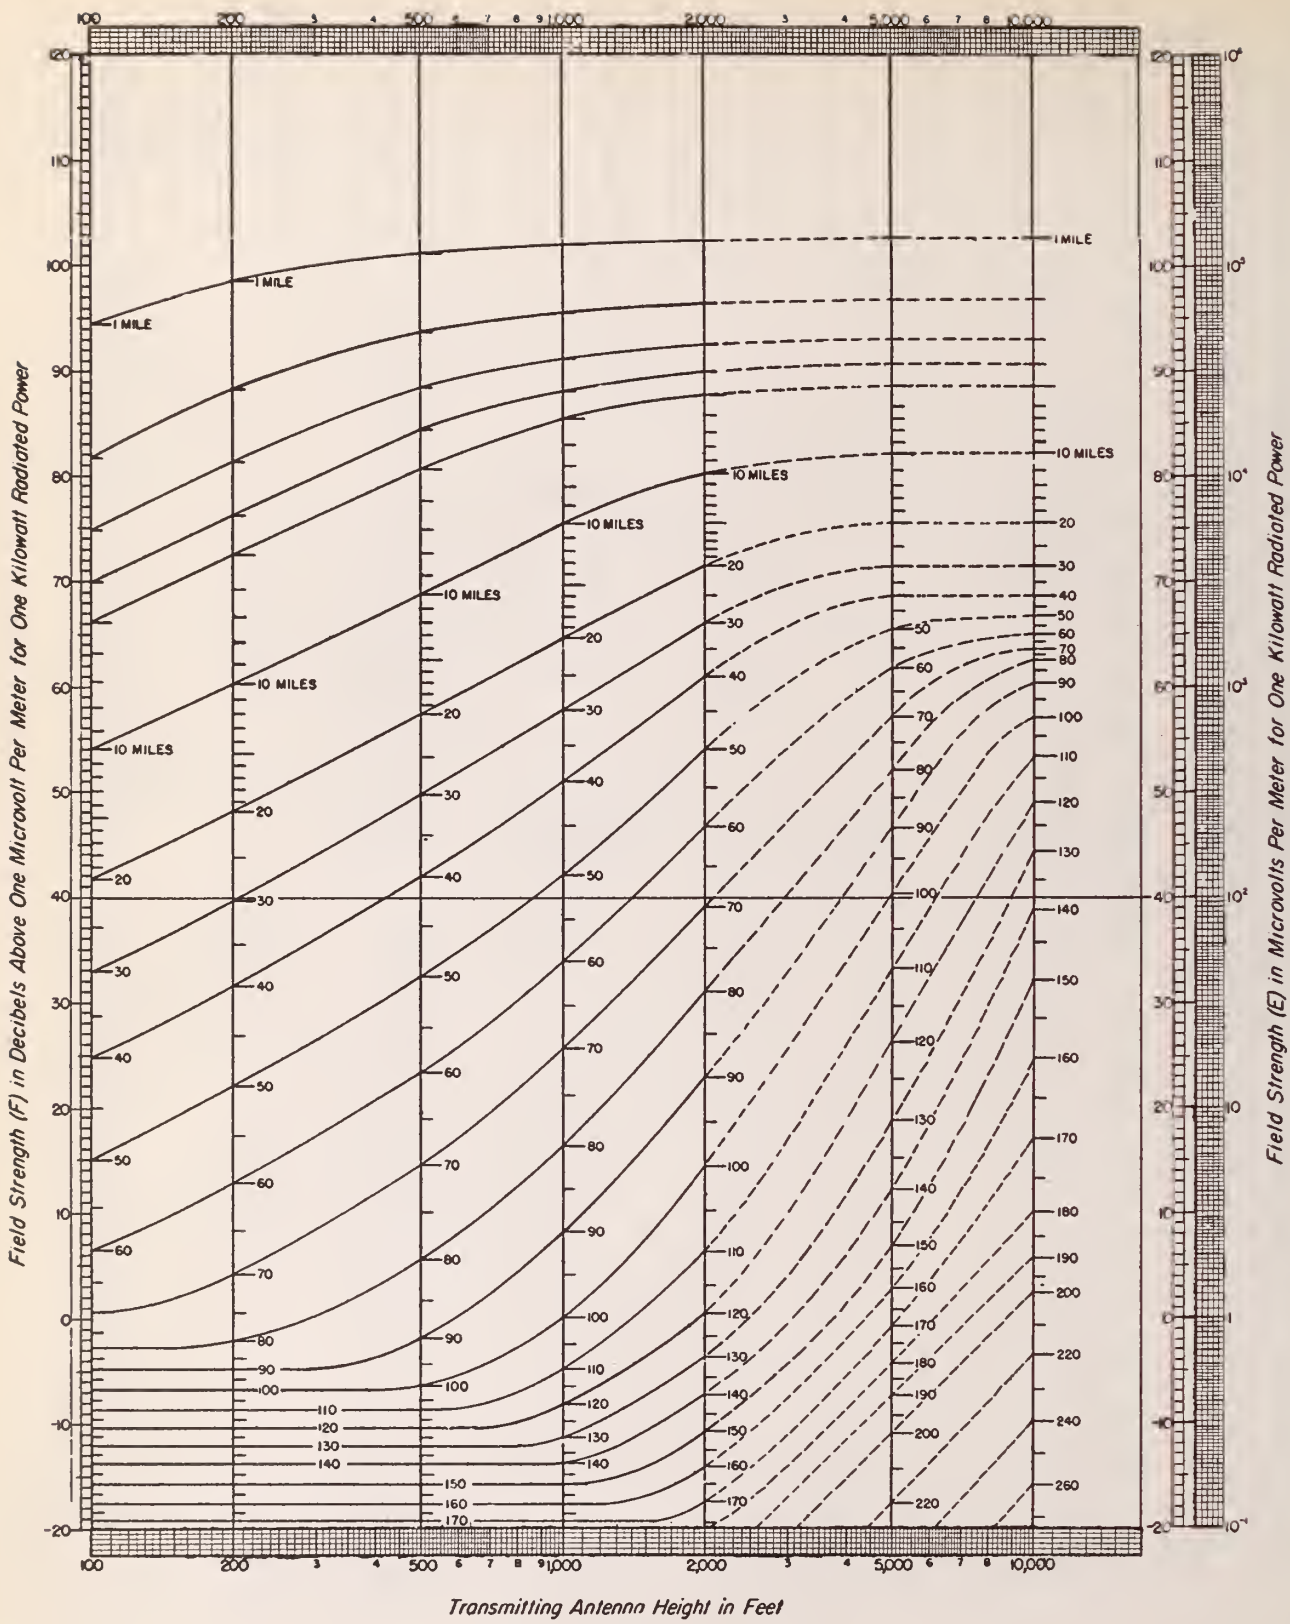
APPENDIX V

FIGURE 1 - TELEVISION CHANNELS 2 - 6

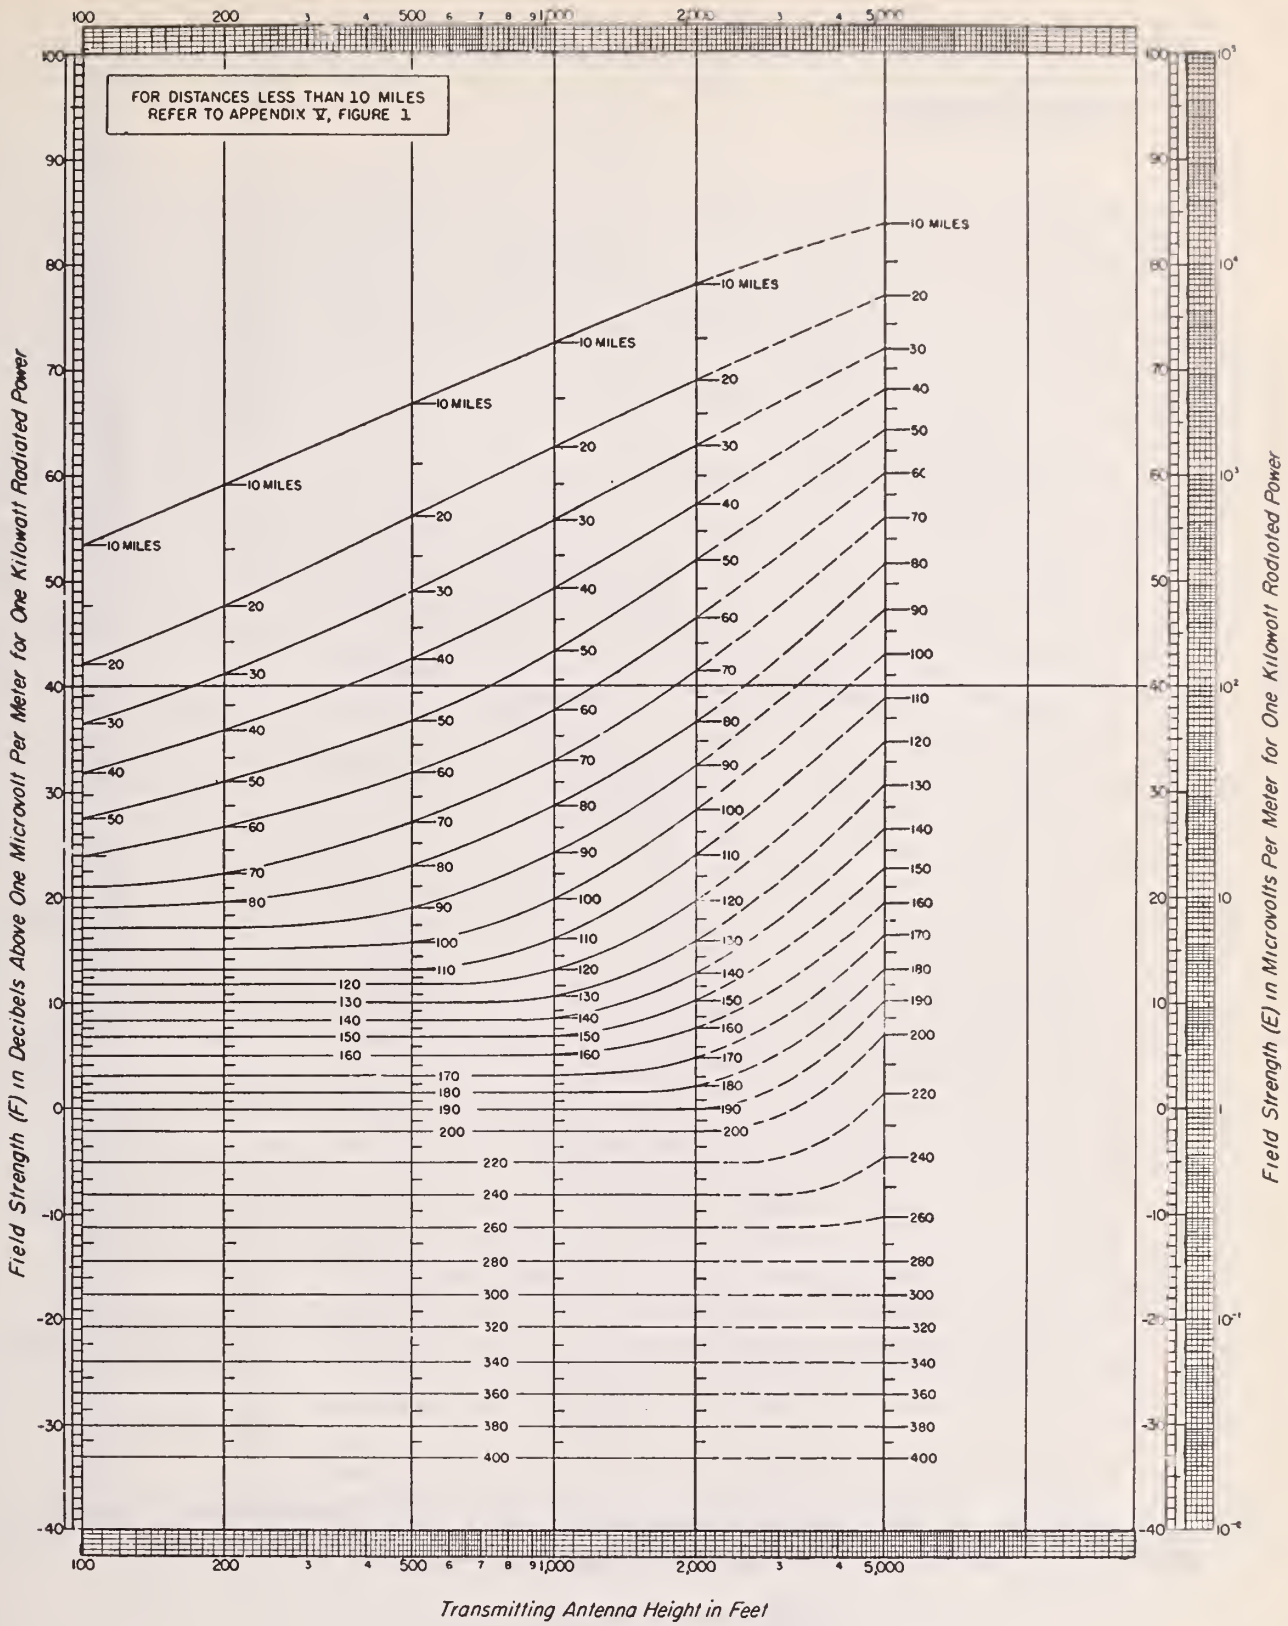
EXPECTED FIELD STRENGTH EXCEEDED AT 50 PERCENT OF THE POTENTIAL RECEIVER LOCATIONS FOR AT LEAST 50 PERCENT OF THE TIME AT A RECEIVING ANTENNA HEIGHT OF 30 FEET.



APPENDIX V

FIGURE 2 - TELEVISION CHANNELS 7 - 83

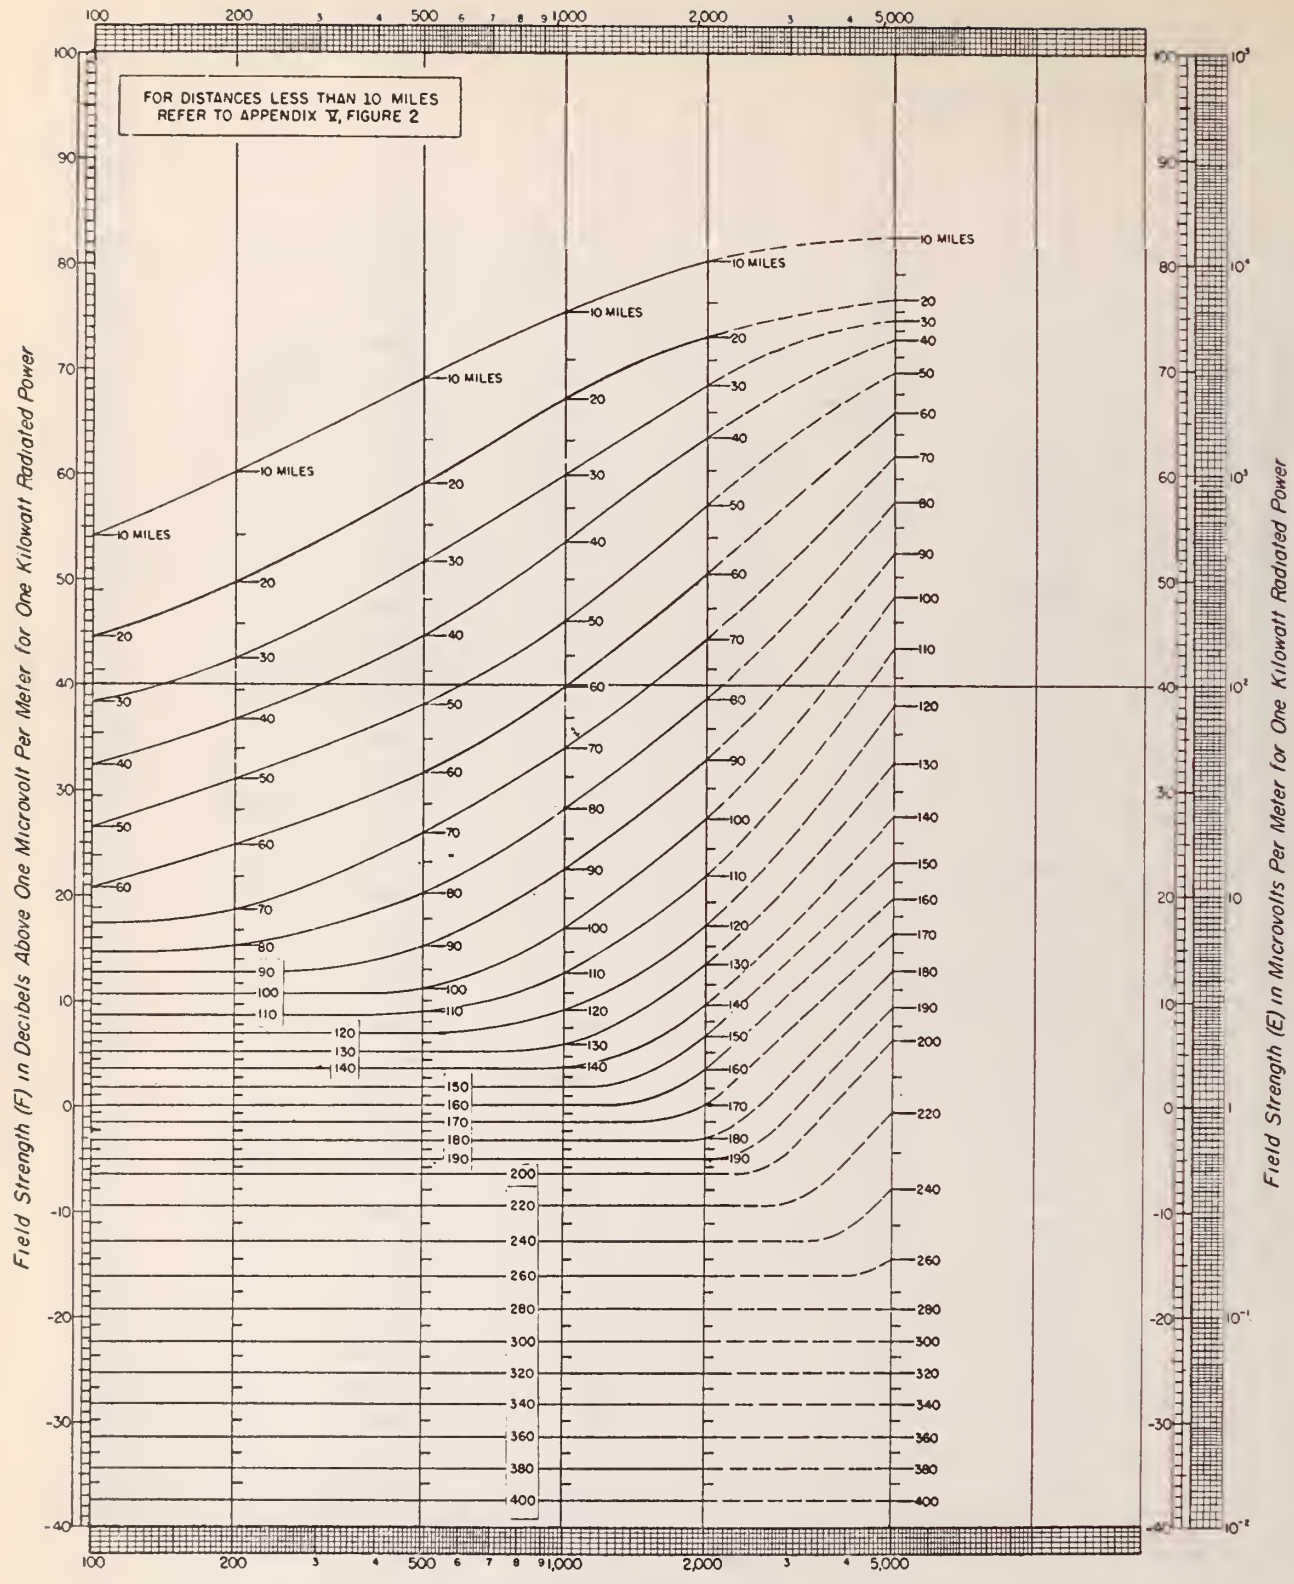
EXPECTED FIELD STRENGTH EXCEEDED AT 50 PERCENT OF THE POTENTIAL RECEIVER LOCATIONS FOR AT LEAST 50 PERCENT OF THE TIME AT A RECEIVING ANTENNA HEIGHT OF 30 FEET.



APPENDIX V

FIGURE 3 - TELEVISION CHANNELS 2 - 6

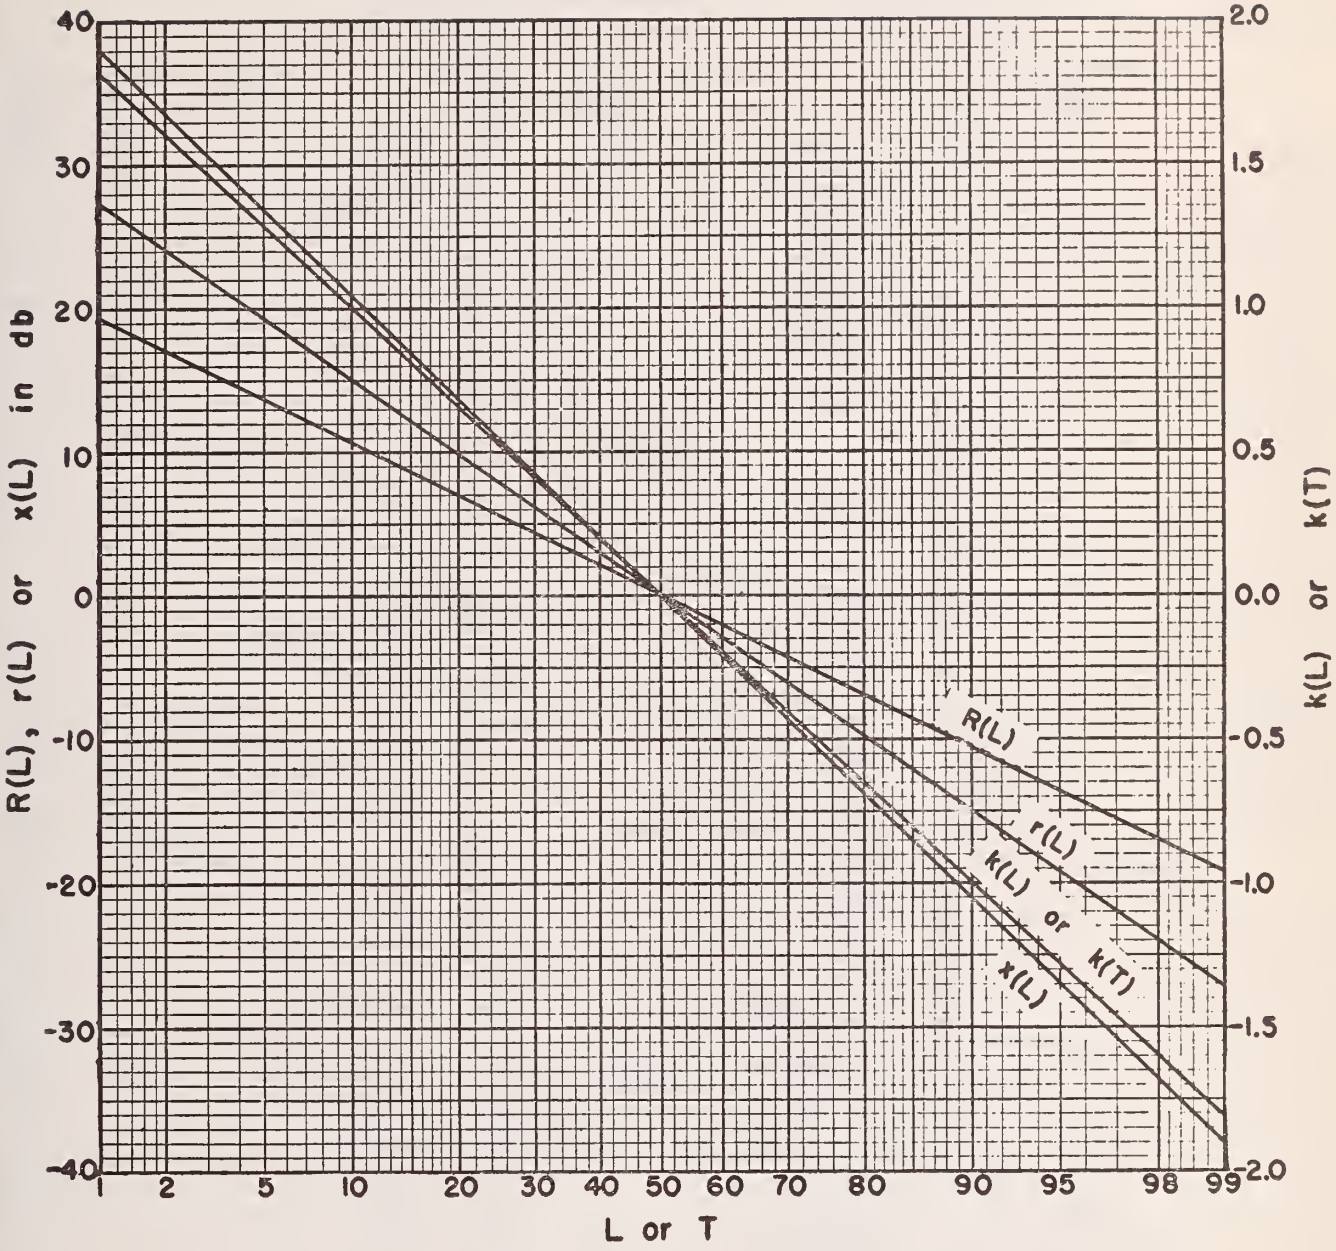
EXPECTED FIELD STRENGTH EXCEEDED AT 50 PERCENT OF THE POTENTIAL RECEIVER LOCATIONS FOR AT LEAST 10 PERCENT OF THE TIME AT A RECEIVING ANTENNA HEIGHT OF 30 FEET.



APPENDIX V

FIGURE 4 - TELEVISION CHANNELS 7 - 83

EXPECTED FIELD STRENGTH EXCEEDED AT 50 PERCENT OF THE POTENTIAL RECEIVER LOCATIONS FOR AT LEAST 10 PERCENT OF THE TIME AT A RECEIVING ANTENNA HEIGHT OF 30 FEET.



EXPECTED PERCENTAGE OF THE RECEIVING LOCATIONS, L, OR PERCENTAGE OF THE TIME, T, AT WHICH THE ORDINATE VALUE WILL BE EXCEEDED

APPENDIX V, FIGURE 5

Appendix C—Table of Assignments

Proposed Allocations by States and Cities: VHF-UHF

United States and Territories

Channels identified with an asterisk (*) are reserved for non-commercial educational stations in accordance with Paragraph VI of Appendix A

Full Military Impact in '52—Wilson, *page 10.*
Second Quarter Controls Will Bite, *page 10.*
Blue-Book for TV Trade-Ins Proposed, *page 13.*
Output and Trade at Lower Levels, *page 13.*

I—BLUE CHIP BUSINESS OF TELECASTING: When we tell you that one telecasting station alone grossed $4,000,000 in time sales last year...that a dozen or more skirted or exceeded the $1,000,000 mark...that deficit operations among the existing 107 stations are now the exception rather than the rule --

When and if FCC's third and latest freeze-lifting plan (see Vol. 7:12 and text of TV Allocation Report) is actually adopted...even with its big slice of non-commercial educational channels, which "educators" may or may not apply for --

When it becomes clearer that the freeze really is going to be lifted...that transmitters and towers etc., despite the defense economy, can really be had...that the uhf are practicable and receivable --

Then you're going to see a veritable "gold rush" for commercial channels, mainly by existing radio broadcasters but also by new enterprisers.

Immediate quarry of most, of course, will be the tried-and-proved vhf, with uhf facing prodigious task (as did FM) of building audience from scratch.

Actually, some 400 applications are already on file (see TV Factbook No. 12 with weekly Addenda to date) -- but most of these will need overhauling in light of new channeling, new power and antenna standards, new local situations. That is, presuming the proposed new allocations are finalized -- still long way off (Vol. 7:12).

* * * *

Station grossing $4,000,000 last year was WNBT, NBC's New York key, with base rates of $2000 or $2500 per hour, $400 or $500 per minute, prevailing most of the year. (Rates currently quoted are $3250 & $675.)

WNBT's gross was doubtless highest of any station, though it can be assumed other network keys in New York did well into 7 figures, too. Indeed, 4 of NBC's 5 TV outlets operated in black last year -- Chicago's WNBQ pushing $2,000,000. Only one in red is its Hollywood KNBH (though other Hollywood stations are in black) and its excessive overhead is now being reduced for hoped-for profitable 1951 operation.

Figures are cited to point a trend -- namely, that this telecasting business is going like the proverbial house afire. For if WNBT did that much business in 1950, it's fair assumption it will do half again more this year -- considering its higher rates and the unabated demand for time.

And it's fair to assume that will be pattern of other existing station operations -- in the smaller cities as well as the big.

Small wonder the "ins" are all delighted with their pioneering TV ventures (which generally didn't turn profitable until latter part of last year and still represent huge investments and losses yet to be written off). Small wonder, too, that you seldom hear of a TV station for sale.

* * * *

Gross and profit figures of individual stations, TV or AM, are seldom made public -- for understandable reasons. But AM stations grossing $1,000,000 or more

Copyright 1951 by Radio News Bureau

APR 2 1951

are relatively few (albeit medium is 30 years old). And the highest time rate ever quoted in AM is WCBS's current $1350 per hour (Vol. 7:1).

Except possibly for network keys, we doubt whether any AM station other than Cincinnati's WLW has ever pushed $4,000,000. WLW has long been reputed to be AM's biggest. In 1947, it grossed $4,442,410 (profit $1,261,975); in 1948, it did $4,-660,809 (profit $1,489,043) -- these figures available only because they came out in record of proposed WHAS & WHAS-TV purchase deal in early 1949 (Vol. 5:1).

Point is that the blue-chip telecasting business, station for station, is fast outstripping its parent AM in dollar volume. Like its counterpart TV-radio manufacturing business, it's the fastest-growing in America -- slowed down only by 31-month-old freeze.

II—BLUE CHIPS $105,800,000 IN 1950: Our prediction that TV networks and stations would do $100,000,000 in gross time sales in 1950 (Vol. 6:52) is fully borne out in FCC's report on telecasting industry's estimated revenues, expenses and profit, released this week. This mimeographed document (Report No. 51-308) should be studied carefully by all concerned with the business of telecasting.

It will be recalled NAB estimated 1950 TV grosses would run $70-80,000,000 and Broadcasting 1951 Yearbook said $83,772,000. FCC auditors (only ones really in position to get full data) show figure of $105,800,000, more than triple $34,300,000 they reported for 1949. Report shows the 4 networks and their 14 O&O stations accounted for more than half, or $55,000,000; that 93 stations took in $50,800,000.

Whole industry's deficit (before Federal taxes) was $7,900,000, as against $25,300,000 in 1949. Networks with their O&O stations ran deficit of $9,000,000 (resulting from $10,500,000 loss in network operation, $1,500,000 profit on their 14 stations) as against $12,100,000 deficit in 1949. But 54 stations reported profitable operations during 1950, more than half of these showing net before taxes of $100,000 or more, 8 showing earnings in excess of $400,000.

Profit showings were best among interconnected stations, 47 out of 79 operating in black; in non-interconnected cities, only 7 out of 27 showed profit. One-station interconnected cities were best, average profits of 29 running $90,000.

* * * *

FCC's AM-FM financial report isn't ready yet -- but TV report includes table showing how TV measures up against radio revenues in some metropolitan areas:

In New York, with 34 aural and 7 TV stations, TV accounted for $12,970,000, or 33.5% of total 1950 broadcast revenues; Los Angeles (27 aural, 7 TV), $7,711,000, or 39.7%; Chicago (28 aural, 4 TV), $7,003,000, or 30.8%; Philadelphia (16 aural, 3 TVs), $3,968,000, or 37.2%; Detroit (12 aural, 3 TV), $3,065,000, or 27.1%; Baltimore (10 aural, 3 TV), $2,297,000, or 37.7%; Cleveland (9 aural, 3 TV), $2,215,000, or 32.6%; Washington (17 aural, 4 TV), $2,100,000, or 32.3%; Cincinnati (7 aural, 3 TV), $1,516,000, or 17.9%; San Francisco (20 aural, 3 TV), $1,432,000, or 19.9%; Columbus (4 aural, 3 TV), $990,000, or 38.5%.

These are only a few of the revealing figures in FCC's report. With higher rates in effect this year, with time increasingly at premium, with better know-how, it's reasonable to expect telecasting will exceed $200,000,000 in 1951. That's in time sales alone -- doesn't include artist fees, production and film costs, etc.

Network TV-Radio Billings

February 1951 and January-February 1951

NETWORK TV time billings are now running better than half network radio's, as shown in Publishers Information Bureau report for February. Network TV billings for month were $7,804,550, radio $14,957,460. For Jan.-Feb. combined TV billings were $15,921,656, radio $31,624,172. Month's TV billings compare with $1,751,862 in February 1950 and $8,082,876 in January 1951 (Vol. 7:10)—first time any month went under preceding month, due probably to fewer days. Network radio slipped in February to $14,957,460 from $15,383,320 in February 1950 and $16,629,928 in January 1951 (Vol. 7:10). PIB figures for TV exclude non-reporting DuMont:

	February 1951	February 1950	Jan.-Feb. 1951	Jan.-Feb. 1950
NETWORK TELEVISION				
NBC	$ 3,949,360	$ 978,243	$ 8,136,582	$ 2,020,396
CBS	2,600,339	570,708	5,201,504	1,211,530
ABC	1,254,851	202,911	2,583,570	436,860
Total	$ 7,804,550	$ 1,751,862	$15,921,656	$ 3,668,786
NETWORK RADIO				
CBS	$ 6,116,911	$ 5,609,636	$12,972,841	$11,741,703
NBC	4,731,626	5,204,674	9,947,573	10,938,567
ABC	2,682,218	3,167,607	5,734,166	6,705,370
MBS	1,426,705	1,401,403	2,969,592	3,080,291
Total	$14,957,460	$15,383,320	$31,624,172	$32,465,931

CRITICS DISSECT END-OF-FREEZE PLAN: TV allocation plan won't be changed easily -- you can count on that.

General FCC attitude on its proposal (see Vol. 7:12 and TV Allocation Report) is that plan is final in basic philosophy, that it will take completely new and earth-shaking argument to effect changes, but that a few bets may have been overlooked in assignments to individual cities.

And don't expect anything to shake freeze loose for many, many months. Even "partial" unfreezing -- new uhf stations, more power for existing vhf, new vhf stations in Territories -- could turn out to be impractical in many places.

Real end of freeze -- new stations on air -- can scarcely come before 1952, and probably well into the year.

Educational channel reservations are what stick in most aspirants' craws. They believe weakness of such reservations will become readily apparent to FCC during city-by-city hearings starting May 23 -- doubting whether many educators will make convincing showings. Some are really incensed, speaking of "socialized TV," "two systems of telecasting," etc.

Look for plenty of political repercussions, too, as applicants go to their Congressmen and complain: "Look what they did to our State and cities."

Someone might take plan to courts, contending educational reservation is illegal "prejudgment" of applicants. Decision in color case, when handed down by Supreme Court (see p. 6), might have bearing on such litigants' chances.

FCC Bar Assn. will ask for oral argument before city-by-city hearing, rather than after (as FCC proposes). Supported by Comr. Jones' dissent, it will contend that fixed allocation, requiring rule-making for changes, is both illegal and administratively unfeasible. But NARTB has gone along with idea of fixed plan.

DuMont will certainly attack basic plan when it files comments, since proposal rejects DuMont's painstaking 1949-50 blueprint for 4-network competition, non-intermixing of vhf-uhf (Supplement No. 68).

CBS is bound to argue vigorously for more commercial vhf, especially in its key outlet cities -- Chicago, Boston, San Francisco, etc.

Yet ABC, which has as much to lose as DuMont, network-wise, but owns full limit of 5 stations, feels over-all plan is sound. And NBC, satisfied, is best situated of all -- with strongest network ties plus 5 key stations of its own.

* * * *

What plan means to networks is readily apparent when you tote up commercial vhf channels proposed: 188 one-station cities, 93 two-station, 19 three-station, only 6 four-station, only 2 seven-station, none with 5 or 6 stations. Many insist this means "two-network monopoly."

But argument from FCC runs this way: "DuMont plan was good job, and fine from network point of view, but artificial and wasteful from standpoint of full channel utilization. If our plan turns out to promote monopoly, remember that we have a pending proceeding designed precisely to eliminate monopoly." [See network "equalization" proposal, Vol. 6:40-48 and Supp. No. 71.]

"Uhf must come along and alleviate problem," FCC argument also goes. "Even if uhf is long in coming, we must make full use of vhf, which we have done."

But everyone wants vhf, regarding uhf as the "leavings". With uhf an economic unknown, some observers visualize eventual mergers of networks.

CBS can't be very happy with FCC nowadays, as it balances dubious color victory against allocations which would stymie it from owning stations (except possibly via through-the-nose purchases) in "life's-blood" markets. Already, CBS is being criticized by some of its AM affiliates who charge they were advised to stay out of TV when channels were to be had for the asking.

But vigor of opposition to FCC's plan may be tempered somewhat with knowledge that the longer the fight the longer the freeze remains.

Many technical and procedural questions won't be answered until FCC has pondered all comments after May 8 deadline. For example:

Suppose uhf freeze is lifted before vhf. Should applicant compete for uhf? And, if he wins, can he be foreclosed from requesting vhf when latter are available?

It may prove impossible to lift uhf freeze in intermixed vhf-uhf cities, if FCC can't find safe procedural answer.

Will some educators press for commercialization, partial or otherwise? Will such stations as old and profitable WWL, New Orleans, owned by Loyola U, be content with non-commercial stations or will they compete for the few remaining commercial channels? Will Iowa State's pioneer WOI-TV, only present educationally-owned station, choose to relinquish income-bearing and audience-winning network commercial shows, even though it doesn't have to?

A technical criticism raised is that FCC seems to be counting on far greater uhf coverage in rough terrain than it's likely to get. But FCC frowns on idea of powers over 200 kw, because of tropospheric interference.

* * * *

Question of equipment availability -- vhf and uhf transmitters, uhf receivers -- will get hotter as time goes on. Vhf outlook remains reasonably good (Vol. 7:11). Uhf is something else, depending on demand, manufacturing time, laboratory development (Vol. 7:12).

Uhf receivers face same problems, with demand and materials the governing factors. Only one manufacturer, Zenith, is currently promoting uhf angle, claiming its sets can be readily adapted. Most set makers have uhf units on the boards, waiting to see what FCC's plan looks like. Some say Commission gives impression it thinks that sets covering uhf, color, or what have you, can be turned off and on like a faucet.

NPA won't stand in way of transmitter construction -- little question about that, for present at least -- since relatively small amount of material can build a lot of transmitters. In fact, NPA officials were over to FCC recently to study problem. Only question they have, apparently, is whether NPA should "expedite" materials for transmitters.

Steel for towers is another thing, may prove stumbling block for some applicants. But many stations can use present AM or FM towers.

* * * *

Note: A few errors in allocation plan have turned up, inevitable in such complex compilation, so we've listed our own and FCC corrections to our TV Allocation Report in TV Addenda 12-L herewith. Working with FCC engineers, we plan to issue errata sheet shortly, covering all discrepancies. [Among these is asterisk beside channel for WOI-TV, Ames, Ia.; it should be removed.]

FILM PEOPLE BRIDLE AT FCC 'ADVICE': Motion picture leaders don't like what they regard as gratuitous advice from FCC about releasing their films and stars to TV.

But the few aspiring to get into telecasting by way of station ownership were satisfied with long-delayed FCC report (No. 51-317), released March 29, which indicated they won't be excluded from owning TV facilities because of involvement in anti-trust proceedings.

It took Commission 2 years to arrive at conclusion it will consider movie applicants on case-to-case basis (Jones and Hennock not participating). And added was blunt warning that movie industry must not expect too much sympathy on applications if it persists in withholding first-run films and stars from video.

Moviemen don't like attitude that they must release their wares to top competition, say it's their business who shall use their product, their fealty is first to the exhibitors (who unanimously oppose such move). Moreover, there's the Petrillo ban -- entirely beyond their control.

Either FCC doesn't know facts of business life, one said, or somebody has it in for movie industry. No secret is expressed antipathy of some within the FCC -- abetted by Justice Dept. trust-busters -- to movie interests getting into telecasting (Vol. 5:5). And a prime mover in getting late films released to Phonevision was FCC Chairman Coy.

In deciding to fix no blanket policy, FCC set up criteria to judge each case: Whether anti-trust violations were willful or innocent, recent or long past. No special weight will be given to whether alleged violation was civil or criminal, or whether it pends trial or has been adjudicated.

Criteria apply also to other types of applicants and licensees, for under "anti-trust" proceedings FCC has issued only temporary licenses to NBC, DuMont, GE, Westinghouse, Paramount, among others.

* * * *

Telecasters and their audiences would, of course, be delighted to get first-run pictures -- but former aren't pressing the point yet. As prudent business men, they recognize that even if they paid $1000 per showing for such films (an exceedingly high rental in today's TV), and if each of the 107 present stations booked a showing, the mere $107,000 revenue would be bagatelle to the producer as against theatre boxoffice. One big theatre often brings in more, and of course neighborhood theatre attendance might also be shattered by TV competition.

Independent Theatre Owners Assn., through president Harry Brandt, called FCC report attempt "to blackjack the industry into committing hara-kiri." Producers and theatres have vested financial interests in their film properties and theatres pay prices making them economically feasible, he said. "Why should they then turn over these films to TV for almost nothing [when] they could realize good returns from theatrical distribution?" he declared.

"The FCC has made demands we wouldn't have the gall to make," said a TV spokesman. Not yet, anyhow -- not until there are many hundreds more TV outlets and they're strong enough to compete with exhibitors. And that, thanks to FCC's prolonged freeze, is still a long way off despite present "unfreezing" efforts.

* * * *

Note: Practical effect of FCC probe was to lead 20th Century-Fox to drop its 5-city applications in disgust, Warners to drop Chicago application. Today, Paramount Pictures owns KTLA, Los Angeles; United Paramount WBKB, Chicago. Only other theatre interests owning TV stations are Wometco (WTVJ, Miami) and Kallett (WKTV, Utica) -- but there are quite a few theatre interests involved in the nearly 400 pending applications (see TV Factbook No. 12 and Addenda to date).

'HIDDEN ASSETS' IN THE FILM VAULTS? Financial worth of film companies could be substantially enhanced by TV market, present and potential, for feature films now vault-bound because of (a) Petrillo, and (b) exhibitors.

No advocate for release of such films to TV -- not yet, anyhow -- Paramount v.p. Paul Raibourn made this point in recent talk before New York Assn. of Customers Brokers. He's a financial man, has long been leader in effort to awaken movies to impact of TV, so his words bear close scrutiny.

He cited case of one company (rather obviously, Republic) whose asking price for TV rentals of pictures (carried on its books at $1 each) is exactly equivalent to the $4 per share at which its stock was currently quoted.

Did Mr. Raibourn's rather circumlocutory remarks, which were published in March 15 Commercial & Financial Chronicle, mean he foresees "gold mine" when his companies and others release their films to TV? Either to the present 107 stations, or when there are many more on the air?

We asked him that -- but he doesn't say. He merely points out that producers over last 20 years have invested about $5 billion in films. "There will be a lot of water over the dam before this kind of value is played with lightly," was his cryptic reply to inquiries seeking elucidation.

On same subject, Variety recently estimated "TV worth" of films in vaults of 8 major producers at $250,000,000. Variety toted 4057 features, 6000 shorts, several score serials (called "best" for TV) in vaults of MGM, 20th Century, Paramount, Warner, RKO, Columbia, Universal, Republic.

Aside from his widely quoted hint of "hidden assets" in storage films, Raibourn spoke about TV's impact on film business. He doesn't think it's to blame for more than 10% of current decline in boxoffice, won't account for more than 20-30%

when it expands to a national service. Movie industry's income is down now, he said, because of (a) drop of 50-60% in returns from foreign shows, and (b) drop of 30% in domestic attendance.

COLOR CASE PUZZLES SUPREME COURT: Supreme Court granted more delay to compatible color proponents this week -- by withholding start of commercial CBS color until final decision -- while CBS advocates labored desperately to stave off still more delay. During March 26-27 oral argument, it was obvious that greatest fear of U.S. Solicitor General Philip Perlman and CBS's Samuel Rosenman was that Court might send case back to lower court or to FCC for more thorough review or reconsideration.

If anyone predicts Court's decision with accuracy, it's sheer luck, since justices' questions had both sides alternating between exhilaration and dejection.

Whatever the outcome, students will certainly find case an extraordinary one -- in Court's obvious bewilderment about what it's required to do or can do; in lower court's "decision without a decision," (Vol. 6:46); in speed with which it reached highest Court; in time allowed for argument (5 hours); in maze of technical jargon; in spate of cross-allegations regarding motives.

Most perplexing to justices was element of haste -- being told that the "when" of their decision is as important as the "what". And, permeating whole fracas, was the unspoken fact of Korean war's impact on industry -- the simple fact that "color now" is academic regardless how the bitter litigation turns out.

Decision may come any Monday from now on. Court term ends in June, and new term starts Oct. 8. Traditionally, Court gets out decision during term in which case is heard, but we could elicit no prediction from CBS's Rosenman, Emerson's Rifkind or RCA's Cahill.

* * * *

Some strong minority opinions are expected, since each justice, like the fabled blind men, seemed to perceive a different part of the color "elephant".

Justice Frankfurter seemed to smell "monopoly like the BBC" in FCC's practice of setting up single standard, feared practice tends to negate "the history of science in achieving the impossible." In other comments, he seemed to sustain Commission's powers of discretion.

Justice Black was also concerned whether FCC had right to fix single standard and whether Commission wasn't foreclosing scientific advancement.

Justice Jackson, silent during most of argument, finally asked Rosenman:

"What is this court supposed to decide? We're not technically qualified, of course. If we're not supposed to decide which system is best, what's left for us to decide?"

Case should never have reached courts, replied Rosenman.

The "happy solution" -- a universal receiver which would get both CBS and RCA color -- was diligently probed by several justices inquiring into possibility of multiple standards. Rosenman said such receiver isn't possible, while Cahill reported that RCA had introduced diagram of such set during hearing.

Justices Vinson and Clark seemed to lean towards CBS at times. Former asked Cahill: "Doesn't FCC have the responsibility of seeing good color goes on the air?" Latter appeared impressed with CBS's argument of convertibility of existing sets, unexcited about compatibility argument, told Cahill:

"I want color. That's the objective, isn't it? How much will your color sets cost?" Cahill had some trouble, since RCA's major answers to convertibility and price have come since color decision. CBS was also bursting with desire to tell about post-hearing developments -- such as 17-in. drum (Vol. 6:52).

Lower court's decision obviously irritated several justices, notably Jackson. He considered lower court quite remiss in passing the buck and frankly admitting it. Other justices pointed to recent Universal Camera and Pittsburgh Steamship cases, in which they had held lower courts must really dig into facts.

Arguments of both sides were much same as in Chicago court (Vol. 6:46). RCA stressed compatibility and quality of its system, contrasted it with incompatibility

and performance limitations of CBS's, contended FCC arbitrarily closed its eyes to RCA progress -- in face of almost unanimous expert opinion.

Emerson said it had reputation to uphold, feared reactions of 700,000 Emerson set-owners when their sets blacked out at CBS-type colorcasts, argued FCC was attempting to regulate set manufacture through "bracket standards" device, and that Comr. Jones had an "obsession for color now" regardless of consequences.

CBS reiterated that its system is good, ready, simple, cheap, that FCC conducted fair and exhaustive study before arriving at decision. It contended that FCC was justified in ignoring RCA's post-hearing claims, because latter had presented FCC with nothing but "a series of broken promises." Furthermore, Judge Rosenman said, Commission has "left the door open" to RCA or anyone else who can come up with a decent system. "If our system isn't adopted," he warned, "you will have no color." At which Justice Frankfurter snapped: "And so what?"

IBEW's main pitch, through attorney Alfred Kamin, was that FCC was way behind the times in standardizing on a mechanical disc which permitted screens no larger than 12½-in.

* * * *

Only new voice was that of Philip Perlman, the Solicitor General, a homely, gangling, unimpressive-looking man -- but a powerful advocate with a reputation for never having lost a govt. case before Supreme Court.

Beautifully briefed by FCC lawyers, he conducted an arm-swinging denunciation of RCA and rest of industry for being "opposed to color."

Lower court did study case carefully, he insisted, and it made the only decision it could, based on the facts. Pointing at Cahill and Rifkind, he said:

"RCA has a commanding position in the industry. Everyone pays a tribute to RCA, through its patent licenses. They don't want color. They're in the business of selling sets. Hold up the decision 2 or 3 years and they'll sell 30,000,000 or 50,000,000 black-and-white sets. Then, they'll come in with the dot-sequential system and make every set obsolete.

"Let the FCC action stand," he shouted, "or destroy its usefulness forever."

* * * *

You figure out what the Court's going to do. Then figure out what FCC will do when compatible system comes before it again -- as it surely will.

PROS AND CONS OF PRESIDENTIAL BOARD: A permanent 3-man presidential advisory group, with great powers over govt. communications (including military) but apparently none over FCC, is prime recommendation of President's Communications Policy Board (Vol. 7:2,6,7) in report released by White House this week.

Board of 5 eminent scientists and administrators sweated through 59 sessions over year's period, came up with 240 pages of meat and gristle for Govt. and industry to chew on. Report covers whole gamut of wire and wireless communications -- among other things tends to throw cold water on TV's chances for more vhf channels.

Report is likely to prove hot subject for some time, particularly since Sen. Johnson (D-Colo.) has great misgivings about permanent board idea. He's seriously exploring powerful medicine in form of legislation to give FCC powers which would render academic many proposed functions of new board. CPB recommended:

Formation of a "Telecommunications Advisory Board" (preferably 3 men, possibly one) in President's office, to act as sort of "FCC" for all govt. agencies maintaining communications facilities. Report said such board should:

(1) Take over President's job of allocations to govt. frequency users, control of all communications during emergency.

(2) "Stimulate and correlate the formulation of plans and policies to insure maximum contribution of telecommunications to the national interest, and maximum effectiveness of U.S. participation in international negotiations."

(3) Stimulate research on communications problems.

(4) Require all govt. "users" to justify frequency demands, cooperating with FCC in allocating between Govt. and non-Govt.

New board would have no jurisdiction over FCC, and report recommends

strengthening of FCC in "funds and in organizational structure" -- same for all other agencies with "large telecommunications interests."

* * * *

Senator Johnson reacts this way:

"I don't like to see the Govt. have priority over civilian users. It has a lot of frequencies tied up -- like a dog in the manger. The military must have what it needs for security purposes, but no more.

"I've been doing some thinking about legislation which would give FCC authority over govt. users, just as it has over civilian users. Govt. users would have to go through exactly the same procedures of publicly justifying their use of frequencies as everyone else does. When it comes to frequencies involving security, these can be handled in executive session.

"I don't find too much fault with other parts of the report."

Senate majority leader Ernest McFarland (D-Ariz.), whose chief concern has been wire services, hadn't yet read report, thus had no comment.

On Commission side, members seem unanimous in agreement that all govt. users should have to justify their demands to somebody -- rather than merely jockeying, through non-policy-making specialists, within Interdepartment Radio Advisory Committee (comprising interested govt. agencies). Criticisms voiced by some commissioners:

(1) Report calls FCC a "user", therefore presumably not totally impartial, apparently because Commission defends its non-govt. allocations. Commissioners insist that Communications Act makes it clear their sole criterion is "public interest, convenience and necessity."

(2) Emergency powers of President would fall into hands of new board. In prolonged cold war, board could conceivably get arbitrary and kick around such non-govt. users as TV, AM & FM stations.

* * * *

Question of more vhf for TV is covered in some detail, with no flat recommendations one way or other. But report certainly isn't hot about idea, making it clear that giving all vhf to TV would mean terrific disruption of many other services, notably safety of life and military, and leaving impression it thought number of channels to be gained would still be inadequate.

Report is wonderful compilation of data on little-known governmental radio makeup and activities; e.g., Govt. has 28.2% of useful spectrum between 30 mc and 30,000 mc, non-Govt. 45.7%, with 18.5% shared and 7.6% amateur.

Wire communications occupy much, if not most, of report. And nub of recommendations is that: "The Govt. should adopt the policy of maintaining the strength of the private competitive international communications systems." Thus, the much-advocated merger is frowned upon.

Full report is valuable addition to your files, may be obtained from Govt. Printing Office for $1. Title: "Telecommunications, A Program For Progress."

Makeup of Communications Policy Board, which expired with completion of report: Dr. Irvin Stewart, president of West Virginia U and onetime member of FCC, chairman; Dr. Lee A. DuBridge, president of California Institute of Technology; Dr. William L. Everitt, dean of Illinois U electrical engineering dept.; Dr. James R. Killian Jr., president of MIT; David H. O'Brien, retired Graybar v.p.

Twin bills affecting FCC, among other agencies, were introduced last week by Arkansas Sen. McClellan and 12 other Senators (S. 1139) and by Michigan Rep. Hoffman (H. R. 3307), proposed that: (1) "Any Commissioner may be removed by the President for inefficiency, neglect of duty, or malfeasance in office, but for no other cause." (2) "Upon the expiration of his term of office, a commissioner shall continue to serve until his successor is appointed and shall have qualified." (3) Chairman shall have exclusive and final authority in matters of internal management, relations with Congress, execution of policies.

No more vhf experimentation, says FCC, for anyone except "transmitting equipment manufacturers, research laboratories and others engaged in developmental work requiring the use of radiation." That's what it said this week in denying applications of Easton Publishing Co. and Lehigh Valley TV Co. for directional antenna work on Channel 8 (Vol. 7:7), in Easton-Allentown area, and Northwest TV Broadcasting Co., Portland, Ore., for propagation tests on Channels 3, 6 & 10 (Vol. 6:45). In latter case, Commission said that it didn't want people buying sets thinking service was to be permanently available.

Station Accounts: "Natural" for spring is WOR-TV's *Rose Garden*, 3 half hours sponsored by Jackson & Perkins, Newark (horticulture), describing planting and care of rose bushes . . . Local inventors and their creations provide material for *The Big Idea* sponsored on WCAU-TV, Tue. 7-7:30, by Philadelphia Savings Fund Society, thru Gray & Rogers; half hour permits 4 inventors to do their stuff . . . (Glass Wax), thru Campbell-Mithun Inc., Minneapolis; Stokely-Van Camp Inc. (Honor Brand frozen peas), thru Kelso Norman Adv., San Francisco; Sportsmen's Show (Los Angeles, April 12-22), thru Ted H. Factor Agency, Los Angeles; Nicolay-Dancey Inc. (New Era potato chips), thru Ewell & Thurber Associates, Chicago; Verd-A-Ray Corp. (Tee Vee light bulb), thru Jay H. Maish Co., Marion, O.; Comfi-Coil Inc. (vinyl plastic hassocks), thru Hammer Co., Hartford; Sun Oil Co., thru Hewitt, Ogilvie, Benson & Mather, N. Y.; Strohmeyer & Arpe Co. (Re Umberto olive oil), thru Charles W. Hoyt Co., N. Y. (WJZ-TV); Kenwill Corp. (Magikoter paint applier), thru Duane Jones Co., N. Y. (WABD); J. A. Folger & Co. (coffee), thru Grant Adv., Chicago (WHAS-TV); Daggett & Ramsdell Inc. (children's novelty soap package), thru Erwin Wasey & Co., N. Y.; Ideal Film & Supply Co. Inc. (Falcon cameras), thru Richard & Gunther, N. Y.; Columbia River Packers Assn. Inc. (Bumble Bee seafoods), thru Botsford, Constantine & Gardner, Portland; Artistic Foundations Inc. (Profile bras & Profile-Hi girdles), thru Thomas & Delehanty, N. Y.

Network Accounts: Wildroot Co. April 4 moves *Charlie Wild, Private Detective* on CBS-TV from alt. Fri. 9-9:30 to Wed. 9-9:30, thru BBDO, N. Y. . . . Allen B. DuMont Laboratories (TV sets) April 12 starts *Royal Playhouse*, second-run films of *Fireside Theatre* on DuMont, Thu. 9:30-10, thru Campbell-Ewald Co., N. Y. . . . Longines-Wittnauer Watch Co. considering sponsorship of musical series on CBS-TV, alt. Thu. 10:30-11, thru Victor A. Bennett Co., N. Y.; would alternate with Carter Products' *Crime Photographer* starting April 19, thru Sullivan, Stauffer, Colwell & Bayles, N. Y.

TV advertisers can save up to 19% by placing their business on a spot basis, rather than buying network, according to Katz Agency's new 8-page brochure titled *Straight Thinking on TV Costs*. After alluding to current complaints about high costs of network programs (Vol. 7:2-4,7-8), big rep firm makes following comparison of network vs. spot costs on half-hour, night-time program: On 35 interconnected NBC stations, $14,760; same on spot basis, $12,260. On 20 interconnected CBS stations, $8395.50; same on spot basis, $1639.50.

More rate increases reported: WBZ-TV, Boston, Feb. 1 raised base hourly rate from $700 to $1000, one-minute announcements from $125 to $200. On April 1, WSM-TV, Nashville, goes from $200 to $300 & $30 to $50; KRLD-TV, Dallas, from $300 to $400 & $45 to $60. On May 1, WMAR-TV, Baltimore, ups from $550 to $700, $100 to $125.

Personal Notes: Comdr. Mortimer Loewi, DuMont director, left this week on business trip to Europe . . . Marlo Lewis, handling Ed Sullivan, Frank Sinatra, Steve Allen shows, and Donald Davis, producer, appointed CBS-TV executive producers . . . Roy W. McLaughlin appointed mgr. of national TV spot sales, WENR-TV, Chicago, in separation of radio and TV now being effected: Edward Lynch handles WENR national radio sales . . . Albert V. (Bud) Cole succeeds Robert V. Brown as program mgr., NBC's KNBH, Hollywood . . . Wade H. Alley, ex-FBI, named program & public relations director, WHIO & WHIO-TV, Dayton, succeeding Lester Spencer, resigned to become mgr., WBKV, Richmond, Ind. . . . Wm. Elwell quits WCBS, New York, to join executive staff of WDSU & WDSU-TV, New Orleans, Lyman Clardy being named WCBS operations mgr., Rex Coston production director . . . Paul R. Martin, ex-Compton and NBC, joins Philip I. Ross Co. as TV-radio director . . . Ed Leftwich, ex-Young & Rubicam, now TV director of Masterson, Reddy & Nelson, program producers . . . F. J. (Joe) Kelley, onetime RCA fieldman, now mgr. of WTSP, St. Petersburg, Fla., named executive v.p. and a director of *St. Petersburg Times* . . . R. Morris Pierce, president of WDOK, Cleveland, wartime engineer for OWI, has taken leave of absence to work on Voice of America construction program, leaving Walberg L. Brown in charge.

George M. Burbach Jr., 41, son of the director of *St. Louis Post-Dispatch's* KSD-TV, died of heart attack in Hartford March 24. Formerly with NBC, he had been with various New York advertising agencies, and recently was instructor in TV at Fordham U. He is survived by his wife and parents.

———■———

TV hits moviegoing and radio listening hardest, newspaper reading least. That's conclusion of BBDO survey last November of leisure time activities of 5657 urban homes, released March 29. During average day, BBDO reported, 18% of persons in non-TV homes attend movies; only 12% in TV homes—a 33⅓% decline. Radio listening drops from 87% in non-TV homes to 67% in TV homes—a 23% decline. Survey showed average TV viewer spends 3 hours 24 minutes in front of TV set. Sunday newspaper readership is virtually same in non-TV and TV homes, 94% & 93%, respectively. Average reader of morning weekday newspaper in non-TV home spends 40 minutes, in TV home 37 minutes. Weekly magazine readership declined from 69% in non-TV homes to 60% in TV homes.

Screen Actors Guild was upheld this week by NLRB as the appropriate bargaining unit for all film performers—whether film is used on TV or in theatre. In decision, NLRB rejected TV Authority (union of live performers) argument that it should have jurisdiction over actors performing in film productions made especially for TV, called for elections within 30 days in major producer studios as well as independent units (Apex Film Corp., Bing Crosby Enterprises, Cisco Kid Pictures, Jerry Fairbanks, Flying A Pictures & Hal Roach Studios). Still pending is TVA request that it be authorized to represent all actors hired by TV networks for film programs.

TV stations may have to shut down during enemy air attack, unless FCC and military work out some plan permitting vhf stations to remain on the air. So far, that's somewhat dubious, according to best information we've been able to gather. Plans for keeping standard broadcast station on air during air alerts were revealed to 700-odd broadcasters and their engineers at closed FCC meeting in Washington March 26.

Only TV application this week was from WABB, Mobile, Ala. *(Mobile Register & Press)* for Channel 8.

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Mobilization Report
March 31, 1951

FULL MILITARY IMPACT IN '52—WILSON: Industry and the public won't feel defense program's full impact until early 1952, Defense Mobilizer Charles Wilson estimates in first quarterly report on U.S. rearmament. ODM makes most optimistic estimate yet of 1951 TV-radio production -- approximately 7,000,000 TVs, mere half-million under last year's output, 14,500,000 radios, about same as 1950.

Most military items -- including communications and electronics equipment -- "require months between placing an order and date of delivery, and some require 2 to 3 years," report notes -- meaning that many orders already placed won't be felt in terms of production for some time.

Military demand for electronics equipment "has scarcely yet been felt." Report says full impact will come "when the heavy end-products of war -- tanks, planes, automatically controlled weapons -- reach mass-production stage. Current near-capacity production level of the industry is approximately $4.5 billion." Although Govt. has so far given electronics scant aid in expansion, "we hope to be able to expand capacity further this year."

Approximately $23 billion has been obligated for military "hard goods" since June, and Defense Dept. is now letting contracts at rate of approximately $1 billion a week -- which, according to rough rule of thumb, should mean about $100,000,000 a week for electronics-communications.

SECOND QUARTER CONTROLS WILL BITE: Shortages and materials controls will really begin to bite into TV-radio production this quarter -- unless industry voluntarily pulls in its horns because of trade slowdown.

There won't be much military production to fill the gap, either. Defense orders will continue to come in -- but there'll be plenty of engineering, development, pilot runs, field testing, before military gives final go-ahead on full-scale production. With a few exceptions, defense orders for actual production of electronic equipment will continue at slow pace in second quarter.

Add to this picture the possibility of slowdown in mobilization program. There's much talk in Washington of letup in rearmament rate -- of pushing target date for full buildup from 1953 to 1954 or 1955. This would relieve, or partially head off, some shortages of strategic materials -- but it would slow down rate of military procurement even further.

Interlaced in this problem is question of controlled materials plan -- which would allocate steel, copper and aluminum according to end-use essentiality (Vol. 7:3,12). Though mobilization boss Wilson said March 26 that there's still some doubt whether Govt. will adopt CMP, most production officials, including NPA chief Fleischmann, say some form of CMP will go into effect July 1. However, it's expected that these controls will be far less extensive than originally planned.

Full effect of any CMP-type plan ordered into effect July 1 wouldn't be felt by industry until fourth quarter. Likewise, if there's any slackening in mobilization pace, it certainly won't register until last half of year. As for second quarter, the die is cast -- the bite is on.

As for prognostication, govt. electronic production experts shy at making any estimate. They insist things will be "tougher" but when you ask about possible output, they point to first quarter's 2,000,000-plus TVs -- and say they never dreamt industry could turn out that many, so why guess about next quarter?

* * * *

Many manufacturers anticipate 20-25% cutback in TV-radio production during second quarter. While they attribute this to shortages and materials controls, it's apparent they're really thinking of market conditions (see p. 13) -- though none will say so. A 25% drop in TV production would result in output about equal to last

year's second quarter (about 1,500,000). One manufacturer who specializes in higher-priced sets, incidentally, says his production will be down 40-50% "on basis of steel order alone."

* * * *

Here's the real dope on materials outlook for second quarter, based on best information available:

STEEL -- Most TV-radio manufacturers see steel as the limiting factor in second quarter production -- this because steel order M-47 is first one to affect them directly (Vol. 7:10-11). It limits each durable goods maker to 80% of amount of steel (by weight) that he used during average quarter of first-half 1950.

Some manufacturers are planning to cut weight of chassis by as much as 38%, others say they can eliminate 60% of steel in transformer cores by using line-connected circuits. The sooner these savings are put into effect, the less steel limitation will cut into their production.

If steel does prove to be limiting factor, TV-radio production may run zig-zag course during second quarter, with output dropping last week in April, last week in May and entire month of June. This is because M-47 doesn't let manufacturers use more than 40% of their quarterly steel ration in any month. If they produce the full 40% in April and in May, June's maximum permitted output will be half that for April or May.

But before quarter is over, it's possible that other materials may pose even bigger problems to set makers than steel.

* * * *

COBALT -- Under all-out NPA allocation since Feb. 1, progressively less of this scarce metal will be set aside for TV-radio this quarter. Computation of supply for April, just completed by NPA, shows sharp cutback in amount to be doled out for TV-radio uses. During March, TV-radio industry got 42,000 lbs., or 33% of its requirement. In April, it's scheduled to get 29,000 lbs., or 25% of requirements.

But set makers say speakers have been coming in O.K. -- at least, they haven't been major stoppage point so far. Average speaker now uses two-thirds less alnico (24% cobalt, 14% nickel, 8% aluminum, 3% copper, 51% iron) than last year. One magnet maker says his biggest worry at the moment isn't cobalt, but nickel.

Alnico magnets are widely used in picture tube focus units. While most manufacturers plan to redesign circuits to accommodate electrostatically-focused picture tubes (which require no magnets), none is known to have taken the plunge yet -- and no tube maker has been reported mass-producing the new type tubes. But it's safe bet that electrostatic tube will be industry standard by year's end.

COPPER -- A long-time sore spot, shortage of copper wire and wire-wound components is now near top of set manufacturers' list of production worries. Fabricators and wire mills have been feeling ever-tightening pinch since NPA Order M-12 took effect Jan. 1. Beginning April 1, fabricators will be permitted to use copper at 75% of their first-half 1950 rate, as compared with 80% in March, 85% in January and February. Wire mills will still be limited to 80%.

* * * *

NICKEL -- International Nickel Co. estimates that 80% of nation's supply will be reserved for defense priority orders, despite fact that Order M-14 "permits" fabricators to use it at 65% of first-half 1950 rate. Nevertheless, on basis of tube makers' estimates, it's possible coming crisis in receiving tubes (Vol. 7:11) may be forestalled until third quarter.

Entire nickel problem has been dumped in lap of newly planned high-level Electronics Production Board (Vol. 7:11-12), and it's most pressing item on board's agenda for next weekly meeting April 2.

Receiving tube manufacturers met March 27 with NPA (for list of those attending, see p. 12), and made these points: (1) Present production of military tubes is extremely low. (2) To keep tube plants going, 250,000 lbs. are needed in April, 225,000 in May, 200,000 in June for civilian production.

Most immediate shortage is in special type of nickel from which tube pins

are made. Tube makers urgently requested NPA's aid. If this emergency help in pin metal situation comes soon, production may hold up this quarter.

Some new set production will eventually have to be sacrificed to meet demand for replacement tubes, NPA told tube makers -- emphasizing that tube industry can hope for only enough nickel to survive until big military production begins.

TUNGSTEN -- Tube industry will begin to feel shortage in June. April's allocation, first under NPA Order M-30 (Vol. 7:4,8), will be made next week. First 2 months' allocations aren't expected to work hardship on tube industry.

Tungsten is used in all tube filaments, in grids of subminiature types and leads of some acorn and other small tubes. NPA officials warn that military will take huge chunk of nation's supply (all imported) in third quarter, and that Govt. will listen sympathetically to tube makers' tungsten problems only if they can prove they're practicing maximum conservation.

* * * *

ALUMINUM -- On paper, there's been no cut in permitted use by fabricators -- 65% of their rate of consumption in first-half 1950 (M-7). But NPA Order M-5, as amended March 26, requires aluminum producers and fabricators to reserve average of 60% of output for defense orders. This is 15% more than they were required to set aside in February and March.

Most set makers are eliminating aluminum parts, such as brackets, cup over end of picture tube, etc. But capacitor manufacturers can't get along without aluminum. They've already felt the squeeze, and it's getting tighter.

CADMIUM -- This metal, used in TV-radio for plating chassis, isn't reported particularly short now. There's some doubt whether Order M-19 bans its use on TV chassis (Vol. 7:11), but clarification is expected soon. Manufacturers should be lining up substitutes now, since it may be only matter of time before there's an airtight ban on its use.

Plastics, rubber, chemicals, used in components, are already short on spotty basis, and like almost everything else, will become scarcer.

During second quarter, NPA says it will continue to lend sympathetic ear to emergency shortage problems -- and especially those of smaller firms where inability to obtain a part may spell disaster.

Mobilization Notes: Indicating military's increasing interest in use of TV, Signal Corps this week ordered camera chain and other industrial TV equipment from RCA. Among other Signal Corps contracts awarded this week was one to RCA for 5,928,983 electronic tubes of 67 different types. Dollar values of contracts are no longer announced, because of security regulations.

* * * *

Mobilization Personals: Col. Gilbert Hayden, ex-chief of Air Materiel Command Electronics Subdivision, Wright-Patterson Air Force Base, named Air Materiel Command deputy chief of engineering and nominated by President Truman for promotion to brigadier general . . . Col. William M. Talbot, retired Air Force signal officer, appointed director of Civil Defense Administration's newly-created Warning & Communications Div. . . . Rex L. Nicholson, California implement and tractor company executive, to become special assistant to Civil Defense Administrator Millard Caldwell April 1 . . . Luther W. Hill, president of Carolina Telephone & Telegraph Co., appointed director of NPA Communications Equipment Div., succeeding Brig. Gen. Calvert H. Arnold, who will continue with division temporarily as consultant.

Molybdenum, used in power tubes and to small extent in some receiving tubes, will be placed under complete govt. allocation starting May 1 (NPA Order M-33, as amended). Nickel and tungsten shortages, however, are expected to have far greater effect on tube production.

Some idea of mineral expansion program by DPA may be gained from these figures, submitted to House Appropriations subcommittee early in March by Administrator Wm. H. Harrison: For rest of fiscal year, $4,460,000 has been earmarked for purchases of chromite, beryl, columbium-tantalum, manganese and mica. In addition Defense Minerals Administration will commit $336,000,000 during next 3 months to buy, at above-market prices, quantities of chromite, cobalt, fluorspar, manganese and nickel. DMA also plans to purchase, at or below market price, aluminum, copper, molybdenum, tungsten. DMA also revealed it was thinking of $65,000,000 loan to Canadian Falcon Bridge Nickel Co. to build nickel refinery in Canada or U. S. (Falcon now refines all its nickel in Norway); $70-85,000,000 loan to Copper Range Co. to expand copper mining at White Pine, Mich.

Members of Receiving Tube Industry Advisory Committee, who discussed nickel shortage with NPA officials March 27 (see p. 11): J. M. Lang, GE; J. Q. Adams, Hytron; W. J. Peltz, Lansdale (Philco); K. C. Meinken, National Union; Carl Hollatz, RCA; N. B. Krim, Raytheon; R. E. Carlson, Tung-Sol; R. F. Marlin, Sylvania.

NPA extended to second quarter the provision in copper order permitting manufacturers whose plants were shut down for more than 15 days during first-half 1950 to omit month or months during which shutdown occurred from base period computation (Direction 2 to M-12, see Vol. 7:5).

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
March 31, 1951

BLUE-BOOK FOR TV TRADE-INS PROPOSED: If TV industry can show Federal Reserve Board how trade-in values can be "blue-booked," as in the automotive industry, there's 50-50 chance Regulation W might be revised to permit retailers to apply such trade-in values as down payments on new sets.

Industry committee came away with that sentiment from 90-minute conference March 23 with about 10 members of Federal Reserve staff in Washington.

Such a move would doubtless help TV sales immeasurably, for Regulation W is regarded as the chief contributor to TV's current inability to move big inventory. "There are plenty of people with good credit who want to buy new sets, but don't have the ready money," in the words of sales chief of one major manufacturer.

Regulation W now prohibits such transactions, requires 25% down payment on list price -- with trade-in values applicable only to balance.

Committee is working on details, may have plan in few weeks. Big problem is that TV-radio trade never had "blue book" like auto industry's. Trade-in value must bear "reasonable relationship" to the set's resale value. What makes for complexity is fact prices have changed so greatly over last few years; also, there are 100 manufacturers, and some have put out as many as 40 models in one year.

Since Regulation W is designed to hold down volume of credit sales, FRB staff ventured these observations:

(1) If regulation is revised to permit trade-ins on down payments, might FRB not find it necessary to make terms even more stringent -- perhaps raising them from 25% down and 15 months to 33 1/3% down and 12 months (as in auto purchases)?

(2) What about other consumer durables with resale market -- like refrigerators, washing machines, stoves, etc. -- shouldn't they have "blue books", too?

Committee which met with Reserve Board staff comprised: John Otter, Philco; Walter Stickel, DuMont; C. P. Baxter, RCA; Mort Farr, NARDA president; Herman Stein, Davega; James Secrest, RTMA.

OUTPUT AND TRADE AT LOWER LEVELS: It's possible TV production slide has begun -- for first quarter's 12th week ending March 23 resulted in output of only 161,602 receivers (5801 of them private brand) as against preceding week's 181,008 (Vol. 7:12). Factory inventories at week's end rose to 235,142 from preceding 196,326.

With one week yet to be reported by RTMA, industry's aggregate output for first 1951 quarter thus far is 2,038,245 units -- so it looks like quarter will end with about 2,200,000. This compares with 1,605,000 for same 1950 quarter and about 2,500,000 for record fourth 1951 quarter.

Radio slipped a bit, too, down to 330,253 from preceding week's 364,916, making 12-week total 3,978,099. Factory inventories at week's end were 136,037 compared to 142,247 the preceding week. March 23 week's output comprised 190,260 home radios, 112,597 auto, 27,396 portable.

* * * *

Business at retail level, meanwhile, continued too slow to unload bloated inventories -- but flurry of distress selling and price-cutting seemed to have subsided somewhat and by and large the price line was being held.

No major manufacturer followed Admiral's lead (Vol. 7:11) in cutting lists at low end of his line -- generally the table models selling around $200 -- but just about all (including Admiral) admit they're now concentrating on lower-priced models in their current production.

Motorola, in fact, reveals it's making no combinations at all starting this week and continuing indefinitely. Its second quarter TV cutback is 20%. All through the industry curtailed operations, mainly reduced work weeks, are evident. Chicago

AP report March 30 noted "large scale layoffs." UP reported about 1250 laid off by Admiral, 400 by Hallicrafters, "some" by Zenith, some by parts makers -- labor people estimating total of 10,000 out and companies calling them "temporary furloughs."

Huge advertising campaigns, mostly factory financed, are under way to move pileup of merchandise, variously estimated at 1,000,000 or more sets. Only a few big companies claim their distributors and dealers aren't overloaded, these few saying they "planned" for the Easter and second quarter hiatus but admitting fear of being dragged down in a potential demoralization of markets.

Business was "normal" up to mid-March, they say, but distributors-dealers were led to expect "abnormal" purchasing to continue. Hence they loaded up for big demand and continued easy selling that didn't materialize, so that now their credit positions are precarious and they refuse to accept more shipments.

* * * *

Everyone seems to have own theory how to meet situation, most often heard plaint being against Regulation W. Few believe dragging market will prevail long, and we're still told by factories that steel order (see p. 10) and other restrictions will inevitably mean less output and inevitable shortages later this year.

One refrain that runs through much of the master-minding is epitomized in this remark by the sales chief of a major producer: "We're competing for the consumer dollar now, not just with each other." In other words, TV trade's job is to persuade buyers to choose their goods ahead of automobiles and other durables.

Topics & Trends of TV Trade: TV-radio achieved third place in home furnishings industry's record 1950 retail sales, being credited with $3 billion by Gen. Lawrence H. Whiting, president of American Furniture Mart, Chicago. Household appliances led with $3.6 billion, retail furniture was second with $3.5 billion, reversing their 1949 positions. Total for every branch of home furnishings industry was estimated at record $16,511,000,000, compared with $12,852,000,000 in 1949 and $13,492,000,000 in 1948. Gen. Whiting predicted first 1951 quarter will probably exceed comparable 1950 quarter's dollar volume, first 6 months probably run equal to same 1950 period, but final 3 quarters will see "a slowing down due to the mobilization economy."

* * * *

Cross-section survey of 1882 respondents to *Good Housekeeping* "consumer panel" last December, just issued, discloses 363 already owned TVs—and only 4.9% of 1519 not then owning sets planning to buy in 30-90 days. But 24.9% said they'd buy within year or two, 35.9% said they'd wait longer, remainder had no plans to buy. Of those not buying within few months, 26.2% said they couldn't afford to, 25.8% said they were waiting for improvements (better programs, better pictures, color). Composite of set features desired showed new purchaser wants 16-in. mahogany console with AM-FM-phono, in conventional, modern or period styling, costing $200-$300.

February excise tax collections for TV-radio sets, phonographs, components totaled $11,349,880, down considerably from high of $19,439,774 in January (Vol. 7:10), but considerably above $3,373,865 in February 1950. Reason January collections leaped so high was because that was first full month reflecting new 10% TV collections which began in November. Total excises collected from TV-radio industry for 8 months from July 1950 were $59,490,975, compared to previous 8 months' $25,263,982.

February receiving tube sales by RTMA members ran 36,821,794, of which 24,578,991 went into new radio or TV sets, 2,355,356 into other devices, with 8,237,372 for replacement market, 1,429,783 for export, 220,292 for Govt. Total was just under January's 37,042,303 (Vol. 7:9), but 48% above February 1950.

Trade Miscellany: Emerson to date has sold more than 700,000 TVs of the nearly 12,000,000 sets-in-use (Vol. 7:12)—disclosed by its counsel, former Federal Judge Simon Rifkind, during his Supreme Court argument in color case this week . . . GE's TV and radio sales first quarter 1951 were "far ahead" of same period last year, and "we expect to maintain a high sales volume in the months ahead," according to A. A. Brandt, gen. sales mgr. . . . Sheldon Electric, CR tube maker, is preparing to make radio receiving tubes, with full production end of April at plant in Irvington, N. J. . . . Zenith reports that by fall it will be able to occupy new 450,000-sq. ft. plant—comprising 2-story structure already up and adjoining 3-story building now being erected; they're located about 2½ miles west of its main Chicago plant.

New sets and prices: Raytheon 17-in. console with AM-phono at $469.95 . . . Kaye-Halbert 20-in. walnut console at $299.95; mahogany, $319.95; blonde, $339.95 . . . Tele King 14-in. leatherette table at $169.95; 16-in. leatherette table at $189.95 . . . Sears Roebuck 14-in. plastic table at $199.95. Sears' new spring flyer advertises 16-in. table at $239.95 (formerly $279.95) and 16-in. console at $269.95 (formerly $299.95) . . . Muntz has cut prices on 17-in. leatherette table to $149.95; same in wood to $179.95; same in console to $219.95 . . . Magnavox, in April-May promotion, cut newly-introduced 20-in. Shoreham console from $445 to $395.

National Assn. of Cathode Ray Tube Manufacturers has been formed, with Charles E. Cohn, Arcturus, president. Organization comprises smaller CR manufacturers, with these other officers: Jacob J. Samuel, Sheldon, v.p.; Lester A. Landeau, Television Tube Research Laboratories, secy.; Thomas Stave, Eureka, treas. Board includes officers and Don Ferraro, Fidelity; Sam Antkies, Tel-O-Tube; Thomas Clinton, Thomas Electronics. Moses Shapiro, 575 Madison Ave., New York, is counsel.

Bendix Aviation president Malcolm P. Ferguson reported to stockholders at annual meeting March 28 that backlog of unfilled orders has jumped from $170,000,000 a year ago to $475,000,000 today—that February military shipments were almost 85% higher than same month last year, civilian 13% higher.

Financial & Trade Notes: Television-Electronics Fund Inc., open-end investment trust specializing in TV-radio securities, in unaudited report as of Jan. 31, 1951, released this week, shows total assets at cost of $4,981,934, net assets at value applicable to outstanding shares $6,125,746. As of Oct. 31, 1950, the figures were $4,878,588 & $5,560,-022, respectively. Net asset value per share of its 480,848 outstanding shares (out of 5,000,000 authorized) was put at $12.74 as of Jan. 31, up from $11.84 Dec. 31, 1950, and $10.98 on Jan. 31, 1950.

These were Fund's common stock holdings ($4,277,135 at cost, $5,490,300 at current market quotations as of Jan. 31), all showing enhancement since purchase save those companies listed in italics:

Admiral 5000, Aerovox 6000, American Bosch 9000, American Broadcasting 6000, American Phenolic 2000, AT&T 1000, Bendix Aviation 3000, *Clark Controller* 1000, CBS "A" 6000, Consolidated Engineering 2300, Corning Glass 2000, Cutler-Hammer 4000, Disney Productions 6500, *DuMont "A"* 6000, Eastman Kodak 5000, Emerson Radio 6600, Fairchild Camera 2000, Fansteel 3800, *Federal Enterprises Inc.* 2000, GE 5000, *Hallicrafters* 1000, *Haloid Co.* 1800, Hammond Instrument 1000, Hazeltine 2000, I-T-E Circuit Breaker Co. 1100, IBM 1155, International Resistance 3000, LaPointe Plascomold 5000, *Loew's Inc.* 6000, Mallory 1200, Minneapolis-Honeywell 6500, Motorola 5500, Muter 4000, Oak Mfg. 6000, *Otis Elevator* 4000, Owens-Illinois 2000, Philco 12,000, RCA 14,500, Raytheon 5000, Reliance Electric 2000, Remington Rand 7000, Sperry 3000, Sprague 5000, Sylvania 2000, *Tracerlab Inc.* 1000, Tung-Sol 2000, *20th Century-Fox* 5000, *United Specialties* 2500, Webster-Chicago 10,000, Westinghouse 6000, Zenith 2500.

In addition, 9000 shares of Conrac Inc., or 10% of outstanding voting stock, and 2400 shares of Television Associates Inc., 9.64%, are held in the fund, plus govt. bonds costing $100,000.

* * * *

Admiral notice of annual meeting April 12 discloses that, of 1,928,000 outstanding shares of capital stock, chairman-president Ross Siragusa and immediate family are owners or trustees of 794,904 (41.23%); John Huarisa, executive v.p., and family, 106,520; Richard F. Dooley, v.p., and wife, 67,516; Lynn C. Park, treas., 24,820; Maurice S. Despres, director, president of Dale-Connecticut Inc., New Haven distributor, and wife, 6288; Frank Uriell, v.p., and wife, 1200. Company on Nov. 13 purchased 72,000 shares from Kenneth D. Turner, retiring v.p., at $28.50. Remunerations for 1950 included: Mr. Siragusa, $127,703; Mr. Huarisa, $76,742 plus $75,000 bonus; Wallace C. Johnson, v.p., $30,576 & $30,000; Mr. Dooley, $17,217 & $16,500; Mr. Park, $19,765 & $19,000.

Radio & Television Inc. (Brunswick brands) reports 1950 sales of $2,118,105 and net loss of $36,467—but notes that Thomasville Furniture Co., Thomasville, N. C., in which it is 50% co-owner with Capehart, during 8 months ending Dec. 31, 1950 showed growth "little short of remarkable." Thomasville firm recovered $35,000 on a contested claim, reduced original $200,000 mortgage to $135,000 effected other economics; so that, having started fiscal year with deficit of $183,493, it ended year with surplus of $13,660. David E. Kahn is chairman of parent company, Herbert L. Weisburgh president, Alfred O. Englander v.p. & secy.

Oak Mfg. Co. reports earnings for 9-month period ending Feb. 28 were $2.06 per share on 461,149 shares then outstanding vs. $1.70 per share on 450,000 shares same period last year—with sales (unreported) said to be "well over 50% above the previous year."

Sylvania, reporting record 1950 (Vol. 7:12), has called stockholders meeting April 25 in Boston, will ask authorization for 1,000,000 additional shares of no par common stock, stating that directors believe it advisable at first favorable opportunity to issue between 250,000 & 500,000 shares for additions to working capital, new plant, etc., to support increased volume of business. Company now has 1,500,000 shares authorized, of which 1,456,550 are outstanding. Officer-stockholdings include: Max F. Balcom, chairman, 3605 shares; Don Mitchell, president, 3000; Frank A. Poor, vice chairman, 7200; H. Ward Zimmer, executive v.p., 3903. Remunerations listed for 1950: Mr. Balcom, $50,816 salary & $12,287 profit-sharing; Mr. Mitchell, $76,250 & $28,398; Mr. Zimmer, $46,668 & $17,570.

Zenith officer-director stockholdings are listed in March 20 proxy notice of annual stockholders meeting in Chicago April 24. Of 500,000 authorized common shares of no par value, 492,464 are outstanding, with president E. F. McDonald Jr. holding 49,191 (38,931 owned by his wholly-owned Seneca Securities Corp.); Hugh Robertson, executive v.p., 1518; Karl E. Hassel, asst. v.p., 100; Ralph Hubbart, director, 100; Frank A. Miller, director, 500; Irving Herriott, counsel & director, 500; Irving R. Allen, adv. specialist & director, 100. Salaries list include: Mr. McDonald, $40,000 base salary, $118,190 bonus for fractional fiscal year May 1-Dec. 30, 1950 (to be changed to calendar year starting 1951); Mr. Robertson, $33,333 & $118,190; H. C. Bonfig, sales v.p., $26,666 & $56,826.

Wilcox-Gay Corp., which now embraces the Majestic and Garod companies (Leonard Ashbach), consolidated statement for 1950, reports sales of $8,002,572, net profit of $28,205. In first 8 months of 1950, prior to merger with Garod-Majestic, Wilcox-Gay sales were $1,953,947, loss $444,720, so that after merger sales amounted to $6,048,-625, profits after taxes $472,925. Operations for first 1951 quarter continue profitable, reports Mr. Ashbach, with sufficient backlog of civilian and govt. orders "to keep all plants running at capacity well into next year."

Sprague Electric Co. reports 1950 net income as $3,-345,404, equal to $6.84 per share on 489,155 shares outstanding, vs. 1949 net income of $1,206,054, or $2.48 per share on 486,155 shares. The 1950 volume reached record of $28,614,860, which president Robert Sprague told stockholders March 27 should be exceeded this year.

Tung-Sol on May 1 calls for redemption of 10,000 shares of its 48,236 outstanding preferred stock, to be selected by lot after March 30. Call price is $17.50 a share.

Standard Coil Products Inc. has had its stock (1,470,000 shares outstanding) admitted for trading on N. Y. Stock Exchange.

———■———

Trade Personals: George B. Howell elected chairman of Electronic Tube Corp., Philadelphia, whose president now is **Henry S. Bamford**, ex-chief engineer . . . Maurice L. Levy, onetime Stromberg-Carlson, Emerson and Philco engineer, named Tele-tone director of engineering . . . Sidney Lidz, director of color research, promoted to chief engineer, Starrett . . . L. E. Septer, ex-Crosley, named gen. sales mgr., Tele King . . . James B. Lindsay, ex-RCA, elected engineering v.p., Thomas Electronics Inc. . . . Frank Guthrie, ex-Rauland sales mgr., named field asst. to Air King president David H. Cogan . . . Wm. Lightfoot promoted to gen. mgr., Russell Electric Co., Chicago, Raytheon subsidiary . . . Arthur H. Rogow elected president, Everett M. Patterson engineering v.p. of Super Electric Products Corp., Newark, subsidiary of Universal Laboratories Inc. . . . Ellis L. Spray, ex-Westinghouse v.p., joins W. L. Maxson Corp., electronics manufacturer.

Telecasting Notes: Kefauver telecasts proved that "vacuum cleaner" audience can be very considerable—New York AP report noting they depressed local retail trade 23%, required extra generators to handle increased power load, enjoyed 30,000,000 audience in 21 areas to which they were piped . . . **Cost to industry** of handling crime hearing telecasts was estimated at $75,000—most stations keeping spot commercial schedules but hard-pressed to relinquish shows; ABC-TV sponsor Time Inc. reported to have spent $200,000, regarding it as big bargain since "talent was free" . . . Several independent radio stations, including New York City-owned WNYC, New York WFDR (FM) and Pittsburgh WWSW, picked audio part of Kefauver Washington telecasts off the air and rebroadcast it by permission of DuMont Network . . . Rep. Keating (R-N. Y.) among first to record films for fortnightly telecasts of reports to his constituency via WHAM-TV, Rochester . . . Easter throngs on Fifth Avenue, due to cold weather and TV, hit peak of only 550,000 to 600,000, as against traditional sunny Easter Day's 1,000,000 to 1,500,000, according to *New York Times* . . . CBS has leased "spectacular" on 46th & Broadway from Douglas Leigh Inc., will use giant animated electric sign for promotion of WCBS & WCBS-TV programs . . . Margaret Truman's exclusive contract with NBC calls for 11 TV and radio appearances between now and June 1952, with option for 4-year renewal . . . In line with growing exclusivity policies of networks, CBS signs Mary Sinclair, actress in 14 *Studio One* shows, calling it "approach to star system intended to recognize those talents that have matured within our own medium" . . . And NBC reports signing new long-term contract with **Burr Tillstrom**, creator of *Kukla, Fran & Ollie* . . . Independent WPIX, New York, now doing same sort of promotion that WOR did in its early days under Al McCosker, building up local prestige as a non-network TV; last week's *New Yorker Magazine* carried full-page WPIX ad listing 57 clients, products, agencies, comparing New York area's total claimed 2,050,000 TVs (as of Jan. 1) to circulations of city's 9 dailies.

BIG league baseball will be telecast this season from the lots of all clubs save St. Louis Browns and Cardinals, Pittsburgh Pirates. Many a minor league club, too, will permit telecasts this year. In all cases, advertising sponsors will pay for rights as well as foot the telecasting costs. In some instances, only partial home schedules will be telecast, by agreement, presumably to whet attendance—also because stations couldn't always clear time.

Baseball is expected to prove boon to TV receiver market once again when season gets under way April 16. Here's lineup of big league telecast schedules, stations, sponsors:

AMERICAN LEAGUE—**Boston Red Sox**, 20 home day and night games rotated on WBZ-TV & WNAC-TV, also on WJAR-TV, Providence, sponsored by Atlantic Refining Co.; **Chicago White Sox**, 58 daytime games on WGN-TV, American Vitamin Associates Inc.; **Cleveland Indians**, all home games on WXEL, Leisy Brewing Co.; **Detroit Tigers**, 35 games on WWJ-TV, Goebel Brewing Co.; **New York Yankees**, all home games divided between WABD & WPIX, P. Ballantine & Sons; **Philadelphia Athletics**, all home games divided among WPTZ, WCAU-TV & WFIL-TV, co-sponsored by Atlantic and Ballantine; **Washington Senators**, 21 games on WTTG, Heurich Brewing Co.

NATIONAL LEAGUE—**Boston Braves**, all day, 14 night games rotated on WBZ-TV & WNAC-TV plus WJAR-TV, Ballantine; **Brooklyn Dodgers**, all home games on WOR-TV, Schaeffer Brewing Co.; **Chicago Cubs**, home games rotated on WGN-TV & WBKB, American Vitamin Associates sponsoring on WGN-TV only; **Cincinnati Reds**, 26 weekday and Sat. games on WCPO-TV & WHIO-TV, Dayton; **New York Giants**, all home games on WPIX, Chesterfield; **Philadelphia Phillies**, all home games rotated on WPTZ, WCAU-TV & WFIL-TV, Atlantic & Ballantine.

Minor League clubs already reporting telecasts include Baltimore Orioles, Oklahoma Indians, San Francisco Seals, Los Angeles Angels.

IT SURPRISED few in the industry when widely published newspaper reports, sparked by *Variety* March 28 item, revealed that ABC chairman Edward J. Noble had held conversations with IT&T chairman Sosthenes Behn looking to possible disposal of the network to that company in exchange for IT&T stock. Inquiry elicited admission from IT&T that there had been such conversations, but "no developments."

Over last 3 years, there have been reports that Mr. Noble would sell his majority holdings—first to 20th Century-Fox (offer reported $20,000,000, asking price $25,000,000), then at various times to Paramount and Mary Pickford. Nothing came of reported negotiations, it being indicated almost every time that buyers were more interested in ABC's 5 TV stations in top 5 markets rather than network as a "package".

IT&T has sought to rival RCA in all-around radio fields ever since war forced disposal of many of its foreign telephone-radio properties. It sells transmitter equipment through Federal, TV-radio receivers through Capehart-Farnsworth which it purchased last year (Vol. 6:7 et seq). But latter sold its AM station in Ft. Wayne, and IT&T last year sold only station it owned—in San Juan, P. R.

ABC has been running poor third among the 4 AM and 4 TV networks (see p. 2 & 1950 PIB figures, Vol. 7:3). Its earnings reports haven't been very impressive over last few years—blamed mainly on high TV operating costs. But its 5 TV outlets and its 5 O&O broadcasting stations are reputed to be profitable, the former now especially on high road to share in telecasting's fantastic growth (see p. 1).

Last year's gross income from operations was $45,879,660, compared to $40,267,488 in 1949, $37,110,726 in 1948, $35,955,004 in 1947. The 1950 profit was $84,605, up from 1949 deficit of $519,085. In 1948 earnings were $468,676, in 1947 they were $753,911. At end of 1950 earned surplus was $3,627,559.

Notice of annual meeting April 12 lists Mr. Noble as largest stockholder, holding 901,667 out of 1,689,017 shares outstanding, with these other officer and director holdings: Earl E. Anderson, v.p., 8500; Robert E. Kintner, president, 7000; Mark Woods, vice chairman, 6500; Franklin S. Wood, director, 6000; Owen D. Young, honorary chairman, 5000; Wm. Zeckendorf, director, 2000; C. Nicholas Priaulx, v.p., 1000. Officers' 1950 salaries and fees included: Mark Woods, $75,000; Mr. Kintner, $58,333; Mr. Priaulx, $27,499; Paul Whiteman, v.p., $86,999.

* * * *

CBS officer-director stockholdings and salaries at end of 1950, as disclosed in notice of April 18 annual meeting; Wm. S. Paley, president, 88,510 shares of Class A stock, 223,500 Class B, $100,000 salary; Frank Stanton, president, 810 A, 3025 B, $100,000 salary, $51,597 bonus; Joseph H. Ream, executive v.p., 100 A, 100 B, $52,192 salary, $17,475 bonus; Edward Wallerstein, president Columbia Records Inc. (resigned), no stock, $60,000 salary, $4421 bonus; Edward R. Murrow, director, no stock, $135,086 in fees, salaries, commissions. Other director stockholdings include: Isaac D. Levy, 31,826 Class A, 20,475 B; Leon Levy, 14,100 A, 40,900 B; Samuel Paley, 7000 A, 15,000 B; J. A. W. Inglehart, 3400 A, 1000 B.

THE PROSPECTS FOR UHF RECEIVERS: How about uhf receivers? When will they come? At what cost? With what performance characteristics?

We checked major set manufacturers and tuner makers this week, found virtually everyone has a uhf unit in the works. But it's obvious that only demand -- meaning stations actually on air or imminent -- will bring full answers.

If one big manufacturer took the leap now, of course, and built uhf in new lines, he might precipitate industry into such production -- despite inescapable fact uhf stations are still long way off.

But Zenith's resumption of old "obsolescence" campaign this week, with full-page ads across country (see pages 9-10), doesn't look like the "precipitator".

Heavy developmental programs, on part of both the set manufacturers and the tuner makers, have produced number of acceptable devices, but --

It will be years, rather than months, before more than merest handful of uhf stations can possibly get on air. Even if FCC finds it can lift the uhf freeze before vhf (Vol. 7:12-13), it can't conceivably start granting stations before late summer or early fall -- since it has promised 2-3 months' hiatus while applications for stations are prepared and filed.

Thus, 2 or 3 stations on air this year are about all that can be hoped for. And accretion next year is bound to be very slow, regardless of number of construction permits granted, because the only uhf transmitters any manufacturers have for possible delivery are experimental.

Many applicants are enthusiastic about uhf possibilities in non-vhf areas, but obviously none would order transmitter until he knew final score on allocations. Then manufacturer, after receipt of firm order, needs at least same 9-12 months it takes to make vhf transmitters (Vol. 7:11).

* * * *

Uhf receiver situation is fairly well in hand as far as most manufacturers are concerned. They feel they have units for uhf ranging from "so-so" to "good" now, will have even better ones when people are willing to buy them.

Biggest tuner maker of all, Standard Coil Products (over 4,500,000 built to date, for Admiral, et al), plans to test latest tuner in Bridgeport next week. [For Standard's answer to Zenith claims, see pages 9-10.]

Sarkes Tarzian, who says he's next to Standard, seems quite happy with tuner he has up his sleeve. He says it's continuous type, covering whole band, claims it gives performance comparable with vhf. It's expected to cost 75-100% more than vhf-only, which costs manufacturers about $10.

S.M.A. Co. plans continuous tuner, covering vhf-uhf, estimates it will increase set cost some $20-$30.

Mallory, maker of continuous tuner for DuMont, et al, says it has "several good solutions," with converter now designed and tuner well on way.

Crosley will be first to unveil a new tuner in "full-dress" press demonstra-

Copyright 1951 by Radio News Bureau

tion. New "Ultratuner" will be shown off at Bridgeport's Barnum Hotel April 11. Crosley group of top engineering and sales officials will be headed up by v.p. John W. Craig. Describing Ultratuner briefly, Crosley says:

"It can be attached to TV receivers using continuous-type tuners. It is low-cost, simple-to-operate and can be installed without special tools or technical knowledge. It offers possibilities for quickly and economically extending uhf telecasts to the public when uhf stations are authorized to go on the air."

All set makers using turret tuner say they can give same answer as Zenith -- namely, addition of uhf "strip".

Hallicrafters says it has achieved satisfactory performance with strip in Bridgeport tests, but calls it only an "interim answer" for uhf reception.

Philco says that slight alteration can adapt its sets, which have "dual chassis," with space between units for later insertion of tuner.

Most others have left space for tuner -- Motorola, GE, DuMont, etc.

RCA hasn't disclosed latest plans. However, during allocations hearing (Vol. 6:47), it told FCC it intended to build vhf-uhf sets, vhf-only, and uhf converters. It said vhf-uhf would cost about $25 more than vhf, that vhf-only would have room for later addition of uhf at some $50, and that uhf converter would run about $50, besides installation and antenna.

EVERYONE STUDYING ALLOCATION ANGLES: Industry is still mulling proposed vhf-uhf allocation plan (Vol. 7:12-13), but no one has filed comments on it yet. Actually, deadline date of April 23 is likely to be extended, perhaps for 10 days, as requested this week by NARTB.

Many stations and applicants are waiting to exchange views at April 15-19 NARTB convention in Chicago, before filing comments, and FCC is expected to take that fact into account, grant postponement. Other deadline dates -- May 8 for counter-comments, May 23 for start of city-by-city hearing -- would also be extended.

Educational channel reservations remain most objectionable feature of allocation, in industry's eyes. Real showdown will come during city-by-city hearing when educators show up and state intentions. Failure to make good case, in face of commercial opposition, might conceivably result in loss of reservations -- though Comr. Hennock, prime mover, actually seeks more such channels.

Educators are hustling to "get out the vote," insure presentation of well-prepared cases. Joint Committee on Educational Television, which carried ball during hearing, is setting up permanent headquarters at 1785 Massachusetts Ave., NW., Washington, to coordinate, advise, etc.

A political "assist" for educators came from Rep. Emanuel Celler (D-N.Y.) this week, when he introduced H.R. 3547, which would force commercial stations to donate 25% of their time to non-commercial education programs.

He parts company with Comr. Hennock when it comes to channel reservation, terming idea of setting aside 25% of channels "unworkable and untenable."

Educators have approached big philanthropic foundations for funds to support JCET activities. Presumably, these include Ford, Kellogg and Carnegie Foundations, Whitney Fund. We gather that individual schools or groups are going directly to private donors for money to build and operate stations.

Meanwhile, existing stations generally are quite happy with allocation plan -- very happy over proposed increases in powers and heights, and are busily exploring availability of new transmitters, amplifiers, towers.

The 31 who have to shift channels (see Allocation Report) haven't yet complained loudly to FCC, though a few may. Some have informally told Commission they have no objections. Some hope to increase power to maximum same time they shift. In Ohio, which has many shifts, stations are considering plan to swap equipment, meaning purchase of very little new gear. Others may follow suit.

Engineers for new-station applicants are racking their brains, hunting holes in allocation where new vhf stations could be squeezed in. But chances of getting FCC to relax minimum station separations are awfully slim.

WIDENING BREACH BETWEEN FCC & INDUSTRY: Once again, FCC put its foot into it -- provoking the film industry to bitter anger, impelling even the staid New York Times to comment: "The FCC evidently aspires to be the Pooh-Bah of the electronic age."

Its incredible dictum in movie "anti-trust opinion" last week (Vol. 7:13) virtually threatens that industry with exclusion from telecasting licenses if it doesn't come across with its first-run films for TV.

By itself, the opinion might be laughed off as mere words -- but actually it's just another reflection of the Big Stick attitude, the master-slave philosophy, that has already alienated from FCC the esteem and respect of:

(a) Virtually the entire electronics manufacturing-distributing industry -- because it sought to impose untested, unproved "bracket standards," within a ridiculous one-month deadline, in connection with its hell-in-a-hack quest for color (Vol. 6:35, et seq).

(b) The great body of TV-aspiring radio broadcasters -- because it sliced off a big chunk of the scarce vhf channels, and even more uhf, to meet nebulous demands for "educational stations" (Vol. 7:12-13).

(c) Most existing telecasters -- because it plans, though hasn't yet scheduled, a probe into program content that some fear has Blue Book implications, albeit such motive is vehemently denied (Vol. 7:3-5). But telecasters can't forget attempt, which may be renewed, to dictate how many hours of time a station may or may not take from any particular network (Vol. 6:40-48) -- though in this case it must be noted that 2 networks actually asked FCC for such regulation.

These are only a few facets of the disaffection that unfortunately now prevails between this Commission and industry. Nor has this widespread feeling of mistrust been mitigated by artificial prolongations of a freeze, now 31 months old, which has hamstrung one of the most fabulous industries of all time.

[The color issue, of course, was main cause for protracted freeze; and there's scant doubt that, should Commission win clearcut decision in Supreme Court case, effort will immediately be made to implement its choice of field-sequential system by (a) requiring existing broadcasters to telecast certain number of hours of color as condition of their licenses, and (b) extracting promises to telecast color as condition of post-freeze new station grants.]

* * * *

But leave aside the broadcasting-telecasting fraternity, who are licensed and who with their lawyers must pay lip service, sometimes abject obeisance, to the agency holding power of life and death over their business:

There are political overtones to what FCC is doing that are unmistakable.

FCC may not give a hang what licensees and their lawyers and engineers think and say about it behind its back, but its ears would burn if it could hear what the movie exhibitors and their spokesmen are saying -- and there are some 18,000 of them, most of them business leaders in their communities.

Just as many of the 30,000-odd TV-radio manufacturers-distributors-retailers throughout country have come to believe there's "dirty work" behind some of FCC's curious recent actions, notably in the color imbroglio, so the movie people are now apparently convinced there's something rotten in Denmark.

Actually, nothing venal is involved. Simplest explanation is that the power complex (you-do-as-we-say-or-else) has become ingrained -- notably at higher staff levels. Despite Chairman Coy's disavowals in this connection before House committee this week (see p. 4), their extraordinary influence as policy initiators and opinion drafters is matter of common knowledge.

* * * *

The local merchandising folk may not comprehend Washington's peculiar power complexes, but the protracted freeze, the attempt to foist an unwanted color system on them against advice of preponderant engineering opinion and in midst of a war economy, unwonted attacks like Comr. Jones' on the integrity of the industry that created TV-radio (Vol. 6:35 et seq), and such bumbling acts as an official demand

that RCA "lend" rival its tri-color tube (now called the DiMaggio, see Vol. 6:44-45, 49) -- these they do understand and don't like.

Movie trade press is filled with bitter recriminations -- and it's our guess that not only FCC, but an Administration already sore-beset by scandal, have not heard end of things yet from an industry far more adept at politics and far more articulate in publicity than TV-radio. An indignant writer to New York Herald Tribune, for example, states "this particular bureaucracy has gone off half-cocked again and is simply proposing to rob Peter of Hollywood to pay Paul of coaxial cables."

First political reaction came from Senator Wiley (R-Wis.), who bitingly wrote Chairman Coy that FCC seeks to intimidate the film industry with a "gratuitous attack...worthy of Russia's 'courts' but not ours."

New York Times editorial April 3 is calmest, most detached, yet most pointed we've seen. It tells the whole story; full text below.

'Pooh-Bah of the Electronic Age'

Editorial in the *New York Times*, April 4

THE FCC has overreached itself. Its warning to the Hollywood producers that they turn over their films and stars to TV, lest they jeopardize their own chances to enter video broadcasting, is an arbitrary and capricious action that flouts the elementary principles of a competitive economy and raises serious questions of law.

In what it calls "a statement of policy" the commission in effect is insisting that Hollywood must come to the aid and succor of its chief competitor. The stars, directors and other craftsmen in whom the film capital has built a substantial investment over the years, the commission suggests, now should be made available to the industry's growing rival. The one thing which television does not have—the up-to-date, full-length picture which may cost millions of dollars—Hollywood now is expected to furnish on television's terms.

The FCC ignores completely in its statement the economic realities which today separate Hollywood and television. The only reason that the motion-picture industry can afford to make its feature films is because it has the box office to pay for them. Even the least expensive film requires a gross of $1,000,000 or more to show a profit. The most expensive show on television today, including the cost of talent and time on the air, runs to $85,000.

Apparently the FCC is unconcerned, however, whether Hollywood goes broke in serving as the involuntary sugar daddy of television. Its statement merely notes that the motion picture companies "refuse to make copies of their films available for use by television stations." Would a brand-new picture have to be released immediately to TV? Or after it had been seen in the second-run houses? Or when? Whatever the answer, the practical result would be for a governmental agency and not the producers to run the private film industry. That is a bleak and fearsome prospect.

The legal reasoning behind the commission's action may give cause for even greater concern than its peculiar economic thinking. Superficially, the FCC merely is saying that if a motion-picture concern has been found in violation of the anti-trust laws in its own field it will take that fact into consideration should the company ask for a television license. Indeed, the FCC has no alternative in this regard.

But the commission then takes the extraordinary step of superseding both Congress and the Department of Justice in deciding without benefit of any public hearing what may constitute an anti-trust violation. Whether or not the refusals of the film companies to turn over to television their films and players is a violation of the law, the FCC says in so many words, the commission will consider them relevant in granting a TV license. The FCC evidently aspires to be the Pooh-Bah of the electronic age.

The commission on its own initiative should reconsider its latest statement of policy. Failing that, it is a matter which should commend itself to the prompt attention of Congress.

HEARINGS on McFarland Bill (S. 658) this week, before House Interstate & Foreign Commerce Committee, had FCC Chairman Coy most vehement about provision to keep commissioners from consulting with staff members other than their own assistants.

"As far as we can determine," he said, "the effort to place the commissioners in a kind of isolation ward is based upon the calumny, all too often repeated, that the commissioners are unduly influenced by the Commission staff, and that this staff is in turn prejudiced and irresponsible. I should like to say categorically that these assertions, or rather insinuations, are completely unfounded. These attacks on the Commission's staff are, in reality, attacks upon the integrity and ability of the commissioners . . ."

Coy also objected to: (1) "Legislative time-table" which would require action on applications within certain deadline, with reports to Congress on reasons for delay. (2) "Protest" procedure "under which an existing station could demand and secure a hearing on any application . . . the grant of which might cause economic injury to it." (3) Changes in criteria for granting license renewals. (4) Changes in transfer-of-licenses procedure which "would permit a person to secure a valuable broadcast license and then auction it off to the highest bidder, thereby making a mockery of comparative proceedings." (5) Changes in criteria in granting applications to those involved in anti-trust violations.

Hearing resumes April 9, with questioning of Comrs. Coy and Jones—latter favoring separation of Commission and staff. Others scheduled to testify for bill are Joseph Ream, CBS executive v.p.; Frank Roberson, FCC Bar Assn.; Justin Miller, NARTB chairman. Opposing, in part, will be Robert Ramspeck, chairman, Civil Service Commission.

—■—

Metropolitan Opera is setting up new TV dept. to prepare special operatic programs for sponsored telecasts, to be booked through Wm. Morris Agency. "We will attempt to develop special TV techniques rather than using stage techniques," said gen. mgr. Rudolf Bing April 2. "The Metropolitan is not only thinking of the possible added revenue but also of the fact that TV as a new mass medium has come to stay and offers unlimited possibilities for opera." Heading department will be Dr. Herbert Graf, Met stage director; Reginald Allen, business mgr.; John Gutman, artistic asst.

Mobilization Report
April 7, 1951

NICKEL THREATENS REAL BOTTLENECK: Sporadic stoppages in receiving and cathode ray tube plants provide forewarning that nickel crisis may come sooner than anticipated.

And make no mistake about it -- nickel shortage is most serious problem facing electronics industry today. Here are the facts:

Nickel is used heavily in receiving, picture and transmitter tubes, where there are no known substitutes for it. It's also ingredient in ferrite transformer cores (10-20% nickel) and alnico permanent magnets (14% and up). Like cobalt and tungsten, it's vital to jet plane program and many other military projects.

NPA "permits" civilian use of nickel at 65% of first-half 1950 rate (Order M-14, Vol. 6:48), but --

This month, 85% of U.S. supply of nickel is earmarked for defense orders and govt. stockpiling. Govt. metal experts say that within 30 days -- probably less -- defense orders and stockpiling will require 100%.

Past experience in shortage crises, however, indicates Govt. certainly isn't going to let electronics industry wither and die. Undoubtedly NPA eventually will siphon to tube industry enough nickel to keep it in at least minimum operation -- probably not much more than half the 200,000-250,000 lbs. a month which industry estimates are its rock-bottom requirements. This may be accomplished by rescreening military orders, cutting down wherever possible, as was done in case of cobalt.

But hard times are ahead, any way you look at it -- because even the most ingenious conservation measures (Vol. 6:49, 7:6-7) apparently don't come anywhere near eliminating tube industry's heavy dependence on nickel.

No increase in nickel production is in sight before end of year. By then, Govt. will have reactivated World War II Nicaro Nickel Co. plant at Oriente, Cuba, which can turn out 25,000,000 lbs. yearly -- mere drop in bucket compared with requirements. Nickel now comes from 2 sources, both Canadian: International Nickel, 240,000,000 lbs. a year; and Falconbridge Mines, 30-40,000,000 lbs.

It's estimated civilian electronics industry (mostly TV-radio) used slightly more than 2,500,000 lbs. of nickel last year -- about 1% of total supply.

That's the situation as it stands today, and that's No. 1 problem being pondered by Govt.'s high-level Electronics Production Board (Vol. 7:11-12).

* * * *

Emergency appeal by tube makers for temporary aid (Vol. 7:11,13) has as yet received no action. There's strong possibility it will be delayed -- some govt. people pointing to current sales slump and asking blandly why TV production should be kept going at all.

Real crux of problem, of course, is that tube and other electronic plants must stay in business, keep their working force -- against time they'll be called on to produce the electronic nerve centers for Uncle Sam's military machine.

By June, NPA will place nickel under all-out allocation, doling out every pound of available nickel among the hundreds of thousands of users -- according to essentiality of end-product.

Representatives of whole electronic industry will be summoned by NPA to discuss entire problem in Washington in about a week.

Users of nickel have felt shortage for many months -- but they say it's snowballed now so that it's cutting heavily into production, forcing stoppages.

Timing of TV sales slowdown, however, has softened the blow. Actually, tubes are easier to get now than they've been in months, as TV manufacturers cut back schedules due to sales letdown. But demand is still lively -- distributors' orders to fill depleted replacement stocks believed accounting for much of it.

Picture tubes are reported "softest" item, so far as demand goes. Indeed, DuMont this week cut its prices to manufacturers by $1.50-$11. In second reduction

this year (Vol. 7:5), its 17-in. picture tubes were cut from $26 to $24.50; 19-in. from $43.75 to $32.50; 20-in. from $43.75 to $37.50. RCA says it won't follow suit, and so far as we're aware no general CR price-cutting is in view.

This sidelight graphically illustrates severity of nickel shortage: There's no cobalt problem now. Despite reduced allocation of cobalt for April (Vol. 7:13), it's now lack of nickel that's big hold-up in production of Alnico V magnets (24% cobalt, 14% nickel).

NPA STEEL ORDER MADE TIGHTER: With a neat twist of the wrist, NPA April 5 converted its steel durable goods order (Vol. 7:10-11) from a hairshirt to a straitjacket for TV-radio industry.

Last escape hatch in M-47 was locked, sealed and boarded shut with the publication of amended list of product categories and groups covered by the order.

Order's basic provision remains unchanged: Manufacturers are limited in their use of steel during second quarter to 80% of their rate of use during first six months of 1950.

But new amendment, seeking to assure output of durable goods in same proportion as during first-half 1950 base period, has effect of "freezing the mix" of TVs, radios and phonographs that any manufacturer can produce this quarter.

It divides consumer durables into 9 categories, subdivides categories into groups of closely-related items. Steel quotas can't be shifted from one group to another within a category.

Radios, TVs and phonographs comprise one category, which is broken down into these groups: "(1) Radio receivers, home, portable, and broadcast band automobile receivers. (2) Radio-phonograph combinations. (3) TV receivers. (4) Radio-TV receivers, TV-phonograph combinations and radio-TV-phonograph combinations. (5) Phonographs and record players."

Thus a manufacturer can't cut down on radios and put extra steel into TVs.

TV receivers are a group by themselves; TV manufacturer, therefore, isn't allowed to use this quarter more than 80% of the steel he used in TVs during average quarter of first-half 1950 -- can't juggle proportion of TV steel to radio steel.

Radio classification is more lenient. Manufacturer who turned out no portables durable first-half 1950, for example, could put entire radio steel allotment into portables this quarter, eliminating auto & home radios entirely, if he chooses.

Classification 4 permits some flexibility. Manufacturer could cut down on combinations -- saving steel by eliminating phono -- and increase his output of TV-AM or TV-FM sets. But he couldn't use this steel for TV-only sets, which are in different classification group.

NPA vetoed a proposed change which would have eliminated discrimination in M-47 against "assemblers," who buy all their steel parts ready-made. "Assemblers," therefore, won't be permitted to produce this quarter more than 80% of units in each group that they turned out during average quarter of first 6 months of 1950.

Best hope for "assemblers" -- and any others who can't live with current order -- is to ask NPA for individual adjustments, backing up their cases with concrete evidence of conservation measures.

Mobilization Notes: Controlled Materials Plan (Vol. 7:3,12-13) is definitely in the books, said both Defense Mobilizer Charles Wilson and Production Chief Wm. Harrison at hearing of Congressional Joint Committee on Defense Production April 4. Details haven't been announced, but starting date may be pushed from July 1 to Sept. 1. CMP will allocate nation's supplies of steel, copper and aluminum for military and essential civilian production, but bulk of materials control orders are expected to remain in effect, and so-called "non-essential" civilian production won't come within scope of CMP, according to best information. NPA Administrator Manly Fleischman is strong proponent of CMP, while DPA Administrator Wm. Harrison is reported as feeling all-out controls aren't necessary now. It's generally believed that Harrison, in ill health, will resign within 30-60 days, regardless of decision on how far CMP will go. It's good guess that if he does, assistant W. W. (Wally) Watts, RCA v.p., will follow suit.

Westinghouse's $20,500,000 in new defense contracts, announced this week, include 4 totaling $12,000,000 for TV-radio division for radio test, transmitter and other equipment, one for $8,500,000 worth of Navy radar equipment for its appliance plant. F. M. Sloan, TV-radio division chief, announced new plant at Raritan, N. J. (Vol. 6:35,39), will be completed by mid-July and ready for defense output.

Copper, aluminum and lead restrictions were modified in 3 new NPA orders. Prohibitions on use of copper and aluminum were relaxed with an amendment to Order M-7 postponing for one month (until May 1) ban on use of aluminum in manufacture of about 200 civilian products. "Home radio cases" is only category on list which applies to TV-radio industry. Copper end-use order M-12 (Vol. 6:52, 7:10) was amended to permit purchase and sale of copper parts for use in prohibited items, provided they're not suitable for use in permitted items. Sole TV-radio item on copper ban list is auto radio antennas. Amendment to lead order M-38 limits consumers to 100% of their rate of use during first-half 1950, a period of low lead consumption, and reduces permitted lead inventories from 60 to 30 days' supply.

Revised "essential activities" list, issued by Commerce Dept. "for the guidance of Defense Dept. in scheduling calls on reservists to active duty, and for information of Selective Service in determining draft deferments," is much more rigid than tentative list released last August (Vol. 6:31). Only electronic-communications activities listed are: production of military equipment, central switchboard, printing telegraph equipment and coaxial cable; telephone, telegraph, radio-telegraph service. Missing are broad classifications of telecasting, broadcasting, TV-radio manufacturing, wholesaling and retailing which appeared in earlier list. Labor Dept.'s companion list of "critical occupations" will be forthcoming in next few weeks.

Mobilization Personals: Brig. Gen. George Irving Back, Gen. MacArthur's Signal Officer in Tokyo since 1947, World War II Chief Signal Officer of MTO, nominated as Army Chief Signal Officer, subject to Senate confirmation, succeeding Maj. Gen. Spencer B. Akin, who retired March 31 . . . Maj. Gen. Francis H. Lanahan, Ft. Monmouth (N. J.) commanding general, wartime Chief Signal Officer of Eisenhower commands, ordered April 4 to report to Gen. Eisenhower for duty at Supreme Headquarters Allied Powers in Europe, presumably as Chief Signal Officer . . . Thomas S. Nichols, on leave from Mathieson Chemical Co., Baltimore, ex-WPB, ex-State Dept., named NPA deputy administrator, succeeding Glen Ireland, who has returned to his post as Pacific Telephone & Telegraph Co. v.p.

Test equipment section—Robert B. McCurdy and George G. Hoye—has been transferred from NPA Electronic Products Div. to Technical & Scientific Supplies Div., 5th floor, 801 E St. NW, headed by Howard Pringle.

Paul A. Porter, ex-FCC chairman and onetime Federal Price Administrator, named one of 4 public members of new Mobilization Policy Board named by President Truman April 7. Labor, agriculture, management and public comprise top-level board of 16 to serve under Defense Mobilizer Charles E. Wilson.

———■———

Censorship of TV by FCC to exclude programs "offensive to public decency" is objective of H. R. 3482, introduced April 3 by Rep. Lane (D-Mass.). He's been lambasting TV for "lewd images and suggestive language," quoting warnings by Boston's Archbishop Cushing and Worcester's Bishop Wright (Vol. 7:9). Rep. Lane wants Communications Act to read: "No regulation or condition shall be promulgated or fixed by the Commission which shall interfere with the right of free speech by means of radio communication; but the Commission shall have authority to promulgate regulations for the purpose of preventing inclusion in television broadcasting programs of any language, sound, sign, image, picture, or other matter or thing which is obscene, lewd, lascivious, or otherwise offensive to public decency."

Financial & Trade Notes: Olympic Radio's 1950 record sales of $21,937,175 compared with $9,609,672 in 1949. Net earnings were $1,577,484 after providing $1,604,500 for taxes, or $4.66 per share on 338,263 common shares outstanding, as against 1949 earnings of $578,163 ($2.24 on 256,667 shares then outstanding). *Wall Street Journal* reports Olympic's first 1951 quarter sales may top $6,500,000, compared with $4,700,000 in same 1950 quarter.

Raytheon showed profit of $1,797,000 on sales of $64,000,000 in 9-month period ended Feb. 28, reports president Charles Francis Adams Jr. This compares with profit after taxes of $131,162 on sales of $39,000,000 in corresponding 1950 period. Third quarter ended Feb. 28 accounted for $23,000,000 sales, $520,000 net profit vs. $16,516,699 sales and $752,863 profit for same 1949 period.

National Union Radio Corp. (tubes) reports $14,799,107 sales in 1950 vs. $7,455,105 in 1949, net profit $1,268,851 in 1950 (92c a share) vs. $70,845 in 1949. Company also announces purchase of 50 acres for new 130,000-sq. ft. plant in northeast Philadelphia costing $6,000,000 and employing 1600. Construction starts immediately for completion by end of 1951.

Wells-Gardner 1950 sales were $17,825,097, net income $954,235, and consolidated earned surplus at end of year was $2,394,227 after payments of $307,725 (75¢ per share) dividend. Company last May 1 purchased Zangerle & Peterson Co. for $621,593. Sales in 1949 were $7,662,068, profit $182,289; in 1948 sales were $13,100,150, profit $717,836 (Vol. 6:14).

P. R. Mallory & Co. reports 1950 sales of $39,158,150, net profit $2,553,758 ($5.29 a share) vs. 1949 sales of $24,647,429, net profit of $1,124,090 ($2.79). Backlog of orders Dec. 31 was $11,002,375, working capital $5,454,480.

American Phenolic Corp. reports sales of $12,944,833, net profit $920,833 ($2.30 per share) for 1950 vs. $10,082,819 sales, $567,275 profit ($1.42) in 1949.

* * * *

Reeves Soundcraft Corp. will ask stockholders, at April 10 annual meeting, to authorize 1,000,000 more 5¢ par common shares, to be added to the 2,500,000 presently authorized (2,308,495 outstanding, along with 5080 shares preferred). Company reports 1950 sales of $1,513,470, net profit $118,458, earned surplus at Dec. 31, 1950, amounting to $79,052 (converted from $39,406 deficit at start of year). Company operates disc, magnetic tape, tube divisions; owns 93% of Light Metals Corp.; owns approximately two-thirds of Tele-Video Corp., which in turn owns all capital stock of Airdesign Inc.; is majority stockholder in Cinerama Inc., new color film process; reports manufacture of color TV cameras under contract with Remington Rand in accordance with CBS designs.

Dividends: Tung-Sol, 25¢ on common, 20¢ on preferred, both payable May 1 to holders of record April 17; Hoffman Radio, 25¢ payable April 21 to holders April 7; Tele-tone Class A preferred, 16¼¢ payable April 1 to holders March 27; American Phenolic, 20¢ payable April 13 to holders April 27; Clarostat, 10¢ payable April 10 to holders April 16; Emerson, 25¢ payable April 16 to holders April 4; Olympic Radio, 10% stock and 25¢ quarterly dividends payable April 25 to holders April 12; RCA, 50¢ payable May 18 to holders April 20, 87½¢ on preferred payable July 2 to holders June 11 (with announcement semi-annual dividends will be declared hereafter in May & November, if earnings justify).

Mallory-Sharon Titanium Corp., Indianapolis, is new firm formed by P. R. Mallory & Co., components makers, and Sharon Steel, to develop, produce and market titanium and titanium alloys. They own 50% each.

Television Digest WITH AM-FM REPORTS
1819 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
April 7, 1951

OUTPUT PACE LOWER AT QUARTER'S END: Production slide continues -- first quarter's 13th and final week (ending March 30) resulting in output of 157,771 TV receivers (6298 of them private brand) as against 161,602 preceding week. Factory inventories meanwhile climbed to 269,448 from preceding week's 235,142 and 196,326 week before.

Total output for quarter is thus 2,196,016, subject to revision by RTMA statisticians, as against 1,605,000 for first 1950 quarter and about 2,500,000 for record fourth 1950 quarter. Recapitulating RTMA weekly counts, these are the figures seriatim for all 13 weeks: 105,699, 167,859, 188,758, 176,860, 167,315, 154,774, 181,945, 183,438, 190,291, 178,696, 181,008, 161,602, 157,771.

Radios went down also in final week of quarter -- to 319,926, lowest since New Year week. Factory inventories as of March 30 were 143,777 as against 136,037 preceding week. Week's breakdown showed 173,017 home radios, 114,848 auto, 32,061 portables. For quarter, radios totaled 4,298,025 -- weekly figures seriatim having been as follows: 209,792, 338,520, 342,586, 344,216, 322,855, 322,300, 353,689, 326,606, 367,322, 355,044, 364,916, 330,253, 319,926.

INVENTORY PROBLEM STILL CLOUDS TRADE: It's still a "sticky" market -- with April's baseball, huge manufacturer advertising-promotion, more low-end sets the prime hopes for moving swollen TV stockpiles.

First post-Easter weeks weren't great shakes for distributors-retailers, by and large, but there were some indications of pickup.

Most manufacturers now are determined to bring about better equilibrium between supply and demand -- but no one makes any bones about necessity of first clearing up pipelines clogged with estimated 1,000,000 or more sets.

A few of the bigger producers say "things aren't too bad," and that "buying is normal for this time of year." One even tells of a major chain dealer reporting biggest Saturday-after-Easter sales ever. But nearly everybody is sitting on edge of seat, fearful of panic selling to unload inventory.

So far, only Majestic among the majors (see Topics & Trends) has followed outright Admiral's example (Vol. 7:12) in cutting prices of low-end models, with Emerson and Hallicrafters making price pitches via 14-in. models (Vol. 7:13), Air King out with new 17-in. table at $199.95, and Meck letting it be known it will announce something radically new next week.

Price-cutting and bargaining at retail stores continue commonplace, but distributors seem inclined to hold tight as long as credits permit -- on advice of factories that shortages are still in prospect.

At the factories, defense orders haven't materialized large enough to preclude shorter work weeks and/or layoffs. There's scarcely a TV-radio producer who hasn't sheared payroll. Only one major manufacturer we've contacted said (as of Wednesday) it has had no cutbacks; in fact, claimed this week's production would reach all-time high -- with "a good mix of sizes" and with "no cutbacks planned unless forced by materials."

Everybody else admits cutbacks, reluctantly but frankly -- some light, some as heavy as 50%. News wires, trade paper reports, union statements add up to frightening reduction of employment in Chicago's many TV-radio plants particularly.

There's still strong school of thought -- bolstered by NPA reports -- that insists shortages are inevitable eventually, as voluntary cutbacks and enforced materials limitations begin to take their toll. Components may seem plentiful now, but they won't remain so.

Even more significant than steel-copper-cobalt reductions will be nickel shortage that must inevitably hit tube production (see p. 5). Yet in face of this, there's curious anomaly of DuMont's reduction in prices of its CR tubes.

Tube bottleneck -- and nickel could force it in both picture and receiving

tubes -- could very well mean shortages of sets by time present pipelines are cleaned out and usual mid-summer introduction of new models is due.

Few are talking about them -- though Sylvania has announced new models for May, Westinghouse for June, latter including new 24-in. -- but it appears certain Chicago Furniture Mart June 18-28 will bring forth quite a few new models.

ZENITH UHF CLAIMS AGAIN RAISE STIR: Zenith this week dusted off its old ill-fated "obsolescence" campaign of 1949 (Vol. 5:11, et seq) which was stopped in its tracks at that time by one speech by FCC Chairman Coy.

In full-page ads in TV cities, Zenith took somewhat more cautious tack this time. It angered rest of industry, all right, but so far has kicked up much less uproar than last time. Ad reads:

"The FCC has announced plans for 1807 new TV stations -- the majority in the new ultra-high frequency channels. Zenith -- and Zenith alone guarantees that every TV set it has ever built and sold to the public has built-in provision to receive these new stations without the use of any converter or adapter."

What Zenith refers to are "uhf strips" to replace vhf in its turret tuner.

Reactions of manufacturers, to what seems to be beginning of sustained Zenith campaign, has been in form of sales "ammunition" to dealers -- but no counter ads, no appeal to Federal Trade Commission, etc., as was case in 1949.

"Misleading" is mildest of words used by other manufacturers and tuner makers to characterize ad. Generally, they object to:

(1) Implication that "Zenith alone" can achieve uhf with strips.

(2) Implication that uhf performance, with "strips," would be comparable with present vhf.

Most turret tuners are equally adaptable, other manufacturers contend. For example, Glenn Swanson, president of Standard Coil Products (which has built over 4,500,000 tuners for Admiral, et al), relates how Zenith was invited to showdown in New York's Warwick Hotel, in connection with Fortune Magazine June 1949 article on Admiral (Vol. 5:22). He said engineers did simple strip-replacement job on Admiral set, but that Zenith declined side-by-side comparison.

This week, Admiral's reaction to Zenith ad was to rush memo to dealers, giving them this answer to customers' questions:

"While other manufacturers have claimed 'exclusive' provisions for uhf, the fact is that Admiral pioneered in the development of the turret tuner which provides for adaptation to uhf reception by the simple expedient of easily replaced snap-in coil inserts."

Admiral may also use small slug in ads, calling attention to adaptability.

* * * *

RCA's answer was detailed statement sent to distributors, who were urged to disseminate it to dealers. Gist of report:

(1) Any vhf receiver will require modification to get uhf. Bridgeport experiments "proved conclusively" that use of converter is best.

(2) RCA will build such converter -- "competitively priced."

(3) All conversions mean additional cost, including additional antenna.

(4) FCC hasn't yet finalized uhf allocation.

(5) "Large-scale telecasting of uhf will not commence before late 1952 or early 1953," because of time needed for transmitter and station construction -- "aside from delays which may be caused by shortages of critical materials."

(6) "When uhf broadcasts commence, RCA Victor, and we assume other manufacturers, will have available an adequate supply of high quality converters for present vhf receivers, assuring full-band reception of all the uhf channels without sacrificing any of the present vhf channels."

Others are telling dealers same or similar story, assuring them they can advise customers sets are by no means obsolescent, may readily be converted.

Performance of Zenith strips is eyed dubiously by most manufacturers, some

of whom said they had actually tested them, compared them with their own.

But tests by FCC labs, reported by Edward Chapin during allocations hearing (Vol. 7:5), appear to indicate Zenith performance about same as that of other units tested -- GE, RCA, DuMont. Chapin's general conclusion regarding uhf sets then was:

"Considerable progress has been made by the receiver manufacturers in their efforts to develop useful receiving equipment for uhf service, particularly in the direction of adequate sensitivity. However, at this time it is most apparent that there is considerable difficulty with oscillator radiations and spurious responses."

Fortunately and wisely, FCC tailored its proposed uhf allocation plan (Vol. 7:12-13) to minimize problems of oscillator radiation, greatly simplify job of designer and manufacturer.

It's too early to gauge effect of Zenith ads on public, but one big distributor reports two "irate" groups in his area: "(1) Zenith owners who just can't believe that uhf isn't here, or that they're not all set to receive it. (2) Non-Zenith owners who suspect that they may have been victimized, because they think uhf is upon us and they're not prepared for it."

But, by and large, manufacturers don't anticipate repercussions of kind attending 1949 whoop-de-do for simple reasons that (a) uhf service is still far off (see p. 2), and (b) any company with a name to protect and service contracts to fulfill will certainly see to it that past as well as future customers are protected.

PATTERN OF TV-RADIO PRICE CONTROLS: Inclusion of TV-radio in retail price regulations (CPR-7) announced this week is only one step in controls that will set complete price regulations for TV-radio industry.

Next step will be price control regulations covering manufacturers, due to be issued shortly -- probably within week. Regulations for wholesalers are also due about then.

TV-radio manufacturers at that time will be able to establish ceiling prices for each step in distribution system -- for distributors, retailers, public.

In fact, manufacturers' regulations are considered much more important than this week's move putting retail margin-type control over TV-radio-phonograph sets, replacement parts, accessories as of April 30 and removing these items from Jan. 25 general price freeze (Vol. 7:4).

Rollback in prices may occur when manufacturers' regulations are issued -- certainly where present lists are too far out of line with present costs. Mainly, squeeze will be on profit margins, since forthcoming manufacturers' rules likely won't permit continuance of same margins, percentagewise, as at present.

With TV-radio products under CPR-7, manufacturers may apply to Office of Price Stabilization for dollars-and-cents ceiling prices. This can be done under Section 43 of CPR-7, which is special provision for "branded" merchandise (Vol. 7:9). CPR-7 is essentially a margin-type regulation for retailers.

When manufacturers' regulations come out, they will permit dollar value of increases in materials and labor costs to be added to base period selling price to establish ceiling price. Base period will be "best" quarter for the year ending June 1950. Increases in costs will be permitted on materials to December 1950; for factory labor, to current payrolls.

However, since TV-radio lines today are not same as during base period, manufacturers will have to figure complicated formula to arrive at ceiling prices of sets now in lines. This will involve a markup-type of calculation for present sets that are comparable to base period sets.

Recalculation of these ceiling prices will be necessary several months after manufacturers' regulations are issued. Reason for this is that manufacturers' regulations will also apply to suppliers whose prices, too, may be rolled back. This would mean far higher markup margins for manufacturers than they initially figured and which OPS desires.

Everyone at OPS vows he doesn't want to hurt any company or industry. Regu-

lations won't pinch TV-radio too hard, officials say. If it does, OPS will attempt to do something about individual hardship cases.

If industry as whole gets hurt, tailored regulations for TV-radio can be formulated and put into effect.

Both such adjustments will take profits into account.

OPS experts don't think TV-radio will want specific industry rules, feel forthcoming regulations are pretty good for this industry.

Trade Miscellany: "Treble the area coverage" of each TV station is claimed for new high-sensitivity receiver that John Meck is inviting newsmen to see in chartered plane flight April 12 from Chicago to Indianapolis, Milwaukee, possibly Detroit; it's good for 140 to 150-mi. reception, he claims . . . Belmont (Raytheon) reports April cutback of 30-35%, more if necessary in May and June; about 70% of its production is for Raytheon brand, remainder for Montgomery-Ward, Western Auto, Gamble-Skogmo and other private labels . . . *Retailing Daily* (April 2) reports big private-brand promotions being prepared by dept. stores, with offers of 17-in. tables at $179, open consoles at $219 or $229, consoles with doors $269; 20-in. tables at $249, open consoles $299.

New sets and prices: Majestic cut price on 17-in. leatherette table from $239.95 to $199.95; 17-in. plastic front console from $299.95 to $269.95 . . . Stromberg-Carlson has 17-in. table at $299.95 . . . Air King has new 17-in. table at $199.95 . . . Macy's this week advertised 17-in. Hyde Park table at $189 . . . Cadillac (Vol. 7:7) has 17-in. table at $189.95 . . . Both Jackson Industries and Trans-Vue have new "promotional line," with same sets and prices: 17-in. table $199.95, console $239.95, 20-in. table $249.95, console $299.95. Trans-Vue sets are made by Jackson.

Trade Trends: Census Bureau's monthly summary of retail trade in larger establishments in 45 cities over 100,000 population shows TV-radio store sales were down 6% in February from January, but 10% ahead of February 1950 . . . New York *Herald Tribune* survey of leading local dept. store sales in March shows TV-radio off 7% to 71% from same 1950 month, but one store reported 131% increase . . . Washington area's appliance sales leader last year was TV, says local Electric Institute, accounting for $19,115,000 vs. refrigerator sales of $16,200,000.

About 800 employes at 4 RCA plants reported "temporarily" laid off due to materials restrictions and changeover to defense production; plants are in Indianapolis, Bloomington & Marion, Ind.; Canonsburg, Pa. . . . CIO's International Union of Electrical Radio & Machine Workers (IUE) April 3 won vote in RCA Victor plant in Camden, will replace left-wing UEW which CIO recently ousted . . . RCA spokesman says nothing to reports its advertising account will switch from J. Walter Thompson to Biow.

Upcoming Meetings: RTMA and Canadian RMA at Seaview Country Club, Absecon, N. J., April 12-13 . . . Radio Pioneers, Hotel Stevens, Chicago, April 17 (during National Assn. of Broadcasters convention), with RCA's Sarnoff accepting Radio Hall of Fame Award in memory of Marconi . . . Parts Distributors Conference & Show, Hotel Stevens, Chicago, May 21-23 . . . National Appliance & Radio Dealers Assn., Hotel Stevens, Chicago, June 25.

First on uhf bandwagon among receiving antenna makers is Clear Beam Television Antennas (Pete Wald), 618 No. La Brea, Los Angeles, which plans production of 13-in. unit to retail for $2-$3. Company also makes lead-in wires, including open-wire type claimed to have 1/6th as much loss as conventional lead-ins.

Trade Personals: Charles E. Krampf succeeds Bert Conway, resigned, as executive v.p., Aerovox, continuing also as president of Electrical Reactance Corp. . . . John Kuneau, who joined Philco in January from J. Walter Thompson Co. to handle public relations, advanced this week to v.p. . . . W. A. Weiss, since 1947 mgr. of Sylvania receiving tube plant in Emporium, Pa., named mgr. of its new $1,000,000 receiving tube plant to be ready this fall in Burlington, Ia. . . . Wm. H. Moore, v.p. of Packard-Bell's cabinet plant in Santa Ana, transferred to main office as asst. to president on defense contracts . . . Frank D. Langstroth, ex-Lansdale Tube Co., elected president of Starrett Television, succeeding R. D. Burnet, resigned . . . W. B. Whalley, of Sylvania plant at Bayside, L. I., appointed adjunct professor of electric engineering, Brooklyn Polytechnic Institute . . . John P. Gleason, ex-General Luminescent Corp., assigned by American Structural Products Co. to represent its Industrial & Electronics Div. in New York, with offices in Rockefeller Center . . . I. R. (Ike) Lambert, retired RCA general counsel, has moved to Wichita where he is opening law offices; he represents Mary Pickford in applications for TV, having filed 3 already in North Carolina *(TV Factbook No. 12)* and planning several more . . . Bernard Wolbarst, handling communications for Time Inc., elected v.p., Press Wireless Inc. . . . Ernest Marx, chief of DuMont receiver division, returned March 30 from month's business tour of Europe and South American TV cities . . . R. V. Bontecou appointed to new post of product mgr., GE Tube Divisions, Schenectady.

Washington's provocative TV advertising of "sales, clearances, promotion" will have to be cleared with local Better Business Bureau, beginning April 10. In letter this week to all dealers, BBB informed them all 4 Washington papers have agreed to submit such copy to it for approval before insertion; asked dealers to submit such advertising to newspaper at least 3 days before publication date. BBB letter refers to last year's standards (Vol. 6:15, 23, 26), "backsliding" that cropped up during sale ads last few weeks (Vol. 7:11). It's believed this is first time newspapers and BBB have cooperated to screen TV ads before publication, although practice is not unknown on other products.

An image orthicon film converter, selling for $270, is being offered by Television Accessories Co., 2514 Camino Real, Arcadia, Cal. Owner Wes Turner claims new device permits conversion of any image orthicon camera into film camera "within minutes," says Los Angeles KECA-TV, has used converter daily since last June 22. Advantages, says Turner, are: "(1) No more iconoscope tube or camera worries. (2) No shading to bother with. (3) No edge flare. (4) No chalky faces. (5) No abrupt changes in picture level with scene changes. (6) Wide compensation for light or dark prints. (7) Allen wrench only tool needed."

RTMA members sold 634,080 picture tubes in February —96% of them 16-in. or larger, 82% of them rectangular— valued at $17,555,375. Number is 9% greater than January's 580,317.

NARTB-TV committee may choose department's paid director (probably $35,000 a year) at meeting called Saturday before NAB convention, April 14—with FCC Chairman Coy still among those to be considered, but considerable opposition to him now because of his opinion in the vote favoring TV channels for "educators" (for text, see *TV Allocation Report)*. Also, there's some question now whether he would prefer that job as against seeking reappointment when present term expires June 30. Choice is in hands of 5 men: George Storer, Fort Industry Co.; Clair McCollough, WGAL-TV & WDEL-TV; Robert Swezey, WDSU-TV; Campbell Arnoux, WTAR-TV; Paul Raibourn, KTLA (Paramount). Meanwhile, parent NARTB chose as its $40,000 paid president Harold E. Fellows, CBS New England director and manager of its WEEI, Boston; he takes office June 4, succeeding Judge Justin Miller, who becomes chairman and general counsel.

Phonevision's 90-day test authorized by FCC among 300 Chicago families ended March 31, with Zenith's E. F. McDonald reported elated over results. Next step, presumably, is application to FCC for formal rule-making hearing to permit pay-as-you-look system of TV on commercial basis. Zenith hasn't applied yet, however, but has invited commissioners and key staffmen to witness demonstration in Chicago April 17 during NARTB convention. Before it goes to FCC, results of observations by U of Chicago National Opinion Research Council will presumably be made ready. Movie industry, meanwhile, shows little more enthusiasm than before, and telecasters seem apathetic—particularly now that their time is at premium and they're moving into profitable operation (Vol. 7:13). Latest wrinkle in Zenith's continuing promotional campaign is metered-mail puff reading: "Zenith Phonevision can bring you the best TV for low cost entertainment."

How FCC's statement about films for TV (Vol. 7:13) applies to theatre owners is object of probe by 3-man Theatre Owners of America committee, set up at this week's TOA board meeting in Washington. Members of committee, who will seek meeting with FCC chairman Coy, are: Gael Sullivan, TOA executive director; Julian Brylawski, Washington exhibitor; Marcus Cohn, Washington attorney. TOA theatre-TV enthusiasts look for hearing on request for frequencies sometime this fall.

New CBS color promotional effort will be demonstration for Washington area servicemen in U. S. Chamber of Commerce Auditorium, 7 p.m. April 13, presumably first of series around country. CBS is working with local Rucker Radio Wholesalers; CBS consultant Richard Mahler will run show. CBS has also extended its product demonstration series (Vol. 7:11), conducting showings for executives of Congoleum-Nairn, Chesebrough, Wamsutta Mills, Borden, Duffy-Mott, Esso, Wildroot.

Only application for new TV station this week was from KSWO, Lawton, Okla., for Channel 11. This makes total of 396 applications. Request of WPDQ, Jacksonville, for reinstatement of CP it relinquished in 1949 (Vol. 5:19, 22) was denied by FCC. It was told to reapply. [For further details about applicant, principals, etc., see *TV Addenda 12-M* herewith; for listings of all applications to date, see *TV Factbook No. 12*, with Addenda to date.]

Defense Mobilizer Charles E. Wilson will be featured TV luncheon speaker April 19 at NARTB convention in Chicago. He will speak from Washington over closed TV circuit, be seen on 30-in. DuMont sets.

Andrew W. Bennett, 56, Washington radio attorney, died April 3 in Stuart, Fla., where he had lived since dissolving his partnership recently with John A. Mason, recalled to Navy.

Personal Notes: Joseph V. Heffernan, RCA v.p. and gen. attorney, appointed NBC financial v.p.; he's succeeded at RCA by Robert L. Werner of his staff, whose title is gen. attorney . . . Vernon Brooks, operations mgr. of WGN-TV, Chicago, has resigned . . . Lew Frost, asst. to John K. West, v.p. in charge of NBC Western Div., appointed director of network operations, Hollywood . . . John W. Brooke promoted to Eastern TV sales mgr., George Stanton Midwest TV sales mgr., Free & Peters, under TV v.p. I. E. (Chick) Showerman . . . Jack W. Brand named executive producer, WENR-TV and ABC-Central Div. . . . Robert F. Laws named sales mgr., KECA-TV, Los Angeles, in addition to being gen. sales mgr. of ABC Western Div.; Tom Sarnoff named sales supervisor and asst. to Mr. Laws, and L. D. Larimer placed in charge of TV national spot sales . . . Tom Knode, ex-NBC-TV station relations, now with WIVI, Virgin Islands . . . George E. Simons has resigned as Crosley adv. mgr. to become sales v.p., John Sutherland Productions Inc., Hollywood . . . Walter H. Smith, ex-CBS and Young & Rubicam, named marketing-research v.p., Kastor, Farrell, Chesley & Clifford Inc. . . . Jeff Selden promoted to TV-radio dept. director, Arnold Cohen agency, N. Y.

Station Accounts: American Vitamin Associates Inc., which has had exceptional results introducing its "Thyavals" and "Orvita" via West Coast TV, will not only sponsor Cubs and White Sox games on WGN-TV, Chicago, thru The Counselors, Hollywood (Vol. 7:13) but has also purchased 30-min. *Leo Carillo Show* (kine) and three 15-min. Class A periods on that station—said to be largest single time sale ever made in Chicago . . . Sears Roebuck local stores throughout country turning more and more to TV, with these time purchases announced in New York area this week: *Shopper's Corner*, Tue. & Fri. 11:45-noon on WABD; sports on WNBT; participations in *Margaret Arlen Show* on WCBS-TV; hour film weekly on WATV; 2 films weekly on *Night Owl Theater* on WPIX . . . Grosset & Dunlap (book publisher) takes Mon. 11-11:15 p.m. on WABD, New York, for *We Challenge Your Memory*, thru Madison Adv. Agency . . . Family Circle Magazine, published by P. K. Leberman, who formerly owned Seattle's KRSC-TV (now KING-TV), preparing TV film spots to promote sales through chain food stores . . . Add baseball sponsorships (Vol. 7:13): Burger Beer, Columbus Red Birds, WLWC . . . Add dept. store sponsorships, Rike-Kumler, Dayton, *Shopping with Cornelia*, 1-1:30 daily on WLWD . . . Among other advertisers currently reported using or preparing to use TV: Survival Inc. (paint that prevents flying glass), thru Klores & Carter Inc., N. Y.; Bu-Tay Products Ltd. (Rain Drops water conditioner), thru Brisacher, Wheeler & Staff, Los Angeles; Harry T. Campbell Sons Corp. (Sakrete dry mix concrete), thru H. Lee Hoffman Adv., Baltimore; Air King Products Co. (TV, radio receivers), thru Bennett, Walther & Menadier, N. Y.; Kendall Foods Inc. (dog foods), thru Dan B. Miner, Los Angeles (KTLA); Zippo Mfg. Co. (Zippo lighters), thru Geyer, Newell & Ganger, N. Y. (WCBS-TV); American Cyanamid Co. (Superset wrinkle-proof fabric), thru Roy S. Durstine, N. Y. (WCBS-TV); Cinch Products Inc. (cake mixes), thru Elwood J. Robinson Adv., Los Angeles (WCBS-TV); Clean Products Co. (Clean wallpaper cleaner), thru Byer & Bowman Adv., Columbus, O. (WDTV); Liquinet Corp. (Liquinet liquid hair net), thru A. Martin Rothbardt Inc., N. Y. (WCBS-TV); Roux Distributing Co. Inc. (Roux color shampoo), thru Dundes & Frank, N. Y.; Orange-Crush Co. (Old Colony quart package) (WGN-TV & WBKB); James Kiami Chemical Corp. (Weather Seal auto glaze), thru Product Services Group, N. Y.; Telegift Inc. (gifts-by-wire service), thru Lewin, Williams & Saylor, N. Y.

Editor's Note: *News of Controlled Materials Plan, vitally affecting every phase of TV-radio-electronics manufacture, is included in special Mobilization Electronics Report (white) section herewith.*

CBS SPRINGS SURPRISE AM RATE CUTS: Oddly enough, AM radio's league-leading CBS is first to crack network rates -- an out-of-the-blue announcement April 12 stating that, effective July 1, rates for 8-10:30 p.m. network time will go down 15%, for 1-8 p.m. and 10:30-11 p.m. down 10%.

It was tacit, though not expressed, capitulation to advertiser demands for reductions on basis largely of TV inroads on audience.

Decision followed disclosure of CBS-Hytron deal (see p. 2) by one day, came as complete surprise to most affiliates right after special meeting of Affiliates Advisory Board headed by "Ike" Lounsberry, WGR, Buffalo. Presumably board wasn't unanimous in agreement, and CBS officials declined further comment.

CBS affiliates contacted around country expressed astonishment in light of high level of both CBS and their own billings. Though NBC had "no comment," there was irony in fact that network, more openly committed to TV, attempted to do same thing last December but backed down when affiliates howled (Vol. 6:50, 7:1).

Sudden CBS move may have been precipitated by rumors ABC & MBS were about to cut rates and NBC is still bent on doing so. Their cuts are now deemed certain, but CBS wants to set pattern, standardize cuts, hold radio leadership.

Ironical, too, is fact CBS continued first 2 months of 1951 to top rivals in network billings -- Jan.-Feb. PIB figures showing CBS total of $12,972,841 vs. NBC's $9,947,573, ABC's $5,734,166, MBS's $2,969,592 (p. 2, Vol. 7:13). All but CBS were down from same 1950 period -- but apparently a general downward trend was betokened. During 1950, CBS led by far, with $70,744,669 to NBC's $61,397,651, ABC's $35,124,-625, MBS's $16,091,977 (p. 5, Vol. 7:3).

Better-positioned AM stations generally, with spot and local booming, say business is still at all-time high -- and Detroit's powerful WJR, CBS affiliate, only this week reported first quarter sales far ahead of same 1950 quarter, profit down only because of higher taxes (see Financial & Trade Notes). Reasoning behind network rate-cut now, as stated by CBS sales v.p. Jack Van Volkenburg in April 13 interview, runs something like this:

Advertisers are increasing resistance to radio. At present radio rates, it's hard to interest new advertisers in AM medium. ANA and individual sponsors have been pressing for rate cuts insistently during last year (Vol. 6:14-15,29-31; Vol. 7:11). Reduction should stimulate interest of old and new advertisers, maintain radio's position as "best buy in advertising."

But that doesn't alter objections, freely expressed by CBS affiliates, to across-the-board rather than selective cuts in TV markets only; to fact that most of them are heavily booked, indeed hard put to it to clear time for more commercials. And many simply don't like idea of "capitulating" to claims made for TV.

This much seems sure: AM network rate cuts, now-documented facts of TV

Copyright 1951 by Radio News Bureau

APR 16 1951

inroads on audience and sponsors, TV's fast-building dollar volume (Vol. 7:13), feeling among broadcasters that telecasting is their natural heritage albeit so very few would venture into it pre-freeze -- these factors will combine to intensify eager quest for new TV stations and demand for speedier action on freeze.

WHYS & WHEREFORES OF CBS-HYTRON DEAL: These would seem to be factors which finally decided CBS to plunge into the TV-radio manufacturing business by acquiring Hytron Radio & Electronics Corp., of Salem, Mass., sizeable tube manufacturer, along with its receiving set manufacturing subsidiary Air King Products Co., Brooklyn:

(1) Simple and natural quest for profit -- desire for share of an industry whose boom seems temporarily stayed (see p. 8) but whose potential is enormous, once the defense economy relaxes and FCC really unfreezes.

(2) To capitalize on its own great trade name, and its great promotional abilities and facilities. It's reasonable to assume receivers will be made bearing "CBS" or "Columbia" brand names, publicized heavily via its AM & TV networks.

(3) Buildup of resources in hope that its FCC-approved color system will eventually prevail. CBS wants to be prepared to produce color receivers itself if, as seems likely, rest of manufacturing industry persists in its lack of enthusiasm for any non-compatible, mechanical system of colorcasting. Issue is now before U.S. Supreme Court (Vol. 7:13).

(4) Intense rivalry with RCA, whose subsidiary NBC it has outstripped in radio billings while lagging far behind it in TV (see p. 2, Vol. 7:13). CBS borrowings of $10,000,000 from Prudential and $5,000,000 from Metropolitan Life this week are obviously designed to help it win lost ground in TV and to finance expansions, notably its costly new Hollywood Center.

Loans had nothing to do with Hytron deal, said CBS president Frank Stanton, and this would seem to be borne out by fact that no money is involved -- CBS simply exchanging 31 shares of its stock (quoted at around 30 on N.Y. Exchange at time of announcement) for 100 shares of Hytron (quoted as around 9½ over the counter). The Hytron quotation remained firm (9¼ bid, 10 asked) through week, but CBS gained 3 points up to Friday's closing.

Stanton also said deal did "not particularly have color in mind" -- also quite likely since (a) Supreme Court decision is tossup, and (b) the preponderant pro-compatibility, all-electronic color folk (including Hazeltine, GE, DuMont, Sylvania & Philco as well as RCA) have improvements up sleeves which FCC can hardly refuse to consider after the legalisms are cleared away.

Deal wasn't entirely to liking of whole CBS corporate family, still needs approval of both companies' stockholders. But it may give CBS same hedge against possible shrinkage of still-lush AM broadcasting, and support for costly new telecasting, which its rival NBC enjoys -- namely, capacity to make up initial TV costs and losses from profitable (up to now, at least) receiving set and tube business.

For fact is that TV receiver and component manufacture last year hit $1.7 billion; that 6-year-old telecasting industry, with only 107 stations, last year enjoyed dollar volume of more than $105,000,000, or about 25% of 30-year-old radio broadcasting with 2000-plus stations; and that TV's 4 little networks, linking mere 47 cities, are already doing half the dollar volume of AM's 4 big networks linking practically every market area of the land (Vol. 7:13).

CBS has long cast eye on manufacturing business -- in recent years had looked into Capehart-Farnsworth plant (later absorbed by IT&T), Sylvania's Colonial plant in Buffalo, Raytheon's Belmont plant in Chicago, probably others.

Ironically, CBS becomes patent licensee of RCA, since both Hytron tubes and Air King receiver production are licensed -- and CBS will also now have facility to manufacture RCA tri-color tube which it sorely needs for its color system and which RCA has promised to permit licensees to make and use, having already sent designs.

* * * *

Financially, CBS is strong indeed -- ended 1950 with highest gross income in its history, $124,105,408, but with profit down slightly ($4,105,329, or $2.39 per share) due to taxes that were higher than profits (Vol. 7:12). At end of 1950, CBS

earned surplus was $28,572,222. Of 1,500,000 Class A $2.50 par common shares authorized, 961,278 were outstanding; of 1,500,000 Class B, 948,674 were outstanding. Net earnings record shows declines in recent years.

In 1949, CBS grossed $105,397,580 and netted $4,184,079 ($2.44); 1948, $98,377,258 & $5,041,682 ($2.94); 1947, $101,045,647 & $5,920,104 ($3.45); 1946, $91,996,822 & $5,795,896 ($3.37); 1945, $86,257,385 & $4,308,627 ($2.51) plus $1,037,014 (60¢ per share) derived from sale of WBT, Charlotte; 1944, $84,905,830 & $4,678,361 ($2.72). [For officer stockholdings, see p. 16, Vol. 7:13.]

How much of CBS gross and net derive from subsidiary Columbia Records Inc. has never been disclosed -- but recording firm is said to have been fairly profitable last year along with rest of that industry.

* * * *

Hytron has won good position in receiving tube manufacture, riding TV boom and recently expanding with new plant in Newburyport, Mass. It's also strong in picture tubes, though not in class with RCA, Sylvania, GE and DuMont volume-wise. It has not indicated how much dollar volume is accounted for by Air King, but that company is probably toward bottom of industry's Big 20 set producers (Vol. 6:8) and has been major private-label producer for Sears Roebuck, Firestone, Pathe, et al. It also has small Brooklyn cabinet-making subsidiary, Royal Wood Products Mfg. Co.

Hytron's consolidated 1950 sales totaled $40,542,135, net profit $3,348,871, or $1.65 per share on 2,004,892 shares outstanding. Its earned surplus at end of year was $2,584,694, net working capital $6,492,132. It split stock 2-1 in 1950.

Last year represented huge jump from preceding operations: 1949, gross of $16,226,143 and net of $565,171 (45¢ on 1,262,422 shares); 1948, $4,159,714 & $63,853 (11¢ on 573,835 shares); 1947, $4,153,288 & $28,971 deficit; 1946, $5,013,143 & $30,603 deficit; 1945, $5,257,257 & $4,759 deficit; 1944, $5,264,088 & profit of $131,314 (76¢ on 173,835 shares).

It's probable that acquisition of Hytron, with considerable plant facilities, will give CBS better tax base than now, for broadcasting represents far smaller plant investment in relation to volume than manufacture. As CBS figures show, its volume has gone up consistently, but profits have slipped -- largely due to huge talent investments, resulting from raids on other networks, but also due to higher taxes (particularly 1950).

Hytron-Air King operations, joint statement says, will continue under present managements, with 4 of their executives going on CBS board. These will include Lloyd H. Coffin, chairman, and Bruce A. Coffin, president, of Hytron, and David A. Cogan, president of Air King.

FCC EASES ALLOCATIONS DEADLINES: Industry got requested breather, in vhf-uhf allocations proceedings, when FCC granted postponement of deadlines for comments on allocation plan and beginning of city-by-city hearing. Largely because of conflict with NARTB April 15-19 convention, Commission moved comment deadline from April 23 to May 7, opposition deadline from May 8 to May 22, start of city-by-city hearing from May 23 to June 11.

Most applicants will use delay in dogged hunt for more vhf channels. Intentness on vhf is understandable, in light of simple uncontroverted fact that uhf can't possibly get going on any meaningful scale for many months, probably several years. Yet, on other hand, additional vhf stations won't blossom forth in any hurry either (Vol. 7:12-14).

Nevertheless, uhf outlook brightens daily, as manufacturers pull wraps off remarkable results quietly achieved in laboratories over past few years, and as additional propagation data indicates probability of very acceptable services areas for uhf in many, if not most, areas (see stories on pp. 4 & 5).

Another Senator got into educational TV act this week -- Sen. Wm. Benton (D-Conn.), onetime advertising mogul (Benton & Bowles) who controls Muzak. In long speech on Senate floor April 13, he introduced S. Res. 127 calling for 90-day "quick review" of question by Interstate & Foreign Commerce Committee.

He wants FCC to hold off final decision until Senate receives and studies

Committee's findings on: FCC's allocations criteria, program trends, program control, prospects of program financing by Govt. and other non-profit sources, legislation needed.

"I think TV is too vital to the future of America," he said, "to be relegated at this time, without further study by Congress, to the custody of any govt. agency or bureau. Without implying any criticism of the FCC...for which I have the very highest regard, I suggest that the Congress [should] inform itself..."

Sen. Benton also plugged Phonevision and Subscriber-Vision, saying:

"I suggest that there is nothing at all out of tune with our system of free enterprise in the suggestion that radio and TV might sell its service, instead of giving it away...I happen to believe it is a major business opportunity..."

Chiming in on Sen. Benton's educational pitch were Sen. John Bricker (R-Ohio) and Sen. Lester Hunt (D-Wyo.).

Opposition to vhf education reservations is coming from some educators themselves. U of Kansas City president is reported to have consulted with city's applicants and written FCC that university didn't expect to get into TV for many years, thus would be satisfied with uhf reservations.

Pro-reservation comment by one of TV's well-placed "ins" -- WBEN-TV's A. H. Kirchhofer, whose Channel 4 would remain intact -- as quoted in TV News, Buffalo:

"The provision for educational channels is a forward-looking step. I hope the educational institutions will be more successful in their utilization than they were with AM or FM..."

BRIDGEPORT WINNING UHF 'CONVERTS': Another visit to Bridgeport, which is turning out to be the "nursery of uhf," thanks to the RCA-NBC "guinea pig" station (Vol. 6:5 et seq), reveals that just about every set and tuner maker and many of his brothers of the broadcasting business have been to town to run tests.

Our junket this week was mainly to have look at Crosley's new "Ultratuner" (see page 5), but we took occasion to check on what others have done in and around Bridgeport. By and large, the reports are favorable.

Unusual focal point of activity is Bridgeport home of Rudy Frank, promotion manager of New Haven's WELI (AM), owned by veteran broadcaster Col. Harry Wilder, of Syracuse, who founded WSYR-TV there. Mr. Frank is an absolute convert to uhf, as is his boss, general manager Richard Davis, who told us he and his engineers are thoroughly convinced of uhf potential.

This conviction isn't based on mere theory, say Messrs. Davis and Frank. Their engineers have conducted over 500 measurements in station wagon, checked converters in 14 homes, over many months. They're satisfied with what they've seen.

Mr. Davis can't understand why more broadcasters don't get excited about uhf. "We don't want to cover all of New England," he says. "If we can deliver 20-25 miles, and I know uhf can do it, that's good enough for us. A clear channel AM station may claim a lot of area, but its listeners are close to home. Same will apply to TV."

Mr. Frank has had samples of almost everyone's converters -- including Zenith, RCA, GE, Crosley, Philco. Engineers have been running in and out of his house ever since the uhf test station went on air more than year ago (Vol. 5:53). Of converters he's had, some of them early models, he says GE's was best but would cost too much to build; Zenith's demanded very strong signal; RCA's drifted most.

Philco loaned its single-channel 2x3x4-in. converter (Vol. 6:15), which employed rather expensive crystal. But Frank says RCA's Wenyuan Pan was fascinated with Philco device, worked up one using 30¢ crystal which could sell for $2.

We saw first-rate uhf pictures on Philco 16-in. set, to which Frank attached different converters. Uhf images were vastly better than vhf from New York stations, 50 miles away, whose signals may be rated tolerable.

WELI management is so hepped up about uhf that it placed first order with GE for its 5-kw transmitter and helical antenna (Vol. 7:12). Davis has written his

"uhf credo" for publication in April 16 Broadcasting Magazine. We urge you to read it to get full appreciation of reasons behind his enthusiasm.

* * * *

Firm optimism about uhf coverage is held by the chief engineer of FCC, Curtis Plummer. Transmitting end doesn't bother him. In April 9 talk to Washington IRE, he ventured: "Success of uhf will be determined at the receiving end."

"The uhf data indicates," he said, "that uhf will deliver about the same field strength as the lower vhf channels out to about 25 miles. I recall that in 1945 applicants came crying to us with tale that they had to have Channels 2 to 6, that 7 to 13 couldn't possibly serve their markets. Now, it's the same story -- except that they insist on Channels 2 to 13."

Defending allocation plan in toto, Plummer said FCC's basic philosophy is to insure reasonable amount of rural coverage and to prevent what happened in AM -- gradual hemming in of service areas. Hence FCC's insistence on minimum spacings permitting maximum power for everyone, whether station starts out large or small. Roughly 40-mile radius is regarded as station's service area, he said.

* * * *

Plummer's worries about receivers should be fast diminishing, as manufacturers show they can provide good uhf reception -- whenever public wants it (see below). And manufacturers' transmitter and antenna developments make it clear they're ready to produce equipment -- when applicants want it.

GE is pulling out all stops at NARTB convention. It's ready to take orders for 5-kw uhf transmitters and 20-gain helical antennas (Vol. 7:12). Cost of transmitter will probably run 20-40% higher than 5-kw vhf, which runs about $90,000.

GE also has special deal for small operators -- driver stage of the 5-kw unit, complete in itself, with output of 100-125 watts. Amplifiers can be added to driver as desired -- same as with many FM transmitters. Price of little package isn't yet set. GE promises delivery "third quarter 1952," thus lending weight to predictions that uhf is bound to emerge slowly.

RCA is planning to offer 1-kw air-cooled transmitter and 20-gain antenna, but feels it's too early to quote delivery dates or prices. Amplifiers may be added to unit, and antenna is built to take 10-kw input.

DuMont has 1-kw unit, but isn't pushing it, apparently feeling that real demand will be for greater powers.

CROSLEY'S 'ULTRATUNER' SCORES HIT: Looks like Crosley did a real job with its uhf converter. It produced excellent picture for newsmen at April 11 demonstrations in Bridgeport. And engineering claims are really quite striking -- sensitivity, selectivity and stability as good as vhf, if not better.

"Ultratuner" is a continuously-tuned converter, covering all uhf, built to sell for "considerably under $50" at present cost levels. It can be attached to vhf set "in 2 minutes," simply by plugging in and hooking up piece of twin-lead.

It has built-in antenna, which performed beautifully on 10th floor of Hotel Barnum -- just as well as outside antenna, in fact. And company claims that performance in residential areas is even better, due to absence of downtown noise.

Tuning is quite simple. Dial on vhf set is placed at spot marked "uhf" and converter is ready to go to work.

Dimensions of wooden converter cabinet are 9½x7x6⅞-in. Slide-rule dial is about 6-in. long, with 8 equally-spaced channel numbers -- 14, 18, 24, 30, 38, 48, 62, 82. Other channels are tunable in between. Tuner has 2 knobs. Switching between vhf-uhf antennas is automatic.

Converters are useful only with vhf sets employing the Crosley type of continuous tuner covering all 12 vhf channels plus spectrum between Channels 6 & 7. Crosley estimates there are about 2,500,000 such sets out, including most DuMont and Stromberg-Carlson. Some other types of sets may be able to use it, but many would require extensive changes first. Basic portion of tuner is made by Mallory.

Crosley didn't shilly-shally about its plans. It will make converters when

people want them -- namely, when signals are available. This will be "late 1952 or early 1953," v.p. John W. Craig estimated. But, he said, "it's ready for production now. It's here."

Company isn't particularly interested in selling converters per se, said Craig. Its prime purpose is protection of its own customers and good name. It is conducting institutional ad campaign in 20 TV areas, emphasizing simple convertibility of vhf sets. But no "selling" campaign is contemplated. "We just want to tell the public what we have," said Mr. Craig.

FCC members will be invited to demonstrations "if they're interested."

Combination vhf-uhf sets, with everything built in, will be available when needed. They'll cost $20-$30 more than vhf-only, Craig estimated, and he saw "no economic sense in charging customers extra for something they can't use for a long time or may not want or need at all in some areas."

Craig took crack at Zenith (Vol. 7:14), saying "misleading advertising and half-statements are worse than outright falsehoods." He said installation of Zenith uhf strips would cost money, including 3-4 hours of serviceman's time, and he pointed out that each uhf strip means one less vhf channel available.

* * * *

Converter was built from ground up -- two engineers under E. J. H. Buzzard working on it for over 2 years. Many new types of components were developed, including tubes. But all these are now ready for commercial production on standard basis, Buzzard reports. Some tricks are still trade secrets, apparently, including dialing mechanism and automatic vhf-to-uhf switching.

Questions by some reporters probably reflected public confusion as to what uhf means. Apparently, some believe that uhf is an entirely different system of TV, or that it's somehow peculiarly related to color. Of course, latter concept could turn out to be right, if uhf operators in strong vhf markets eventually seize upon color as an "extra" in attempt to offset obvious competitive disadvantage.

FCC Chairman Coy, speaking personally, definitely qualifies dictum in now-famous paragraph 20 of Commission's "anti-trust report" (Vol. 7:13-14)—an April 12 press release by Theatre Owners of America quoting him, with permission, as expressing hope that film companies will make *special films* for TV.

FCC report had said, in effect, that it might go hard on movie applicants for TV stations if it's shown they continue to withhold their films from TV—a statement that has aroused whole motion picture industry to anger, leading influential *Motion Picture Herald* April 7 to headline "Knife in the Back" and editorialize that Congress should investigate "before the FCC commissioners turn themselves into commissars in charge of what the 'proletariat' may hear, see and think."

Said TOA statement following "very satisfactory" meeting of executive director Gael Sullivan, consultant Nathan Halpern and Washington counsel Marcus Cohn with Coy April 11:

"Chairman Coy expressed the hope that motion picture producers would produce more films especially made for TV, while continuing to produce feature films designed solely for theatrical exhibition. Chairman Coy recognized that the TV broadcast needs for film to fit advertising segments call for special film product rather than the film features designed specifically for theatres."

TOA statement goes on to say movie company practices mentioned in FCC report "were not intended to, and did not in fact, have any reference to practices of exhibitors" and Commission will judge "on a case-to-case basis the qualifications of applicants for TV stations who have been involved in the violation of anti-trust laws or practices which tend toward the violation of such laws." Coy also is reported to have said FCC report will have no bearing on question of special frequencies for theatre-TV on which hearings are to be held.

This backtrack may satisfy exhibitors, probably won't sit well with producers—none but Paramount as yet showing any real desire to become telecasters—for language of FCC opinion plainly suggested release of first-run films "or else." Actually, it's exhibitors who don't want first-run films released to TV, which isn't in cards anyhow until TV outlets (now only 107 in number) can compete with 18,000 movie houses.

Following up sharp editorial in *New York Times* (Vol. 7:14), its radio editor Jack Gould April 8, in article critical of FCC dictum, suggested FCC "withdraw that part of its policy statement relating to the present practices of Hollywood studios as they concern TV, call a public hearing at which it can fairly set forth its own position, hear the full rebuttal of the film industry, and then reach a decision."

Wisconsin GOP Senator Wiley's criticism (Vol. 7:14) was answered April 12 in letter (FCC Public Notice 62856) stating all FCC did was point up "possible conflict of interest" if movie company owned a TV station, but had "made no final judgement."

"TV picturemaking without a camera," both monochrome and color, is slogan of new Telechrome Inc., 88 Merrick Road, Amityville, N. Y. President and chief engineer is J. R. Popkin-Clurman, ex-Hazeltine, who developed inexpensive devices for generating pictures (Vol. 6:8, 27). Organization offers $965 picture generator which "borrows" sync signal out-of-the-air from commercial station. It also has color gear which can generate and display signal for any system—simultaneous, field-, line-, dot-sequential or any variation thereof.

Station Accounts: February TV sponsorships were up 6.1% over January, reports March *Rorabaugh Report*, with 99 of the 107 stations (60 out of 63 markets) reporting 1053 national spot schedules, 3611 local-retail schedules, while networks reported 215 schedules (NBC 82, CBS 70, ABC 44, DuMont 19). Total of 4740 sponsoring compares with 4466 month before. List of network and spot sponsors is published in March *Rorabaugh Reports* . . . Philadelphia's WPTZ reports 210 advertisers during March, 82 local, 63 thru national rep, 65 NBC network . . . Hygrade Food Products Corp. sponsoring *Cook & Win* on WJZ-TV, New York, Tue. & Thu. 4:30-4:45, thru Zan Diamond Adv. . . . CBS Radio Sales reports its new *Range Rider* film series, starring Jack Mahoney, now locally sponsored on 10 stations, Langendorf United Bakeries taking it in the 4 West Coast TV cities . . . Finnish Govt., to promote tourist traffic on its railways and airlines during 1952 Olympic Games, planning to use TV and radio, thru Victor van der Linde Co., N. Y. . . . Add dept. store sponsorships: Saks Fifth Ave., with Ed & Pegeen Fitzgerald, on WJZ-TV, New York, Mon.-Wed.-Fri. 2:30-3; ZCMI Store, Salt Lake City, on KDYL-TV . . . Add baseball sponsorships (Vol. 7:13-14): Cleveland Indians, piped from WXEL to WBNS-TV, Columbus, for August Wagner Brewery; Washington Senators, piped from WTTG to WAAM, Baltimore, for American Brewery Inc.; Houston Buffs night games on KPRC-TV, for Philco and Henke & Pillot (chain market); Miami Sun Sox, on WTVJ for local Frigidaire distributor and spot users . . . Among other advertisers currently reported using or preparing to use TV: Kyron Foundation Inc., thru Melvin, Newell & Rector, Hollywood; Trico Products Corp. (car accessories), thru Baldwin, Bowers & Strachan Inc., Buffalo (WPIX); J. B. Williams Co. (Skol suntan lotion), thru J. Walter Thompson Co., N. Y.; Charles E. Hires Co. (Hires root beer), thru N. W. Ayer & Son, Philadelphia; White Rock Corp. (sparkling beverages), thru Kenyon & Eckhardt, N. Y.; Hood Rubber Co. (canvas & rubber shoes), thru McCann-Erickson, N. Y.; Schiaparelli Inc. (men's toiletries), thru Robert W. Orr & Associates, N. Y.; J. Colonna Bros. (Italian Kitchen bacon cheese), thru Nolan & Twichell Adv., Albany (WJZ-TV); John W. Taylor Packing Co. (potatoes & tomatoes), thru H. W. Fairfax Adv., N. Y. (WJZ-TV); Susquehanna Mills Inc. (mattresses), thru MacManus, John & Adams, N. Y. (WABD); Judson Dunaway Corp (Expello moth deterrent), thru J. M. Mathes Inc., N. Y. (WABD).

———■———

"TV Is a Good Summer Buy"—150-page April 9 *Sponsor* makes point with lot of facts. Trade journal compares 16.8 Videodex rating for 15 network TV shows for August 1950 with 18.5 average for December—drop of only 1.7. It reports 8 top NBC-TV shows, using Nielsen ratings, came up with average summer rating of 24.5 vs. spring average of 27.4—difference of only 2.9.

Magazine also quotes from Nielsen study showing hours of viewing for all 1950 months ranged from high of 4.34 hours per day in September to low of 3.57 in August —not very great dip. Elmo Roper study of TV owners in August 1950, *Sponsor* says, showed that 73.7% chose TV viewing as primary after-supper leisure time activity.

TV networks are making pitch to keep Class A time sponsors on during summer. CBS offers 10% discount for 8 summer weeks in addition to regular 10% discount for 52 weeks; also will cut production charges one-third. NBC offers "contributions" as high as $4000 per program toward production costs if advertiser stays on during summer. ABC and DuMont are said to plan no such inducements. All networks feel they'll have top commercial programs this summer, compared to thin fare in 1950.

Corrections to TV Allocation Report

MAKE these changes in your copy of full text of FCC's "TV Allocation Report" of March 21, as printed by *Television Digest* and furnished you along with Vol. 7:12—and FCC engineers assure us that the text will be completely accurate:

Page 15: First column, 17 lines from bottom, change formula to read: $R(T)=R(T=10)k(T)$. Second column, 7th line down in paragraph starting "If the distance . . . " change formula to read $R_d(T=10)$.

Trade Report
April 14, 1951

TIGHTER NICKEL MEANS FEWER TV-RADIOS: Nickel shortage looms so real that it may soon force reduction of TV-radio output in direct proportion to impending cut in raw material supply -- at least 50%, possibly even more.

That's the current trade forecast from highest govt. sources, to be spelled out in detail by top mobilization officials when they meet with industry representatives in Washington next Tuesday (see Mobilization Notes).

DO orders already placed would consume 85% of available supply of nickel if they aren't trimmed, as reported here last week (Vol. 7:14). For receiving tubes and kinescopes, there appear to be no all-out substitutes or real shortcuts.

Tungsten will be next serious shortage to hit industry -- and govt. metals experts say its effects on tube industry could be more crippling than nickel crisis.

If condition were merely short-range, this might be welcome news to great number of distributors-dealers with "digestive tracts" figuratively "constipated" with excess of merchandise -- but at the factories and among rank-and-file employes the situation presents grim prospects for later this year.

* * * *

Plain, unvarnished fact is that the public, with a few spotty exceptions, has taken a walk on TV buying. Whole trade is in dither. Instead of the 1,000,000 or so TVs estimated in inventories (Vol. 7:14), one of biggest set makers this week calculated nearer 2,000,000.

Factory layoffs are spreading, union leaders plenty worried -- latter now awake to need for hurrying end of freeze and adding their considerable influence to pressures being exerted for relaxation of Regulation W. Whole trade blames these factors in main for present situation, plus confusion about prices, color, etc.

Cutbacks are order of the day, especially since defense orders are coming through in mere driblets. Hardly a receiver, tube or components factory has been lucky enough to escape layoffs. "Long vacations" this spring and summer may be tactic used by some. RCA layoffs at Camden are reported at 1300 to date, mainly recent additions to payroll. Emerson dropped 250 in Jersey City plant. DuMont, already on 4-day work week, this week laid off 500 of 3500 workers in Paterson plants, and Westinghouse dropped 130 off usual 1300-1500 payroll at TV plant in Sunbury, Pa. Others had already cut rolls, notably in Chicago (Vol. 7:13-14). Philco, which has enjoyed fairly steady production pace, issued this statement this week:

"Starting April 23, part of TV-radio production of Philco will be cut back temporarily due to an adjustment of production schedules in line with the requirements of govt. regulations and the spring sales demand. Philco is continuing full production of all govt. work, auto radios, export products as well as refrigerators, freezers, electric ranges and air conditioners." Two-week furlough of 5000 employes is indicated, some of whom may not be called back soon.

* * * *

Irony of situation is that, if nickel curtailment cuts tube supply and reduces output of small as well as big radios and TVs, lower production rate may force higher prices because of inability to maintain economies of mass production.

Thus if manufacture slows down and even a modicum of demand is maintained, present stocks next fall and winter might be "worth their weight in gold."

That's what wholesalers and retailers are being told -- but their retort is that it's scant comfort to them while huge credits are tied up in warehouses.

Every conceivable sales gimmick is currently being employed to move goods -- giveaways of all sorts, even of watches and candy for the kiddies. "Warehouse" and "surplus stock" sales offer even branded merchandise at 20% to 50% off. Yet the only items moving at anything like normal pace seem to be TV table models at $200 and under and radios, especially portables.

Note: RTMA auditors failed to report output figures for first week of second quarter at week's end, as customary -- so they won't be available until early next week. RTMA members can contact association direct if they're in a hurry.

Interesting parallel between TV and automotive unit output is discernible from glance at authoritative Automotive News figures. Both are in same boat now so far as lagging inventories are concerned; both face big second quarter cuts.

TV output of 7,463,800 sets last year is matched by 8,004,242 automotive units (6,663,461 passenger cars, 1,340,781 commercial vehicles). First quarter this year, TV turned out 2,196,016 sets as against 1,605,000 same 1950 quarter (Vol. 7:14). Autos totaled 1,982,075 (1,605,611 passenger cars, 376,464 commercial vehicles) first 1951 quarter vs. 1,647,942 (1,348,312 passenger, 299,630 commercial).

NPA PLEDGES ACTION ON REPAIR PARTS: Long-overdue NPA action to assure replacement parts for TV-radio and other electronic equipment was promised this week by Office of Civilian Requirements. It's still in preliminary stage, however, and will probably be incorporated into Controlled Materials Plan (see Mobilization Reports).

Electronic parts distributors met April 9 with NPA and renewed last month's plea that manufacturers be permitted to make and sell at least 150% of the number of parts sold for replacement during first-half 1950 (Vol. 7:10).

This general plan has been approved by Office of Civilian Requirements, which is headed by ex-West Coast broadcaster Lewis Allen Weiss (Vol. 7:10). But first NPA order incorporating the principle has yet to be issued.

Distributors made other proposals, and OCR spokesmen say some of them are being drafted in form of recommendations to other NPA divisions involved -- in the hope they'll finally end up in orders or directives. The distributors proposed:

(1) Base period of steel durable goods order M-47 (Vol. 7:10-11,14) -- first 6 months of 1950 -- be extended to entire year of 1950, because of phenomenal increase in production of TV and other electronic items during last-half 1950. NPA officials say this can't be done, since Defense Production Act provides base period must be "representative period preceding June 24, 1950."

(2) Component wholesalers be granted priority to order replacement parts at 150% of base period rate.

(3) NPA initiate campaign to salvage obsolete radio sets.

(4) All equipment and parts used in maintenance and repair be "simplified," but not to the extent of so-called "victory lines" used during World War II. Distributors' committee will meet with NPA again May 28.

FIRST-QUARTER sales and earnings reports of the manufacturers should be good—many better than same 1950 quarter, some perhaps as good as boom fourth quarter—but they're apt to mislead as to near-term trend of the now-lagging TV-radio industry. Unless sudden buying wave sets in, trade seems to be in for slower tempo during spring and summer months. Even if unit volume holds up as more low-priced sets are produced and sold, dollar volume probably won't—unless defense orders come through faster and larger than now.

Yet nobody can doubt TV-radio industry's long-term prospects. Short of war, good portion of that half of nation's populace still outside telecasting ranges should begin to get service by latter 1952. Mindless though it has been of trade implications of its dilatory handling of freeze, FCC can't keep freeze on forever and is now really moving toward ending it (Vol. 7:12 et seq).

New stations will have to be built, new-type receivers (in some areas with dual vhf-uhf tuners) will have to be made and marketed. If factory sales reached $1.7 billion last year (about 7,500,000 sets) and retail-installation-servicing trade was $3 billion, it's fair to assume that kind of market is still in store when artificial restraints like freeze, credit and materials limitations, etc., are lifted.

There's also simple fact that "TV saturation" is far from reality in most of the 63 population areas now served by the 107 existing TV stations (Vol. 7:12). On basis of 60-mi. coverage estimates, *Radio & Television Retailing* calculates Boston area families with TV sets total 65%, Philadelphia 61%, Milwaukee 60%, New York 57%, Los Angeles 57%, Cleveland 56%, Cincinnati 56%, Minneapolis-St. Paul 55%, San Diego 48%—to list only top ones.

These are the more "heavily saturated" areas. There's still good proportion of non-TV homes yet to be supplied and replacements yet to be sold in these and other presently-served areas, let alone the new ones to be opened up.

CBS has guaranteed itself a color set maker in acquiring Hytron's Air King (see page 2)—if Supreme Court gives it go-ahead. But Tele-tone, too, says it will "dust off" plans for "slave" unit (Vol. 6:45) upon favorable Court action. President S. W. Gross says "we'll get into production as soon as we can." He says he'll also be ready with uhf when demand arises, but doesn't see anything in it now to lift today's depressed market. CBS attracted big audience (1200-1400) of servicemen to April 13 demonstration in Washington of 17-in. drum set (Vol. 6:52), followed by long technical discussion by Edward Noll, TV Technicians Lecture Bureau, Indianapolis.

Topics & Trends of TV Trade: Govt.'s Regulation W has "killed sales above the $250 level," said Admiral president Ross Siragusa at stockholders meeting April 12, and it may be necessary for Admiral to seek bank loans to carry piled-up inventories. First 2 months of this year were good, he said, but March 1 began "definite slump" in company's TV sales. He blamed 10% excise, higher prices forced by higher wage and materials costs, confusion over color as contributors to slump.

It's still too early to make predictions for 1951, said Siragusa, but present slowdown may affect company's earnings for year despite brisk appliance business. Plastic material shortages particularly affect company's low-priced models, for which he said there's good demand. But same chassis in more expensive combination cabinet "can't be given away" in today's market.

Regarding defense program, he pointed out that 85-90% of electronic business is being given to non-electronic companies, while newer companies were getting only small percentage compared to their civilian output. Govt. business, he said, won't take up slack caused by loss of TV sales until late this year or early next.

* * * *

RCA and Sylvania reduced prices of CR picture tubes this week, following DuMont's action (Vol. 7:14) which followed wave of price-cutting by smaller firms. DuMont officially stated reason for cuts was "improved production methods and greater production" while neither RCA nor Sylvania gave out any statement, but it's commonly known trade fact that inventories were piling up in tube industry due to reduced public demand and that cutbacks in production are now in progress. GE is expected to cut, too, but had not made any announcement up to presstime.

RCA reduced 17-in. metal rectangulars from $25 to $23 to manufacturers, $27.60 to $25.30 distributors, $38.20 to $35 retailers, $51 to $46.75 list. Sylvania cut 17-in. glass tube from $26 to $23.50 to manufacturers, $28.60 to $25.85 distributors, $39.35 to $35.55 retailers, $52.50 to $47.50 list. Sylvania's metal-coned 17-in. went down from $25 to $23 to manufacturers, $27.60 to $25.30 distributors, $38.20 to $35 retailers, $51 to $46.75 list. Sylvania's 20-in. was cut from $43.75 to $35 to manufacturers, $48.15 to $38.50 to distributors, $66.50 to $53 retailers, $88.75 to $70.75 list.

* * * *

New Meck high sensitivity set (Vol. 7:14) has four major engineering features that company claims will "treble the area of coverage" of each TV station, permit reception up to 100 miles from transmitter. This means, according to Meck's trade advertising, that dealers have "a million more homes" as prospects for TV. Named the "Red-Head," for color of some components, set's features are said to be: (1) Four IF stages of amplification. (2) High level video detector, feeding twice the video signal level of average set. (3) Newly designed synchronizing circuits, to prevent interference. (4) Balance of engineering factors to provide satisfactory fringe reception. Promotion speaks of a "built-in booster." Work on set began last October, Meck says. Set is now being delivered to market, and prices are "same as previous models."

Lots of talk about Tele King opening West Coast plant, and president Harvey L. Pokrass acknowledges that company is planning to open factory in Los Angeles area and that Mario Tosatti, ex-Crystal Productions (independent film producer), will be its executive head. Pokrass said Tele King production was continuing at about same levels as first quarter—which was about same as last 1950 quarter. Tele King plans new line in June for Chicago Mart.

Trade Miscellany: RCA's David Sarnoff tells *Variety's* Abel Green (in April 11 interview) that 6,000,000 TVs will be produced in 1951, making total sets-in-use 17,500,000 by year's end (though NBC Research's own figures would thus put total nearer 16,500,000). "Mr. Electronics," as Green calls him, "is so bullish in TV and its future that his dim views on radio would seem to dwarf AM's future chiefly because of his enthusiasms about TV" . . . Freed Radio creditors (Vol. 7:10) meet April 26 at 11:15 a.m. before Referee John E. Joyce in Federal Courthouse, New York City . . . Muntz TV announces expansion of its retail stores, reporting that since Jan. 1 it has opened new ones in Dayton, Springfield, Marion, Lancaster, Hamilton & Middletown, O.; Kenosha & Sheboygan, Wis.; Aurora & Waukegan, Ill.; Santa Ana, Cal. . . . Philco accessory div. staffers, in recognition of all-time production records achieved in March, received gold watches from gen. mgr. Herbert Riband at dinner April 11 . . . Dumont reports turning out 30-in. tubes (for own receivers only) at "nice rate" but doesn't disclose how many . . . New York *Journal of Commerce* says layoffs of TV-radio plant personnel in Chicago area close to 10,000, with Magnavox and Capehart-Farnsworth in Ft. Wayne reported laying off around 400 employes each . . . Hytron cut CR tube personnel at Newburyport this week, but receiving tube output reported still going full speed . . . Ansley has moved plant and offices from Trenton, N. J., to 85 Tremont St., Meriden, Conn.

Plant Expansions: Raytheon starts construction this month on new $1,200,000 receiving tube plant at Quincy, Mass., adding 86,000 sq. ft. to 23,000 now occupied by Tube Div. in Quincy and 270,000 by plant in Newton . . . Canadian GE erecting $1,000,000 addition to its Royce Ave. plant in Toronto, new 90,000-sq. ft. structure to be used for increased electronic production . . . Canadian Admiral Corp. (Vincent Barreca, president) has moved into new $300,000 plant at Port Credit, Ont. . . . Sylvania's new 30,000-sq. ft. plant in Warren, Pa., only few months old, will be expanded by July 1 with 50,000-ft. new wing to employ 300-400 workers on wire drawing and wire plating . . . Pacific Electronics, Las Gatos, Cal. (transmitting tubes, rectifiers) has acquired 77-acre plant site near Ventura, plans 125,000 sq. ft. plant, production of crystals, wood products, test instruments, etc.; George E. Mitzel is president.

* * * *

In apparent reversal of trend to larger picture sizes, Arvin this week announced resumed production of 8½-in. table models listing at $129.95 and offered in mahogany, willow green and sandalwood colors. TV-radio v.p. Harold B. Foulke also reported acceleration of four 12½-in. models at $169.95 (tables) and $199.95 (consoles), said growing demand for smaller screen sets is "dictated largely by the present condition of the popular pocketbook." The 8½-in. tube is made by GE, Arvin being only known customer. That neither 8½, 10, 12½, 14-in. sizes have been much in demand by manufacturers lately, is indicated by February RTMA production figures showing 96% of month's output were 16-in. or larger (Vol. 7:14).

Canadian RMA reports 4288 TVs sold by factories for $2,215,985 during February, with inventory of 2696 units as month ended. Table models under $400 list price totaled 324, over $400 totaled 1522. Consoles under $500 totaled 363, over $500 totaled 1637. TV-phonos numbered 442. More than half of February sales were in Windsor (Detroit) area. First 2 months of 1951 unit sales were 8907, valued at $4,195,060. Cumulative TV sales to Feb. 28 totaled 45,920 valued at $20,471,643, with 44% in Windsor area, 35% in Toronto-Hamilton, 16% Niagara Peninsula, 5% other areas.

Mobilization Electronics Reports
April 14, 1951

EDMUND T. MORRIS HEADS NEW EPB: Electronics Production Board, new top-level policy board of DPA, with last-word authority over all phases of electronics production and procurement (Vol. 7:11-12), will be headed by 44-year-old Edmund T. Morris, director of Westinghouse Electronics & X-Ray Div., Baltimore. He's Westinghouse career man, who started with company at 21 after taking master's degree at MIT, reports to Washington April 23 after vacation in Virgin Islands.

Board's primary function is "to make certain no electronic bottleneck stymies any element of the defense programs." Four of 7 present members are drawn from TV and related industries, some probably serving on temporary basis pending fulltime appointees and shaping up of staff. Official appointments haven't been made yet, but makeup of board at outset will comprise besides Morris:

John D. Small, ex-Emerson v.p., chairman of Munitions Board; Harry E. Ehle, International Resistance v.p., consultant to Army; Don Mitchell, Sylvania president, consultant to Air Force; Capt. Frederick R. Furth, chief, Naval Research Laboratory; John G. Daley, acting director, NPA Electronic Products Div.; Marion W. Boyer, general manager, Atomic Energy Commission.

I—HOW CMP WILL AFFECT YOUR BUSINESS: Tight new end-product controls on civilian TV-radio production will be by-product of Controlled Materials Plan (CMP), beginning July 1, despite fact that consumer durables won't fall within CMP's scope.

All phases of electronics industry will be affected by Govt's new method of controlling production. Here's what CMP will mean to your business:

CIVILIAN TV-RADIO, OTHER CONSUMER DURABLES -- Present limitation orders will be revamped, aimed directly at end-product manufacturers -- not at component makers and their suppliers, who bore brunt of previous materials orders. Use of copper and aluminum will be limited in same manner as Order M-47 now limits steel.

Steel order will be tightened -- permitting consumer durable makers to use steel in third quarter at 70% of rate they used it during first-half 1950, instead of current 80% limit (Vol. 7:10-11,14). Two other changes are being considered:

(1) Direct ceiling on number of units each manufacturer is allowed to produce. Auto industry is urging this type of control, several TV makers are known to favor it. Administrator Manly Fleischmann says NPA will ask for views of consumer durable manufacturers on this proposal. He'll run into stiff opposition from RTMA, whose board meeting April 12-13 at Absecon, N.J. passed resolution objecting to portion of present steel order which limits unit production of some TV-radio makers, asked tonnage limit instead.

(2) Change in base period for NPA orders, to reflect full year, intended to make orders more equitable to seasonal industries. Known to be under discussion are 12-month period ending June 30, 1950, and full year 1949. Either of these would be worse for TV-radio industry than present first-half 1950 base, because of comparatively low rate of 1949 TV production.

MILITARY ELECTRONIC END-PRODUCTS -- Will come under CMP. Plenty of paper work for manufacturers, who must estimate their requirements of steel, aluminum and copper -- and in some cases the requirements of their suppliers and subcontractors. But they can be sure of getting the materials they need, on time. Days of the "hunting license" will be over when CMP begins operating smoothly. A CMP allotment will be a "certified check" for materials.

COMPONENTS -- Still subject to final decision, it appears now that makers of components for civilian as well as military products will fall within CMP. Under present plans, steel, copper and aluminum will be allotted by Govt. for manufacture of all components. Therefore, it's possible that availability of tubes and other

components, which come under CMP, may be governing factor in production of civilian TV-radios, which don't.

REPAIR SHOPS, TV-RADIO REPLACEMENT PARTS -- To be covered by special CMP regulation designed to "assure repairmen of needed materials without application to NPA." Specific amounts of steel, copper and aluminum will be allotted to keep repair parts for home TV-radio equipment on distributors' shelves (see Trade Report).

MAINTENANCE, REPAIR, OPERATING SUPPLIES -- Current MRO Reg. 4 (Vol. 7:9) will be superseded by new CMP regulation designed to assure that materials are set aside for maintenance supplies for industry and business, including broadcasting.

BROADCASTING, TELECASTING EQUIPMENT -- Manufacturers of this equipment will be required to file application for quarterly requirements of copper, aluminum and steel with NPA. Presently it's planned that new broadcasting and telecasting equipment will come under CMP for allotments of the 3 strategic metals. It's known that -- short of all-out war -- NPA won't stand in way of new station construction, and under CMP may even offer some help.

* * * *

Dates to remember: No CMP orders have been issued yet -- merely the announcement that it will begin July 1. Seven specific CMP regulations, due about May 1, will put plan into operation. By June 1, NPA will require producers of a specific list of items to file their requirements for third quarter. Most manufacturers will be notified directly shortly after May 1; for others, there will be ample public notice as to where they can obtain applications.

We'll follow CMP developments closely, keep you informed of steps you must take -- and results you can expect -- under new production plan.

II—HOW GOVT. EXPECTS CMP TO WORK: CMP controls production through regulation of the 3 basic industrial metals -- steel, copper and aluminum.

It's a method, proven in World War II, designed to let govt. planners know exactly how much of each metal is available, and exactly how much of each is required for the defense program. It aims to put metals in right hands at right time -- to keep military production program running smoothly.

Limited CMP which will begin next quarter will actually dole out metals only to defense and defense-supporting activities; but all manufacturers except those who make consumer durables will be required to file their requirements. In brief, here's how it's supposed to work:

First, DPA's Program & Requirements Committee, directed by Charles Wampler, sits down and figures out just how much steel, copper and aluminum will be available in this country next quarter.

Then demand is figured up -- on basis of requirements filed by military, by producers of military and essential civilian goods.

Next, this total is measured against supply. If high policy makers don't think this leaves enough metal for civilian goods, military and defense-supporting orders may be cut back.

* * * *

When planning is completed, Govt. issues allocations of the 3 metals to all military and defense-supporting users. This "certified check" guarantees users will get the steel, copper and aluminum they require.

What's left -- difference between defense requirements and total supply -- is available for civilian goods on a "free market" (not directly allocated) basis. NPA chief Fleischmann says it should be a "substantial balance."

Present limitation orders will then be changed -- tightened -- to reflect, as accurately as possible, amount of materials left for civilian use, in attempt to divide them equitably among non-defense users. But civilian users aren't assured an exact supply of the metals, as are CMP defense users. They'll still have to scramble for what's left.

Civilian products won't be classified according to essentiality. NPA feels all manufacturers should get even crack at materials not needed for defense. Hence

present bans on use of copper and aluminum in large variety of items (e.g., venetian blinds, door knockers, coffee makers, etc.) will probably be lifted. Ban on purely decorative uses of copper and aluminum, however, will be continued.

CMP will supersede NPA's 25 "special programs" which, helter-skelter, now allocate materials for freight car program, shipbuilding program, electric power industry, etc., as well as countless special directives. Says Fleischmann:

"What we have been doing is exactly what we cannot continue to do for any prolonged period of time; namely, draw checks on the bank without knowing exactly how many checks are out, or even knowing the exact bank balance."

* * * *

CMP will minimize need for centralized defense production planning and supervision, by following normal "chain of command" in industry. Large share of responsibility for getting out necessary production will be left to industry.

Most producers of military products will get material allotments from their customers. Govt. is prime contractor's customer. Subcontractor's customer is a prime contractor or another subcontractor. A producer of tanks, for instance, will be required to allot controlled materials to his subcontractors and schedule production so that all the thousands of parts and components that make up a tank are ready on time and in the right quantities.

As in World War II, products coming under CMP will fall into "A" and "B" categories. Producers of "A" products will get their allocations directly from their customers. "B" producers will receive individual allocations directly from Govt., but can't allocate any of their quotas to subcontractors.

"A" products generally are end-products bought by military and other defense industries. "B" products are civilian-type items and components needed for defense, including industrial machinery and equipment. Most or all electronic equipment will be on "B" list, because it generally uses standard components.

Application forms -- stating amounts of steel, copper, aluminum needed -- will be required of manufacturers of "B" products. Official "B" list will be issued May 1, and producers of military and defense-supporting items not on "B" list can assume they're on "A" list. These are electronic and related products appearing on tentative "B" list:

Radio, radar & TV equipment, except home type (including transmitting); radio tubes; transformers, capacitors, rectifiers, induction & dielectric heating units; telephone & telegraph communication equipment; X-ray & therapeutic apparatus; aircraft, scientific & surveying instruments; motors & generators; switch gear & electrical control apparatus; aircraft & aircraft parts; electrical wiring devices & supplies; electrical indicating & measuring instruments.

Among items on tentative list of civilian products for which it's stated CMP applications won't be required or permitted: Home radio & TV sets; household refrigerators, freezers, air conditioning; household electrical appliances.

CMP will be master-minded by NPA Assistant Administrator Walter C. Skuce, on leave from Owens-Corning, who had similar responsibility in World War II.

CONSERVATION RESEARCH BEARS FRUIT: There hasn't been much fanfare, but for months component makers' laboratories have been buzzing with development of materials-saving conservation and substitution measures no less significant than those of the big TV-radio manufacturers (Vol. 7:6-7).

Most of the results haven't been spectacular in the usual sense of the word. A shortcut here, a substitution there, a small part eliminated, a steel part replacing an aluminum one -- these have been quietly incorporated into production. Now -- possibly in the nick of time -- reports of major developments are beginning to seep from the laboratories. Here are some recent ones:

New type ceramic core for electronic applications has been developed by Henry L. Crowley Co., West Orange, N.J., which supplies Admiral, Philco, Zenith and most other major TV-radio makers. New core, said to be interchangeable with 10-20% nickel oxide ferrite type, contains no nickel at all. Trade-named "Croloy C-4,"

it's said to be especially valuable in horizontal linearity, width control and flyback circuits and other TV applications where ferrite is now being used.

The new cores were experimentally used in standard Philco TV set recently, we were told, and performance was reported as good as or better than ferrite, with no circuit changes. Crowley Co. says Croloy is now "near the production stage."

New permanent magnet "containing only non-critical material" was announced this week by Sylvania's metallurgical laboratories "for applications in radio and TV receivers as well as other commercial and military equipment."

No cobalt, aluminum or nickel -- all ingredients of Alnico V magnets -- are used in new magnetic material, Sylvania says. It's now in "pilot plant production stage," with commercial production scheduled "at an early date."

The new magnets are reported comparable in strength to Alnico III, which isn't widely used in speakers or TV focus units because of lower field strength. Sylvania officials indicate, however, that stronger magnets can be produced.

It's not known whether Sylvania's new process stems from a French formula which has aroused interest in this country from time to time. After investigation, most U.S. magnet makers have termed French developments economically unfeasible.

Hope for expansion of cobalt supply is riding high on basis of work being done by Indiana Steel Products and others toward refining low-grade domestic ore, heretofore largely fruitless. A prime mover in this field told us progress so far "looks promising." Almost all cobalt now comes from Africa.

* * * *

Just about every tube manufacturer has ready an electrostatically-focused picture tube (Vol. 7:1,3,5,9), but none reports any orders by set makers. The 2 biggest TV manufacturers who've announced they'll use the new material-saving tubes -- Philco and RCA (Vol. 7:5-7) -- have postponed changeover dates. RCA says "later this month." Philco says "possibly in May." But most tube and set manufacturers see no industry trend to electrostatics until late summer, at earliest.

The reason: Set manufacturers are now getting enough critical materials to take care of their production requirements, reduced by trade conditions (see Trade Report). In other words, consumer resistance, not material shortages, is limiting factor in production -- for time being, at least.

Mobilization Notes: Nickel shortage crisis will overshadow everything else April 17 when representatives of all phases of electronics industry meet with NPA. But cobalt squeeze—which threatens to become much tighter than it is now—will come up for large share of discussion, too. Situation facing industry was summed up by NPA chief Manly Fleischmann April 11: "Military production will take up to 100% of cobalt . . . and very nearly that much of nickel."

Agenda for the meeting provides revealing hint of seriousness of situation: "(1) The nickel situation—receiving tubes—resulting production level. (2) Requirements for civilian tube replacements. (3) Effects of increases in rated [priority] orders for tubes. (4) Supply of critical materials for speakers—cobalt vs. copper. (5) Current and near future production—TV and radio sets. (6) Summary and conclusions of recommendations."

In discussion of item 4, industry will probably be told that there will be no cobalt available for civilian use by June or July, and that NPA to date has granted no manufacturer permission to use copper-wound electromagnets in place of permanent speaker magnets.

* * * *

Spot check of aluminum industry's compliance with NPA orders, undertaken by Federal Trade Commission (Vol. 7:9), is near completion. Of 300 cases transmitted to NPA Compliance Div., 239 have been reviewed. Of these, Compliance Div. recommended following action: That files be closed and no action taken in 96 cases; warning letters regarding apparent violation be sent in 48 cases; supplemental investigation in 30 cases; files be referred to NPA general counsel for enforcement action in 7 cases; further investigation regarding prohibited items be made in 32 cases; files be further interpreted in 26 cases.

Next spot check will cover some 300 producers of copper and copper-base alloy products. NPA Administrator Manly Fleischmann disclosed Compliance Div. since Jan. 1 has reviewed 409 other complaints of violation of NPA orders, mostly construction order (M-4).

Mobilization Personals: Added to staff of NPA Electronic Products Div., to serve in end-products section headed by J. A. Milling (which includes TV-radio): Lee Golder, ex-General Instrument; Wm. J. Bapst, ex-Marine Corps electronic expediting officer, ex-WPB; Adam Stein, ex-Engineering Research & Development Laboratories, Ft. Belvoir, Va. Other members of end-products section: O. W. McDaniel Sr., E. MacDonald Nyhen, Noble Harris . . . Franz T. Stone, on leave as president of Columbus McKinnon Chain Corp., Tonawanda, N. Y., named NPA Assistant Administrator in charge of industrial & agricultural equipment . . . Gerald R. Gallagher, engineer, formerly consultant to NSRB, appointed Civil Defense Assistant Administrator for Technical Services.

"Handbook of Emergency Defense Activities," which lists key personnel and organizational outlines of mobilization-related govt. bureaus, is available for 25¢ from Govt. Printing Office, Washington 25, D. C.

Financial & Trade Notes: Among officers' and directors' stock transactions reported by SEC for February: Francis H. Uriell bought 15 Admiral, holds 1100; Joseph B. Hall bought 200 Avco, holds 200; James D. Shouse bought 4000 Avco (Jan.), holds 5350; Wm. J. Halligan gave 500 Hallicrafters as gift (Jan.), holds 36,900 in own name; Wm. Balderston gave 30 Philco as gift, holds 7188; David B. Smith bought 2 Philco (Jan.), holds 3273; Stanley P. Lovell bought 200 Raytheon, holds 400; Harry G. Sparks sold 1300 Sparks-Withington, holds 100; John Kuhajek sold 10 Zenith, holds 20.

Westinghouse stock transactions reported by SEC: John H. Ashbaugh bought 434 (Jan.), holds 1508; Walter C. Evans bought 6, holds 1400; John K. Hodnette bought 579 (Jan.), holds 1664; James H. Jewell bought 326, sold 50 (Jan.), holds 788; Andrew H. Phelps bought 434 (Jan.), holds 1445; Gwilym A. Price gave 55 as gift, bought 1085 (Jan.), sold 399 (Feb.), holds 4800.

* * * *

Admiral first quarter sales were $70,321,548, compared to $46,291,409 same 1950 quarter. Earnings before taxes were $8,490,463, and after provision for taxes $2,403,344 ($1.25 per share) vs. net profit of $4,158,449 ($2.16) for same 1950 quarter. Reserve for taxes, president Siragusa noted, was $3.16 per share this year vs. $1.25 last.

Packard-Bell sales for 6 months ending March 31 were $13,839,147, virtually equal to the $13,894,713 for whole of 1950. Six-month report compares with $3,203,531 for same period 1950. Earnings for the 6 months were $902,629 ($1.53 per share on 588,000 shares outstanding). President H. A. Bell figured civilian sales for next 6 months will equal $10,000,000, profits $600,000.

Bendix Aviation's first quarter sales rose to $67,044,705 from $52,379,209 for same 1950 quarter, but earnings dropped to $2,578,457 ($1.21 a share) from $3,798,919 ($1.79) due to higher taxes. Backlog at end of quarter, president M. P. Ferguson reported, exceeded $475,000,000, heavily military, as against $170,000,000 backlog same time last year.

Webster-Chicago sales in 1950 were $19,086,151, highest in its history, compared with $11,089,364 in 1949, $13,768,731 in 1948. Net earnings were $1,212,050, equal to $2.69 a share on 450,000 shares of common stock outstanding vs. $835,824 or $2.89 a share on 289,036 shares in 1949 and $834,550 ($2.89) in 1948. Inventories carried forward to 1951 totaled $3,662,409 and $2,000,000 in govt. contracts are on books, president R. F. Blash reported April 10.

* * * *

Muter Co. and wholly-owned subsidiaries, Rola Co. and Jensen Mfg. Co., had gross sales of $14,389,725 in 1950, compared with $7,907,572 in 1949. Consolidated net income after Federal taxes was $1,034,200, or $1.59 per share on the 651,000 shares outstanding (including 59,200 shares declared as stock dividend in December 1950). This compares with net earnings of $453,264 ($1.53) on the 296,000 shares outstanding as of Dec. 31, 1949 and $389,184 ($1.31) in 1948. During 1950, dividends of 45¢ cash were paid after 100% stock distribution in May, as against 60¢ cash dividends declared each of preceding 2 years. At end of 1950, consolidated working capital was $2,552,973, up $589,692 for year. Proxy notice for April 17 stockholders meeting at Chicago offices discloses Leslie F. Muter, president, holding 110,000 shares; Thomas A. White, president of Jensen, 12,810; A. A. Dailey, v.p., 5390; Karl E. Rollefson, engineering v.p., 3850; Lawrence A. King, president, Rola, 1870. Compensations for 1950 included: Mr. Rollefson, $12,000 plus $35,649 bonus; Mr. White, $15,000 & $20,633; Mr. King, $15,000 & $33,814.

Robert C. Sprague, recently retired president but still chairman of RTMA, whose Sprague Electric Co., North Adams, Mass., showed 1950 earnings nearly triple those of 1949 (Vol. 7:13), reports his company's sales of electronics equipment, mainly capacitors, ran at higher rate first quarter this year than same quarter last year despite estimated 15% reduction in TV production. He predicts 1951 sales will be "substantially greater" than 1950. Company has acquired small plant in Bennington, Vt., to increase by 4½ times its production of ceramic coated wire, particularly for military contracts.

Stewart-Warner reports 1950 production of its Electric Division (radio, TV & electronic products) tripled that of 1949 but was severely handicapped by materials shortages. Division has moved into new plant at 1300 No. Kostner Ave., Chicago, with E. G. Fossum as gen. mgr., Henry Gillig plant mgr. TV-radio are still small part of company operations, which in 1950 had total $80,482,372 sales, $4,584,936 net profit ($3.55 per share) as against $54,609,713 sales, $2,163,106 profit ($1.67) in 1949.

Capehart-Farnsworth was profitable operation in 1950, showed threefold sales increase over 1949, according to IT&T report, which does not separate subsidiary profits and losses. IT&T consolidated net income for year rose to $15,557,339, highest since 1929, comparing with $4,685,877 in 1949. Sales were $216,947,277 vs. $201,005,225.

Canadian Admiral Corp. reports first quarter 1951 sales were $1,836,426, net earnings $135,971 (47¢ a share) vs. $726,190 sales, $36,308 (13¢) earnings for same 1950 period.

WJR, The Goodwill Station Inc. reports first quarter sales were $891,441, profit $165,381 (32¢ per share) vs. $861,710 sales and $152,695 profit (30¢) for same 1950 period.

Trans-Lux Corp., operating 14 theatres and holding various other interests, blames TV in reporting drop in earnings to $50,857 in 1950 from $198,185 in 1949.

———■———

New York distributors got together this week to set up standards against "misleading" and "wild" TV advertising, and to get New York newspapers to use these standards as guides in accepting retail TV sales copy. Plan is somewhat similar to move made by Washington distributors last week, which involved local Better Business Bureau acting as clearance agent for TV "sales" ads, with local newspapers pledged to refuse copy turned down by BBB (Vol. 7:14). Members of New York distributors committee to draw up standards: Gerald O. Kaye, Bruno-New York; Benjamin Gross, Gross Distributors; Martin L. Scher, Motorola-New York; William O'Brien, Crosley Distributing; George Hart, Zenith Radio.

Trade Personals: Joseph H. Gillies, Philco TV-Radio Div. operations v.p., adds duties of chief of newly established Govt. & Industrial Operating Div., Wm. J. Peltz reporting to him as mgr. of operations. Robert F. Herr, v.p., added to president's staff, will direct all govt. and industrial sales-contract negotiations, with James D. McLean reporting to him as gen. sales mgr. and John Booth as gen. mgr. of Tech Rep Div. . . . Ernest Marx, gen. mgr. of DuMont receiver sales div., named head of new govt. contract dept., with H. B. Graham handling govt. negotiations and bids, Zeke Soucek Washington mgr., B.V.K. French Dayton mgr. . . . Patrick J. Brady, chief industrial engineer of Sylvania TV-radio div., named mgr. of company's plant in Williamsport, Pa. . . . Edward K. Foster, gen. mgr. of Bendix Radio Div., elected v.p. and member of company's administrative committee; will continue at Baltimore post.

Telecasting Notes: At least one big AM independent—and there may be one or two others—claims to have exceeded record $4,000,000 gross time sales achieved in 1950 by NBC-TV's New York key WNBT, which we said last week (Vol. 7:13) was probably exceeded in AM only by WLW and the AM network keys . . . Zenith's president Eugene F. McDonald Jr. has presented to Indiana Technical College, Ft. Wayne, company's old custom-built experimental TV transmitter designed for Channel 2; city has been assigned 3 uhf channels (see TV Allocation Report), of which one is earmarked for education, but it's doubted Zenith vhf transmitter will be used for anything other than closed-circuit operation for teaching . . . Gloria Swanson and her daughter will be stars of new variety show to start Sept. 9 on ABC-TV, Sun. 1-2; no sponsors lined up yet . . . Ernest Hemingway has agreed to make his works (some 70 stories and novels) available for TV through MCA, appearing himself via film recordings, his N. Y. attorney Alfred Rice announced this week . . . WBKB, Chicago, April 1 raised base rate from $925 to $1100, one-minute announcements from $160 to $200 . . . Hal Roach's old *Our Gang* 2-reelers shortly to be released to TV as *Hal Roach's Rascals* thru Regal Television Pictures . . . CBS has granted cost-of-living wage increase of 10%, effective April 1, to all employes earning under $10,000 with exception of contract employes . . . NBC has leased Hollywood's 1100-seat El Capitan Theatre for 15 years, will use it to originate TV and radio shows . . . WNBF & WNBF-TV, Binghamton, N. Y., plans own new studio-office building to cost $300,000-$400,000, construction to start June 1.

Debate on separation of FCC and staff, between Chairman Coy and Comr. Jones, during April 9 hearing on McFarland Bill before House Interstate & Foreign Commerce Committee, found former insisting staff would be made "eunuchs" if it weren't permitted to make recommendations to Commission. Jones said: "I personally can do without recommendations from the staff. But I can use all the facts I can get." Coy maintained that divergent views of subordinate staff members were encouraged, not "smothered" by their superiors. Jones suggested that commissioners' personal staffs be enlarged at expense of overall staff, saying: "Commissioners come and go, but the staff stays on, tends to stagnate. When a new commissioner is appointed, I believe that Congress intends that his influence be felt." Jones also asserted that "expertese" of staff is overemphasized in rule-making procedures, that most questions are "fundamentally economic"—including color and clear channels. For example, said Jones, there are "good technical reasons" for moving all TV into uhf, but Commission didn't make move "because of tremendous investment involved. FCC doesn't want to tear up a man's investment." Coy said that Jones' logic would require every commissioner to be a lawyer, something Congress had never intended. Hearing resumes April 24.

Sponsorship of public hearings, such as those of Kefauver Crime Committee, is perfectly all right, in opinion of FCC Chairman Coy, as long as committee involved agrees. He gave opinion in response to question by Rep. McGuire (D-Conn.) during April 9 hearing on McFarland Bill before House Interstate & Foreign Commerce Committee. Coy also warmly advocated televising of any major public hearing.

Only application for new TV station this week was from Desert Television Co. for Channel 13 in Las Vegas, Nev. Applicant is composed of local businessmen, with interlocking ownership with KRAM, Las Vegas. This makes total of 397 applications. [For further details about applicant, principals, etc., see *TV Addenda 12-N*, herewith; for listings of all applications to date, see *TV Factbook No. 12*, with Addenda to date.]

ABC Chairman Edward J. Noble told stockholders meeting April 11 that network is "not for sale," though he has "listened" to several offers. Deal with IT&T (Vol. 7:13) is off, no other negotiations now under way—and Mr. Noble predicted ABC's time sales for TV alone will hit $18-20,000,000 this year, as compared with only $6,500,000 in 1950. "Profits are very satisfactory," he said. "We turned the corner in November 1950, and are now definitely over the hump, with no drag on radio earnings."

TV cameramen have newsreels fuming. Seems Rep. Wood (D-Ga.), chairman of House Un-American Activities Committee, forbade both newsreel and TV cameramen from covering current hearings into Hollywood Communists unless they could function "with no noise, no lights, no space." Newsreels couldn't meet those requirements, but NBC-TV and Telenews cameramen showed up at film actor Sterling Hayden's appearance April 10 with small, noiseless, hand-held, specially designed 16mm. sound film cameras, got full coverage for telecasts later that night. Special processing of film and transmission control overcame underexposure due to ban on floodlights.

Functional music FM operations employing supersonic note to cut out voice announcements are clearly illegal, according to FCC. This week, it wrote 4 stations with such operations (Vol. 7:5, 9), told them as much in a sort of "declaratory order" which gives them a chance to quit before Commission gets tough. FCC hasn't said any more about transitcasting or storecasting, but there's believed to be fair chance it will at least permit transit operations.

April 1 sets-in-use reported since NBC Research's "census" of March 1 (Vol. 7:12): Washington 253,760, up 9760; Fort Worth-Dallas 112,608, up 3608; Memphis 83,018, up 3718; Omaha 73,930, up 7430; Norfolk 65,377, up 5077; Greensboro 63,949, up 6449; Miami 60,000 up 5000; St. Louis 282,000, up 14,000; Kansas City 114,600, up 6600; Johnstown 82,200, up 7100; Utica 40,700, up 2200; Boston 720,000, up 19,000; Baltimore 303,812, up 18,812.

Live football telecasts of one major college game in each region each Saturday next fall under "test conditions"—that's proposal of National Collegiate Athletic Assn. TV committee, announced April 11, subject to almost certain approval by NCAA national committee next week. TV sponsors would determine which game would be televised, and NCAA's TV committee would be clearing house.

Parabolic microphone, 6 ft. in diameter, was used in TV studio for first time during NBC-TV's April 11 *Four Star Revue*. According to engineering v.p. O. B. Hanson, parabolic mike eliminates many drawbacks of overhead mike—threat of appearing in picture, hampered performers' movements, inadequate articulation. It's said to be good for distances up to 35 ft.

Strikebound KFI-TV is operating about 6 hours daily, mainly with film, while performer members of TV Authority remain out—with AFM musicians refusing to cross picket lines but AFRA performers meeting engagements at sister AM station KFI. TVA wants closed shop at KFI-TV under same terms as other local stations.

Copies of Allocation Report

We can still supply full text of FCC's proposed new *VHF-UHF Rules, Standards & Allocations*, printed for our subscribers and including detailed city-by-city allocations (with educational assignments), proposed orders, engineering data with charts, commissioners' separate statements, etc. Our 28-page print of FCC's 60-page mimeographed document is available at $2 per copy, or $1 each in quantities of 25 or more.

RATE DISPUTE IMPELLING 'TV WAVE-RUSH': The great TV stampede will soon be on -- sparked by coming thaw of the long freeze (Vol. 7:12 et seq), flamed by CBS network radio rate cut (Vol. 7:15) and virtual certainty other AM networks will follow suit.

No one who was at NARTB convention this week could mistake surge to TV. It was all-pervading subject -- dominated Coy and Miller speeches, BAB, Research & FM sessions, equipment exhibits, corridor talk.

Attorneys and consulting engineers who flocked to Chicago to see clients left with instructions from most to "start work on our TV applications."

Even General Bradley's big news-making luncheon talk had to be cut short during question-answer period so he could "keep a date with television."

* * * *

AM rate-cutting and its effect on networking and future of radio were predominant topics. Mostly, the broadcasters were angry -- even some who own TV stations -- but generally there seemed to be resigned feeling that high-riding, lush day of radio had passed its zenith.

Even special session of affiliates of all 4 AM networks, which began as anti-network (particularly anti-CBS) indignation meeting, simmered down to sober endorsement of special committee to "study radio rate structure" headed by Paul W. Morency, WTIC, Hartford (NBC), which meets April 24 in New York with networks. [For members of committee, see p. 5.]

More than 750 at "protest meeting" asked networks not to effect any rate changes until committee has had time for study and recommendations -- albeit ABC president Kintner has already indicated his company's course by stating it intends to "meet the competition"; NBC president McConnell has made no bones about conviction AM rates must eventually yield to TV inroads on audience; and MBS president White has said he will wait to see what all the others do.

Bitterness would not have been so great, it was apparent, had CBS cuts been confined to TV markets only -- for all seemed to acknowledge TV's impact on radio listening, even those who don't like to admit it.

Trade press is replete with quotes by embittered broadcasters, Variety headlining "Radio's Fight for Survival," Broadcasting captioning strongly worded editorial with obvious pun "Rate Race," Radio Daily quoting scores of disaffected broadcasters' generally antagonistic comments (one used term "moral cowardice").

* * * *

What roiled most was that sudden move was timed when business is good -- billings at new high in some cases, including CBS's. Indeed, only this week the FCC AM-FM income report for 1950 (Public Notice 62934) revealed revenues of the more than 2100 stations reporting had reached surprising total of $447,700,000, up 7.8% from 1949's $415,200,000 -- the 4 networks and their O&M stations accounting for $109,700,000 of this total (up from $108,100,000 year before) while others' local, spot and other income rose to $338,000,000 (from $307,100,000 in 1949).

Govt. figures tended to refute argument AM is slipping -- but also showed

Copyright 1951 by Radio News Bureau

TV's phenomenal growth to $105,800,000 in 1950 from $34,300,000 in 1949 (Vol. 7:13).

Few would acknowledge good economic reasons for CBS move at this time, though everybody accepts CBS story that Lever, Procter & Gamble, other major sponsors had given rate-cut ultimatums. CBS station relations v.p. Herb Akerberg spent some uncomfortable hours with affiliates at Chicago.

NARTB chairman Justin Miller took cognizance of sponsor rate demands in his speech: "Far more dangerous to radio than competition from TV," said he, "is rate-cutting boycott recently engineered by a combination of national advertisers. Although radio will be the immediate sufferer, it may be only a question of time until similar, monopolistic, conspiratorial coercion will be used to break down TV rates also." He thought anti-trust actions were possible.

What rubbed CBS affiliates mostly was fact all they got was bare telegram telling them of July 1 cuts -- no prior warning or discussion. They griped most bitterly that President Stanton had assured them at recent regional CBS meetings that there would be no cuts; that CBS had been in fore with surveys showing "radio as best buy"; that when NBC sought to cut rates in TV markets only last December (Vol. 6:51, 7:1), they had urged their local NBC brethren to buck such move -- at behest of CBS executives, they said; and that some had stayed out of TV when channels were plentiful -- on advice of CBS.

* * * *

During all-affiliates meeting, one heard such expressions as "survival of radio," "beginning of the end," "dog eat dog," and Chairman Morency asked if high price of talent (referring to CBS raids) wasn't real cause. At BAB meeting, chairman Edgar Kobak, ex-MBS president, remarked:

"Broadcasters are to blame for fact they failed to raise rates in recent years. Rate structure, not rates, is out of date. Buyers think rates should be lower, and sellers have been making deals which indicate they think rates are too high, that they are losing confidence in their product."

Kobak urged complete separation of TV and radio, if under same ownership. "These powerful media are in competition," he said. He quoted letter from ex-CBS executive v.p. Paul Kesten, member of BAB board:

"Let TV fend for itself. While BAB's slugging need not be aimed primarily at TV, it must be considered a fair target. All double-jointed radio-and-TV interests supporting BAB ought to agree to this in advance." Kesten suggested survey "to pit radio and TV against each other in parallel markets and measure the payoff."

* * * *

From Judge Miller's speech, some could take heart when he denied TV can "completely destroy and supplant aural radio." He said: "The walls have not yet crumbled on radio because of the impact of TV -- and never will."

On other hand, there was news -- discounted by some because of its TV interest -- that Detroit News' pioneer WWJ had cut Class A night hourly rate from $800 to $640 an hour, retroactive to April 1. Manager Harry Bannister explained WWJ had raised its rates in recent years, now faced TV cut into audience, felt it must "play square" with advertisers. He said radio would have to find its own level, but for next few years faces rugged going.

Bannister's attitude exemplifies position of big broadcaster who also is big telecaster, recalls 1949 warning by Crosley's James Shouse (Vol. 5:42) and action of WFIL's Roger Clipp in readjusting that Philadelphia station's rates just prior to last year's NAB convention (Vol. 6:16).

TAKE WRAPS OFF TV—NARTB KEYNOTE: Exasperation over long freeze and educational channel reservations (see TV Allocation Report) was obvious among NARTB conventioneers. But also worth noting was this growing attitude: "What the hell -- let's quit fussing around, let's get going, let's build some stations."

Greater optimism about uhf, stemming from excellent technical progress (see page 4 and Vol. 7:15), also contributed to "let's get going" feeling.

Additional pressure was supplied by WHEC's able chief engineer Bernard C. O'Brien, who almost sold FCC on 150-mile vhf co-channel separation and who contrib-

uted greatly to getting FCC 220-mile proposal of 1949 down to 180 miles (Vol. 7:5).

"It is my opinion," he told engineers, "that these 12 vhf channels will eventually accommodate many more stations than are now proposed to be allocated... The range of all existing vhf stations will be in the neighborhood of 50 miles. Doubling the number of vhf assignments will reduce the figure to about 35 miles; 4 times as many...could be accommodated with a probable range of 25 miles or so.

"Most of us who are now operating an AM station on a regional or local frequency would be very happy if we could cover a 25-mile range at night.

"I believe that the first 4 priorities [of the FCC] will be more completely served by a larger number of smaller range stations than by the relatively small number of 50-mile range stations currently proposed."

Also precipitating haste, of course, are the TV-prompted AM rate cuts, which would extend into non-TV areas (see page 1).

Not that applicants won't strive mightily to get more commercial vhf channels into their cities, during hearings beginning June 11 (Vol. 7:15). In fact, FCC Chairman Coy's speech appeared to indicate more than ordinary Commission receptiveness to such efforts.

DuMont will undoubtedly make most comprehensive pitch, improving its plan for 4-network system since FCC has proposed closer vhf channel spacing. To gain support for DuMont's position, v.p. Thomas Goldsmith said his plan will give 4 or more vhf channels to 31 of top 50 cities, compared with 7 in FCC plan. Further, he pointed out, his plan would require channel shifts of only 19 existing stations, compared with 31 proposed by FCC.

Senator Johnson sounds almost like a vhf applicant when discussing allocation plan. He tells us:

"I'm disappointed in the vhf allocation to Colorado, particularly to Denver. Previously, Denver was scheduled to get 5 commercial vhf channels; now it's getting only 3. That's not enough for a city of 500,000. Other states, like Wyoming, seem to have gotten better treatment. I don't think much of this mixing of vhf and uhf, either. The Commission knows what I think; I've told them."

Asked what he thought of moving vhf channels from other Colorado cities to Denver, he said: "I'm not commenting about that."

* * * *

Uhf got lift from several sources. Said Coy in convention speech:

"I feel quite sure that uhf stations in the future will be able to cover almost any metropolitan area and a very large part of the rural areas...To me the strong probability of early assignments in the uhf look a bit more attractive than prolonged and costly litigation [for] the few vhf channels available...I believe that by time uhf transmitters can be put on the air, there will be substantial flow of receivers equipped to receive both uhf and vhf signals ready to go on market."

Ex-Comr. E. K. Jett, now of WMAR-TV, Baltimore, expressed great hopes for uhf future. NBC's Ray Guy emphasized that his apparent bearishness on uhf during hearing (Vol. 6:46) stemmed solely from Bridgeport experience with low power and height, hilly terrain. RCA lab chief C. B. Jolliffe, in talk at Princeton U, said company's experience "has shown that a major expansion is practical and possible in the uhf." And GE this week announced it has uhf converter (see page 6).

* * * *

Educators are about to announce permanent establishment of Joint Committee on Educational Television, with WOI-TV's Richard Hull as administrator and headquarters in Washington. Ford Foundation has granted JCET $90,000, and other foundations may come across soon with similar grants.

Sen. Johnson wouldn't comment on educational reservation, said he had sent Benton Resolution for 90-day allocations freeze, pending Senate study (Vol. 7:15) to McFarland subcommittee "where it will get careful consideration."

Pittsburgh's Mayor David Lawrence, president of U.S. Conference of Mayors, has been urging all mayors to spur educational TV activity in their cities. In Milwaukee, Mayor Frank P. Zeidler announced that he was doing just that.

TRANSMITTER MAKERS OUTDO THEMSELVES: Transmitter outlook appears remarkably good.

Be it vhf or uhf, high power or low, chances are equipment won't lag far behind demand when it's really needed. Prospects are subject to the usual "if" -- if war's impact on economy doesn't get worse.

Demand, as expressed by "dotted line" contingent contracts, has strong bearing on future equipment availability. And seriousness of applicants at this week's NARTB convention (see page 1) gave manufacturers something tangible upon which to base production plans.

Uhf developments are most striking. Within space of a week, GE upped power of its klystron-powered transmitter from 5 to 10 kw (Vol. 7:12,15). Thus, with 20-gain helical antenna, GE is prepared to deliver equipment capable of emitting maximum permissible power -- 200 kw -- by third quarter of next year.

All this, plus monitor, will cost $158,000, say GE salesmen, comparing it with $200,000-plus for same vhf power. Makers of klystron, Varian Associates, say they can build about 50 tubes this year. GE says station should have 4 on hand -- 2 for transmitter, 2 spares -- meaning tubes for dozen stations by year's end. So klystrons shouldn't be bottleneck.

Critics of GE's transmitter point out that klystron alone will cost some $10,000. GE answers that tube is good for 10-40,000 hours, compared with average vhf tube's 7000 or so; that burned-out klystron, which includes tuned circuits, may be "retreaded" at factory for 15% of original cost; that GE may offer life guarantee assuring hourly cost no greater than with standard tubes.

RCA says it will have 1-kw uhf transmitter, selling for about $65,000, ready second half of this year. Outputs of 5-10 kw, employing new tetrode tube, will be available when needed, company says.

DuMont expects to offer 1-kw unit within about 6 months. It's expected to sell for some 20% above vhf unit of same power. DuMont will also have, for first time, its own uhf antenna -- 20-gain slotted radiator.

* * * *

Prospects for high-powered vhf seem excellent. RCA is now in production of 20-kw amplifier to sell for around $85,000. With 5-gain antenna, this gives FCC-permitted maximum of 100 kw on Channels 2-6; with 10-gain, maximum of 200 kw is delivered on Channels 7-13. Scheduled for second half of 1952 is 10-kw transmitter to sell for $80-$85,000.

GE plans to have 35-kw unit for Channels 2-6, 20-kw for Channels 7-13, by second half of this year. Equipment is intended either for basic transmitter or as amplifier for existing 5-kw transmitter. Expected price is $70,000.

DuMont promises 40-kw transmitter in 18-24 months, with price of $115,000.

At opposite end of scale -- low powers permitted in FCC's plan -- RCA has in production 2-kw transmitter to sell for $45-$50,000. Presumably, GE and DuMont also will be able to offer low-powered units of any desired size.

Not least important factor in all these promises is price -- generally well under what might be expected, considering pre-freeze price levels.

No other manufacturers showed transmitting equipment at convention. If they have anything in the works, they're keeping it quiet. Companies showing activity or interest in the field in past are Federal, Raytheon, Westinghouse and Claude Neon's Standard Electronics Corp. (Vol. 6:5,15).

* * * *

NPA hasn't yet formulated policy on materials for transmitters, but it's "studying" question and appears to be sympathetic, since no great tonnages of scarce materials are needed. It's expected transmitters will be covered by NPA's upcoming Controlled Materials Plan (Vol. 7:15).

Towers may be something else, since steel involved is considerable, compared with transmitter needs. Possibility is that NPA may insist that stations explore usefulness of their AM or FM towers (if any) before coming to NPA for help. Of course, any station with AM or FM tower good for TV wouldn't want to spend money on new tower anyway.

NARTB Chicago Convention Notes

NARTB-TV $35,000 general managership won't be filled until June 2 meeting of nominating committee (Vol. 7:13) in Williamsburg, Va., 2 days before full NARTB board meets in Washington. Meanwhile, counsel Thad Brown is acting. Several committeemen want FCC chairman Wayne Coy for job, but he can't give answer yet as to availability—presumably still undecided whether to seek reappointment when term expires June 30. There's some doubt about Coy, due partly to his stand on color, educational reservations, NARBA, "anti-trust" report, McFarland Bill. There's some fear, too, that educational channel promoter Comr. Hennock would get chairmanship if Coy should quit FCC—and she's persona non grata to most telecasters. There's also some insistence that an organization must be set up first; as of April 19, just 58 of the 107 stations had signed, will pay monthly dues starting May 1 of one-time 5-min. or half 15-min. rate, whichever is lower. AM stations and TV applicants may join at $25 monthly.

Affiliates committee formed at NARTB convention to meet with networks, discuss rate cuts, consider whole radio rate structure, meets April 24-25 at BAB headquarters, New York. Headed by Paul W. Morency, WTIC, Hartford, it includes: Kenyon Brown, KWFT, Wichita; Walter Damm, WTMJ, Milwaukee; R. M. Fairbanks, WIBC, Indianapolis; Leonard Kapner, WCAE, Pittsburgh; Edgar Kobak, WTWA, Thomson, Ga.; Clair McCollough, WGAL, Lancaster & WDEL, Wilmington; John Patt, WJR, Detroit; Robert Swezey, WDSU, New Orleans; George Storer, Fort Industry; Ben Strouse, WWDC, Washington; G. Richard Shafto, WIS, Columbia, S. C.; Hugh Terry, KLZ, Denver.

Defense Mobilizer Wilson told broadcasters they would not get priorities for building new TV stations, but must "compete with other essential industries" for materials. He spoke on DuMont closed circuit from Washington at TV luncheon April 19, viewed by more than 500 on 16 DuMont 19-in. sets. His main plea was "hold the line" on inflation, but in answer to question regarding TV set production, he replied that there would be periodic cutbacks during next several years of mobilization program but that there should be "substantial" overall output.

Appeal from FCC's FM functional music crackdown (Vol. 7:15), with NARTB backing, was assured when association passed resolution to back up any fight challenging legality of ruling. Manufacturers remain principal stumbling-block to FM, according to Everett L. Dillard (WASH, Washington), who told convention: "Frankly, we of the FM broadcasting industry are tired and disgusted with stepchild treatment from the manufacturers . . . "

NARTB had 1446 members as of March 1, of which 43 were TV, 70 associates. It took in $847,052 from Jan. 1, 1950 to Feb. 28, 1951 (of which $792,929 was in dues) and spent $871,044—or $23,992 more than income. Heaviest expenses were salaries, $459,793; general and office expenses, $209,583; travel, $105,529.

Full line of studio equipment was shown at NARTB convention this week, for first time, by General Precision Laboratory. Included were studio and field camera chain at $12,250 (less image orthicon), and synchronizing generator and video switcher ($7500) to be used with new $3200 16mm GPL projector.

NARTB convention in 1952 will be held April 26-May 2 at Waldorf-Astoria in New York. Next board meeting is June 4 in Washington, at which time newly chosen president Harold Fellows (Vol. 7:14) takes office.

Program standards for TV—"before somebody does it for us"—is object of 5-man TV committee set up by NARTB at April 19 Chicago meeting. Committee will call conference of telecasters in May or June to appraise "plunging neckline" and excessive commercialism. Plan is to meet before FCC conference (Vol. 7:3-5) takes place. Committee: Robert Swezey, WDSU-TV, chairman; Clair McCollough, WGAL-TV & WDEL-TV; George Storer, Fort Industry; F. M. Russell, NBC; Chris Witting, DuMont.

All Fort Industry stations are in the black, v.p. Lee B. Wailes told telecasters at operating cost session April 19. He said one station (unnamed) had 400% increase in business first 4 months this year compared with same period last year, only 46% increase in costs. He gave following breakdown of expenses in Fort Industry TV stations (WJBK-TV, Detroit; WSPD-TV, Toledo; WAGA-TV, Atlanta): Programming, 40%; engineering, 30%; sales, 15% (ranging from 8 to 18%); administration & general, 15%.

Station Accounts: Adjacencies and spots for Dodgers games on WOR-TV, sponsored by Schaeffer Brewing Co., add up to imposing array of sponsors: *Talk to the Stars* following each game, 15-min. for Mennen Co. and Tidewater Oil; *Happy Felton's Knothole Gang*, Curtis Candy Co.; time signals, Elgin Watch Co.; 20-sec. spots, Life Magazine, Kreml, Bromo-Seltzer, Kools, Spuds, John T. Stanley Co. (shaving cream) . . . New beauty-health show on WJZ-TV, Mon. 2:15-2:30, is *Claire Mann Glamour Show*, sponsored by J. Ossola Co. (Buitoni starch-reduced spaghetti, Torini olive oil & olive mix), thru Carlo Vinti, N. Y. . . . Prize Beer sponsoring Texas travelog films on WOAI-TV, San Antonio, to be made available to other stations . . . City Furniture Co., Chicago, sponsoring *Here Comes the Bride*, actual wedding ceremonies, in its Englewood store, Mon. 9-9:30 p.m. on WGN-TV . . . Add baseball sponsorships: Baltimore Orioles on WMAR-TV, 2 games weekly, first half of each by Gunther Beer, second half by Atlantic Refining . . . Among other advertisers currently reported using or preparing to use TV: Cyma Watch Co., thru Irving Berk Co., N. Y.; Waverley Fabrics, thru Anderson, Davis & Platte, N. Y.; Sick's Seattle Brewing & Malting Co. (Rainier beer), thru Western Agency Inc., Seattle; Olympic Distributors (Nids chlorophyll tablets), thru Vic Knight Adv., Los Angeles; John T. Stanley Co. Inc. (Stanley's Castile shave cream), thru Posner-Zabin Adv., N. Y.; Pure Frozen Lemon Juice Corp. of America (Nilcar), thru Newby & Peron, Chicago; Hawaii Visitors Bureau, thru Holst & Cummings, Honolulu; United Frozen Foods Corp. (Simple Simon pies), thru Davis & Co., Los Angeles; American Chemiatric Corp. (Refresher gum breath deodorant); H. Fox & Co. Inc. (U-Bet syrups), thru Paul Smallen Adv., N. Y. (WABD); Mt. Rainier Bulb Co. (mail order gladiola bulbs), thru National Radio Adv., Seattle (WABD).

Network Accounts: Standard Brands (Chase & Sanborn instant coffee, Tender Leaf tea) will sponsor Mon.-Wed.-Fri. 1:45-2 segments of *Garry Moore Show* on CBS-TV, thru Compton Adv.; Junket Brand Foods will take Thu. 1:30-1:45 portion, thru McCann-Erickson. Starting dates not set . . . Colgate-Palmolive-Peet May 7 starts *Strike It Rich* on CBS-TV, taking Mon.-Wed.-Fri. 11:30 a.m.-noon editions of across-the-board series, thru Wm. Esty Co.; *Steve Allen Show* will move to Mon.-Fri. noon-1 . . . Gillette May 5 will sponsor *Kentucky Derby* film on CBS-TV, Sat. 9:45-10, thru Maxon Inc., N. Y. . . . Arthur Godfrey's morning AM show on CBS, Mon.-Fri. 10-11:30 reported likely simulcast next fall with present sponsors Toni, Reid Murdoch Div., Lever Bros., Pillsbury, National Biscuit Co. & Chesterfield expected to back TV edition also.

Financial & Trade Notes: Motorola reports first quarter operations were "maintained at a relatively high level," sales exceeding $46,000,000 compared with $35,800,000 for same 1950 period. Earnings before taxes, president Paul V. Galvin reported to stockholders April 16, likewise attained new peak for quarter, but final figures aren't ready yet. Mr. Galvin stated home and auto radio sales should maintain satisfactory volume second quarter but that TV volume "tends to reduce in the second quarter . . . downward trend usually continues until the third quarter." Communications business, including microwave, has been stimulated by civilian defense requirements. Notice of stockholders meeting to be held May 7 discloses that, of 897,605 shares outstanding, Mr. Galvin owned 52,769 as of last Feb. 21; Robert Galvin, executive v.p., 64,258; Elmer H. Wavering, v.p., 10,450; George R. McDonald, v.p., 5170; Walter H. Stellner, v.p., 4400; Dannel E. Noble, v.p., 2933; Frank J. O'Brien, v.p., 2907; Matthew J. Hickey, director, 2444. In addition, the Galvins held beneficial interest in 108,906 shares held in trust for estate of Lillian A. Galvin, deceased. President Galvin's 1950 salary was given as $75,000, that of each of the 6 vice presidents approximately $50,000.

Magnavox reports $13,609,000 sales, $640,000 net profit (88¢ per share on 709,374 common shares) for first quarter 1951, compared to $8,901,000 sales, $625,000 profit (89¢ on 676,289 shares) in same 1950 quarter. For 9 months to March 31, sales were $39,398,000, net profit $2,454,000 ($3.40) vs. $22,678,000 sales and $1,400,000 profit ($2.04) for comparable preceding period. Defense contracts on books exceed $20,000,000. Magnavox will redeem 4000 shares of Class A preferred stock next June 1 at $15.75 plus accrued dividends—those called for redemption being selected by lot by Ft. Wayne National Bank. Right to convert into common shares holds until 5 days prior to redemption date. Up to April 12, total of 49,575 Class A shares had been voluntarily converted, leaving 50,425 outstanding.

Stromberg-Carlson will report net income of $243,113 (63¢ per share) on sales of $8,163,951 for first 1951 quarter vs. $63,480 (10¢) on sales of $6,707,796 same 1950 quarter. At stockholders meeting April 25, management will fight effort of Bernard Fein, ex-Ansley, to "try for control" with proxies opposing authorization of 500,000 additional shares of common stock, contending his "Independent Stockholders Committee" aggregates only 560 shares of common stockholdings.

Olympic Radio stockholders meeting has been called for April 23 at company plant, proxy notice disclosing president Adolphe A. Juviler owner of 82,400 common shares (24%) of the 338,263 outstanding, drawing $44,550 salary in 1950; Percy Schoenen, executive v.p., 22,660 shares (6.7%), salary $30,550; Morris Sobin, v.p., 800 shares, salary $28,300. Company's record 1950 sales-earnings were reported last week (Vol. 7:14).

Muter Co. first quarter sales, including subsidiary Jensen and Rola companies, were $4,565,000, net profit $293,033, or 45¢ per share on 651,200 common shares outstanding. This compares with sales of $2,819,000, profit of $219,137 (34¢ on 296,000 shares) for same 1950 quarter.

Aerovox first quarter sales were up 20% over $4,700,000 of first quarter 1950, reports April 17 *Wall Street Journal*, with earnings off "slightly" due to higher taxes and defense orders "picking up fast."

CBS consolidated gross income was $39,323,391, net profit $1,276,054 (74¢ a common share) after $2,225,000 taxes for quarter ended March 31 vs. $30,809,064 sales and $1,304,050 earnings (76¢) after $1,651,700 taxes for same 1950 period.

Trade Personals: Charles H. Atkin, supervisor of industrial relations, Westinghouse plant at Fairmont, W. Va., appointed to same post in company's new Electronic Tube Div., temporarily headquartered at Bloomfield, N. J. . . . **Louis C. Kunz** appointed production mgr. for CR tubes in GE Tube Div., Schenectady . . . . **J. J. Farrell**, engineer in charge of commercial products, appointed asst. mgr. of engineering, GE Commercial Equipment Div., Syracuse; **L. H. Junken**, design engineer, named division engineer of engineering service . . . **E. R. Glauber**, ex-Eastern regional mgr., named gen. mgr. of Admiral-owned distributing branches under v.p. Clarence S. Tay . . . **Edward A. Pecara**, ex-Zenith, appointed sales promotion mgr., Motorola . . . **H. L. Hoffman**, Hoffman Radio has been presented Helms Athletic Foundation Award for "noteworthy contribution to sports" in connection with sponsorship of football telecasts . . . **Bonnel W. Clark**, retired Westinghouse sales v.p., named director, NPA Electrical Equipment Div.

Marvin J. Kelly, executive v.p., elected president of Bell Laboratories April 20, suceeding Dr. Oliver E. Buckley, appointed by President Truman as chairman of new science advisory committee of ODM.

■

GE announced uhf converter (called "translator"), will show it at July Music Merchants' convention in Chicago. Like Crosley's (Vol. 7:15), it's continuous tuning, covering whole uhf band, easily attachable to present vhf sets. In memo to distributors, GE asserts converter is best means of achieving uhf with present sets, that combination vhf-uhf sets aren't now being offered because customer would be "forced to pay premium" for facilities which may not be used for long time. Price and performance weren't disclosed, but GE says that it will be "competitive," probably meaning $50 or so, and that unit worked satisfactorily during several months' tests at Bridgeport.

Stackpole Carbon Co., St. Marys, Pa., has developed ferrite type transformer cores for TV-radio uses which contain neither nickel nor any other material currently on critical list. Known as Stackpole "Ceramag No. 8," this material, like Henry L. Crowley Co.'s "Croloy C-4" (Vol. 7:15), is said to be interchangeable with nickel-containing ferrite cores. Stackpole's Electronic Components Div. says new material has been turned out in production lots and is now ready for commercial production. Sprague Electric Co. last April joined with Philips Industries Inc. to form Ferroxcube Corp. of America (Vol. 6:29) which is now commercially producing ferrite core material developed by Philips Research Labs in Holland and said to have superior characteristics to old-type ferrite and containing no nickel, cobalt or other critical alloying material—also interchangeable with old-type cores.

Color TV seemed to be furthest from NARTB conventioneers minds. Only FCC Chairman Coy seemed worked up about it, saying: "To me it is the most exciting and most effective communications medium ever devised . . . It can become the most profitable medium." He reiterated conviction that Supreme Court would uphold FCC decision, took crack at those who termed color issue "academic" because of impending materials shortages by citing first-quarter 1951 production of 2,200,000 sets. "It is my view," he said, "that so long as TV sets can be made, color in TV need not be denied the American people."

Paramount's interest in Lawrence tri-color tube (Vol. 6:18-36), through Chromatic Television Laboratories, amounts to 50%, president Barney Balaban reveals in annual report. "I can now report," he states, "that Chromatic has produced practical color TV tubes. These tubes also appear to have considerable value for military purposes." Paramount has yet to show off tube.

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
April 21, 1951

OUTPUT RECEDES, CONTROLS BEING FELT: There can be little doubt, now, about shortages -- once present stocks are cleared. The industry was told some cold, hard facts at Tuesday meeting with defense production officials (see p. 10). Nickel and tungsten curtailments mean fewer tubes, and tubes can determine rate of output.

Next quarter, nearly all controls will be tighter, shortages worse -- as natural by-product of gradually accelerating military production, as well as CMP (Vol. 7:15), which will set aside materials for practically all hard goods except consumer durables. It's not known how much will be left for consumer items such as TV-radio, but we've heard dire warnings -- for instance, that of the copper producers, who April 19 told NPA there may be no copper left after CMP allocations.

TV production was down considerably first 2 weeks of this quarter. Trade slowdown is undoubtedly responsible, but even if TV sales were brisk we'd see some slackening of production rate all through this quarter, because manufacturers now must restrict their output to conform with quarterly and monthly quotas set by NPA steel order (Vol. 7:10-11,14).

First week of second quarter (ended April 6) saw TV output drop to 140,964 (5393 private brand) from preceding week's 157,771, while factory inventories rose to 324,859 from 269,448 at end of March (Vol. 7:14).

Second week (ended April 13) TV output fell still further -- to 133,576 units (3864 private brands) and factory inventories rose to 386,307.

Radios held up better, first April week's output totaling 332,463 units, leaving only 133,338 in factory inventories; second week 351,652 output and 156,445 in inventory. Radio breakdown for April 6 week: home radios 179,296, auto 121,959, portable 31,208. For April 13 week: home 158,206, auto 155,374, portable 38,072.

SLIGHT SALES PICKUPS, OUTPUT DOWN: Baseball and the MacArthur homecoming helped sell some more TV sets this week -- but the general outlook remained cloudy as piled-up stocks moved too slowly to offset even reduced production rate (see figures above).

Pickups in business were noted in some major markets, notably along West Coast, with low-end receivers selling quite well. And there were strong forces at work seeking to persuade Federal Reserve Board to relax Regulation W and pressure FCC to greater haste toward ending new-station freeze.

Adding his voice to industry's, mindful of big cuts in factory payrolls throughout electronics field, IUE president James Carey urged FRB to allow TV trade-ins under some sort of blue-book plan (Vol. 7:13), speaking before Pennsylvania CIO convention last week. His union was also active in Washington (see p. 8).

AFL's IBEW reports it is asking FRB to return Regulation W to last year's level (15% down, balance 18 months in lieu of 25% and 15 months), and will urge FCC "to grant TV station licenses in some of the uncontested localities."

FRB hasn't yet taken up industry proposal to permit blue-book values on trade-ins applicable to down payment, but outlook wasn't regarded with too great hope within industry circles because of complex price history of TV's multifarious models. Proposal hasn't been turned down, at least.

There's cold comfort, at moment, in fact that (a) most consumer durables, notably autos, are suffering same sudden recession of buying as TV, their industry leaders also fearful of continued depression; (b) nearly all the business services and commentators seem to be of one accord in predicting upturn after swollen inventories -- soft goods as well as hard -- are disposed of.

The pundits argue that people have jobs, there's plenty of money in circulation, inventory glut is temporary. Said United States News, for example, speaking of business generally:

"Business firms, bothered over heavy stocks, probably will be glad they have

them as the year wears on. Inventory dumping appears to be inadvisable. Trade prospect for the year as a whole points to a record business volume...What's going to happen is that consumer demand will revive in the months ahead. But production of civilian hard goods won't pick up. It will decline. So wholesalers and retailers can expect to find buyers for the goods on hand."

Federal Reserve Board, making public a survey made for it by U of Michigan Research Center, noted no decline in consumer plans to buy TVs, radios, furniture, refrigerators and other appliances -- not even during first half of this year. Outlook was less optimistic for auto purchasing, said statement, which noted:

"To the extent that consumers may have been unduly doubtful concerning the availability of goods and their own financial prospects at the beginning of the year, it is possible that purchases later in the year may be larger than is indicated by buying plans." Surprisingly, survey showed only 3-4% of consumers indicated their buying plans were being affected by Regulation W.

HOW LABOR WOULD MEET LAYOFF PROBLEM: Powerful IUE-CIO's president James Carey and delegates from hard-hit locals (who claim 100,000 in TV-radio industry) have been visiting govt. agencies with rather startling proposal for "industry-labor-govt." program to attack unemployment and reconversion bottlenecks in the industry.

Union says more than 20,000 workers have been laid off thus far, blames "breakdown in mobilization agencies' electronics program, govt. credit regulations and refusal of companies to share any sacrifices required in transition period."

To share these sacrifices, Carey wants TV-radio companies to "pay a special unemployment benefit to those laid off -- this money to come from 1950 profits." He estimates "fund of $12,500,000, or less than 10% of the industry's 1950 profits after taxes, would pay 20,000 workers $40 a week for 15 weeks."

Delegation took this proposal to NPA chief Manly Fleischmann, Munitions Board vice chairman Harry K. Clark and Federal Reserve Board member R. M. Evans.

Rest of union's "reconversion program" is less controversial, much of it coinciding with long-time pleas of TV-radio industry. IUE urges:

(1) Immediate placing of initial military production orders and allocation of materials "to keep the labor force fully intact until military electronics program is fully underway." (2) Relaxation of govt. credit controls. (3) Reconversion of TV-radio plants immediately to handle military production. (4) "Intensive training in military electronics field" for TV-radio industry's labor force.

In speech to Pennsylvania CIO convention last week, Carey demanded that Federal Reserve Board "review this discriminatory Regulation W and at the very least permit people who want to trade in old TV and radio sets to have the same rights as those who trade in autos -- to apply the trade-ins against the down payment."

CAUSES & EFFECTS OF TV-RADIO SLUMP: Why the present confused situation in TV-radio? Answer is simply: uncertainties resulting from rearmament program and inescapable controls which accompany any mobilization effort.

Diagnostician is RTMA chairman Robert C. Sprague, speaking April 20 before Chicago meeting of Armed Forces Communications Assn. His words bear repeating:

"No doubt many persons outside the industry may question [my diagnosis] in the light of the high production of radio and TV receivers during the first quarter of this year. Frankly, it has surprised many of us in the industry. [But] an explanation is not hard to find.

"With the outbreak of the Korean war, manufacturers began preparing themselves for widely-predicted shortages to come. They knew that military contracts would not be immediately forthcoming to fill the gap caused by these shortages. They bought all the components they could find and afford, and even with the high production of last fall and winter were able to put some of these components into inventory. Parts and tube manufacturers also increased production in response to heavy orders from set producers, and in anticipation of material shortages. These actions were perfectly natural and to be expected of alert business men.

"In addition, both set and parts manufacturers speeded up their efforts to

reduce the use of critical materials. They found that through redesign of equipment and components they could conserve hard-to-get materials and substitute less critical materials without in any way impairing efficiency or performance. Our industry has a reputation for ingenuity. When the stimulus of necessity is added to the incentive of cost saving, that ingenuity can achieve spectacular results.

"The post-Christmas season is normally a slack one. This year, however, the circumstances cited induced everyone to produce beyond the immediate market needs in anticipation of increased shortages. Meanwhile, production costs have risen, credit restrictions have been tightened, and the 10% excise tax on TV sets was beginning to be felt. Consequently, the accumulation of heavy inventories...

"In our industry, the feast-or-famine pattern seems to be traditional. There is seldom a period that might be called normal -- that is, when supply and demand are in perfect balance. Last fall TV sets were short and on allocation to dealers; during the first quarter of this year there was an over-supply, and by mid-year or early fall they will probably be in short supply again."

Topics & Trends of TV Trade: Western Union's venture into TV servicing field, in cooperation with DuMont, is frankly starting out May 1 as trial run of what may turn into nation-wide service for any make of receiver. At outset, newly formed subsidiary Western Union Services Inc. will simply install and service DuMont receivers in Essex, Passaic and Union counties, in New Jersey, getting usual $65-$85 installation-plus-annual service fee or else a "per call" fee. and paying dealers 10% on service contracts they sell.

Expansion of idea, which grew out of conversations between Dr. DuMont and Walter P. Marshall, WU president, depends on how public takes to it; also on availability of manpower. WU's first maintenance center is located at 1 Evergreen Place, E. Orange, N. J.

President of subsidiary is WU v.p. Thomas F. McMains, with WU plant-engineering v.p. S. M. Barr vice president and director. Mr. McMains foresees "millions of new TV homes" and growing need for "efficient and reliable receiver servicing" as TV expands westward, and stated the 100-year-old telegraph company is in good position to provide such servicing by reason of its experience with wide range of ultra-modern electronic devices.

* * * *

In effort to liquidate inventory, Admiral is putting big promotion breaking April 22, behind unusual premium deal whereby dealers can give away, with each purchase of an Admiral console, one of its 3-speed phono-radio table units listing at $90. Sales v.p. Wallace C. Johnson, in letter to 25,000 dealers, outlined plan whereby with each Model 27K15, 27K16 or 27K17, retailing in $350 range (Vol. 7:1), distributor will sell him the $90 radio-phono for $14.95, or about one-fourth the wholesale price. For every higher-priced TV console the dealer orders, beginning with Model 27K25, which retails at $369.95, dealer gets the radio-phono unit free.

Retailers may also buy one radio-phono unit at $29.95 each for every Admiral console in inventory purchased on or before March 3. Deals will be made "only as long as it takes to clear out existing TV stock now held by Admiral distributors." They don't apply to Admiral's plastic console Model 27K12, recently reduced from $280 to $250 (Vol. 7:11).

* * * *

Exemption from excise tax of TV-radio and other communications equipment sold to U. S. or "any allied govt." is object of H.R. 3603, introduced April 9 by Rep. Kean (R-N. J.), referred to House Ways & Means Committee. Exemption would apply also to parts used in equipment made for Govt.

Trade Miscellany: Admiral this week celebrated jubilee, with production of its 2,000,000th TV receiver . . . Muntz states it's now making 12,500 sets a month, reports its 50 retail outlets have doubled sales since 17-in. leatherette table model recently was cut to $149.95 . . . Sylvania receiver plant in Buffalo has cut TV output about 25%, cut force from 3200 to about 2600 . . . Trad Television Corp., producing mainly private label sets, announces 17-in. consolette at $219.95, 20-in. at $279.95 . . . RMA of Canada delegates, at last week's joint meeting with RTMA, predicted 55,000 TVs will be sold in that country this year, as against about 35,000 last year (Vol. 7:15) . . . DuMont has appointed Companhia Auto-Lux Importadora as distributor for Rio de Janiero & Sao Paulo, Brazil, as result of receiver sales mgr. Ernest Marx's recent visits there . . . Philco, hedging for its distributors against curtailed TV-radio demand, has added to its accessory line a 7-piece stainless steel kitchen tool retailing at $12.95; it includes potato creamer, masher, dipper, ladle, utility spoon, spatula, fork, is made by Ace Products Co., Chalfont, Pa. . . . GE reports new TV warranty policy guarantees replacement tubes 6 months from date of purchase, superseding old deal guaranteeing them 6 months from shipment from factory . . . Stromberg-Carlson this week laid off 200 workers due to TV curtailments . . . GE shipping 1500 chassis, 400 complete TV sets to Brazil, making 4700 for which it has received import licenses thus far.

Plant Expansions: Westinghouse's new Electronic Tube Div. (Vol. 6:51) will occupy 3 plants, first to be $4,000,000 one-story structure covering 3 acres near Bath, N. Y., employing 2000 on military production; second plant is now being built at Horseheads, N. Y., near Elmira (Vol. 7:10); site for third hasn't yet been chosen. . . . Westinghouse, for new Air-Arm Div. under v.p. Walter Evans, who also heads Electronics & X-Ray Div., has purchased 75 acres adjoining Baltimore Friendship Airport for new 400,000 sq. ft. plant to be completed by autumn and to employ 2500-3000 by end of 1952.

RCA has added new TV console (Model 7T125) to its 1951 line, making total 15 models (Vol. 6:51). It's 17-in. Provincial in mahogany, walnut or maple, with 2 full doors, lists at $425, delivery in mid-May. Other Provincial in line is 9T128, a 19-in. 4-door console at $495.

Hoffman Radio's expanded line of TVs, announced this week, includes 14-in. mahogany table (Model 639) $199.95, oak $209.95; 17-in. mahogany table (637) at $309.95, oak $319.95. These have been tested on Pacific Coast, will now be released for Eastern distribution.

RTMA annual meeting has been scheduled for June 8-9 in Stevens Hotel, Chicago.

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Mobilization Report
April 21, 1951

NICKEL PINCH, FEWER TUBES INEVITABLE: NPA laid facts on the line this week -- told electronics executives there won't be enough nickel available this year to prevent dislocations in receiving tube industry.

For TV-radio manufacturers and "assemblers," NPA held out the hope that inequities in steel order M-47 (Vol. 7:10-11,14) may soon be corrected. Speaker makers were told that while cobalt outlook won't be any better, it probably won't be any worse during May and June.

But nickel crisis, affecting every segment of electronics industry, was predominant theme of NPA's April 17 meeting with its Component, End Equipment and Receiving Tube industry advisory committees (for those attending, see p. 11).

Tube manufacturers presented scale of minimum nickel requirements -- May 250,000 lb., June 225,000, July 200,000 -- and warned cuts below these figures would jeopardize industry, weaken its capacity to produce for defense orders.

Govt. production officials shook their heads, said tube industry can expect far less than 200,000 lb. a month beginning in May. April's allotment actually was less than 170,000 lb. Only way tube industry can get more nickel, NPA men made clear, is to take it away from the military, an unlikely prospect.

Lead time -- period it takes to process and fabricate nickel alloys -- is 3-5 months. Tube makers will thus feel April's shortage in August and September. Tube industry is already feeling cumulative effect of months of "little shortages."

* * * *

One big factor behind NPA's reluctance to shake loose relatively small amount of additional nickel for tube industry, it was learned, is ramifications such a move would have among hundreds of other nickel-using industries. Although tube industry doesn't use much more than 1% of U.S. nickel, many other industries could also make strong case of their essentiality as basis of plea for more nickel.

An NPA metals expert put it into words of one syllable for us: "For the sake of argument, let's say there are 100 industries, each of which normally uses 1% of America's nickel supply. Comes the rearmament program and we chop a big hunk out of that supply for new military uses -- jet planes, for instance. We chop out another hunk for the stockpile, and you can see everybody's got to take a cut, and there can't be any exceptions."

Oft-heard warning that tungsten -- only known tube filament material -- may soon be worse shortage problem than nickel, was repeated by NPA officials. They said real pinch in tungsten supply may be felt by July.

Tube industry was urged to assure that adequate supply of new tubes flows into replacement channels, lest NPA take situation into its own hands through new restrictive regulations.

* * * *

Cobalt will be available to TV-radio industry during May and June at about same rate as April -- 29-30,000 lb. for all uses, or about 25% of normal requirements (Vol. 7:13) -- NPA officials said. They praised industry's conservation efforts, asked for still more.

Question of electromagnetic speakers was brought up by set makers, who have learned the hard way that tales of cobalt conservation don't cut much ice in convincing NPA's Copper Div. to provide extra copper to replace cobalt.

Set manufacturers who have conserved substantial amounts of copper, NPA spokesmen suggested, might "lend" part of their base periods to their speaker suppliers for use in obtaining copper wire for electromagnetic speakers. But it was emphasized that set makers must save considerably more copper than they ask NPA to approve for their speaker makers under any such arrangement.

There's good chance 2 most objectionable features of steel order M-47 will

be swept away, Asst. Administrator Horace McCoy indicated at NPA-industry meeting.

Some manufacturers protested section of order which limits second quarter output of so-called "assemblers" to 80% of sets they produced during average quarter of first-half 1950 (Vol. 7:11). They said it discriminates against some set makers and discourages conservation efforts, and asked that "assemblers" be limited on basis of use of steel as are "manufacturers". McCoy said request would be given favorable consideration.

Second objection was to "strait-jacket amendment" to M-47 (Vol. 7:14), which in effect freezes manufacturers' "mix" of production as between radios, TVs, radio-phonos, TV combinations and phonos. Industry pointed out intent of amendment was to prevent manufacturers from skimping on output of lower-priced lines and concentrating on high-end items -- but its effect is just the opposite.

In light of present trade conditions, they said, set makers want to produce more low-end items, but steel order forces them to turn out higher-priced combinations in same proportions as first-half 1950. Set makers asked permission to divert some of steel earmarked for TV-phonos to TV-only sets, some of steel reserved for radio-phonos to more saleable smaller radios.

Steel order now divides TV-radio products into 5 groups. Steel quotas (80% of use during average first-half 1950 quarter) can't be shifted from one group to another. Groups are: (1) radios, (2) radio-phonos, (3) TV-only, (4) TV-radios, TV-phonos, TV-radio-phonos, (5) phonos, record players. Industry wants groups 1 & 2 combined, groups 3 & 4 combined. This can probably be arranged, McCoy said, but he warned NPA will be watching for "abuses".

Industry's collective estimate of 1951 production, offered in response to NPA query: 5-6 million TVs, 10-15 million radios.

Mobilization Notes: Seven certificates of necessity for rapid tax write-off of $9,688,168 worth of new plant facilities for electronic and related production were granted by DPA between March 7 and April 6. They represented only small portion of the 396 certificates issued for $1,310,799,399. Of the 7, Sylvania got 3 totaling $7,942,353.

Certificates granted Sylvania: For production of subminiature tubes, at Burlington, Ia., $4,252,322 at 75% amortization; tungsten & molybdenum fabrication, Towanda, Pa., $2,899,335 at 80%; electron tubes, Warren, Pa., $790,695 at 80%.

Certificates granted other electronic firms: **Bendix**, aircraft communications & radio equipment, Towson, Md., $1,008,474 at 75%; **Titeflex Inc.**, radio & ignition components, Newark, $289,065 at 80%; **Litton Industries**, magnetron tubes, San Carlos, Cal., $248,277 at 85%; **Good-All Electric Mfg. Co.**, metal-clad condensers, Ogallala, Neb., $200,000 at 75%.

Of 258 certificates granted by NSRB from Oct. 30, 1950, to Jan. 25, only 7 were for electronics manufacture (Vol. 7:10), and 3 more for electronics appeared on previous DPA list of 228 granted Jan. 25-March 7 (Vol. 7:11).

* * * *

New procurement policies "to provide maximum aid for small business" were announced this week by Defense Dept. They include: (1) Assignment of small business specialists to all armed service procurement offices. (2) Division of negotiated procurements into small lots to allow multiple contract awards. (3) Program to encourage subcontracting. (4) Payments of "price differential in negotiated procurements to accomplish the objectives of broadening the industrial base of suppliers." NPA is also planning "special treatment" for small business.

Army announced plans to open 34 more sample display and procurement information centers as aid to small business. Of these, Signal Corps will get one new center—at 2800 So. 20th St., Philadelphia—in addition to the present one at Ft. Monmouth, N. J. Air Force, citing "favorable reception" of last February's subcontractor clinic in New York (Vol. 7:7-8), is scheduling similar displays by prime contractors in 5 other cities, beginning in Chicago April 30, and later in Boston, Detroit, Los Angeles and Fort Worth.

Munitions Board, in announcing January total of military contracts reached $3,984,000,000, revealed that small business received 73% of contracts, but only 17% of dollar value. During January, contracts negotiated directly (rather than awarded by bid) soared to 84% of total value, with small business receiving 13-14%.

* * * *

Members of 3 industry advisory committees who met with NPA officials April 17: **End Equipment Committee**—R. A. Graver, Admiral; C. W. Thompson, Arvin; J. W. Craig, Crosley; H. C. Roemer, Federal Telephone & Radio; W. J. Halligan, Hallicrafters; Dr. W. R. G. Baker, GE; A. A. Juviler, Olympic; Franklin Lamb, Tele King; J. B. Elliott, RCA; Ray C. Ellis, Raytheon; R. Alexander, Wells-Gardner; Fred Lack, Western Electric. **Receiving Tube Committee**—J. M. Lang, GE; J. Q. Adams, Hytron; W. J. Peltz, Philco; K. C. Meinken, National Union; Carl Hollatz, RCA; N. B. Krim, Raytheon; R. E. Carlson, Tung-Sol; R. F. Marlin, Sylvania. **Components Committee**—W. E. Wilson, Acme Electric; George Bliley, Bliley Electric; A. D. Plamondon, Indiana Steel Products; H. A. Ehle, International Resistance; A. P. Hirsh, Micamold; L. F. Muter, Muter Co.; W. R. Reisner, Reisner Mfg.; Sarkes Tarzian, Sarkes Tarzian Inc.; R. C. Sprague, Sprague Electric; J. J. Kahn, Standard Transformer; Max Balcom, Sylvania; C. E. Williams, DuMont; R. F. Sparrow, Mallory.

Canada will put nickel under complete allocation beginning May 1. Canadian, U. S. and British defense production will get top priority, but Canadian civilian industries aren't expected to be cut off completely from supplies of the strategic metal. Similar orders placing copper, aluminum, lead and zinc under controls are expected soon from Canada's Defense Production Department.

Telecasting Notes: Emilio Azcarraga's XEW-TV, Mexico City's second outlet, has been televising baseball twice weekly since March 22, one night and one day game, as sort of test schedule on Channel 2, plans to increase time on air gradually to reach 5 hours daily by Sept. 18, date of inauguration of new Televicentro, which Mr. Azcarraga says will contain finest studios on the continent . . . With application of *Providence Journal* to purchase WCFI, Pawtucket, Attorney General J. Howard McGrath, agent for Pawtucket firm and executor for estate of one of owners, severs identity with radio; 2 other members of President Truman's cabinet have TV-radio interests—Secretary of Commerce Sawyer, owning AM stations in Dayton & Springfield, O., and Secretary of Navy Matthews, who controls WOW & WOW-TV, Omaha . . . ABC has purchased 4-story and penthouse showroom building at Broadway & 70th St., New York, for $416,500, acquiring 50,000 sq ft. more space for TV operations, centered mainly in old New York Riding Academy at 6 W. 66th St. thru to 67th St. . . . CBS office workers (publicity and news writers, secretaries, clerks) voted 308-290 this week against joining CIO American Newspaper Guild . . . Philco reports AT&T now installing its 6000-7000 mc microwave equipment to link Cincinnati-Dayton, service to start May 14; similar short-haul links were supplied recently for linking Binghamton into Schenectady-Utica and Richmond-Norfolk . . . Program Advisory Board of 12 industry, education, religious leaders formed by WAAM, Baltimore, to counsel station on public interest services . . . Crosley TV stations (WLWT, WLWC, WLWD) have appointed MCA as agent for syndication of their programs having national potential . . . WDTV, Pittsburgh, has raised base hour rate from $600 to $800, one-min. from $100 to $125 . . . First strike ever against a TV station (Vol. 7:15) ended this week after 3-week walkout (during which strikers argued their case over station) when Los Angeles' KFI-TV management agreed to discuss terms with TVA.

Personal Notes: Harry M. Bitner, onetime publisher of *Pittsburgh Post-Gazette*, now holding large interests in radio stations in Indianapolis, Evansville, Grand Rapids and Flint—his son Harry Jr. managing WFBM & WFBM-TV, Indianapolis—named one of National Production Authority's consultants on printing and publishing; others are Wm. G. Chandler, Scripps-Howard; Buel W. Hudson, *Woonsocket* (R. I.) *Call;* Matthew G. Sullivan, Gannett Newspapers . . . Kingley F. Horton, CBS-TV asst. sales mgr. in New York, appointed CBS radio & TV sales mgr. for West Coast . . . Robert Hibbard acting operations director of WGN-TV, Chicago, succeeding Vernon R. Brooks. . . . Norman Gladney, TV v.p. of Franklin & Gladney Inc., resigns to join Bulova Watch Co.; firm will continue present corporate name . . . Max Tendrich succeeds Lester J. Mallets as TV-radio director of Weiss & Geller, N. Y.

Georgia interests, backed by Clement A. Evans & Co., investment bankers, retaining two-thirds ownership, applied this week to FCC for authority to take over Channel 8 operation from WSB-TV, Atlanta, while that station retains Channel 2 on which it has been experimenting since *Journal-Constitution* merger (Vol. 6:12-13, 20). Applicant company is Broadcasting Inc., proposing to pay $525,000 for plant, headed by Walter T. Sturdivant, knitting mills executive. [For details, see *TV Addenda 12-O.*]

Unusual letter received by FCC from attorneys Rivet & Blum, New Orleans, said their client, one Frank W. Bennett, wanted to be on record in event early applications received any priority. They said Bennett plans to apply for TV in Lake Charles, Lafayette, New Iberia, Jeanerette, Morgan City, Baton Rouge, Huoma, Thibodaux, all Louisiana.

TREMENDOUS TV coverage of Gen. MacArthur's return and speeches, seen live or filmed by estimated 30-40,000,000 (probably biggest audience yet), will undoubtedly spark off new series of evaluations of "TV's impact on the democratic process," educational TV, etc.

Well worth noting is that commercial sponsorships of such events, encouraged recently by FCC Chairman Coy (Vol. 7:15), tend to insure quality and quantity of public-event coverage efforts in future.

Probably most spectacular station effort was that of Hoffman Radio, over KNBH, Los Angeles. Films of speech before Congress were flown West by famed speed flyer Paul Mantz, televised 7 p.m. same day. Station kept audience informed of his positions en route.

Networks, heavily sponsored, went all-out in equipment and personnel, with following lineup:

ABC-TV—*Life Magazine*, two 45-min. segments before and after Thu. 12:30 speech before Congress, thru Young & Rubicam.

CBS-TV—Longines Wittnauer Watch Co., speech plus New York parade and reception, thru Lennen & Mitchell.

DuMont—*Newsweek Magazine*, 30-min filmed excerpts of speech Thu. 10-10:30, thru Lennen & Mitchell; United Airlines, 45-min. of New York arrival, thru N. W. Ayer & Son; *Collier's Magazine*, New York parade 11:45-1:30, thru Kudner Agency.

NBC-TV—Motorola, segments before and after speech, thru Ruthrauff & Ryan; American Oil Co., New York ceremonies 11:30-1:30, thru Joseph Katz, Baltimore.

New York independent WPIX rushed American Express Co. commercial on air before speech just 25 minutes after receipt of order from sponsor which also bought New York ceremonies; agency was Benton & Bowles.

———■———

Justice Dept. and networks are studying National Collegiate Athletic Assn. TV comittee's college football plan (Vol. 7:15), formally approved by full committee in Washington April 18. Plan provides: (1) One game to be televised in each area each Saturday. (2) "Blackouts" to be imposed in each area on at least one Saturday, to study effects on game attendance. (3) No team to be seen more than twice, once when it plays at home and once away. NBC, CBS and DuMont officials conferred with NCAA officials April 19, and seemed "interested," NCAA TV chairman Tom Hamilton said. ABC, although invited, passed up conference. Committee discussed plan with Justice Dept., but Govt. indicated it will thoroughly study matter before giving opinion on anti-trust aspects.

Formation of FCC Broadcast Bureau is held up, what with some commissioners desiring more time for study and with clear majority approval of Harry Plotkin as chief still lacking. Plotkin appears to have solid backing of Chairman Coy, Comr. Walker, probably Comr. Hyde, with others on the fence or definitely opposed. If Plotkin appointment fails, it's rumored chief engineer Curtis Plummer is shoo-in with 6 votes—if he wants the $11,200 job, and he may not since salary is same as he now gets. Another strong contender is Parker D. Hancock, who heads Office of Formal Hearing Assistants.

Phonevision demonstration was given for 5 FCC commissioners at NARTB convention April 17, for broadcasters April 18-19 at special Blackstone Hotel showing. Viewers were addressed by Millard (Tex) Faught, Zenith publicity consultant, whose main point was that Phonevision was a means for broadcasters to garner additional income, particularly in early stages of establishing TV. Final results of 90-day test (Vol. 7:14) are now undergoing checkup by U of Chicago National Opinion Research Center. Zenith intends to do nothing until that's completed in a few weeks.

Feast and Famine in Tube Industry, *page 7.*
Defense Orders Aren't the Answer, *page 10.*

END OF FREEZE STILL LONG WAY OFF: Caution -- once again: This freeze can't be thawed, in true sense of the word, for many months. We can't reiterate too often that there is almost no chance of any meaningful number of stations on air before late 1952.

Let's be realistic about it, even assuming an optimistic view of probable snail-pace steps we know must be taken:

(1) City-by-city hearing on new allocation plan (Vol. 7:12), starts June 11 -- unless something comes up to delay that. Bitter struggle for channels, now deemed to be worth millions, will run estimated 2 months. That means mid-August.

(2) FCC mulls decision month or so, issues it, say, by end of September.

(3) Applicants are given 2-3 months to file, amend. Thus, end of 1951.

(4) FCC starts granting CPs -- January at earliest, but only in those cities with more channels than applicants -- and there will be mighty few of these. Handful of eager beavers, with equipment bought on hope and speculation and already delivered, might start telecasting by spring or early summer. But majority of even these "easy" grants won't get going until late summer or fall. Conceivably, a few stations in Hawaii, other Territories, could get going before then if hoped-for "partial" unfreezing materializes (Vol. 7:12).

(5) Really significant cities, hotly contested, must have competitive hearings -- to take place during spring or summer of 1952 at earliest. Decisions on these might come in late summer or fall. But some of these could wind up in courts for indefinite period, if losers decide to appeal.

(6) Winners of hearings could get on air during late 1952 or early 1953 -- assuming transmitting equipment is available, likely unless defense needs increase.

Freeze won't really be over until last step has been completed.

Of course, FCC says it's trying for partial freeze-lifting on uhf without going through city-by-city hearing. Even if that does happen, only a tiny number of uhf stations could get on air this year -- all of rather low power.

Equipment deliveries are bottleneck in uhf. Some 1-kw units could be delivered this year (Vol. 7:16), but GE is only manufacturer quoting dates on 5-10 kw transmitters -- and it says "third quarter 1952."

* * * *

We say above estimate is optimistic, because we see nothing on horizon to speed things up by more than couple months at best. And there are plenty of other contingencies that might drag things out longer than foregoing timetable:

(1) Congressional intervention. Plenty of this can be expected, since so many states and communities fare badly under allocation plan. Even Senator Johnson isn't very happy about way Denver comes out (Vol. 7:16).

Senator Benton's resolution calling for 90-day freeze while the Senate "studies" educational channel reservations (Vol. 7:15-16) doesn't sound like much on surface, assuming such "study" could run concurrently with FCC deliberations. But situation is fraught with delay.

Only NARTB-TV has seemed to appreciate delay factor in Sen. Benton's pro-

Copyright 1951 by Radio News Bureau

posal, and has told Sen. Johnson's Interstate & Foreign Commerce Committee how it feels. Everyone else seems complacent; committee has received no other comments.

(2) Court delays. Many lawyers, including Communications Bar Assn., say flatly that portions of FCC plan violate Communications Act -- particularly the predetermined geographical allocations and the educational reservations.

A company opposing the plan as a whole -- DuMont, for example, has already noted that plan permits only 2 networks on vhf basis -- or disgruntled applicants might figure they have nothing to lose by appealing to the courts. This could quite conceivably tie up entire allocation in litigation for some time.

Delaying action in courts or hearings might not make for popularity in an impatient industry, but the aggrieved may think their chances of getting a channel would be bettered by appeal to courts.

There are other potential delays, undoubtedly, some as yet unforeseen. The color issue, chief reason for protraction of freeze to full 32 months, may flare anew after Supreme Court decision -- and tie up FCC's time (and passions). And mobilization picture could change overnight, throwing every estimate out the window.

'FREEZE' MAIL FLOODING THE FCC: Stream of letters to FCC, constant throughout freeze, has approached flood stage since release of allocation plan March 22 (Vol. 7:12). Hundreds are on file in the docket, addressed to chairman or Commission as a whole. Individual commissioners are getting hundreds more.

Members of Congress, college presidents, station managers, individuals -- every type of interest is represented, with questions or comments on all aspects of the freeze. File is open, so we spent few hours studying it -- and found:

"When will we get TV?" is question most frequently asked. Frequently forwarded by members of Congress, letters come from every nook of the country -- e.g., Butte, Mont.; Woonsocket, R.I.; Yoakum, Tex.; Ashland, Mass.; Decatur and Evansville, Ind.; Yankton, S.C.; Falls City, Neb. -- in addition to those from such obvious big-city "outs" as Denver, Portland, Tampa, St. Petersburg.

A few AM stations have written in. KGAF, Gainesville, Tex., sees "nothing wrong" in uhf Channel 49 allocated there, hopes freeze ends soon, stands ready to apply. WOPI, Bristol, Tenn., is happy with allocation, is prepared to file, plans microwave to Greensboro. WNLC, New London, Conn., is delighted; city gets Channel 3, only vhf in state besides Channel 8 assigned to WNHC-TV, New Haven.

KUGN, Eugene, Ore., complains of being "left out." Channel 9, only vhf allocated, is earmarked educational. KVFD, Ft. Dodge, Ia., objects to uhf-only there. Montana-Washington-Oregon broadcaster Ed Craney, through Sen. Warren G. Magnuson (D-Wash.), objects strenuously to educational reservation.

WGAN, Portland, Me., wrote FCC chief engineer Curt Plummer, native of Maine, saying it found how to add vhf channel to Bangor, Me. Plummer replied that plan looked good, didn't violate minimum spacing.

Sen. Johnson's concern about Denver (Vol. 7:16) was expressed in April 2 letter which wondered whether vhf channels from nearby cities might be transferred to Denver if not used within 2 years. Coy replied that such shifts are implicit in allocation, if channels "remain unclaimed for a protracted period." This "protracted period," he said, is likely to vary from case to case.

Correspondents from non-TV areas seem impatient enough, but letters from single-station areas -- Kansas City, Pittsburgh, St. Louis, etc. -- appear downright purple-faced with exasperation.

Queries about "booster" or "satellite" stations are rather frequent, as people hunt for means of pulling in signals just over the horizon. FCC answers that such stations would defeat purposes of allocation plan if they used vhf-uhf channels, that no other frequencies are available.

Educators generally commend channel reservations, occasionally complaining that their towns were given uhf instead of vhf. Only exceptions we've seen were from Clarence Decker, president of U of Kansas City, and Roscoe Shores, acting supt. of Kansas City schools. They say uhf will do, since they don't expect to get into

TV for a long time; moreover, cooperation of local stations has been excellent.

Comr. Webster is worked up about flood of pro-educational letters he's getting. Seymour Siegel (WNYC, New York), president, National Assn. of Educational Broadcasters, has been urging educators to write Commission. Webster, who opposed educational reservations, has asked Siegel for copy of letter, saying:

"While I am of the firm opinion that citizens have the right to express their views to the heads of govt. agencies, there is a proper time, place and means for such expressions..." Such "pressure," he said, "is of questionable propriety."

Some educators say they have definite plans to build. Among these are U of Kansas, U of North Carolina, Miami U (Ohio). Last says it will need "very minimum of 2 years" to get proper approval. U of Chattanooga wants to get going, but fears great costs. However, it says, arrangements can be worked out with WDOD, "using certain facilities in common." Educational channel in Chattanooga is uhf.

FCC doesn't reveal much in its replies, usually sends copy of its "Third Report" with brief summary of freeze history and status. Chairman Coy generally handles Congressional queries. In a couple letters, Coy and Comr. Jones indicate hope or expectation freeze will end "this year."

TELEVISION MOVING IN ON THE MOVIES: "Straw in the wind" -- and they're none too happy about it -- best describes Hollywood's reaction to this week's deal with Petrillo whereby independent producer Robert L. Lippert obtained release of post-1946 feature films for TV. Major producers don't like it a bit, fear it's precedent.

Nor are the big Hollywood producers joyous about emergence of new film companies organized to make pictures for TV. They recall how their own gigantic industry sprang from even humbler beginnings, are realistic enough to realize that in time the present handful of 107 TV stations will expand enormously and really become important factor in rental revenues.

Negotiations between majors and Petrillo on renewals of present contracts begin this fall. These expressly forbid release to TV of any films made after 1946 -- and there have been indications Petrillo considers same provisions binding on films made prior to that year.

Lippert agreed to pay 5% of his gross from TV into AFM royalty fund. He also agreed to re-record music track on old films, using same number of musicians same length of time as on originals. He announced he would re-record 26 of his post-1946 films for immediate TV release.

Known in trade as a "gangs and gore" film-maker, Lippert's most recent picture is The Steel Helmet, based on Korean war. He's owner of chain of 20 film houses in California, became producer in 1944, has in recent years turned out such pictures as Outlaw Country, I Shot Jesse James, Son of Billy the Kid, Arson Inc., Treasure of Monte Carlo, Apache Chief.

What major producers find most significant in Lippert-Petrillo deal is 5% contribution to union fund. Only such TV film producers as Snader, Gene Autry and a handful of others had agreed to that so far. It may be Petrillo's hedge or precedent against inevitable day when majors will open up their vaults to TV (Vol. 7:13).

* * * *

That new enterprise will make films for TV, if majors and other established producers don't do it, is indicated anew with formation of still another company with that in mind. It's a $1,000,000 cooperative venture, including some 50 telecast stations, known as Consolidated Television Broadcasters Inc.

Mainspring is Harrison Dunham, ex-KTTV manager, who promoted such move for owner Los Angeles Times last year (Vol. 6:32). He's executive v.p. President is Richard Jones, WJBK-TV, Detroit, owned by Geo. Storer interests, principal backer. Already hired is Frank Wisbar, ex-Bing Crosby Enterprises (Fireside Theatre).

Initial plans call for 2½ hours of film per week for 26 weeks, each to cost between $10-20,000. Member stations will have first refusal rights in own market, rentals to be not more than 50% of card rate for running time of film.

Potential of film-making for TV is indicated in statement to Wall Street

Journal by Richard Dorso, head of United Television Programs, formed recently by Standard Radio and Petry in collaboration with Century Artists (Vol. 7:2-3):

"Based on conservative estimate of 6 hours of film programming per day on the part of each of the 4 networks, at an average price of $20,000 per half-hour of film, we can look for an annual $240,000,000 business here in Hollywood by 1954."

Pointing to economic impact of TV film producing, already, is recent Petrillo edict that musicians' pay in TV field shall be $50 per 3 hours work instead of the $39.90 regular Hollywood scale, which is expected to be raised to same level.

Not only are special production firms being formed to turn out TV films, but established radio program services have entered or are entering field. Already heavily involved are World (Ziv) and Goodman, as well as the Standard Radio-Petry group. New to field but already a factor is Snader. Soon to announce their entry, it's reported, are Associated Program Service and Lang-Worth.

Networks are still quiet about what they intend to do, but there's little doubt they have film-making plans. Otherwise, they would not have met Petrillo's 5% royalty demand (Vol. 7:7,11). ABC already has huge Hollywood facilities (old Warner lot) and CBS has big plans under way for which it recently got financing (Vol. 7:15), and it's having its Amos & Andy series filmed. NBC is known to be shopping for studio space, with unverified talk about a tieup with Warner Bros.

On exhibitor side, United Paramount Theatres president Leonard Goldenson, in 1950 annual report just issued, offers calm assurance that movies can meet threat of TV. He admits boxoffice is off more in TV areas than in non-TV, but states it's impossible yet to determine exact extent of TV's effect. After novelty wears off and set is paid for, he says, viewers become more selective.

"Then, we believe, the American people, giving freer play to their gregarious instincts, will respond as in the past to our high-quality motion picture entertainment," his report states. He urges exhibitors to use TV as an "ally" -- in advertising -- but admits "much work remains to be done in developing techniques."

STATIONS BITTER BUT RATE CUTS SURE: Radio networks will all cut their rates shortly. They can't help it, they told Affiliates Committee meeting in New York this week. For die was cast by CBS, which sprang sudden 10-15% reductions on eve of NARTB convention (Vol. 7:15-16), leading to formation of protest committee.

Committee chairman Paul Morency, WTIC, Hartford, indicated how seriously situation is regarded when he wrote all network affiliates this week: "If any real effort is going to be made to prevent a debacle in the radio industry, it must be made by affiliates...The radio industry and particularly the affiliates in it are faced with the greatest decision in the history of their operations."

What they can do about it, is still obscure -- but formation of permanent organization, allegiance pledge of stations before committee meets again May 15, is being urged. Membership dues were set at station's highest one time 15-minute rate.

Some committeemen proposed (a) revision of option time agreements, and (b) elimination of day-night rate differentials. Some stations already have single-rate schedules for entire day, notably New York's WNEW, Washington's WWDC.

Network cuts "should not be regarded [as] indication of the overall value of radio and particularly of the market-by-market value of radio," said Morency letter, which recommends affiliates raise local rates if warranted.

That network leadership is on wane, was conviction of some committeemen who said they foresaw considerable change in scope of network operations as well as their position in industry during next few years. Nor were they likely to be mollified by latest PIB network billings figures (see p. 5) showing CBS January-March $2,000,000 ahead of same period last year, even MBS slightly ahead, others down.

CBS rate cut goes into effect July 1, as announced. NBC is expected to follow suit after meeting with Stations Planning and Advisory Committee. ABC will wait for NBC card, and MBS will make known its cuts after all the others.

There's talk of cuts only in TV markets, instead of following CBS across-the-board method. But all face fact total cuts must be equal to, or under, CBS's.

Network TV-Radio Billings

March 1951 and January-March 1951

ANOTHER big leap in network TV time billings is revealed in Publishers Information Bureau report for March. Gross billings for March (not including non-reporting DuMont) were $9,085,403 vs. $7,804,550 in February (Vol. 7:13) and $8,082,876 in January (Vol. 7:10). The March billings were more than fourfold those of March 1950, and Jan.-March cumulative was $25,007,059 vs. only $5,799,995 for same 1950 quarter.

Network radio went up also in March, totaling $16,440,387 vs. $14,957,460 in February and $16,629,928 in January. But it was slightly down from March 1950, and radio's Jan.-March cumulative of $48,132,847 compared with $49,308,757 for same 1950 months. Noteworthy was fact that CBS continued to show increases as well as maintain big lead, with $6,815,406 March radio billings vs. $6,108,386 in March 1950 and $19,788,562 Jan.-March cumulative vs. $17,850,089 for same 1950 quarter. MBS also showed slight increase, but ABC and NBC were lower.

It would appear to be only short time, what with upgrading rates for TV and downgrading rates for AM, that TV network billings will overtake AM networks—albeit only 48 TV areas are interconnected as yet, whereas just about every corner of the country is reached by network radio. The PIB figures:

	March 1951	March 1950	Jan.-Mar. 1951	Jan.-Mar. 1950
NETWORK TELEVISION				
NBC	$ 4,594,203	$ 1,175,186	$12,730,785	$ 3,195,582
CBS	2,993,902	657,501	8,195,406	1,823,456
ABC	1,497,298	344,097	4,080,868	780,957
Total	$ 9,085,403	$ 2,176,784	$25,007,059	$ 5,799,995
NETWORK RADIO				
CBS	$ 6,815,406	$ 6,108,386	$19,788,562	$17,850,089
NBC	5,085,636	5,847,374	15,033,209	16,785,941
ABC	2,891,339	3,476,383	8,693,478	10,181,753
MBS	1,648,006	1,410,683	4,617,598	4,490,974
Total	$16,440,387	$16,842,826	$48,132,847	$49,308,757

Station Accounts: "This season you can scarcely turn a dial (radio or TV) without bumping into a beer sponsor, large or small," reports April 23 *Sponsor Magazine* in survey of "Beer on the Air" which your commercial dept. should study. It recounts how in 1941 only 4.3% of beer advertising went into radio, by 1949 TV-radio combined took 22.4%, exceeded only by outdoor media's 23%. Forty beer sponsors, their agencies and the TV-radio programs they place are conveniently tabulated . . . Adjacencies on Ballantine-sponsored Yankee home games and Chesterfield-sponsored Giant home games on WPIX include *Play Ball* with Hal Tunis 30-min. before Yankee & Giant games for Winston Stores (TVs, appliances), *Dizzy Dean Show* 10-min. before Yankees game for Philip Morris, *A Day with the Giants* 15-min. before Giants games for Krueger, various spots for Kreml, Palmolive, Read's Ice Cream, Bufferin, Gruen, Kaiser-Frazer, Thom McAn, Barney's Clothes . . . Falstaff Brewing Co., St. Louis, to sponsor *The Great Merlini*, United Artists mystery film series in St. Louis, Omaha, Memphis, New Orleans, San Antonio, thru Dancer-Fitzgerald-Sample, N. Y.; Red Top Brewing Co., Cincinnati, already signed for Cincinnati, Dayton, Columbus, Indianapolis . . . Add baseball sponsorships: Cincinnati Reds, piped for Burger Beer from WCPO-TV to WSAZ-TV, Huntington, W. Va., as well as WHIO-TV, Dayton . . . Travel questions feature new-type quiz program on KTTV, Los Angeles, titled *Honeymoon Express*, Fri. 8-8:30, with airline tickets as prizes; co-sponsors are Western Airlines, Lyon Van & Storage, Seven-Up, Tanner Motors, thru Dean Simmons Adv. . . . Harris, Upham & Co., New York stockbrokers, using 1-min. films on KRLD-TV, Dallas, as starter of wider campaign . . . Westinghouse Appliance Div. offering local dealers new series of 1-min. and 20-sec. film demonstrations of refrigerators, ranges, ovens, vacuum cleaners, fans, etc. . . . Among other advertisers reported using or preparing to use TV: Modern Food Process Co. (Thrivo pet food), thru Lavenson Bureau of Adv., Philadelphia; Finkel Outdoor Products Inc. (beach & garden umbrellas, lawn furniture), thru Atlantic Adv., N. Y.; Wool Bureau Inc. (wool apparel), thru Grey Adv., N. Y.; Cowles Magazines Inc., thru McCann-Erickson, N. Y. (KTSL); Illinois Meat Co. (Broadcast Brand meats), thru Arthur Meyerhoff & Co., Chicago (WCBS-TV); Richardson & Robbins (food products), thru Charles W. Hoyt Co., N. Y. (WCBS-TV); Seawol Corp. (Zig-Zag sewing machine), thru Vic Knight Inc., Los Angeles; Industrial Tape Corp., thru Kenyon & Eckhardt, N. Y. (WCAU-TV); Nedick's Inc., thru Weiss & Geller, N. Y. (WTOP-TV); Quality Importers (Welch's wine), thru Al Paul Lefton Co., N. Y. (WCBS-TV); Ultra Chemical Works (Ultra Gloss floor wax), thru S. R. Leon Co., N. Y. (WCBS-TV); Newsweek Magazine, thru Lennen & Mitchell, N. Y. (WABD); Fred W. Amend Co. (Chuckles candies), thru Henri, Hurst & McDonald, Chicago (WOR-TV); George Schneider & Co. (carbonated beverages), thru Doyle Dane Bernback, N. Y. (WOR-TV); Dearborn Supply Co. (Chlor-O-Creme face cream), thru Gordon Best Co., Chicago; Dorchester Products Co., Washington (Clorodets chewing gum), thru Joseph Katz Co., Baltimore.

Personal Notes: Thomas F. O'Neil, v.p. and director of Yankee-Don Lee networks, v.p. of General Tire, elected chairman of board of MBS April 30, succeeding Theodore C. Streibert, WOR; E. M. Antrim, business mgr., *Chicago Tribune* (WGN & WGN-TV) succeeds O'Neil as vice chairman, and all other directors were reelected . . . Victor A. Sholis, director of WHAS & WHAS-TV, Louisville, awarded 1951 medal of American Cancer Society as layman contributing most to cancer control program in America . . . Kenneth W. Church leaves managership of WIBC, Indianapolis, July 1 to become sales mgr. of WKRC & WKRC-TV, Cincinnati . . . Hoyt Andres appointed asst. mgr. of WKY & WKY-TV, Oklahoma City; Eugene B. Dodson named administrative asst., Ray Scales succeeding him as public relations mgr. . . . Ben Gedalecia resigns as ABC research mgr. to join Dept. of State information service . . . Joseph L. Tinney, v.p. of WCAU & WCAU-TV, Philadelphia, promoted to Captain, USNR . . . A. E. Joscelyn, CBS Hollywood operations director, reelected president of So. Calif. Broadcasters Assn. . . . W. D. Fisher, ex-Young & Rubicam, joins Gardner Adv., St. Louis, as TV-radio director . . . Wm. A. Chalmers, ex-Kenyon & Eckhardt, appointed TV-radio v.p., Grey Adv.

Amendment to TV Allocation Report

TO CLARIFY meaning of paragraph II-B-1 of its allocation proposal (page 8 of *Television Digest's* March 24 printed full text of TV Allocation Report), FCC this week amended it with Public Notice 51-410. New paragraph reads as follows, added language in italics:

"1. A channel assigned to a community in the Commission's Table of Television Assignments shall be available, without the necessity of rule making proceedings, to any other community *which is* located within 15 miles of the assigned community *and which has no assignment of its own* provided the minimum separations set forth in paragraphs "E" and "G" herein are maintained."

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
April 28, 1951

TV-RADIO ESCAPE PRICE ROLLBACKS: Price controls don't hurt the TV-radio industry. Instead of rollbacks, it looks like ceiling prices will be high enough to permit upward price changes as and when needed. At least, that's early interpretation of industry and govt. executives following issuance this week of Office of Price Stabilization's manufacturers' price regulation (CPR-22), effective May 1.

And with this week's revision of Section 43 of retail price regulation (CPR-7), which now permits manufacturers of branded merchandise to set wholesale as well as retail prices, the TV-radio industry is in position to calculate its ceiling prices to distributors, retailers, public (Vol. 7:9,14).

Inasmuch as today's TV prices are lower than they were during base period stipulated, plus permitted increases in factory labor and materials costs, nobody sees much difficulty in foreseeable future. Factory accountants are working on details of what the regulation means to their companies; nobody, so far, seems to have found any hidden "gimmicks," as one put it.

Parts manufacturers aren't quite so sanguine. Their best thinking is that no rollbacks will be required immediately, but that "cushion" between present parts prices and ceiling prices is pretty close -- doesn't give them much leeway if costs get out of hand.

There's also still unresolved question in OPS whether manufacturers' regulation covers all electronic components makers. Best guess is that final decision, due in week, will keep parts makers whose products are primarily for TV-radio under manufacturers' regulation.

TRADE WINDS BLOWING NOBODY ANY GOOD: More factory "vacations" and layoffs, further decline in TV production, mounting factory inventories, and a still-listless retail market -- that about tells story of this week's TV trade.

To say that industry folk are plenty worried -- at manufacturer, wholesaler and retailer levels alike -- would be putting it quite mildly. Short of seasonally-unlikely loosening of customer pursestrings, the outlook remained gloomy. One big effort was extended this week:

RTMA president Glen McDaniel and general manager James Secrest waited on Federal Reserve Board staff to ask, once again, that Regulation W be at least ameliorated by way of (a) a 90-day moratorium on the 25% down payment requirement, so that TV stocks can be moved; (b) ruling that trade-ins may be applied against down payment; or (c) that up to 50% of trade-in value be so applied.

Reduced installment buying is believed by many to be basic cause of current market lull. Time sales have declined much more sharply than cash selling since Regulation W was tightened last October. Bankruptcies and financial straits among dealers were cited as reasons for relief. The industry spokesmen were assured matter would be brought to attention of full board next week.

* * * *

There were plenty of signs of distress, as sales and giveaways failed to move goods fast enough. Only promise of better things ahead was Dept. of Commerce April Survey of Current Business stating that high-inventory situation in consumer durables generally should be short-lived because (a) NPA steel order (Vol. 7:15-16) will cut future output, and (b) inventories of raw materials and components among manufacturers are getting low.

"They're telling us!" might well be reaction to report's conclusion that TV-radio has felt blow harder than other lines. And "Oh yeah" to statement that inventories of consumer goods aren't "unduly" high in relation to sales, and that wholesale inventories "do not appear excessive in terms of sales volume."

Nor is there much comfort in Federal Reserve Board's latest Survey of Con-

sumer Finance (Vol. 7:16), which purports to show "little or no decline" in number of consumers considering 1951 purchases of TV, refrigerators, furniture, etc.

"TV Cut Price Jamboree" was being advertised in New York, customer invited to name own price. New York Times April 26 reported out-of-town stores unloading many off-brand and a few top brand TVs in city at lower than distributor prices, being so hard-pressed to meet bank commitments.

* * * *

Philco furlough of 5000 employes this week continues through next week, as planned (Vol. 7:15) -- but RCA Victor's complete shutdown of all TV and some radio production, ordered last Monday (April 23) at 6 plants, was wholly unexpected. At first, it looked like full week layoff of 5837 employes, but NPA came to rescue Thursday with favorable action on adjustment of steel limitation.

About 90% of workers at Camden and Indianapolis were called back to jobs immediately, and next day (April 27) plants in Bloomington & Monticello, Ind. and Pulaski, Va. were back at work. The 175 laid off at Canonsburg, Pa. radio plant are due to return May 1 when month's allotment of steel is available.

RCA officials state emphatically that steel order M-47 (Vol. 7:10-11,14) alone was cause of shutdown -- there was no motive of deliberately "vacationing" from TV-radio production due to becalmed market. Previous layoffs (Vol. 7:13-15) had discounted that "seasonal" condition, and company claims to be better off than most with respect to inventory.

Employment situation in industry at large, however, continues bad, has the unions no less than employers worried. IBEW local chief in Chicago estimates that area's layoffs in TV and components plants at 15,000 or more. Another Chicago report had Zenith laying off 3000 this week, giving inventory-taking as reason.

Nearly all TV-radio plants shut down in July, of course, for summer vacations, usually first 2 weeks -- and no exception is likely this year. Big question is whether, even if inventories persist, factories will offer usual new models in June-July, further aggravating market. Chances are most will, so far as we can learn, particularly since so much hullabaloo over uhf tuners has already been raised (Vol. 7:14-15) and everybody seems to anticipate lifting of freeze and opening up of new markets much earlier than seems likely (see p. 1).

* * * *

TV production dropped to 122,489 (3116 private label) in week ending April 20 -- lowest since 1950 post-Xmas week's 105,968 and lower than any other save last year's summer vacation weeks. Factory inventories rose to 433,930 from 386,307 week before and 324,859 first week of second quarter (ending April 6). TV output for quarter's 3 reported weeks: 140,964 first week, 133,576 second, 122,849 third.

Radios fared better, thanks largely to seasonal auto and portable output. Third week's total was 349,767 vs. 361,652 second week, 332,463 first (Vol. 7:16). Radios for week ending April 20 were: 158,504 home, 147,587 auto, 43,676 portable. Factory inventory of radios was 175,014.

FEAST AND FAMINE IN TUBE INDUSTRY: Despite shortages, despite trade slump, the production of receiving tubes is humming along at remarkable rate, with demand high.

But picture tube industry is in doldrums. In this field probably more than any other -- because it's purely TV -- current trade slump is reflected and future TV production trends forecast. And picture tube business is bad -- with no signs of pickup in near future.

Larger CR tube makers report business down -- from "a little" to "way off." But some middle-sized ones are operating at about 30% of capacity, and smaller manufacturers are creeping along with production as low as 15% of normal. Bottom may not have been hit yet; at least nobody's reporting any increase in orders.

These are straws in the wind in the depressed CR tube situation: Corning Glass Works is discontinuing picture tube bulb production at its new Albion, Mich. plant, and is converting to manufacture of sealed beam headlights, electronic tube and incandescent lamp bulbs. TV bulb production will be limited to Corning, N.Y.

factory. Two CR tube manufacturers, Sarkes Tarzian and National Video, are reported planning to enter receiving tube business.

On price front, it's possible the wave of CR tube slashes (Vol. 7:14-15) has subsided, at least temporarily. Common complaint is that recent reductions have come almost entirely out of tube makers' pockets; there hasn't been proportionate reduction in production costs.

* * * *

Things are different in receiving tube industry, possibly due in part to fact there are only 9 important producers in this field (with Westinghouse soon stepping in) as against 37 CR producers (see pp. 64-65, TV Factbook No. 12).

Although shortages are bothersome, receiving tube manufacturers unanimously predict present high production rate will continue for at least 30 days. When it does fall off, scarcity of nickel -- not customers -- will be to blame, they say.

Receiving tube sales hit all-time high in March despite depressed TV market, RTMA figures reveal -- 44,413,146 vs. 33,663,494 in March 1950 and previous record of 40,105,611 last October. In first quarter, 118,277,243 tubes were sold; 22% or 25,477,655 were for replacement, about 80,000,000 for new TV-radios, 4,000,000 for export and a mere 676,310 for govt. agencies, including military.

There have been some cutbacks from March's record production -- but many tube plants are still operating with extra shifts or on 6-day week. Military orders, while coming in steadily, still represent less than 10% of tube makers' business, industry-wide, according to manufacturers' own estimates.

Principal reason for continued high demand -- as most tube makers see it -- is that set makers, who for past year have been operating with practically no tube inventory at all, are building up "normal" advance supplies. And radio production is still high. Distributors' buying wave, however, has slackened -- most replacement shelves are fully stocked.

Material shortages trouble tube makers day-to-day and hour-to-hour. They've felt nickel pinch (Vol. 7:15-16) last 30 days, but full fury hasn't hit yet. And coming tungsten crisis is just dark cloud on the horizon.

Conservation and substitution will eventually result in use of about one-third less nickel in civilian tubes, most manufacturers say. But these measures won't do in military tubes -- won't fit strict specifications. For example, the military requires pure nickel leads, whereas nickel-plated steel leads are adequate for civilian tubes.

So tube makers are faced with new headache. They're going to have to make 2 production runs for each type tube -- one to meet military specifications, another for civilian tubes, using minimum of strategic materials.

Topics & Trends of TV Trade: Philco reports "program of cooperative research" with Massachusetts Institute of Technology, alma mater of its engineering research v.p. David Smith and other top staffmen, whereby they will exchange data on military and commercial electronics, TV-radio, refrigeration, home appliances, etc. Special conferences and seminars and factory visits are planned. And this week, too, Majestic Radio announced the establishment of Majestic Research Fund Inc., endowed for $500,000, under which grants up to 48 scholarships per year for 5 years, each worth about $2000, will be made to persons over 35 years of age seeking another chance for education; scholarships will be known as "Second Chance," and advisory board comprises Dean H. L. Masson, Engineering Graduate School, New York U; Dean Erich Hausman, Brooklyn Polytechnic Institute; Prof. R. T. Livingstone, executive officer, Dept. of Industrial Engineering, Columbia U; Prof. David Bendel Herz, Columbia U; G. A. Bishop, director of research, Textile Workers of America.

Arguments against Regulation W have been marshalled in 8-page press release by Philip Lesly Co., 100 W. Monroe St., Chicago, public relations counsel for American Finance Conference, 176 W. Adams St., Chicago. Latter is campaigning for elimination or modification of credit controls. Lesly Co., which also handles publicity for Meck, is preparing leaflet on subject, will make copies available to all interested.

Some 3,300,000 wired homes exist within 60-mi. radius of existing or projected TV stations in Latin America, so that within next 5 years there's potential market for about 1,300,000 TVs. So Philco International Corp. v.p. Radcliffe L. Romeyn told meeting this week of Export Advertising Assn., New York. Within range of the 6 stations now operating in Latin America (2 in Cuba, 2 in Mexico City, one in Rio de Janeiro, one in Sao Paulo) Mr. Romeyn estimated 1,500,000 wired homes, only about 25,000 sets-in-use, perhaps another 15,000 in trade pipelines. Of sets-in-use, about 14,000 are in Havana, 3500 in Mexico City, 3600 in Sao Paulo, 3000 in Rio.

Esquire Radio Corp., 26 Court St., Brooklyn, is new manufacturing firm announced by A. Robert Lieberman, ex-Jewel Radio, with B. Stohl in charge of purchasing. He states company plans to produce TVs, radios and other electronic equipment.

Zenith's new uhf strip is much superior to old one, according to Rudy Frank, promotion manager of WELI, New Haven, whose management is extremely enthusiastic about uhf (Vol. 7:15). Frank, whose Bridgeport home is virtual testing ground for various manufacturers' uhf sets, writes: "This new device is so vast an improvement over the early strip which we tested that I feel that an injustice has been made if I didn't correct the impression created by my appraisal [in Vol. 7:15]. Contrary to published comments that the job of installation of the strip required hours of work by a serviceman, I was able to install the strip myself in a matter of 5 minutes, and you might recall that I am not an engineer or a serviceman. The important thing though is the quality of the picture. I can say that Zenith produced the clearest, cleanest picture of any of the converters and receivers we have tested to date."

Trade Miscellany: **DuMont** announces availability of electrostatically-focused 17 & 20-in. picture tubes (17FP4 & 20GP4) which eliminate need for copper or cobalt-containing focus magnets (Vol. 7:1, 3, 5, 9) . . . **GE 12-in. tube** promotion launched this week aims at what it regards as "tremendous replacement market" . . . **Richmond Television Corp.**, Los Angeles, subject of adjudication order in bankruptcy proceedings in Federal district court (Vol. 7:7), has offered to pay creditors in full with 12-installment notes . . . **Pathe** cut price of 12-in. table from $249.50 to $149.50, 17-in. consolette from $299.50 to $169.50; Pathe sets are made by Air King . . . **Sparton** returning to refrigerator field, will produce 9 & 10-ft. models starting next month.

Skiatron Electronics & Television Corp., 30 E. 10th St., New York (new corporate name, new address), reports election of Telford Taylor and Rear Admiral Timothy J. O'Brien, USN retired, to board. Taylor is former general counsel of FCC, as USA brig. gen. prosecuted Nuremberg war crimes trials, is now partner in New York law firm of Paul, Weiss, Rifkind, Wharton & Garrison, which represents Emerson (in color case) and educators (in TV channel allocations issue). Admiral O'Brien is v.p. of Yearbook Publication Inc. Skiatron is promoting "Subscriber-Vision," rival to Zenith's Phonevision, and claims patents on a TV theatre projector that dispenses with CR tube.

Dividends: **Magnavox**, 37½¢ payable June 15 to holders of record May 25 and 25¢ on Class A preferred payable June 1 to holders May 15; **Indiana Steel Products Co.**, 20¢ payable June 8 to holders May 22; **Standard Coil Products Co.**, 25¢ payable May 15 to holders May 1; **General Instrument Corp.**, 20¢ payable May 15 to holders May 1; **Westinghouse**, 50¢ payable June 1 to holders May 10; **P. R. Mallory**, 30¢ payable June 11 to holders May 18.

Trade Personals: Wm. J. Halligan, Hallicrafters president, named president of Armed Forces Communications Assn. at Chicago convention . . . **John R. Beers**, engineering v.p., elected president of Arcturus Electronics, succeeding late Morris H. Cohn . . . **Harold W. Schaefer**, onetime Westinghouse and RCA engineer, recently special asst. to Philco engineering v.p. Leslie J. Woods, appointed Philco director of refrigerator and range engineering . . . **Charles L. Cade** appointed director of distributor sales for Sarkes Tarzian Inc., now entering replacement market . . . **Joshua Sieger** has resigned as engineering v.p. and Dr. Adolph H. Rosenthal elected v.p. and research director, Freed Radio . . . **Saul Feldman**, ex-Tele-tone, named controller of Jewel Radio . . . **Edwin G. Weber**, covering Chicago TV-radio trade for *Retailing Daily*, has resigned to join Philip Lesly Co., public relations, whose clients include Meck-Scott, Webster-Chicago . . . E. W. Ritter, mgr. of Westinghouse's new Electronic Tube Div., elected v.p., and E. V. Huggins elected to newly created post of executive v.p., Westinghouse Electric International Co.

Financial & Trade Notes: Sylvania achieved another record when its first 1951 quarter sales more than doubled those of same period 1950, and net went up threefold. Quarter was better than any full year save 1948 and 1950, president Don Mitchell told annual stockholders meeting in Boston this week.

First quarter sales were $60,631,085 vs. $29,347,911 for same 1950 quarter. Net earnings were $3,515,155, after providing $6,665,000 for Federal taxes, or $2.34 a common share, vs. net of $1,225,844 (77¢) same period last year. Net for whole of 1950 was $8,221,185 ($5.37 a share) on sales of $162,514,814 (Vol. 7:11).

President Mitchell said unfilled defense orders now amount to about $75,000,000, but it will be late in third quarter before shipments are substantial. He predicted TV sets, though now "a drug on the market," will be in short supply by fourth quarter. Stockholders approved increase in authorized common shares from present 1,500,000 to 2,500,000.

* * * *

Tele-tone's first annual report (since stock was placed on market in August 1950) shows $19,785,604 sales during 1950, up 65% from 1949, and net income of $1,083,525 before taxes, $646,372 after taxes. Common stock earnings were $1.36½ per share, dividends paid third and fourth quarters were 22¢ per share on Class A, 25¢ on Class C. There were 88,147 shares of $10 par Class A outstanding as of Dec. 31 out of 100,000 authorized. Of 1,000,000 shares of $1 common, 458,242 were outstanding. Earned surplus at year's end was $728,015. Report points to 20-fold increase in volume since firm began in 1945; shareholders totaling 1346 in 31 states; new plant in Elizabeth, N. J.; work on color TV (with CBS); manufacture this year of private-label TVs & radios for Sears Roebuck, Western Auto, B. F. Goodrich, Gamble-Skogmo, Rexall Drug, Walgreen Drug, Mercantile Stores Co. Company at end of year had 1654 employes. Disclosed also was fact that Tele-tone's public relations counsel is Benjamin Sonnenberg, who also represents CBS, notably on color.

Zenith consolidated sales for quarter ended March 31 were $37,053,064, net profit $2,228,709 after total taxes of $2,451,993. This is equal to $4.53 per common share on 492,464 shares outstanding. No comparisons were available because company has changed its fiscal year to end Dec. 31 instead of April 30, but recent annual report showed profit of $5,627,003 ($11.43 a share) on sales of $87,704,071 for 8 months ending Dec. 31, 1950 (Vol. 7:12).

International Resistance Co. report on 1950 business shows $11,085,109 sales, $1,056,638 net profit, or $1.01 per share on 1,010,757 shares of common outstanding as of Dec. 31. Year before, sales were $6,483,149, profit $347,529 (39¢). Backlog of orders at year's end was $4,424,830 vs. $687,308 year earlier. During 1950, firm converted 122,069 shares of preferred into common on basis of 2 common for each preferred; also retired 17,598 preferred shares in treasury. Remaining preferred (only 2583 shares after redemptions so far this year of 23,053) are now being redeemed.

Teco Inc., formed by Zenith to promote Phonevision and backed by $1,010,000 raised through stock issue (Vol. 6:15-16, 39, 40), reports disbursements and promotional expenses, chiefly salary and travel, of $22,452 from time of incorporation May 25, 1949 to Dec. 31, 1950. Organization expenses, mainly fees in connection with stock issue, totaled $34,418. President S. I. Marks' report to stockholders April 25 shows $925,159 in U. S. bonds, $16,466 cash, states: "Obviously, unless and until Phonevision is approved [by FCC], your company will not be engaged in any income-producing operations."

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Mobilization Report
April 28, 1951

DEFENSE ORDERS AREN'T THE ANSWER: Defense Dept. and mobilization agencies are fully aware of vital necessity of keeping electronics plants going, safeguarding their skilled manpower reservoir -- but no one we've contacted feels that current letdown is due to mobilization program. Official attitude can best be summed up thus:

"We can hardly be blamed because you miscalculated your civilian markets and overproduced."

Short of upsurge of public demand for TVs, only thing that might really help now is more military production orders -- but military simply doesn't have that kind of money. Defense Dept. has pushed subcontracting and spreading of orders, and NPA has proved sympathetic to industry's woes by helping on cobalt, steel, aluminum, and in other situations. But these haven't solved problem.

RTMA chairman Robert Sprague, speaking to Armed Forces Communications Assn. last week, not only explained trade picture (Vol. 7:16) but posed what he called the "$64 questions": What will be the total military and civilian production for the third and fourth quarters of 1951? And for 1952? What are industry and individual company prospects? His answers were realistic, not too reassuring:

"Despite the rather sizeable allotment of public funds for the purchase of military electronic equipment and components, it seems apparent that the nation's military needs, short of an all-out war, will not absorb production facilities.

"Our latest information indicates that military electronics production will reach a peak annual rate of about $2.5 billion in the fall of 1952, and thereafter decline to an annual rate of about $1.5 billion. [Vol. 7:3]. This might appear to be a very heavy schedule of military production, if merely compared with the 1950 total output of about $2¼ billion. Actually, it probably will not absorb more than half of the industry's production facilities, even at its peak, due chiefly to the fact that military production dollars have about half the impact on our industry as civilian production dollars. This is due to several factors, but principally because a considerable portion of special and elaborate mechanical gear is obtained from manufacturers not considered a part of our industry.

"A disturbing aspect of the present rearmament program is that the military load is not, for a variety of reasons, evenly distributed throughout the industry. Perhaps it cannot be evenly distributed. Nevertheless, many manufacturers are in danger of being caught in a squeeze between material shortages on the one hand and insufficient or no military orders on the other. Already some of the smaller manufacturers are in this difficulty.

"This condition might not be alarming were it not for the recognized essentiality of electronics to modern warfare. Because of the importance of electronics to our national defense, it is dangerous to permit any significant number of manufacturers of either end equipment or components to fall by the wayside..."

* * * *

Four current industry problems were stressed by Leslie F. Muter, president of Muter Co., past president of RMA, speaking before same convention April 19: (1) Credit restrictions. (2) Stockpiling of critical materials. (3) Military contracting procedures. (4) "Pirating" of engineers. Said he:

"I believe that a more realistic program of credit and stockpiling must be quickly adopted or we will be struggling with deflation instead of the widely-heralded inflation." Stockpiling, he said, "is evidently being conducted on a basis that indicates a more serious situation than we have thus far been informed." He was glad to see more negotiated contracts replacing bidding since bidding frequently resulted in awards to companies poorly-qualified to deliver the goods. He added:

"I feel that the pirating of highly-skilled engineering personnel should be considered before additional contracts are placed with companies that do not possess the staffs and facilities to meet the problem."

Mobilization Notes: Appeals board with final authority to grant or deny individual adjustments under NPA orders was set up April 24 by NPA Administrator Fleischmann (NPA Reg. 5). Three-man board will hold open hearings (except where national security is involved) on appeals arising from denial of applications for adjustment or exception by NPA industry divisions. T. Munford Boyd, U of Virginia law professor, is chairman. Other members: Frank J. Peterson, former WPB labor consultant and Kansas City AFL Building Trades Council official; Jack M. Rorimer, ex-WPB appeals board member and onetime v.p.-secy., Empire Plow Co., Cleveland.

NPA has been reorganized to mesh with operation of Controlled Materials Plan (Vol. 7:15). Present 20 industry divisions have been expanded to 35, grouped under 4 overall bureaus, replacing Industry Operations Bureau. New bureaus are Industrial & Agricultural Equipment; Metals & Minerals; Chemical, Rubber & Forest Products; Textile, Leather & Speciality Equipment—with Electronics Div. coming under latter. Asst. administrator Horace B. McCoy heads Textile, Leather & Specialty Equipment Bureau; Norman W. Foy, Republic Steel official, has been named asst. administrator to head Metals & Minerals Bureau.

* * * *

Eleven certificates for rapid tax amortization of $6,665,741 in new plants and facilities for production of electronic equipment are included in DPA's latest list of certificates granted April 9-13. While electronic production certificates account for 11% of the 94 granted, they amount to only 3% of the $218,523,000 dollar-value approved during 4-day period.

Most of the electronic certificates are for expansion of tube production, including $4,088,390 for new Lansdale (Philco) tube plant at Frederick, Md., with 5-year write-off for tax purposes on 75% of that amount. Sylvania was issued 6 of the 11 certificates, giving that firm total of 10 certificates for $10,011,318 worth of expansion to date (Vol. 7:10-11, 16). Electronic tube production expansion certified by Govt. is generally for special-purpose tube types for which civilian production facilities can't be readily adapted. Over-all average allowance for amortization is 70%.

Sylvania was issued these necessity certificates for expansion at 5 localities: Electronic tubes—Salem, Mass., expansion valued at $346,893, with 80% of this amount to be amortized in 5 years; Montoursville, Pa., $216,756 at 80%; Emporium, Pa., $67,301 at 85%. Electronic tube production equipment—Warren, Pa., $165,290 at 85%; Radio-TV Div., Buffalo, $114,450 at 85%. Coils—Salem, Mass., $93,275 at 75%.

Other firms receiving certificates for expansion of electronic production facilities: Weston Electrical Instrument Co., Newark, air radio course indicator, $1,500,000 at 90%; Electrons Inc., Newark, electronic tubes, $35,000 at 85%; Resistance Products Co., Harrisburg, Pa., wirewound resistors, $25,110 at 80%; Chatham Electronics, Newark, electronic & radar tubes, $23,276 at 80%.

* * * *

Edwin T. Gibson, General Foods v.p., former deputy DPA administrator, was promoted April 27 to acting Defense Production Administrator to succeed—at least temporarily—Maj. Gen. Wm. H. Harrison who leaves post May 1 to return to presidency of IT&T. Some of Harrison's aides, including W. W. Watts, RCA v.p. on leave, may also quit to give new administrator freer hand in selection of staff. Edmund T. Morris Jr., Westinghouse Electronics & X-ray Div. director on leave, April 23 took over chairmanship of DPA's top-drawer Electronics Production Board (Vol. 7:11-12, 15).

THE FCC is going to have its hands full, once comments on allocations plan are in—all due by May 7 (Vol. 7:15). Questions of all kinds will be dumped in its lap, probably including some shockers.

Very few commercial interests have filed comments yet, but educational responses have begun to dribble in. There are likely to be hundreds of each by deadline. [We will summarize all comments after May 7 deadline.]

First station comment came from KTTV, Los Angeles. It points out dilemma: Station can't protect Grade A service of adjacent-channel station 60 miles away and at same time (a) meet minimum power requirements in serving city of 1,000,000 with antenna over 1000 ft. and (b) utilize maximum power with antennas over 500 ft. Station asks that adjacent-channel ratio be changed from 0 db to −6 db.

Educational issue is bringing such comments as these:

(1) U. S. Conference of Mayors and New York City's WNYC ask that municipalities be permitted to apply for reserved channels. FCC's proposal would admit only accredited educational institutions.

(2) U of Tampa says it can't afford station, but reports that Ted Mack offers it 20% of time and 10% of stock if he gets station.

Pittsburgh's Mayor David Lawrence, president of Conference, is all excited about TV, exhorting his confreres to stimulate local educators—apparently with occasional results. He says reserved channels "should never" be turned over to commercial interests. Some mayors have caught his enthusiasm—we've heard of Milwaukee's Zeidler, Binghamton's Kramer, St. Louis' Darst. Interestingly, KSD-TV's George Burbach is serving as advisor to educational committee in St. Louis.

Focus of educational activity, Joint Committee on Educational Television, was formalized this week. Executive director and secretary is Richard Hull, WOI-TV, Ames, Ia. (country's only educationally-owned station). Telford Taylor and Seymour Krieger continue as counsel. Stuart Haydon is general consultant (publicity, etc.). Chairman is Dr. Edgar Fuller, of National Council of Chief State School Officers; Dr. David Henry, president of Detroit's Wayne U, is vice chairman.

———■———

FCC would allocate entire spectrum, including govt. frequencies, under bill (S. 1378) introduced this week by Sen. Edwin Johnson, chairman of Interstate & Foreign Commerce Committee. It's his reaction to recommendation of Communication Policy Board that President set up board to coordinate govt. frequency users (Vol. 7:13). Says Sen. Johnson: "This bill would get rid of the dog-in-the-manger attitude of govt. users who waste frequencies." Asked if he thought FCC would need to be enlarged to handle new duties, he said: "No. They've got plenty of people, plenty of time." Bill provides for following to be inserted into Sec. 305(a) of Communications Act: "All such Government stations shall use such frequencies as shall be assigned to each or to each class by the Commission under rules and regulations prescribed by it and which shall be approved by the President. The Commission may hold public hearings in connection with the assignment of frequencies to such Government stations and shall make public announcement of such assignments, except when the interests of national security require the withholding of information with respect to any such assignment." Regarding phrase "approved by the President," Sen. Johnson says: "I have no worry about FCC's ability to sell the President on its rules and regulations."

Defense Production Inquiry Center will be set up about May 1 by NPA and DPA in main lobby of old Govt. Accounting Office Bldg., 5th & G Sts. NW,

NBC Count of TV Sets-in-Use by Cities

As of April 1, 1951

Estimates are sets within .1 Mv/m contours (60 mi.), excluding overlaps

LOWEST accretion to TV audience since TV sales began swift zoom upwards 2 years ago occurred in March when 423,100 sets were sold—making grand total of 12,171,500 sets-in-use as of April 1, according to NBC Research's monthly "census" report released this week. This compares with 601,900 sales in February (Vol. 7:12), 593,000 in January (Vol. 7:8). These are the breakdowns (consult individual stations for estimates of number of families within range):

Area	No. Stations	No. Sets
Interconnected Cities		
Ames (Des Moines)	1	54,500
Atlanta	2	104,000
Baltimore	3	292,000
Binghamton	1	36,200
Birmingham	2	49,300
Bloomington, Ind.	1	16,000
Boston	2	721,000
Buffalo	1	198,000
Charlotte	1	68,600
Chicago	4	915,000
Cincinnati	3	250,000
Cleveland	3	454,000*
Columbus	3	143,000
Davenport-Rock Island	2	53,900
Dayton	2	125,000
Detroit	3	455,000
Erie	1	45,900
Grand Rapids	1	78,400
Greensboro	1	63,900
Huntington	1	41,300
Indianapolis	1	124,000
Jacksonville	1	30,000
Johnstown	1	82,200
Kalamazoo	1	36,200
Kansas City	1	115,000
Lancaster	1	88,300

San Francisco	3	179,000
Seattle	1	80,900
Tulsa	1	69,800
Total Non-Interconnected	26	1,837,900
Total Interconnected and Non-Interconnected	107	12,171,500

* March 1 estimate. Figure for April 1 not available until early in May. Bureau of Business Research, Western Reserve University, making audit of TV set figures.

Chances of McFarland Bill's passage (Vol. 7:4-15) appear somewhat improved after hearings every day this week before House Interstate & Foreign Commerce Committee. Separation of Commission and staff (in contested hearings) and easing of stations' renewal burdens remain most controversial issues. This week, CBS, NBC and Federal Communications Bar Assn. joined rest of industry in supporting most provisions of bill, although CBS supports FCC on separation issue. Committee members have begun to show understanding of problems, and, since bill has come up early in session, some sort of FCC "streamlining" legislation may well result. Senate has already approved bill.

FCC set theatre-TV hearing for Sept. 17, issued list of issues which include: (1) Whether common carrier facilities can't do job. (2) What frequencies and how much are needed. (3) Whether public needs or demands service. (4) Data on technical and program feasibility. (5) Whether, if approved, theatre-TV should be considered as common carrier. Appearances must be filed by Aug. 15. Setting of date comes more than year after FCC said it would hold hearing (Vol. 6:2, 9), will be culmination of exhibitors' interest in establishing theatre-TV service (Vol. 5:36 et seq).

Telecasting Notes: Manuel Alonso, newsreel producer and holder of CP for new Channel 2 station in Havana, reports his station probably won't be ready for operation before end of year. RCA equipment is being shipped, he states, and building construction will begin in May, requiring about 4 months . . . Projected Storer-backed station in Havana on Channel 7 (Vol. 7:9) is now "up in the air"; decision expected soon whether to go ahead . . . Whether Gen. MacArthur's May 3 testimony before joint Senate committees will be telecast (he says he's perfectly willing), will be determined in day or two . . . Promotion-wise CBS took advantage of this week's Waldorf-Astoria conventions of AP and American Newspaper Publishers to put on 4 color TV demonstrations, using 17-in. drum receiver, viewed by 250 editors and publishers, some owning TV-radio stations; shows drew high praise from viewers . . . Closed-circuit TV setup during April 26-29 Greater Portland Industries Exposition, operated by RCA traveling crew under Dick Hooper, gave that Oregon city, one of biggest still without TV, foretaste of eventual service; big Meier & Frank dept. store had receivers operating in show windows and auditorium, besides the 15 sets at exposition . . . Detroit Edison took half hour on WXYZ-TV to telecast employe meeting this week, with company brass appearing and film on firm's progress featured; it was designed as sort of "report to stockholders" . . . Milwaukee's WTMJ-TV April 30 moves weekday sign-ons from 12:30 p.m. to 9:30 a.m., which has been Sat. & Sun. schedule since last fall; it adds 15 hours a week to make total of more than 100 hours of telecasting weekly . . . WTOP-TV, Washington, May 15 raises base hour rate from $450 to $550, one-min. from $100 to $120.

Peabody Awards went to 3 TV programs this week, while third got special citation for educational value. Jimmy Durante (NBC) got award for TV entertainment, *Zoo Parade* (NBC) and *Saturday at the Zoo* (ABC) shared award for best children's program. *Johns Hopkins Science Review* (DuMont) got special citation as educational program. Special award went to ABC for "resisting organized pressure" and reaffirming "basic American principles" by refusing to cancel Gypsy Rose Lee radio show on grounds she was listed in *Red Channels* as communist. President Robert Kintner, on assurance from Miss Lee that she wasn't even a Red sympathizer, refused to bow to pressure from American Legion.

Sale of KFMB & KFMB-TV, San Diego (Vol. 6:46) to John A. Kennedy, former Charleston (W. Va.) broadcaster, former publisher of old *San Diego Journal*, present 48% owner of WSAZ & WSAZ-TV, Huntington, W. Va., was approved April 25 by FCC. Purchase price was $925,879 for 100% of stock interest of Jack O. Gross. Other TV station sales last year: WOIC (now WTOP-TV) to *Washington Post*, 51%, CBS 49%, price $1,400,000 (Vol. 6:25); KBTV (now WFAA-TV) to *Dallas News*, price $575,000 (Vol. 6:4, 11); KLEE-TV (now KPRC-TV) to *Houston Post*, price $740,000 (Vol. 6:13, 21); KTSL, Los Angeles, to CBS, price $333,765 plus $228,000 yearly rental of facilities for 10 years (Vol. 6:52).

Two applications for TV stations this week, bringing total to 399, were from Northwestern Theological Seminary & Bible School (KTIS), Minneapolis, for Channel 9; *Wichita Falls* (Tex.) *Record News* (KTRN), for Channel No. 6. [For further details about applicants, principals, etc., see *TV Addenda 12-P* herewith; for listings of all applications to date, see *TV Factbook No. 12*, with Addenda to date.]

Milwaukee union leaders complain TV has cut attendance at union meetings as much as 50%.

FACTORS IN CBS PROPOSAL TO BUY ABC: Deal has been made whereby CBS would buy ABC, retain ABC's TV stations in Chicago, Detroit and San Francisco, then re-sell the ABC radio network and its two remaining TV stations in New York and Los Angeles.

Sale price was reported as $28,000,000 by New York Times, whose ace radio reporter Jack Gould May 4 broke front-page story that had the broadcasting industry in a veritable dither at week's end -- particularly CBS and ABC affiliates.

Principals are obviously pledged to secrecy, had apparently hoped story wouldn't leak until they could wrap up "package deal" to present to Washington. Not only must FCC rule on it, but Dept. of Justice might look into anti-trust implications should elimination of competition be involved. Mr. Gould reported May 5, obviously from CBS sources, that plan does not contemplate scrapping ABC network.

"No comment," was laconic reply to inquiries put to as many principals as could be contacted -- but no one undertook to deny report. Even in banking circles, it was indicated some sort of deal was afoot -- and considerable interest revolved around identity and motives of person or persons who sold and bought block of 35,000 shares of Class A CBS stock recently through Glore, Forgan & Co.

Only officers-directors holding that much are chairman Wm. S. Paley (98,510 shares of A) and the Levy brothers (Isaac 31,826 shares, Leon 14,100) -- aside from their Class B holdings of 251,900, 20,475, 40,900 shares, respectively.

* * * *

It was no secret that CBS had approached several prospective customers with proposal they continue ABC's AM network, line up new TV network with ABC-TV stations in New York and Los Angeles that CBS doesn't need. Gould indicated sale price for what's left after CBS takes what it needs from ABC purchase would be $18-20,000,000.

Among those approached, we learn, were Philadelphia Inquirer publisher Walter Annenberg, whose WFIL & WFIL-TV are ABC affiliates; Chicago Tribune's Col. Robert McCormick, whose WGN is a basic MBS outlet, his WGN-TV a DuMont TV outlet, and who might be interested in building up an MBS-TV network; the National Grange, which in past has shown interest in acquiring an AM network; very likely others.

This is conjecture, frankly, and there isn't time at deadline for adequate check -- but it wouldn't be surprising if either Fort Industry (George Storer), Cowles-Look, Crosley, Yankee-Don Lee (Wm. F. O'Neil-General Tire), Time-Life or Meredith Publishing Co. (Better Homes & Gardens) interests are involved or contemplated as prospective purchasers. All have indicated expansionist ambitions in TV.

Storer owns TV stations in Detroit, Toledo, Atlanta, AMs in same cities plus Cincinnati, Miami, Wheeling, Fairmount, W.Va. Cowles publishing group has AMs in Des Moines, Boston, Yankton, S.D., no TVs (though owners of Minneapolis WTCN-TV & WTCN have small interlocking ownership with Cowles newspapers there); and there has been recurrent talk of possible sale of CBS's 50-kw Minneapolis WCCO (AM) to Cowles.

Crosley has TV stations in Cincinnati, Columbus, Dayton, besides its AMs WLW in Cincinnati and WINS, New York. Yankee recently bought Don Lee Network, sold off its one TV station (KTSL, Los Angeles) to CBS (Vol. 6:42-45); it's one of owners of

Copyright 1951 by Radio News Bureau

MBS, and Tom O'Neil runs Yankee-Don Lee, is MBS chairman. Time-Life has long eyed TV, once held block of CBS stock. Meredith had big TV plans pre-freeze, did start TV station WHEN in Syracuse, is still applicant for Albany and Rochester.

Foregoing are some of more obvious prospects in deal which May 4 AP dispatch also confirmed, but stated was in "an exploratory, still nebulous stage at best."

* * * *

In view of silence of CBS and ABC officials, no specific details are available -- but speculation was rife. Reasonable facts and deductions added up to this:

(1) Deal is far from fait accompli, though it's understood CBS chairman Paley and president Stanton, ABC president Kintner and v.p. Hinckley have made some soundings in Washington. It's predicated on ability to sell what remains after CBS should absorb into own network ABC's WENR-TV, Chicago; WXYZ-TV, Detroit; KGO-TV, San Francisco. That would leave WJZ-TV in New York and KECA-TV in Los Angeles, plus AM network with its 5 owned-and-managed stations to be sold; also would mean CBS would have to divest itself of its 45% of WTOP-TV, Washington, for it cannot own more than 5 TV outlets and already has WCBS-TV in New York and KTSL in Los Angeles.

(2) Without its profitable TV stations, and facing bitter competitive struggle now under way among AM networks, ABC radio network faces uphill fight for commercial survival. It runs poor third among networks in AM billings, also TV network billings (Vol. 7:17), has poor recent record of earnings (Vol. 7:17), must meet AM rate cuts already announced by CBS and NBC. This deal again makes clear ABC is on block, despite frequent disavowals (Vol. 7:13-14).

(3) Relations between AM networks and affiliates, especially CBS's & ABC's, are becoming more and more strained -- may be aggravated by this move. CBS affiliates are still smarting under rate cuts suddenly sprung on them (Vol. 7:15-17); and ABC members, unhappy about poor billings, now wonder just where they stand. Already, recriminations abound, as TV impact on radio structure takes on curious, confusing and high-finance twists.

(4) Congressional and FCC reaction isn't hard to guess if net effect is to reduce competition -- even though many hard-headed observers of the commercial scene find it hard to figure how more than 3 AM networks can survive current changes -- maybe not more than 3 TV networks too. At FCC, everybody professed to be astonished at news. Competition has become a shibboleth there; only 8 years ago, in 1943, the then FCC chairman James Lawrence Fly led move to force NBC to get rid of Blue Network for sake of more competition, and it was purchased for $8,000,000 by Ed Noble and associates, becoming ABC.

Hint of political obstacles is contained in statement by Sen. Ed Johnson, who heads committee with all-powerful sway over FCC, radio and TV. He said:

"In principle, I'd be opposed to such a merger. I'm against any move towards monopoly in the broadcasting network business. I'm dubious about such a merger, unless there are factors involved that I know nothing about. I should think our committee would want to move in and learn all the facts involved. I'm for competition and lots of it. There's already too much monopoly in the radio business."

* * * *

Eager quest for TV stations, of which there are now only 107 though channels could have been had for the asking only a few years ago, is evidenced not only by CBS-ABC deal and intense interest in freeze-thaw (see p. 4), but also by station sales deals of last year (see p. 12, Vol. 7:17) and others known to be cooking.

At least 2 Midwest TV stations are currently subject of sale negotiations in 7-figure sums. Networks aren't involved; details should be revealable soon.

TV SPONSORS STICK, NBC-AM RATES CUT: TV networks say they're holding onto most of their evening sponsors through summer -- most with same shows, some with substitute shows. If reaction of public is good, they think pattern for year-round sponsorships will have been established, contrary to hiatus precedent of radio.

Summer schedules are now being aligned, so it's too early to secure exact data. But CBS-TV's Jack Van Volkenburg says virtually all sponsors are staying on, definite orders on hand already from 80%. NBC-TV's Frank Reed reports 5 full-hour

shows sticking, 3 sponsors holding time with replacements, others now being signed. ABC-TV's Fred Thrower reports 15 out of 43 accounts definitely committed for summer, only 2 as yet definitely off for summer. DuMont's Chris Witting reports 7-8 commercial hours per week certain to stay this summer, no vacation requests yet.

What's holding the sponsors seems to be the desire to hang onto time spots on still-restricted network lineups, since there are so few cities with enough competitive outlets due to station freeze. There's also incentive of summer "bargain" rates and conditions (Vol. 7:15). On station side, adjacencies to network shows are proving bonanza -- and such spots are easy to sell.

Radio network picture isn't too bright, by contrast, mainly because of rate cuts starting mid-summer and frankly forced by TV. As did CBS a few weeks ago (Vol. 7:15 et seq), NBC this week announced across-the-board cut of 15% on 8-10 p.m. time, 10% on 1-8 p.m. time, effective July 1 -- so it's only matter of days before ABC and MBS reveal their reductions. Simultaneously, NBC dropped 20 AM staffmen, plans more of same, hopes to absorb such personnel in TV depts.

Though affiliates are still bitter, network people say radio rate cuts are having effect of (1) keeping some sponsors on air who were ready to cancel, and (2) attracting new sponsors. But April 28 Billboard quoted consensus of ad folk as saying that, with TV getting stronger, with more TV stations to come, radio rates may have to be cut again in year or so. And "virus" is spreading to spot, with Esso's agency Marschalk & Pratt writing all stations carrying Esso Reporter that it feels CBS cut was "a step in the right direction, especially in those cities where TV is gaining strength...We assume similar reductions will be made in spot rates."

It's no secret that stations now look to increased spot and local business to hold up revenues, some even talking of raising such rates. Broadcasting Magazine calls network rate cuts "emotional spasms," suggests industry-wide research to prove value of radio. Advertising Age, same date, hails reductions as "stabilizing rate structure of radio," referring to "devious manipulations" by which stations and networks had been making time deals anyhow.

END-OF-FREEZE HOPES, UHF ENTHUSIASM: First TV grants by Dec. 1, first new stations on air by mid-1952. That's latest estimate by FCC Chairman Coy, who outlined freeze-ending procedures in April 30 address to National Newspaper Promotion Assn. His guess isn't too far off from ours (Vol. 7:17). Coy also reiterated faith in uhf and doggedly plugged CBS color.

Coy's failure to mention "partial" unfreezing has led some to believe everything may have to await ultimate decision on whole allocation. This would include hoped-for "quick" unfreezing of vhf stations in Territories, increases in power for existing stations, grants of uhf everywhere. But FCC's answer on partial unfreezing won't come until it has studied all comments on allocation plan (see p. 4).

To back up his hopes for uhf, Coy pointed out that it will serve 30-40 mile radius, contrasted with hundreds of AMs covering 15-20 miles day, 3-5 miles night.

RCA has spent $2,500,000 in uhf research, chairman Sarnoff told May 1 stockholders meeting. "Our engineers," he said, "taking the initiative in pioneering the upper frequencies, have determined that a major expansion is practical and possible at uhf. By adding a simple and inexpensive converter, owners of present TV sets can enjoy high quality reception from uhf as well as the vhf."

Enthusiast John Poole, Long Beach, Cal. (Vol. 6:21,27), this week asked FCC permission to conduct propagation tests from Mt. Wilson, using 15-kw beamed signal.

FCC is worried about transmission line losses in uhf. It has written manufacturers, asking for answer to this problem: For 1000-ft. tower, using some 1200 ft. of 3⅛-in. line, only 20% to 30% of power would get to antenna at 890 mc. A 6⅛-in. line would be more efficient, except that undesirable reflections, etc., might arise. Commission wants to know what can be done about it.

RCA is reported offering 10-kw transmitter (Type TTU-10A), plus 20-gain antenna and monitoring equipment, for $180,000. Delivery dates aren't indicated, but "late 1952" is considered likely.

That 1-kw uhf transmitter of GE's (Vol. 7:15), will cost $75-100,000, in-

cluding associated equipment, deliverable in about 18 months, the company says.

Federal Telephone & Radio points out that it produced first 1-kw unit for 490-mc, for CBS in 1946 and states it will have uhf transmitters "when required".

Federal also reports increased vhf activity, saying 2 of last year's new stations use its transmitters, that 2 more will be delivered within 60 days, that company has number of additional orders on hand.

Zenith unleashed another full-page ad in April 29 New York Herald Tribune, stating: "FCC Announces Plans For 10 TV Stations For New York City-Newark...3 in the New Ultra-High Frequency Channels! And Zenith Sets Need No Converter!"

* * * *

NPA hasn't set policy on materials availability for transmitters and towers, but its Electronics Division this week submitted plan to top echelon, making some provision for them (see p. 13). NPA climate appears favorable at this moment.

TV-radio station construction is no longer exempt from NPA building restrictions (Vol. 6:3,6). In move designed to save structural steel for defense and defense-supporting civilian programs, NPA May 4 amended M-4 order to require specific authorizations to build or make major alterations on TV-radio broadcasting buildings and newspaper plants. Larger apartment house and luxury home construction are major targets of new ruling.

FREEZE COMMENTS BEGIN, DELAY FEARED: Flood of TV allocation comments -- first wave -- broke on FCC this week when educators filed some 200 statements. Second wave -- from commercial stations and applicants -- will arrive on May 7 deadline. Some of latter, like strongly-worded petition filed this week (see below) may augur delays of various sorts, including even possible court action.

[Note: We'll summarize all the comments filed after they're all in.]

Among comments on allocation principles to come next week will be requests for: changes in height-power-interference ratios, correction of uhf terrain factor, lifting of 200-kw ceiling on uhf, changes in Gulf area channel spacings.

City-by-city comments will include the obvious -- opposition to educational reservations and channel-juggling to provide more vhf stations. A number are bound to say: "We're willing to take a reduction in power in exchange for slight reduction of 180-mile separation." Others will point out: "City-to-city, we're just under 180 miles, but transmitter-to-transmitter we're over 170-mile minimum."

DuMont is filing whole new allocation proposal, with prime objective of getting more channels where population density is greatest -- furthering network competition. It will stipulate new system of "priorities," claiming them to be more realistic than FCC's. DuMont claims FCC hasn't stuck to its own priorities.

DuMont is even using big electronic computer at MIT to evolve answers to complex allocation formulas, reports results so far are very encouraging.

It has also prepared elaborate map for hearing, with lights representing top 300 markets. Lights are actuated by punched cards, can show at a glance which channels are reserved, which are occupied, how each channel is allocated, etc.

DuMont plan reduces amount of vhf-uhf intermixing, but says survey of applicants indicates uhf will go ahead fairly well, even in intermixed areas.

* * * *

Vast majority of comments from schools -- large and small -- are almost identical. Actually, most merely filled out or followed a form, saying they commend FCC for reserving channels, hope to make use of them eventually although they have no plans now. And in cities where only uhf is reserved, they regret that vhf isn't set aside. A very few say they plan to apply for stations soon.

Joint Committee on Educational Television, formed to conduct campaign and aided by Ford Foundation money (Vol. 7:17), will again carry ball for educators when city-by-city hearings begin June 11. In its comments, it asks for (a) reservation of "flexibility" channels (see TV Allocation Report) where no others are available, (b) change in "priorities" to specify an educational service to all parts of U.S., (c) vhf reservation even in cities with fewer than 3 vhf channels, (d) a chance of

some sort at vhf channels in "closed cities" where all vhf are now occupied -- presumably at renewal time.

Educators and Comr. Hennock don't see eye to eye any longer on question of "percentage" reservation. Miss Hennock keeps plugging for 25% of all channels. Educators, JCET at least, have dropped talk of percentages, merely ask for "more".

Ford Foundation came across again, to tune of $260,000, for Iowa State College's WOI-TV -- though it's on FCC lists as a commercial outlet since it takes such programs from all networks. At week's end, Foundation granted $300,000 for "tape network" of National Assn. of Educational Broadcasters, to be administered by Lowell Institute, Boston. Institute itself has applied for FM, presumably will go for TV.

Sen. Benton took up cudgels again in May 3 closed-circuit address from New York to Columbus, Ohio, meeting of Institute for Education by Radio-TV. The Senator has been working closely with JCET, its counsel Telford Taylor (who recently joined board of Skiatron, promoter of Subscriber-Vision; Vol. 7:17), and Ford Foundation. He suggests that Congress might make "grants-in-aid" to support educational TV, that FCC put the bee on commercial stations for more "public service," that educators become "publicists and promoters and politicians."

Sen. Benton tells us he's reexamining his resolution (S.Res. 127, calling for 90-day Congressional study of educational question) to see whether it needs changing. He said Senators Johnson and McFarland have assured him hearing soon.

Percentage of time on commercial stations seems to be Sen. Benton's major motive now. Here's how he puts it: "I'd rather have one hour every night on NBC than an educational station in every state."

He also continues pitch for subscription TV -- a la Skiatron's Subscriber-Vision and Zenith's Phonevision -- thinks they'd contribute to education in addition to "providing healthy competition" to an "advertising-supported system."

In speech to the Ohio group, Comr. Hennock said she wants 500 channels reserved instead of 200, that "the obstacle of funds has been overrated."

New York's Rep. Emanuel Celler renewed lobbying for his bill (H.Res. 3542) to make commercial stations devote 25% of their time to "non-commercial, educational programs, sustained or sponsored." In letter to New York Times May 4, he again labels channel reservation idea "unworkable and undesirable."

* * * *

Spokesman for the radio broadcasters, many standing to be left out in cold in view of paucity of channels and educators' slice, Broadcasting Magazine was quite bitter in its editorial attack April 30 on Hennock scheme. It stated:

"In unvarnished words, this is a crusade for socialized TV...Our school systems are in dire financial need. Teachers are under-paid. New construction is needed. The entire program lags. Then how can prudent government, whether local, state or Federal, espouse TV stations involving an initial investment of half a million per entity plus annual operating overheads (deficits) to match?

"There must be a reason. It is the lust for power -- political power and perpetuation of politicians in office..."

Opposition from Sen. Johnson is indicated, for he said: "I doubt very much that any educational institution in Colorado will attempt to operate a TV station in the next 20 years. The cost is way beyond them. They're having a hard time keeping their doors open, let alone spending $1000 a day to operate a TV station. I can't speak for other states, but I certainly can for Colorado."

And some ostensibly well-heeled schools have approached lawyers with query: "Can't we become partially commercial somehow?"

* * * *

Filed this week was potentially significant document from WKMH, Dearborn, Mich. Station owner Fred Knorr stuck his neck out, cautioned FCC that its freeze-ending procedures appear to violate statutes and "invite court action" -- making possible more years of delay. At same time, petition said "no threat of court action" was intended, and it suggested method of lifting freeze "almost immediately."

Laws violated, according to petition (not an allocation comment) filed by

counsel Bingham, Collins, Porter & Kistler, include Sec. 4(b) of Administrative Procedures Act, Secs. 307(b) and (c) of Communications Act. Generally, petition contends that FCC hasn't given parties full opportunity to participate in rule-making; that Congress hasn't delegated authority to make channel reservations; that channel allocations must be guided by demand, rather than fixed allocation plan to be changed only by rule-making.

In lieu of present procedures, petition suggests that allocation plan be placed in engineering standards "as a guide." According to counsel, this could mean lifting of freeze within couple months. Otherwise, they fear, whole procedure is extremely vulnerable to tieup in courts anywhere along the way -- even after grants have been made. For example, a single court test of any of the 31 proposed channel shifts, they say, could throw whole allocation into litigation for 2-3 years.

Similar word of caution will be voiced by Federal Communications Bar Assn. in petition to be filed shortly (Vol. 7:17).

OLD ORDER MAY CHANGE IN FCC SHAKEUP: FCC underwent something of a revolution this week -- in move that didn't make newspaper headlines but can have enormous influence on its future actions.

It removed Harry Plotkin, assistant general counsel, from driver's seat on broadcasting matters, picked chief engineer Curtis Plummer to head newly established Broadcast Bureau which will have vast authority over aural and visual broadcasting.

Plotkin is widely regarded as prime architect of much Commission policy, the "master mind" behind recent moves arousing bitter controversy. He's a brilliant, persuasive, relentless advocate of greater and greater govt. control over industry.

FCC vote of 5-2 was harsh defeat for Chairman Coy, Plotkin's staunchest supporter. Only he and Comr. Hennock voted for Plotkin. Until month or so ago, it was considered virtually unthinkable that anybody else would get prize $11,200 job.

Hennock vote was surprise, for she's at constant odds with Coy (she's suspected of harboring ambition to be next chairman) and it was she who once gave Plotkin fiercest public tongue-lashing we've ever heard in FCC hearing room (Vol. 6:48), accusing him of underhandedly sabotaging her pet educational TV program.

* * * *

All isn't settled yet, since Plummer's second in command is still to be named. He may want Plotkin, since they've worked together for years. But FCC majority could reiterate what some lawyers styled "lack of confidence vote" by refusing to accept Plotkin, who has gained enmity of considerable proportion of FCC bar.

Future policy also may rest on choice of 5 division chiefs under Plummer. If they're "Plotkin men" -- and he has gathered devoted group around him -- his thinking is likely to be perpetuated to considerable degree.

Even Chairman Coy's future is drawn into speculation -- whether he can now hold majority of commissioners, as in past; whether he will seek renomination before term expires June 30. Despite number of unpopular actions he's supported, political consensus seems to be he can have job if he wants it.

Some think he wants to get out -- because he needs more money, because of sheer physical strain of fierce intra-FCC and extra-FCC struggles, huge work load.

"But Coy never runs from a fight," his friends say. Since Commission is always under attack, there's plenty to keep him going. Even this week, resolution to investigate Commission (H. Res. 214) was introduced by Rep. Bernard W. Kearney, Republican, of Gloversville, N.Y. He's member of Un-American Activities Committee, says he has reason to suspect group within FCC of pro-Communist leanings -- an old story not likely to stand up, probably stemming from Lawyers Guild members on staff.

* * * *

What kind of broadcast boss Plummer will be, only time will tell. Up to color decision, he had firmest kind of support from industry as well as Commission. It's not known how much he contributed to decision itself, notably its ill-starred bracket-standards gimmick (Vol. 6:35, et seq) -- but he's held responsible.

Credit for highly-commended engineering aspects of TV allocation plan must

be placed on his shoulders, as should his sound record as chief of TV engineering. It's uncertain who will get chief engineership, but appointment is expected from within. Principal contenders seem to be Edward W. Allen, technical information chief; Edward W. Chapin, lab chief; George S. Turner, asst. chief engineer for field services and monitoring; James E. Barr, chief of AM broadcasting.

* * * *

Broadcast Bureau plan is effective June 4, part of program of functional reorganization. Other two bureaus are Common Carrier and Safety & Special Services. Most TV-AM-FM jobs are taken away from general counsel, chief engineer and chief accountant, put under head of Broadcast Bureau. In bureau will be 5 divisions, each to have chief: Aural Facilities (AM-FM), Television Facilities, Renewal & Transfer, Hearing, Rules & Standards. Race is now on to see who gets coveted jobs. Plummer says he hasn't decided; in past, chief's preferences have carried great weight.

INDUSTRY AGREED ON COLOR SYSTEM: Color fight is warming up again, as everybody stands by each Monday awaiting Supreme Court decision.

This week, Ad Hoc color subcommittee of National Television System Committee (Vol. 7:1), top-level all-industry group whose counsel FCC followed in setting up monochrome standards, has completed its work, reported to whole NTSC.

Results are now undergoing field testing, and NTSC members are so hot about them that they say Court's decision will have little bearing on accelerated efforts to perfect compatible system, place it before FCC.

Details are being withheld, but among new developments is an "oscillating color sequence" -- said to reduce susceptibility to interference by 6-8 db, produce steadier color, move color carrier up to 4 mc, make system "even more compatible."

This apparently is what New York Times' Jack Gould saw on his home set May 2, leading him to write front-page story May 3 which reported reception of picture "superior to the monochrome images normally seen."

RCA had begun off-hour experimental transmissions, which will continue. It's plain now that RCA's plans, once Court decision is rendered, embrace public demonstrations, sponsor-product shows, networking, remote pickups.

Philco and DuMont are also conducting field tests, while all other NTSC members are being urged to build color sets to test available signals. Hazeltine continues its color classes, is starting fourth 2-week course of 20 engineers each.

CBS plans Denver closed-circuit public showings of its system. It's Sen. Johnson's home state, and affiliate KLZ is cooperating in May 14-18 demonstrations. RCA picked next-biggest non-TV city, Portland, Ore., gave it first taste of TV this week with black-and-white demonstrations in cooperation with U of Portland.

KINE-RECORDINGS BIG FACTOR IN TV: Much of the future of TV programming depends on kinescope recordings -- otherwise called kines, TV-recordings, tele-transcriptions.

Despite early thinking that they would lose their importance as networks expanded and more films were produced for TV (to say nothing of release of feature films from big producers' vaults; see Vol. 7:13,16), it's increasingly apparent that off-the-camera films of TV shows will gain added importance with time.

Consensus of experts at May 1 session of Society of Motion Picture & TV Engineers in New York this week seemed to be that, despite their present deficiencies, kines will be answer to (1) high cost of intercity coaxial and/or microwave hookups; (2) programming of independent or non-interconnected TV stations; (3) delayed programming, where station time cannot be immediately cleared; (4) such complications as daylight saving time, time zones, etc.; (5) auditions and records.

Thus kines will serve same purpose -- possibly on bigger scale -- as radio transcriptions, now an enormous factor in broadcasting and capable of quality every whit as good as live shows.

Even today, it was noted, top TV shows are being kine-recorded, shipped to our troops overseas for showings in their cinema setups. Among the more noteworthy developments reported at SMPTE meetings were these:

(1) Some 3,000,000 ft. of 16mm film per week are already being processed by

TV networks, based on 120 hours of original negative. That's equivalent of 60 two-hour films per week. This year, networks will make 40,000 prints, each to be shown at least twice. This information came from CBS's Howard Chinn, NBC's Frank Lapore.

(2) Kine-recordings for military training films were described by Navy's Lt. Comr. J. S. Laffin, who said, "Pictorial quality, while not up to motion picture standards, is acceptable for most types of subject matter...Pictures look better than a purely mathematical analysis of resolution would indicate."

(3) How kine recordings might be used to make Hollywood movies, with consequent savings in production costs, was described by G. R. Stevens, of Television Film Productions Ltd., London. He told of British experiments whereby TV camera chain, instead of film camera, is used to "shoot" a scene, with best shots recorded on film off face of monitor tube. This permits director to edit scenes before they are recorded on film, thus eliminating repeated film shots, lengthy editing processes. Idea presupposes that kine recordings will be of same quality as today's motion picture films. Similar experiments are being conducted in Hollywood.

Personal Notes: Jack P. Blume, FCC examiner, resigned May 1 to join law firm headed by former FCC chairman James Lawrence Fly, heading newly-opened Washington offices at 1028 Connecticut Ave. (headquarters are New York). Firm will henceforth be known as Fly, Shuebruk & Blume. Blume was examiner in San Francisco and Detroit TV hearings (no decision rendered due to freeze) and in Paramount-DuMont case . . . Rodney Chipp, DuMont Network engineering director, leaves May 18 on business-vacation flying trip to Europe, accompanied by Mrs. Chipp, who is also an engineer; she's v.p. and chief engineer of Newark Controls . . . Theodore C. Streibert, president of WOR & WOR-TV, left May 1 for Tel Aviv, Israel, on inaugural flight of new El Al Israel Airlines, returning May 22; he was subject of sketch April 30 in "Business & Finance Leaders" column in *New York Herald Tribune* . . . Robert N. Wold, ex-Knox Reeves Adv., named promotion mgr., WTCN & WTCN-TV, Minneapolis . . . James Kilian promoted to asst. program mgr., WAAM, Baltimore . . . Jack Barlass, ex-Meredith Publishing Co., named executive v.p., Princeton Film Center . . . Paul Monroe named executive director of TV-radio production, Theodore Gannon director of program development, Wm. H. Weintraub & Co. . . . Irvin B. Levin new head of TV-radio dept., Degner & Associates, L. A. . . . Tom Wright, ex-BBDO, joins Dundes & Frank Inc. as TV-radio director . . . Robert Gillham, TV-commercial film v.p., J. Walter Thompson Co., has resigned to join Cunningham & Walsh . . . Florence Smith, ex-H. B. Humphrey Agency, appointed TV-radio timebuyer for Hewitt, Ogilvy, Benson & Mather, N. Y. . . . Howard Chernoff, ex-West Virginia Network, named mgr. of KFMB & KFMB-TV, acquired by purchase by John Kennedy interests (Vol. 7:17) . . . Edward L. Sellers, director of FM dept. of NARTB, resigns May 1 to join Carl Byoir & Associates, public relations counsel (for RCA, among others) . . . Leroy Bremmer, WABD engineer, has applied for 250-watt AM station on 1490 kc in Atlantic City . . . Wm. Doty Edouarde, ex-KFWB, appointed NBC spot sales rep for So. California, succeeding Robert E. Howard, resigned.

Station Accounts: Union Pacific Railroad buys *Singing Rails* on KTSL, Sun. 7-7:30, and *Polyzoides*, political columnist, on KTTV, Wed. 8-8:15, thru Caples Co. . . . Banks were first to buy *March of Time Through the Years* in 28 cities (Vol. 7:7, 11), but Ohio Standard Oil Co. has taken it on stations in Cincinnati, Columbus, Dayton, Toledo . . . McLevy Dance Studios and Slenderizing Salons sponsoring *Video Venus*, new beauty-talent search show starting May 11 on WJZ-TV, Fri. 10:30-11, thru Associated Adv. Service . . . Elgin American Division, Illinois Watch Case Co., buys heavy schedules of pre-Mother's Day (May 13) TV spots, thru Russel M. Seeds, Chicago . . . Cribben & Sexton Co. (Universal gas ranges) sponsoring *Sally Smart's Blue Flame Gas Kitchen* on WOR-TV, Wed. 11:30-noon, kinescopes to be syndicated by Paramount Television Productions . . . Among other advertisers reported using or preparing to use TV: Pan American-Grace Airways Inc., thru J. Walter Thompson, N. Y. (WABD); Personal Products Corp. (Co-ets facial tissue), thru Young & Rubicam, N. Y. (WABD); Vitrex Co. (reducing plan), thru Courtland D. Ferguson Inc., N. Y. (WABD); Olson Co. Inc. (roofing materials), thru E. T. Howard Co., N. Y. (WABD); Nestle Co. Inc. (Nes-Tea), thru Needham & Grohmann, N. Y. (WABD); Bardahl Oil Co. (lubricants), thru Harold Kirsch Co., St. Louis (WDTV); C. H. Musselman Co. (apple products), thru Clements Co., Philadelphia (WBAL-TV).

Network Accounts: Brown Shoe Co. (Buster Brown Shoes) moving *Smilin' Ed McConnell Show* from NBC-TV alt. Sat. 6:30-7 to CBS-TV every Sat. 11:30-noon, starting Aug. 11, thru Leo Burnett Co., Chicago . . . Nash-Kelvinator, starting June 9, takes over full sponsorship of *Paul Whiteman TV Teen Club* on ABC-TV, Sat. 8-9, thru Geyer, Newell & Ganger; American Dairy Assn. dropping 8-8:30 segment. Nash-Kelvinator reported dropping *Star of the Family* (Morton Downey) on CBS-TV Fri. 10-10:30 . . . Gillette sponsoring kine of *Kentucky Derby* on CBS-TV from WHIO-TV, Dayton, evening of May 5, 9:45-10 p.m.; Gillette will also sponsor *Preakness* from Baltimore on CBS-TV May 19, 5-5:30, thru Maxon Inc. . . . Pabst slated to sponsor Ezzard Charles-Joey Maxim championship fight from Chicago May 30 on CBS-TV, 10 p.m., thru Warwick & Legler . . . Anchor-Hocking Glass Corp. dropping Mon. & Wed. but continuing Tue.-Thu.-Fri. sponsorship of *Broadway Open House* on NBC-TV, 11-midnight, with Jack E. Leonard replacing Jerry Lester, thru Wm. H. Weintraub & Co. . . . Procter & Gamble replacing *Fireside Theatre* with *Cameo Theatre* on NBC-TV from July 3, Tue. 9-9:30, thru Compton Adv. . . . Lucky Strike replacing *Your Hit Parade* on NBC-TV with unnamed program starting July 14, Sat. 10:30-11, thru BBDO . . . Philip Morris reported to have signed for *I Love Lucy*, new comedy series on CBS-TV to start in fall with Lucille Ball and Desi Arnez, thru Biow Co. . . . Next *Jack Benny Show* on CBS-TV will be May 20, sponsored by Lucky Strike, Sun. 7:30-8, in lieu of *This Is Show Business*.

Don Fink, editor of *Electronics Magazine*, will be U. S. spokesman at TV sessions of CCIR conference June 5-July 6 in Geneva, Switzerland. Conference is expected to vote regional TV standards on world-wide basis so they can be recommended at 1952 world telecommunications sessions in Buenos Aires.

Financial & Trade Notes: DuMont earned net income of $6,900,788 ($2.87 per common share) after provision of $6,300,000 for taxes on gross income of $76,362,565, according to 1950 annual report released this week. This compares with $3,269,880 net ($1.49) after $2,250,000 taxes on $45,267,089 gross in 1949 and $2,701,767 net ($1.29) on $26,934,239 gross in 1948. Report does not break down factory and network operations, but does reveal 78% increase in TV receiver output, 250% increase in units with higher margin of profit on CR tube production, increase of distributors to 34 covering 52 TV markets. Total current assets at end of 1950 were $31,087,710 vs. $15,481,032 at end of 1949, liabilities $14,134,480 vs. $7,260,662. Working capital was $16,953,230 vs. $8,220,370. (For network estimate, see Telecasting Notes.)

Best first quarter in its 31 years was reported by RCA, with sales of $185,590,755, net profit of $11,901,542 (75¢ on 13,881,016 common shares) after taxes of $15,842,000 for 3 months ending March 31. This compares with $127,369,550 sales, $11,236,231 (75¢) net profit, $7,709,000 taxes in first quarter 1950 (Vol. 6:18). Company's business volume is 4½ times what it was 10 years ago, chairman Sarnoff told stockholders at annual meeting in NBC's TV studio 8H May 1, with TV biggest factor in new sales record. He also said military orders recently "reached a volume that required conversion of some of our commercial production facilities to manufacture of equipment to national defense." Stockholders overwhelmingly approved hotly-contested proposal to grant purchase options on 100,000 shares of stock to Gen. Sarnoff and 50,000 to president Frank M. Folsom.

Philco annual meeting of stockholders will be held May 18 in Philadelphia, proxy statement disclosing these directors to be elected, their present stockholdings (in parentheses) and their 1950 compensation if active in management: Wm. Balderston, president (7188 shares), $75,000 salary and $118,750 bonus; James T. Buckley, chairman (21,966), $37,500 & $59,375; Harold W. Butler, v.p. (11,245), $30,000 & $52,250; James H. Carmine, executive v.p. (31,225), $60,000 & $95,000; Wm. H. Chaffee, v.p. (901), $22,083 & $26,600; Charles S. Cheston, director (237); Joseph H. Gillies, v.p. (9437), $32,500 & $59,850; Larry E. Gubb, director (28,973), $30,000; Larry F. Hardy, v.p. (7809), $37,500 & $71,250; Russell L. Heberling, v.p. (24,087); Robert F. Herr, v.p. (27,578), $22,083 & $42,750; Thomas A. Kennelly, v.p. (25,474), $35,000 & $71,250; Wm. Fulton Kurtz, director (200); John M. Otter, v.p. (7312), $40,000 & $57,000; Courtnay Pitt, v.p. (1270), $25,625 & $35,625; David B. Smith, v.p. (3273), $35,000 & $19,000; Leslie J. Woods, v.p. (9905), $40,000 & $66,500.

Dividends: International Resistance Co., 10¢ payable June 1 to holders of record May 15; CBS, 40¢ payable June 1 to holders May 18; Avco, 15¢ payable June 20 to holders of record June 1; Blaw-Knox, 25¢ payable June 12 to holders May 14; Telecoin Corp., 5¢ payable May 15 to holders May 5; Television Electronics Fund, 15¢ payable May 29 to holders May 15.

Motorola's first quarter report, released May 4, shows record sales of $46,659,847, earnings before taxes $6,782,105, net income $2,572,718 ($2.93 per share). This compares with $35,846,974 sales, $4,720,775 earnings before taxes, $2,825,966 ($3.21) net income for same 1950 period.

Wilcox-Gay Corp. (Majestic) reports net earnings of $355,787 for first quarter on sales of $3,707,658. This compares with net loss of $227,223 on sales of $1,220,560 for same 1950 period. (For 1950 report, see Vol. 7:13.)

Collins Radio reports sales of $5,853,000, net profit of $132,161, for 6 months to Jan. 31 vs. $5,551,000 sales and $145,243 profit for 6 months ended Jan. 31, 1950.

TV is "superb" as means of public education, Kefauver Crime Investigating Committee said in its widely-publicized May 1 report summing up hearings on organized gambling and racketeering.

Senate Committee gave telecasters "major part of the credit" for impact of recent hearings on public, credited telecasts with "salutary effect in awakening the public to the menace of organized racketeering that now confronts our national life."

But report points up new problems raised by televising of legislative processes—including possible invasion of privacy—and urges "code of Congressional procedure . . . to insure the continuing dignity and maximum effectiveness of legislative proceedings which might be televised as well as to preserve the constitutional rights of citizens."

With memory of Kefauver telecasts still in sharp focus, Gallup Poll released April 27 shows 70% of voters think it would be good idea to telecast sessions of Congress, 16% said poor idea, 5% fair, 9% no opinion. Despite possibility of dull and long-winded speeches, 78% said they thought such telecasts would be interesting, 14% said no, 8% no opinion.

Rep. Jacob K. Javits (R-N. Y.) May 2 inaugurated discharge petition in attempt to get House action on his H. Res. 62—pigeonholed by Rules Committee—to provide for telecasting and broadcasting important House debates.

———■———

National Union Radio Corp. sales volume was $5,021,822, profit after taxes $448,443 in first quarter 1951 which compares with $2,485,746 sales and $186,182 net earnings for same 1950 quarter. CR and radio tube sales accounted for favorable report, company reported to stockholders May 1, but CR production at Hatboro (N. J.) plant has been curtailed due to decline in TV buying. "It is expected," report states, "that towards the end of the second quarter there will be a favorable upturn, with demand for CR tubes continuing to increase into the early fall." Meanwhile, construction will not be delayed on new 140,000-sq. ft. plant at Rhwan & Dugan Sts., Philadelphia, costing $5,000,000, to be devoted to miniature and subminiature tube production.

National Union's recent annual report for 1950 (Vol. 7:14), showing record sales and earnings (Vol. 7:14), was accompanied by proxy statement disclosing C. Russell Feldman, chairman, as owner of 232,000 shares (entire issue) of preferred stock, no common, with director Harry E. Collins, senior partner in Collins, Norton & Co., investments, owning 219,000 shares of common, Mrs. Collins 80,500, and president Kenneth C. Meinken 35,900 out of 1,375,766 shares outstanding. Mr. Meinken's 1950 salary is given as $40,000, bonus $10,000.

* * * *

Standard Coil Products Co. reports consolidated net sales of $12,756,856 for quarter ended May 31, net profit of $1,123,539 after provision of $995,646 for estimated Federal income taxes. This is equal to 76¢ per share on 1,470,000 outstanding shares of common. Report includes figures for Kollsman Instrument Co., purchased Jan. 1, 1951, big govt. contractor for optical products. Standard's recent 1950 report (Vol. 7:12) showed net profits of $5,266,442 on sales of $35,632,396.

Color performance of Eidophor theatre TV system (Vol. 7:7), specified in 20th Century-Fox's agreement with Institute of Technical Research in Zurich, should be "not substantially less good than existing motion pictures in Technicolor." According to 20th Century's annual report, prototype of such color equipment is to be delivered in 18 months. Big movie firm has exclusive license on system.

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
May 5, 1951

NEW LOW IN TV OUTPUT, RADIO HOLDS UP: TV production nose-dived fourth week in April (ending April 27), dropping to 83,516, of which 6720 were private label. Inventories at factory stayed high -- 403,642 vs. 433,930 at end of preceding week (Vol. 7:17). Week's output was lowest since beginning of 1950, save for two July vacation weeks.

Output drops began in mid-March, accelerated through April (Vol. 7:13-17) when first week showed 140,964, second week 133,576, third 122,489 -- so that month's RTMA total is 480,545, lowest since last July's 330,377. They compare with 874,634 in March (5 weeks), 679,319 in February, 645,716 in January (revised RTMA figures). Further drops are expected.

Radio output for fourth April week held up reasonably well, totaled 313,348 -- as against 349,767, 361,652 & 332,463 preceding April weeks (Vol. 7:16-17). Month's total thus was 1,357,830 vs. 1,737,141 in March, 1,325,450 in February, 1,235,114 in January. Fourth April week's radio breakdown: home radios 138,241, auto 130,717, portable 44,390.

PLANS AND PURPOSES OF THE SET MAKERS: RCA and GE committed themselves definitely this week to hold their TV price lines -- RCA until Aug. 1, GE until Sept. 10. In addition, RCA assured distributors it will introduce no new models before Aug. 1.

This seems to contravene downward trend indicated by current trade lull and Emerson's deep price slashes ordered as of May 1 (see Topics & Trends).

Fact is that, despite discouraging apathy of today's retail market, despite huge inventories forcing what look like distress sales and intercity dumping, despite factory curtailments, a sort of quiet optimism appears to have settled over many manufacturers in contemplating future prospects.

It will be surprising if Admiral, Motorola and Philco, who with RCA form industry's Big Four, will offer new models by usual time of Chicago Furniture Mart, June 18-28. Nor will many other name brand producers, so far as we can learn.

If some do come out with new models next few months, and do any appreciable promoting, the big fellows figure that such promotion will build store traffic on which present models can ride. New "1952" gimmicks, whether furniture or gadgets, aren't likely to obsolete current lines, is general belief.

Talk about uhf is seen adding to confusion, helping no one sell sets now or until such stations are actually on the air -- still long time away. Color, even if Supreme Court should uphold FCC choice of CBS system, isn't regarded likely to do more than create still more confusion in buyers' minds -- since colorcasting isn't going to be done on any big scale for long time and industry forces opposed to CBS system will renew pitch to FCC and public with better, compatible system.

Impulse of the manufacturers now is to underproduce, particularly higher-priced sets. Laid off workers are protesting loudest now, their unions among the foremost urging more haste in lifting freeze and easing of Regulation W (Vol. 7:16).

* * * *

RCA called its decision "a positive move to stabilize the dealers' investment in [our] inventories in the face of the current slump...to bolster dealer confidence in the long-range stability of the TV market." Consumer v.p. Joe Elliott promised to continue advertising of current models at present lists, urged dealers to "go out and sell TV" and reiterated conviction that materials shortages will limit his company's TV production during second half of year.

Mr. Elliott told Pacific Coast NEDA, later in week: "In regard to the production of TV sets, hard times are ahead...A stock of TV receivers today is money in the bank tomorrow." He warned dealers who dump inventories that they will be "making a mistake they will seriously regret." Said he: "Employment is high, there is plenty of money in circulation, consumer demand is certain to pick up...opportunities are unlimited for the capable business man who can and will plan, sell and work."

GE's receiver sales chief Arthur A. Brandt stated price-holding policy was formally adopted because "price uncertainties in a few lines are creating a depressing effect on all segments of the industry." Purpose is not only to stabilize the market but protect distributors and dealers, he stated, and he predicted:

"Despite the fact that TV sets are in plentiful supply at this time, curtailed production will catch up with the industry later in the year when the full impact of material restrictions is felt by manufacturers."

* * * *

DuMont sales chief Walter Stickel told Buffalo group April 29 that defense limitation orders must inevitably cut TV production -- forecast best rate of output rest of this year would not exceed 60% or 65% of 1950's fourth quarter peak rate. By sheer coincidence, his line of reasoning seemed to follow closely that of Philco's Jack Otter and other Philco executives in recent trade talks: shortages are coming, current slump is no reason for panic and in many respects seasonal, talk of "saturated markets" comes only from "weak sisters" among field men and dealers, period of stress affords chance "to separate the men from the boys."

Dr. DuMont says his plant is now producing "no more sets than we can sell."

Admiral's Ross Siragusa sees pickup by end of third quarter. Motorola's Robert Galvin said production is now down about 35%, thought third quarter may revert to first quarter's pace. Olympic's Percy Schoenen wasn't quite that optimistic, thought third quarter will continue low but fourth should be better even than fourth quarter 1950; he feels time will alleviate current condition, also is convinced that shortages impend and plans no new models in June or July.

Tele-tone's Morton Schwartz attributes current troubles to overexpansion of plants, thinks next big sales push should be second sets in homes. Another manufacturer said he would have color sets coming off lines in September if Supreme Court renders decision before June favoring CBS system.

* * * *

To dealers, NARDA v.p. H. B. Price Jr., head of Price's Inc., Norfolk, offered this advice at appliance dealer confab in Wilmington May 2: "Stop buying. Don't buy until you need merchandise for sales -- not anticipated sales." He urged lowered sights on volume, advised:

"It is reasonable to expect a shortage of certain models of popular brands, but don't stock up planning another killing; take smaller volume and sleep nights." He even had good word for manufacturers: "Their only sin was aggressive selling."

Trade Personals: Edward F. Harbison, recently chief of guided missiles plans, Air Materiel Command, Wright Field, Dayton, appointed mgr. of new Pacific Coast office for Philco's Govt. & Industrial Division, located at 260 S. Beverly Drive, Beverly Hills, Cal. . . . John Ward Dawson, ex-Stanford Research Institute, named chief engineer of Electronics Div., Sylvania . . . George O. Smith, well known as science-fiction writer, during last war writer of manuals for National Defense Research Council, named by Emerson as mgr. of components engineering . . . Anthony Dillon, recently with Olsen & Co., Philadelphia DuMont distributor, has rejoined Air King as field sales mgr. . . . B. G. Hickman, TV-radio service mgr., promoted to asst. sales mgr., Sparks-Withington.

Largest theatre-TV purchase yet was announced this week by United Paramount Theatres, which ordered 22 systems for installation by fall. RCA got 20 orders, and Paramount Pictures (which uses intermediate-film equipment) got 2. Theatres into which installations are going will be mainly in Midwest. This will bring to 27 number of UPT houses with large-screen installations; present ones being New York Paramount, Chicago State-Lake and Tivoli, Detroit Michigan, Minneapolis Radio City. It will bring to more than 40 number of theatre-TV installations throughout country.

Plant Expansions: Webster-Chicago considering new office-plant building sites in Chicago area, but won't move right away; executive v.p. C. P. Cushway told stockholders meeting May 1 that company currently has $2,000,000 in war contracts . . . Wilcox-Gay has leased 85,000 sq. ft. factory in Burbank, Cal., to produce TVs, radios, recording products, etc. . . . Tracerlab Inc., Boston, nucleonic instruments, has leased 20,000 ft. of manufacturing space for assembly of electronic equipment . . . Lewyt Corp., Brooklyn, plans new $3,800,000 plant in Nassau County, Long Island, for military electronic production, covering about 250,000 sq. ft., employing 2000 . . . GE will triple Syracuse electronics laboratory, May 4 announcement stating new 2-story wing to start this month will increase space from 33,000 to 101,000 sq. ft.

National TV-radio set and station ads last year brought $22,760,000 in revenue to newspapers, 78.4% increase over $12,756,000 in 1949, acocrding to ANPA report. This included: set advertising $16,507,000, up 98.9% from $8,300,000 in 1949; station ads $6,097,000, up 39.4% from $4,373,000; miscellaneous $156,000, up 88% from $83,000. TV-radio set advertising showed biggest increase of any category on publishers' list. Total national newspaper advertising amounted to $499,019,000 in 1950, up 12.1% from $445,015,000 in 1949.

Topics & Trends of TV Trade: Philadelphia may or may not be indicative of national trend, but its first quarter TV sales figures, as released by Electrical Assn., are quite eloquent. They show total of 79,907 sets sold first 3 months of this year for retail dollar volume of $27,992,605. This compares with 93,188 for $26,992,605 in same period last year, the dollar volume holding up because 1951 average price per unit was $350 vs. $279 in 1950. During all 1950, total TV sales in Philadelphia area were 364,233 units as against 220,366 in 1949 and 82,606 in 1948.

Seventeen brands of receivers are covered in Philadelphia report, which showed 34,329 sold in January (up 43% from the 23,970 for same month last year); 25,151 in February (down 15% from 29,688); 20,427 in March (down 49% from 39,530). Apparently, the recession in sales volume began in February.

Chicago Electric Assn. reports TV sales there fell to 18,176 in March, only slightly more than half preceding month. Washington's downward trend is indicated by estimates that sales fell from 14,150 in January to 10,350 in February, 9500 in March, 8540 in April.

* * * *

Machinery price order (CPR-30), issued by Office of Price Stabilization May 3, is practically identical with manufacturers' price order issued last week (Vol. 7:17), covers TV-radio transmitters, studio equipment, all electronic parts. OPS is expected, however, to divide controls on electronic parts to bring those primarily used in TV-radio under manufacturers' regulation.

RTMA production figures for first 1951 quarter, revised by its statisticians, indicate 645,716 TVs turned out by industry as whole in January, 679,319 in February, 874,634 in March—total of 2,199,669, as against the 2,196,016 we reported on basis of tallying first 13 weeks' reports (Vol. 7:14). Radio total is given as 4,235,669, of which 2,603,532 were home radios, 1,329,875 auto, 302,190 portable. The TV total compares with 1,605,200 for same 1950 quarter, radio with 3,343,600 for same 1950 quarter.

Casualty of current trade slump was revealed this week with announcement that small private-label set and components maker S. M. A. Co., Chicago, had been sold to investment banker Samuel C. Rudolph, 640 Madison Ave., New York, who paid $173,000 for assets and inventory. Chester Lytle continues as president. TV production, half company's business, is down to 60% of first quarter, which ran at rate of 20,000 sets a year. Heavy inventories, lull in TV sales, lack of military orders were given as reasons for sale.

RTMA annual meeting will be June 4-7 in Chicago's Stevens Hotel, not dates previously reported erroneously; RTMA board May 8 will be host to new president, Glen McDaniel, at reception in Carlton Hotel, Washington. Other upcoming meetings include May 21-23 Parts Distributor Show in Hotel Stevens, Chicago, to be addressed by Indiana Steel's A. D. Plamondon Jr., RTMA chairman Robert C. Sprague, Sylvania's Frank W. Mansfield.

March excise tax collections on TV-radio sets, components, phonos reached new high of $23,390,352, more than double $11,349,880 collected in February (Vol. 7:13), considerably more than $19,439,774 in January (Vol. 7:10). Total excises collected from TV-radio industry for 9 months from July 1950 were $82,881,327, compared to previous 9 months' $29,474,108.

"Rediscovery" of the 14-in. tube is reflected in RTMA members' picture tube sales for March. Although 91% of 608,396 total were 16-in. and up, 6% were 14-in., compared with 3½% in February. At same time, 24-in. and 30-in. rose from 1483 to 2324. Total sold for $16,064,425, compared with February's 634,080 at $17,555,375 (Vol. 7:14).

Emerson cut prices $15 to $145 on full 22-model line as of May 1, distributors being rebated on all purchases of last 30 days and instructed to rebate dealers on same terms. Prices are lowest yet offered by Emerson, but schedule was to be effective "no longer than 60 days," according to president Ben Abrams. New prices do not include excise tax or warranty, lumped extra, which had been included in old prices. Hence, down payment under Regulation W should be within reach of average purchaser, said Mr. Abrams. Move was dictated by oversupply, he admitted, estimating industry inventory is about 2,000,000 sets and Emerson production is now down to 60% of first quarter. These are new Emerson prices, not including excise or warranty (old prices, including tax-warranty, are in parentheses):

Table models—14-in., Model 662, plastic walnut $149.95 ($179.95). 17-in., 676, mahogany, $199.95 ($299.95); blonde, $209.95 ($309.95); 680, mahogany, better cabinet, $219.95 ($299.95); 696, mahogany, deluxe cabinet, $219.95 ($299.95).

Consoles—17-in., Model 686, mahogany, $249.95 ($349.95); blonde, $259.95 ($359.95); 681 & 687, mahogany, doors, $279.95 ($379.95); blonde $299.95 ($399.95). 19-in., 688, mahogany, $269.95 ($439.95); 689, mahogany, half doors, $299.95 ($459.95); blonde, $319.95 ($479.95); 690, mahogany, full doors, $319.95 ($479.95); blonde, $349.95 ($509.95). 20-in., 692, mahogany, $359.95 ($459.95); 693, mahogany, half doors, $379.95 ($479.95); blonde, $399.95 ($499.95); 694, mahogany, full doors, $399.95 ($499.95); blonde, $429.95 ($529.95).

Combinations—16-in., 666, mahogany, AM-FM-phono, $399.95 ($499.95).

* * * *

Trade Miscellany: Federal Reserve Bank of New York reports dollar value of TV inventories held by dept. stores in Second Federal Reserve district as of March 31 was 446% ahead of same date 1950 . . . Herald Tribune April survey of N. Y. dept. stores showed 5 went ahead of April year ago in TV-radio sales "as a result of heavy promotional effort," showing gains up to 65%; but 6 stores showed declines ranging from 6% to 74% . . . Newspaper advertising of TVs in 49 cities totaled 10,766 standard-sized newspaper pages first quarter 1951, reports Advertising Checking Bureau, about 77% placed by local dealers; total was nearly same as same period 1950 . . . Latest RCA Antenaplex installation is in 261-suite "100 Memorial Drive" apartment house, Cambridge, Mass., owned by New England Mutual Life . . . Reeves Soundcraft Corp. has purchased Bergen Wire Rope Co., Lodi, N. J., maker of specialty wire . . . Sylvania has released new vest pocket *TV Tube Selector*, listing more than 100 picture tube types, indexed as to sizes, shapes, metal or glass, coating, etc.

Price Miscellany: Kaye-Halbert lists 20-in. walnut table at $239.95, mahogany $259.95, blonde $279.95 . . . International Television Corp. this week advertised 17-in. mahogany table at $199.95 . . . Pathe cut 20-in. console from $399.50 to $249.50, with doors from $449.50 to $269.50; these are in addition to 12 & 17-in. price cuts reported last week (Vol. 7:17).

"Selective" mobile communications system for cabs, trucks, etc. was announced by GE this week. It permits headquarters to talk to each car individually, all others excluded from conversation.

Avco has purchased all stock of Horn Mfg. Co., Ft. Dodge, Ia., manufacturer of hydraulic loader attachments for tractors, stalk shredders, wagon boxes; will operate it under Horn name as wholly owned subsidiary.

British Marconi, beating U. S. competition, has sold 3 camera chains to UN for program originations from New York headquarters.

Television Digest WITH AM-FM REPORTS

Mobilization Report
May 5, 1951

READYING FOR CMP, LISTS & FORMS OUT: Govt. set machinery in motion this week for trial run of its production-regulating Controlled Materials Plan (Vol. 7:15).

If you're a manufacturer, in next few days you'll probably receive NPA's official "Class B" product list together with CMP Regulations 1 & 3 and Application Form CMP-4B for third quarter allotment of steel, copper and aluminum. If you don't receive this material, it's important to get it as soon as possible from Commerce Dept. field office, local Chamber of Commerce, or by writing NPA.

There'll be plenty of paper work, plenty of red tape, plenty of mistakes -- both by you and by Govt. But production officials don't expect plan to run smoothly until first quarter 1952. And they pledge to rectify mistakes as rapidly as possible during this trial period.

Class B list, issued May 3 by NPA, contains more than 4000 manufactured articles containing the 3 controlled materials -- steel, copper, aluminum. Class B products are common industrial components and other general purpose items. Allotments of the 3 metals for these products will be received directly from NPA.

Complete Class A list won't be made public -- but if your product is a military item and it's not on B list, you can assume it's an A item. Special purpose products built to order for military agencies are in Class A. Some electronic items -- military type radar, for example -- will be on list A, others more closely related to civilian products are on B list.

Class A producers will receive production authorizations and material allotments from their customers, and pass allotments down to their suppliers. Allotments of controlled materials for Class B items will be made by NPA industry divisions, after DPA makes general decisions on how nation's materials supply is to be divided. Allotment of steel to radio transmitter manufacturer, for example, will come from NPA Electronics Div.

If your product is on Class B list, you must state your third quarter requirements for steel, copper and aluminum, along with proposed production schedules, on form CMP-4B and file form with NPA by May 31. It will go to industry division assigned to your product. When you receive, from your industry division, your third quarter CMP allocations, they will generally be accompanied by priorities to obtain other needed materials (nickel, cobalt, mica, etc.).

You needn't file CMP-4B if your quarterly requirements don't exceed 5 tons of carbon steel, 1000 lb. of alloy steel, 500 lb. of copper and copper-base alloy, 500 lb. of aluminum -- or if you manufacture consumer durables exclusively.

* * * *

Consumer durables won't be covered by CMP, during third quarter at least. But their repair parts and components will. If you're a durable goods manufacturer and you make some of your own repair and replacement parts, you should file a CMP-4B to get materials for these parts only. But no consumer durable maker is permitted to apply for allotment of metal to make the product itself.

These electronic and related consumer goods won't come under CMP: All household-type TVs, radios, phonos, record players, combinations, auto and portable radios, radio receiver chassis, phono needles and cutting styli. CMP allocations for repair parts for these items will be handled by Electronics Div.

* * * *

These electronic products which come under CMP are assigned to Electronics Div. for allotment of controlled materials: Amplifiers & public address systems; recorders, recording wire & tape; TV, AM & FM broadcast transmitters & studio equipment; communications transmitters, receivers & transceivers; civilian radar; oscilloscopes & oscillographs.

Nearly all electronic components, including transmitting, receiving, indus-

trial and cathode ray tubes, as well as all TV-radio parts, will come under Electronics Div. for CMP allocations.

Electronic and related items covered by CMP but assigned to divisions other than Electronics Div. for materials allotments:

Scientific & Technical Equipment Div. -- Broadcast monitoring, transmitter test, other electronic test equipment; X-ray tubes, equipment & components.

Electrical Equipment Div. -- Specialty, power & distribution transformers & parts (except those used in radio); motors & generators; industrial electrical control apparatus; industrial capacitors; non-communications rectifiers.

Communications Equipment Div. -- Microwave relay equipment, telephone & telegraph; intercommunication equipment. General Industrial Equipment Div. -- High frequency induction & dielectric heating apparatus. Consumer Durable Goods Div. -- Electric hearing aids.

* * * *

Plans for allocation of materials for all electronic items on B list have been worked out by Electronics Div. for approval of higher NPA and DPA echelons. This includes program for manufacture of TV-radio broadcast transmitters and related facilities. It's believed Govt. will take liberal attitude toward granting materials to build new stations because of importance of communications to defense effort and relatively small amount of controlled materials involved (see p. 3).

For more information on CMP, you'll have opportunity to attend NPA-conducted "school." The one-day sessions will be held in 20 principal U.S. industrial cities between May 15 & 23. Dates for specific cities haven't yet been announced.

MAY-JUNE NICKEL ALLOTMENT FOR TUBES: Receiving tube makers will get less nickel than they asked -- but a little more than they expected -- during May and June.

NPA will allocate 200,000 lb. in May, 180,000 in June, for use in all types of receiving tubes. Manufacturers had asked 250,000 lb. for May, 225,000 for June -- their rock-bottom requirements. Nevertheless, May-June ration is high in view of April's allotment of 169,000 lb. (Vol. 7:16) and recent warnings by high NPA officials that May's allocation would be considerably less than 200,000.

An NPA official said the allotment, "while not large by industry's standards, should be adequate, with maximum conservation efforts, for essential requirements." He stated manufacturers have given assurances they'll turn out enough replacement tubes to prevent shortage in that field.

Nickel allotment covers military, industrial, export as well as tubes for civilian TV-radios. And because of lead time in manufacture of tube elements, it will probably be fall before nickel authorized this month is incorporated in tubes rolling off production lines. By that time, much of tube makers' output is expected to be for armed forces.

* * * *

On another component front, NPA Electronics Div. has finally succeeded in arranging system to get copper for speaker manufacturers as substitute for cobalt. In past, TV-radio and speaker makers have been stymied in attempts to switch from cobalt-containing alnico speakers to copper-wound electromagnetic speakers.

Under new program, speaker makers will be permitted to substitute some copper as cobalt allotment is reduced. But before NPA stamps "OK" on this type of arrangement, it will require evidence of copper conservation by set manufacturers for whom the speakers are made.

Govt. may buy tungsten abroad to help relieve shortage, but even this additional supply wouldn't be enough to meet all requirements. So NPA told meeting of transmitting and power tube manufacturers April 27. There's little relief in sight, NPA said, and July and August tungsten allocations will be "considerably reduced." Tube makers reported growing shortages of cobalt-containing products, but NPA replied cobalt outlook is probably better than that for tungsten. Nickel situation won't get better soon either, manufacturers were informed—but NPA did tell them it recognizes importance of electronics industry and "some relief on critical metals can be expected" as result of CMP. Members of Transmitting & Special Purpose Tube Industry Advisory Committee attending meeting: W. L. Meier, Chatham Electronics; J. A. McCullough, Eitel-McCullough; G. W. Henyan, GE; H. J. Hoffman, Machlett Laboratories; W. Thompson, Raytheon; C. E. Burnett, RCA; C. A. Rice, United Electronics; H. Myrl Stearns, Varian Associates; L. C. Jarvis, Western Electric.

Mobilization Notes: John G. Daley resigned this week as director of NPA Electronics Div., effective June 1. He's retired general plant mgr. of New England Telephone & Telegraph Co., has served as division chief 5 months, is leaving for personal reasons. Successor hasn't been named.

Tentative staff assignments in Daley's division (Donald S. Parris, deputy director) were announced this week. These are section chiefs: J. A. Milling, end equipment (including TV-radio receivers); J. Bernard Joseph, TV-radio transmitters; Louis H. Niemann, tubes; R. D. Parker, capacitors; E. MacDonald Nyhen, transformers; Edward W. Glacy, conservation; Eric D. Bovet, statistical; J. R. Sypher (acting), resistors; Delmus J. Fagge (acting), connectors, relays, sockets & plugs; J. A. Pfau, executive assistant.

* * * *

President Truman's military budget of $60.65 billion for fiscal 1952 year includes about $3.6 billion for electronics-communications, according to best estimates. Budget includes $29.7 billion for major procurement and production, with $1.74 billion for electronics-communications. But this isn't complete sum for electronics-communications, since that kind of equipment is also included in figures for aircraft, ships, combat vehicles and artillery, guided missiles, etc.—each of which has separate estimate. In budget message, President strengthened powers of Defense Dept.'s Munitions Board over Army, Navy, Air Force procurement and requirements, charged it with watching military's bite of civilian economy.

* * * *

Govt. aid for expansion of electronic production facilities continues on small scale previously established (Vol. 7:10-11, 16-17). Of 98 accelerated tax amortization certificates granted by DPA April 14-26 for all types of defense facilities, costing $215,277,047, the 9 granted for expansion of electronic and related production totaled $3,892,896, or less than 2%. Only one of these certificates represented a sizeable venture—the one granted to Varian Associates for radar tube production facilities valued at $2,455,933 at Palo Alto, Cal., with 5-year write-off for tax purposes on 75% of that amount.

Other firms receiving certificates for expansion of facilities relating to electronic production: **Collins Radio**, Cedar Rapids, radar equipment, $903,266 at 80%; **General Ceramics & Steatite Corp.**, Keasbey, N. J., transformer cores and materials for condensers, $345,253 at 75%; **Technicraft Laboratories Inc.**, Thomaston, Conn., electronic components, $76,006 at 75%; **New York Transformer Co.**, Alpha, N. J., transformers for electronic equipment, $50,000 at 75%; **DuMont**, Clifton, N. J., electronic equipment, $27,625 at 75%; **Hogan Laboratories Inc.**, New York, electronic research & development, $14,205 at 85%; **United States Testing Co.**, Hoboken, testing of electronic equipment, $11,829 at 75%; **Electronic Associates**, Long Branch, N. J., electronic instrumentation, $8709 at 85%.

* * * *

Stepping down as DPA administrator to resume IT&T presidency, Gen. Wm. H. Harrison May 1 assured newsmen there's been no delay in military electronics procurement program. He said slowness of program hasn't been due to bottlenecks, but to time required to develop "entirely new products," many of them unheard of before rearmament effort. Before full-scale military electronic production can begin, these designs must be reduced to manufacturing stage. We're in this phase of electronics program now, the general said.

Col. Elton F. Hammond, ex-Pentagon G-4 executive officer, became Signal Officer of Far East Command, succeeding Maj. Gen. George I. Back, sworn in May 2 in Tokyo as Army Chief Signal Officer, due back May 23.

For benefit of subcontractors, aviation electronics and communications equipment and related equipment will be displayed next month in New York and Chicago by Navy Bureau of Aeronautics and Air Force. Munitions Board has invited 2400 representatives of electronics and related firms to exhibits May 8-10 at New York's Grand Central Palace and May 21-23 at Chicago's Navy Pier. Displays will give prime contractors opportunity to show their products to potential subcontractors. If you want to attend the exhibition in Chicago and haven't been invited, you must apply at least 5 days before exhibit at nearest Air Force Procurement Field Office in order to allow time for interim security clearance. Electronic exhibit is separate from current Air Force general subcontractor clinic ending May 9 at Chicago's Navy Pier.

Revised "critical occupation" list, issued by Labor Dept. for use by draft boards and Defense Dept. in considering deferments and delays in call-up of reservists, includes electronic technician (except TV-radio transmitter and receiver repairmen), electrical engineer, electrical instrument repairman, mathematician, physicist. List is to be used in connection with Commerce Dept.'s list of "essential activities" (Vol. 7:14). Copies are available from Defense Manpower Administration, Dept. of Labor, Washington, and from Labor Dept. field offices.

* * * *

Defense priority orders consume 25-100% of the production of electronic porcelain parts manufacturers. So NPA was told April 23 by Steatite Electrical Procelain Industry Advisory Committee. These manufacturers urged prime govt. contractors to advise them as early as possible on estimated needs because of time involved in tooling for new items. Some producers said their plants were running at full capacity; others said they had idle production facilities—but all agreed both military and civilian orders were being met. Industry members present: John Kruesi, American Lava Corp.; H. Collin Minton Jr., Frenchtown Procelain Co.; George H. Aderhold, Saxonburg Potteries Co.; Christopher L. Snyder, General Ceramics & Steatite Corp.; William S. Parsons, Centralab Div., Globe Union Inc.; Harold I. Danziger, Henry L. Crowley Co.; Joseph Schermerhorn, National Ceramic Co.; W. S. Mills, D. M. Steward Mfg.; S. H. Stupakoff, Stupakoff Ceramic.

Rudolph Wurlitzer Co., which makes juke boxes and musical instruments, announced it has total of $10,000,000 in defense contracts and is negotiating for $2,000,000 more. Its principal military products are electronic equipment, guided missiles and electronic organs for armed forces chapels. In addition to Army and Air Force prime contracts, Wurlitzer holds subcontracts from Emerson, Zenith and Bell Aircraft.

Defense production officials April 24 visited Wright-Patterson Air Force Base, Dayton, to inspect electronics and aircraft production progress. Among those making flying visit: ODM Director Wilson, DPA chief Harrison, NPA Administrator Fleischmann, Munitions Board chairman John D. Small, DPA production executive committee chairman W. W. Watts, Electronics Production Board chairman Edmund T. Morris Jr.

Only NPA can grant materials aid to manufacturers, Munitions Board said in recent directive to Secretaries of Army, Navy and Air Force. At the same time it requested manufacturers to seek assistance of NPA field offices rather than ask armed forces for help.

Weekly DPA publication, *Defense Production Record*, made first appearance May 4. It summarizes orders, regulations, recommendations and other activities of govt. defense production agencies. It can be obtained for $2.50 a year from Govt. Printing Office, Washington.

Telecasting Notes: DuMont's 1950 annual report (see Financial & Trade Notes) does not reveal network profit-and-loss figures, as did 1949 report—but it does state that "network continued to operate at a loss, although to a considerable less extent than during 1949." Gross billings of DuMont Network and its 3 TV stations (WABD, WTTG, WDTV) were reported 207% of 1949 billings, which had been reported as $2,435,966 (Vol. 6:14). It can therefore be adduced that 1950 income was around $5,000,000. DuMont network-station operating loss ran $2,564,491 in 1949 and $1,424,530 in 1948 (Vol. 6:14) . . . Billings of many if not most TV station operations are now running ahead of their AM counterparts, where jointly owned, but first ad agency to reveal TV billings exceeding AM is Young & Rubicam; *Variety* reports that 1951-52 season, starting Sept., will find that agency spending $30,000,000 on TV-radio (out of total billings of $93,000,000), with $17-18,-000,000 going for TV time and production, $12,000,000 for radio . . . Either Chicago or Philadelphia, due to convention halls and availability of TV pickups, seen certain to get 1952 Republican and Democratic national conventions; Radio Correspondents Assn. has designated Bill Henry, MBS commentator, to arrange for pooled telecasts as well as network and station broadcasts . . . Manual titled *The ABC's of Television Film Production*, setting forth time and cost factors in production of commercial spots for TV, has been issued by Henri, Hurst & McDonald, Chicago agency . . . Catholic U and NBC's WNBW, Washington, have arranged tieup for Television Workshop, dramatic productions, educational broadcasts . . . TV applicant KRNT, Des Moines (Cowles) plans to share new 709-ft. TV-FM tower, now under construction, with other stations, a la Empire State Bldg. (Vol. 7:11) . . . KPHO-TV, Phoenix, April 15 raised base hour rate from $250 to $300, one-min. from $40 to $60. Following increased rates May 1: WAAM, Baltimore, $550 to $650 & $95 to $113.75; WHIO-TV, Dayton, $400 to $525 & $50 to $90; WTVR, Richmond, $400 to $500 & $90 to $100; KLAC-TV, Los Angeles, $750 to $1000 & $125 to $175 . . . KOB & KOB-TV, Albuquerque, N. M., appoints Branham Co. as national rep.

Five applications for TV stations this week bring total pending to 404. Applying were: WLVA and WWOD, Lynchburg, Va., both for Channel No. 13; WNEX, Macon, Ga., No. 13; WTOC, Savannah, Ga., No. 11; *Texarkana* (Tex.) *Gazette & News* (KCMC), No. 6. [For further details about applicants, principals, etc., see *TV Addenda 12-Q* herewith; for listings of all applications to date, see *TV Factbook No. 12*, with Addenda to date.]

Application for proposed sale of facilities of WSB-TV, Atlanta, to group of local business men but with investment firm of Clement Evans & Co. holding 66% (Vol. 7:16) was returned to applicant by FCC this week on grounds it could not tell who ultimate stockholders would be. Investment firm proposed to sell shares locally, and is expected to re-file with complete list of prospective stockholders.

FCC liberalized rule prohibiting separate operation of visual and aural TV transmitters this week. New regulation, effective June 13, permits use of test pattern, still pictures, slides for not more than one hour daily to accompany aural announcements of station's program schedule, newscasts, commentaries. Previous rule limited this to 15 minutes a day. New rule also permits sign-on test pattern to be accompanied by music for 15-minute "warmup" period, previously prohibited.

May 1 sets-in-use reported since NBC Research's "census" of April 1 (Vol. 7:17): Washington 261,300, up 7500; Dallas-Fort Worth 117,068, up 4068; Memphis 86,221, up 3221; Greensboro 66,972, up 3072; Miami 65,000, up 5000; Utica 42,000, up 1300; Norfolk 67,309, up 3109.

Talk of coast-to-coast TV in time for World Series has just enough substance to make it possible. AT&T just doesn't know whether Omaha-San Francisco microwave will be in service by October, but reiterates that system "may be equipped for TV service before the end of the year." It announced that telephone service would be instituted via microwave from Omaha to Denver in July; from Chicago to Omaha in August; from Denver to San Francisco in late August. It also reported that on April 1 an additional coaxial circuit was put into operation from Toledo to Dayton, making total of 4 southbound, one northbound. On May 14 additional microwave circuits will be opened from Columbus to Dayton (making total of one westbound, 3 eastbound) and from Dayton to Cincinnati (making 3 southbound, one reversible on notice).

Advertisers are using new money for TV, not taking it from other media. That's conclusion of Magazine Advertising Bureau in recent study titled *Where Are TV Budgets Coming From?* Bureau took 126 TV advertisers, found that although they increased TV expenditures 286.5% last 6 months of 1950 compared to same period 1949, they also increased magazine buying 11.8%, Sunday newspaper supplements 20.1%, network radio 0.6%. Non-TV advertisers, on other hand, increased magazine advertising by 10.3%, but reduced Sunday newspaper supplements 9.1%, network radio 3.3%.

Value of movies in vaults of 5 major producers is figured at $281,520,000 in the TV market by New York stockbroker Reynolds & Co. in April 19 report titled *Hidden Values in Motion Picture Production Companies.* In much same vein, Paramount's Paul Raibourn touched on subject recently (Vol. 7:13). Reynolds report estimated that TV can pay $20,000 per half-hour film, that Hollywood movies run for 2 hours, therefore each film is worth $80,000. Here's what Wall St. firm figured each of the 5 majors has in way of films made between 1933 and 1949: MGM, 670, value for TV estimated at $53,600,000; Paramount, 732, $58,560,000; RKO, 694, $55,520,000; 20th Century-Fox, 758, $60,640,000; Warner Bros., 665, $53,200,000.

Two SMPTE committees are working on standards for TV films. Joint SMPTE & RMTA committee on film equipment is working on 3 standards: (a) dimensions of TV slides and opaques; (b) development of 16 mm motion picture projector for use with TV cameras operating on full-storage basis; (c) location and size of picture area in TV recordings of 16mm and 35mm motion picture film. Committee on TV films is working on getting industry to accept additional markings on film "leaders" (that portion of film preceding actual pictures), including 16mm sound start, pattern for TV adjustment, switch-on mark.

Eastman-Kodak's new 16mm film projector for TV stations was described for first time at SMPTE convention in New York this week. Principal feature is method by which pull-down time of film is coordinated with blanking period of TV camera. Especially built for TV, $6500 apparatus is said to furnish greater definition, more light, higher sound quality than can present equipment. Also described was new 35mm TV recording camera developed by Producers Service Co., Burbank, Cal.

Telecasters Film Syndicate Inc. is new corporate name of cooperative TV film syndicate recently formed as Consolidated Television Broadcasters Inc. (Vol. 7:17), with Richard E. Jones (WJBK-TV, Detroit) president and Harrison Dunham (ex-KTTV, Los Angeles) executive v.p.

All FM stations operating functional music fall within purview of FCC "order" declaring such operations illegal, Commission announced this week. Last month, FCC wrote 4 such stations advising them of such ruling, told them to state why they shouldn't be forced to cease such broadcasting (Vol. 7:15).

'THE GREAT CHANNEL HUNT' SLOWS FREEZE: Freeze-end appears further away than ever, as FCC and industry stagger under load of some 600 comments on end-of-freeze plan (see TV Allocation Report of March 24), dumped in Commission's lap this week.

[For digests and listings of all comments available -- 308 commercial, 215 educational, 56 from municipalities -- see Supplement No. 72 sent herewith to all full-service subscribers. We'll catch any stragglers next week.]

Beyond sheer weight of comments, presaging protracted city-by-city hearings, intimations of possible court action in many of the comments render timing of end-of-freeze even more nebulous.

FCC's plan is already in court, in a sense, since City of Jacksonville has asked District of Columbia Court of Appeals to enjoin proposal to move Channel 2 to Daytona Beach. City is fighting to recapture CP it once held (Vol. 6:41).

Court action is "being seriously considered" by number of applicants, according to their attorneys. Some say such action is "probable," on any or all of these grounds, among others:

(1) Educational reservations. (2) Pre-determined allocation plan, fixed in rules. (3) Denials of applications where hearings have already been held, via plan's channel shifts and reservations (Detroit, Philadelphia, San Francisco, etc.).

When such court appeals might come isn't clear. They could come immediately or wait until final decision on whole allocation.

* * * *

Legalities aside, FCC's own procedural plan is bound to undergo delays. For example, legal and engineering associations, plus NARTB-TV, plan to ask for postponement of deadline for counter-comments from May 22 to June 11, will undoubtedly get it. That means early July before city-by-city hearing starts; it's presently scheduled for June 11.

Hearing itself will be a dilly. In addition to commercial interests -- who certainly won't let channels slip out of their cities by default -- educators' spokesmen claim that 3 or more witnesses from each of 50-75 cities will be on hand.

That doesn't sound like a mere couple months of hearings, even though FCC will strain to keep testimony to the point. There's some thinking in Commission that hearing's gait will accelerate after heavy initial testimony.

And Congress isn't out of the picture, by any means. Sen. Johnson himself filed a comment for Colorado, as did colleague Sen. Millikin, proposing reshuffle to get more channels into Denver and State in general. Still pending, too, are educational resolutions of Sen. Benton and Rep. Celler (Vol. 7:18).

* * * *

Nature of most comments is obvious from glance at Supplement 72:

(1) Channel shifts. Everyone discovered the obvious in FCC's plan -- it's "loose" (Vol. 7:12), most co-channel allocations being 200-220 miles apart, rather than 180-mile minimum. Thus, adroit juggling frequently allows additional stations

Copyright 1951 by Radio News Bureau

MAY 14 1951

without violation of proposed standards or robbing any city of channels. In addition, many propose simply to shift channels from neighboring cities, claiming their own are under-served.

(2) Reduced spacings and powers. When FCC's standards couldn't be met with any parlay, exceptions to Commission's minima are requested. Frequently requested is abandonment of 180-mile city-to-city spacing, retention of 170-mile transmitter-to-transmitter spacing.

(3) Educational reservations. Schools simply endorse idea, want more channels, particularly vhf. Same goes for mayors, city councils, etc. Commercial interests either simply oppose reservation, frequently claiming principle illegal, or suggest giving schools uhf instead of vhf.

* * * *

Those pitches account for bulk of comments, but almost every other angle is covered, sometimes at exhaustive length:

(1) Of the 31 existing stations required to shift channels, none gives flat "no," but several don't want to, offer alternative shifts -- generally to stay on low vhf channels.

(2) Network reactions vary. ABC likes plan in general, but doesn't want adjacent-channel restrictions on heights and powers. CBS wants enough flexibility to allow more stations in major markets. DuMont attacks basic philosophy of plan, holds that it promotes monopoly, offers complete substitute in huge document (Vol. 7:18). NBC thinks plan pretty good, engineering-wise, but suggests procedures for faster freeze-lifting.

(3) In Gulf area, existing stations want more space between stations, applicants see no good reason for it.

(4) Move all commercial TV to uhf, say a few "outs," suggesting vhf for the educators, if anyone.

(5) Uhf powers are too low, is claim of some who say that ceiling should be left open, changed quickly as propagation data is gleaned from experience.

(6) A very few educators say they don't want vhf channels, ask their release for commercial use. A few more want to go commercial themselves.

(7) State-wide educational network, 10 cities at first, is planned in New York. Board of Regents says it will ask legislature for $3,500,000.

HOW BUILDING CONTROLS AFFECT TV-RADIO: NPA hasn't "banned" construction of TV-radio stations -- notwithstanding plethora of wild rumors and reports.

Even FCC people were in dither this week about these tales, which are about as correct as saying NPA has banned construction of schools, churches, hospitals, highways, bridges, public utilities and railroads -- covered by same NPA order which governs TV-radio station construction.

New order (M-4 as amended) simply says you'll need authorization from NPA if you want to build any of these items, as well as others previously put under controls (Vol. 7:3,6). The only actual construction ban issued by NPA came out last fall and affects amusement building (6:43,44), not including broadcasting plants.

Effect of new regulation -- together with earlier ones -- is to put all construction under NPA controls, paving way toward inclusion of construction in Controlled Materials Plan (Vol. 7:15,18) by July 1.

But every present and prospective broadcaster and telecaster will be affected by the regulation. It requires NPA authorization for any construction using more than 25 tons of steel (some 500-ft. antenna towers weigh less) or alteration costing more than $5000.

If you've already begun construction, cleared site for new building before May 3, you can go ahead and finish without authorization. Same is true of alterations if you used "substantial quantities of materials" before that date.

After you apply to NPA, what are your chances of getting go-ahead to build? From all indications, they're very good -- probably excellent if you plan to build new station in community which doesn't have one now. NPA officials long ago placed

TV-radio broadcasting in "essential" category, even specifically exempted this type of construction from earlier controls.

NPA will look favorably upon your application if you can answer "yes" to any one of these questions:

(1) Would it further the defense effort by providing needed facilities near military establishments or defense projects?

(2) Is it essential to maintenance of public health, safety or welfare?

(3) Would it alleviate or prevent hardship to a particular community?

TV-radio's value in civil defense, information and morale makes strong case on each point. In final consideration of application, NPA says it "will consider the type and quantity of materials on hand, and needed, for the facility, and the effect on the community at large if the authorization were denied."

NPA will consult FCC to work out detailed criteria for authorization of station construction. But two things are certain now:

(1) NPA won't approve any plans for station construction if station doesn't have CP from FCC. New building and alterations by radio stations, which take into account future expansion into TV -- common in past -- probably won't be approved.

(2) Frills and furbelows will have to be eliminated. NPA says "architects and engineers...must give fullest consideration to using substitutes for critical materials and keep the design simple."

Complete, detailed plans, specifications and lists of materials to be used must accompany applications -- on form NPAF-24, available from Commerce Dept. field offices or NPA Construction Controls Div., Washington.

Approval by NPA won't carry with it any certified check for materials. As things stand now, there'll still be a scramble. But picture will change when construction is brought under CMP. Then, authorization will probably entitle builder to necessary materials.

Structural steel -- vitally needed for expansion of defense plants -- is big bottleneck. If shortage gets much worse, it's possible all non-defense building will be banned for a period, as it was during most of last war.

But at present, NPA would rather see that all new stations conserve to the limit -- than give any a flat turndown.

ABC SALE DEAL STILL ON THE FIRE: Complex deals upon which projected purchase of ABC by CBS was predicated -- involving sale or re-sale of ABC's radio network and of 1, 2 or 3 of its 5 TV stations -- were still supposed to be cooking at end of week. There were indications, though, that CBS might not be the package-purchaser.

Apparently the hottest of all the "sub-purchase" prospects, Yankee-Don Lee interests, went glimmering this week after long and detailed negotiations. Storer interests also definitely dropped out, and IT&T deal apparently never was serious.

United Paramount, big movie theatre chain recently separated from Paramount Pictures, was revealed as having entered the lists as a possible purchaser of the whole kit and kaboodle -- with thought of re-selling only Chicago TV outlet, WENR-TV. Natural purchaser would be CBS, which had indicated willingness to pay as much as $10,000,000 for 3 of the 5 TV outlets owned by ABC (Vol. 7:18).

Conferences were under way in New York as this was written, with topkicks of United Paramount and ABC participating but CBS executives notably absent. It's common knowledge that United Paramount is more than pleased with highly profitable operation of its WBKB, Chicago, and its executives have never shared the aloofness of other movie tycoons toward the parvenu TV competitor.

There's many a slip, and an announcement one way or the other -- probably in the negative -- should be forthcoming by the time you read this.

Part of Paramount's consideration is said to be disposal of AM network, for its prime interest is TV. Discussions about the AM properties were held with Farm Bureau Insurance Co., big Ohio concern which owns Peoples Broadcasting Corp., recent purchaser of WOL, Washington, and owner of WRFD & WRFD-FM, Columbus, O. But these were said to have come to naught.

All this week has been merry-go-round for newsmen seeking to plumb confused

off-again-on-again ABC-CBS "deals". They have had entire broadcasting-telecasting fraternity buzzing ever since story broke last week about proposed $28,000,000 CBS "package purchase" (Vol. 7:18).

"A lot of opium smoking," was way one newsman described phantasmagoria of reports, rumors, denials -- and that just about tells the story. Only thing certain was that ABC is definitely on block, can be had by any customer who can not only meet majority stockholder-chairman Edward J. Noble's demands but can also satisfy qualifications (notably anti-trust) of FCC, Dept. of Justice and Congress.

* * * *

Until mid-week, apparently, CBS had reason to believe it had deal all buttoned up, whereby it would buy ABC, retain 2 or 3 of its TV outlets (in Chicago, Detroit, possibly San Francisco), maybe even keep an ABC-AM outlet here or there, sell off the rest for $18-20,000,000. (Detroit entered into speculation because CBS has one of its toughest AM affiliation deals there, with Dick Richards' WJR.)

Buyer was to have been General Tire & Rubber Co., which owns Yankee and Don Lee networks. Those networks would have been sold, along with their own stations, but Yankee TV outlet in Boston (WNAC-TV) was to have been retained.

Tom O'Neil, 35-year-old son of General Tire president, who runs the radio properties, would have turned attention to running ABC radio network and a revamped ABC-TV network, whose nucleus would be WNAC-TV plus ABC's WJZ-TV, New York; KECA-TV, Los Angeles; KGO-TV, San Francisco, and such present affiliates as would stick.

CBS would thus get only WENR-TV, Chicago, and WXYZ-TV, Detroit. It was felt such a parlay would be acceptable to Washington, since neither the AM nor TV network would be discarded. Indeed, even keener competition was envisaged -- for the young O'Neil, who is also chairman of MBS, would have to pull out of that network.

The legal fraternity, watching developments closely, are of one mind in their conviction that no deal which would eliminate or curtail competition could possibly win approval of Washington. Hence, any mergers seem out of the question.

* * * *

As things stand now, it's apparent Noble will eventually sell -- may indeed be constrained to do so, regardless of frequent disavowals that probably will be repeated if Paramount deal falls through, because the negotiations have already had these palpable effects:

(a) ABC staff morale has been seriously shaken, along with confidence in management. Everybody's worried, many are casting about for new jobs. Resignations already include 2 vice presidents within week (see Personal Notes).

(b) ABC affiliates, both AM and TV, make no bones about their anger toward ABC management -- for creating state of uncertainty, failing to tell them the score. They've been disaffected long time, anyhow, by dwindling network income, latterly worried (along with all other network affiliates) by projected AM rate cuts.

(c) Sponsors are asking whether there's going to be a network, whether they may safely make long-term commitments for time, personnel, etc. It's manifest current negotiations -- with inevitable crop of rumors -- aren't good for business.

(d) Minority stockholders of ABC, which is traded on N.Y. Stock Exchange, are also puzzled and disturbed about future status of their holdings. There are 1,698,017 common shares outstanding, of which Mr. Noble owns 901,667, or 53.38%. Executives' holdings, reduced in recent years, aren't very large (Vol. 7:13). Whatever deal Noble makes is bound to be subject to approval of minority stockholders.

Latest asking price was reported $26,000,000, based on a 14-15 valuation of ABC stock. Noble is said to have wanted exchange-of-stock deal with CBS, not cash -- and same idea was being considered in Paramount discussions.

* * * *

Some CBS affiliates are also outspoken in their dislike of what's going on, also sore because they've been told nothing. They're really smarting under recent rate cut order (Vol. 7:15-16), and some who went along with CBS in not applying for TV channels now don't like the enormous testimonial to TV implicit in their network's zeal to get stations via the high finance route.

There can be little doubt that network domination of the industry is thing of past, its collapse hastened by recent events -- particularly the impact of TV. Since rate cuts, NBC suffers from disaffection only little less than ABC and CBS.

This week, Securities & Exchange Commission disclosed that Isaac D. Levy, one of CBS's founders, a major stockholder and director, had sold 5000 shares of his Class A stock as of April 30. It's generally assumed he and his family sold the block of 35,000 shares also marketed privately last week (Vol. 7:18).

BITNERS BUY WLAV-TV FOR $1,300,000: Deal for sale of WLAV-TV, Grand Rapids, was closed in Washington May 11 -- purchase price $1,300,000, purchasers the group headed by Harry M. Bitner, onetime top Hearst executive, former publisher of Pittsburgh Sun-Gazette. Bitner family and employe interests (WFBM Inc.) own WFBM-TV, Indianapolis, which with its AM counterpart is managed by Harry M. Bitner Jr. They also operate AM stations WOOD, Grand Rapids; WFDF, Flint; WEOA, Evansville.

Seller is Leonard A. Versluis, who established WLAV-TV in August 1949. He retains companion AM outlet WLAV, which probably means WLAV-TV call will be changed to WOOD-TV. Station is on Channel 7, which is only vhf outlet allotted Grand Rapids under FCC's new allocation plan; city gets 2 uhf channels, one for education.

Price is highest ever paid for TV outlet in comparable market, exceeded only by the $1,400,000 which Washington Post (55%) and CBS (45%) paid for WOIC, Washington, now WTOP-TV (Vol. 6:25). When CBS last winter bought KTSL, Los Angeles, it paid $333,765 plus $228,000 annual rental of facilities (Vol. 6:52).

Only other TV station sales deals since telecasting came into own -- though a few others are known to be in the making -- were KFMB-TV with KFMB, San Diego, sold to John A. Kennedy for $925,879 and other considerations (Vol. 6:46, 7:17); KBTV, now WFAA-TV, Dallas, sold to Dallas News for $575,000 (Vol. 6:4,11); KLEE-TV, now KPRC-TV, Houston, sold to Houston Post for $740,000 (Vol. 6:13,21).

Personal Notes: Otto B. Brandt, ABC-TV stations v.p., resigns as of June 1 to become v.p. & gen. mgr. of KING & KING-TV, Seattle, succeeding Hugh Feltis . . . Frank Samuels, ABC Western Div. v.p., has resigned to join William Morris Agency as head of TV-radio dept., Hollywood . . . Richard Doherty, NARTB's labor relations director, appointed by President Truman as one of the 6 management representatives on new National Wage Stabilization Board . . . Robert S. Woolf promoted to mgr., DuMont Teletranscription Dept., succeeding Edward R. Carroll, resigned . . . Lloyd Dennis promoted to director of program service, WTOP & WTOP-TV, Washington, succeeding Mrs. Hazel Markel, resigned to join MBS . . . A. Donovan Faust, ex-WLWD, appointed asst. gen. mgr. of WDTV, Pittsburgh; Byron Dowty, ex-WDSU-TV, named production director . . . Harry W. Zipper, ex-asst. to J. Kelly Smith, CBS v.p. in charge of owned & operated stations, named production business mgr., KTSL, Los Angeles . . . W. H. Case, director and senior v.p., appointed head of creative and TV staff for all offices of Campbell-Ewald Co., Detroit; Frank W. Townshend, v.p., named mgr. of New York office . . . Richard McKeever, ex-Wm. Esty & Co., appointed head of TV-radio timebuying, Walter Weir Inc. . . . Edward F. Kenehan, ex-FCC and recently with Welch, Mott & Morgan, Washington, has joined legal staff of RCA Victor, Camden . . . Edgar F. Vandivere Jr. leaves FCC's Technical Information Div., joins Washington consultants Weldon & Carr . . . Newly-elected officers of Assn. of Federal Communications Consulting Engineers: George C. Davis, pres.; James C. McNary, v.p.; Frank G. Kear, secy.; Frank H. McIntosh, treas.; Ronald H. Culver and John Creutz, members of executive committee . . . Mark Woods, ABC vice chairman, awarded honorary Doctor of Laws degree by Ithaca College May 12 . . . Richard C. Dreyfuss, ex-CBS, named film director of WDTV, Pittsburgh . . . Charles A. Batson, TV director, NARTB, has resigned.

Station Accounts: Major newcomers to TV, buying participations on WCBS-TV, New York, are reported by that station to be: Tasty Toothpaste Co. (strawberry & bubble gum flavors), in *Sheriff Bob Dixon Show*, thru Victor Van Der Linde, N. Y.; Pan American World Airways, in *The Early Show, The Real McKay* and *One o'Clock Matinee*, thru J. Walter Thompson Co., N. Y.; British Xylonite Inc. (Halex combing brushes), in *Margaret Arlen Program*, thru Coppo Co., N. Y.; National Enameling & Stamping Co. (Nesco electric roasters), in *Margaret Arlen Program*, thru Needham, Louis & Brorby, Chicago . . . TV-Radio included in plans for National Guard recruiting, for which Congress has been asked for $600,000 for 1952, Robert W. Orr Co., New York, reappointed agency . . . Among other advertisers reported using or preparing to use TV: Clover Lamp Co. Inc. (lamps), thru Ed Shapiro Adv., Philadelphia; Maybert Corp. (Merrie Magic cream shampoo), thru Hilton & Riggio Inc., N. Y.; Rean Mandell Inc. (Candle-Glo home permanent wave), thru Allen & Reynolds, Omaha; Temptin' Products Inc. (Temptin' hair makeup), thru Jay Gabriel Bumberg, N. Y.; Roselux Chemical Co. (Rose-X bleach & starch), thru Murray Director Associates, N. Y.; Altes Brewing Co. (Golden Lager beer), thru McCann-Erickson, Detroit; Pearson Pharmacal Co. (Ennds deodorant pills), thru Harry B. Cohen Adv. Co. Inc., N. Y.; Comal Hosiery Mills Inc. (Comette hosiery), thru Glenn Adv. Inc., Dallas; Brock Candy Co., thru Liller, Neal & Battle Adv., Atlanta (WSB-TV); H. W. Lay & Co. (potato chips), thru Liller, Neal & Battle Adv., Atlanta (WSB-TV); Jose Escalante & Co., Chicago (Cornia cigars) (WENR-TV); Amity Leather Products Co. (billfolds), thru Cramer-Krasselt Co., Milwaukee (WABD); Minnesota Paints Inc., thru Nelson-Willis Inc., Minneapolis; Parfums L'Orle Inc. (Silkmist hair beautifier), thru L. H. Hartman Co. Inc., N. Y.; Hoffman Candy Co. (Cup-o-Gold bar), thru Mayers Co., Los Angeles,

1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
May 12, 1951

NO REGULATION W RELIEF, OUTPUT DWINDLES: Federal Reserve Board flatly rejected RTMA requests for relaxation of Regulation W -- even as IUE-CIO radio and television conference board was being told by its researchers that about 25,000 TV-radio workers are now unemployed and as official trade statistics showed production falling to new low and factory inventories climbing to new high.

It now looks like a trade stalemate that can be relieved, at least in immediate future, only if there's resurgence of public buying, which nobody contemplates will resume before fall on anything like last year's scale.

Inventories continue high (see Topics & Trends), and situation wasn't alleviated by RTMA auditors' report that week ending May 4 saw only 66,077 TVs produced (3833 private label), year's new low, comparing with 83,516 preceding week. Factory inventory figure as of May 4 went to 474,541, new high, compared to 403,642 the week before. Radios fell, too -- totaling 298,149 for week, with inventory of 187,305, auto sets actually exceeding home units. Week's output comprised 136,538 auto radios, 122,686 home sets, 38,925 portables.

* * * *

RTMA decided to appeal to Congress for relief, disagreeing with the FRB's finding that Regulation W isn't to blame. It had asked amendment of credit regulation to permit trade-ins to be applied against 25% down payment, or else that TV-radio sets be placed in house furnishings category so that down payment might be 15%. Both ideas were rejected, FRB stating:

"Although the Board recognizes that there has recently been a marked softening of demand for TV sets, compared with the heavy buying wave during December and January, it doubts that the restrictions of Regulation W have been the dominant factor in this relative slackening of demand for such sets.

"The phenomenal expansion of TV production and sales in the relatively short span of the past few years raises a question as to whether there may now be a temporary condition of near-saturation of existing major markets. Also, many potential purchasers in the existing major markets probably are deferring purchases for one reason or another, such as the expectation of further price reductions as present inventories are liquidated, or the imminence of uhf TV.

"In so far as Regulation W is not the cause of the reduction in sales of TV sets, a relaxation of the requirements of the regulation could not reasonably be expected to solve the problem...

"A major relaxation for one regulated article -- such as allowing trade-ins to be counted as down payments on television sets -- would tend to create important competitive inequities unless there was also such an equivalent relaxation for competing articles as to amount to a general relaxation that would tend to nullify the effectiveness of the regulation."

Board's letter, whose economic reasoning regarding TV markets and "the imminence of uhf TV" are obviously open to challenge (see statement on p. 7), says it can't make exceptions for one regulated article, concludes it must "consider the necessity for curbing the inflationary effect of installment credit in the interests of the country as a whole in this period of national emergency."

* * * *

RTMA has engaged consulting economists Boni, Watkins, Mounteer & Co., New York, which worked with its tax committee, to prepare data on effects of Regulation W on sales for presentation to Congress. Philco general counsel Philip Dechert was appointed chairman of special committee to prepare testimony. Members: Robert S. Alexander, Wells-Gardner; H.C. Bonfig, Zenith; John W. Craig, Crosley; S.R. Curtis, Stromberg-Carlson; Allen B. DuMont; Paul V. Galvin, Motorola; H.L. Hoffman, Hoffman Radio; Robert Seidel, RCA Victor; Glen McDaniel, RTMA; Frank Uriell, Admiral.

THE CASE FOR THE TV-RADIO & APPLIANCE INDUSTRY

Editor's Note: *Here is a sizeup of the TV-radio and appliance trade's current dilemma, with recommendations what to do about it—so clearly and succinctly stated, so sound, that the full text merits close reading by everybody in the industry. The author prefers to remain anonymous. Suffice to say he's one of the business' older and wiser heads, who wrote this as a memorandum for certain govt. officials as an industry service, not for aggrandizement of himself or his firm. It wasn't intended for publication, but we were able to obtain a copy with permission to reprint.*

AN important artery of the national economy has developed a clot—and remedial measures are urgently needed.

This clot is in the form of excessive inventories in the appliance and television industries. The condition of distributor and retail inventories in this field has reached a state which, if allowed to continue, can do great harm in our economy. It is already causing bankruptcies, and due to increased factory inventories which are not moving will result in the layoff of a large number of our labor force before the Government's defense program is ready to absorb this labor.

While it makes no difference at this time how the present condition came about, it will be helpful in finding a solution to review exactly what has happened and *not* happened.

Last fall the Government, of necessity, released publicity indicating to the public, manufacturers, distributors and dealers that there were going to be shortages. These shortages, according to the statements, would begin to take effect in the spring of 1951 and would get worse as the year wore on.

The reaction was immediate. The manufacturer, having large stocks of material on hand, was galvanized by fear that his production would gradually diminish and decided to ignore the normal seasonal trends by building everything possible in the little time that he felt was available.

The dealer shared this fright. He decided to buy everything he could in order to protect himself, so as fast as the goods were produced they were absorbed by the dealers.

The consuming public, watching the Korean war and remembering the war shortages, bought in anticipation of its future needs.

As is always the case when decisions are made in fear and haste, they were wrong.

* * * *

The Government misjudged how rapidly the defense orders would be placed and industry switched over to defense production. Manufacturers were wrong in accepting the Government's appraisal of how fast this was going to happen and also in ignoring seasonal trends. Equally in error were the distributors and retail dealers in buying too much and in buying from many different manufacturers. Everybody was wrong in the light of today's developments.

Neither second-guessing nor recrimination can change the present situation, which is now acute. But an error in judgment may be compounded—as we all hope it will not—by ignoring the unhappy result and letting it continue. Unfortunately, with this condition existing the Government in its effort to control inflation recently announced it was "rolling back prices to pre-Korean levels." This announcement, coupled with the price break which had already taken place in television due to distress stocks in dealers' hands, has caused the public to reduce buying on all appliances.

So the combination of the pre-buying which took place last fall, the application of Regulation W which has eliminated the low-income groups from purchasing, the price break in television and the government's announcement of rollbacks has drastically reduced retail sales.

* * * *

What is to be done with these vast inventories? Stagnating in distributor and dealer stocks, these products will not do anybody any good. They are both wanted and needed by the public, but they cannot serve the public in warehouses. The terminals, being used to store these and other inventories, are also needed for defense purposes. Unsold, they will not produce any profits from which taxes are paid.

It is in the best interest of everyone—government, industry, distributors, dealers and the public—to help move these inventories and dissolve the clot in our distribution system at the earliest possible moment.

The effect of the present situation on labor is of special urgency. Because of the inventory congestion, manufacturers are now forced to lay off workers, and unless sales are stimulated quickly large unemployment will result as activation of defense orders are not presently sufficient to absorb the labor. The result is not only a loss of trained manpower to the manufacturer but loss of tax revenues to the government. The laying off of this labor places a strain on the economy and an extra burden on these people.

In the electronics field, this dispersal of labor is very dangerous. Skilled help must be retained to a reasonable degree by those companies upon whom the Government must depend to produce the electronic equipment that will be needed when the full impact of defense production is upon us.

We believe that these inventories can be relieved within a reasonable time if a temporary modification of some of the orders and Regulation W can be made.

In modifying Regulation W, there are two ways in which this can be done. One is to discontinue the discriminatory requirements that trade-ins on appliances and television sets do not apply to the down payment. The Federal Reserve Board has permitted trade-ins to apply in automobile sales, and there is no reason why they should not apply to the sales on television and appliances. These articles which are traded in have value and represent an investment in money by the people who own them.

* * * *

The second way to help sales is to reduce the 25% down payment now required to 15%. The 25% payment is discriminatory against the low-income groups, forcing them either to forego purchases altogether or in many instances causing them to sell "E" bonds to make the down payments. These people, under our present standard of living, require appliances and the advantages of television sets as much or more than do the more fortunate individuals with larger incomes or more money. It has been proved in the past that low-income groups which are accustomed to buying on low down payments live up to their contracts. As labor leaders have stated, these people should not be discriminated against. In normal times thousands upon thousands of these low-income people would now be purchasing these articles at this season of the year, but under the credit regulations cannot do so. These modifications would do much toward relieving the excessive inventories.

* * * *

The Government should also do something quickly to correct and clarify its price rule order which has just been issued. An analysis indicates that this order is vitally affecting sales and companies cannot do the accounting required by the order in the time allotted, which is May 28. This order, as written, may precipitate a real crisis if not corrected.

In effect, the public has been told that prices are going to be lower on May 28. It is only natural that they will put off buying until after that date unless the dealers and factories guarantee to rebate the difference if prices are reduced. These rebates which would have to apply to present stocks as well as production may amount to millions of dollars, and no factory would dare guarantee prices without knowing the amount involved. It is a

physical impossibility for the accounting departments of companies to comply with the order as written, and analyze and furnish to the government the information that is necessary in determining the prices by May 28. If the Government extends the time allowed when it is evident that this accounting work cannot be done, it will only have the effect of further delaying sales as the public will continue to put off buying. This delay in purchasing is happening during May and June which usually produces about 25% of all appliance sales of the year's total volume.

While this delay in sales is taking place, the factories must continue to produce enough products to hold the labor force. The situation is obviously most serious unless sales can be increased and the inventories reduced.

It has been the practice of the Government in the past to recognize dislocations in our economy and to correct them. The Government, for instance, helps keep farm production and prices on an even keel with a carefully planned program. There are programs to protect wages and help labor in many ways. There are other programs, and there should be a program to protect the distributive system of the country, which is the bloodstream of business and so important to our economic welfare. Since the distributive system now is clogged, action should be taken —immediately--to get the system functioning again.

Unlike the assistance usually given to other segments of our economy, relief in this case calls for no subsidies, and no additional taxes. All that is needed is the correction of orders which are proving to be unworkable and the temporary relaxation of restrictive measures that the government has taken in anticipation of conditions that did not materialize and as a result are impeding the normal functioning of our country.

We, therefore, recommend that the Government immediately modify temporarily these orders. Control of production will automatically be effected in the future through the Controlled Materials Plan for essential industries.

Today, living in a dual economy, part war and part peace, for the first extended period of our history, our country needs flexible approaches to problems that are bound to change from time to time unless we have an all-out war. False consistency can be as dangerous as false security, and our strength will be in our ability to quickly recognize and to change anything that is not working.

THE TV BUSINESS—TAKE A LONG LOOK AHEAD! It isn't often that anybody's ad is worth repeating as news -- but Bendix Radio's inspiring full-page in recent Retailing Daily, captioned "Take a Long Look Ahead!" ought to be posted prominently in every business house in TV, ought to be must reading for every employer and employe alike who may feel any sense of gloom about TV's currently becalmed trade winds. The text:

"We who are in the television business -- whether as manufacturers, distributors, or retailers -- are fortunate, indeed.

"Here is a business as sure of its future as the automobile industry, and for an identical reason: television fills a fundamental human need.

"Nothing can stop it -- not Regulation W, station freezes, material shortages, taxes, competition from other consumer products, or any other spectre evoked by the prophets of gloom.

"What the public wants it gets -- and it is now beyond question that the public regards television as an essential of living. As sure as sunrise every home will have it, for the obvious reason that -- unlike almost every other necessity -- it has no substitute.

"The bogey of market saturation also vanishes before the facts revealed by a nearly perfect business parallel.

"The radio business is nearly thirty years old. Ninety per cent of American homes have radios. Yet, despite the competition of television in radio's major outlets, in 1950 this old and allegedly saturated market absorbed 14,500,000 new radio sets -- more in a single year than all television sets sold to date.

"The future is brighter still for television. For the past decade population increase in the United States has averaged 1,900,000 a year. Simple mathematical progression should increase that figure in coming years...

"Normal replacement of small picture sets, worn out sets, and sets outmoded by improvements now in prospect, plus multiple set ownership, assure a steady yearly market of many millions more...

"Actually, the lifting of the station freeze will eventually multiply the number of buyers many times, and benefit today's markets immeasurably by opening up sales to the millions in the marginal regions around present broadcasting areas. Phenomenal as its volume has been to date, the business is still but a shadow of what it will become.

"In fact, a business opportunity as broad as television has appeared only two or three times in this century. As far as thought can reach, the market is big and prosperous. It is one of the richest bonanzas of all time.

"If you have a soundly backed and soundly financed television franchise, hang on to it -- you own a gold mine. If you have television sets in storage, don't be panicked into price-cutting. The radio industry, stampeded by every seasonal change in the selling pace, threw away untold millions of dollars in profits by unnecessary dumping. We know better today. The market is there. Take a look ahead, then get back to good old-fashioned aggressive, intelligent selling."

Topics & Trends of TV Trade: Inventory statistics are next quarry of Frank Mansfield's RTMA statistics committee, with Dun & Bradstreet to do monthly survey of wholesale and retail establishments to determine exactly how many TV and radio receivers are on hand. Factory inventories are already being reported weekly, along with RTMA's production estimates, compiled by Haskins & Sells. Plan is to have about 40 manufacturers underwrite effort for about year, see how well it works, then make it part of regular RTMA statistical service if figures fill a real need.

While industry leaders have guessed total TVs now in pipelines at anywhere up to 2,000,000, Television-Electronics Fund Inc. this week released what it believes is first published "study" of TV industry's inventory position. Details of how figures were arrived at weren't disclosed, but investment trust's statisticians estimated accumulated inventory on May 1 at between 1,750,000 and 1,850,000 sets, or about a 3 to 3½ months' supply based on average monthly sales for preceding 12 months.

Report estimated inventory at 1,261,000 as of Jan. 1, 1951, rising to 1,835,000 as of April 1 and 1,935,000 as of April 27. Latter figure, it is stated, should be adjusted to allow for between 150,000 and 200,000 sets scrapped and destroyed—hence the above May 1 "guesstimate."

* * * *

Radio, TV & Parts Conference of IUE-CIO, representing about 75,000 workers (Daniel Arnold, RCA, chairman), adopted resolutions in Chicago May 5 making these points:

(1) Asks companies to cut prices, produce lower-priced models. Asks Federal Reserve Board "to temporarily liberalize the credit rules [by] reducing the down payment to 15% and permitting old sets to be used as part of the down payment." Opposes proposed increase in excise tax to 25%.

(2) Wants defense agencies to "take more vigorous steps" to see that "proper share" of electronics prime and subcontracts go to electronics industry, and that such contracts "be distributed widely and not concentrated into a few firms." Union refers to 190,000 workers in TV, radio, parts industries, foresees 400,000 within another year. It claims "resources of this industry have not been adequately utilized," asserts "new facilities are being built while present facilities are inadequately used, new manpower is being hired and trained in new centers while present manpower suffers unemployment."

(3) Seeks to wipe out what it calls present "12-15¢ an hour differential our industry suffers compared with others." Asks that (a) wages be adjusted for increases in living costs; (b) wages be adjusted for increases in productivity; (c) all segments of industry be brought up to date with respect to pensions, insurance, severance pay, vacations, holidays, etc.; (d) $2000 wage floor be set for average year's work; (e) layoff plan be adopted providing for full pay for short periods of unemployment, half-pay for prolonged layoffs—all to come out of company profits (Vol. 7:16).

* * * *

Admiral is introducing 14-in. table model at $159.95, including excise tax, lowest price it has ever quoted. Purpose stated by sales v.p. Richard Graver: "To bring TV back within the buying power of the majority of American wage earners, whose ability to buy more expensive models has been seriously handicapped by the high down payments and short repayment period imposed by Regulation W."

John Meck May 8 guaranteed prices against reduction until Sept. 15, and RCA distributor Krich-New Jersey this week went RCA's guarantee to Aug. 1 (Vol. 7:18) one month better and extended it to Sept. 1.

DuMont's guarantee against price reductions, announced this week in wake of RCA and GE guarantees (Vol. 7:18), is all-inclusive, reads thus: ". . . beginning May 9, 1951, and continuing until Sept. 10, 1951, [DuMont] guarantees distributors against any reduction in distributor prices below the published price schedule of Nov. 1, 1950, on merchandise purchased by distributors during the period of guarantee. Under this guarantee, the distributor will receive a merchandise credit or cash covering reduction of distributor prices, whether brought about by price control, rollback, or otherwise . . ." No new models will be offered before fall, DuMont also stated.

New trade-in policy developed by Krich-New Jersey Inc., RCA distributor, which may be extended to other areas where there are lots of 10-in. receivers: Krich guarantees to pay dealers $50 for any 10-in. sets they take as trade-ins against purchase of more expensive 1951 model with larger screen. If dealer wants to keep set for resale, RCA Service Co. will overhaul it for $8.95.

RTMA tax committee has submitted study on effect of proposed excise tax increase to 25% to House Ways & Means Committee, supporting industry's recent testimony (Vol. 7:5-13). Report prepared by Boni, Watkins, Mounteer & Co., New York, shows that increase would "drastically affect industry sales," particularly among lower income consumers; also that loss of revenue to Govt. from income and excess profits taxes would largely offset additional revenue that might be obtained from higher excise.

Meeting on trade practice rules will be held by RTMA in Washington June 21, preparatory to industry conference with Federal Trade Commission which has called conference but set no date (Vol. 7:10). Proposals to be submitted to industry meeting first will be approved by RTMA board at June 4-7 Chicago meeting.

* * * *

RCA has started production of electrostatically-focused 17-in. tube sets, to be delivered later this month. Electrostatic picture tubes will be used in RCA's 14 & 19-in. sets when current supply of magnetic-type tubes and focusing components is exhausted. No model change is involved. Majestic will begin production of electrostatically-focused set in 6-8 weeks, using new 21-in. all-glass rectangular tube to be produced by American Television Inc. (U. A. Sanabria) beginning June 1.

Canadian RMA reports 5995 TVs sold by factories for $3,501,795 during March, with inventory of 2830 units as month ended. Table models under $400 list price totaled 338, over $400 totaled 1735. Consoles under $500 totaled $432, over $500 totaled 2985. TV-phonos numbered 465. Windsor area (Detroit) took 38% of March sales, Toronto-Hamilton took 39%. First 3 months of 1951 unit sales were 14,052, valued at $7,696,855. Cumulative TV sales to March 31 totaled 51,875 valued at $23,973,438, with 44% in Windsor area, 35% in Toronto-Hamilton, 16% in Niagara Peninsula, 5% other areas.

Plant Expansions: Bendix Radio has leased 40-acre former Pimlico tract, Baltimore, has remodeled field's 2 hangars, will use space to train Air Force personnel in maintenance of electronic equipment . . . Radio Materials Corp. (ceramic condensers) building new one-story plant at 3311 N. California Ave., Chicago; it adds 15,000 sq. ft. to the 6500 already available in 1708 Belmont Ave. plant and 30,000 in Attica, Ind. . . . Canadian Westinghouse, which recently completed new plant at Three Rivers, Que., plans 2 new plants in Hamilton, Ont., for defense electronics and other production.

GE is shipping its 24-in. console to distributors, priced at $775 (Vol. 7:2). GE is also shipping 24-in. tube to distributors.

Trade Miscellany: "We Have the Most to Save, Let's Save the Most," was slogan that won $600 all-plant prize in RCA contest to promote savings of critical materials; winner, out of 17,000 entries, was Theodore Miley, operator in engineering section of Lancaster tube plant . . . Custom TV market took about $10,000,000 worth of chassis in 1950, which means estimated 90,000 such units were bought and installed in fireplaces, bookcases, wall recesses, special cabinets, etc., according to John H. Cashman, Radio Craftsmen president . . . Arvin has new 12½-in. console at $199.95; it also recently put last year's 8½-in. table model at $129.95 back into line (Vol. 7:15) . . . Second TV outlet projected in Sao Paulo, Brazil, is reported by IT&T, whose subsidiaries have orders for complete equipment, including Telecruiser remote pickup coach and microwave links; new company is Radio Televisao Paulista, S. A. . . . Some 3000 TVs are now in use in Rio de Janeiro and Sao Paulo, reports Philco International v.p. R. L. Romeyn, and another 5000 should be sold in those cities by end of 1951 . . . RCA Victor is first to announce summer vacation closedown period—July 7-16, same dates as many of its suppliers . . . Admiral consoles will be installed in all suites of both Ambassador East and Ambassador West Hotels in Chicago, beginning June 1; contract between hotel management and Admiral was signed May 9 . . . Hotel Book-Cadillac, Detroit, has installed RCA "Antenaplex" system to permit TV reception in each of its rooms; installation was by Wells Television Inc.

TV-radio workers averaged $57.53 per week in February, reports Bureau of Labor Statistics. This compares with $57.55 in January, $56.96 in December. BLS also noted that TV-radio employes worked 40.4 hours in February, 40.9 in January, 41.1 in December; earned hourly average wages of $1.424 in February, $1.407 in January, $1.386 in December. Average weekly earnings for all 1950 were $53.85, compared with $50.68 for 1949, average weekly hours were 40.7 vs. 39.5, hourly earnings $1.323 vs. $1.283. BLS also reported industry employed 180,900 production workers in February, 179,900 in January, 190,300 in December—compared to average of 159,000 for all 1950.

Admiral's Ross Siragusa said May 12 his company is now producing 40,000 TVs a month, same as second 1950 quarter, adding that "sales have turned the distress corner." He said Admiral owes no money, contemplates no bank loans.

Offering of 400,000 shares of Sylvania common, priced at 29⅛, was sold quickly this week when placed on market by Paine, Webber, Jackson & Curtis and about dozen associated underwriters. About two-thirds of proceeds will be used to increase working capital, remainder largely for new equipment.

Trade Personals: Wm. C. Scales appointed gen. sales mgr., DuMont cathode ray div. . . . Milton R. Benjamin promoted to sales v.p., Majestic . . . Harold W. Giesecke, ex-Westinghouse, appointed asst. to gen. mgr., Bendix Radio . . . George Axmacher has resigned as sales mgr., Freed Radio . . . Edward J. Penberthy named sales mgr., Radio Condenser Co.; David DeWitt named research v.p., Devereaux Martin asst. to president, Allan Easton mgr. of communications engineering, Radio Receptor Co. . . . Joseph B. Hersh named executive v.p., O. L. Cohen purchasing v.p., John A. Van Auken, sales v.p., Utility Electronics Corp. . . . N. J. Sims promoted to mgr. of distribution, F. T. Myles to mgr. of home instruments dept., RCA Victor Ltd. of Canada . . . Rex Wilson, chief engineer, elected engineering v.p. of Tele-Vogue Inc., Chicago, manufacturing subsidiary of Muntz TV Inc.; W. G. Henke, ex-Admiral, named coordinator of engineering.

Financial & Trade Notes: Philco discloses govt. defense orders totaling about $100,000,000 for radar, electronic and ordnance equipment, research and development programs, training projects—one of largest, if not largest, totals in electronics industry. Nearly 2000 Philco technical representatives are on duty all over the world with Army, Navy and Air Force, working on electronic equipment, president Wm. Balderston stated in announcing first quarter report.

Philco sales first 3 months of 1951 were $113,524,000, new record for any quarter in its history, comparing with $79,487,000 same quarter last year. Net income after taxes was $4,354,000 or, after preferred dividends, $1.21 per share on 3,525,372 shares of common outstanding. In same period last year, profit was $4,074,000 ($1.13). Increased taxes brought Federal tax bill for quarter to $9,542,000 vs. $3,358,000 same quarter 1950, up 184%.

"We are now going through a period of balancing production with sales, which may last for another few weeks," said Mr. Balderston. "The country has demonstrated that it can maintain a high level of civilian output at the same time it is building up its defenses, and this means that Philco production and sales for 1951 promise to be considerably greater than appeared likely in January."

* * * *

Among officers' and directors' stock transactions reported by SEC for March: Lynn C. Park gave 1000 Admiral as gift, holds 24,820; Joseph B. Hall bought 200 Avco, holds 400; Herbert W. Clough bought 100 Belden Mfg., holds 600; Arthur L. Wanner bought 50 Belden Mfg., holds 1850; William C. Decker bought 3000 Corning Glass, holds 7296; Charles D. LaFollette bought 2000 Corning Glass, holds 5200; Allen B. DuMont gave 100 DuMont as gift, holds 56,400; Anthony R. Kirsch bought 50 Indiana Steel (Feb.), holds 50; Percy L. Schoenen sold 1900 Olympic (Sept. 1950), holds 22,600; Courtnay H. Pitt sold 200 Philco, holds 1270; William Gammel Jr. gave 100 Raytheon as gift, holds 17,170; Robert H. Bishop sold 400 Sylvania, holds 659; Arthur L. Chapman bought 38 Sylvania, holds 58; Curtis A. Haines bought 43 Sylvania, holds 143; John S. Learoyd bought 37 Sylvania (Feb.), holds 587; Don G. Mitchell bought 174 Sylvania, holds 3174; Donald MacGregor sold 100 Zenith, holds 150.

Oak Mfg. Co. transactions reported by SEC: Common —William Bessey bought 800, inherited 7418, holds 12,229; John A. Rovelstad bought 300, holds 2556; Elof Sandstrom bought 800, holds 5512. Warrants for common—Peter B. Atwood sold 2000, holds 1500; William Bessey sold 800, Robert A. O'Reilly sold 1800, John A. Rovelstad sold 1000, Elof Sandstrom sold 1500, Irwin N. Walker sold 1470, no longer hold any warrants.

* * * *

Hoffman Radio, due to sharp declines in TV sales in March, showed first quarter sales of $5,771,607 as against $6,240,660 for same 1950 period. Net dropped to $107,876 (18¢ a share) from $680,596 ($1.19) for same period last year. Inventories at end of quarter were $5,955,878 vs. $2,763,332 on March 31, 1950. Hoffman, according to financial reports, expects to apply later this year for listing on N. Y. Stock Exchange.

Olympic has borrowed $500,000 from Irving Trust Co. on 4% notes running to 1956, payable semi-annually at rate of $100,000 a year. Proceeds will be used to prepay $375,000 balance of present term loan and for working capital.

Dividends: Hytron, 10¢ payable June 15 to holders of record May 31; Television-Electronics Fund Inc., 15¢ payable May 29 to holders May 15; Blaw-Knox, 25¢ payable June 12 to holders May 14.

Mobilization Notes: Controlled Materials Plan rules on inventories and distributors' sales (Regs. 2 & 4) were issued May 10 by NPA. Reg. 2 generally limits steel inventories to 45 days' supply, copper and aluminum to 60 days' supply. Reg. 4 requires distributors to accept all orders bearing CMP allotment numbers or DO ratings. Application form CMP-4A for manufacturers of military items and machinery not on "B" list (Vol. 7:18) is now being mailed to manufacturers. NPA has issued Product Assignment Directory, listing 13,000 items and indicating in each case the NPA industry division assigned to the product for purposes of CMP and limitation orders. Also issued by NPA, and being mailed to all firms who are expected to operate under CMP, is brief non-technical booklet, *ABC's of CMP*. All of this CMP material will soon be available from Commerce Dept. field offices, and can be obtained now from NPA, Washington 25, D. C.

Only one of 90 certificates for rapid tax amortization of new production facilities granted by DPA April 27-May 3 went to manufacturer of electronic products. Collins Radio was issued certificate for 5-year writeoff of 80% of $77,382 in new Arcadia, Cal. facilities for production of radio units. The 90 certificates represented expansion costing $291,112,376. Total certificates issued through April 13 covered expansion valued at $3.25 billion, vast majority for production and processing of basic materials. Electronic and electrical production facilities represented about 1% of this amount, or $32,800,000.

Nickel is so critical that NPA has ordered International Nickel Co., sole supplier, not to furnish during May more than 60% of nickel called for in any defense-rated (DO) order, or more than 15% of monthly average first-half 1950 consumption to civilian users. This directive doesn't apply to receiving tube industry, to which 200,000 lb. of nickel was allocated for May, 180,000 for June—close to 75% of the industry's first-half 1950 average monthly rate of use. Allotment is for both military and civilian tubes, and comparative size of tube industry's ration indicates how vital NPA regards electronic industry.

To help relieve copper shortage, Congress this week passed bill to suspend 2¢-a-pound copper import duty retroactively from April 1 until Feb. 15, 1953, with duty to go back into effect whenever domestic copper price falls below 24¢ a pound. Duty was suspended during World War II and during most of post-war period. President is expected to sign bill. General Services Administrator Jess Larson told Congressional committee govt.'s program of tungsten purchases will total about $185,000,000, with losses not expected to run over $25,000,000 when the tungsten is resold domestically. Meanwhile, NPA officials said less than 5% of nation's rearmament program is "in trouble" because of metal scarcities.

Radio, TV and Household Appliance Wholesale Advisory Committee (Vol. 6:51, 7:2) will meet with NPA May 17 in Washington, with replacement parts problem prime topic on agenda.

———▪———

Mobilization Personals: John Dillon, former IUE-CIO board member and ex-Sperry Gyroscope employe, on loan from union to serve as labor consultant to NPA Electronics Div. director John G. Daley . . . Willard Green, formerly in FCC AM Engineering Div., named to staff of NPA Electronics Div., to serve in end products section under J. Bernard Joseph . . . Berlon C. Cooper, ex-eastern editor of *Electrical Construction & Maintenance*, named consultant to NPA Building Materials Div. . . . Kenneth H. Klipstein, on leave as gen. mgr., Calco Chemical Div. of American Cyanamid Co., succeeds Joseph S. Bates, resigned, as head of NPA Chemical Div.

Steel limitation order M-47 definitely will be tightened next quarter. Here's why: More than half the nation's record steel output will probably have to be set aside for defense and defense-supporting programs in July, even more in August. So NPA told steel industry May 10. That will mean 10-15% greater bite into steel supplies—much of it to be absorbed by consumer durables industries.

M-47, which permits TV-radio manufacturers to use steel during second quarter at 80% of first-half 1950 rate (Vol. 7:10-11, 14) will probably be chopped to 70% for third quarter. Auto makers have already been cut to 75% for June, and told their July quota will be 70%.

Principal complaint of TV-radio makers continues to be that M-47 freezes manufacturers' permitted intermixture of models and types of products. NARDA president Mort Farr, in letter this week to NPA chief Fleischmann, said in this respect "M-47 goes beyond the required limits and creates artificial obstacles to the normal free play of our economy." In TV-radio-phono field, Farr said, Regulation W has brought lower-priced units into "greater demand than they normally would be." Combining or reducing number of the 5 listings in this category, he said, would help fill this demand and benefit "every segment of the industry, from consumer to manufacturer."

Industry got promise last month from NPA assistant administrator Horace B. McCoy that effort would be made to break TV-radio-phono category down to 3 listings, so that steel quotas for radio-phonos could be shifted to radios, and quotas for TV combinations could be used to make more lower-priced TV-only sets.

———▪———

The Russians, self-proclaimed "inventors" of TV, say they're engaged in big expansion program, according to May 7 *New York Times* dispatch from Moscow. *Izvestia* reports stations operating in Moscow, Leningrad and Kharkov, more under construction. Number of sets isn't known, but *Pravda* reported 7845 in Moscow last August, and *Times'* correspondent says number of antennas on apartments is "visibly growing." Three types of sets made are: T-1 & KV-49 (4¼x5½-in. screen), T-2 (5x7-in.), with "same price as American console TV sets." Soviets use 625-line system, and definition "compares well with the American." *Izvestia* says world's first TV set was built in 1907 by Boris L. Rossing, a teacher, calls him TV's inventor. This week, New York longshoremen refused to handle baggage of home-going Soviet UN delegates; included were TV sets, washing machines and refrigerators.

Optimistic views of future, as enunciated by industry leaders in current statements: "I think the TV market for the next 10 to 12 years will average from 6,000,000 to 9,000,000 sets per year, depending on the initiative of the manufacturers."—Joseph B. Elliott, RCA Victor. "This year's autumn and winter TV business will be very strong." —Robert W. Galvin, Motorola (who also told stockholders meeting May 7 that Motorola will have profitable second quarter due to good rate of communications, auto and radio sales). "The general condition which we and the industry are now experiencing gives every indication of being only a pause in the extraordinary growth of TV receiver sales."—H. L. Hoffman, Hoffman Radio.

Footnote on TV demand: Letter received by FCC from a citizen of Ft. Wayne, Ind.: "Isn't there any way you could figure Television herein Ft Wayne were a large City with 26 towns with in a aeria of 25 miles. Sir it's hard for us we need a technician bad and I had a fine operator to come here, as soon as he learnd there wasent any television he flatly refused. NO. All so I understand the the International harvester had an engineer a 25 thousand year man point blank refuse to come here on account of no television . . ."

Telecasting Notes: Here's trend that can't be blinked: NBC-TV billings in March ($4,594,203) were only about $500,000 or so under its AM billings ($5,085,636)—and it's confidently expected TV will surpass AM shortly. Figures do not include own stations' income. PIB report (Vol. 7:17) also showed January-March quarter NBC-TV billings at $12,730,785 vs. its network radio's $15,033,209. Speedy rate of change is indicated by fact that NBC-TV billings in March 1950 were only $1,175,186 vs. its AM network's $5,847,374 . . . Mutual, pointing with pride at upsurge of AM billings, reports $6,139,450 for first 4 months of this year vs. $5,932,407 for same 1950 period, gain of 4% . . . WATV, Newark, signed lease to join 5 New York stations on Empire State Bldg., leaving WOR-TV only station not included. Novel antenna for WATV, designed by Andrew Corp.'s M. W. Scheldorf, ex-GE, features elements located around 29-ft. mooring mast itself . . . Paramount's KTLA, Los Angeles, set up own microwave relay for 102-mi. remote last week from Pt. Loma, San Diego, to Mt. Wilson, to pick up arrival of First Marine Division contingent from Korea—believed to be longest remote on record, rivaled only by WBKB's South Bend-to-Chicago 92-mi. remotes for Notre Dame football . . . Denver Post considering applying for TV; if it does, it will be city's eighth applicant (see TV Factbook No. 12) for the 4 vhf (one educational) and 2 uhf channels earmarked for area (see Allocation Report) . . . Bulldozer worked by farmer near Aberdeen, Md. cut 2 coaxial cables afternoon of May 7, cut off network shows south of Philadelphia for about day before they were repaired . . . Abbott & Costello latest to contract with NBC-TV, other top comedians on its contract list being Milton Berle, Bob Hope, Groucho Marx, Jimmy Durante, Eddie Cantor, Ed Wynn, Sid Caesar, Imogene Coca, Danny Thomas, Jack Carson, Dean Martin & Jerry Lewis . . . PRB Inc., TV-radio producing firm set up by Mary Pickford and Buddy Rogers, being dissolved after partner Mal Boyd decided to study for Episcopal priesthood.

Affiliates Committee growing out of opposition to network rate cuts (Vol. 7:16-17) has collected $10,000 from almost 150 stations, seems assured of continuance. Committee meets May 15 in New York, plans to hear A. C. Nielsen and J. B. Ward, Advertising Research Bureau Inc., Seattle, on research to prove AM still a good buy. Meanwhile, latest survey showing pickup in radio listening among TV owners is from WOR, New York. Based on Pulse Inc. study, it shows that 53.7% of TV owners with sets more than 2 years old listen to radio on average night, compared to 36.2% who've had set 9 months or less. Among TV owners who have had set 2 years or more, 27.8% listen to radio for hour every night; of newer TV owners, only 17.8% listen for hour each night.

Georgia Tech (WGST) has protested to FCC the sale of Atlanta's WSB-TV to group of local businessmen (Vol. 7:16), advocating instead that its Channel 8 be assigned to one of 3 existing applicants *(TV Factbook No. 12)*. Application for sale of WSB-TV was returned last week by FCC on grounds it couldn't tell who ultimate stockholders would be, since two-thirds of stock was proposed to be held by investment firm of Clement Evans & Co. Application is expected to be refiled shortly (Vol. 7:18).

General Tire & Rubber Co. (O'Neil interests), for tax and other business reasons, has secured FCC approval to transfer Yankee Network stations to Thomas S. Lee Enterprises, purchased last year from estate of Thomas Lee (Vol. 6:42-45). Plan is to operate that subsidiary as 2 divisions: Don Lee Network and Yankee Network. Yankee stations involved: WNAC, WNAC-TV & WNAC-FM, Boston; WICC, Bridgeport; WONS, Hartford; WEAN, Providence; WGTR (FM), Paxton, Mass.

DOUBLED uhf signal strength at receiver was achieved, RCA announced this week, by tilting Bridgeport transmitting antenna 2½ degrees up or down. These results have obvious and enormous implications for improved service with lower-powered, less-expensive transmitters.

RCA is now studying effect on station interference, but experienced engineers doubt whether tilting will produce extra trouble. In fact, they think it may reduce interference.

Practice isn't new, since work of this kind was done for military during war. In Los Angeles, KECA-TV is now titled "electrically," through phasing. KTTV has experimented with both physical and electrical tilting. WJZ-TV will be tilted electrically when it begins operations from new Empire State Bldg. antenna.

Way technique works, as we understand it, is that tilting permits direct signal and ground-reflected signal to combine, produce cumulative effect.

———■———

FCC budget for July 1, 1951-June 30, 1952, was cut $575,000 to flat $6,000,000 May 4, when House, in economy mood, pruned all independent offices appropriations. FCC cut was marked by bitter diatribe against "pinks and reds" in Commission by Rep. Cox (D-Ga.), who was chairman of 1943 Select Committee that investigated FCC. Cox charged that the Law Dept. controls Commission and "has sought to dominate, to control and to terrorize" station operators. He was abetted by Rep. Rankin (D-Miss.), who proposed elimination of entire FCC appropriation. To defense of FCC came Rep. Thomas (D-Tex.), who cited Comr. Jones (an ex-Congressman) as being "no more a Communist than this table is"; he also defended other commissioners. FCC officials hope Senate will restore cut; otherwise it may be difficult to maintain present 1205 employes.

Crosley asked for Channel 11 in Toledo this week, making third application for that one-station (WSPD-TV) city *(TV Factbook No. 12)*. Crosley now operates WLWT, Cincinnati; WLWD, Dayton; WLWC, Columbus; is applicant for Indianapolis. Also this week, WTBO asked FCC to dismiss its application for Cumberland, Md.

Supreme Court's color decision (Vol. 7:13) should come May 14 or 28, possibly June 4—since Court doesn't sit May 21, is trying to recess for summer on May 28 or June 4 at latest. Traditionally, Court doesn't hold such cases over until beginning of fall sessions.

First uhf transmitter order received by RCA came from WFPG, Atlantic City, which bought 1-kw unit (TTU-1B), plus antenna and monitoring equipment. Antenna will be mounted on station's 408-ft. AM-FM tower.

Latest to announce uhf converter is Air King, whose parent Hytron was recently purchased by CBS (Vol. 7:15). Company quotes lowest price yet, $29.95 including antenna, says it will have units ready when uhf stations are on air.

More May 1 sets-in-use reported since NBC Research's "census" of April 1 (Vol. 7:17): Los Angeles 1,038,750, up 138,750; St. Louis 289,000, up 7000; Kansas City 118,523, up 3523; Omaha 77,415, up 4615.

Appearances for Hearing

Digests of Comments on Proposed TV Allocation Plan

Hearing Scheduled to be Conducted before FCC en banc Starting June 11, 1951; Docket No. 8736

For proposed rules and table of allocations, see TV Allocation Report issued by FCC March 22, 1951 and published in full text by Television Digest March 24, 1951

(Note: Included are digests of all proposals filed through May 7, 1951 available in FCC files)

SPECIFIC AND GENERAL COMMENTS

(For list of educational institutions favoring plan in general terms, see page 7)

ALABAMA

Johnston Broadcasting Co., Birmingham (WJLD)—Requests assignment of Channel 7 to Birmingham, substituting 4 for 2 in State College, Miss., 2 for 7 in University, Ala. (Franklin K. Lane & Orville H. Walburn).

Birmingham Broadcasting Co. Inc., Birmingham (WBRC & WBRC-TV)—Favors FCC proposal to shift WBRC-TV from Channel 4 to 6. (George O. Sutton).

Voice of Dixie, Birmingham (WVOK)—Requests assignment of Channel 7 to Birmingham, affecting following cities: Meridian, West Point, State College, Miss.; University, Ala. Stephen Tuhy, Jr.).

Deep South Broadcasting Co., Montgomery (NEW)—Requests assignment of Channel 3 to Montgomery, substituting 4 for 11 in Meridian, Miss., 11 for 13 in Biloxi, Miss., 13 for 3 in Pensacola, Fla. (Stephen Tuhy Jr.).

Tuscaloosa Broadcasting Co., Tuscaloosa (WTBC)—Requests assignment of Channel 2 to Tuscaloosa from State College, Miss.; add 4 to State College. If plan proposed by WREC Broadcasting Service is adopted, requests assignment of 8 to Tuscaloosa. (Prince, Taylor & Crampton).

ARKANSAS

Southwestern Publishing Co., Fort Smith (KFSA)—Requests assignment of Channel 8 to Fort Smith from Muskogee, Okla.; 11 instead of 8 for Muskogee. (Haley, McKenna & Wilkinson).

CALIFORNIA

McClatchy Broadcasting Co., Bakersfield (KERN)—Requests assignment of Channel 8 to Bakersfield. (Dow, Lohnes & Albertson).

Radio Station KERO, Bakersfield (KERO)—Requests assignment of Chanel 8 to Bakersfield. (Pierson & Ball).

California Inland Broadcasting Co., Fresno (KFRE)—Requests assignment of Channel 3 to Fresno from Visalia, substituting 49 for 3 in Visalia. (Pierson & Ball).

KARM, George Harm Station, Fresno (KARM)—Requests assignment of Channel 5 to Fresno from Goldfield, Nev.; substituting 11 for 5 in Goldfield, Nev.; or, 7 to Fresno; or, 9 to Fresno from Tonopah, Nev.; 6 to Tonopah from Ely, Nev.; 12 to Ely. (Hogan & Hartson).

McClatchy Broadcasting Co., Fresno (KMJ)—Requests assignment of Channels 5, 7 & 9 to Fresno. Requests reduction in minimum separation requirements. (Dow, Lohnes & Albertson).

Pacific Video Pioneers, Long Beach (KALI)—Requests liberalization of 23-db maximum power limitation on Channels 14 to 83, permitting single stations to increase to 26 db and permitting horizontal increases by 2 or more stations. (Haley, McKenna & Wilkinson).

American Broadcasting Co., Los Angeles—See New York, N. Y.

Earle C. Anthony Inc., Los Angeles (KFI & KFI-TV)—Requests that adjacent-channel ratio be changed from 0 db to —6 db and clarification of height-power-interference requirements, particularly in relation to mountain-top installations. Also requests arrangement with Mexico permitting KFI-TV and KECA-TV to achieve 200 kw at present heights. (Caldwell-Rollo).

KMTR Radio Corp., Los Angeles (KLAC & KLAC-TV)—Requests change of adjacent-channel ratio from 0 db to —6 db. (John P. Hearne, Los Angeles).

KTTV Inc., Los Angeles, Cal. (KTTV)—Requests amendment of adjacent-channel ratio from 0 db to —6 db. (Hanson, Lovett & Dale).

U of Southern California, Los Angeles—Objects to reservation of uhf channel for educational use. (William H. Sener, TV dept.).

Steven A. Cisler, Monterey—Favors FCC proposals for Monterey. (Barnes & Neilsen).

Monterey Radio-Television Co., Monterey (purchase of KMBY pending)—Favors FCC proposals for Monterey. (Dow, Lohnes & Albertson).

KROW Inc., Oakland (KROW)—Requests reclassification of Channel 9 for commercial use, assign uhf to educational, return 13 to San Francisco-Oakland. (John P. Hearne, Los Angeles).

Tribune Bldg. Co., Oakland (KLX)—Requests assignment of Channel 13 to Oakland from Stockton; 3 to Stockton from Visalia; 2 to Visalia; 4 to Reno in lieu of No. 3. (St. Clair, Connolly & Cerini and Wheat, May & Shannon).

KECC Inc., Port Chicago (KECC, Pittsburg, Cal.)—Requests assignment of Channel 15 to Port Chicago. (Fly, Shuebruk & Blume).

Harmco Inc. (KROY) and KCRA Inc. (KCRA), Sacramento—Request assignment of Channels 3 & 8 to Sacramento from Reno. assignment of 2 or 4 & 11 to Reno. (Hogan & Hartson and Loucks, Zias, Young & Jansky).

KCRA Inc., Sacramento (KCRA)—See Harmco Inc.

McClatchy Broadcasting Co., Sacramento (KFBK)—Requests assignment of Channel 3 to Sacramento from Reno, substituting 4 for 3 in Reno. (Dow, Lohnes & Albertson).

Salinas Broadcasting Co., Salinas (KSBW)—Requests assignment of Channel 8 to Salinas from Monterey, substituting 28 for 8 in Monterey. (Krieger & Jorgensen).

Airfan Radio Corp., San Diego (KFSD)—Requests assignment of Channel 6 or 12 to San Diego, to be replaced in Tijuana, Mex., with uhf channels. (Hogan & Hartson).

Charles E. Salik, San Diego (KCBQ)—Requests assignment of Channel 6 or 12 to San Diego, leaving 6 or 12 to Tijuana, Mex. (Cohn & Marks).

Television Broadcasting Co., San Diego—Requests assignment of Channel 15 to San Diego; 12 to San Diego from Tijuana, Mex.; 27 and 33 to Tijuana from San Diego; assign uhf Channels to Mexico by specific number; have maximum power agreement between Mexican and United States stations. (L. N. Papernow).

Columbia Broadcasting System, San Francisco—See New York City.

Television California, San Francisco (KM2XCW)—Requests assignment of Channel 13 to San Francisco-Oakland from Stockton; substituting 4 for 3 in Reno, 3 for 6 in Sacramento, 6 for 13 in Stockton. (Haley, McKenna & Wilkinson).

Standard Radio & Television Co., San Jose—Favors FCC proposal for San Jose. (Krieger & Jorgensen).

Radio KIST Inc., Santa Barbara (KIST)—Requests assignment of Channel 8 to Santa Barbara. (Hogan & Hartson).

COLORADO

Northwestern Colorado Broadcasting Co., Craig (KRAI)—Requests assignment of Channel 5 to Craig. (Fletcher & Midlen).

Sen. Edwin C. Johnson (D.-Colo.), Denver—Requests addition of more vhf channels to Denver, through one of 3 alternative channel shifts involving Boulder and Colorado Springs, Colo.; Cheyenne and Rawlins, Wyo.; Alliance, Neb., plus reclassification of Channel 6 as commercial in Denver.

Sen. Eugene D. Millikan (R-Colo.) Denver—Objects to allocation of only 10 vhf channels to Colorado; requests that vhf allocations to State be "more equitably" increased.

San Juan Broadcasting Co., Durango (KIUP)—Requests assignment of Channel 6 to Durango. (Wilkinson, Boyden & Cragun).

Western Slope Broadcasting Co., Grand Junction (KFXJ)—Requests assignment of Channel 3 to Grand Junction. (Fletcher & Midlen).

Uncompaghre Broadcasting Co., Montrose (KUBC)—Requests assignment of Channel 11 to Montrose, affecting Price, Provo, Ogden, Logan, Tooele, Utah. (Fletcher & Midlen).

CONNECTICUT

State Dept. of Education, Hartford—Requests that uhf flexibility channels be made available to educational institutions. (F. E. Engleman, commissioner).

CONNECTICUT (Continued)

Hartford Times Inc., Hartford (WTHT)—Requests assignment of Channel 3, 59 & 81 to Hartford by 3 alternative plans, affecting following cities: New Haven, New London, Montpelier, Vt., Lewiston, Me. Requests use of flexibility channels. (Arnold, Fortas & Porter).

Travelers Broadcasting Service Corp., Hartford (WTIC)—Requests assignment of Channel 3 or 10 and 81 or 83 to Hartford, affecting following cities: New London; Providence; Montpelier, Vt.; Lewiston, Me. Also requests that flexibility channels be assigned to cities for which channels have been provided, that transmitter-to-transmitter spacing, rather than city-to-city spacing, be ruling criterion, and that directional antennas be permitted. (Caldwell-Rollo).

Connecticut Radio Foundation Inc., New Haven (WELI)—Favors FCC proposals for New Haven. (Dow, Lohnes & Albertson).

Elm City Broadcasting Corp., New Haven (WNHC & WNHC-TV)—Favors FCC proposal to shift WNHC-TV from Channel 6 to 8, provided no changes are made in suggested rules and standards and in Connecticut allocations. (Fisher, Wayland, Duvall & Southmayd).

Thames Broadcasting Corp., New London (WNLC)—Favors FCC proposals for New London. (Dow, Lohnes & Albertson).

DELAWARE

WDEL Inc., Wilmington (WDEL-TV)—Favors FCC proposal to shift WDEL-TV from Channel 7 to 12. (George O. Sutton).

DISTRICT OF COLUMBIA

Federal Communications Bar Assn.—Requests immediate oral argument on legality of allocations procedure. Contends that (a) procedure for making changes in allocation are illegal, depriving applicants of right to be heard, (b) orderly and expeditious review of Communications Act will be thwarted, (c) FCC will be unable to perform duty of providing fair, efficient and equitable distribution of radio service. Requests that allocation plan be regarded only as a guide and that applicants requesting channels not provided for in plan be afforded hearings. (William A. Porter, president; Leonard H. Marks, chairman, committee on practice and procedure.)

Joint Committee on Educational Television, Washington—Requests that (a) Educational institutions be permitted to apply for flexibility channels where no other channels are reserved, (b) an additional priority be established stipulating a non-commercial service to all of U.S. through reservation of frequencies, (c) cities with fewer than 3 vhf channels have uhf educational channels reserved, (d) provision be made for vhf educational TV in cities where all vhf channels are now occupied. (Telford Taylor and Seymour Krieger).

McNary & Wrathall, Washington—Questions uhf propagation figures, claims it is erroneous for irregular terrain. Requests engineering conference on use of offset-carrier with uhf, higher powers for uhf, clarification of adjacent-channel ratio for antennas over 500 ft.

Television Board, National Assn. of Radio & Television Broadcasters—Opposes educational reservations, endorses principle of pre-determined allocation plan and partial lifting of freeze. (Thad H. Brown).

U. S. Conference of Mayors, Washington—Requests that municipalities operating school systems be eligible to apply for reserved, educational channels. (David L. Lawrence, Mayor of Pittsburgh, president).

FLORIDA

Gore Publishing Co., Fort Lauderdale (WFTL)—Requests assignment of Channel 9 to Fort Lauderdale, substituting 13 for 10 in Miami, 11 for 12 in West Palm Beach, 12 for 11 in Fort Myers. (Haley, McKenna & Wilkinson).

U. of Florida, Gainesville (WRUF)—Requests reclassification of Channel 5 to commercial use. (Dow, Lohnes & Albertson).

City of Jacksonville, Jacksonville (WJAX)—Requests assignment of Channel 2 to Jacksonville, substituting 11 for 2 in Daytona Beach, 6 for 2 in Tallahassee, 3 for 6 in Thomasville, Ga. (Dow, Lohnes & Albertson).

Jacksonville Broadcasting Co., Jacksonville (WPDQ)—Requests assignment of Channel 10 to Jacksonville, reclassification of 7 to commercial use, 170-mile transmitter spacing be only separation criterion, additional assignments with reduced power. (Miller & Schroeder).

Fort Industry Co., Miami (WGBS)—Requests assignment of Channels 9 & 13 or 13 or 5, 9, 11 & 13 to Miami, affecting following cities: West Palm Beach, Fort Myers, Fort Pierce. Requests reclassification of 2 to commercial use, and 29 & 35 be reserved in lieu thereof. Requests review of all channel reservations every 6 months or less, with reservations to continue only if educational groups can show they are taking preliminary steps toward filing applications. (Dow, Lohnes & Albertson).

Isle of Dreams Broadcasting Corp., Miami (WIOD)—Requests assignment of Channels 9, 11 & 13 or 9 & 13 or 6 & 9 to Miami affecting following cities: Fort Myers, West Palm Beach, Tampa-St. Petersburg, Jacksonville, Orlando, Daytona Beach. (Dow, Lohnes & Albertson).

Miami Broadcasting Co., Miami (WQAM)—Requests assignment of Channels 9, 11, 13, 27 & 33 to Miami in lieu of 7 & 10; substituting 7 for 12 in West Palm Beach, 12 for 11 in Fort Myers. (Loucks, Zias, Young & Jansky).

WKAT Inc., Miami (WKAT)—Requests assignment of Channels 9 & 13 to Miami, affecting following cities: Daytona Beach, Fort Myers, Gainesville, Jacksonville, Orlando, Panama City, Pensacola, St. Petersburg-Tampa, Tallahassee, West Palm Beach. (Arnold, Fortas & Porter).

Central Florida Broadcasting Co., Orlando (WORZ)—Requests assignment of Channel 2 to Orlando, substituting 11 for 2 in Daytona Beach. (Hanson, Lovett & Dale).

Tampa Times Co., Tampa (WDAE)—Requests Channel 3 be reclassified to commercial use. (Dow, Lohnes & Albertson).

Tribune Co., Tampa, Fla. (WFLA)—Requests Channel 3 be reclassified to commercial use. (Segal, Smith & Hennessey).

GEORGIA

Radio Athens Inc., Athens (WRFC)—Requests assignment of Channel 11 to Athens from Atlanta, 7 to Atlanta, requiring modification of city-to-city adjacent channel (Atlanta) and co-channel (Johnson City, Tenn.) separation minimums. (Roberts & McInnis).

Atlanta Newspapers Inc., Atlanta (WSB & WSB-TV, hold CP for WCON-TV)—Favors FCC proposals for Atlanta. (Dow, Lohnes & Albertson).

Fort Industry Co., Atlanta (WAGA & WAGA-TV)—Favors FCC proposals for Atlanta. (Dow, Lohnes & Albertson).

Georgia Institute of Technology, Atlanta (WGST)—Requests assignment of Channel 7 to Atlanta. (Arnold, Fortas & Porter).

Southeastern Broadcasting Co. (WMAZ) and Middle Georgia Broadcasting Co. (WBML), Macon—Requests that Channel 7 be allocated to Macon, that 170-mile transmitter-to-transmitter spacing be retained, that city-to-city minimum be abandoned, that additional assignments be made at reduced power where they would better fulfill priorities. (Pierson & Ball).

IDAHO

Boise Valley Broadcasters, Boise (KDSH)—Requests Channel 4 be reclassified to commercial use; 7 or 9 reserved for education, or that uhf channels be added for education. (Arnold, Fortas & Porter).

KIDO Inc., Boise (KIDO)—Requests reserved channel be changed from 4 to 9. (Fisher, Wayland, Duvall & Southmayd).

ILLINOIS

Southern Illinois U, Carbondale—Requests reservation of Channel 10 to Carbondale, moving 6 from Indianapolis to Terre Haute, 10 from Terre Haute to Louisville, 11 from Louisville to Bloomington, 4 from Bloomington to Indianapolis, switching 6 and 12 in Paducah and Cape Girardeau. (D. W. Morris, president).

Champaign News-Gazette Inc., Champaign (WDWS)—Requests assignment of Channel 3 to Champaign affecting following cities: Cedar Rapids, Iowa City, Mason City, Ia.; Kirksville, Mo.; Springfield, Centralia, Ill.; waive mileage separation rules. (Spearman & Roberson).

Columbia Broadcasting System Inc., Chicago—See New York City.

Quad-City Broadcasting Corp., Moline (WQUA)—Requests assignment of Channel No. 10 to Moline-Davenport-Rock Island-East Moline, affecting vhf channels in following cities: Centralia, Quincy, Rockford, Springfield, Ill.; Evansville, Ind.; Cedar Rapids, Iowa City, Mason City, Waterloo, Ia.; Lawrence, Pittsburg, Kan.; Grand Rapids, Iron Mt., Mich.; Austin, Duluth-Superior, Rochester, Minn.; Hannibal, Jefferson City, Joplin, Kansas City, Kirkville, St. Joseph, St. Louis, Sedalia, Springfield, Mo.; Eau Claire, LaCrosse, Madison, Milwaukee, Wausau, Wis. Following stations, now operating, would have to change frequencies: WTMJ-TV, Milwaukee; WLAV-TV, Grand Rapids; KSD-TV, St. Louis. (Dalton Le Masurier, president).

Peoria Broadcasting Co., Peoria (WMBD)—Requests assignment of Channel 12 to Peoria, affecting following cities: Centralia, Springfield, Urbana, Ill., Cedar Rapids, Iowa City, Ia.; Kirksville, Mo. Requests minimum separation be 180 miles city-to-city or 170 miles transmitter-to-transmitter. (Dow, Lohnes & Albertson).

West Central Broadcasting Co., Peoria (WEEK)—Requests assignment of Channel 12 to Peoria, Ill., and Brookfield, Mo., deleted from Urbana, Ill., and Kirksville, Mo. (Pierson & Ball).

INDIANA

Sarkes Tarzian Inc., Bloomington (WTTV)—Favors FCC proposal to shift WTTV from Channel 10 to 4. (A. L. Stein).

Chamber of Commerce, Evansville—Requests assignment of Channel 29 to Evansville. (Leslie Lecroix, mgr., Traffic & Research Dept.).

South Central Broadcasting Corp., Evansville (WIKY)—Favors FCC proposals for Evansville. Suggests educational channels be reserved for one year only. (Franz O. Willenbucher).

Indiana Technical College, Fort Wayne—Requests assignment of Channel 5 to Fort Wayne for educational use, using low power. (Haley, McKenna & Wilkinson).

Public Schools, Gary—Requests (a) uhf flexibility channel be reserved, or (b) 50 be reserved, or (c) 44 be moved from Chicago and reserved. (C. D. Lutz, superintendent).

Lake Broadcasting Co., Gary (WWCA)—Requests assignment of Channel 11 to Gary from Chicago, assignment of 20 in Chicago for education. (Haley, McKenna & Wilkinson).

William H. Block Co., Indianapolis—Requests assignment of Channel 10 to Indianapolis from Terre Haute, substituting 41 for 10 in Terre Haute. (Caldwell-Rollo).

Indianapolis Broadcasting Inc., Indianapolis (WIRE)—Requests that Channel 13 be reclassified to commercial use. (Pierson & Ball).

Radio Indianapolis Inc., Indianapolis (WXLW)—Requests assignment of Channel 13 be reclassified for commercial use, or addition of 38 or uhf flexibility channel to Indianapolis. Contends reservation policy is illegal. (Miller & Schroeder).

WIBC Inc., Indianapolis (WIBC)—Requests assignment of Channel 4 to Indianapolis, and that minimum separation be changed to 180 miles city-to-city or 170 miles transmitter-to-transmitter. Contends allocation violates Section 307(c) of Communications Act. (Dow, Lohnes & Albertson).

Logansport Broadcasting Corp. (WSAL), Logansport, and Owensboro on the Air Inc. (WVJS), Owensboro, Ky.—Request assignment of Channel 10 to Logansport and Owensboro; substituting 34 for 10 in Terre Haute. (Bingham, Collins, Porter & Kistler and Loucks, Zias, Young & Jansky).

W. H. C. Higgins, Michigan City—Favors FCC proposals for Michigan City; requests, if possible, Channel 30 instead of 62 be assigned to Michigan City. (W. H. C. Higgins, West Orange, N. J.).

Ball State Teachers College, Muncie—Requests classification of Channels 49 or 55 as educational; or add flexibility channels for educational use. (John R. Emens, president).

IOWA

Iowa State College, Ames (WOI & WOI-TV)—Favors FCC proposal to shift WOI-TV from Channel 4 to 5. (Cohn & Marks).

Gazette Co., Cedar Rapids (KCRG)—Requests Channel 12 be assigned to Cedar Rapids by assigning Channels 3 & 35 to Mason City, Ia., Channels 18 and 41 to Kirksville, Mo. Also requests assignment of 46 to Reedsburg, Wis., 55 to Chariton, Ia., 47 to Trenton, Mo. (Caldwell-Rollo).

Central Broadcasting Co., Davenport (WOC & WOC-TV)—Favors FCC proposal to shift WOC-TV from Channel 5 to 6. (Dow, Lohnes & Albertson).

Davenport Broadeasting Co., Davenport (KSTT)—Requests Channel 2, now reserved for educational use at Iowa City, be assigned to Atalissa, Ia. for commercial use; 11, now reserved at Des Moines. be assigned to Iowa City for educational use. (Loucks, Zias, Young & Jansky).

Cowles Broadcasting Co., Des Moines (KRNT)—Requests that Channel 5, Ames, be classified for educational use; that 11 in Des Moines be reclassified for commercial use. (Segal, Smith & Hennessey).

Independent Broadcasting Co., Des Moines (KIOA)—Requests assignment of Channel 4 to Des Moines exchanging 2 & 4 between Sioux City and Vermillion, S. D.; that 11 be reclassified for commercial use. (Pierson & Ball).

Murphy Broadcasting Co., Des Moines (KSO)—Requests Channel 5 be reclassified for educational use in Ames, reclassify 11 for commercial use in Des Moines. (Spearman & Roberson).

Telegraph Herald, Dubuque (KDTH)—Requests assignment of Channels 5 & 11 to Dubuque, with power limitations. (Eugene L. Burke).

Northwest Broadcasting Co., Fort Dodge (KVFD)—Requests assignment of Channel 4 to Fort Dodge from Sioux City, substituting 2 for 4 in Sioux City, 5 for 2 in Vermillion, S. D.; 4 for 5 in Mitchell, S. D. (Fisher, Wayland, Duvall & Southmayd).

Keokuk Broadcasting Co., Keokuk (KOKX)—Requests assignment of Channel 10 to Keokuk, substituting 7 from Hannibal, Mo. for 10 in Quincy, Ill. (George O. Sutton).

Black Hawk Broadcasting Co., Waterloo (KWWL)—Requests assignment of Channel 12 to Waterloo from Mason City; substituting 3 for 12 in Mason City; 12 to Brookfield, Mo. from Kirksville, Mo. (Roberts & McInnis).

KANSAS

KFBI Inc., Wichita (KFBI)—Requests assignment of Channel 6 to Wichita from Dodge City, 4 to Dodge City, substituting 11 for 6 in Tulsa, 3 for 11 in Lawton, Okla., 11 for 3 in Wichita Falls, Tex. (Dow, Lohnes & Albertson).

Taylor Radio & Television Corp., Wichita (KANS)—Makes same proposal as KFBI Inc., Wichita. (Dow, Lohnes & Albertson).

Wichita Beacon Broadcasting Co., Wichita (KWBB)—Requests assignment of Channels 45 & 53 to Wichita. (Haley, McKenna & Wilkinson).

KENTUCKY

Mid-America Broadcasting Corp., Louisville (WKLO)—Requests assignment of Channel 41 to Louisville. (Haley, McKenna & Wilkinson).

Radio Kentucky Inc., Louisville (WKYW)—Requests assignment of Channel 51 to Louisville, Ky.; opposes reservation of channels for educational use; opposes further power increases for vhf stations; deplores restrictions on use of directional antennas for vhf channels; recommends joint antenna locations for cities with more than one vhf station; opposes reservation of 15 uhf flexibility channels for unknown use. (Barnes & Neilson).

WHAS Inc., Louisville (WHAS & WHAS-TV)—Favors FCC proposal to shift WHAS-TV from Channel 9 to 11. (Miller & Schroeder).

Owensboro On The Air Inc., Owensboro (WVJS)—See Logansport Broadcasting Corp. (Ind.).

LOUISIANA

Baton Rouge Broadcasting Co., Baton Rouge (WJBO)—Requests assignment of Channel 2 to Baton Rouge, affecting following cities: New Orleans, Hattiesburg, Meridian, Miss. (Hogan & Hartson).

Charles W. Lamar Jr., Houma (KCIL)—Requests assignment of Channel 12 to Houma; also that FCC not interpret footnote relating to Gulf area allocations so as to "impose a ban on allocations otherwise in compliance with the Commission's Report." (Haley, McKenna & Wilkinson).

Calcasieu Broadcasting Co., Lake Charles (KPLC)—Favors FCC proposals for Lake Charles. (Bingham, Collins, Porter & Kistler).

Loyola U of the South, New Orleans (WWL)—Requests assignment of Channel 11 to New Orleans; questions legality of reservation of educational channels. (Segal, Smith & Hennessey).

International Broadcasting Co., Shreveport (KWKH)—Favors FCC proposals for Shreveport. (Fly, Shuebruk & Blume).

MARYLAND

Hearst Radio Inc., Baltimore (WBAL & WBAL-TV)—Objects to change of WDEL-TV, Wilmington, from Channel 7 to 12 on grounds it violates 70-mile adjacent channel station separation in conflict with WBAL-TV (11) and WAAM (13). (Dempsey & Koplovitz).

MASSACHUSETTS

Columbia Broadcasting System Inc., Boston—See New York City.

Matheson Radio Co. Inc., Boston (WHDH)—Requests assignment of Channel 9 to Boston, affecting following cities: Springfield, Worcester, New Bedford. Brockton, Mass.; Manchester, Berlin, Rochester, N. H.; Storrs, Hartford, Conn.; Providence, R. I. Requests 2 be reclassified for commercial use. (Dempsey & Koplovitz).

Enterprise Publishing Co., Brockton (WBET)—Requests assignment of Channel 5 to Brockton from Boston. Requests addition of 2 footnotes to Appendix B to permit rapid changes in uhf coverage calculations when data becomes available, rather than requiring waiting while data become incorporated in rules. (Haley, McKenna & Wilkinson).

Hampden-Hampshire Corp., Holyoke (WHYN)—Requests that (a) Channel 3 be allocated to Springfield-Holyoke by moving it from New London, allocating uhf flexibility channel to New London and interchanging Channels 3 and 8 between Lewiston and Montpelier, or (b) Channel 10 be allocated to Springfield-Holyoke area by moving it from Providence, allocating uhf flexibility channel to Providence and shifting WJAR-TV, Providence, from Channel 11 to 12 instead of 10 as proposed by FCC. (Bingham, Collins, Porter & Kistler).

Greylock Broadeasting Co., Pittsfield (WBRK)—Requests assignment of Channel 3 to Pittsfield, affecting following cities: Syracuse, Rochester, N. Y.; Montpelier, Vt.; Lewiston, Me.; New London, Conn.; Hamilton, Toronto, Orillia, Sudbury, Canada. Requests that general uhf propagation curves be replaced by specific data when latter available for particular areas. (Haley, McKenna & Wilkinson).

Public School System, Springfield—Requests that uhf flexibility channels be made available for educational use. (Helen P. Conrad, secretary pro tem).

Regional TV Corp., Springfield—Requests assignment of Channel 3 to Springfield from New London, Conn.; interchange of 8 & 3 between Montpelier, Vt. and Lewiston, Me. (Loucks, Zias Young & Jansky).

WTAG Inc., Worcester (WTAG)—Requests assignment of Channel 12 to Worcester from Providence, R. I. Requests that any channel be available, without necessity of rule-making procedures, to any community which has no comparable assignment, providing minimum separations are maintained. (Hogan & Hartson).

MICHIGAN

Bay Broadcasting Co., Bay City (WBCM)—Requests assignment of Channel 5 to Bay City from Traverse City, 7 to Traverse City. Requests transmitter-to-transmitter spacing be only separation criterion. (Dow, Lohnes & Albertson).

Bay City Public Schools, Bay City—Requests assignment of Channel 12 to Bay City from Flint, classified for educational use.

Twin Valley Broadcasters Inc., Coldwater (WTVB)—Requests assignment of Channel 10, operation with reduced power. (E. H. Munn Jr., station director).

WKMH Inc., Dearborn (WKMH)—Requests an immediate oral argument. Contends that (a) Sec. 4(b) of Administrative Procedures Act is violated, (b) Congress hasn't delegated authority to reserve channels, (c) Sec. 307(b) and intent of Congress is violated, (d) Ashbacker doctrine may be violated, (e) channel shifts of 31 existing stations may delay lifting of freeze due to lack of quasi-judicial hearings. Suggests allocation plan be regarded only as a guide, and that applicants requesting channels not provided for in plan be afforded hearings. (Bingham, Collins, Porter & Kistler).

Booth Radio Stations, Detroit (WJLB)—Requests assignment of Channel 9 to Detroit from Windsor, Canada; 50 to Windsor from Detroit; 6 to Detroit from Lansing, affecting also following cities: Alpena, Iron Mt., Traverse City, Mich. (Arnold, Fortas & Porter).

Fort Industry Co., Detroit (WJBK & WJBK-TV)—Favors FCC proposals. (Dow, Lohnes & Albertson).

Wayne U and Board of Education, Detroit—Request the assignment of Channel 11 to Detroit from Toledo; moving 12 from Flint to Saginaw-Bay City; classifying 11 for educational use. (Krieger & Jorgensen).

WJR, The Goodwill Station Inc., Detroit (WJR)—Requests assignment of Channels 6 & 22 to Detroit, affecting following cities: Lansing, East Lansing, Flint, Ludington, Cadillac. Also requests that transmitter-to-transmitter spacing, rather than city-to-city spacing, be ruling criterion. (Caldwell-Rollo).

Michigan State College, East Lansing (WKAR)—Requests assignment of Channel 10 for educational use to East Lansing, requiring exceptions to minimum separation requirements. (Barnes & Neilson).

Delta Broadcasting Co., Escanaba (WDBC)—Requests assignment of Channel 3 to Escanaba in lieu of 13; 13 to Cadillac and Calumet, Mich.; 5 to Essexville (Saginaw area); 2 to Green Bay, Wis.; 10 instead of 5 to Hancock; 5 instead of 3 to Marquette; 7 instead of 5 to Traverse City, Mich. (Loucks, Zias, Young & Jansky).

Trebit Corp., Flint (WFDF)—Requests assignment of Channel 10 to Flint from London, Ont., 43 and/or 65 to London, requiring exception to city-to-city adjacent channel separation (Windsor, Ont.). (Dempsey & Koplovitz).

Music Broadcasting Co., Grand Rapids (WGRD)—Requests assignmen of Channel 6 to Grand Rapids, substituting 2 for 6 in Green Bay, 5 for 6 in Lansing, 7 for 5 in Traverse City. (Cohn & Marks).

Saginaw Broadcasting Co., Saginaw (WSAM)—Requests that Channels 19 and 28 be moved to Saginaw from Midland and Flint, respectively, and that Channel 51 be moved to Midland from Saginaw. (Bingham, Collins, Porter & Kistler).

MINNESOTA

Southern Minnesota Supply Co., Mankato (KYSM)—Requests assignment of Channel 12 to Mankato from Mason City. Ia.; substituting 3 for 12 in Mason City, 10 for 12 in Brainerd, 12 for 10 in Hibbing, Minn., 12 for 10 in Grand Forks, N. D. (Dow, Lohnes & Albertson).

KNUJ Inc., New Ulm (KNUJ)—Requests assignment of Channel 3 to New Ulm from Watertown, S. D.; 10 to Watertown from Pierre, S. D.; 11 to Pierre. (Frank Stollenwerck).

College of St. Thomas, St. Paul—Requests Channel No. 2 be reclassified for commercial use. (Dow, Lohnes & Albertson).

MISSISSIPPI

Lamar Life Insurance Co., Jackson (WJDX)—Requests assignment of Channel 5 to Jackson, interchange of 10 & 5 between Mobile and Pensacola. (Spearman & Roberson).

Meridian Broadcasting Co., Meridian (WTOK)—Requests assignment of Channel 4 to Meridian. (Robert F. Wright, president & general mgr.).

MISSOURI

Board of Education, Kansas City—Requests reserved educational channel be changed from 9 to uhf channel. (Hunt C. Moore, president).

City of Kansas City—Requests assignment of 4 vhf commercial channels to Kansas City. (Jerome M. Joffee, Special Utilities & Legislative counsel).

KCMO Broadcasting Co., Kansas City (KCMO)—See first comment by Midland Broadcasting Co. et al.

Midland Broadcasting Co. (KMBC), KCMO Broadcasting Co. (KCMO) and WHB Broadcasting Co. (WHB), Kansas City—Request Channel 9 be reclassified to commercial use; Channel 7 now reserved for educational use in Lawrence, Kan., be assigned for commercial use in Kansas City, adding reserved Channel 64 to Lawrence and reserving 19 for educational use in Kansas City. (Arthur B. Church, president, Midland Broadcasting Co.; Tom L. Evans, president, KCMO Broadcasting Co.; John F. Cash, v.p., WHB Broadcasting Co.).

Midland Broadcasting Co. (KMBC) and WHB Broadcasting Co. (WHB), Kansas City—As alternative to plan presented jointly with KCMO Broadcasting Co., request assignment of Channel 7 in lieu of 9 to Kansas City; 2 to Kansas City from St. Joseph; 9 to St. Joseph; substituting 12 for 7 in Pittsburg, Kan.; 9 for 12 for Joplin, Mo., with 19 reclassified for educational use in Kansas City. Change would require exceptions to city-to-city co-channel (Omaha, Hannibal, Mo.), and adjacent channel separation (Joplin-Springfield, Mo.).

Midland Broadcasting Co., Kansas City (KMBC)—Similar to proposal presented jointly with KCMO Broadcasting Co. and WHB Broadcasting Co., but requesting Channel 2 be assigned to Kansas City in lieu of 9; substituting 9 for 2 in St. Joseph, Mo. (Arthur B. Church, president).

WHB Broadcasting Co., Kansas City (WHB)—See first 2 comments by Midland Broadcasting Co. et al.

U of Kansas City, Kansas City—Requests Channel 9 be reclassified for commercial use, and not less than 4 commercial vhf channels be assigned to Kansas City. (Clarence R. Decker, president).

MONTANA

Copper Broadcasting Co., Butte (KOPR)—Requests assignment of Channel 15 to Butte. (Fletcher & Midlen).

NEBRASKA

Inland Broadcasting Co., Lincoln (KBON)—Favors FCC proposals for Lincoln. (Frank Stollenwerck).

KFAB Broadcasting Co., Omaha (KFAB)—Requests assignment of Channel 12 to Omaha from Lincoln, 44 to Lincoln; reclassify 7 for commercial use; questions legality of FCC proposals to freeze allocations for one year and refusal to accept application for channel not specified in allocation table; questions legality of reservation of educational channels. (Segal, Smith & Hennessey).

NEVADA

Kenyon Brown, Reno (KWRN)—Requests assignment of Channel 11 to Reno. (Haley, McKenna & Wilkinson).

NEW HAMPSHIRE

Grandview Inc., Manchester—Favors FCC proposals for Manchester. (Roberts & McInnis).

Dartmouth College, Hanover—Requests assignment of Channel 21 to Hanover from Rochester, N. H., to be replaced by 51.

NEW JERSEY

Board of Education, Newark—Requests that uhf flexibility channels be made available to educational institutions. (Edward F. Kenneily, acting supt. of schools).

Bremer Broadcasting Corp., Newark (WAAT & WATV)—Requests revision of allocations to delete Newark from New Jersey, revise New York to read: "New York and Northeastern New Jersey. (Segal, Smith & Hennessey).

Chanticleer Broadcasting Co., New Brunswick (WCTC)—Favors FCC proposal for New Brunswick. (Fletcher & Midlen).

Rutgers U., New Brunswick—Requests that uhf flexibility channels be made available to educational institutions. (Robert C. Clothier, president).

Princeton U, Princeton—Requests that uhf flexibility channels be made available to educational institutions. (Harold W. Dodds, president).

Mercer Broadcasting Co. Trenton (WTOA-FM)—Contends that (a) FCC plan is contrary to Secs. 303(d), 303(r), 307(b) and 309(a) of Communications Act, (b) vhf and uhf channels should be distributed independently of each other, (c) vhf-uhf intermixture is contrary to public interest, (d) all commercial TV should be assigned in uhf. (Arthur W. Scharfeld).

Trent Broadcast Corp., Trenton (WTTM)—Joins in petition filed by Federal Communications Bar Assn., Washington, D. C. (Pierson & Ball).

Wilmington Public Schools, Wilmington—Requests that educational channel be reserved. (Ward I. Miller, superintendent).

NEW YORK

Board of Regents of the University of the State of New York—Plans educational network. Favors FCC proposals for Albany-Schenectady-Troy, Binghamton, Ithaca, Syracuse, Utica-Rome. Requests reservation of Channel 7 in lieu of 23 in Buffalo, 10 in lieu of 21 in Rochester, additional reservation of 19 or 31 in New York, reservation of 20 in Malone, 21 in Poughkeepsie. As alternative to recommended reservations in New York, Malone and Poughkeepsie, requests shared facilities with commercial stations in those cities. (Fischer, Willis & Panzer).

Meredith Champlain Television Corp., Albany (WXKW; Meredith itself is operator of TV station WHEN, Syracuse)—Requests assignment of Channels 35 & 41 to Schenectady in addition to proposed channels to Albany-Schenectady-Troy; 62 in lieu of 35 to Watertown, N. Y. (Haley, McKenna & Wilkinson).

Binghamton Broadcasters Inc., Binghamton (WKOP)—Requests assignment of Channel 7 to Binghamton, affecting New York City and Buffalo. (Stephen J. Tuhy Jr.).

Buffalo Courier-Express Inc., WGR Broadcasting Corp. (WGR), WKBW Inc. (WKBW), Buffalo—Request that Channels 2, 4, 7, 9, 17 & 23 be assigned to Buffalo, 59 or 62 to Niagara Falls, 8 instead of 9 to Toronto, Ont., 3 instead of 8 to Owen Sound, Ont., 12 instead of 3 to Orillia, Ont. Also request that transmitter-to-transmitter spacing, rather than city-to-city spacing, be ruling criterion. (Caldwell-Rolio; Fisher, Wayland, Duvall & Southmayd; Fly, Shuebruk & Blume).

WGR Broadcasting Corp., Buffalo (WGR)—See Buffalo Courier-Express Inc.

WKBW Inc., Buffalo (WKBW)—See Buffalo Courier-Express Inc.

Corning Leader Inc., Corning (WCLI)—Requests assignment of Channel 9 to Corning. (Segal, Smith & Hennessey).

Cornell University, Ithaca (WHCU)—Requests assignment of Channel 3 to Ithaca, substituting 2 for 4 in Buffalo, moving 4 from Buffalo to Rochester, adding uhf channel to Niagara Falls. (Cohn & Marks).

Kingston Broadcasting Corp., Kingston (WKNY)—Requests assignment of flexibility Channel 66 to Kingston. (Dow, Lohnes & Albertson).

American Broadcasting Co. Inc., New York (WJZ & WJZ-TV, New York; WENR & WENR-TV, Chicago; WXYZ & WXYZ-TV, Detroit; KGO & KGO-TV, San Francisco; KECA & KECA-TV, Los Angeles, and General Teleradio Inc., New York, N. Y. (WOR & WOR-TV)—Request that stations using heights over 500 ft. not be restricted in power because of adjacent-channel considerations, that co-channel spacings should control powers. Alternatively, New York-New Haven and Los Angeles-San Diego situations should be exempted from such adjacent-channel power restrictions. ABC commends FCC proposals to utilize all of uhf, minimize "in-channel" types of interference (oscillator radiation, etc.), adopt "long range" propagation curves, specify "reasonable compromise" in co-channel separations. ABC also requests that Channels 7 & 9 be deleted from Mexicali, Mex., and replaced by 6 from Tijuana, or that 12 be shifted to Mexicali from Tijuana, moving 7 & 9 from Mexicali to Yuma, Ariz., replacing 11 & 13 in Yuma. (Joseph A. McDonald and Haley, McKenna & Wilkinson).

Bell Telephone Laboratories Inc., New York—Requests right to to participate in reallocation of 470-500 mc. (John M. Gepson).

Columbia Broadcasting System, New York (WCBS & WCBS-TV, New York, N. Y.; KNX & KTSL-TV, Los Angeles, Cal.; 45% of WTOP & WTOP-TV, Washington, D. C.; KCBS, San Francisco, Cal; KMOX, St. Louis, Mo.; WBBM, Chicago, Ill.; WCCO, Minneapolis, Minn.; WEEI, Boston, Mass.)—Requests flexible application of FCC policies on minimum separation, directional antennas, intermixture, reservations, Mexican and Canadian allocations, priorities—to permit additional vhf channels in areas critical to the fostering of competition. (Rosenman, Colin, Goldmark & Kaye).

Columbia Broadcasting System Inc., New York (WCBS & WCBS-TV, New York; KNX & KTSL-TV, Los Angeles; KCBS, San Francisco; KMOX, St. Louis; WBBM, Chicago; WCCO, Minneapolis; WEEI, Boston; owns 45% of WTOP & WTOP-TV, Washington)—Requests assignment of more vhf channels to Chicago, San Francisco, Boston; reservation of uhf instead of vhf channels for educational operation in those cities. Requests assignment of Channel 13 to Chicago, affecting following cities: Urbana, Bloomington, Rockford, Ill.; Indianapolis, Muncie, Connersville, Ind.; Milwaukee, Green Bay, Wis. Also, 11 to San Francisco, affecting following cities: San Jose, Stockton, Madera, Salinas, Sacramento, Cal.; Reno, Nev. Also, 9 to Boston, affecting following cities: Durham, Manchester, N. H., Providence, R. I.; Albany, N. Y.; Portland, Lewiston, Augusta, Orono, Calais, Me.; St. John, Canada. (Rosenman, Goldmark, Colin & Kaye).

Communications Measurements Laboratory Inc., New York—Objects to uhf allocation principles. Contends 41.25-45.75 mc IF is "fictional and inefficient," that FCC's assignment of 10-kw police transmitters in 42-43 mc region renders such IF impracticable, that FCC's findings re "fold-in" principle are incorrect and misleading. (Dana A. Griffin, president).

Allen B. DuMont Laboratories Inc., New York (WABD, New York, N. Y.; WTTG, Washington, D. C.; WDTV, Pittsburgh, Pa.)—Submits national allocation plan as alternative to FCC's, based on general premise that number of channels should be related directly to number of people in area served. Recommends priorities be changed to specify one service without regard to population and to provide at least 4 channels in major metropolitan areas when technically feasible. Recommends (a) use of whole uhf band, starting at 470 mc, (b) shifting minimum number of existing stations, (c) elimination of educational channel reservation, (d) avoidance of vhf-uhf intermixture except when needed to provide sufficient channels for network purposes, (e) analysis of uhf allocations with computers, (f) change in adjacent-channel power-height formula to minimize limitations on power, (g) change in intermodulation-interference separations to specify 20 miles only when channels actually cause interference. Also submits elaborate analysis of station and network revenues and costs. Roberts & McInnis).

General Teleradio Inc., New York (WOR & WOR-TV)—Requests amendment specifically permitting WOR-TV maximum power without regard to adjacent-channel interference with Channel 8, New Haven, Conn.—in event FCC rejects proposals made jointly with ABC. (Hogan & Hartson).

Radio Corporation of America and National Broadcasting Co., New York (WNBC & WNBT, New York, N. Y.; WRC & WNBW, Washington, D. C.; WMAQ & WNBQ, Chicago, Ill.; WTAM & WNBK, Cleveland, O.; KNBC & KNBH, Los Angeles, Cal.; KOA, Denver, Colo.)—Requests lifting of freeze as soon as possible by accepting and granting applications in those cities where no issue has been raised regarding vhf assignments and by holding hearings now where applicants outnumber available channels. Also commends FCC plan in regard to utilization of whole uhf band, offset carrier, increased powers and heights. (Robert L. Werner, Ray B. Houston, Gustav B. Margraf).

NEW YORK (Continued)

Niagara Falls Gazette Publishing Co., Niagara Falls (WHLD)—Favors FCC proposals for Niagara Falls. (Dow, Lohnes & Albertson).

Federal Broadcasting System Inc., Rochester (WSAY)—Proposes new classification of TV station to serve small communities, identified as "Television Rebroadcasting Station, Limited Common Carrier Class." (Frank Stollenwerck).

Veterans Broadcasting Co. Inc. Rochester (WVET)—Favors FCC proposal for Rochester. (Fletcher & Midlen).

WBEN Inc., Buffalo (WBEN & WBEN-TV)—Petitions for the grant of application to increase power and height, on grounds FCC proposal favors such a move and that no conflict with FCC proposal is involved. (Spearman & Roberson).

WHEC Inc., Rochester (WHEC)—Favors FCC proposals for Rochester. (Dow, Lohnes & Albertson).

Central New York Broadcasting Co., Syracuse (WSYR & WSYR-TV)—Favors FCC proposal to shift WSYR-TV from Channel 5 to 3. (Dow, Lohnes & Albertson).

Onondaga Radio Broadcasting Corp., Syracuse (WFBL—See WAGE Inc. (Hanson, Lovett & Dale).

WAGE Inc., Syracuse (WAGE)—Requests assignment of Channel 11 to Syracuse; waive minimum separation rules. (Spearman & Roberson).

Troy Broadcasting Co., Troy (WTRY)—Requests assignment of Channel 41 to Albany-Schenectady-Troy area, 62 instead of 48 to Oneonta. (Loucks, Zias, Young & Jansky).

Brockway Co., Watertown (WWNY)—Requests assignment of Channel 11 to Watertown by (a) substituting 5 for 11 in Ottawa-Hull, Ont. or (b) substituting 7 for 11 in Ottawa-Hull, 8 for 7 in Montreal-Verdun, 11 for 13 in Hamilton, 13 for 11 in Toronto. First recommendation requires modification of city-to-city mileage separation. (Fisher, Wayland, Duvall & Southmayd).

NORTH CAROLINA

Skyway Broadcasting Corp., Asheville (WLOS)—Favors FCC proposal for Asheville. (Fletcher & Midlen).

Broadcasting Co. of the South (WIST) and Inter-City Advertising Co. (WAYS), Charlotte—Request assignment of Channel 6 to Charlotte from Wilmington, N. C.; substituting 12 for 6 in Wilmington, 7 for 6 in Augusta, Ga., 4 for 5 in Charleston, S. C., 5 for 7 in Columbia, S. C. (Dow, Lohnes & Albertson).

Inter-City Advertising Co., Charlotte (WAYS)—See Broadcasting Co. of the South. (Dow, Lohnes & Albertson).

Durham Broadcasting Enterprises Inc., Durham (WTIK)—Favors FCC proposal for Durham. (Fletcher & Midlen).

Capitol Broadcasting Co. Inc., Raleigh (WRAL)—Favors FCC proposal for Raleigh. (Fletcher & Midlen).

WPTF Radio Co., Raleigh (WPTF)—Favors FCC proposals for Raleigh. (Loucks, Zias, Young & Jansky).

Piedmont Publishing Co., Winston-Salem (WSJS)—Requests assignment of Channel 6 to Winston-Salem. (Fly, Shubruk & Blume).

Winston-Salem Broadcasting Co., Winston-Salem (WTOB)—Requests assignment of Channel 6 to Winston-Salem. (Krieger & Jorgensen).

OHIO

L. B. Wilson Inc., Cincinnati (WCKY)—Requests assignment of Channel 13 to Cincinnati affecting Chicago, Rockford, Springfield, Ill.; Bloomington, Indianapolis, Terre Haute, Ind.; Louisville, Paducah, Ky.; Cape Girardeau, Kirksville, Mo.; Clarksburg, Huntington, W. Va.; does not necessitate shift of WKRC-TV from 11 to 12 as proposed by FCC; waiver of minimum mileage separation requirements. (Spearman & Roberson).

Cleveland Broadcasting Co. (WERE), United Broadcasting Co. (WHK), WGAR Broadcasting Co. (WGAR), WJW Inc. (WJW), Cleveland—Requests that Channels 31, 59 and 65 be added to Cleveland, that educational channel be changed from Channel 25 to 65, affecting following cities: Findlay, Gallipolis, Lorain, Marion, Massillon and Sandusky, Ohio; Detroit, Mich.; DuBois and Pittsburgh, Pa.; Lexington, Ky.; Windsor, Ont., (Spearman & Roberson and Loucks, Zias, Young & Jansky and Caldwell-Rollo and Pierson & Ball).

Empire Coil Co., Cleveland (WXEL)—Favors FCC proposal to shift WXEL from Channel 9 to 8. (Morton H. Wilner).

National Broadcasting Co., Cleveland (WTAM & WNBK)—Favors FCC proposal to move WNBK from Channel 4 to 3. (Gustav B. Margraf, v.p. and general attorney).

United Broadcasting Co., Cleveland (WHK)—See Cleveland Broadcasting Co.

WGAR Broadcasting Co., Cleveland (WGAR)—See Cleveland Broadcasting Co.

WJW Inc., Cleveland (WJW)—See Cleveland Broadcasting Co.

Ohio State U, Columbus (WOSU)—Requests Channel 12 be classified for educational use in Columbus, moving 13 from Indianapolis and Huntington to Cincinnati, 12 from Cincinnati to Columbus, deleting Channel 12 in Clarksburg. (H. L. Bevis, president).

Miami Valley Broadcasting Corp., Dayton (WHIO & WHIO-TV)—Favors FCC proposal to shift WHIO-TV from Channel 13 to 7. (Dow, Lohnes & Albertson).

WSTV Inc., Steubenville (WSTV)—Requests assignment of Channel 7 or 9 to Steubenville from Wheeling. (Caldwell-Rollo).

Community Broadcasting Co., Toledo (WTOL)—Favors FCC proposals for Toledo. (Pierson & Ball).

Maumee Valley Broadcasting Co., Toledo—Favors FCC proposals for Toledo. (Roberts & McInnis).

Warren Tribune Radio Station Inc., Warren (WHHH)—Favors FCC proposal for Warren. (Miller & Schroeder).

Wooster Republican Printing Co., Wooster (WWST)—Requests assignment of Channel 55 to Wooster from Akron. (Pierson & Ball).

Vindicator Printing Co., Youngstown—Requests assignment of uhf flexibility channel to Youngstown. (Fisher, Wayland, Duvall & Southmayd).

Southeastern Ohio Broadcasting System Inc., Zanesville (WHIZ)—Requests assignment of Channel 12 to Zanesville from Clarksburg, W. Va., substituting 11 for 12 in Cincinnati, 12 for 11 in Louisville, 65 in Clarksburg. (Dow, Lohnes & Albertson).

OKLAHOMA

KTOK Inc., Oklahoma City (KTOK)—Requests assignment of Channel 11 to Oklahoma City from Lawton, 12 to Lawton from Elk City, 8 to Elk City from Woodward, 6 to Woodward from Dodge City, Kan., 4 to Dodge City. (Dow, Lohnes & Albertson).

WKY Radiophone Co., Oklahoma City (WKY & WKY-TV)—Requests that WKY-TV remain on Channel 4 instead of switching to Channel 7 as proposed by FCC, suggesting following vhf allocation in lieu of FCC proposal: Oklahoma City, 4, 7 & 13; Tulsa, 2, 6 & 9; Muskogee, 11. (Pierson & Ball).

All Oklahoma Broadcasting Co., Tulsa—Requests assignment of Channel 8 to Tulsa from Muskogee, 11 to Muskogee. (Dempsey & Koplovitz).

Southwestern Sales Corp., Tulsa (KVOO)—Requests assignment of Channel 11 to Tulsa from Lawton, 12 to Lawton from Elk City, 11 to Elk City. (Dow, Lohnes & Albertson).

OREGON

Central Willamette Broadcasting Co., Albany (KWIL)—Requests assignment of Channel 12 to Albany, substituting 5 for 3 in Salem, 3 for 12 in Portland. (Fisher, Wayland, Duvall & Southmayd).

KUGN Inc., Eugene (KUGN)—Requests assignment of Channel 11 to Eugene. (C. H. Fisher, president).

Lane Broadcasting Co., Eugene (KORE)—Requests assignment of Channel 4 or 5 to Eugene from Medford, 20 or 26 to Medford from Eugene. (John C. Kendall, Portland, Ore.)

KOIN Inc., Portland (KOIN)—Favors FCC proposals for Portland. (Dow, Lohnes & Albertson).

PENNSYLVANIA

Lehigh Valley Television Inc., Allentown—Contends that (a) FCC plan is contrary to Secs. 303(d), 303(r), 307(b) and 309(a) of Communications Act, (b) vhf and uhf channels should be distributed independently of each other, (c) vhf-uhf intermixture is contrary to public interest, (d) all commercial TV should be assigned in uhf (Arthur W. Scharfeld).

Gable Broadcasting Co., Altoona (WFBG)—Requests assignment of Channel 3 to Altoona, requiring exemption from minimum city-to-city separation (Philadelphia). (George O. Sutton).

WBVP Inc., Beaver Falls (WBVP)—Requests assignment of Channel 16 to Beaver Falls. (Segal, Smith & Hennessey).

Matta Broadcasting Co., Braddock (WLOA)—Requests assignment of Channel 4 to Braddock requiring modification of city-to-city mileage separation (Columbus, O.). (Spearman & Roberson).

Easton Publishing Co., Easton (WEEX-FM)—Question legality of FCC proposals to freeze allocations for one year and refusal to accept application for channel not specified in allocation table. (Hanson, Lovett & Dale).

Erie Television Corp., Erie (WIKK and Erie Times)—Requests assignment of Channel 64 to Erie from Oil City; substituting 62 for 64 in Oil City. (Haley, McKenna & Wilkinson).

Presque Isle Broadcasting Co., Erie (WERC)—Objects to vhf-uhf intermixture, requests all commercial TV be assigned in uhf. Alternatively, requests that either (a) Channel 12 be reserved for educational assignment and that Channels 35 and 41 both be assigned for commercial use or (b) Channel 58 from Jamestown, N. Y., or 66 be assigned to Erie. (Arthur W. Scharfeld).

Patriot-News Co., Harrisburg—Requests assignment of uhf flexibility channel to Harrisburg. (Fisher, Wayland, Duvall & Southmayd).

WJAC Inc., Johnstown (WJAC & WJAC-TV)—Favors FCC proposal to shift WJAC-TV from Channel 13 to 6. (Dow, Lohnes & Albertson).

Peoples Broadcasting Co., Lancaster (WLAN)—Requests comparative hearing with WGAL-TV for Channel 8. (Stephen Tuhy, Jr.).

WGAL Inc., Lancaster (WGAL & WGAL-TV)—Favors FCC proposals for Lancaster. (George O. Sutton).

Lock Haven Broadcasting Corp., Lock Haven (WBPZ)—Requests assignment of Channel 32 to Lock Haven. (A. H. Lipez).

Tri-City Broadcasting Co., McKeesport (WEDO)—Requests Channel 13 be moved from Pittsburgh to McKeesport, classified for commercial use. (Fisher, Wayland, Duvall & Southmayd).

Chamber of Commerce, Philadelphia—Requests assignment of Channel 12 to Philadelphia; 8 in Wilmington in lieu of 7; use of directional antennas. See also Daily News Television Co. (J. Harry Le Brum, general counsel).

City of Philadelphia—Requests assignment of Channel 12 to Philadelphia, 7 to Wilmington, or assignment of uhf channel to Wilmington in lieu of 7 and use of directional antennas. (Frank F. Truscott, city solicitor).

Daily News Television Co., Philadelphia (WIBG-Philadelphia Daily News)—Requests assignment of Channel 12 to Philadelphia in lieu of 44; retention of 7 in Wilmington, Del. (WDEL-TV) in lieu of proposed change to 12; that transmitter for 12 in Philadelphia be sited south of city to avoid interference with 12 in Binghamton, N. Y. (WNBF-TV). Or, 12 be assigned to Philadelphia and uhf channels be allocated to Wilmington or Binghamton or both. (Roberts & McInnis).

Pennsylvania Broadcasting Co., Philadelphia (WIP)—Requests assignment of Channel 12 to Philadelphia, 4 to Lancaster in lieu of 8, 8 to Wilmington in lieu of 7. Requests amendment to allocations providing that in cases where existing stations violate minimum separation requirements proposals for power increases be considered on individual basis. (Dow, Lohnes & Albertson).

PENNSYLVANIA (Continued)

Allegheny Broadcasting Corp., Pittsburgh (KQV)—Requests assignment of Channel 4 to Pittsburgh or 9 from Wheeling and reclassification of 13 for commercial use. (George O. Sutton).

Pittsburgh Radio Supply House Inc., Pittsburgh (WJAS)—Requests that Channels 4 and 9 be allocated to Pittsburgh, substituting Channel 16 for 9 in Wheeling. (Bingham, Collins, Porter & Kistler).

WCAE Inc., Pittsburgh (WCAE)—Requests assignment of Channel 9 to Pittsburgh, affecting following cities: Wheeling, W. Va., Washington, Pa., Bellfontaine, Hamilton-Middletown, O., Muncie, Anderson, Ind. (Dempsey & Koplovitz).

Westinghouse Radio Stations Inc., Pittsburgh (KDKA)—Requests assignment of Channel 4 & 9 to Pittsburgh; 9 from Wheeling, W. Va. (John Steen).

WWSW Inc., Pittsburgh (WWSW)—Requests assignment of Channel 4 to Pittsburgh; questions legality of reservation of Channel 13 for educational purposes. (Segal, Smith & Hennessey).

Eastern Radio Corp., Reading (WHUM)—Requests assignment of Channel 15 to Reading from Lebanon, 55 to Lebanon from Reading. (Arnold, Fortas & Porter).

Appalachian Co., Scranton—Favors FCC proposals for Scranton-Wilkes-Barre. (Krieger & Jorgensen).

Scranton Times, Scranton (WQAN)—Requests assignment of uhf flexibility channels to Scranton. (Fisher, Wayland, Duvall & Southmayd).

Washington Broadcasting Co., Washington (WJPA)—Requests interchange of Channels 9 and 63 between Washington and Wheeling. (Cohn & Marks).

RHODE ISLAND

Cherry & Webb Broadcasting Co., Providence (WPRO)—Favors FCC proposals for Providence. (Dow, Lohnes & Albertson).

Outlet Co., Providence (WJAR & WJAR-TV)—Favors FCC proposal to shift WJAR-TV from Channel 11 to 10. (Dow, Lohnes & Albertson).

SOUTH CAROLINA

Clemson Agricultural College, Clemson—Requests that uhf flexibility channels be made available for educational use. (R. F. Poole, president).

Greenville News-Piedmont Co., Greenville (WFBC)—Favors FCC proposals for Greenville. (Dow, Lohnes & Albertson).

Spartan Radiocasting Co., Spartanburg (WORD)—Requests assignment of Channel 7 to Spartanburg, affecting vhf channels in following cities: Middlesboro, Ky.; Knoxville, Chattanooga, Tenn.; Rome, Ga.; University, Ala.; State College, Miss.; Columbia, S. C. (Spearman & Roberson).

SOUTH DAKOTA

Midcontinent Broadcasting Co., Sioux Falls (KELO)—Favors FCC proposal for Sioux Falls.

TENNESSEE

WOPI Inc., Bristol (WOPI)—Favors FCC proposals for Bristol. (W. A. Wilson, president & general mgr.).

WHUB Inc., Cookeville (WHUB)—Requests assignment of Channel 5 to Cookeville, requiring exception to minimum city-to-city separation (Atlanta). (Dow, Lohnes & Albertson).

Kingsport Broadcasting Co. Inc., Kingsport (WKPT)—Requests assignment of Channel 2 to Kingsport. Requests transmitter spacing be sole separation criterion, operation with reduced power. (Fisher, Wayland, Duvall & Southmayd).

WMPS Inc., Memphis (WMPS)—See WREC Broadcasting Service. (Dow, Lohnes & Albertson).

WREC Broadcasting Service, Memphis (WREC)—Requests assignment of Channel 3 to Memphis from Blytheville; or assign 4, 7, 9, 11, 42, 48 to Memphis in lieu of 5, 10, 13, 42, 48, affecting following cities: Little Rock, Blytheville, Fort Smith, Pine Bluff, Hot Springs, El Dorado, Jonesboro, Ark.; Monroe, Shreveport, Alexandria, La.; Jackson, Tenn.; Tyler, Tex.; State College, Miss. (Spearman & Roberson).

Capitol Broadcasting Co., Nashville (WKDA)—Requests assignment of Channel 5 to Nashville; questions legality of FCC proposals to freeze allocations for one year and refusal to accept application for channel not specified in allocation table; questions legality of reservation of educational channels. (Segal, Smith & Hennessey).

City of Nashville—Requests that Channel 2 be assigned to commercial use. (Supported by similar statements from David Lipscomb College, George Peabody College for Teachers, Fisk University, Scarritt College for Christian Workers. (Thomas I. Cummings, mayor).

WLAC Broadcasting Service (WLAC) and WSIX Broadcasting Station (WSIX), Nashville—Requests assignment of Channel 5 to Nashville and reclassification of 2 to commercial use. Cites local city and school authorities in behalf of latter. (Spearman & Roberson).

WSIX Broadcasting Station, Nashville (WSIX)—See WLAC Broadcasting Service.

TEXAS

Beaumont Broadcasting Co., Beaumont (KFDM)—Favors FCC proposals for Beaumont-Port Arthur. (Segal, Smith & Hennessey).

Stephens County Broadcasting Co., Breckenridge (KSTB)—Requests assignment of Channel 7 to Breckenridge. (P. W. Seward).

A. H. Belo Corp., Dallas (WFAA & WFAA-TV)—Favors FCC proposals for Dallas. (Loucks, Zias, Young & Jansky).

A. Earl Cullum Jr., Dallas—Objects to FCC failure to allocate additional channels in 72-78 mc. range, restriction on power in upper vhf and uhf channels, limitations on antenna height, restrictions on directional antennas. (Dempsey & Koplovitz).

Harbenito Broadcasting Co. Inc., Harlingen (KGBS)—Requests assignment of Channel 4 to Harlingen from Brownsville, 36 to Brownsville. (Loucks, Zias, Young & Jansky).

Houston Post Co., Houston (KPRC & KPRC-TV)—Requests greater co-channel mileage separation in Gulf area, viz: 240 mi. on Channels 2-6, 200 mi. on Channels 7-13. (Frank W. Wozencraft).

KTRH Broadcasting Co. (KTRH) and Shamrock Broadcasting Co. (KXYZ), Houston—Request assignment of Channels 5 & 10 to Houston, substituting 12 for 4 in Beaumont-Port Arthur, 4 for 11 in Galveston; 27 to Fredericksburg, and 43 to Karnes City. (Dow, Lohnes & Albertson and Haley, McKenna & Wilkinson).

Shamrock Broadcasting Co., Houston (KXYZ)—See KTRH Broadcasting Co.

South Texas Television Co., Houston—Requests assignment of Channel 5 & 10 to Houston affecting Galveston and Port Arthur; requests Channel 8 be reclassified for commercial use. (Segal, Smith & Hennessey).

East Texas Television Co., Longview—Requests assignment of Channel 9 to Longview from Lufkin, Tex., substitute therefore 10. (Johnson, Bohannon, Prescott & Abney).

Voice of Longview, Longview (KFRO)—Requests assignment of Channel 12 to Longview, substituting 5 for 10 in El Dorado, Ark., 10 for 12 in Shreveport, La. (Frank Stollenwerck).

Plains Radio Broadcasting Co., Lubbock (KFYO)—Requests assignment of Channel 5 to Lubbock from Amarillo; 9 for 5 in Monahans. (Dow, Lohnes & Albertson).

McAllen Television Co., McAllen—Requests assignment of Channel 5 to McAllen from Brownsville, 12 for 5 in Brownsville. (Johnson, Bohannon, Prescott & Abney).

Trinity Broadcasting Corp., Oak Cliff (KLIF)—Requests assignment of Channels 7 & 9 to Dallas in lieu of 8, affecting following cities: Tyler, Lufkin, Ft. Worth, Waco, Tex.; Lawton, Okla. Also contends transmitter-to-transmitter separation should be ruling criterion. (Cohn & Marks).

Red River Valley Broadcasting Corp., Sherman (KRRV)—Requests assignment of Channels 10 & 17 to Sherman-Denison affecting Fort Worth, Denton, Weatherford, Waxahachie & Hillsboro, Tex. (Fisher, Wayland, Duvall & Southmayd).

Sherman Television Co., Sherman—Requests assignment of Channel 12 to Sherman. (Johnson, Bohannon, Prescott & Abney).

Bell Broadcasting Co., Temple (KTEM)—Requests assignment of Channel 6 to Temple. (Fisher, Wayland, Duvall & Southmayd).

Lack's Stores Inc., Victoria—Requests assignment of Channel 12 to Victoria from San Antonio. (Cohn & Marks).

KWTX Broadcasting Co., Waco (KWTX)—Favors FCC proposals for Waco. (M. N. Bostwick, mgr.).

Taylor Radio & Television Corp., Weslaco (KRGV)—Requests channels 4 & 5 be assigned to Weslaco-Harlingen area instead of Brownsville, 2 be assigned to Saltillo, Coahuila, Mexico and Weslaco, Tex., instead of Monterey, Nuevo Leon, Mexico. (Dow, Lohnes & Albertson).

Rowley-Brown Broadcasting Co., Wichita Falls (KWFT)—Favors FCC proposals for Wichita Falls. (Dow, Lohnes & Albertson).

UTAH

Eastern Utah Broadcasting Co., Price (KOAL)—Requests assignment of Channel 6 to Price in lieu of 11, affecting following cities: Provo, Ogden, Logan, Tooele, St. George, Utah; Montrose, Colo. (Fletcher & Midlen).

Salt Lake City Broadcasting Co., Salt Lake City (KALL)—Requests assignment of Channel 2 to Salt Lake City, substituting 9 for 12 in Ogden, 11 for 9 in Provo, 12 for 2 in Logan, 3 for 11 in Price. (Haley, McKenna & Wilkinson).

Oquirrh Radio & Television Co., Tooele, Utah—Requests that Channel 2 be moved from Logan to Tooele, 12 from Ogden to Logan, 9 from Provo to Ogden, 11 from Price to Provo, 6 be allocated to Price and 39 allocated to Montpelier, Ida. (Pierson & Ball).

Uintah Broadcasting Co., Vernal, Utah (KJAM)—Requests assignment of Channel 8 to Vernal. (Paul L. Badger).

VIRGINIA

Appalachian Broadcasting Corp., Bristol (WCYB)—Requests assignment for Bristol, Tenn., be made for Bristol, Va., also, on grounds that both cities are single market. (Fly, Shuebruk & Blume).

Radio Station WCHV (WCHV), City of Charlottesville and Chamber of Commerce, Charlottesville—Requests assignment of Channel 8 to Charlottesville from Petersburg; requests reclassification of single uhf for commercial use. (Thomas J. Michie and William C. Battle, Charlottesville).

Piedmont Broadcasting Corp., Danville (WBTM)—Favors FCC proposal for Danville, also supports any possible vhf assignments. (Fletcher & Midlen).

Shenandoah Valley Broadcasting Corp., Harrisonburg (WSVA)—Requests that (a) Channel 12 be allocated to Harrisonburg, affecting these cities: Zanesville, Clarksburg, Cincinnati and Louisville, or (b) 3 be allocated to Harrisonburg, affecting these cities: Norfolk, Richmond, Huntington and Charleston. (Bingham, Collins, Porter & Kistler).

Lynchburg Broadcasting Co., Lynchburg (WLVA)—Requests that adjacent-channel ratio be changed from 0 db to —6 db. (George O. Sutton).

Old Dominion Broadcasting Corp., Lynchburg (WWOD)—Requests assignment of additional vhf channels to Lynchburg. (Fisher, Wayland, Duvall & Southmayd).

Hampton Roads Broadcasting Corp., Newport News (WGH)—Requests assignment of Channel 12 to Newport News from Norfolk-Portsmouth, 2 to Norfolk-Portsmouth, waiver of minimum city-to-city separation requirements (Baltimore). As alternative to waiver, requests change in engineering standards to specify interference be held to value contemplated by 170-mile transmitter-to-transmitter rule through site selection or reduction in power. (Spearman & Roberson).

WTAR Radio Corp. Norfolk (WTAR & WTAR-TV)—Objects to FCC proposal to shift from Channel 4 to 10, suggests assignment of 3 to Norfolk from Richmond and No. 12 from Norfolk to Richmond, requiring WTAR-TV to shift from 4 to 3, or add 2 to Norfolk and requiring WTAR-TV to shift from 4 to 2. (Hanson, Lovett & Dale).

VIRGINIA (Continued)

Havens & Martin Inc., Richmond (WMBG & WTVR)—Requests continued assignment of Channel 6 to WTVR. (Fletcher & Midlen).

Larus & Brother Co. Inc., Richmond (WRVA)—Requests assignment of Channel 8 to Richmond from Petersburg, 59 to Petersburg. (Fisher, Wayland, Duvall & Southmayd).

Radio Virginia Inc., Richmond (WXGI)—Opposes channel reservations, withholding of flexibility channel assignments, vhf power increase, omission of use of directional antennas on vhf. Requests delay in all station construction until allocations are final, share-time arrangements where facilities are limited, requirement of equal time allotments to networks in localities with two channels, return of all applications now on file and setting of new filing date. (D. H. Robertson, president).

Richmond Newspapers Inc., Richmond (WRNL)—Requests assignment of Channel 8 to Richmond from Petersburg, 59 for 8 to Petersburg. (Spearman & Roberson).

WASHINGTON

KVOS Inc., Bellingham (KVOS)—Requests assignment of Channel 12 to Bellingham from Chilliwack, Canada; substituting 3 for 12 in Chilliwack. (Haley, McKenna & Wilkinson).

Central Washington Broadcasters Inc., Ellensburg (KXLE)—Favors FCC proposals for Ellensburg. (Roberts & McInnis).

Twin City Broadcasting Corp., Longview (KWLK)—Requests assignment of Channel 2 to Longview using offset carrier and locating transmitter as far south of city as possible to prevent interference with Channel 2 in Victoria, B. C.; or assign Channel 2 to Vancouver from Victoria and assign 6, 8 or 10 to Victoria from Vancouver in lieu of 2. (John W. Kendall).

Tom Olsen, Olympia (KGY)—Requests assignment of Channel 11 to Olympia from Tacoma. (Haley, McKenna & Wilkinson).

Fisher's Blend Station Inc. (KOMO) and Totel Broadcasters Inc. (KJR), Seattle—Requests assignment of Channel 2 to Seattle, replacing 2 in Victoria, B. C. with 3. (Fisher, Wayland, Duvall & Southmayd and Dow, Lohnes & Albertson).

Queen City Broadcasting Co., Seattle (KIRO)—Approves KOMO comment regarding assignment of Channel 2 to Seattle—provided does not require deletion of 4 from Seattle. (Arnold, Fortas & Porter).

Totel Broadcasters Inc., Seattle (KJR)—See Fisher's Blend Station Inc.

WEST VIRGINIA

Joe L. Smith Jr. Inc., Beckley (WJLS)—Requests assignment of Channel 6 to Beckley. (Pierson & Ball).

WSAZ Inc., Huntington (WSAZ & WSAZ-TV)—Requests assignment of Channel 3 to Huntington in lieu of 8, substituting 8 for 3 in Charleston, adding 4 to Beckley, interchanging 4 and 5 in Raleigh and Chapel Hill, N. C. (Cohn & Marks).

Daily Telegraph Printing Co., Princeton (WHIS Bluefield)—Requests assignment of Channel 6 to Princeton. (Dow, Lohnes & Albertson).

Fort Industry Co., Wheeling (WWVA)—Requests amendment of engineering standards to indicate smaller coverage of uhf stations in rough terrain. Favors FCC proposals for Wheeling. (Dow, Lohnes & Albertson).

Williamson Broadcasting Corp., Williamson (WBTH)—Favors FCC proposal for Williamson. (Fletcher & Midlen).

WISCONSIN

Green Bay Newspaper Co., Green Bay (WJPG)—Requests assignment of Channel 2 to Green Bay. (Roberts & McInnis).

Badger Broadcasting Co., Madison (WIBA)—Favors FCC proposals for Madison. (Dow, Lohnes & Albertson).

Radio Wisconsin Inc., Madison (WISC)—Opposes vhf-uhf intermixture, requests that Channels 21, 27 & 33 be assigned to commercial use, that 3 be reserved for educational use, contends that all commercial TV should be assigned in uhf. (Arthur W. Scharfeld).

U of Wisconsin and State Radio Council, Madison (WHA)—Requests that 5 additional channels be reserved for educational stations in Wisconsin. (E. B. Fred, president).

M & M Broadcasting Co., Marinette (WMAM)—Favors FCC proposals for Marinette. (Fisher, Wayland, Duvall & Southmayd).

Hearst Radio Inc., Milwaukee (WISN)—See Wisconsin Broadcasting System.

Milwaukee Broadcasting Co., Milwaukee (WEMP)—Requests that Channel 6 be allocated to Milwaukee from Green Bay, 2 to Green Bay. (Bingham, Collins, Porter & Kistler).

Wisconsin Broadcasting System (WFOX) and Hearst Radio Inc. (WISN), Milwaukee—Requests assignment of Channel 6 to Milwaukee from Green Bay; 2 to Green Bay; also, reservation of uhf channel for education in lieu of 10. (Dempsey & Koplovitz).

Alvin E. O'Konski, Wausau (WLIN, Merrill)—Favors FCC proposal for Wausau. (Fletcher & Midlen).

WYOMING

Warren M. Mallory, Laramie—Requests change in reservation for educational use from Channel 8 to 18; or, assign 3 or 5 to Laramie.

HAWAII

Pacific Frontier Broadcasting Co., Honolulu (KULA)—Requests assignment of Channels 7, 9, 11 or 13 be reserved for educational station instead of 2. (Haley, McKenna & Wilkinson).

EDUCATIONAL INSTITUTIONS FAVORING RESERVATION PLAN

Following institutions filed comments endorsing plan in general terms. If comments object to plan or propose changes in specific channels, they are reported along with all other comments in main body of this supplement. All comments are being reviewed by FCC and some may be classified as correspondence rather than comments. Educational institutions commenting are listed alphabetically by States and by cities within states.

Mobile Public Schools, Mobile, Ala.
University of Alabama, University, Ala.

Phoenix College, Phoenix, Ariz.
University of Arizona, Tucson, Ariz.

University of Arkansas, Fayetteville, Ark.

University of California, Berkeley, Cal.

After Effects of ABC-CBS Deals, *page 1.*
Freeze-End Horizon Grows Bleaker, *page 3.*
Broadcast Construction Can Continue, *page 4.*
Financial & Trade Notes, *page 7.*
New Metal Curbs Presage Set Shortages, *page 8.*
Trade Up Slightly, Plenty Yet To Do, *page 8.*
Mobilization Notes, *page 11.*

COAST-TO-COAST HOOKUPS BY YEAR'S END: Exactly when transcontinental TV will become reality, is indeterminate at this moment -- except that it should be sometime before end of this year, possibly in time to pipe World Series in October to 3 of the Pacific Coast cities having stations: San Francisco, Los Angeles, San Diego.

Inquiry at AT&T discloses only that Omaha-Denver-Salt Lake-San Francisco microwave extensions of present hookups east of Omaha will be in operation for phone service by late August. After that, technical installations will determine addition of two-way TV circuits, which could thus be linked into present San Francisco-Los Angeles microwave hookup.

San Diego gets service off air from Los Angeles. Nothing has been decided about hooking up San Francisco-Seattle, though there is a coaxial out of Sacramento for phone service to Seattle which could be modified for TV.

Besides this week's additions of microwave circuits between Columbus-Dayton and Dayton-Cincinnati (Vol. 7:18), phone company this year plans more microwaves into Southwest, is considering Kansas City-Wichita-Oklahoma City-Tulsa-Ft. Worth-Dallas-Austin-San Antonio links (Vol. 7:6) -- but primarily for phone use.

Rest of this year, aside from coast-to-coast interconnection, AT&T plans only the Memphis-Birmingham-Atlanta coaxial extension, via Jackson, Miss., due for completion in October and providing second circuit for Birmingham and Atlanta, each now with 2 stations and already linked via Charlotte-Jacksonville. Next year, additional Rochester-Syracuse and Charlotte-Atlanta circuits are scheduled by spring plus Jackson-New Orleans by fall.

AFTER EFFECTS OF ABC-CBS DEALS: By their projected "sale and re-sale" deals (Vol. 7:18-19), which came to naught, ABC & CBS have thrown sharper focus on these trends:

(1) Value of TV franchises enormously enhanced -- not only by their profit potential but by willingness of such traditionally smart operators as CBS to go to such great lengths to obtain outlets. Channels now held will be held more tightly than ever, or for huge prices, and those sought when FCC thaws freeze will be sought more eagerly than ever.

(2) Value of radio properties, including ABC's, further depreciated -- the manifest result of tacit and expressed admission that TV is so important. Even more than ABC-CBS negotiations, the reductions in radio network rates are contributing to such depreciation of AM values.

ABC this week followed lead of CBS and NBC (Vol. 7:15 et seq) by announcing 15% radio network rate cuts effective July 1 (see p. 12). This inevitably means curtailed income from that source, while TV revenues climb.

* * * *

ABC Chairman Noble's explanation of deals is contained in statement issued May 16 and published in full on page 7. This is all that affiliates and sponsors, as well as press, were told. It implies all deals are off -- and "it means what it says," according to an ABC spokesman.

None the less, the trade is utterly convinced that ABC will be sold sooner

Copyright 1951 by Radio News Bureau

MAY 21 1951

or later. Some even saw significance in fact United Paramount's president Leonard Goldenson used word "suspended" when telling stockholders meeting this week about his company's negotiations with Noble.

Nor is it secret that CBS and ABC initiated talks with other prospective customers, notably the O'Neil and Storer interests, to say nothing of IT&T, and that many ABC employes and affiliates are still quite bitter. Said one major affiliate, who operates both AM and TV outlets:

"We ought to be flattered, I suppose, by the very high value placed on our properties by our worthy competitors, but for my money these proposed deals have taken a year off the life of ABC. And the network radio rate cuts are a forewarning of what can happen to radio stations. It all goes to show how we and the networks can love each other today and grow to hate each other tomorrow."

* * * *

There's scant doubt that all radio networks, in pulling down rates, face increasing difficulty in clearing time on their affiliated stations.

Some ABC affiliates took their troubles, particularly the "merger" stories, to their Senators and Congressmen, and several threatened to sue if deals went through, though principals took pains to make clear all deals were predicated on continuing ABC networks -- CBS's purpose being mainly to get some of its TV outlets.

Another boomerang effect may be new opposition in Washington to network ownership of stations, either AM or TV -- and some talk about that is already heard. FCC has limited any one entity to 5 TV stations (which only ABC and NBC now have) and custom (and proposed FCC rule) limits AMs to 7 (CBS has 7, NBC 6, ABC 5).

If networks were deprived of own stations, which could be done only by act of Congress, they would rightly argue there would be less, not more network service. Their balance sheets, they say, show profits come largely from station and not network operations. That will be more true of TV even than AM because interconnection charges are so much higher for TV.

The political dangers are great, nevertheless, and the networks have always been very sensitive to what FCC and Congress say. There have been a few outbursts in Congress on score of "monopoly" and "merger" as result of CBS-ABC negotiations.

* * * *

What CBS will do next is subject of much conjecture, but it's common gossip that it has shopped strenuously for key TV stations to add to the 2 it owns plus 45% interest in third. One big city newspaper station is said to have quoted, no doubt facetiously, a $10,000,000 asking price! CBS is bound to go after new station grants in post-freeze hearings, and it's even conceivable that it will become one of the most earnest protagonists of uhf.

May 19 Variety, without indicating source, quotes what it calls "extremely conservative estimates" of the worth of ABC's TV and AM stations, not taking into account "foreseeable potential and other important facts".

The TV station figures are shown as: WJZ-TV, New York, $5,000,000; WENR-TV, Chicago, $1,000,000; WXYZ-TV, Detroit, $2,500,000; KECA-TV, Los Angeles, $1,500,000; KGO-TV, San Francisco, $1,250,000; total for 5 TV stations $11,250,000. And the AM station quotations: WJZ, $2,000,000; WENR, $500,000 (ABC has only half-time on its channel); WXYZ, $750,000; KECA, $1,000,000; KGO, $1,000,000; total radio station valuation $5,250,000. (No reason is given for low WENR-TV estimate.)

Thus, worth of TV and AM stations alone would aggregate $16,500,000. In the CBS negotiations, purchase price of whole package was indicated as $26-28,000,000.

* * * *

ABC earnings statements have been unimpressive lately, explained as due to huge TV costs. This week, first quarter profits after taxes went up to $222,000, or 13¢ a share on 1,689,017 shares of common outstanding (of which Mr. Noble owns some 53%). This compares with $93,000 (5¢) for same 1950 quarter -- but for all 1950 the net profit figure was only $85,605 on gross operating income of $45,879,660. Noble's May 16 statement speaks of annual business of "about $65,000,000."

In 1949, ABC ran deficit of $519,085 on gross sales of $40,267,488; in 1948 profit was $468,676 on $37,110,726, and in 1947 profit was $753,911 on $35,955,004. At end of 1950, earned surplus was $3,627,559.

PIB figures for 1950, covering only network income, show ABC radio billings of $35,124,625, TV $6,470,510 -- total of about $41,600,000, which might indicate owned and operated stations, both AM and TV, accounted for only slightly more than $4,000,000. That figure is probably low, however, since PIB network figures cover gross billings. Station profit-and-loss figures aren't revealed by any network, but with very few exceptions their AM and TV stations are reputed to be good earners.

FREEZE-END HORIZON GROWING BLEAKER: Confronted with an avalanche of comments on its proposed allocations (Vol. 7:19), FCC could do no less than grant more time in ever-lengthening end-of-freeze procedures -- so as to give its own staff as well as interested parties chance to mull the comments, which reached final total of 645.

[Supplement No. 72-A, herewith, completes our digests of all comments.]

Big allocation hearing was moved forward about month -- to start July 9 -- and deadline for oppositions was extended to June 11.

That means you can add at least one more month to our calendar of probable times when new TV stations can get on the air (Vol. 7:17). It's still good guess first few won't make it before mid-1952. And if applicants come in droves, as indicated, it may be well into 1953 before any sizable market areas get new outlets.

What worries the industry far more than this delay are other factors auguring added years rather than months to freeze now approaching end of its third year:

* * * *

(1) Legality of FCC's procedures. More and more lawyers are beginning to take it for granted that someone will hail Commission into courts. Regardless who wins in courts, such appeals always take months if not years.

Commission must have known risks it was taking, radio attorneys say, but they find it incomprehensible FCC didn't try to clear legal air 3 years ago when Communications Bar Assn. asked for oral argument on exactly same issue it now poses -- whether fixed city-by-city channels can be laid down in rules, changeable only via the devious and laborious rule-making process.

They oppose fixed assignments, think allocations should be based on demand. Commission is apparently bent on making this latest allocation plan stick -- as is.

Commission counsel have long been cocky about luck in courts, though that attitude may have been somewhat shaken by industry's success in getting color case as far as Supreme Court. And, this week, District of Columbia Court of Appeals indicated that it's very meticulous about seeing that everyone gets a fair shake.

During oral argument on WJAX-City of Jacksonville's request FCC be enjoined from moving Channel 2 out of city (Vol. 7:19), Chief Judge Stephens seemed dubious whether city was getting full "due process" hearing before FCC, as required by the Administrative Procedures Act. Court came up with idea that made injunction unnecessary, doesn't tie up allocation plan:

Last year, FCC took CP for WJAX-TV away from City of Jacksonville, denying it more time for construction (Vol. 6:41). City appealed FCC action to Court of Appeals. After this week's oral argument, Court decided it will try to get out its decision, on city's appeal to recapture CP, before allocation plan becomes final. Thus, city will know whether it has a CP to protect -- before allocation is frozen.

* * * *

(2) Congress. Sen. Benton is working hard, seeking support for his resolution to study educational TV (Vol. 7:15-18.) This week, he made another long speech in Senate contending that 6-12 months' delay, if necessary, is small price to pay for proper treatment of educational TV.

Commercial interests are of one accord in bucking educational channel reservations worked into allocation plan by Comr. Frieda Hennock, and there are indications quite a few members of Congress don't like that approach either since so few educational institutions are financially equipped to run own expensive TV plants.

Sen. Benton, once an adman (Benton & Bowles), once vice president of U of

Chicago, has a lot of ideas for getting more public service into TV. According to his assistant John Howe, who used to run the U of Chicago Round Table broadcasts, he's exploring such avenues as:

(a) Creation of a national advisory committee to assist Congress and FCC. (b) Resolution requiring FCC to finalize current reservation proposal. (c) Federal grants-in-aid for educational TV stations. (d) Legislation spelling out "public interest," making applicants "stick to promises" when they get stations. (e) Setting aside of choice time for "public service" by commercial licensees.

Sen. Johnson is obviously beginning to get stirred up about allocations. He has indicated doubts about educational reservations and criticized "lack of flexibility" in FCC's plan (Vol. 7:18-19). And, nagged by constituents, particularly from his own Denver, biggest non-TV city in the country, he appears to be getting somewhat weary of the freeze himself.

* * * *

Whether oft-suggested "partial" lifting of freeze will be effected, isn't yet indicated by FCC. Guessing is it will say "no can do" -- except maybe for grants in Territories, though nobody has yet applied from Hawaii, Alaska, Porto Rico. But chances for vhf station power increases and new uhf stations "soon" appear slim.

Some stations may offer to assume risk, however, and ask FCC for temporary authorization of high power immediately where interference wouldn't be increased.

* * * *

DuMont is striving mightily to convince everyone that its allocation -- a complete substitute for FCC's (Vol. 7:18-19) -- is not only more realistic but more efficient. It's based on population density, probable economic support.

DuMont demonstrated its "light map" at New York press conference May 17 to give graphic illustration of such contentions as these: (a) Its plan supplies 375 cities with 655 vhf stations, compared with FCC's 342 cities, 557 stations. (b) It gives 4 or more vhf channels to 47 cities, compared with FCC's 18 cities. In northeast U.S., it provides 598 uhf assignments, compared with 537 in FCC plan.

DuMont plans Washington demonstration, in week or so, for consulting engineers and attorneys. After analyzing our digests of allocation comments (Supp. 72), DuMont research v.p. Thomas Goldsmith ventures that his company's plan would satisfy "vast majority" of requests for vhf channel shifts and additions.

BROADCAST CONSTRUCTION CAN CONTINUE: Second-week sizeup of NPA order M-4 regulating all construction (Vol. 7:19), as it applies to broadcast station building:

Despite confusion over errors in wording of order, mistakes in interpretation, despite fact that specific criteria haven't been worked out yet, all responsible sources we've contacted indicate that --

(1) Govt. considers present and prospective TV-radio broadcast facilities essential to national defense.

(2) Holder of FCC construction permit, as general rule, will receive NPA authorization to build if his plans for use of steel aren't too grandiose.

(3) NPA authorization system will actually help broadcasters get building materials when Controlled Materials Plan begins working smoothly (by late fall).

Order M-4 requires NPA authorization for practically all building. That's all it does. It doesn't ban station construction.

* * * *

Aside from general criteria of community necessity and essentiality to defense, specific principles to be applied in considering applications to build new broadcast facilities are being worked out by NPA's Construction Controls and Electronics Divisions in consultation with FCC. Specifications will probably limit amount of money to be spent and tonnage of steel to be used in building stations.

Construction Controls Div. administers order, issues authorizations. Electronics Div. is "claimant", or spokesman, for broadcasters. As such, its job is to see that broadcasters' case is adequately presented to other NPA divisions in charge of materials for manufacture and maintenance of equipment, as well as construction.

Electronics Div. has prepared third quarter "program" for construction of new broadcast stations under Controlled Materials Plan -- meaning it has put in request for materials it expects new stations to require. It did this after checking at FCC. Broadcasting program has been tentatively approved by DPA for allocation of materials -- and approval carries govt. stamp of essentiality.

This claimant function would normally be duty of FCC; in fact, some within FCC have complained because NPA didn't take initiative in consulting them before blanketing TV-radio stations into construction order. Fact is, however, that FCC Chairman Coy in January relinquished all rights as claimant in production program.

FCC chairman was designated by Commerce Dept. Nov. 20, 1950, to serve as claimant "with respect to all communications facilities, both Govt. and private, of a civilian character not covered otherwise." But on Jan. 12, 1951, Mr. Coy wrote DPA chief Wm. Harrison that FCC couldn't implement designation as claimant. Gen. Harrison acknowledged Mr. Coy's letter Jan. 26 and designated NPA Electronics Div. as claimant for broadcasters.

Although FCC is being consulted on standards, it is NPA Electronics Div. to whom prospective broadcaster should look for help in getting approval of construction plans. FCC will enter picture only to extent that its grant of a CP is prerequisite to NPA consideration of application for station construction.

* * * *

No one has yet applied for authorization to build a station. After specific criteria have been established, here's how authorization procedure will work:

Applicant will apply on Form NPAF-24 at nearest regional NPA office, which will have power to grant authorization. If it's denied, applicant may modify his specifications to meet NPA criteria, and resubmit them. If refused again, it's sent to Washington for review. Then broadcaster's best bet is to get in touch with NPA Electronics Div. which, as his claimant, would discuss his case -- acting as his spokesman -- with Construction Div. If he's turned down again, he can appeal to NPA's 3-man appeals board.

NPA will be lenient with broadcasters who have already bought materials to construct stations, but haven't begun building. They must file applications for adjustment or exception, showing equipment can't be resold without loss or inconvenience. Then they'll get go-ahead to build.

* * * *

Confusion aplenty is rule at NPA -- and especially in Construction Div. A mistake in phrasing of construction order -- giving newspapers apparent preference over TV-radio stations -- drew from NARTB a demand for a conference with NPA Administrator Fleischmann.

NPA general counsel's office says error was made in printing, but assures that master copy of order doesn't contain the inequity -- although there's been no public correction yet.

In another case of confusion, NPA lawyers rebuffed Construction Div. Director Rufe Newman, who last week told us broadcast stations may be constructed without NPA authorization if they use less than 25 tons of steel. That isn't so, general counsel's office says. Tonnage exemption applies to certain other construction categories -- such as schools, hospitals, factories -- but not to TV-radio.

Among grants for educational radio-TV reportedly being made: Kellogg Foundation, $200,000-$250,000 to National Assn. of Educational Broadcasters for AM "tape network" facilities; Ford Foundation, $25,000 to NAEB for monitoring of TV programs in several cities. Rumor has it that $750,000-$1,000,000 grant of some sort is in the mill. Ford Foundation officials say they have no present plans for granting funds for station construction or operation, that recent grants are to "get things going."

TV has an obligation "to attempt to lift the cultural level of the masses [but] we cannot proceed by leaps and bounds to an all-culture diet." That was sizeup of educational TV by RCA chairman David Sarnoff in May 18 speech during conference on "Living in Industrial Civilization," sponsored in Corning, N. Y. by Corning Glass Works and American Council of Learned Societies. Gen. Sarnoff pleaded for patience with young industry, saying medium shouldn't be expected to devote itself, overnight, to primarily cultural projects.

"I am a proud parent today," writes inventor Lee DeForrest to May 17 *New York Times*. He states: "In the past I have complained bitterly about some of the uses to which 'my children,' radio and TV, have been put. I am delighted to see the splendid way these media were employed in bringing to the public the living history of General MacArthur's return and subsequent discussion . . ."

Personal Notes: Alexander Stronach Jr. promoted from TV program v.p. to v.p. in charge of ABC-TV, succeeding Otto B. Brandt, who goes to KING & KING-TV, Seattle (Vol. 7:19) . . . Slocum Chapin, Eastern TV sales mgr., named v.p. for ABC-TV stations, and Richard A. Moore, mgr. of KECA-TV, named acting mgr. of ABC Western Div. . . . Wayne Mason, mgr. of RCA Frequency Bureau, New York, loaned to State Dept. for 2-year hitch as Telecommunications Attache for Western Europe, to be stationed in Geneva; he replaces C. W. Loeber, who has returned to FCC . . . Comdr. Mortimer W. Loewi, director of DuMont Network, returned from Europe May 15, accompanied by Andrew P. Jaeger film div. director . . . In addition to ABC vice chairman Mark Woods (Vol. 7:19), honorary degrees were conferred by Ithaca College May 12 on Justin Miller, NARTB, and Michael R. Hanna, gen. mgr. of Cornell's WHCU and of Rural Radio Network . . . Mannie Sachs, RCA v.p., named program chief for Philadelphia's 175th Declaration of Independence anniversary celebration . . . FCC Comr. George Sterling has chosen David W. Warren, Camden, Mc., to be legal assistant; Warren is 1948 graduate of Boston U School of Law . . . Fred Whitney, ex-Altec, joins staff of Society of Motion Picture & Television Engineers to take charge of test film technical operations . . . Marshall N. Terry, ex-Crosley, back to Trailmobile Co., Cincinnati, as adv. director . . . Tony Moe, KNX sales promotion mgr., named to same post for CBS's KTSL, Los Angeles, replacing Ralph Taylor, with Sherril Taylor coming from KSL, Salt Lake City, to take his place at KNX.

Station Accounts: TV sponsorships, resulting in more beer drinking at home, are given credit by U. S. Brewers Foundation for reversal of 1947-50 downward trend in beer production—up 4% first quarter 1951 over same 1950 period. Survey shows 62% of American families now buy beer for consumption at home. Brewers are top sponsors on TV-radio, particularly of baseball and other sports (Vol. 7:13, 17) . . . B. J. Roesch Co., electrical equipment manufacturer, sponsoring *Inside Television* on KTTV, Los Angeles, Sun. 9:15-9:30; guest experts (first was Dr. Lee DeForest, May 13) tell audience in lay language how TV works . . . Ashland Oil & Refining Co., Ashland, Ky., expands into TV with Mon.-thru-Sat. newscasts plus thrice weekly *General Store* program on WLWT, Cincinnati, thru Byer & Bowman, Columbus . . . Lic-Rich Co., Cleveland, soon to introduce licorice-flavored soft drink, ice cream and frozen sticks, will use TV, thru Hutchins Adv., Rochester . . . Zenith Radio, seldom user of TV or radio, preparing TV spots for local co-op use, plugging uhf tuners, thru MacFarland, Aveyard & Co., Chicago . . . Elgin-American planning to use TV for new campaign to promote Certina watches . . . Among other advertisers reported using or preparing to use TV: Graham Co. (Redbow products), thru Blaine-Thompson Co. Inc., N. Y.; G. N. Coughlan Co. (DeMoist dessicant), thru A. W. Lewin Co., N. Y.; New Netherlands Trading Corp. (Juliana cheese), thru Hilton & Riggio Inc., N. Y.; Jewel Food Stores, Dept. of Jewel Tea Co. Inc. (food products), thru Goodkind, Joice & Morgan Inc., Chicago (WNBQ); Nesco Inc. (stainless steel ware), thru Needham, Louis & Brorby Inc., Chicago; Mira-sham Corp. (chamois substitute), thru C. Wendel Muench & Co., Chicago; Scudder Food Products (peanut butter), thru Davis & Co., Los Angeles; Myers Industries (candies), thru Watts-Payne Adv., Dallas; Plymouth Dealers of N. Y., thru Klores & Carter Inc., N. Y.; Packard-Bell Co. (TVs & radios), thru Elwood J. Robinson & Co., Los Angeles.

Russell D. Valentine, 51, chief engineer of WQXR, New York, and a pioneer in amateur radio and high fidelity broadcasting, died May 15 at his home in New York.

Network Accounts: Pepsi-Cola, starting June 16, sponsors *Faye Emerson* on CBS-TV, Sat. 9-9:30, thru Biow Co., taking time vacated by Bulova's *Frank Sinatra Show* and dropping present *Faye Emerson Show* on ABC-TV, Mon.-Wed.-Fri. 7:15-7:30 . . . Hazel Bishop Inc. (lipstick) starting July 5, sponsors Freddy Martin's *Band of Tomorrow* on NBC-TV, Thu. 10-10:30, thru Raymond Spector Co., as summer replacement for U. S. Tobacco's *Martin Kane, Private Eye* . . . Procter & Gamble in fall will sponsor *Red Skelton* on film on NBC-TV, Sun. 10-10:30, taking over period being dropped by Congoleum-Nairn's *Garroway at Large* . . . Armour & Co. considering *Garroway at Large* as replacement for *Stars Over Hollywood*, on NBC-TV, Wed. 10:30-11, starting in fall, thru Foote, Cone & Belding, Chicago; also daytime across-the-board show for Garroway . . . Lehn & Fink (Lysol, Hinds) has bought 10-10:15 portion of *Doodles Weaver Show*, which will replace *Saturday Night Revue* during summer on NBC-TV, Sat. 10-10:30, thru Lennen & Mitchell and McCann-Erickson, both N. Y. . . . DeSoto Div., Chrysler Corp., substituting *It Pays to Be Ignorant* for *You Bet Your Life* on NBC-TV, Thu. 8-8:30, during summer, thru BBDO, N. Y. . . . Bauer & Black (surgical products) sponsorship of 5:30-6 portion of *Super Circus* on ABC-TV, Sun. 5-6, starts June 10, thru Leo Burnett, Chicago . . . Goodall Fabrics Inc. (Palm Beach) June 10 will sponsor Palm Beach Round Robin Championships from Wykagyl Country Club, New Rochelle, N. Y., on CBS-TV, Sun. 5-6, thru Ruthrauff & Ryan, N. Y. . . . General Foods (Sanka) replacing *The Goldbergs* for summer with Phil Baker handling celebrity husband-and-wife quiz show titled *Who's Whose?* starting June 25 on CBS-TV, Mon. 9:30-10; sponsor has cancelled *The Goldbergs*, but is retaining time and will have new show in fall. Agency is Young & Rubicam, N. Y. . . . Larus & Bro Co. Inc. (Edgeworth tobacco) June 24 starts *Plainclothesman* on DuMont, Sat. 9:30-10, thru Warwick & Legler Inc., N. Y.

Westinghouse is currently spending $2,300,000 for its *Studio One* on CBS-TV, using 51 stations, as against $400,000 in 1949 when it used 9 stations, according to J. Gilbert Baird, appliance sales promotion mgr., in glowing report on TV advertising at joint American Television Society-Executive Sales Club May 15 meeting. Sum includes $75,000 for newspaper advertising, $50,000 for dealer promotions, plus unstated amount for publicity, Baird revealed. Reason why Westinghouse is happy with TV, he said, is that appliances must be demonstrated and TV is best medium for that function, costing about $1.60 per thousand to reach 9,000,000 persons every week.

Million dollars is National Collegiate Athletic Assn.'s asking price for sponsorship of its college football telecast-a-week package this fall (Vol. 7:16), with breweries ruled out as sponsors, May 16 *Variety* reports, adding that NCAA reportedly would keep 60% of take, divide remaining 40% among participating colleges. "Best approach yet" is NCAA reaction to formula proposed by WWJ-TV gen. mgr. Harry Bannister: televising of second half of each Big Ten game. WPIX survey of New York area sports viewers indicates TV creates new sports enthusiasts, shows 8 out of 10 viewers who have seen major sport for first time on TV plan to attend in person, majority would rather attend than watch on TV, 37% have actually gone out and bought tickets.

Joint Committee on Educational TV has named Ralph Steetle, Louisiana State U, to replace Richard Hull as director of Washington headquarters when latter goes back to WOI-TV, Ames, Ia., June 5. Hull has been on 2-months' leave of absence. Blanche Crippen, formerly of National Education Assn., was appointed administrative assistant for program development.

Statement by Mr. Noble

Following collapse of negotiations for sale of ABC, chairman and majority stockholder Edward J. Noble May 16 issued the following statement to press, affiliates and sponsors:

It is pertinent that I reveal the facts relating to recent reports of the "sale" or merger of the American Broadcasting Company. Over the past two years, I have frequently stated that, as a representative of our stockholders, affiliates and advertisers, I would always listen to proposals that would strengthen and improve ABC and better equip our networks to serve the public. This statement remains true today.

About three weeks ago, Mr. William S. Paley, Chairman of the Board of the Columbia Broadcasting System, approached me, and in these discussions a merger of ABC and CBS, designed to create the strongest radio and television networks yet to be conceived, was suggested. Because of the Federal regulations prohibiting one company from owning two radio or two television stations in the same city and from owning more than one radio or television network, the discussions were expanded to include various other parties, who expressed desire to own radio and television facilities that could not legally be absorbed into a combined ABC-CBS company.

It soon became apparent that any such plan would weaken the remaining ABC radio and television networks. This was rejected by my associates and me in the belief that the public interest would not be served. We felt that the plan was unfair to ABC advertisers, ABC affiliates and our organization who had built ABC in eight years from a small radio network of 116 stations, doing $12,000,000 of business, to a radio network of 290 stations and a television network of over 60 stations, doing an annual business of about $65,000,000.

During the negotiations, as the controlling stockholder, I was offered, by an interested party other than CBS, an opportunity of selling my personal stock at $15 a share. This, I rejected, both because I would not accept an offer not available to all stockholders and because, as I have said, I have no interest in a "sell-out" which would take me away from the development of television and radio.

The merger of ABC into CBS was abandoned by my associates and myself, although it was very attractive, both financially and otherwise, because the remaining ABC radio and television networks would not be as strong or have the potential of growth equal to the present set-up.

Thereafter, United Paramount Theaters, Inc. proposed a merger with ABC, whereby ABC stockholders would receive United Paramount preferred stock and warrants for shares of United Paramount common stock. ABC could not accept this offer because we are interested only in a real partnership whereby ABC stockholders would share more fully in the growth of radio and television through ownership of greater amounts of equity securities and through exercise of more proportionate voting representation.

My associates and I have been complimented by the recognition given the value of ABC by our competitors and by others who have studied the operation of our company.

We will continue to operate ABC radio and ABC television and are convinced that we will continue our growth and progress and better serve the public in both fields. We have but one objective—the improvement of the position of the American Broadcasting Company, its personnel, stockholders, affiliates and advertisers.

More May 1 sets-in-use reported since NBC Research's "census" of April 1 (Vol. 7:17): Baltimore 297,368, up 5368; Johnstown 87,275, up 5075; New Orleans 56,364, up 1964. Cleveland total is now 470,487, up 16,487 during March and April, Bureau of Business Research, Western Reserve U reports. NBC did not have April 1 figure for Cleveland.

Financial & Trade Notes: Details of CBS-Hytron deal (Vol. 7:15) are disclosed in notice to CBS stockholders of special meeting June 13, at which CBS board will seek approval of issuance of 621,550 more shares of its stock (310,775 shares each of Class A & B) in exchange for Hytron assets. Chairman Paley's letter to stockholders states:

"We believe that, as was the case when Columbia Records Inc. was acquired some years ago, Columbia will by this transaction provide for itself a more varied source of income and greater revenues . . . We believe that the potential growth of the TV set manufacturing business is considerable and that only a small part of the possible market has been realized. We also believe that the use of the name 'Columbia' . . . will aid materially in the marketing of radio and TV sets and phonographs which may be produced by Air King."

Proxy statement states the 621,550 shares of CBS stock will provide 31 shares for each 100 shares of the 2,005,000 outstanding common of Hytron, that Hytron will distribute these shares to its stockholders in "complete winding up and liquidation of Hytron" and that Hytron will change its corporate name. Hytron's chairman Lloyd H. Coffin, president Bruce A. Coffin and v.p. David H. Cogan are to be employed for 3 years at basic compensation of $50,000 per year each plus bonuses up to $50,000; their present stockholdings in Hytron are 115,886, 120,238 & 32,269 shares respectively. All 3 with Hytron director Frederick L. Chapman would be elected to CBS board.

If CBS board determines and satisfactory tax ruling is obtained, the 2850 Class A and 189,750 Class B shares now in treasury of CBS may be used as part of shares to be issued and delivered to Hytron. If agreement is consummated (assuming no Hytron stockholder demands payment for his shares), there will be outstanding 1,269,203 shares of CBS Class A and 1,069,699 shares of Class B. As of May 7, notice says, there were outstanding 958,428 Class A and 758,924 Class B shares. The A & B shares are identical except that holders of A, voting separately, have right to elect half the total directors.

CBS chairman Wm. S. Paley owns beneficially 88,510 Class A and 223,500 Class B, or 9.23% and 29.45%, respectively, of those presently outstanding. On April 30, director Isaac D. Levy was reported as selling 5000 shares of B, and it's generally believed he and family were principals in recent private sale of 35,000 shares (Vol. 7:18-19).

* * * *

Raytheon sales for 10 months ended March 31 amounted to about $73,000,000, profit about $2,000,000, so that earnings for fiscal year ending May 31 should equal $1.10 or $1.15 per share, compared with 49¢ in fiscal 1950. This is gist of statement by president Charles Francis Adams Jr., speaking before N. Y. Society of Security Analysts. He predicted volume of more than $100,000,000 next few years, profits of $1 to $3 per share, possible dividend action after next spring when govt. work hits peak. Defense backlog amounts to $100,000,000, he stated.

Dividends: DuMont, 25¢ quarterly on preferred payable July 1 to holders of record June 15; Hazeltine, 25¢ payable June 15 to holders June 1; Aerovox, 15¢ payable June 15 holders June 1; Cornell-Dubilier, 20¢ on common payable June 28, $1.31¼ on preferred payable July 15, to holders June 20; I-T-E Circuit Breaker Co., 35¢ payable June 1 to holders May 18; Weston Electrical Instrument Co., 50¢ payable June 8 to holders May 23; Sprague Electric, 50¢ payable June 14 to holders May 29.

Bendix reports profit of $2,890,152 ($1.37 a share) for first 1951 quarter compared with $3,563,685 ($1.69) for same 1950 quarter.

Television Digest WITH AM-FM REPORTS
1819 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
May 19, 1951

NEW METAL CURBS PRESAGE SET SHORTAGES: Defense bite into TV production will be so heavy during third quarter that supply and demand should be equalized before fall. In fourth quarter, all signs point to a shortage.

NPA restrictions and material shortages -- not marketing conditions -- will call the turn in TV-radio production next quarter, on basis of new consumer durable curbs outlined to manufacturers on May 18 by NPA Administrator Manly Fleischmann. Here's picture, subject only to minor changes:

(1) Steel limitation will be tightened to permit manufacturers to use during third quarter not more than 70% of amount they used during average quarter of first-half 1950, a period of low production compared to lush last-quarter 1950 and first-quarter 1951. Second quarter limitation was 80% (Vol. 7:10-11,14).

(2) Similar limitations will restrict manufacturers to 60% of copper, 50% of aluminum they used during first-half 1950.

On basis of average quarter's production in first-half 1950 -- about 1,557,-000 TVs -- third quarter shouldn't see more than 1,000,000 TV sets produced. This doesn't take into consideration restrictions and shortages other than steel, copper and aluminum. Pinches in nickel, tungsten, cobalt and other materials used in components could chop output down still further.

There's slight comfort in probability that NPA will be more lenient in letting manufacturer decide how to use metals he's entitled to -- to make more of faster-selling models, fewer hard-to-move ones. But he won't be allowed to switch metal quotas as between TVs, radios and phonos, for instance, and he can't "juggle" products: e.g., TVs-radios-phonos instead of appliances, and vice versa. Each is in a separate category.

But NPA probably will remove barrier that discriminates against "assemblers" as distinguished from "manufacturers" (Vol. 7:11).

Govt. figures consumer durable limitations on basis of what's left after metals are allotted for more "essential" products under Controlled Materials Plan. But consumer goods manufacturers aren't guaranteed allotments of metals, as are those who come under CMP. Fourth quarter, TV-radio and other durable goods will be pinched tighter -- but it's possible they'll be brought under CMP by then and thus be guaranteed some supply of materials, however little.

Repair and replacement part problems will be by-products of curtailed civilian production. NPA currently plans to permit practically unlimited production of these items, and is preparing order giving repairmen priority rating to get parts for household appliances, TV-radio included.

* * * *

General tentative CMP allotments have been computed by DPA. Defense and direct defense-supporting industries will get all the steel, copper and aluminum they require. So-called "intermediate" industries -- not directly military or defense-supporting, but not civilian either -- will average about 85% of steel they used during first-quarter 1951 (which is about 100% pre-Korea use), 80% of copper (65% pre-Korea), 65% of aluminum (50% pre-Korea). Consumer goods -- outside CMP -- are bottom category, get what's left after others are taken care of.

TRADE UP SLIGHTLY, PLENTY YET TO DO: Things were looking up a bit this week and last, though on spotty basis. There are no exact figures, and the heydey when production statistics actually told story of wholesale-retail trade is obviously at end. Nevertheless, our best information sources indicate that unit sales at retail level now seem to be keeping pace with those of last year at this time.

That's not saying very much, of course, in light of heavy promotions, lower average unit prices, intensive pressures to reduce heavy inventories. But the

season is against the kind of boom TV trade that prevailed all last year and that misled so many of us into believing there was no end to it.

If you can believe the business services and the other economic pundits, TV trade should benefit with all others in boom they promise, almost with one accord, later in year. Typical quote from Washington Post editorial on "Inventory Worries":

"Looking ahead, however, retail stocks on the whole do not appear to be excessive. On the contrary, there is good reason to believe that in a very few months retailers will be scrambling to place new orders and build up depleted inventories. Economic Stabilizer Eric Johnston points out that the defense procurement program 'hasn't really hit the civilian economy up to now.' But with the stepup in defense orders, now being placed at the rate of $1 billion a week, it soon will be, and that will result in industrial bottlenecks, labor shortages and lack of civilian goods.

"Another thing to keep in mind is that individual income reached record high levels during March. It will go still higher with increases in wage rates, longer hours of work, and additions to the labor force, laying the foundation for a rapid expansion of consumer spending later on. Firms with adequate financial resources that are not compelled to dispose of abnormally large inventories now will then be in a position to enjoy the advantages of a sellers' market at ceiling prices."

* * * *

That's the bright forward view seemingly shared by the economists, to say nothing of some TV-radio manufacturers. On immediate side, though, they're still hoping to be able to persuade Federal Reserve Board to reverse its opposition to relaxation of Regulation W, formally announced last week (Vol. 7:19).

RTMA will appear before Senate Banking & Currency Committee June 5 to argue for (1) elimination of wage, price and credit controls, or (2) restrictions on the Administration's authority under defense production act (due for renewal June 30) to slap an arbitrary down payment of 25% on TV as against easier terms on other home furnishings. The industry had asked FRB to permit trade-ins to be applied against down payment, or to reduce down payment terms to the 15% allowed for furniture.

Basis of FRB's turndown -- "saturation" and "uhf" (Vol. 7:19) -- is so easily refuted that RTMA expects to make good case before Senate group.

Yet there's talk of even tighter credit controls -- but what's meant won't be known until President's Committee on Credit Policy submits its report to White House and it's released, expected momentarily. Whether this will recommend even tighter Regulation W, isn't known. FRB chairman Wm. McChesney Martin this week told Senate committee board has no present plans either to tighten or relax Regulation W.

* * * *

Possibly contributing a mite to slightly improved demand for TVs was news this week that House Ways & Means had voted to increase excise tax on TVs, radios, phonos, records and musical instruments from present 10% to 15%. It also proposes to raise tax on autos from 7% to 10%, but rejected hike on 10% tax on refrigerators.

This bill is still in writing stage, and RTMA officials and excise tax committee are trying to persuade committeemen tax may really kill off revenue source. Administration had originally asked for 25%. Senate Finance Committee must yet hold hearings, too. Aligned with industry against tax raise are labor unions.

* * * *

TV output for week ending May 11 went up slightly -- to 82,224 (7544 private label) from year's low of 66,077 week before (Vol. 7:19). Factory inventories also went up, totaling 505,848 at end of week as against 474,541 the preceding Friday. In radio, slight upturn was also reported -- 330,228 units vs. 298,149 week earlier. Radio inventory was 214,609, up from 187,305 of preceding week. Week's radio breakdown was as follows: home radios 159,282, auto 133,952, portables 36,994.

* * * *

Trade practice rules will be drawn up by Federal Trade Commission June 21 in Washington, in cooperation with RTMA, NARDA, National TV Dealers' Assn., and such dealers and distributors as engage in interstate commerce. Following industry conference, FTC will schedule general public hearing, probably in fall. We erred last week in stating that June 21 meeting was an RTMA-sponsored session.

Topics & Trends of TV Trade: Emerson TV prices go back up June 1, after only 30-day period of reductions ranging from $15 to $145 (Vol. 7:18). Dealers will be told new lists within week. Prices will be at or near what they were before May 1 reductions, according to president Ben Abrams, who noted that the reductions, originally planned to run about 60 days, "accomplished our objective of reducing dealer and distributor inventories."

"Since our production costs have increased due to our curtailed operations," said Mr. Abrams, "it is necessary that our TV line be repriced upward." He disclosed Emerson is cutting back production from 1500 to 1000 TVs per day, from 3500 to 2500 radios per day, forced not only by reduced demand but by materials restrictions, defense orders, etc. This means cutback of 60% from peak fourth quarter 1950, he said.

* * * *

Monarch-Saphin got plenty of publicity—even newsreels and telecasts—on its big "auction" of TVs in New York's Capitol Hotel May 14-17. Fears that it would be dumping proposition were dissipated after first 2 days of sales, when it became apparent sets were going at 30-40% below list, which is about what consumer could get anyway if he shopped around. *New York Journal of Commerce* May 16 called it "just another sales gimmick"—and there are plenty being tried by overloaded dealers, including one in Chicago offering a 7, 10 or 12½-in. traded-in TV, a radio or even a small washing machine for one cent with every purchase of a new TV.

Monarch-Saphin auction drew 5000 first day, 8000 second, enjoyed brisk sales. Many attending at first were representatives of manufacturers and distributors. There were dealer complaints at first, then these faded when it became apparent auction was more in nature of promotion than true distress sale. Company reported it sold 7000 sets during 4-day auction.

* * * *

Oscillator radiation problem (Vol. 6:37, 7:4) appears well in hand, with most, if not all, TV manufacturers prepared to report meeting RTMA's recommendations—50 uv/m at 100 ft. for Channels 2-6 and 150 uv/m for Channels 7-13—by July 1. Of course, many sets which don't meet standards are now in inventories, will appear on market for many months. FCC's attitude remains: "So far, so good. Let's see how much more you can reduce it."

Standard Coil's uhf strips, for existing tuners, will be unveiled June 7 at press showing in Bridgeport. Biggest tuner maker, Standard says it has built tuners contained in 40% of all sets made, has supplied over 60 set makers. Company contends existing receivers containing its tuner "can be properly adusted in a matter of minutes, and at little expense to the owner."

IBEW-AFL has dropped idea of urging freeze-lifting now in non-contested areas, deciding it's too complicated for union to get involved with, according to Washington spokesman. It has had conferences with Federal Reserve Board and NPA on credit and steel, respectively, and will urge Congress not to increase excise to 15%. Said spokesman: "Things are bad enough. Looks like they want to kill the business." Union has 500,000 members, possibly 125,000 in TV-radio plants, including Admiral, Crosley, RCA, Sylvania, Westinghouse.

Materials exchange program has been launched by West Coast Electronic Manufacturers Assn. Group issues "have and want" list, monthly tabulation of materials on hand and items wanted. O. B. Sundberg, exchange committee chairman, says list is available to those who write to him on their business letterhead, at 395 Page Mill Road, Palo Alto, Cal.

Trade Miscellany: Chicago Furniture Show, June 18-28, will see very few new TV models—possibly a mockup here and there, but none of the usual extensive lines of new production models . . . Philco plans no convention this summer, leaving get-togethers to distributor-dealer Bermuda cruises . . . RCA has officially stated no new models before Aug. 1 (Vol. 7:18) . . . Westinghouse and Sylvania say new sets will be ready in July . . . Arvin schedules dealer convention for July 29-Aug. 1, promising new TVs and radios . . . Hallicrafters says new TVs, if any, sometime in fall . . . Air King, which as Hytron subsidiary is soon to come under CBS ownership (see Financial & Trade Notes), is out seeking to line up distributors, telling prospects that if color decision goes CBS way it will have color sets quickly, otherwise it will have plenty of monochrome . . . TVs accounted for less than $7,500,000 of Sylvania's record first quarter sales of more than $60,000,000 (Vol. 7:17), according to president Don G. Mitchell, who said he looks for TV trade upturn around Aug. 1-15, reported very low inventory of receivers . . . Raytheon president Charles Francis Adams regards current slump as "purely seasonal" but admits it caused Belmont subsidiary to go into red in April.

Plant Expansions: Collins Radio will erect $1,000,000 manufacturing-assembly plant in Dallas-Fort Worth area, including personnel training school and main building covering 60,000 sq. ft., eventually employing 6000 . . . Aerovox Corp. has acquired Wilkor Products Inc., Cleveland (precision resistors), whose 35,000 sq. ft. plant and staff under former owner W. M. Kohring will be continued; Aerovox' other subsidiaries are Aerovox Canada Ltd., Hamilton, Ont.; Electrical Reactance Corp., Olean, N. Y.

* * * *

RCA's community antenna installation in Pottsville, Pa., operated by distributor Martin Malarkey (Trans-Video Corp.) and now feeding 275 homes, will be shown off to press May 22. Philco and Jerrold have broken up arrangement whereby former distributed community equipment built by latter (Vol. 7:2, 7, 11).

Automatic-focusing CR tube was announced May 15 by DuMont. Said to eliminate need for focus coil, focus control or other focusing mechanisms, new tube has no external focusing attachments. DuMont says secret of materials-saving tube is new type electron gun. Pilot production is now under way, and DuMont plans to put out complete line of self-focusing tubes.

New cathode permitting manufacture of tubes with higher current and longer life reported by Philips Laboratories. Developed in Holland, "L" cathode is being offered to tube manufacturers, is claimed to be first new basic cathode in over 25 years.

* * * *

Sales of retail radio and appliance dealers totaled $259,000,000 in March. Census Bureau estimates in its March *Trends in the Electrical Goods Trade*, a decline of $28,000,000 from February, but $1,000,000 more than March 1950.

TV shipments to dealers during first quarter totaled 1,814,767, according to RTMA. March shipments were 595,042, compared with February's 619,122. Breakdown of shipments, by counties, is available on request from RTMA, 1317 F St. NW, Washington 4, D. C.

Sun Oil has installed TV sets in 8 tankers plying Gulf and east coast waters. Sets are 12½-in. RCA models equipped with boosters, rotating antennas, etc.

Avco about to sell its 48.6% stock in ACF-Brill Motors to group headed by Allen & Co., in line with policy of switching from holding to an operating company.

Mobilization Notes: Edmund T. Morris Jr., on leave from Westinghouse to be chairman of high-level defense Electronics Production Board, is widely mentioned as next director of NPA Electronics Div., succeeding John G. Daley, who leaves May 21.

So far as we can find out—even from Morris himself—appointment hasn't been made yet, but no other names have been mentioned in connection with post. Presumably, if Morris is named, he will also continue to head Electronics Production Board, which comes under DPA. His knowledge of broadcasting field, as well as electronics production, should be valuable to Electronics Div., which is short on personnel familiar with broadcasting industry.

Daley, retired general plant manager of New England Telephone & Telegraph Co., will return to retirement in Boston, after having served as division chief 6 months.

* * * *

Three firms were issued certificates of necessity during week ended May 11 for rapid tax amortization on expansion of electronic production facilities to cost $3,991,510, DPA announced—out of total of 106 certificates granted to all industries during period, covering expansion valued at $183,189,208. Hytron was granted certificate for expansion of electronic tube production facilities at Danvers, Mass., to cost $3,333,000, with rapid tax write-off on 75% of that amount. Others were: Sylvania, Warren, Pa., parts of electron tubes, $427,533 at 80% (Sylvania's 11th certificate); Wickes Engineering & Construction Co., Camden, N. J., electronic equipment, $230,977 at 75%.

Mobilization Guide for Small Business, issued May 17 by Defense Production Administration, contains such information as: how to be placed on govt. bid lists, methods of financing plant construction, how to appeal for "hardship relief" from controls and regulations, how to get help in obtaining needed machinery and operating supplies. It's available at Commerce Dept. field offices and from Defense Production Administration, Washington 25, D. C.

Regulation W, not shortages, was chief complaint of Radio, TV & Household Appliance Wholesale Advisory Committee when it met May 17 with NPA. Govt. production officials pointed out that credit controls aren't within their jurisdiction, but they were gratified to learn that wholesalers' stocks are "adequate". Some spot shortages were reported, in some areas, including certain types of TV and radio tubes. (For list of committee members, see Vol. 6:51.)

* * * *

Cadmium order M-19 will be relaxed, at least temporarily, because sufficient supplies are now on hand to allow wider use of the metal. So NPA told leaders of cadmium industry May 15. NPA now permits use of cadmium for plating TV chassis, but not for radio chassis. It's believed that many of the restrictions on cadmium plating—probably including ban on its use in radio—may be lifted.

Polyethylene, used in insulation and plastic products, will be placed under allocation July 1 by NPA (schedule 5 to Order M-45), because demand exceeds supply. Purchasers of polyethylene will be required to certify on their orders to their suppliers the end-use of the material ordered, but only the 2 polyethylene manufacturers will have to fill out forms.

Is MRO regulation being obeyed? NPA launched series of spot checks on May 14 in 800 different industries to see if it is. Federal Trade Commission examiners will look into: (a) use of DO-97 ratings to obtain maintenance, repair and operating supplies, (b) MRO quotas, (c) acceptance and treatment of DO-97 and other rated orders, (d) impact of MRO program on defense program, (e) observance of record-keeping requirements.

Eighty percent of TV cost goes into receivers and servicing, only 20% into production of shows, Paramount Pictures' Paul Raibourn told joint American Television Society-Sales Executive Club New York meeting May 15. He noted that "such a ratio belongs to the sillier side of our economic organization," and has produced "strange results, such as a network [CBS] going into the manufacturing business and another [obviously ABC] apparently undecided which way to go but surveying them all." When ratio changes, Raibourn said, "you will find many new people producing programs, including the motion picture companies." Raibourn estimated average set owner spends $100 a year for TV set, servicing, obsolescence, incidentals and programs—cost of electricity alone running about $15 a year. That's about half of what average family spent on movies in their palmiest days, he said.

Supply and demand of FM sets remains controversial as ever (Vol. 7:11), as broadcasters, manufacturers and dealers come up with surveys showing different results. NARTB reported returns from 123 distributors in 41 cities, 18 states, show half of them indicating demand for FM-AM table models exceeds supply. NARDA queried 1000 dealers, got returns from about 100. Of these, 78% said their stocks of FM-AM table models are adequate; 59% reported FM-only stocks sufficient. RTMA is still compiling its returns, but spokesmen indicate FM demand is far nearer being met than NARTB study shows. Another broadcaster-manufacturer conference is expected.

Theater-TV will have paying audience of 200,000 by end of year. That's estimate of Nathan L. Halpern, Fabian and TOA television consultant, in talk to Georgia Theatre Owners Assn. in Atlanta this week. He based estimate on fact that more than 100 theatres in 50 cities will have installations by then, their seating capacity 200,000. He presumably also referred to recent RCA announcement of orders from dozen theatre exhibitors for more than 50 installations at cost of $750,000-$1,000,000.

Hollywood talent and technical unions are working on repayment formula in cases where motion pictures are rented to TV, following acceptance of principle week ago by Independent Motion Picture Producers Assn. in negotiation with Screen Writers Guild. SWG was spurred to this action, even threatening to strike, by musicians' recent 5% royalty deal with producer Robert L. Lippert (Vol. 7:17). So far, talk is that performers and technicians should get anywhere from 5-15% of TV income.

Industry delegates to international radio technical sessions in Geneva June 4-July 6: Haraden Pratt, American Cable & Radio; Edwin W. Bemis, AT&T; C. C. Taylor, Bell Labs; J. B. Coleman, J. H. Delinger, C. G. Mayer, Wayne Mason, all RCA; Neal McNaughten, NARTB; Donald Fink, *Electronics*. U. S. group is headed by H. B. Otterman, State Dept., Govt. members: Florence Trail, State Dept.; E. W. Allen, George Turner, W. F. Minners, all FCC; Newbern Smith, D. K. Bailey, W. Q. Crichlow, W. D. George, all Bureau of Standards; W. B. Burgess, Naval Research; Maj. E. J. Holliman, Signal Corps.

Trade Personals: D. W. Gunn named equipment sales mgr., Wm. T. Buschmann merchandising coordinator, G. V. Bureau govt. sales mgr., Raymond W. Andrews, factory sales mgr., Sylvania Radio & TV Tube Div. . . . Carl Wasmansdorff promoted to director of engineering, Hoffman Radio . . . Edward A. Freed, ex-RCA tube dept., named sales mgr. for products of General Instrument Corp.'s Elizabeth (N. J.) plant; Lee Ballengee transferred from Elizabeth to Chicago sales office . . . Frank Folsom, RCA president, a leading Catholic layman, chosen by Temple U to make presentation of honorary degree to Eddie Cantor at June 14 commencement.

Telecasting Notes: Despite prospective hookup of West Coast TV stations into the national networks via new transcontinental link due for completion by end of year (see p. 1), despite current NBC negotiations to buy 40-acre tract from Warner Bros. in Burbank for new TV-radio center, despite elaborate plans of CBS to build similar TV center on site of Gilmore Stadium, May 19 *Billboard* sees only "sad TV future" for Hollywood (1) because of sparse TV studio facilities, and (2) because supporting vaudeville talent is centered in East and it's very necessary to variety shows. Some big name stars may prefer to live in Hollywood, but other talent needs "vaude or nitery bookings", says *Billboard*. Show business periodical completely overlooks intercity switchovers, which will be possible no less in TV than in radio, once links are in . . . "Television City" sites recommended by Mayor's committee in New York, 16 in Manhattan, 2 in Nassau County, ranging in size from 57 to 401 acres, reported by *New York Times* to have been received with indifference "because several of the major networks have already made commitments for studio space in Manhattan while others are waiting to ascertain the strength of a developing move [to] Hollywood" . . . WOR-TV reports its new 2-story building at Broadway & 67th St., covering nearly whole square block, will be ready by Jan. 1, 1952, and will be called "Television Square" . . . First radio station to convert exclusively to 45 rpm records is WFIL, Philadelphia, which announces it has acquired library of 5000 selections, converted dual-speed turntables with RCA Victor conversion kit, will go on all-45 rpm standard May 21 . . . British and French film producers will turn out 15 & 30-min. films for TV from American scripts, which DuMont will telecast in U. S. and movie exhibitors will show abroad, under deal concluded by DuMont's Comr. Loewi during European trip just concluded; he says this "assures a reasonable cost to both users" . . . DuMont bid for Texaco's Milton Berle show for 1951-52 season went by boards this week when sponsor renewed with NBC-TV for same Tue. 8-9 period; show vacations for 13 weeks after June 12. Berle's 30-year artist contract with NBC isn't effective until fall of 1952 . . . DX contest conducted by WBKB, Chicago (Channel 4), with auto as prize, was won by Wm. J. Tong, Imlay City, Mich., 246 miles away; he phoned at 5:30 a.m., May 13, to describe plainly the show then being carried—contest having been run from midnight to 9:30 a.m. . . . Chicago Tribune's WGN-TV reported signing extension of DuMont affiliation contract for 2 years from June; United Paramount's WBKB contract with CBS due for renewal in October . . . KECA-TV, Los Angeles, May 15 raised base hour rate from $900 to $1200, one-min. from $150 to $220.

Urgent need for program code of own—standards that are industry-formulated rather than laid down by Govt. or others—is stressed in letter to all stations from NARTB-TV program committee (Vol. 7:16) resulting from May 17 New York meeting. All-station conference was called June 22 in Hotel Statler, Washington, stations being asked to submit their May 6-12 program logs for study and recommendations. It's obvious problem isn't merely "V necklines" but "program balance," e.g., commercial vs. sustaining time, live vs. film, local vs. network, etc. Committee's chairman is Robert D. Swezey, WDSU-TV, New Orleans. Other members: Clair McCollough, WGAL-TV & WDEL-TV; Frank M. Russell, NBC; Chris Whiting, DuMont; George B. Storer, Fort Industry Co.

Should educational TV programs be sponsored? According to survey of 694 educators by U of Cincinnati under Crosley grant, 58% favor "restricted" sponsorships, 10% favor unlimited sponsorships, 26% say TV stations should bear full costs. Suggested "restricted" sponsors: books, insurance, TV sets, autos, food, sports equipment.

NEEDLE the networks—and take all steps necessary to preclude further weakening of radio rate structure, especially national spot. That seems to be way Affiliates Committee's functions shaped up following May 15-16 New York meetings of 7 of the 13 members named in Chicago last month after CBS first announced network radio rate reductions (Vol. 7:16-17).

Even while affiliate group was meeting, ABC May 17 made known its competitive rate cut—15% less for all time periods from 1 to 10:30 p.m., effective July 1. In effect, this is an undercut, for CBS and NBC rate reductions are 10% on day time, 15% night (Vol. 7:15, 18). It's foregone certainty new MBS rates will shortly be quoted, too.

Affiliates Committee reported 200 stations backing its work, $13,000 in treasury, 146 more stations pledging support during meetings. It addressed missives to network presidents bluntly declaring there is "widespread feeling . . . some major radio networks no longer have a vital interest in AM radio" and demanding they "state clearly and unequivocally the position of your company with respect to your continuing interest and complete support of the radio medium."

To Assn. of National Advertisers and all ANA members, letters were sent averring radio is still good buy and observing: "We think we have been negligent in not raising rates through the years . . . Overzealous, competitive, upward bidding for name talent, both by advertisers and networks, initially caused the dike to break." Committee agreed BAB should do research on radio, rather than special project—though NBC and its affiliates committee have set up special research study on economics of network radio, to cover rates, discounts, sales policies, station compensation, etc. (For list of committeemen, see below.)

NBC has notified affiliates it's eliminating sustainings 8:15-10 a.m., 6:15-6:45 p.m., which weren't being carried generally anyhow since times were good local and spot availabilities. Reduction of sustainers is expected to be general, along with curtailment of AM staffs and other economies designed to meet reduced revenues.

Key men in FCC's new Broadcast Bureau, the division chiefs, (Vol. 7:18) haven't been named or even hinted by chief Curtis Plummer or commissioners, but corridor gossip has jobs filled and vacated daily. Here are predominant guesses, for what they're worth: *Asst. Chief*, Harry Plotkin (50-50 chance); *TV Facilities*, Cyril Braum, TV engineering chief; *Aural Facilities*, James Barr, AM-FM engineering chief; *Renewal & Transfer*, Walter Emery, chief, renewals & revocation branch of law bureau, or LeRoy Schaaff, chief of broadcast accounting; *Hearing*, Dwight Doty, AM legal chief, or Joseph Kittner, assistant to general counsel; *Rules & Standards*, Paul Dobin, legal assistant to Comr. Jones, or Kittner. For chief engineer, replacing Plummer, talk has narrowed down to: Edward Allen, now chief, Technical Information Div.; Albert McIntosh, new chief, Frequency Allocation & Treaty Div.; C. W. Loeber, who has been on loan to State Dept. as telecommunications attache in Geneva.

Members of joint stations-NBC committee to study the economics of radio network operations are: Jack Harris, KPRC & KPRC-TV, Houston; C. Robert Thompson, WBEN & WBEN-TV, Buffalo; Harold Essex, WSJS, Winston-Salem; Harry Bannister, WWJ & WWJ-TV, Detroit; George Whitney, KFI & KFI-TV, Los Angeles. Representing NBC are Charles R. Denny, executive v.p.; Carleton D. Smith, stations relations v.p.; Hugh M. Beville, plans & research director; Henry T. Sjogren, controller; Norman Cash, radio station relations director; David Adams, asst. to Denny.

1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020

Supplement No. 72-A
May 19, 1951

Addenda to

DIGESTS OF COMMENTS ON PROPOSED TV ALLOCATION PLAN

Hearing Scheduled before FCC Starting July 9, 1951; Docket No. 8736

Note: Digests of comments listed below are in addition to those published in Supplement No. 72, May 12, 1951.

Specific and General Comments

(For list of educational institutions, municipalities and civic organizations favoring plan in general terms, see other side.)

Balaban & Katz Corp., Chicago, Ill. (WBKB) — Favors FCC proposal to shift WBKB from Channel 4 to 2. (Hogan & Hartson).

Universal Broadcasting Co., Indianapolis, Ind. (WISH) -- Requests reclassification of Channel 13 to commercial use. (Segal, Smith & Hennessey).

Centre College of Kentucky, Danville, Ky. — Requests assignment of flexibility channels to Danville in lieu of 35 for education.

U. of Kentucky, Lexington, Ky. — Requests reclassification of Channel 27 or 31 to educational use or assignment of flexibility channel to Lexington for educational use.(Krieger & Jorgenson

U. of Missouri, Columbia, Mo. — Requests educational stations be permitted to commercialize up to 50% of broadcast day. (Fisher, Wayland, Duvall & Southmayd).

New Jersey Audio Visual Educational Assn., Jersey City, N. J. -- Request at least four non-commercial channels for education.

State Dept. of Education, Trenton, N.J. — Requests assignment of flexibility channels to non-commercial use in communities where there are no educational channels reserved. Alternatively requests reclassification for educational use of Channels 37 in Paterson, 44 in Trenton, 46 in Atlantic City, 47 in New Brunswick.

Protestant Radio Commission, New York, N.Y. — Requests that uhf flexibility channels be made available to educational institutions. (Frank S. Ketcham).

Bob Jones U., Greenville, S. C. (WMUU) -- Urges permission to operate educational stations on non-profit basis. (Frank Stollenwerck).

Red River Valley Publishing Co., Sherman, Tex. — Requests assignment of Channels 10 & 17 to Sherman-Denison affecting Forth Worth, Denton, Weatherford, Waxahachie & Hillsboro, Tex.

Utah State Agricultural College, Logan, Utah — Requests assignment of uhf flexibility channe to Logan. (Louis S. Madsen, president).

The Journal Co., Milwaukee, Wis. (WTMJ & WTMJ-TV) -- Favors FCC proposal to shift WTMJ-TV fro Channel 3 to 4. (Hogan & Hartson).

Mobilization Notes, *page 13.*

LULL BEFORE THE ALLOCATIONS STORM: TV allocations situation merely simmered this week, as everyone busily prepared oppositions to comments (Supp. 72 & 72-A), awaited FCC action on petitions questioning legality of freeze-ending procedures.

Commission opinion on "legality" question should be forthcoming soon. So far, there's no indication FCC intends to depart from present plan -- namely, fixing channel allocations in rules, these to be changed only by formal rule-making proceedings (Vol. 7:20) -- method strongly opposed by some applicants.

Question of "partial" freeze-lifting also should be answered soon. Chances for uhf station grants appear remote. Possibilities of vhf power increases, vhf grants in Territories -- in near future -- are greater. Commission action on these doesn't necessarily await filing of oppositions to comments, due June 11.

City-by-city hearing, starting July 9, shapes up as drawnout affair. Many educators, as well as commercial station operators and aspirants, will be on hand, have notified FCC of intentions to appear as witnesses. En banc hearing certainly will run for months. With Harry Plotkin out of Broadcast Bureau (see p. 5), Commission counsel during hearing may be new chief of Rules & Standards Div., Paul Dobin.

Hearing on Sen. Benton's resolution (S. Res. 127), providing Congressional study of educational and commercial TV (Vol. 7:15,19,20), will be held May 31 by Senate Interstate & Foreign Commerce Committee. Sen. Benton will be only witness.

MEANING OF ABC-PARAMOUNT MERGER: From just about every angle, ABC-Paramount merger deal looks good for the people most concerned -- and, even more important, good for the radio-listening and TV-viewing public.

There's many a legal and political slip, but an appraisal of main factors involved would seem to indicate approval won't face very tough sledding in Washington in light of facts and circumstances. This is how we size up what deal means --

(1) TO THE TV AND RADIO AUDIENCE: New operational management promises stronger competition by reason of greater financial resources and possible new talent and program reservoirs.

It must be borne in mind, though, that United Paramount is a theatre-operating concern. It owns some 600 houses, but doesn't produce pictures. It's outgrowth of split of big Paramount producing-exhibiting combine forced by anti-trust consent decree, and came into being at end of 1949. Thus, merger doesn't necessarily mean more and newer movies for TV from Hollywood -- though these are sure to come as soon as there are enough TV stations.

* * * *

(2) TO ABC STAFF, AFFILIATES AND SPONSORS: This week's deal brings end to long period of rumors, uncertainties and suspense (Vol. 7:18-20), given credence by obviously declining fortunes of ABC and not much mitigated by equivocal statements of principals involved in frequently reported deals.

"Both the AM and the TV networks will be preserved," asserts United Paramount secretary-treasurer Robert W. O'Brien, who will become executive v.p. of the

Copyright 1951 by Radio News Bureau

MAY 28 1951

Radio-TV Division of the new American Broadcasting-Paramount Theatres Inc. ABC's president Robert Kintner will be president of the division.

Real operational boss will be Mr. O'Brien, a former member of Securities & Exchange Commission. New program topkick will be Robert M. Weitman, with title of v.p.; he's also a UPT director, who as manager of New York Paramount Theatre is credited with developing such stars as Frank Sinatra, Danny Kaye, Red Skelton, Tony Martin, Perry Como, and starting off such famous bands as Glenn Miller, Tommy Dorsey, Eddie Duchin, Woody Herman, Stan Kenton.

Affiliate and sponsor relationships, badly shaken, will be first "repair" job to be undertaken by new management. Station relations, particularly, have been deteriorating in recent years -- so much so that one basic affiliate, doubtless reflecting general attitude, remarked on hearing news of the merger:

"Any change will be for the better, since things can't get any worse."

* * * *

(3) TO ABC STOCKHOLDERS: Deal involves outright exchange of stock, no cash, plus sale of UPT's Chicago station WBKB, on Channel 4, to CBS for $6,000,000. In effect, ABC's 1,689,017 shares of outstanding stock (about 57% owned or controlled by chairman Edward J. Noble) is costing Paramount something less than $25,000,000 in stock -- paid for at rate of one ABC share for $7.50 in common stock of new company measured at $19 per share plus $7.20 in preferred stock measured at par (preferred dividend rate 5%).

Thus ABC stockholders get equivalent of $14.70 per share. United Paramount in 1950 earned profit of $12,141,667 ($2,144,384 in capital gains) on gross of $106,731,403, paid $2 dividend, and has paid 50¢ first quarter dividend already this year. It has upwards of $30,000,000 cash resources for investments, may as result of this deal buy fewer than limit of 650 theatres permitted under consent decree.

ABC purchase includes about $3,500,000 surplus account, but also means taking over about $5,500,000 indebtedness. ABC's earnings record has been poor in recent years (Vol. 7:13,20), and it has never paid a dividend.

* * * *

(4) TO THE TV-RADIO INDUSTRY AT LARGE: New blood, keener inter-network and inter-station competition, closer liaison between broadcast media and theatrical interests -- these can only be welcomed by all objective observers. Sometimes bitter competition between well-positioned NBC and shrewd CBS has far outstripped ABC since it was sold by NBC in 1943, under FCC "duopoly" pressure, for $8,000,000.

Paramount purchase is recognition by movie industry (as by the newspapers, somewhat belatedly, vis-a-vis radio) of necessity of "keeping pace with the times." Each has much to offer other, particularly in showmanship and commercial and technical know-how. TV is manifestly the favored child of the new parents -- but we have absolute assurance from Mr. O'Brien that there's no intention of selling AM network and/or the 5 AM stations ABC owns in same cities as TV outlets.

It can be assumed new faces will be brought into ABC operations, besides Messrs. O'Brien and Weitman -- including very likely WBKB manager John H. Mitchell, whose Chicago operation is reputedly one of the most successful in TV.

In selling WBKB, new ABC owners keep Chicago's WENR-TV on Channel 7. This is same channel occupied by ABC's 4 other TV outlets -- in New York, Detroit, Los Angeles, San Francisco -- result of successful early tests and recommendations by able chief engineer Frank Marx. WENR-TV call letters will be changed to WBKB, and old WBKB doubtless will become WBBM-TV, companion to CBS's AM station WBBM.

* * * *

(5) TO THE MOVIE INDUSTRY: Decision of big United Paramount to "join 'em if you can't lick 'em" will inevitably impel others to do same, particularly local exhibitors who may now become just as eager-beaver applicants for new post-freeze TV outlets as are the large and small radio broadcasting interests already. Combination of local radio-movie forces for costly ventures into TV may become commonplace.

Of the 107 existing TV stations, only 2 besides WBKB are owned by theatre interests: WTVJ, Miami (Wometco chain) and WKTV, Utica (Kallett). Paramount Pictures

owns KTLA, Los Angeles, retained in consent-decree splitup, would like to have more but has been stymied by FCC procedures growing out of its ownership of DuMont stock.

There's no secret, also, that FCC influences tend to oppose producer ownership of TV stations, though Chairman Coy was quick to disclaim any antagonism to exhibitor ownership after recent criticisms of "anti-trust" opinion (Vol. 7:13-15).

In connection with ABC deal, in view of new parent company's acquisition of limit of 5 TV stations, 4 old local Paramount applications still on file will have to be dropped, namely, those of United Detroit Theatres Corp., New England Theatres Inc. of Boston, Tri-States chain in Des Moines, Gulf Theatres Inc. of Tampa (see TV Factbook No. 12). United Paramount is also half-owner, with big local dept. store Maison Blanche, of AM station WSMB, New Orleans, long an NBC affiliate.

* * * *

On top of the foregoing considerations, there's inescapable fact that willingness of CBS to pay whopping $6,000,000 price for the Chicago outlet it so badly needs will have effect of skyrocketing values not only of existing stations but of those yet to be granted after the 3-year-old freeze is lifted.

Competition for post-freeze stations will become keener than ever -- it's a blue chip game now and those who once stayed out are now ruing their judgment.

FCC will probably require hearing on deal of such magnitude, biggest in all radio history. First, Paramount and ABC must take appropriate legal action -- board approvals, stockholder approvals -- and the complex legal and financial details must be arranged. This should take until July, by end of which formal applications should be ready to file with FCC. In view of importance, full FCC may hold hearing, rather than examiner, thus expediting decision by September or October.

Most likely objection would be against "bigness" -- but it's obvious that one of weaknesses of ABC, running poor third in both AM and TV, has been lack of risk capital -- and it takes big money to run TV and radio networks.

Somebody may object, too, that United Paramount will now lose interest in theatre TV, in which it has played leading role thus far -- with 5 of its theatres already equipped, 22 more installations on order. But UPT spokesman says there is no intention of abandoning theatre TV; quite the contrary, plans will go forward.

* * * *

Dominant personalities in deal, aside from ABC's Mr. Noble and director Robert Hinckley, who did the Washington spake-work (mainly contacts with FCC Chairman Coy), are United Paramount's 45-year-old president Leonard Goldenson and Mr. O'Brien. Both are lawyers. Mr. Goldenson's father owned theatres in Pennsylvania. He's a 1930 law graduate of Harvard, has been with Paramount since 1933, working his way up through the ranks. He has always taken "liberal" attitude toward TV competition, not denying it's effects but always planning to work into it somehow.

"Bob" O'Brien is described glowingly by former Washington colleagues as a brilliant, personable chap with fine record of administrative achievement. He's 46, a Montanan who rose from SEC ranks to commissionership, resigned in 1944 to join old Paramount combine as aide to president, played leading legal role in reorganization.

As a football star at Beloit College, he won this accolade from Knute Rockne after a game that didn't prove to be a setup for the Irish: "Best quarterback in the country." He was graduated from U of Chicago law school in 1933, having betimes worked as a miner in Butte, in a gold mill, on a newspaper, on a ranch, at teaching.

* * * *

In new corporate setup, 5 ABC directors go on new American Broadcasting-Paramount Theatres board of 18: Mr. Noble, holder of 901,667 shares of ABC stock, who becomes chairman of finance committee; Mr. Kintner, 7000 shares; Mr. Hinckley, no shares; v.p. Earl E. Anderson, 8500 shares; Owen D. Young, who holds title of honorary chairman, 5000 shares. Present ABC directors left out are: Mark Woods, 6500 shares, now vice chairman; C. Nicholas Priaulx, 1000 shares, v.p. & treasurer; Alger B. Chapman, attorney; Wm. Zeckendorf, realtor. Wood and Priaulx presumably will be retained in management.

United Paramount's 13 directors include Messrs. Goldenson, O'Brien and

Weitman plus: John A. Coleman, of Adler Coleman & Co., brokers; E. Chester Gersten, president, Public National Bank & Trust Co. of New York; Wm. T. Kilborn, president, Flannery Mfg. Co., Pittsburgh (railroad & automotive parts); Walter P. Marshall, president, Western Union; Robert B. Wilby, president, North Carolina Theatres Inc. and Alabama Theatres Inc., subsidiaries; John Balaban, president, Balaban & Katz, subsidiary; A.H. Blank, president, Tri-States Theatre Corp., subsidiary; Herbert Schwartz, president, City Stores Inc.; Charles T. Fisher Jr., president, National Bank of Detroit; Herbert L. Huffines Jr., president, Burlington Mills Corp.

ARE COMMUNITY ANTENNAS A 'SLEEPER'? Future of community antennas (Vol. 7:2,7,11) is provoking a lot of hot speculation -- both bullish and bearish -- but there's no denying fact such installations are today bringing TV to communities which would otherwise get little or no service.

This week, we traveled to Pottsville, Pa., 75 miles northwest of Philadelphia, took a close look at system installed by local Trans-Video Corp. and RCA Service Co. Trans-Video has sunk $100,000 into it, plans more, doesn't at all feel it's out on limb on this basic question:

When freeze is over, new stations built, will customers drop service in favor of "free" TV?

* * * *

Here's the Pottsville setup: Trans-Video is local group headed by Martin F. Malarkey Jr., whose family owns music-appliance store, sells RCA and Stromberg-Carlson sets. It has 11 employes who have installed equipment purchased from RCA. Latter supervised installation, will service system, equipment being adaptation of RCA's apartment-hotel distribution system called Antenaplex.

Some 300 homes have been equipped, more being tied in daily. Enough cable has been strung to supply 1500 homes. Population is 24,500 (6700 families) and present target is 2000 installations. Ultimate plan is to make service available to every home within city itself.

Company estimates additional $100,000 will cover whole city. Subscribers pay $135 for installation, $3.75 monthly. Rates were established almost arbitrarily, says Malarkey, but "we hit it right on the nose."

* * * *

Technically, system is simple. Fortunately, 1390-ft. Sharp Mt. is very close by. Signals from 100-ft. antenna are currently piped 2-3 miles, but can be boosted along another 2-3, maybe more. Amplifiers every 2000-2500 ft. kick signals along RG/11U main cable, signals going into homes via RG/59U. Wire is strung along electric and phone poles which are rented for $1.50-per-year-per-pole. Some 1500 poles will supply 3000 homes.

Channel 6 signals from Philadelphia are converted to Channel 5, Channel 3 to 2 -- to reduce line-loss, minimize oscillator radiation problems. Channel 10 service, now being installed, will be converted to Channel 4. When uhf signals become available, they'll be converted to vhf, eliminating need for set converters.

Signal strength of Channels 6 and 3, at Sharp Mt., is about 1000-1500 uv/m; Channel 10 is about 400-500 uv/m.

Quality of picture is good -- comparable with average TV city pictures. In contrast, direct signals we saw in Necho Allen Hotel and a private home were poor, Channel 10 completely useless. Average city viewer, spoiled by decent reception, wouldn't watch them a minute. But Pottsville folk, like others in fringe areas, gaze at them for hours. These private signals are captured by considerable arrays, boosters, rotators, etc. -- costing up to $500, averaging $200.

* * * *

Future of service doesn't seem to worry young Malarkey, who really bubbles with enthusiasm and energy. Here's how he figures it:

Philadelphia isn't likely ever to throw really good signals into Pottsville. Town itself probably can't support TV station, though it has 2 AMs. In any event, he can't visualize support for more than one, which must be uhf. Nearest larger

town is Reading, 25-odd miles away, which may be able to handle 1 or 2 stations, also ticketed to be uhf-only.

This competition, Malarkey predicts, won't wean many away from trouble-free "piped" service. What's more, he says, expansion of service will permit reduction of rates, down to "nominal" sum of $1.75 or less monthly.

"We're not out to make a million bucks," declares Malarkey. How about State or Federal regulation, setting rates, quality of service, etc.? "Fine," he says; actually, he appears to welcome regulation, feeling it will guarantee a profit, protect company from unreasonable demands for service.

System creates market for sets, naturally, but Malarkey says his store has made only about 25% of sales, other dealers in town quite happy with situation.

* * * *

Where do systems go from here? RCA is proceeding very conservatively, leaving it up to local distributors and entrepreneurs to take initiative, balancing "quick" service against threat of future "free" service from stations.

Many other ideas have been sparked by success of community antennas. For example, local AM station operator may consider TV station uneconomic, ask to feed community system with camera chain -- a super closed-circuit. Theatres are greatly interested, may seek special-event exclusives for their houses. Subscription service, a la Phonevision or Subscriber-Vision, may find an angle.

In big cities, single neighborhood antenna may provide everyone with best possible signal, eliminate forest of antennas.

* * * *

Of other companies in the field, Jerrold Electronics is most active. It reports that Maine's former governor Sumner Sewell heads $500,000 company with 20 towns lined up; that Western TV Inc., Ogden, Utah (Dean Buchanan, president) is capitalized at $250,000, intends to feed number of towns; that Perfect TV Inc., Harrisburg, Pa., plans 10,000-home hookup there; that following towns have systems under construction or about to begin: Tamaqua, Lock Haven, Harmarville and Coalsdale, Pa.; Corning (WCLI), Watertown and Dansville, N.Y.; Kingsport and Johnson City, Tenn.; Carmel and Monterey, Cal.

News of other towns, planning or building, keeps popping up: Portland, N.Y.; Frankfort, Ky.; Bethlehem, Pa.; Claremont, N.H.; Bath, Me.

Jerrold's first installation, Panther Valley TV Co.'s in Lansford, Pa. (Vol. 7:2) has run into competition, new outfit from Philadelphia reported to have moved in. Other companies reported entering community field are Industrial Television Inc., Television Equipment Co., probably more.

Outlook for materials, cable primarily, doesn't seem too bad. Systems don't come under NPA's Controlled Materials Plan, will have to scramble for what they need. But companies concerned say they're optimistic, feel they'll make out.

COY REAPPOINTED, TOP STAFF NAMED: Continued tenure for FCC chairman Wayne Coy, halt to speculation about new jobs awaiting him, seems assured in view of reappointment this week. President sent name to Senate, and key Senators have declared themselves for him -- though he may face some sharp questions during hearing before Interstate & Foreign Commerce Committee set for May 29. But he's virtually in.

"I'm all for his reappointment," said committee's powerful chairman, Sen. Johnson (D-Colo.), echoed by committee's ranking Democrat Sen. McFarland (D-Ariz.) who is also Senate majority leader and by Sen. Tobey (R-N.H.), ranking Republican.

Term is 7 years from June 30, but it's anybody's guess how long he will stay, what with presidential election next year, physical strain of job, etc. Main reasons for his desire to stay on right now, undoubtedly, are color and freeze-end.

He's hell-bent to put across CBS color system, to justify FCC decision. If Supreme Court upholds FCC, chances are he'll be able to muster majority behind quick order to require field-sequential colorcasts. And there's little question he'd like to see TV allocations finalized substantially as FCC proposes (Vol. 7:12).

Highest court's color decision could come May 28, June 4, even June 11, and

it's now virtually certain Court won't adjourn for summer before June 4 at earliest.

Coy suffered blow when colleagues, 5-2, turned thumbs down on his right-hand man Harry Plotkin for chief of new Broadcast Bureau and instead chose chief engineer Curtis Plummer. But longer Coy stays, better are chances that the controversial Mr. Plotkin's star will rise again. He now becomes asst. general counsel in office of general counsel Benedict Cottone, says he didn't want any Broadcast Bureau job.

Key division chiefs in Bureau were announced this week: Joseph Kittner, ex-asst. to Cottone, asst. chief; Cyril Braum, ex-TV engineering chief, head of TV Facilities Div.; James Barr, ex-AM-FM engineering chief, Aural Facilities (AM-FM); Paul Dobin, ex-asst. to Comr. Jones, Rules & Standards; Dwight Doty, ex-AM legal chief, Renewals & Transfers; Fred Ford, ex-trial atty., Hearings. Jobs pay $10,000.

New chief engineer to replace Plummer hasn't been named, but it looks like C.W. (Walt) Loeber is the man. He's old-time FCC engineer, ex-chief of Common Carrier Div. radio branch, who recently was State Dept. telecommunications attache for Europe, stationed in Geneva. Still a possibility, however, is choice of Edward Allen, now chief of Technical Information Division.

MORE LATIN American TV stations ordered and going up: Buenos Aires' and Argentina's first will be Channel 7 outlet, equipment ordered by Yankelevitch broadcasting interests from International Standard Electric (IT&T), with Federal Radio providing transmitter, Capehart-Farnsworth delivering initial quota of more than 10,000 receivers. International Standard Electric also is supplying Channel 5 job for Radio Televisao Paulista, Sao Paulo, Brazil, second in city, with Federal transmitter, DuMont mobile unit, cameras, studio equipment.

Matamoros, Mexico, just across Rio Grande from Brownsville, Tex., will get TV station this year if plans of Compania Mexicana de Television go through; sparked by W. B. Miller, ex-KEYL, San Antonio, company has CP for Channel 7, has ordered DuMont equipment. And when Emilio Azcarraga's new Televicentro in Mexico City is ready for Sept. 18 inauguration (Vol. 7:16), XEW-TV on Channel 2 will go into fulltime operation (now carrying baseball only twice weekly); later he plans to operate XEQ-TV on Channel 9 as basic sports outlet, DuMont transmitter already delivered.

Havana report states Union Radio (Gaspar Pumarejo), whose CMUR-TV was first to be established there, has bond issue out for $2,000,000 expansion embracing microwave-linked network of 6 more outlets in Pinar del Rio, La Habana, Matanzas, Las Villas, Camaguey, Oriente. Equipment order hasn't been announced yet. Goar Mestre's CMQ-TV is expected to announce similar expansion designed to cover island. Caribbean Television Co., Storer-financed, is reported to have abandoned plans for new station on Channel 7 in Havana (Vol. 7:9, 17).

Spain's Radiodiffusion Nacional has purchased complete TV installation from Philips of Eindhoven, to operate on 625 lines, 50 fields.

———■———

"Except for certain exceptional programs, the public does not like TV." Statement is by 20th Century-Fox executive Darryl F. Zanuck in double-page ad in May 21 *Daily Variety*, of Hollywood, devoted mainly to subject of executive salary cuts by Skouras company. Zanuck goes on: "Up until now it [TV] has proven a poor substitute for motion pictures. Nevertheless, thousands upon thousands of American families have purchased their sets on the installment plan and while most of them have been disillusioned by the quality of the entertainment they have seen on TV screen, they are, nevertheless, committed to pay for the sets and they economize by elimination of certain other luxuries. We, unfortunately, bear the brunt of this onslaught."

REQUEST to set up Phonevision as regular, commercial TV service is due to go to FCC within few weeks, or as soon as U of Chicago National Opinion Research Council completes analysis of recently completed 90-day Zenith test with 300 Chicago families (Vol. 7:14). Also due in next few weeks is request from Skiatron Corp. for public test in New York for its coded-card "Subscriber-Vision" system of fee-TV (Vol. 7:11-12). Zenith's E. F. McDonald this week released preliminary analysis of Phonevision tests, showing:

(1) "Take" for 90 days was $6750, or $22.50 per family, or $1.73 per family per week. (2) Average "attendance" first month was 2.1 movies per week per family, second month 1.5, third month 1.6. This is 3½ times greater than 0.47 times per week average family goes to movies, McDonald estimated. (3) Audience of individual pictures ranged from low of 8% to high of 60% *(Welcome Stranger)* of 300 test families. (4) Average of 4 out of 5 test families said they had not previously seen pictures in theatres, 9 out of 10 said they'd rather see movies in home.

Projecting estimates to 10,000,000 Phonevision-equipped TV sets, Comdr. McDonald came up with these potential earnings: Average net return per picture based on average attendance during test period, $1,250,000. For 10 most popular pictures, this would be $2,983,000; for 10 least popular, $600,000.

———■———

Hopes of moviemen for substantial income from post-theatre-run feature films rented to TV were dashed considerably by producer Robert L. Lippert, who recently signed 5% royalty deal with AFM for use of his old films on TV (Vol. 7:17). There aren't enough TV stations using old features to make market exciting, Lippert declared on recent return to Hollywood from swing around country. He said he found only 16 out of present 107 stations using old feature films to any marked degree; remainder are all tied up with live shows, network feeds, kines.

Production charges for one-minute TV commercial begin with basic charges of $500 per day—and that doesn't include performers' fees or studio's overhead and profit. According to survey by Chicago advertising agency Henri, Hurst & McDonald, here's how that figure breaks down: production crew, $250; sets, $100; film director, $50; film stock, $50; editing, $50. In brief discussion, agency makes point that advertisers are willing to "spend $500 for single good photograph without a qualm. Why expect to spend less for 1440 photographs, the number required for just a single minute film?"

Network TV-Radio Billings

April 1951 and January-April 1951

NETWORK TV time billings in April, totaling $9,089,454 (not including non-reporting DuMont), went up only a few thousand dollars from the $9,085,403 in March (Vol. 7:17)—NBC accounting for enough increase to offset dips by ABC and CBS. Most significant, NBC's network TV time billings of $4,758,309 are now within about $140,000 of its AM network time billings. April TV figures for the 3 reporting networks are more than 3½ times those of April 1950, brought cumulative for first 4 months of this year to $34,198,545 vs. $8,193,058 for same 1950 period.

On the AM side, all but MBS dropped somewhat below March (Vol. 7:17), aggregate network radio billings for April being $15,921,908 vs. $16,440,387 in March and $15,908,806 in April 1950. Cumulative for January-April period was $64,054,755, down more than $1,000,000 from the $65,217,563 for same 1950 period. The PIB figures:

NETWORK TELEVISION

	April 1951	April 1950	Jan.-Apr. 1951	Jan.-Apr. 1950
NBC	$ 4,758,309	$ 1,147,698	$17,548,954	$ 4,343,280
CBS	2,913,956	873,343	11,109,362	2,696,799
ABC	1,417,189	372,022	5,540,229	1,152,979
Total	$ 9,089,454	$ 2,393,063	$34,198,545	$ 8,193,058

NETWORK RADIO

CBS	$ 6,509,147	$ 6,054,738	$26,297,709	$23,904,827
NBC	4,897,882	5,284,013	19,931,091	22,069,954
ABC	2,975,078	3,123,603	11,668,556	13,310,356
MBS	1,539,801	1,441,452	6,157,399	5,932,426
Total	$15,921,908	$15,908,806	$64,054,755	$65,217,563

Personal Notes: Edward S. Friendly Jr. named ABC-TV Eastern sales mgr., succeeding Slocum Chapin, promoted to TV stations v.p. . . . Charles T. Ayres appointed ABC radio sales v.p. . . . Harvey J. Richardson, ex-NBC and Standard Radio, named sales mgr. of new studio and recording services div., Capitol Records, Inc., Hollywood, set up for custom recording of AM, TV and other commercials . . . Howard G. Barnes, TV-radio v.p. of Dorland Inc., resigns to set up own film production service, 40 E. 49th St., N. Y. . . . Robert Foreman, BBDO v.p. in charge of TV radio copy, placed in charge of TV dept. . . . Nathan P. Colwell, ex-Treasury savings bond drive TV-radio chief, named TV-radio-film director, Office of Price Stabilization . . . William Binzen Jr., ex-Foote, Cone & Belding, named TV art director, Hewitt, Ogilvy, Benson & Mather . . . Howard Anderson named film director, WFAA-TV, Dallas. . . . Robert F. Jamieson, ex-DuMont, appointed mgr. of CBS-TV network sales service, Thomas P. Maguire handling radio—CBS sales service dept. having been split into 2 divisions . . . Guy Cunningham, ex-WEEI, Boston, named CBS sales presentation director . . . Dr. Roy K. Marshall, who conducted *The Nature of Things* on NBC-TV, has resigned from U of North Carolina faculty to become education director of WFIL & WFIL-TV, Philadelphia, succeeding Dr. Armand Hunter, who goes to Michigan State U . . . Richard W. Hubbell has closed down Hubbell Television Inc., is now transcription service director for Voice of America, also heading section to explore possibilities of TV in international field.

Importance of women in sales and how to use TV to capture their attention, is subject of *Sure-Fire Sales Formula: Women Selling Women—Through TV*, brochure put out by Edward Petry & Co., station reps. Presentation lists 46 national advertisers using local women's TV, logs 3507 minutes of homemaking shows on New York's 7 stations week of Jan. 4, 1951.

Station Accounts: Total of 5093 TV advertisers, of whom 233 were network and 1103 spot, remainder local-retail, are reported for March in April edition of *Rorabaugh Report*—increase of 7.4% over February, 79.2% over March 1950. *Rorabaugh Report* lists all the network and spot advertisers, as reported by 99 of the 107 existing stations . . . American Vitamin Associates Inc. (Thyavals & Orvita), big buyer of baseball time in Chicago (Vol. 7:13), purchases 19 hours weekly on WLWT, Cincinnati, biggest TV package sale yet in area, thru Counsellor Adv. Agency, Los Angeles . . . Fort Pitt Brewing Co. sponsoring 7 Sat. Cleveland Indians games and Chevrolet, RCA, GE dealers dividing 9 Sun. games, piped to WJAC-TV, Johnstown . . . GE and local dealers sponsoring first telecasts of Salt Lake City Bees on KDYL-TV, thru Gillham Agency . . . Fred W. Amend Co. (Chuckles candy), sponsoring *Buster Crabbe Show* on WOR-TV, New York, Mon.-Wed.-Fri. 5-5:30, thru Henri, Hurst & McDonald, Chicago; Schneider Beverages sponsoring on Thu.; Chuckles sponsoring special 2-hour rodeo from Tarzan-movie star's Jersey ranch on WOR-TV May 30 . . . Toni Co. to use TV in new drive to promote its White Rain soapless shampoo . . . Detroit Edison Co. sponsoring *The Detroit Story* for 10 Sundays, 3:30-4, on WWJ-TV, each episode depicting 25-year period in city's history . . . Douglas Aircraft Co. buying 13 Sun. 11:30 a.m.-12:30 p.m. periods on KECA-TV, Los Angeles, for institutional programs stressing employment opportunities, thru Charles Stahl, Los Angeles . . . Fox Wisconsin Theatres buys weekly 5-min. newscast on WTMJ-TV, Milwaukee . . . Among other advertisers reported using or preparing to use TV: Pleasant Valley Wine Co. (Great Western champagne & wines), thru Charles L. Rumrill & Co. Inc., Rochester; Green Spot Inc. (orange beverage), thru Beaumont & Hohman, Los Angeles; Sweets Co. of America (Tootsie Rolls), thru Moselle & Eisen, N. Y.; E. J. Brach & Sons (candy), thru Arthur Meyerhoff & Co., Chicago (formerly handled by J. Walter Thompson Co.); Ethyl Corp. (anti-knock fluid), thru BBDO, N. Y. (WTMJ-TV); Club Aluminum Products Co. (aluminum & glass cookware), thru Leo Burnett Co., Chicago (WTMJ-TV); Berkline Corp. (Berk-Lock chairs), thru Hammer Co., Hartford; Page-Barker Distributors (British hair lotion), thru Howard J. Ryan & Son, Seattle.

Network Accounts: Ronson Art Metal Works Inc. (Ronson lighters), starting July 29, sponsors *Star of the Family* on CBS-TV, Sun. 6:30-7, thru Grey Adv., N. Y., taking time vacated by Nestle's *Mr. I. Magination*, which moves to Sat. morning sustaining; Peter Lind Hayes and Mary Healy take place of Morton Downey . . . Ralston Purina Co. (cereal) starting June 9, sponsors *Space Patrol* on film on 33 ABC-TV stations (27 interconnected, 6 spotted), Sat. 6-6:30, thru Gardner Adv., St. Louis; Ralston also sponsors *Your Pet Parade* on ABC-TV, Sun. 4:30-5 . . . Lehn & Fink (Lysol, Hinds) reported buying whole *Doodles Weaver Show*, which starts June 9 on NBC-TV, Sat. 10-10:30; last week Lehn & Fink bought 10-10:15 portion thru Lennen & Mitchell and McCann-Erickson, both N. Y. . . . Schlitz moving *Pulitzer Prize Playhouse* from ABC-TV Fri. 9-10 to same Fri. time on CBS-TV on weekly basis if Ford drops *Ford Theatre* at end of current run next month . . . Seiberling Rubber Co. (tires) reportedly will sponsor *The Amazing Mr. Malone* on ABC-TV, Mon. 8-8:30, thru Meldrum & Fewsmith Inc., Cleveland; no starting date set . . . Esso Standard Oil Co. replacing *Alan Young Show* on CBS-TV Thu. 9-9:30 during July and August with news series . . . Bymart Inc. (Tintair) moving *Sam Levenson Show* on CBS-TV from Sat. 7-7:30 to Tue. 9-9:30 starting in fall . . . Eversharp Inc. (writing & shaving instruments), starting May 5, bought 8:15-8:30 portion of *Jack Carter Show* on NBC-TV, Sat. 8-9, thru Biow.

Financial & Trade Notes: General Instrument Corp. sales for fiscal year ended Feb. 28, 1951 were highest in its history, totaling $25,850,231 compared with $13,634,582 the preceding year. Net income before taxes was $2,639,-099, after taxes $1,229,099 ($2.52 per share), compared with net loss after tax credits for preceding year of $107,-184 (22¢). Net working capital was $4,578,923 at end of fiscal year, earned surplus $3,048,935, inventories $2,752,-765. Notice of June 11 stockholders meeting discloses chairman Abraham Blumenkrantz's salary as $54,000; Richard E. Laux, president-treas., $48,000; Monte Cohen, director and president of subsidiary F. W. Sickles Co., $36,000 plus $12,000 bonus. Of 608,573 shares of common stock outstanding, Mr. Blumenkrantz's holdings were 12,000 shares, Mr. Laux 1600, Mr. Cohen 718.

DuMont earnings statement for first 12 weeks of 1951 ended March 25 reflects general sales up, profits down pattern. Sales for period were $18,851,000, compared with $15,113,000 same 1950 period. Net profit after taxes totaled $1,022,000 (42¢ per common share on 2,361,054 outstanding), compared with $1,967,000 (92¢ on 2,101,597 outstanding) same 1950 period. Increased costs, wages and taxes brought net down, Dr. DuMont said. Special meeting of stockholders has been called for June 29 for election of officers and 5 directors—Dr. DuMont, Bruce T. DuMont, Leonard F. Cramer, Thomas T. Goldsmith Jr., David Van Alstyne Jr. Proxy statement discloses top officers' 1950 salaries and stockholdings as follows: Dr. DuMont, president, $51,500 salary plus $312,839 bonus (holds 56,500 Class A, 2000 Class B shares); Mr. Cramer, v.p., $35,438 & $8461 (no stock); Dr. Goldsmith, $21,130 & $5228 (1900 Class A plus 1200 owned beneficially with Mrs. Goldsmith).

Hallicrafters reports profit of $1,781,000 before Federal taxes for 6 months ended Feb. 28, compared with $682,809 for same 1950 period and $1,877,905 for fiscal year ended Aug. 31, 1950. Net profit after taxes for 6-month period amounted to $677,000, equal to 81¢ per share on 825,000 shares outstanding vs. $423,342, or 63¢ on 675,000 shares year before. Net sales for the 6 months were $23,778,000, compared with $10,982,000 for same period year ago. Backlog of military orders, president W. J. Halligan reported to stockholders, "is now approximately equivalent to our total sales for the fiscal year ended Aug. 31, 1950, which were $28,513,000. We expect that about 70% of this will be completed during the balance of this calendar year."

* * * *

Television-Electronics Fund Inc. reports net assets at new quarterly high of $12.97 per share, total net assets of $6,480,209, as of April 30, up from $12.74 ($6,125,746) 3 months earlier (Vol. 7:13). Accent now is on companies concerned primarily with other aspects of electronics than TV, said president Chester D. Tripp, in report detailing portfolio of holdings (available on request from company's office, 135 S. LaSalle, Chicago).

Erie Resistor Corp. has registered with SEC for public sale 84,000 shares of its $5 par common stock, of which proceeds from 19,593 shares will be used for working capital. Remaining 64,407 shares come from listed stockholders, including holdings of G. H. Fryling, one of firm's founders and father of president G. R. Fryling and v.p. W. H. Fryling.

Webster-Chicago's first quarter profits were $234,907, or 52¢ a share, on sales of $5,406,200 vs. $306,177 (68¢) on $3,708,808 same period last year.

Arvin Industries Inc. reports net income for first quarter of $823,866, or 92¢ a share, against $718,496 (80¢) same 1950 quarter.

Philco stockholders meeting last week, in addition to hearing report on record first quarter sales and earnings (Vol. 7:19), was told by president Wm. Balderston that defense orders are now running at annual rate of $25-30,-000,000 and should reach $60,000,000 by year-end; that if govt. options on contracts are exercised by 1952 defense production could mount to $100-150,000,000 on annual basis; that backlog of govt. orders is now $100,000,000. There has been some cessation of buying of hard goods by dealers who had previously been over-buying, he said, but "our dealers are in much better shape than competitors" and "our inventory position from a competitive standpoint is good." All plant expansions, he said, fit into company's long-range civilian program. He also thought that 1951 will be "a pretty satisfactory year from the standpoint of our stockholders."

IT&T subsidiaries, notably Capehart-Farnsworth and Federal, have backlog of $160,000,000 in orders, of which 85% are defense orders, Col. Sosthenes Behn told this week's stockholders meeting in Baltimore. He reported TV installation sold to Argentina, also 11,038 Capehart TV sets shipped to Cuba and Mexico, in citing growth of TV in Latin America. IT&T earnings were estimated at $4,000,000 for first quarter 1951, or nearly double amount for same 1950 period.

* * * *

Westinghouse first quarter sales reached new high of $290,407,895 vs. $223,933,898 first quarter 1950, leading president Gwilym Price to tell stockholders meeting April 18 that company is aiming for higher than the $1,019,-923,051 billings achieved for all 1950. On other hand, *Wall Street Journal* said May 14 that "Westinghouse is not expected by brokers to be able to duplicate its 1950 net of $5.36 a share this year." Net income for quarter was $16,692,898, equal to $1.05 a share on 15,376,674 shares outstanding March 1. In same quarter 1950, net income was $11,890,377, or 87¢ a share on 13,144,519. Federal taxes for quarter were $26,668,550 vs. $7,860,533 same 1950 quarter. Mr. Price pointed out that higher Federal income taxes and the excess profits tax mean Westinghouse can now use only about 38¢ per dollar of profit to carry on business and pay dividends. First quarter results, however, indicate increased volume may enable company to approach 1950 earnings, he said. About 25% of company's business, 30% of backlog, consists of defense orders.

Reeves-Ely Laboratories reports net income of $761,-133, or $1.02 per common share, on sales of $14,402,454 in 1950, as against net income of $731,419 (95¢) on $10,078,-439 in 1949.

Globe-Union Inc. reports net profit of $535,719, or 80¢ per share on 670,000 common shares, on sales of 11,806,034 first quarter 1951. This compares with $630,000 (86¢) on $7,200,389 for same 1950 period.

American Phenolic Corp. first quarter sales were $4,-947,785, profit $208,532, compared with $2,765,366 sales and $224,906 profit same period 1950. Federal taxes were $345,000 as against $155,000 same period last year.

* * * *

Dividends: Sylvania, 50¢ on common, $1 on $4 pfd., both payable July 7 to holders of record June 20; Philco, 40¢ payable June 12 to holders June 4, and quarterly 93¾¢ on pfd., payable July 1 to holders June 15; Bendix Aviation, 75¢ payable June 30 to holders June 9; Webster-Chicago, 25¢ payable June 18 to holders June 8; Sparks-Withington pfd., $1.50 payable June 15 to holders June 5; Wells-Gardner, 15¢ payable June 15 to holders June 4; Stewart-Warner, 35¢ payable July 7 to holders June 15; Stromberg-Carlson, 50¢ quarterly on pfd., payable July 1 to holders June 9.

Television Digest WITH AM-FM REPORTS
19 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
May 26, 1951

SOME BULLISH ESTIMATES OF THE FUTURE: Plenty of repair parts, good level of TV-radio production -- that's the encouraging forecast for mobilization period by 2 industry leaders with plenty of savvy about the Washington regulatory scene.

Essentiality of industry is now thoroughly recognized in Washington, RTMA chairman Robert Sprague (Sprague Electric Co.) and Parts Mobilization Committee chairman A.D. Plamondon (Indiana Steel Products Co.) emphasized in talks to parts distributors May 21 at Radio Parts & Electronics Equipment Show in Chicago's Stevens Hotel.

Priorities for replacement parts will be guaranteed by NPA under Controlled Materials Plan, both speakers agreed. Plamondon saw relatively high production of new sets during third quarter, but diminishing output toward end of year. Next year, he predicted, production should increase with expansion of material output.

* * * *

Electronics will be $4.5 billion industry, in combined military and civilian production, by end of 1952, Sprague said -- equivalent to about $3.25 billion in terms of civilian production. This would leave, after military production, an "ample capacity for the continuing production of a large number of radio and TV sets and commercial electronic equipment and...replacement parts."

Military electronic production should reach peak annual $2.5 billion rate in fall of 1952, then decline to $1.5 billion rate, Sprague estimates. "Actually," said the RTMA chairman, "it probably will not absorb more than half of the industry's facilities, even at its peak."

Sprague is bullish about prospects for sales as well as production of TV-radio during coming years. He predicts sale of 5-6,000,000 TVs in 1951, with the annual growth of industry continuing in near-future years "at somewhere near the spectacular rate which has recently occurred." By the end of this year, he foresees total of 95,000,000 radios, 16,000,000 TVs in hands of public.

There's no real slump in TV sales, Sprague said -- adding, rather candidly, that manufacturers have overloaded dealers out of all proportion to seasonal patterns. He said his "guess, based on statistics" is that "sales of TV at the dealer level are at about the same rate as this time last year."

* * * *

Parts distributors' sales have paralleled TV boom, he said, increasing about 15% in 1950 over 1949, then zooming 75% in first quarter 1951. He told distributors they can look forward to constantly increasing business volume, because:

(1) TV sets have many more parts than radio, about 4 times as many tubes -- which means 1950's spectacular TV production increased replacement market to equivalent of 132,000,000 radios, a 50% jump in potential demand for tubes, resistors, capacitors and other components in one year.

(2) Setting up of 1,500,000 new families a year, plus desire for second and third sets by established families, should give parts market healthy boost.

(3) New TV areas will open new opportunities in parts business. Taking an optimistic view of rapidity with which new stations will be authorized and built, Sprague said: "It is estimated that we will have a nation-wide system of TV broadcasting in the not too distant future, with eventually about 2000 stations."

* * * *

Conservation miracles of the past were hailed by both Sprague and Plamondon, but they saw far greater tasks ahead, and Sprague cited these figures:

Tungsten, which looms as most critical material, is now being doled to manufacturers at rate of 30% of amount used during first-half 1950 base period. But shortage hasn't been felt yet by tube industry, with plenty of the metal still in

pipelines. U.S. is producing tungsten at rate of 4,500,000 lbs. a year, using it at rate of 13,000,000, with foreign sources dried up for time being.

Nickel, used by tube industry at rate of 283,000 lbs. a month in 1950, is being handed out on scale of 200,000 lbs. in May, 180,000 lbs. in June.

Cobalt is allocated to TV-radio industry at rate of 30,000 lbs. monthly, compared to 125,000 lbs. a month during base period.

Individual appeals to NPA, Sprague said, have been responsible for much more electronic production than most people in the industry realize. He advised all manufacturers with genuine hardship cases to file appeals. NPA comes through, he said, wherever manufacturer has plenty of facts to back his case.

* * * *

Third May week's output (week ending May 18) was 93,681 TVs (7399 private brand), well up from second week's 82,224 and first week's 66,077 (Vol. 7:19-20). Factory inventories jumped again, however, totaling 562,138 as of May 18 vs. 505,842 preceding week. RTMA also issued revised April output figure, showing 469,157 TVs, bringing total for first 4 months of this year to 2,668,826 -- and indicating figure for first 5 months will be somewhat less than 3,000,000.

Radios jumped during week ending May 18, totaling 387,163 (214,110 private label), as compared with 330,228 and 298,149 the 2 preceding weeks. Factory inventories of radios were 281,432 units. April revised radio output figure was given as 1,337,042, making total for first 4 months 5,680,642. Breakdown of radio output week ending May 18: home radios 163,150; auto 182,923, portables 41,090.

Topics & Trends of TV Trade: Rash of auction sales, following example of Monarch Saphin's much publicized event in New York (Vol. 7:20), has manufacturers-wholesalers working hard to keep gimmick from spreading, on grounds that it's basically bad for business. They succeeded in getting 2 called off in Baltimore, but were unsuccessful in 3 other instances: In Brooklyn, Mayfair Outfitting Co., Queens County cooperative, May 24 started $2,500,000 sale amidst heckling from trade representatives. By second day business was so poor, company attorney Gerard L. Nierenberg admitted Mayfair was suffering "tremendous losses." In Boston, International Sales Co. put on $150,000 sale. In Akron, effort to auction $100,000 worth of TV sets reportedly flopped.

Other auctions scheduled are Philadelphia, June 4-7, by Richards Auction Co., claiming 4000 TV sets for sale; Keyport, N. J., May 30, by "Two Guys from Harrison," $500,000 worth of TV and appliances; Bronx, N. Y., May 28, by Lippin Appliance Co.

In New York, the Metropolitan Appliance Radio & TV Assn. filed formal complaint with license commissioner that Monarch Saphin auctioneers misrepresented dealers' costs. At May 24 hearing, Albert Saphin refused to tell how much he paid for his merchandise, although he admitted he "broke even" on $170 price for 17-in. Admiral table model which lists for $279.95 to public, $218.06 to dealer. Hearing was adjourned to June 6.

Saphin had fought back with newspaper ads May 21 which stated: "Since the start of this sale, all Monarch Saphin stores have been enjoying a tremendous spurt in business. On June 1, I'm starting to enlarge my New York store . . . "

Saphin blamed Regulation W and higher set prices for heavy inventory, put out press statement saying that before Regulation W he sold 80% of his sets on time, now only 10%.

One of bitterest complainants against Monarch Saphin auction was Philadelphia dealer and NARDA president Mort Farr, who called it "ugliest example of economic cowardice ever to deface our industry . . . It has depreciated TV stocks all over the country."

Seven column ad in May 25 *New York Times* and *Herald Tribune* by RCA distributor Bruno-New York was headlined "Caveat Emptor" (Let the Buyer Beware), made these points about "influx of alleged auctions": (1) Will you receive the merchandise in a factory sealed carton? (2) Are you buying from a reliable company? (3) Does it have the manufacturer's serial number? (4) If you purchase a service contract, does the auctioneer assume the responsibility of your receiving service? (5) How can you check on the value of the merchandise offered? Ad has bottom line slogan: "Make Your Dollars Count . . . Get All You Pay For!"

* * * *

Supreme Court's May 21 decision against fair-trading, indicating manufacturer must have signed contract with all his dealers to protect fair trade prices in 45 States which allow practice, apparently has knocked such pricing arrangements of TV-radio manufacturers out the window. Although mainly honored in the breach, especially during such "overload" periods as now, some manufacturers (notably DuMont and Magnavox) did maintain some semblance of national price standards under fair trade laws and threats of discontinuing franchises.

Those who want fair trade structures maintained are hoping Congress will pass new legislation plugging loopholes found by highest court. In TV-radio trade, it's said to be impossibility to get every dealer to sign pricing contracts—too many non-franchised dealers would get branded, fair-traded merchandise through trans-shipments, etc. Actually, TV-radio isn't as hard hit as liquor, drug, cosmetics industries, etc.

* * * *

What's next in tube sizes? Corning Glass thinks it's 27-in. (diagonal), all-glass of course, and has rectangular model under development but not yet completed or ready to offer to customers. It's same as early model shown at March IRE convention. Corning claims stepup to 27-in. is logical follow-up to 20 & 21-in., improves on 24-in rounds (offered only by GE and Stromberg-Carlson) because there is no wasted space due to truncated circular tube face. Corning has no plans as yet for still larger sizes, such as tube competitive with DuMont's 30-in. metal-coned round.

REGULATION W took lambasting before Senate Banking Committee this week from ex-Senate majority leader Scott Lucas, of Illinois, representing American Finance Conference, group of automobile manufacturers, and from CIO secretary-treasurer James B. Carey, who is also president of IUE. Robert C. Tait, Stromberg-Carlson president, will appear before House Banking & Currency Committee May 29 on behalf of RTMA to testify on effects of Regulation W on TV sales; and before Senate Banking Committee on June 5 on same subject.

Lucas said Congress never intended it to be applied so forcefully. Carey asked for 90-day relaxation of Regulation W to permit TV-radio inventories to be cleared out, said 30,000 workers are unemployed because of slump in sales caused by tightened credit controls. Carey thought Federal Reserve Board should permit trade-ins to be applied to down payments—same tack taken by RTMA, whose formal plea to FRB was rejected (Vol. 7:19). He also charged military with stockpiling critical materials which won't be used for long time, alleged "paper organizations" are being set up to get electronics contracts while established TV-radio firms are being by-passed.

More flexibility in application of Regulation W was proposed by Indiana U marketing professor Albert Haring this week to National Consumer Credit Conference at Lehigh U, Bethlehem, Pa. He suggested several alternatives ranging from heavy down payment and long period to pay to no down payment and short repayment period, leaving choice to customer. Opposing relaxation of credit was Philadelphia Federal Reserve Bank credit chief David C. Melnicoff, who saw present trade slump as temporary.

———■———

Sales slump will be short-lived, predicts Commerce Dept's May *Survey of Current Business*. "Within a short time," it notes, "restrictions on production will make supply the principal limitation on retail sales of durables"—with "pronounced effect" being felt in some lines by mid-year. But report warns that after rearmament effort has passed peak, new sales slowdown can be expected. "When increased productive capacity permits a greater supply of consumer durables," it says, "sales in relation to income may well be somewhat lower than in the past 2 years."

Survey gives these reasons for current slackening of retail sales: (a) War-inspired buying waves of June and late 1950 were "necessarily of short duration." (b) Imposition of price control eased consumers' fears of drastic increases. (c) Reduction in backlog of demand as result of high production. (d) Credit restrictions. (e) First signs of curtailment of residential construction.

Gross national product—total U. S. output of goods and services—hit record $313.9 billion-a-year rate in first quarter, according to *Survey*, but public slowed down its "disproportionate concentration on durable goods" of second half 1950, spent more on food and clothing.

* * * *

Change in excess profits tax credit from present 85% to 75% of best 3 years earnings in 1946-49 period was tentatively voted by House Ways & Means Committee this week. Change, if approved in final recommendations of committee, would be effective Jan. 1, 1951, would bring in estimated $730,000,000 extra to Govt. GOP members objected strenuously, said it had been agreed not to touch excess profits in this bill. Whether change in EPT credit base will remain in final bill is considered debatable.

Good chance excise tax on TV receivers may remain at 10%. In surprise reversal of last week's action raising excise to 15% (Vol. 7:20), House Ways & Means Committee May 25 voted to keep tax on TV at present 10% level. Industry and labor unions hope to see position maintained when tax bill goes to House floor in mid-June.

DuMont's self-focusing picture tube (Vol. 7:20) aroused considerable interest at Chicago parts show this week. Mounted in set alongside conventional set—both operating continuously from 8 a.m. to 7 p.m. for 3 days—pictures appeared identical, despite fact there was no focus control, coil or focusing device in set with new-type tube. Manager Irving G. Rosenberg of DuMont Cathode Ray Tube Div. said, "We're more excited about this tube than we've been about any new development in a long time." New 17-in. rectangular, 17KP4, is scheduled for full production in August. It's said to be completely interchangeable with 17-in. glass rectangulars in present sets, and when installed as replacement, focus controls and devices are disconnected. Several manufacturers reportedly have ordered new tube, which DuMont says will effect substantial savings in costs and scarce materials through elimination of focusing components, although tube itself may be more expensive than conventional type. DuMont plans to produce new tube in all sizes, including 30-in., eventually entirely eliminating production of externally-focused tubes.

Replacement of 1,000,000 TV picture tubes in 1951 will mean $25,000,000 in business, Sylvania's Frank Mansfield told Parts Distributors Show in Chicago May 23. He also estimated replacement market in 1951 would call for 48,000,000 receiving tubes for radios, 22,000,000 receiving tubes for TVs. He figured total replacement tube market would amount to $154,000,000 in 1952, $286,000,000 in 1953.

April receiving tube sales of RTMA members ran 35,883,627, considerably down from March's 44,413,146. Of April sales, 22,453,223 were for new TV-radio sets.

* * * *

Degree of slump in TV sales can be gauged by excise tax collections on TV-radio sets, phonos for April. Bureau of Internal Revenue collected $18,224,548 in April, down $5,000,000 from high of $23,390,352 collected in March (Vol. 7:18). April collections compare with $4,008,782 in same 1950 month. Total excises collected from TV-radio industry for 10 months from July 1950 were $101,105,875, compared to same preceding period's $33,482,890.

Bright spots in TV trade future, as enumerated by Chicago Crosley distributor Harry Alter, chairman of TV committee of National Assn. of Electrical Distributors, in convention at Atlantic City this week: (1) Coast-to-Coast TV. (2) Better programs. (3) Color. Despite color's cost and disruption, Alter said, it will prove good selling point. He also deprecated "extravagant" uhf claims.

Threat to advertising is discerned by James D. Shouse, Avco v.p. and chairman of Crosley Broadcasting Corp., in price regulation CPR-22 which doesn't permit increased advertising and other administrative costs to be figured into price ceilings. Speaking May 24 to New York chapter of American Marketing Assn., he called provisions of CPR-22 "profit control and not price control," urged that "sleeper" be "brought out, debated and argued rather than to let the issue go by default."

Conference of small business members of TV-radio industry has been called by RTMA June 5 during association's June 4-7 convention in Chicago. More than 100 RTMA members have indicated interest in formation of such a group. Small business concern is one which employs 500 workers or less, according to govt. definition.

Electronics chief of newly formed Canadian Dept. of Defense Production, A. H. Zimmerman, will be chief speaker at annual dinner of RMA of Canada at General Brock Hotel, Niagara Falls, Ont., June 1.

DPA Administrator Edwin T. Gibson will address RTMA industry banquet June 7, winding up annual convention June 4-7 at Chicago's Stevens Hotel.

Trade Miscellany: Of 630 different TV models made by 66 major manufacturers, *Billboard Magazine* May 26 reports only 15% have phonos, additional 30% have phono jacks . . . "Unfreeze vhf," so new cities can get TV, was gist of resolution by this week's Atlantic City convention of National Assn. of Electrical Distributors . . . Raytheon starts heavy TV promotion via radio June 17, buying NBC network of 133 stations for Sun. 3:45-4 p. m. EDST newscasts by John Cameron Swayze (who also handles *Camel Caravan* on NBC-TV) . . . "Modernphone," inter-communication phone system made by Modern Telephone Corp., New York, added to lines of specialized RCA distributors . . . Hoffman Radio will hold 1951 distributor convention in Los Angeles July 25-27 . . . Speakers at NARDA June 25 meeting in Chicago's Hotel Stevens are: Carl V. Haecker, RCA; Benjamin Gross, New York distributor; W. W. Cone, New Jersey distributor; A. L. Scaife, GE; W. A. Blees, Crosley, Antony Wright, Capehart-Farnsworth.

Price Miscellany: Tele King has new 20-in. table set with AM at $399.95 . . . Commander Television has new 17-in. table at $229.95 . . . Meck has new 20-in. table at $295.80 . . . Jackson Industries advertising 20-in. table for $199.95 . . . Regal advertising 17-in. table at $197.50 . . . Fada has new 17-in. table at $199.95 . . . Kaye-Halbert has 24-in. console at $459.95.

* * * *

Deadline for manufacturers' price control under OPS's Ceiling Price Regulation 22 (Vol. 7:17) has been extended from May 28 to July 2. At same time following reorganization has taken place in OPS: Harold B. Wess, ex-Macy and Alexander executive, now head of Consumer Divisions. Under him is Lee McCanne, on leave from Stromberg-Carlson and formerly head of TV-radio & miscellaneous section, now head of housewares and accessories branch; Eugene E. Smallwood, on leave from RCA and formerly head of housewares & accessories branch, now head of appliance & equipment branch (white goods, professional and business equipment, etc.). Head of TV-radio and miscellaneous section, succeeding McCanne, hasn't been named yet.

Expected shortages third and fourth quarters this year (Vol. 7:20) have inspired recent activity in maintenance and repair field. RCA Tube Dept. is starting "Serving the Community" promotional campaign, using window displays, direct mail, other aids to plug TV serviceman's place in community. Recently, NARDA offered its Certified TV Installation & Service Plan (Vol. 7:10) to entire industry, not alone to its own members. Timely tips on TV service were contained in May *Good Housekeeping Magazine* article titled "How Much Should Television Service Cost You?" Article spells out what public should and should not expect from servicemen.

Plant Expansions: Centralab Div., Globe-Union Inc., purchases 158,000 sq. ft. structure at 3410 Hopkins St., Milwaukee, for production of classified electronics equipment . . . Teletronic Laboratories Inc., Los Angeles, has moved into 12,000 sq. ft. factory near International Airport, costing $100,000 . . . JFD Mfg. Co. purchases Brooklyn site for new 120,000 sq. ft. plant, which will give its 3 plants total of 200,000 sq. ft.

Military production will take 63% of Westinghouse's electronics div. output this year, electronics v.p. Walter Evans told Pacific Coast Electrical Assn. May 22 in Los Angeles. Company-wide, military commitments total 35% of production, he said. Without specifying TV-radio, Evans opined consumer goods products will be 20-25% under record 1950 output, but he pointed out that will still be equal to production of such items in 1949 —"the third largest production year in history."

RCA's latest uhf converter has been installed in Bridgeport home of Rudy Frank, promotion manager of WELI, New Haven. Says Frank, whose station is prime uhf enthusiast, and whose home has served as unusual testing ground for many manufacturers' uhf units (Vol. 7:15): "Remarkable improvement over first model . . . images are practically noise-free and clean . . . From consumer viewpoint, pictures are as good as or better than those of other manufacturers." Unit was developed under supervision of Dr. Wenyuan Pan, who is also testing a "radically different converter which will far surpass even the current sample, which, according to Dr. Pan, is only an interim model." RCA is also testing new types of receiving antennas, smaller, higher gain.

Hallicrafters announced uhf converter at Chicago Parts Show, kept mum on performance. It's housed in 7-in. cube, covers whole band, feeds into vhf Channels 11, 12, 13, is intended for all makes of sets. Hallicrafters also says tuners in its existing sets may be converted via strips. Also worth noting at Show was great number of uhf antennas displayed by 29 manufacturers, variety of uhf test equipment.

* * * *

TV antenna higher than that on Empire State Bldg. may rise in New York after defense emergency is over. Tentative plans for 1580-ft. structure, comprising 44-story office building topped by 1000-ft. open-work steel tower, were announced by Wm. Zeckendorf, president of real estate developers Webb & Knapp Inc. and member of ABC board. Top of TV mast would be 108 ft. higher than Empire State's. Site is bounded by Park & Madison Aves., 47th & 48th Sts., now occupied by Hotel Marguery. Presumably, mast could be used by the 3 uhf stations FCC proposes for New York, by theatre TV, microwaves, etc. Six of city's 7 vhf stations are already committed to Empire State, only WOR-TV not yet signed. Incidentally, ownership of Empire State is reported changing hands for $50,000,000, going from Raskob estate to syndicate comprising Roger L. Stevens and Alfred R. Glancy Jr., Detroit, and Ben Tobin, Hollywood Beach, Fla.

Trade Personals: W. G. Peirce Jr., president of Peirce-Phelps Inc., Philadelphia (Admiral) reelected president of National Assn. of Electrical Distributors; Benjamin Gross, president of Gross Distributors Inc., New York (Stromberg-Carlson), named NAED v.p. and appliance div. chairman . . . W. C. Conley Jr., ex-Coolerator Co. sales v.p., named v.p. & mgr. of Crosley Distributing Corp., in charge of own branches in New York, Albany, St. Louis, Atlanta, Portland, Ore. . . . Roy L. Brown, ex-Eastern district mgr., Westinghouse Electric Supply Co., named executive v.p. & gen. mgr. of new wholly-owned subsidiary, Canadian Westinghouse Supply Co., Hamilton, Ont.; Wm. H. Bingham appointed as Eastern District mgr. . . . James Ward, formerly in charge of Stromberg-Carlson service in Los Angeles, appointed head of Chicago branch's TV div. under J. A. Frye . . . Harry Finkelstein named national sales representative for Haydu Bros., contacting all TV set makers . . . Gerald Ganley new purchasing director, Freed Radio . . . Wm. G. Blowers, appointed merchandising supervisor, Sylvania TV picture tube div. . . . Philo T. Farnsworth, Capehart-Farnsworth v.p., awarded honorary degree by Indiana Technical College May 20 . . . F. C. Dyer has resigned as engineer v.p. of Aeronautical Radio to join Collins Radio . . . Dr. Allen B. DuMont, chosen one of the country's dozen outstanding industrial leaders by *Forbes Magazine*, will be honored along with such others as Thomas J. Watson, IBM; Alfred P. Sloan, General Motors; Benjamin Fairless, U. S. Steel, at luncheon May 28 in New York's 21 Club . . . William P. Ready, formerly TV sales mgr., appointed gen. sales mgr., National Co.

Television Digest WITH AM-FM REPORTS

1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020

Special Supplement
May 26, 1951

Editor's Note: *This objective appraisal by an authoritative non-trade observer merits attention of all our readers. We fully concur with Mr. Gould's conclusions that TV is forcing "an economic upheaval" in radio but that "it is still much too early to write off radio as a lost medium."*

From The New York Times, May 20, 1951

OUTLOOK FOR RADIO

Readjustment in Over-All Approach and Programming Appears in the Making

By JACK GOULD

THE hectic and anxious days which broadcasting has just experienced in the wake of the many proposed deals involving the American Broadcasting Company have pointed up with singular vividness the transitional stage through which the industry is passing. The main emphasis throughout the sundry negotiations, all of which were finally called off by Edward J. Noble, A. B. C. chairman, because he did not believe they would benefit his network, was almost exclusively on TV. Radio was just an also-ran.

The present plight of network radio, however, is far from just an A. B. C. matter; it cuts across the industry as a whole. If the facts are faced, radio obviously is headed for trying moments next season and there is bound to be a readjustment both in its programming and over-all outlook.

Already the handwriting is clearly on the wall. The Columbia Broadcasting System, the National Broadcasting Company and the American Broadcasting Company have announced cuts ranging from 10 to 15 per cent in their rates for advertising time, a move which undoubtedly will be copied by the Mutual Broadcasting System. A reduction in radio personnel has been put through by N. B. C. and further payroll slashes in radio as a whole would not be surprising.

Changes

Sooner or later, perhaps by next fall, this economic retrenchment will become increasingly noticeable in the programs heard on the air. Undoubtedly the first presentations to go will be a number of the sustaining programs—N. B. C. last week revealed it was reducing such service by about two hours daily—which does not bode well for the future of such attractions as classical music offerings, discussion periods, etc. Service by the networks will consist more and more of just revenue-producing programs. Local shows, liberally sprinkled with spot announcements, may be expected to take up the slack. The thoughtful radio listener who at present has not been altogether happy with the diversity what he has heard via the networks may find the worst still lies ahead.

What has brought about the revolution in radio is, of course, a matter of cold statistics. Taken away from the radio audience in greater or lesser degree has been a minimum of perhaps 36,000,000 persons, based on an average audience of three persons for each of the 12,000,000 television sets in use. Many industry leaders believe this estimate, if anything, is conservative. More pertinently, however, is the known certainty that TV's audience is bound to expand through the years with a further contraction in radio's following.

As a result of these developments, many of the larger national advertisers have cooled off on radio and have put a bigger share of their budgets into video. Their attitude inevitably has influenced the position of the networks and set off a chain reaction which ultimately will be felt by every type of station down to the 250-watter.

If there is one party which takes vigorous exception to this turn of events, it is the out-of-town radio station affiliated with the major networks. Many of them realistically recognize that perhaps some adjustment is inevitable, but at the same time they believe network officials have become unreasonably panicky over TV and have acted prematurely. Because radio may have to move into smaller quarters, they assert, is no reason to destroy its whole house.

Factors

Even with the growth of television, radio's audience is still substantially larger than video's and in many communities listening has risen rather than fallen. Phenomenal as has been the sale of television sets—though significantly there is a serious slump in the market at present—the sale of radio sets is holding up astonishingly well. And it may easily be at least another year or two before additional television stations actually get on the air because of the Federal Communications Commission "freeze" on construction permits.

There are other factors as well. One of the more important is the rapidly rising costs of television which seem certain to exclude many advertisers who, however, would be able to afford radio. Further, no one knows for certain at what point in the ownership of a television set the novelty may begin to wear off and the individual's interest return again to radio and other old habits. Viewers who have had sets three or four years frequently find radio a welcome alternative.

FM

Frequency modulation radio also does not lack for vigor in many communities. Although a number of FM stations have folded up, others are enjoying slowly expanding audiences. With its emphasis on fine music, fidelity in reproduction and freedom from static, FM radio is a real blessing for many who can take only so much of the vaudeville and quiz shows, visual or aural. There also is a minor boom in the sale of kits for quality FM tuners and amplifiers and in some sections of the country FM sets reportedly are in short supply.

All in all, there appears little doubt that radio is bound to suffer an economic upheaval in considerable measure and that there will be some fatalities in the over-all number of stations. The importance of the national networks may be on the wane to some degree with more attention being paid to programs of local origin, particularly news broadcasts and recorded music shows. But in any case it is still much too early to write off radio as a lost medium. It can still do many things which lie beyond the power of television, one of which is the elimination of the visual commercial.

Mobilization Notes: Speaker manufacturers don't seem very interested in proposal by NPA Electronics Div. to help them get copper for electromagnets to replace cobalt-containing alnico permanent magnets. It's understood there have been relatively few replies to recent letter sent all speaker and focus device makers, asking their copper needs for next 4 months so Electronics Div. can make recommendations to Copper Div. for special allocation.

Here are reasons for sudden lack of interest by speaker industry, which was TV-radio industry's crisis spot a few short months ago: It's known that a number of speaker makers are importing large quantities of alnico magnets from abroad. One is reported to have purchased 25,000 speaker magnets in France. While distribution of raw nickel and cobalt—alnico magnets' principal ingredients—is strictly NPA-controlled, there are no curbs on purchase of finished magnets.

Add to this the TV sales slump. Demand for speakers is down somewhat, but demand for copper-wound coils and focus devices has dropped much more sharply, and some coil manufacturers have found themselves in unusual position of being able to take on new customers. Some of them are now making field coils for electromagnetic speakers. So, many speaker makers, now turning out as many as they can sell—and focus device makers, whose orders have taken big dive with TV slump—see no reason to appeal for copper to make components for which they have no customers.

June's cobalt and nickel allocation to magnet makers will be about same as May—roughly 25% of amount used during first-half 1950 base period, or 30,000 lbs. of cobalt plus about 20,000 lbs. of nickel.

* * * *

W. W. (Wally) Watts, RCA engineering products v.p. on leave, was named deputy DPA administrator May 24 by acting administrator Edwin T. Gibson in realignment of duties of top officials. Formerly assistant to the administrator and chairman of Production Executive Committee, Watts will now supervise all DPA production and procurement activities. This includes direction of 6 interagency boards—Production Executive Committee, Electronics Production Board, Aircraft Production Board, Procurement Policy Committee, Central Committee for Regional Defense Mobilization Committees, Critical Areas Committee. He also will continue to serve as chairman of Production Executive Committee and acting chairman of Procurement Policy Committee and Aircraft Production Board. Charles E. Wampler and Nathaniel Knowles were also named deputy administrators, in charge of program & requirements and staff service respectively.

Edmund T. Morris Jr., on leave from Westinghouse, chairman of Electronics Production Board, took over May 22 as director of NPA Electronics Div., succeeding John G. Daley, retired . . . **Harry J. Holbrook,** on leave from Norge Div., Borg-Warner Corp., appointed director of NPA Consumer Durable Goods Div. May 21 . . . L. M. Slaght, ex-ECA, named director of NPA Foreign Div. . . . Col. Justice M. Chambers, holder of Congressional Medal of Honor, May 18 became Civil Defense asst. administrator for plans & policies.

* * * *

File your CMP form now, is advice of responsible authorities at NPA. All indications are that you'll get better break in allocations, earlier July deliveries, if you get form 4A and/or 4B in as soon as possible. But whatever you do, don't miss May 31 deadline. If you can't get all your requirements together by deadline time, NPA advises, send in whatever you have—you can always file supplementary statement later.

Better deal on upkeep supplies will result from NPA's May 24 amendment to Reg. 4, which gives all public and private establishments (except households) DO-97 priority ratings to obtain maintenance, repair and operating (MRO) equipment (Vol. 7:9). New amendment (a) lifts quarterly MRO quota from 100% to 120% of average quarterly base period MRO expenditures, (b) permits organizations to use fiscal year ending before March 1, 1951 as base period instead of calendar year 1950, (c) permits establishments using DO-97 priority for 20% or less of MRO quota to buy unlimited additional amount of upkeep supplies without priority rating, (d) permits firms with more than one plant to decide whether MRO quotas are established for each plant individually or for company as whole.

Rapid tax amortization certificates covering $54,800,000 in expansion of facilities for production of electric and electronic equipment (including such items as wire and cable as well as components and end products) have been issued by Govt. since program started last October. This figure represents 12% of the $439,500,000 certified for expansion of all types of finished product production, and about 1½% of $2,842,800,000 certified for all production, including basic materials. The $54,800,000 certified for electric and electronic expansion represents 59 certificates at average amortization of 74.9%, total cost of facilities being about $73,200,000. Total of 379 applications was filed in electric and electronic field for amortization of $253,800,000 in expansion.

Tighter squeeze on copper is heralded by NPA's hike in percentage of defense-rated orders that producers of copper and copper-base alloy products must accept. Producers of wire mill products were notified they'll be required to accept priority orders for July shipments up to 80% of their average monthly shipments during first-quarter 1951. Other copper producers were ordered to reserve 20-115% of their first quarter production for defense orders. Canada will begin rationing aluminum, copper and brass June 1, allotting to each user 100% of his 1950 use.

All firms using copper or copper-base alloys must file monthly reports of their operations, beginning with April, to guide NPA in making copper allotments under Controlled Materials Plan, NPA announced May 14. Companies using these materials, and which haven't received reporting forms from NPA, should write Copper Div., Metals & Minerals Bureau, National Production Authority, Washington.

* * * *

TV's value to guided missiles is pointed out in May 21 *Time Magazine* article which says: "Some missilemen think that the Govt. should shut down the TV industry to free electronic men for guided-missile work." Article tells of remotely-controlled planes with TV "eyes," controlled with such accuracy that experts claim: "We could have flown that plane right into the mayor's office" in city hundreds of miles away.

Best explanation yet of rapid tax amortization and how it works, was recent speech by U. S. Steel chairman Irving S. Olds. Copies of this simple and interesting explanation are available from J. Carlisle MacDonald, asst. to chairman, U. S. Steel, 71 Broadway, New York 6, N. Y.

Permanent subcontract display will be set up by Air Force late next month at Chicago's Navy Pier. Prime contractors have been invited to display items for which they need subcontracting facilities.

Newly-revised pamphlet, *How to Sell to U. S. Army*, is available for 30¢ from Superintendent of Documents, Washington, D. C.

NBC Count of TV Sets-in-Use by Cities

As of May 1, 1951

Estimates are sets within .1 Mv/m contours (60 mi.), exciuding overlaps

CURRENT TV sales slump is reflected in NBC Research "census" report showing only 328,400 sets-in-use added during April—making total of 12,499,900 as of May 1. Similarly, March figure of 423,100 (Vol. 7:17) fell below February's 601,900 (Vol. 7:12), indicating pace of audience growth is reducing. These are the May 1 figures (consult individual stations for estimates of number of families within range):

Area	No. Stations	No. Sets
Interconnected Cities		
Ames (Des Moines)	1	58,400
Atlanta	2	110,000
Baltimore	3	297,000
Binghamton	1	37,200
Birmingham	2	51,700
Bloomington, Ind.	1	16,200
Boston	2	732,000
Buffaio	1	202,000
Charlotte	1	75,300
Chicago	4	921,000
Cincinnati	3	255,000
Cleveland	3	470,000
Columbus	3	147,000
Davenport-Rock Island	2	56,400
Dayton	2	128,000
Detroit	3	472,000
Erie	1	46,900
Grand Rapids	1	78,800
Greensboro	1	67,000
Huntington	1	43,000
Indianapolis	1	132,000
Jacksonville	1	32,000
Johnstown	1	87,300
Kalamazoo	1	36,800
Kansas City	1	119,000
Lancaster	1	97,100
Lansing	1	50,000
Louisville	2	89,200
Memphis	1	85,000
Milwaukee	1	239,000
Minneapolis-St. Paul	2	259,000
Nashville	1	29,100
New Haven	1	153,000
New York	7	2,350,000
Norfolk	1	67,300
Omaha	2	76,800
Philadelphia	3	852,000
Pittsburgh	1	255,000
Providence	1	149,000
Richmond	1	78,600
Rochester	1	81,400
Schenectady	1	155,000
St. Louis	1	289,000
Syracuse	2	121,000
Toledo	1	91,000
Utica	1	42,000
Washington	4	261,000
Wilmington	1	65,800
Total Interconnected	81	10,608,300
Non-Interconnected Cities		
Albuquerque	1	8,000
Dallas	2	117,000
Fort Worth	1	
Houston	1	76,700
Los Angeles	7	918,000
Miami	1	65,000
New Orleans	1	56,400
Oklahoma City	1	87,600
Phoenix	1	37,900
Salt Lake City	2	45,100
San Antonio	2	44,000
San Diego	1	93,500
San Francisco	3	189,000
Seattle	1	83,300
Tulsa	1	70,100
Total Non-Interconnected	26	1,891,600
Total Interconnected and Non-Interconnected	107	12,499,900

Two applications from Jackson, Miss., one from Wichita Falls, Tex., one from Albuquerque, N. M. have brought total pending to 408. First Jackson application was by *Daily News-Clarion Herald*, asks for Channel 3 *(TV Addenda 12-S)*. Second this week was by the brothers Joe, C. W. & Henry J. Herold, also asking for No. 3; Joe Herold, ex-chief engineer and gen. mgr. of WOW-TV, Omaha, now consultant for Havana's Union Radio, would build station in partnership with brothers, who are Natchez residents. KFDX, Wichita Falls, seeks No. 3; KOAT, Albuquerque, No. 7. [For all TV applications to date, see *TV Factbook No. 12* with addenda to date; for details about this week's applications, see *TV Addenda 12-T*.]

Code of standards for TV programs "acceptable to the American family," was called for this week by board of managers of National Congress of Parents & Teachers. Programs include "too many cheap vaudeville, crime, wrestling and mediocre movies," according to Thomas D. Rishworth, of Austin, Tex., chairman of PTA's Radio-TV committee. First meeting of TV operators on subject has been called for June 22 in Washington by NARTB-TV program committee (Vol. 7:20).

DuMont allocation plan (Vol. 7:20) will be explained to Senators and press May 31 or June 1 in Senate Interstate & Foreign Commerce Committee quarters in Capitol. Special sessions for Congressmen and for Washington engineers and attorneys are scheduled for following week.

Telecasting Notes: Margaret Truman, holding White House press conference this week, was asked what she thought of "the Great Debate", (MacArthur issue). Her reply: "You mean movies versus television?" . . . "Expanchment" is apt word coined by *Billboard* in May 26 headline to explain simultaneous expansion and retrenchment policies of broadcasting networks and movie producers. In radio, it cites NBC's tightening up in AM, while spending heavily for TV. In movies, it cites Warner and 20th Century cuts in personnel, reduced executive salaries, other economies, while spending heavily for facilities and talent . . . **DuMont Network** paying $95,000 a year, $475,000 in all, for exclusive rights to televise, broadcast and film National Football League championships, 1951-55, money to go into pool for players; DuMont's Tom Gallery and Les Arries, who put over Notre Dame telecasts, made deal with league commissioner Bert Bell . . . **Motion Picture Television Center** is name of new producing corporation announced in Hollywood by Joseph Justman, president of Motion Picture Center Studios there, with William Norins (executive v.p., Emerson Film Corp.) as president and William Stephens, producer of *Dr. Christian* and other films, as production v.p. . . . **Advertising Council**, in largest use yet of TV, will place 66 commercial films for U. S. savings bond drive thru G. M. Basford Co., as volunteer agency, prepared by Fox Movietone . . . **Cincinnati's WLWT** pridefully plugging fact its *Midwestern Hayride*, locally produced rural variety show, will be piped to NBC-TV network from June 16 as 8-9 summer replacement for top-ranking *Show of Shows* . . . **Acme Newspictures**, Cleveland, announces service for daytime programs which it calls *Women's News for TV*, including 20 picture slides daily to interweave into women's shows.

Notre Dame and Penn U have decided to disregard National Collegiate Athletic Assn.'s ban on "uncontrolled" football telecasts (Vol. 7:16), May 26 *Billboard* reports, with joint announcement planned some time next month. Meanwhile, it was revealed 4-man steering committee of NCAA's TV committee had met behind closed doors in Philadelphia to ponder (a) proposals by Fabian and United Paramount chains for theatre TV of college games, (b) sponsorship offers for "controlled" games, (c) possibility of pay-as-you-see TV arrangement (Phonevision, Skiatron). Attorney General J. Howard McGrath May 23 ordered FBI to determine whether illegal restraints have been imposed on broadcasts and telecasts of pro baseball and other pro and amateur games. This spurred Sen. Johnson (D-Col.), who is president of Western Baseball League, to introduce legislation to exempt all professional sports from Federal anti-trust laws (S. 1526). Similar bills (H. R. 4229-31) were introduced in House by Reps. Wilbur D. Mills (D-Ark.), Melvin Price (D-Ill.), A. S. Herlong Jr. (D-Fla.).

NARTB officials will confer May 29 with NPA chief Manly Fleischmann in attempt to get clarification of construction control regulation M-4 as it effects building of TV-radio stations (Vol. 7:19-20). Meanwhile, NPA and FCC continued consultations in attempt to set up specific criteria for authorization of new broadcast building. NPA is preparing to issue new form, CMP-4C, which will serve as combined application for building authorization and for allotment of controlled materials for approved building projects.

FCC's use of "db" in allocations plan (*TV Allocation Report*, March 24) still bewilders most laymen, accustomed to thinking in terms of "kilowatts" and "microvolts-per-meter." To simplify translation, E. C. Page consulting engineering firm has prepared table showing db equivalents, running from .1 db to 75 db, offers it gratis to any or all. Address: Bond Bldg., Washington 5, D. C.

FILM TREND TO TV LOOKS TO MORE STATIONS: Could be that the motion picture industry "may yet hail television as its salvation," as suggested editorially in the New York Times the other day. Newspaper was commenting on TV's inroads on boxoffice, its growing need for films as stations multiply and networks expand -- and, in effect, it gave its blessing to projected ABC-United Paramount merger (Vol. 7:21).

Certain straws in the wind are plainly discernible in current trade news:

(1) Not only has Isaac D. Levy resigned from CBS board -- having sold off his stock (Vol. 7:18-19) -- but he has embarked on big movie venture predicated on film use by TV. He's as enthusiastic about this as he was about founding of CBS in late '20s. His family is chief stockholder in Official Films Inc., program library syndicate, which has just taken over Jerry Fairbanks Inc., pioneer Hollywood TV film producer for NBC, et al.

"Ike" Levy is chairman of Official Films Inc.; Aaron Katz, president; Billy Goodheart (a founder of MCA), executive v.p.; Alex Rosenman, ex-WCAU, sales mgr. They're on board, along with CBS's Leon Levy, Ed Murrow and Frank Satenstein, RCA v.p. Mannie Sachs, Mike Nidorf, Henry Jaffe, Lou Stein, Jerry Fairbanks. Among other stockholders are such figures as Kay Kyser, Jack Benny, Dinah Shore, Sammy Kaye, Frank Sinatra, Joe Ross, Ed Wallerstein, Samuel Paley (father of CBS president).

With 2,000,000 shares authorized, company has sold 1,200,000 shares without public offering, paid 175,000 shares for Fairbanks, has $900,000 paid in capital, will produce and syndicate films to TV stations and networks, will custom-build them for ad agencies and sponsors, already has library of domestic and foreign films, including some 2000 short musicals (3-minute) originally produced for James Roosevelt's movie jukebox project. Fairbanks will be producer, and elaborate plans for takeover or tieups with other companies are under way.

"This isn't a promotion," said Levy. "This is my latest love, and Billy Goodheart is coming out of retirement on his farm to work on it. I'm quitting CBS to devote all my energies to this project."

* * * *

(2) This ambitious project would indicate confidence on part of some very shrewd pioneer radio and show business executives in future of film producing for TV -- confidence that "film transcriptions" will become as important a factor in telecasting, and just as competitive, as recorded shows are in radio.

It could also be interpreted as lack of confidence in much more expensive networking of programs -- for there are many competent observers who believe "live" shows aren't really essential in TV except for news and special events.

Fairbanks told Film Daily May 25 that TV film-making will be $43,000,000 industry this year, by 1952 will amount to $65,000,000 a year -- basing estimate on cost of $10,000 per 30-minute show and presumably on expectation that there are

Copyright 1951 by Radio News Bureau

JUN 4 1951

likely to be many more stations soon. He says there are now 27 TV programs on film equalling 988 hours a year, will be 75-80 by end of year equalling 2400 hours.

Present Hollywood production of 450 features, 550 shorts equals 855 hours per year -- so that demand from TV's mere 107 stations already outstrips Hollywood's so far as footage is concerned.

* * * *

(3) Foregoing is strongly supported by statistics on TV's requirements for raw film, though comparison isn't altogether apt because that's mostly due to kine-recordings. Motion Picture Herald estimates TV already using up to 300,000,000 ft. annually, broken down thus: NBC, 100,000,000 ft.; CBS, 105-110,000,000; ABC, 46,-000,000; Paramount Productions, 10,000,000; DuMont, stations, ad agencies, etc., 40-50,000,000. Trade journal reports NBC will have shipped 40,000 kine prints to affiliates this year, filming 80 programs off-tube per week, charging sponsor $525 per hour recording fee plus $125 per print. CBS ships 1200 reels weekly, 80 shows.

Whole movie industry uses some 2 billion feet a year, leading that trade journal to fear threat to supply. But NPA motion picture div. chief Nathan Golden discounts this, says he thinks there will be enough raw stock for all "provided we don't get into shooting war." Military now takes only 7%, peak wartime use was 38%.

* * * *

(4) TV's insatiable demand for old features, most now locked in vaults of big producers (Vol. 7:13,18) -- means obvious and enormous dollar asset to those companies as soon as there are enough TV stations to make their syndication profitable. Motion Picture Herald doesn't like this prospect, warns big distributors they "can't serve 2 masters," takes comfort in belief that "ultimately TV program format will have no place for one or 2-hour feature films, and quite soon...color TV will be in general use and then the TV value of all old black and white will shrink sharply."

Ignored is obvious fact that many more TV stations are assured during next decade at least -- possibly 1000-2000; that they will inevitably mean more competition for the 18,000 movie exhibitors now operating -- if that many survive; that few expect all telecasting to be in color -- certainly not in many years; that present repeat-and-repeat vogue of "oldies" with TV audience provides own obvious answer.

* * * *

(5) Willingness to trim sails to wind is reflected not only by United Paramount and others joining the TV trend, but by fact more and more local exhibitors are likely to go in for TV ownership (Vol. 7:20) -- as did newspapers for radio.

On the producers' side, Paramount Pictures' predilection for TV is well known, and of course it has big stake in DuMont. Attitude of other majors isn't so clear -- but here's significant statement in Walt Disney's report to stockholders:

"We are continuing to give serious study to the way in which our large library of completed features and short subjects may be used on TV and to what the company's eventual position and policies should be with respect to that medium...

"Our experience with our Christmas Day TV show last year, which introduced Walt Disney's Alice in Wonderland to over 2,000,000 people, leads us to believe that TV can be a most powerful selling aid for us, as well as a source of revenue. It will probably be on this premise that we enter TV when we do.

"Meanwhile, we have just recently begun to explore another field of TV activity -- the production of live action films especially designed for TV, including commercials, spot announcements and serialized dramatic and comedy shows..."

SENATORS TURNING EYES TO ALLOCATIONS: Allocations picture took new turn this week when Sen. Johnson joined those questioning legality of FCC's proposal to fix an allocation plan in rules (Vol. 7:17-21).

In fact, Johnson has many doubts about allocation plan, expressed them during May 29 hearing on FCC Chairman Coy's renomination to Commission.

"Does FCC have the legal right," he asked Coy, "to allocate channels in blocks? Or should it grant them to those who apply? Wouldn't it speed up the removal of the freeze if applicants came in and were chosen on their merits? Obviously, there won't be applications from communities with insufficient advertising."

Coy remained silent, and Johnson concluded: "But that is a separate matter. I didn't want to bring it up, but I felt I should protect the record."

Johnson said he'd write FCC a letter outlining his feelings. Presumably, he'd like FCC to clear the legal air, let parties to allocation hearing know whether they're spending time and money fruitlessly, call attention to fact legal question has hung fire since Federal Communications Bar Assn. brought it up 3 years ago.

DuMont is firmly sold on fixed allocation principle, on other hand. In fact, it's writing Sen. Johnson, urging legislation that will leave no question of FCC's authority to fix such plans in its rules.

Johnson also pounded away at proposed Colorado allocation (Vol. 7:19). "The Colorado situation is very unsatisfactory," he said. "It is so obviously a bad allocation that I have no doubt it will be corrected." Coy didn't comment.

* * * *

Freeze is beginning to get under skin of the powerful Sen. Johnson. In interview with Denver Post's Barnet Nover, prepared for KOA, Denver, he went into reasons for conspicuous absence of TV in Denver.

He warned of possible delays stemming from legality question, complained that Colorado and Denver were short-changed in vhf channels, wrote off uhf as "experimental" for the present, kissed off educational reservations ("colleges these days have little money to spare on frills"), reported that "color is here now."

"Color had nothing to do with the imposition of the freeze," he said. "However, the Commission, for some reason or other, decided to settle the color problem before holding hearings on the allocation and certification of new channels and that decision has kept the freeze from being lifted sooner."

It's no secret -- to Johnson, as well as to industry -- that "some reason or other" was himself. He was prime color mover when FCC proposed to open uhf in 1949.

When will Denver get TV? "I hope that Colorado may have TV by March 1, 1952, but lawsuits may delay that happy day," Johnson said.

Our own guess is that FCC's present procedures and competitive hearing on Denver means stations on air no sooner than winter, 1952 -- even without lawsuits.

But Johnson finds "silver lining" to delay: "When Denver does get TV, it will have benefitted from all the scientific developments of the last years and its sets will be geared to color and uhf as well as vhf frequencies. In other words, the danger of obsolescence in sets will be over."

* * * *

Sen. Benton took new tack in his educational TV campaign (Vol. 7:15,20). In May 31 hearing before Senate Interstate & Foreign Commerce subcommittee, headed by Sen. McFarland (D-Ariz.), he described new bill he introduced (S. 1579).

New amendment to Communications Act, co-sponsored with Sen. Hunt (D-Wyo.), Sen. Bricker (R-O.) and Sen. Saltonstall (R-Mass.), would establish a National Citizens Advisory Board of 11 which would meet from time to time, advise FCC and Congress on matters relating to programming.

Benton also submitted draft of new resolution, not yet introduced, which would hold up TV grants for one year, make TV licenses good for one year only, and direct FCC to explore subscription broadcasting. But Benton indicated he'd change wording to avoid delaying freeze-end.

Hearing was attended only by McFarland, Johnson, Hunt and Kem (R-Mo.). Questions seemed generally favorable, Johnson saying that if new Board weren't given censorship powers it might be "of tremendous value to the country."

But since Johnson always prefers to rule by pressure, rather than by "passing a law," and since he's currently so delighted with Coy, it's doubtful whether he'll actually go along with law establishing group to look over FCC's shoulder.

* * * *

DuMont had its day on the Hill, May 31, when it displayed lighted maps to Senators, to back up contention that its allocation plan is more efficient, more realistic than FCC's. Eight Senators showed up: Johnson, Hunt, Bricker, Jenner

(R-Ind.), Cordon (R-Ore.), McMahon (D-Conn.), Mundt (R-S.D.), McCarthy (R-Wis.). Some seemed impressed, Johnson saying: "I think more Senators should see this."

Engineers and attorneys specializing in radio saw demonstrations next day. One engineer's reaction was typical:

"There's no magic in it. DuMont has done on a national scale what most of us have done on a local or regional basis -- squeezed FCC's 'loose' separations down to 180-mile minimum, moved channels to cities where they can be used, taken those educational asterisks off channels."

* * * *

Coy's confirmation hearing was veritable love-feast with Johnson. Only Johnson and Magnuson (D-Wash.) attended, and Johnson concluded by heaping praise:

"You have the finest conception of the public interest of anyone from the administrative agencies appearing before us. I'm pleased beyond expression."

Coy was emotionally moved. "I'm very grateful to you," he said. "So few people like what we do, that perhaps I'm oversensitive about those comments you have just made."

FCC GETS BIG ROLE IN BUILDING CURBS: The knotty question of how to determine whether a community "needs" new TV or radio stations has been thrown into FCC's lap.

Community need and material availability -- these are basic criteria NPA uses in deciding whether to authorize new construction. And, as far as TV-radio station construction is concerned, it's now pretty certain FCC will get the job of deciding where stations are needed, while NPA Construction Controls Div. keeps its finger on the building materials situation.

Several applications to build radio stations reportedly were filed with NPA this week, but they're being held up pending determination of TV-radio building criteria under construction control order M-4 (Vol. 7:19-20).

Definite decisions aren't expected for a few weeks pending completion of NPA-FCC negotiations -- but criteria may follow general lines of the 5 priorities for TV channel assignments in FCC's third "freeze" report (see TV Allocation Report, Vol. 7:12). And it appears certain that FCC will take construction controls into consideration in its licensing policies. As one commissioner said: "There's no use granting a CP for a station that can't be built."

NPA will be lenient in granting authorizations to build stations which don't consume unnecessarily large amounts of steel. All signs so indicate, but "Radio City" type projects appear to be out of the question for the duration.

NPA Electronics Div. is still claimant agency for broadcasters, and as such will be specially helpful if obstacles block path of broadcasters seeking construction authorization. It's a good idea for applicants to send duplicate copies of their applications to J. Bernard Joseph, chief, end products section, Electronics Div., NPA, Washington. Original applications go to Construction Controls Div.

* * * *

Remodeling of existing facilities, as well as new construction, is covered by M-4. Not more than $5000 worth of either can be done without NPA authorization. This has worried many present TV-radio broadcasters, as well as NARTB, whose officials conferred with NPA Administrator Manly Fleischmann May 31 about problems raised by the construction order.

At this meeting, Fleischmann indicated NPA will probably permit stations to increase powers, and let grantees begin TV transmission, if they can do it without requiring large amounts of structural steel. Actually, in many cases, power increases and other additions to present facilities will be possible without necessity of application to NPA.

"Personal property" isn't considered by NPA as part of construction, and isn't figured in cost of building or remodeling. Without authorization, "personal property" may be installed, so long as installation costs don't exceed $2000. There's no ceiling on cost of equipment itself. NPA defines personal property as "any and all equipment or fixtures which may easily be removed without material injury to the structure, equipment or fixtures."

Based on previous NPA interpretations, it's reasonable to assume this will include all electronic equipment, including transmitters, camera chains, mobile cameras and transmitters, turntables and probably antennas -- but not towers.

Already classified as personal property are: film projectors and equipment, sound reproducing systems, emergency power plants, spot and flood lights, etc.

Most of the equipment needed to increase power of a TV or radio station is "personal property." It may even be possible to add TV transmitting facilities to an existing AM station by adding little more than "personal property" -- if existing studio and antenna supporting structures are used.

Personal Notes: Gen. David Sarnoff, RCA president, sails June 15 on *Queen Mary* for 2 months in Europe . . . James W. McRae appointed Bell Labs v.p. in charge of development dept., succeeding A. B. Clark, v.p. and coordinator . . . Jules Seebach, WOR-TV v.p., nominated for presidency of American Television Society, elections by mail to be conducted until June 15 . . . Harry R. Lubcke, who established W6XAO in 1931 (now KTSL) and claims it was nation's first TV station, has resigned from Don Lee to establish own consulting TV-electronics practice at 2443 Creston Way, Hollywood . . . Gordon J. Alderman, ex-WAGE, Syracuse, joins WHEN in that city as production mgr. . . . Richard S. Paige, recently with DuMont, has returned to NBC-TV sales planning & research dept. as supervisor of ratings . . . Charles H. McQuiston, NBC-TV production cost controller, promoted to asst. to Lyman Munson, director of TV network operations, and J. Robert Myers appointed NBC-TV purchasing mgr. . . . Louis J. Kleinklaus promoted to chief engineer of *New York Times'* WQXR, Athan Cosmas to AM-FM transmitter chief; Kleinklaus succeeds late Russell Valentine . . . T. F. Flanagan resigns as managing director of National Assn. of Radio & TV Station Representatives due to ill health . . . Mike Jablons, recently asst. to FCC Comr. Hennock, named TV-radio director of N. Y. *Herald Tribune* Fresh Air Fund . . . Walter E. Benoit appointed mgr. of new Westinghouse Air-Arm Div., preparing to go into new 400,000 sq. ft. plant in Baltimore; Joseph E. Baudino, KDKA mgr., succeeding him as gen. mgr. of Westinghouse Radio Stations Inc. . . .

Network Accounts: Lehn & Fink (Lysol, Hinds), starting July 31, sponsors *Bride & Groom* on CBS-TV, Tue. 3:15-3:30, thru Lennen & Mitchell and McCann-Erickson, both N. Y. Hudson Pulp & Paper Corp. sponsors Thu. show . . . Noxzema Chemical Co. (skin cream), using TV first time, starts *Cameo Theatre* June 18 on NBC-TV, Mon. 8-8:30, thru Sullivan, Stauffer, Colwell & Bayles, N. Y.; time is vacated by Speidel's *What's My Name?* . . . Best Foods Inc. (Shinola shoe polish & Rit dyes), starting July 24, will sponsor Tue. & Thu. 1:30-1:45 segments of *Garry Moore Show* on CBS-TV, thru Earle Ludgin & Co., Chicago . . . General Electric Co. starting Sept. 17, sponsors Mon.-Wed.-Fri. 1:30-1:45 portions of *Garry Moore Show* on CBS-TV, thru Young & Rubicam, N. Y. . . . Procter & Gamble replacing filmed shows with live on *Fireside Theatre*, dramatic shows with same title, starting July 3 on NBC-TV, Tue. 9-9:30, thru Compton Adv. . . . Campbell Soup Co. Sept. 7 replaces *Henry Morgan Show* with *Aldrich Family* on NBC-TV, Fri. 9:30-10, thru Ward Wheelock Co., Philadelphia; General Foods is retaining Sun. 7:30-8 time vacated by *Aldrich Family* . . . Armour & Co. starts *Garroway at Large* Sept. 5 on NBC-TV, Wed. 10:30-11, thru Foote, Cone & Belding, Chicago . . . Schlitz as of June 29 cancels *Pulitzer Prize Playhouse* on ABC-TV, Fri. 9-10, takes same time on CBS-TV for film show during summer from July 6; in fall will sponsor dramatic program, replacing CBS-TV's *Ford Theatre.*

Station Accounts: In front of backdrop of blown-up newspaper classified page, Lenore Kingston's *Classified Column* on KTTV, Los Angeles, Mon. thru Fri. 4:30-5, allows people to present their "situations," "for sale," "lost and found" and other want ads free in person after having submitted them in writing. Regular participating sponsorships are revenue source—at $80 each . . . Bruner-Ritter Inc. (Bretton monogram watch band) planning TV program or spots this fall, thru Raymond Spector Co., N. Y. . . . Kenmar Mfg. Co. (chairs) offering TV film spots to its dealers for local placements . . . Among other advertisers reported using or preparing to use TV: Holiday Brands Inc. (Holiday soluble coffee), thru Hoag & Provandie, Boston; Union Oil Co. of California (Royal Triton motor oil), thru Foote, Cone & Belding, Los Angeles; Craftshire Sports (misses' & women's suits), thru Wm. Wilbur Adv., N. Y.; Car-Ree-All Products Inc. (Roll-a-Vac vacuum cleaner carts), thru Ray C. Jenkins Adv., Minneapolis; Skinner Mfg. Co. (Raisin Wheat), thru Bozell & Jacobs, Omaha; Bowes Industries Inc. (Bondware paper plates), thru Russel M. Seeds Co., Chicago; Dad's Root Beer Co., thru Malcolm-Howard Adv., Chicago; Cameo Curtains Inc. (window curtains), thru Product Services Inc., N. Y.

———■———

Another proposed subscription-TV entry came into field this week with announcement that Paramount Pictures Corp. had bought half interest in International Telemeter Corp., 846 No. Cahuenga Blvd., Hollywood, developers of a coin-operated fee-TV system designed to accomplish same thing that Zenith's Phonevision does via phone lines and Skiatron's Subscriber-Vision with coded cards.

Hollywood company has David Loew, son of late Marcus Loew, as president; Carl Leserman, ex-United Artists sales mgr., v.p.; Eugene J. Zukor, son of late Adolph Zukor and Paramount executive, as secy-treas. Paramount Pictures' Paul Raibourn will be chairman. Loew and Leserman are independent film producers.

Request to FCC for experimental grant to test device is due soon. It's attachable to any TV receiver, has been under development for 2 years. It can be used not only with broadcast pictures but on closed-circuit frequencies.

To refute immediate rumors that system means Paramount is ready to release films for TV, Paramount Pictures v.p. Y. Frank Freeman declared: "There is no prospect in view of marketing Paramount pictures on TV or of making pictures at Paramount for TV. I cannot say," he added, "that we will never make pictures for TV."

* * * *

Some sort of movie-Phonevision tieup was subject of conjecture in movie-TV trade this week, following May 31 luncheon meeting of FCC Chairman Coy, Zenith's E. F. McDonald and MGM-Loew's Nicholas M. Schenck and Leopold Friedman. Heretofore, Schenck has been adamant against release of film features for TV—Phonevision or otherwise. He did, however, supply some film for recent Phonevision tests in Chicago.

Trade Report
June 2, 1951

MOBILIZER WILSON CAUTIONS INDUSTRY: In light of current confusion about color, these quotes from speech by Defense Mobilizer Charles E. Wilson, prepared for delivery before Executives Club of Chicago May 25, are worth careful heed:

"This optimist notes pessimistically that some civilian manufacturers are still hanging out the sign: 'Business as usual.' They are designing and building new models for which tools must be provided, and to do so they are using skilled men who should be devoting their time and talents to the defense program.

"For the period of our extreme emergency, this practice must be reversed.

"Let's scrap idea of new seasonal designs in automobiles, television sets, dishwashing machines or any other product whose 1950 design is plenty good enough.

"Let's scrap the idea of wasting the ingenuity of craftsmen on civilian gadgets when their brains and magnificent handicraft are needed to turn out new weapons...I have run across instances of a whole class of men graduating from electronics schools going into the civilian TV business, making and servicing home sets. And this at a time when our defense industries are badly in need of their services."

OUTPUT STILL DOWN, FACTORY INVENTORY UP: For fifth straight week, TV output stayed well below the 100,000 mark it has far exceeded through most of 1950 and the first quarter 1951. Production for week ending May 25, which closes statistical month, totaled 85,146 units (7407 private label), down from preceding May weeks' 93,681 (Vol. 7:21), 82,224 (Vol. 7:20), 66,077 (Vol. 7:19) -- or 327,128 for 4-week month as against 469,157 in April, 874,634 March, 679,319 February, 645,716 January.

Inventories at factory climbed again -- to 598,141 from preceding week's 562,138 (Vol. 7:21). Thus, it would appear that about one-third of estimated overall trade inventory of 1,750,000 is at factory. (That figure isn't official; actual figures should be known by mid-July when RTMA institutes monthly inventory checks.)

Radio output for May 25 week was 350,323 sets, holding to average pace for year thus far -- factory inventories at 299,399 vs. 281,432 week before. Breakdown: 153,424 home radios, 148,821 auto, 48,078 portables.

PHILCO OUT WITH NEW LOWER-END LINE: Philco pops 11 new models in lower end of line next week -- in manifest belief today's is a price market and with statement that its table model inventories are depleted. Prices range $199.95 to $329.95 for 16 & 17-in. tables, $299.95-$369.95 for 17-in. consoles, include tax but not warranty.

Models are now being distributed, Philco states, shown first to Atlantic-New England-Texas division dealers who left June 2 on week's Queen of Bermuda cruise. Philco states all sets "are so engineered that by the use of an adapter they can receive future uhf telecasts and also the Columbia color signals in black-and-white."

Philco is first major producer to bring out new line, move coming as something of surprise in view of becalmed trade. At Chicago convention in January, it had new line of 17 sets, including 12½-in. metal table at $199.95, dropped, plus 11 models with 17-in. tubes, 6 with 20-in. The 20-in. are continued, but other upper-end models will be announced later. (For details of January line, see Vol. 6:52.)

Two 16-in. tables in new line are No. 1610, walnut-finished metal cabinet, $199.95, and 1612 at $229.95. Five other tables are 17-in. rectangular: No. 1808, mahogany, $259.95; 1810, mahogany, $279.95; 1810L, same in blonde oak, $299.95; 1812, Contemporary mahogany, $299.95; 1812L, same in blonde, $329.95.

Four new consoles, all 17-in.: No. 1839, mahogany, $299.95; 1841, blonde, $349.95; 1831, mahogany, leather tooling, $339.95; 1831L, same in blonde, $369.95.

Philco distributor cruises also include this week's for West Coast dealers on S.S. Lurline to Hawaii, 2 weeks; June 9, Allegheny and Great Lakes area dealers on Queen of Bermuda, one week; June 16, Southern, Southwestern, New York-Newark dealers on Queen of Bermuda, one week.

Topics & Trends of TV Trade: Moratorium on Regulation W for 90 days, then 15% down payment terms like those for household furnishings, was asked of Congress June 1 by Stromberg-Carlson president Robert C. Tait, appearing for RTMA before House Banking & Currency Committee. He will also appear before Senate Banking & Currency Committee June 5 with same plea. Congressional committees are weighing renewal and revisions of Defense Production Act, which authorizes credit controls.

Highlights of Tait's fact-filled testimony before House committee, which drew no questions from attending Reps. Brown (D-Ga.), Betts (R-O.), Cole (R-Kan.):

(1) Unemployment in TV-radio industry now stands at 50,000 workers.

(2) Factory inventories now are well over 500,000—compared to average of 65,000 sets first 5 months 1950. Tait graphically illustrated this point by declaring that, in 1950, for every 5 sets sold one was in inventory; today, for every 5 sets sold, 25 are in inventory.

(3) TV has unique problem since 50% of its market has been withheld by FCC "freeze."

(4) TV's only market today is in lower income class, and it's hardest hit by 25% down payment requirement. TV has pretty well saturated higher income groups, he said, and replacement market isn't important nationally.

Significant point made by Tait—and also by spokesmen for other industries—was that Regulation W was designed to retard inflation, "not to cause deflation." With charts prepared by consulting economists Boni, Watkins, Mounteer & Co., Tait showed that TV and auto sales have been worst hit by Regulation W.

Retailers want Regulation W changed to 15% down payment, 18 months to pay—instead of present 25% down, 15 months to repay. They also want permission to count trade-ins against down payment. That's sense of May 29 letter to both Congressional committees by NARDA president Mort Farr.

A bill to suspend Regulation W for 60-90 days will be introduced by Rep. Patman, Texas Democrat. He made statement after House committee heard ex-Senate majority leader Scott Lucas, of Illinois, representing American Finance Conference (automobiles) and ex-Senate majority whip Francis J. Myers, of Pennsylvania, representing National Foundation for Consumer Credit and the Retail Credit Institute of America. Both testified about harshness of credit terms.

* * * *

New June 1 Emerson prices are $30-$60 above 30-day "interim" lists announced May 1 (Vol. 7:18)—but are still $30 to $70 below pre-May 1 prices. Emerson dropped from line 14-in. table, two 17-in. tables, and three 19-in. consoles. Following are new prices, with old list price (before 30-day cut) in parentheses: 17-in. table: 696, mahogany, $249.95 ($299.95). 17-in. consoles: 686, mahogany, $299.95 ($349.95); 686, blonde, $309.95 ($359.95); 687, mahogany, doors, $329.95 ($379.95); 687, blonde, doors, $349.95 ($399.95). 20-in. consoles: 692, mahogany, $399.95 ($459.95); 693, mahogany, half doors, $429.95 ($479.95); 693, blonde, half doors, $449.95 ($499.95); 694, mahogany, full doors, $459.95 ($499.95); 694, blonde, full doors, $489.95 ($529.95). Combination: 16-in., 666, mahogany, AM-FM-phono, $429.95 ($499.95).

* * * *

Govt. orders for radio-radar equipment received during first 1951 quarter by RTMA members totaled $184,216,795. This compares with $41,305,390 same 1950 quarter. Radar accounted for $95,735,292 of total, communications equipment $62,999,826, radio navigational aids $16,475,767, sonar $5,874,976, laboratory and test equipment $21,814,999, crystals $315,935.

Trade Miscellany: Latest gimmick of sales-hungry retailers is "Action Sale," extensively advertised in Boston and Detroit . . . Monarch Saphin auctioneer, up before New York City license commissioner, called "grossly exaggerated" reports that 7000 sets were sold at sale that started whole auction ruckus (Vol. 7:20-21) . . . Washington Phillips chain had "Warehouse Sale" this week, offering trade-in 10-in. sets for $29, 14-in. at $79, 16-in. at $88, 17-in. at $99 . . . Muntz TV is advertising 20-in. table at $179.95 . . . GE guaranteeing TV prices to Nov. 15 instead of Sept. 10 first announced (Vol. 7:18), also is inaugurating "factory-paid free floor plan to finance dealer working inventories" . . . Greber Distributing Corp., giving up Hallicrafters franchise, June 1 succeeds Simon Distributing Co. as Washington-Baltimore Motorola distributor . . . Philco sales v.p. Jack Otter announces appointment of Albert J. Rosebraugh to new post of mgr. of distribution, John J. Moran succeeding him as radio sales mgr. and John L. Utz named special TV representative.

* * * *

Complete electronics components sold to manufacturers come under OPS price regulation CPR-22, but same parts sold to replacement market stay under Jan. 25 general ceiling price regulation. That's official interpretation by OPS of problem that's caused a lot of head-scratching since manufacturers' ceiling price order came out last April (Vol. 7:15). Meanwhile, Lee McCanne, chief of Housewares & Accessories Branch, Consumer Goods Div.—on leave from Stromberg-Carlson—has added market analyst Ned Crane as electronics parts specialist, joining TV-radio cabinet specialist Earl Smith, from Connecticut Cabinet Co., Mystic, Conn. to TV-radio section.

* * * *

Now it's the auctioneers who are haunting TV dealers, offering to take inventory loads off their backs. Solicitation got to point where Philadelphia Philco distributor wrote all dealers warning that trans-shipments to non-authorized sources were violation of franchises, that "under no conditions are Philco dealers to be a party to this scheme."

Week saw more auctions held, several cancelled. Biggest of those taking place was by Detroit's House of Television. Audience got anti-auction dealers' handbills listing what they should look for in sets they bought—in same vein as Bruno-New York ad last week (Vol. 7:21). Scheduled auctions were cancelled in Buffalo, Philadelphia, Keyport, N. J.

* * * *

Clarification of these TV trade practices are suggested by Federal Trade Commission in agenda for June 21 hearing in auditorium of National Archives Bldg., Washington: (a) interference claims, (b) picture tube size, (c) long distance reception, (d) simplicity of operation, (e) number of tubes, (f) necessity of certain accessories. General industry practices such as pricing, warranties, discriminations, trade-mark and trade-name imitation, commercial bribery, are also recommended for consideration. FTC Chairman Mead will conduct meeting, open to entire industry.

TV manufacturers who fair trade are trying hard to get all franchised dealers in 45 fair trade states signed up in order to meet Supreme Court decision last week which held manufacturer can't enforce prices if dealer hasn't agreed to do so (Vol. 7:21). Magnavox this week said only small number of its dealers haven't yet signed. Packard-Bell is reported to have every dealer signed. Emerson, which fair trades through intra-state distributors, goes to court June 4 to enjoin New York retailer from selling its TV sets below lists.

"Greatest name in television" is Allen B. DuMont and outstanding TV firm is RCA, in opinion of 1200 business leaders participating in survey conducted by *Forbes Magazine*. As reported in June 1 *Forbes*, RCA received 46% of votes as outstanding firm, DuMont 20%, Philco 9%, Admiral 8.5%, Zenith 5%, Motorola 4.5%, Magnavox 2.5%, Capehart 2%, Stromberg-Carlson and Hallicrafters 1% each, and Emerson, Crosley, Meck less than 1%. Dr. DuMont was voted TV's outstanding leader by 51%, RCA chairman Sarnoff 26%, Admiral president Siragusa 11%, RCA president Frank Folsom 3%, Zenith president McDonald 3%, Motorola president Galvin 2%. Dr. DuMont came in fourth, mentioned on 13% of ballots, in tabulation of nation's outstanding business figures. United Airlines president Eddie Rickenbacker was No. 1 with 27%. RCA was No. 12, and mentioned on 40% of ballots, in tabulation of outstanding corporations, with General Motors selected for first place on 63% of ballots.

Plant Expansions: RCA dedicates new tube plant in Cincinnati June 11 to memory of late RCA Victor executive v.p. John G. Wilson; it's old Rich Ladder Mfg. Co. plant, 136,000 sq. ft. and 17 acres, will be devoted mainly to subminiature tubes . . . GE broke ground May 30 for new 50-acre, 338,000 sq. ft. plant costing $15,000,000 at New Hartford, N. Y., near Utica, for manufacture of military electronics gear, expected to be completed in 12-15 months . . . Willys-Overland acquiring new Toledo plant for electro-mechanical production, will employ about 100 electronics and mechanical engineers on 2 developmental contracts for Signal Corps and Glenn L. Martin Co. . . . National Video, Chicago cathode ray tube manufacturer, building new plant at Grayslake, Ill., plans production there in 4-6 months.

Bearish on fall TV sales is retail furniture consultant Arthur Fertig, who feels buying trend earlier this year is "very likely to recede sharply in the last half of the year." Furniture and home furnishing stores, he says in interview in May 24 "Buyers and Sellers" column in *New York Herald Tribune*, won't meet high volume of last half 1950. "Saturation points temporarily appear to have been reached in TV, particularly in the East," he says—which would indicate he doesn't believe Regulation W is sole villain of present TV sales slump. TV-radio accounted for 13.62% of total furniture & home furnishing sales first quarter 1951 vs. 9.36% same period 1950, Fertig says.

Canadian RMA reports 4409 TVs sold by factories for $2,500,867 during April, with inventory of 3636 units as month ended. Table models under $400 list totaled 153, over $400 totaled 1373. Consoles under $500 totaled 97, over $500 totaled 2722. TV-phonos numbered 64. Windsor area (Detroit) took 36% of April sales, Toronto-Hamilton 34%. First 4 months of 1951 unit sales were 18,461, valued at $10,197,722. Cumulative TV sales to April 30 totaled 56,284 valued at $26,474,305, with 43% in Windsor area, 35% in Toronto-Hamilton, 17% in Niagara Peninsula, 5% other areas.

From theatre owner to TV dealer is story told in May 25 *Tide Magazine*. Seems Colver, Pa., theatre owner ran only movie house in coal-mining community with weekly attendance of about 1700. Recently attendance fell to 700. Looking over rooftops of town of 1500, theatre owner saw TV aerials all over the place, immediately boarded up his theatre, opened up TV store across the street.

Mobilization Personals: Everard L. Stuhrman, ex-Air Force procurement, named deputy chief, and H. J. Bradfield, ex-Defense Dept. Research & Development Board, technical div. chief, Office of Electronic Programs, Munitions Board . . . Clay P. Bedford, Kaiser-Frazer v.p., appointed assistant to Mobilization Director Charles E. Wilson, in charge of expediting defense production.

Mobilization Notes: First of 3 new consumer durable limitation orders for third quarter—M-47 steel order, amended June 1—limits manufacturers to 70% of steel used during average base period quarter, as expected (Vol. 7:20). Scheduled to appear shortly are similar orders on copper (60%), aluminum (50%).

Most objectionable features of old M-47 (which imposed 80% steel limit for second quarter) have been eliminated in new order, as recommended by TV-radio manufacturers (Vol. 7:10-11,14). Here are the major changes:

(1) "Straitjacket" provision of old order—which in effect froze manufacturers' "mix" as between (a) radios, (b) radio-phonos, (c) TVs, (d) TV combinations, (e) phonos & record players—has been modified. The 5 categories have been broken down to 3 now: (a) Radios & radio-phonos, (b) TVs & TV combinations, (c) phonos & record players. This permits more flexibility of output to meet consumer demand.

(2) Old order's discrimination against "assemblers" as distinguished from "manufacturers"—which discouraged conservation—has been wiped out entirely. "Assemblers"—including possibly half the TV-radio set makers—will no longer be required to limit their output to a percentage of the units they turned out during base period. As of July 1, they will have 3 alternative methods of limiting their use of steel: (a) By weight of steel used in parts; (b) by number of steel-containing parts; or (c) by number of end units.

(3) Alternative base period of second-half 1949 is provided for seasonal manufacturers dissatisfied with first-half 1950 base. Since industry turned out more than twice as many TVs during first-half 1950 than during second-half 1949 (3,114,000 vs. 1,557,000), and considerably more radios, most TV-radio companies will probably stick with 1950 base.

* * * *

Electronic distributors' stocks of power and special purpose tubes, test equipment, wire and cable, batteries are "seriously depleted." This was indicated in survey of 237 distributors transmitted to NPA May 28 by Electronic Parts & Components Distributors Advisory Committee (for membership see Vol. 7:10). Survey showed receiving tubes in good supply, except for spot shortages in individual types. Special distributors' task group report urged that licensed "ham" operators be authorized to use DO-97 (maintenance, repair and operating supply) priorities to obtain replacement parts. Other recommendations by distributors: (a) At least 50% of first-half 1950 production of test equipment be made available to distributors during remainder of 1951. (b) NPA reconsider committee's proposal (Vol. 7:10) to make available during second-half 1951 at least 150% of number of replacement parts sold during first-half 1950, in light of TV's phenomenal expansion. (c) No inventory curbs be placed on finished goods.

Four certificates of necessity for accelerated tax amortization on new electronic production facilities were approved by DPA, out of total of 135 certificates for rapid depreciation of $178,485,663 in new productive facilities of all types issued week ended May 25. Certificates were granted to: Stewart-Warner Corp. for production of electronic equipment at Chicago, $958,600 at 75% amortization; F. W. Sickles Co., Joliet, Ill., transformers and coils, $386,750 at 75%; Sangamo Electric Co., Carbondale, Ill., mica capacitors, $347,307 at 75%; Lavoie Laboratories Inc., Morganville, N. J., electronics, 47,780 at 85%.

Picture tube sales took drastic drop in April, RTMA reports. Only 278,955 worth $6,869,181 were sold, compared with 608,396 which sold for $16,064,425 in March.

Paramount Pictures Corp., with its Lawrence tri-color tube (Vol. 6:18 et seq & 7:16), shapes up as dark horse in color set production field with announcement that it will make sets with tube—first probably available in July, though tube has never been demonstrated publicly. Color work is being done by Chromatic TV Labs, 50% owned by Paramount, 50% by inventor Dr. Ernest Lawrence and associates (U of California, Berkley). Officials say: Company has acquired some production facilities from Machlett Labs, which has made the tubes, is obtaining more in Stamford, Conn. They'll make 16 & 21-in. round tubes, offer them to other manufacturers, but none has bought any yet—not even CBS-Hytron ("they seem to like the drum"). Other tube makers have approached company with proposals for making tube themselves, but no agreements have been reached. A "wild guess" at price of color sets, with tube, is 25-30% more than black-and-white. Screen of tube comprises thin aluminum strips, phosporcoated. Chromatic promises "limited public demonstrations" within 30 days, reports following scientists on its staff: Dr. Luis Alvarez, inventor of GCA air navigation system; Dr. Edward McMillan, co-discoverer of plutonium; Dr. Andrew Longacre, early worker on radar. Note: Paramount is big stockholder in DuMont, opponent of CBS color system, but DuMont has no voice in Paramount's TV policies—largely influenced by v.p. Paul Raibourn.

A "history" of color TV, written by 6 students of Harvard Graduate School of Business Administration, was reported by *New York Times* this week. "History" had erred only as to date when it had Supreme Court sustaining FCC on July 2, 1951. Then, the students predicted, on Nov. 1, 1951, Commission began to have doubts, and in "April of 1952" reversed itself, chose RCA's system, whereupon "CBS accepted defeat, shook hands with RCA, and the new FCC decision was not carried to court."

Color conversion kit will be offered within 60 days, says Celomat Corp., New York, early enthusiast for CBS system (Vol. 6:41). President Myron Greenwald says that it will sell for under $30, also that "de luxe" 12½-in. converter will be offered shortly. Black-and-white set must first be adapted by serviceman to 405-line, 144-field standards before kit can be used.

Hytron subsidiary Air King, soon to be part of CBS holdings (Vol. 7:15, 20), has invited press for demonstration of combination color and black-and-white TV receiver at its Brooklyn plant, Monday, June 4. Hitherto a heavy private-brand producer, Air King is slated to turn out TVs and radios under "Columbia" brand, has lately been seeking to build up distributorships.

Another color system: John Sherman, technical director of WTCN-TV, Minneapolis, and Edwill Fisher, printer and photographer, are reported by UP as claiming invention of system which may be "the ultimate answer to the whole color TV squabble." They believe they have system which would permit stations and set owners "to modify their equipment inexpensively for color."

Someone at FCC was being coy when he placed on press table an RCA radiogram on color decision from Stephane Mallein, Radiodiffusion Francaise, Paris, to "Monsieur Wayne Coy, President, Federal Communications Commission," reading: "Vives felicitations pour brilliante victoire."

More lead and zinc will be reserved for defense program—and consequently less will be available for civilian production—under amendments issued May 28 to basic NPA orders M-9 and M-15 (zinc) and M-38 (lead).

President has asked Congress to give FCC $1,340,000 for monitoring purposes, in addition to $6,000,000 already appropriated by House.

Financial & Trade Notes: Latest Emerson earnings report, released June 2, is illustrative of downward pace of profits to be expected this year, result of reduced TV sales and higher taxes. For 26 weeks ended May 5, Emerson net profit was $2,366,542 after taxes ($1.22 per share) as against $3,048,948 ($1.57) for comparable period ended May 6, 1950. Before taxes, the 1951 figure was $5,121,952. Sales figure wasn't available at press time, but it's recalled that president Benjamin Abrams predicted in February that 1951 sales will equal 1950's $74,188,297 (Vol. 7:2, 6) but said "we'll have to go some" to achieve 1950's earnings of $6,514,716.

* * * *

Warner Bros. Pictures Inc., reflecting not only higher taxes but diminished movie attendance, reports net profit of $3,827,000 (56¢ per share) for 6 months ended Feb. 24, compared with $5,897,000 (80¢) in 6 months ended Feb. 25, 1950. Profit is after all charges, including $4,200,000 provision for taxes and $400,000 for contingent liabilities. Total revenues declined to $57,143,000 for the period from $64,800,000 for similar period preceding year.

The Wall Street Journal reports boxoffice receipts in many areas now running 17-33% below last year, quotes Southern California executive as fearing "this summer will murder us," states Chicago losing film emporiums at rate of one weekly to tune of $6000 a week in tax revenues, 134 closing in Southern California last year.

Walt Disney Productions reports $201,914 net profit, or 30¢ per share on 652,840 shares outstanding, on total income of $2,357,845 for 26 weeks ended March 31 vs. $75,905 (10¢) on $2,251,444 for same period last year. Firm has set up Herrell Productions Inc., as controlled subsidiary, to produce films for TV, including commercials, spot announcements, serialized drama and comedy shows.

* * * *

Quarterly analysis of business profits of 617 companies by *Wall Street Journal* shows earnings first 3 months of this year 21.3% higher than same 1950 quarter. In "Electrical & Radio" category, 22 companies showed $84,745,929 earnings first quarter, up 7.3% from $78,966,895 for same 1950 period.

National City Bank of New York, making similar analysis of 18 leading electrical equipment, radio and TV firms reports their combined first quarter income as $65,871,000, up 8% from first quarter 1950's $60,882,000 but down 38% from fourth quarter 1950's $106,733,000.

Identities of the companies were not revealed in either report.

———■———

Motorola, which contributes 20% of yearly profits to its employes' savings and profit-sharing fund after deduction of 5% of company's net worth, transferred $2,295,000 of its record 1950 earnings (Vol. 7:11) to that fund—representing company contribution of $4.41 for every $1 paid in by participating employes. Amount was new high, compares with $1,654,120 in 1949, brings current value of fund to $7,093,059. President Galvin illustrates fund's benefit by noting that if an employe put $200 into it each of last 3 years, starting when fund began in Nov. 1947, his account would now be worth $3808.

ABC board this week approved proposed merger with United Paramount Theatres Inc. (Vol. 7:21) into new firm to be known as ABC-Paramount Theatres Inc. Deal now awaits exchange-of-stock details, formal application to FCC for license transfers.

Radio & Television Daily's 1951 *Radio Annual* is 1280-page compendium of TV-radio stations, advertisers, agencies, unions and other organizations, includes list of most-wanted telephone numbers in New York, Chicago, Washington and Los Angeles.

Telecasting Notes: Canada's first TV station, 5-kw Canadian GE installation with 500-ft. 6-bay superturnstile, operating on Channel 9 in Toronto, won't get started until early 1952, according to CBC engineering dept. Second should be ready in Montreal, 15-kw Canadian RCA job on Channel 2, few months later—possibly June. They'll be known as CBL-TV & CBF-TV, respectively. Delay in construction start until early fall is being caused by delivery of steel for towers, and materials shortages are also given as reason for fact there are no other CPs for commercial TV outlets yet. Studio equipment for both stations is being supplied by British Marconi . . . Goar Mestre, CMQ & CMQ-TV, Havana, reports he's planning TV network expansion, as is rival Union Radio (Vol. 7:21), states he has bought 2 transmitters from DuMont, 2 from GE, to be installed at Matanzas (Channel 9), Santa Clara (5), Camiguey (6), Santiago (2); he plans to buy 2 more for Holguin (4) and Pinar del Rio, and to link them via 17-relay microwave setup between Havana and Santiago (520 miles) and between Havana and Pinar del Rio (100 miles) . . . ABC-Paramount TV-radio operations may be consolidated under one roof—big ABC Television Center on W. 66th St., New York—after merger, because NBC wants ABC space in Rockefeller Center. Moving Day probably will come early in 1952 . . . ABC-United Paramount Theatres merger (Vol. 7:21) has led film trade press to make much of fact that Balaban & Katz, UPT Chicago area chain, has signed top TV stars for its Chicago Theatre this summer, including Milton Berle, Martin & Lewis, Sid Caesar, Imogene Coca . . . Herald Tribune columnist Hy Gardner hints ABC is dickering with RKO to take over New York's Palace Theatre for conversion into TV theatre . . . San Francisco's KPIX and AM outlet KSFO quit Mark Hopkins Hotel studios in early December, moving into new 3-story structure including 3 large TV studios being built at cost of $500,000, Van Ness Ave. & Greenwich St. . . . George Storer, Fort Industry Co., has pulled out of Consolidated Television Broadcasters Inc., recently formed film producing syndicate (Vol. 7:17-18); says he will soon have different plan along same lines . . . First TV educational "commencement" was celebrated June 1 when WFIL-TV, Philadelphia, played host to FCC Comrs. Coy Hyde, Sterling, Webster and presidents of 20 colleges cooperating in *University of the Air*, which it has carried 11-noon each weekday since January (Vol. 7.2) . . . Miami's WTVJ (Lee Ruwitch, mgr.) has made special arrangement with Miami Beach's new Continental Hotel whereby TV station and ad agency folk get special $5 per day rate for $10 double room.

Group of Atlanta business men has again filed request with FCC for approval of sale of Channel 8 facilities of WSB-TV (Vol. 7:15). Known as Broadcasters Inc., applicant lists textile manufacturer Walter C. Sturdivent Jr. as president, includes also broker Clement A. Evans, 14 others. Sale price is $525,000. WSB-TV owners *Atlanta Journal & Constitution* plan to retain call letters but switch to Channel 2 (WCON-TV) operation as soon as current tests prove out. WCON-TV was originally granted to *Constitution*, but when that newspaper was merged with *Journal*, new company had to give up one or the other. First application for sale was returned by FCC because it couldn't tell who ultimate stockholders would be—two-thirds of stock being held by Evans' firm (Vol. 7:18).

Mutual cut AM network rates least of all networks—10% for 1-10:30 p.m. periods as of July 1, offering also half-rates for Sunday afternoons instead of present two-thirds night rate. It's thus last of 4 networks to reduce rates. ABC cut same periods 15% (Vol. 7:20), while CBS and NBC cut afternoon hours 10%, night segments 15% (Vol. 7:15-18).

Transit FM is unconstitutional—the commercials at least. So District of Columbia Court of Appeals ruled unanimously June 1 in first test case. Decision will be appealed, since there are 15 such operations, with big investments, and Supreme Court is likely to consider case because of novel constitutional question involved. It can't get to highest court before next fall. Some radio attorneys contend decision challenges radio-TV commercials in general. Decision was based on Fifth Amendment, said: "The Supreme Court has said that the constitutional guarantee of liberty 'embraces not only the right of a person to be free from physical restraint, but the right to be free in the enjoyment of all his faculties . . .' One who is subjected to forced listening is not free in the enjoyment of all his faculties."

George A. (Dick) Richards' death May 28, at age of 62, means dropping of case against the 3 radio stations he controlled—KMPC, Hollywood; WJR, Detroit; WGAR, Cleveland—though FCC may go through form of ruling on charges leveled against him that he slanted newscasts against Franklin D. Roosevelt, the Democrats and Jews. Three-year-old case has been cause celebre, resulted in long hearings, recent strongly-worded proposed findings by FCC general counsel Benedict Cottone urging licenses be revoked. Fight against charges has cost some $2,000,000, said stations' president John J. Patt in reply. Richards became critically ill last week of disease of the arteries, had been living at Detroit Athletic Club since return from Europe about year ago.

Theatre telecasts of college football games got boost last weekend when National Collegiate Athletic Assn.'s TV committee ruled that any 7 out of 10 games scheduled by NCAA member colleges will be available to movie houses this fall, leaving theatre interests free to negotiate with individual colleges. But Illinois legislature this week passed bill, 110-7, forbidding theatre TV unless same game is simultaneously available on free public TV. Measure now goes to Senate. Meanwhile, Esso reportedly turned down NCAA bid to sponsor "controlled" football telecasts (Vol. 7:16), presumably because of anti-trust implications of NCAA's experimental "game of the week" plan. Big Ten approved NCAA plan May 27, will permit each member college to televise one home game, one away.

First commercial uhf application came to light this week—filed May 7 by WSBA, York, Pa., in form of amendment to pending vhf application. Station asks for Channel 43, proposes 70 kw ERP, 550 ft. above average terrain, using RCA 5-kw transmitter. This week, WHK, Cleveland, and WIBX, Utica, also filed for uhf, amending vhf applications. [For all TV applications to date, see *TV Factbook No. 12* with Addenda to date; for detail about this week's applications, *see TV Addenda 12-U.*]

TV programming meeting June 22 in Washington's Hotel Statler will be addressed by FCC chairman Coy and Senator Johnson (D-Colo.), chairman of Senate Interstate & Foreign Commerce Committee. Meanwhile, acting NARTB-TV general mgr. Thad Brown and staff are analyzing May 6-12 program logs (Vol. 7:20).

Speakers at TV panel of Advertising Federation of America convention June 13 in St. Louis will be George Burbach, KSD-TV; Louis A. Hausman, CBS; Don L. Kearney, Katz Agency; Don McClure, McCann-Erickson; Newman McEvoy, Cunningham & Walsh; John A. Thomas, BBDO; Louis Westheimer, Westheimer & Block, St. Louis. Eugene S. Thomas, WOR-TV mgr., is program chairman.

TV commercials are better than radio commercials. That's opinion of 70% of 200 Chicago viewers, interviewed by Pilot Surveys Inc. for ad agency Gourfain-Cobb. Major reason given for attitude, survey explains, is that TV commercials make it possible to see product advertised.

Special Color Reports
June 2, 1951

In This Section: Color Issue—Public Now the Arbiter, *page 1*. The Color Edict—Impact on the Trade, *page 5*. Colorcasting—Choice up to Stations, *page 4*. Industry Comments on Color TV Plans, *pages 6-8*.

COLOR ISSUE—PUBLIC NOW THE ARBITER: Supreme Court's color decision clears up the litigation -- but not much more. Still left wide open are the really basic economic and technological questions:

(1) Can CBS get anywhere, almost single-handedly, with a system that can't be picked up by any of the nearly 13,000,000 TV sets in use?

(2) How soon will the "right" compatible system, backed by overwhelming majority of industry, be welcomed by FCC through its "open door"?

* * * *

Text of court's 8-1 decision of May 28 was sent you the day issued. It sustains FCC choice of CBS system, thus permitting it to go commercial in 25 days. It speaks for itself, but crux is probably contained in this sentence:

"But courts should not overrule an administrative decision merely because they disagree with its wisdom."

Justice Frankfurter's doubts, reflecting same what's-the-hurry attitude manifested by lower court, are epitomized in:

"What the Commission here decided is that it could not wait, or the American public could not wait, a little while longer, with every prospect of a development which, when it does come, concededly will promote the public interest more than the incompatible system now authorized."

* * * *

Decision came as no surprise, hence no great shock -- except to TV trade, already in doldrums, now more becalmed than ever. Buying of TV receivers, competent sources say, has all but stopped as inventories pile higher (see Trade Report).

No one was startled into taking a new position -- neither industry, FCC, Sen. Johnson nor CBS, though it was noted that the CBS broadcast claims about the immediacy and low cost of adaptation, conversion and new color receivers were much less extravagant, much more toned down than when it won its first victory.

FCC Chairman Coy and Sen. Johnson, if anything, went out of their way to make clear that Commission is duty-bound to reconsider compatible systems whenever proffered. Also, intra-Commission talk has been dropped, for time being at least, of "forcing" CBS colorcasts upon recalcitrant stations (see story, p. 4).

Stations are as reluctant as ever, even CBS affiliates indicating they'll experiment with off-coaxial colorcasts slowly and cautiously, if at all.

Most manufacturers stand as before (see symposium, pages 6-8). No major set maker says he'll produce CBS-type receivers now. Some reject system flatly and completely; many say they'll wait and see how the public reacts; others offer no comment. Handful of smaller outfits say they'll make them -- including, of course, soon-to-be CBS subsidiary Air King (Hytron).

* * * *

So it's CBS's baby -- almost entirely -- and there's public choice. Whether it can build brand new audience fast enough to make colorcasting commercially worthwhile for itself and other telecasters, in light of today's materials shortages and slow purchasing pace, is up to CBS and its followers to prove.

Officially, CBS says it will shortly expand its present 10-11 a.m. daily experimental telecasts in New York, promises "substantial schedule" in a few months, with feeds to other stations on network.

CBS doesn't say which stations would accept color, but claimed it had 15 ready to go last Nov. 20, before RCA appealed FCC decision. It has done good sell-

Copyright 1951 by Radio News Bureau

JUN 4 1951

ing job to advertisers, has several lined up to pay token rates for initial color audiences in order to enjoy publicity claims of "firsts".

But how long can CBS carry the burden? Presumably it's counting on Air King to sell color sets, also on rich return in patent royalties. But major manufacturers make it clear that a lot of litigation will pass through the courts before they pay any extra royalties for CBS color -- if they ever do make field-sequential sets.

CBS, too, is now "one of the boys," from manufacturing standpoint, so can suffer same problems of economic dislocation which affect competitors.

* * * *

FCC has adopted theory of "gradualism" in regard to CBS color. Chairman Coy's ideas are fairly representative of opinions held by other commissioners we've contacted. Here's his sizeup, expressed during colloquy with Senators Johnson and Magnuson at May 29 hearing on his appointment for 7 more years on Commission:

"It will begin something like black-and-white did. I expect some color in 30 days. CBS will probably be first, probably in fringe hours. The public can then buy adapters, or new sets with built-in adapters, or color converters, or complete combination color-monochrome sets.

"You need broadcasts for the incentive to build color sets. I'd think manufacturers would now be in position to make any of these units immediately, since they've been on notice since our order was issued last September.

"I expect Air King to make color sets, of course. And I have reason to believe that one or more of the major manufacturers will find it to be a competitive advantage to break into the manufacture of such sets. This is the most competitive business in the country. None of these manufacturers will let a young upstart become the leader.

"Another thing is the resistance to set-buying currently. The answer to this problem would seem to be: (1) Reduction in prices or cheaper sets, (2) Color. The Supreme Court said so clearly that we weren't arbitrary and capricious that people will expect color.

"Some color sets will be on the market before the end of summer. Colorcasts will begin slowly. I think impetus will come from the sports promoters who will make events available for color and not to black-and-white.

"There is a natural turnover in sets. Next time people buy, they'll buy color. People who bought recently will probably buy adapters or converters. Converters will probably cost $100-$150."

Nothing about "making" stations broadcast color was asked or volunteered during hearing. Several other commissioners say there is no such intention. One said such action might be considered "if there appears to be concerted action to thwart the system by placing artificial barriers in its path." It was pointed out by one staff member that precedent exists, in that FCC required at least minimum hours of programming from black-and-white stations.

* * * *

"Open door" for compatible systems is truly open, Coy insisted during his Senate hearing. Sen. Johnson asked:

"Suppose I invented an improved system and I wanted to get the right to broadcast it. Would the door be closed, the situation frozen?"

Coy answered: "The door is not closed; it's never closed. We couldn't, if we wanted to, prevent a new development in the public interest. We wrote into our order the procedures whereby new systems would be considered. We said we're not foreclosing a new system. We said you must have field tested it and developed it to the stage where it has a reasonably good chance of replacing the one we adopted. We authorized experimental operations. I don't think that's foreclosing such systems."

"Is your decision likely to speed up a compatible system, now that you've adopted a color system?" asked Sen. Johnson.

"I think it's self-evident," Coy replied, "that the decision will give new impetus to such developments. We've had promises before. The RCA system came in under forced draft when we invited 6-mc color proposals."

"My feelings exactly," said Sen. Johnson.

Other commissioners have same attitude -- but it's obvious any compatible system will have to be tied up with a pretty red, blue and green bow, with no loose strings, before Commission takes another look. Said one commissioner:

"Remember, we've chosen a system. We've litigated it through the courts. Certainly, we're not going to jump lightly from one system to another. Investments will be made. People will be assuming some stability. Yet we'll always consider new developments. We have to."

Open mind on dual standards, commercializing both CBS and compatible systems, was indicated by another member, who also takes tough "show me" attitude.

* * * *

All-out all-industry work on compatible systems continues unabated. Report of Ad Hoc color committee of National TV System Committee (RTMA & IRE) is now being circulated in the industry (Vol. 7:18).

Members are satisfied that basic job is done, agreed on major principles. They're field-testing individual techniques of handling details, such as sampling frequency, oscillating color sequence. NTSC is inviting all manufacturers to participate in field tests, utilizing colorcasts of RCA-NBC in New York, Philco in Philadelphia, DuMont in Passaic. Motorola is reported installing color gear in Chicago.

Confidence of Ad Hoc members, all distinguished men in their field, is truly remarkable. They're apparently not at all shaken by court decision. They're fully convinced they've got the system, and that FCC must eventually adopt it.

It's manifest there's plenty of uncertainty in highest FCC circles now, albeit flushed with court victory. Commission will stick by its criteria, and "remote pickup" is constantly reiterated fetish. What some industry folk don't seem to appreciate is that FCC people regard an outdoor camera as crux of compatible system. Said one staffer:

"When they've televised a crew race in color, then I'll tell you when the Commission will act favorably on a petition for a new hearing."

Industry experts say remote equipment is minor apparatus matter. Such gear, we're told by the scientists, will be disclosed at proper time.

Two of NTSC's prime movers met with Coy May 31 to present "progress report" on industry's work with compatible systems. NTSC's chairman Dr. W.R.G. Baker (GE) and Ad Hoc chairman David Smith (Philco) came away from reportedly friendly session, after hearing Coy reiterate statement that FCC is obliged to look at new systems after proper development and field testing.

RCA isn't letting up one whit (see statement on p. 6), immediately announced it would hold public demonstrations of its system in New York -- probably piping signals to Washington, too -- and let the public compare.

RCA is throwing tri-color tube wide open to entire industry, has invited 231 receiver and tube makers to June 19-20 technical symposium in New York's Waldorf-Astoria, will disclose complete and latest know-how, tell of plans to make samples of tubes and components immediately available.

Indicating hard row the compatibility boys must hoe, however, is attitude of one commissioner who seemed a little leery about such public demonstrations. "I think it would raise serious questions," he said, "if anyone made demonstrations for the purpose of combatting the system adopted. We don't grant experimental licenses for the purpose of exploitation. Of course, closed-circuit showings would be out of our jurisdiction." There's possibility sample receivers will be offered commissioners to view in their homes.

* * * *

Color story has become quite familiar to public, and newspapers have become quite deft in telling it. Few metropolitan reporters fumbled the story this time. Fact is that, whatever qualms it may currently be giving set owners and prospective purchasers, they've heard and read so much about "color now" that they'll believe it when they see it.

Editorialists were pretty calm and unhurried. Said Washington Post, which

has consistently favored CBS color and which is the co-owner with CBS of WTOP-TV:

"The choice between color and black-and-white broadcasts will then be up to the public -- the appropriate final arbiter in our judgment...If RCA comes along soon enough with a superior 'compatible' method of transmitting color, it will have its chance to win the public's favor."

New York Herald Tribune: "At best, it probably will be a slow process to get enough sets into the hands of the public to make color TV a flourishing enterprise; owners of present black-and-white sets will continue to get years of use from them. To the layman, it seems unlikely that the cumbersome wheel on the CBS set will be a permanent feature of color TV. But the layman has sufficient confidence in the engineering and scientific talent of the nation to believe a convenient and workable system can be devised, whether by CBS or RCA or the combined abilities of both."

New York Times: "Because of the technical changes that must be made in millions of installed sets and because priorities have lately been established to govern the allocation of materials, the introduction of TV in color will be slow... There is still confusion...There will be more research. The public will sit on the improvements that will emerge, and act as its own court, if given a chance to pass judgment. As for the Commission, it was created to act in the public interest. This being so, it can hardly refuse to reconsider, amend, even reverse decisions if they are no longer tenable in the light of technological progress."

COLORCASTING—CHOICE UP TO STATIONS: What the stations will do about carrying color, now that talk of "implementation" and "minimum color hours" has receded at FCC, at present appears to be fairly clear.

It looks like a free choice for telecasters -- for a while, at least -- with CBS facing the tedious and expensive job of persuading reluctant stations to break the chicken-egg cycle. It's anybody's guess how many will go along, but it's clear CBS's best prospects will come when freeze lifts and when its non-compatible system can start from scratch in virgin TV territory.

Big-stick attitude (you-do-as-we-say-or-else) isn't so evident at FCC as formerly. Partly, this is due to sober caution on part of commissioners waiting to see just how much dislocation their decision has wrought. Partly, it's due to staff reorganization (Vol. 7:21).

There's this attitude, too: Why club 'em over the heads until you're sure you have to? Commissioners and staff still can't shake off doubts raised by fact that preponderant industry and technical opinion is opposed to incompatibility, insisting that superior compatible system is in offing.

* * * *

Thus, apparently, nature will be allowed to take its course -- with telecasters lending one ear to CBS, other to compatibility proponents, while keeping both eyes on FCC. Some CBS affiliates will accept some fringe-hour color from cable, making no equipment investments until sure the system is really "in".

But they won't throw out good commercials to make room for color, while competitors stay with monochrome and take advantage of audience desertions to them during the years that few color sets will be in use.

Everybody, including CBS, is carefully assuring public that black-and-white isn't out the window -- will be with us for a long, long time.

Most stations say they have no color plans, or prefer not to talk about color yet -- obviously fearful not only of all-powerful FCC but of loss of audience, and of course mindful of local dealer complaints about reduced set sales.

Radio lawyers and consulting engineers, most of them opposed to any incompatible system, are advising their TV station clients to sit tight, hoping upcoming allocations hearing won't be dominated by the color imbroglio. But they're generally expecting certain commissioners will make it point to elicit rosy promises about colorcasting plans from stations and applicants.

CBS's Washington outlet WTOP-TV, jointly owned with Washington Post, plans to carry color in fringe time at first, following lead of network's New York key WCBS-TV. Manager John Hayes says he's "firmly convinced public will go for color."

CBS's Boston affiliate, Yankee's WNAC-TV, announced it "has ordered the technical equipment necessary to project color programs as they are received over existing circuits from New York."

* * * *

One of sanest appraisals of colorcasting problem from a CBS affiliate is that of E.K. Jett, ex-FCC member and its onetime chief engineer, a calm and savvy gentleman with a fine public service record, who now runs Baltimore Sun's WMAR-TV:

"We will cooperate fully in bringing color to Baltimore," said he. "It will undoubtedly come from the network at first. When sufficient public interest is evidenced, and when equipment is available, we will originate local colorcasts.

"Lack of compatibility is going to be hard to live with for some time, especially in an area like ours which has 375,000 families and 300,000 sets -- very near saturation. I think TV stations will have to maintain a substantial schedule of black-and-white for a long time to come."

Jett then made some pertinent observations, posed pointed questions:

(1) When materials limitations really begin to bite manufacturers, how can they see their way clear to change over to color sets? Color sets will emerge, but won't they be greatly limited in number for some time?

(2) The public won't rush to buy color receivers until it sees what kind of programs are telecast, at what time of day. And certainly, cost has to be right.

(3) Public must be confused by kinds of color sets in prospect. Currently, the CBS system is labeled "mechanical," is said to be limited to small screens. But what of the drum permitting big screens? How about the tri-color tube? Will public want to wait for these promised developments before it buys? CBS's new tube-making subsidiary Hytron is an RCA licensee, may be able to make tri-color tube. Will mere promise of tube restrain potential disc-set buyers?

(4) Public will continue to buy black-and-white at today's bargain prices. Demand lately has tapered off due to normal summer slump, Regulation W, and the fact that saturation is being approached in some areas.

THE COLOR EDICT—IMPACT ON TV TRADE: "Confusion worse confounded" just about describes thinking in TV trade in wake of Supreme Court's color decision and resultant publicity. But attitude of the sellers of sets is well expressed by one of them:

"Let's see the sets; we'll sell anything the public will buy."

What the manufacturers think, is best recounted in their own comments published in comprehensive symposium herewith. They and trade generally are still for compatibility, by and large, but they're watching trade winds (and each other) very closely indeed. There's no stampede to tool up for CBS color; mostly, the attitude is one of "wait and see" how public reacts -- whether there's the "sweeping demand" so confidently expected by FCC-CBS proponents.

Receiver sales were beginning to pick up rather nicely in many parts of the country last few weeks, considering the season, and some slight inroads were being made into inventories -- and then the news broke.

Now business has turned bad again, we're told -- and even fall prospects have been dimmed by this uncertainty, added to Regulation W and other factors conducing to slower buying pace. It's really too early to gauge actual impact of color news, but some manufacturers-wholesalers-retailers are wringing their hands.

This week's trade wasn't good barometer, anyhow, because of Memorial Day.

Wait-and-see attitude arouses natural speculation whether public will go to cost and trouble of adapting present sets (to get black-and-white during colorcasts), converting present sets (to get color in same set or on slave units), or buying such new color combinations as may be offered -- all at a price.

Since today's depressed TV market is a price market, with low-end units at around $200 selling best, tradesmen wonder whether people will pay substantially more for equipment capable of receiving such few hours of color, mainly during fringe viewing periods, as CBS and the stations it feeds will offer.

You get every-which-way kind of answer to this -- the consensus being, CBS

included, that it will take years for color to take hold. What trade fears is that these may be years of the locust so far as selling present-type sets is concerned.

That CBS will turn on promotion heat, goes almost without saying. It's reported in trade circles that big ad splurges have been prepared cautioning public not to buy any TV sets unless they're at least adapted to get color signals in black and white. That could start a round of lawsuits and trade-practice complaints that would keep whole industry in turmoil for months, further confusing public.

The estimated 1,750,000 or more TVs now in inventory aren't so adapted -- though adapter units could be marketed -- and a complete stoppage of buying could spell ruin for a lot of businesses.

The major manufacturers could offer adapters for present sets, which also means service fee to install them. They'll fight back, if CBS promotion hurts their trade, by pointing to FCC Chairman Coy's assurance that door isn't closed to compatible systems, which of course could render CBS system obsolete overnight if adopted.

There's also logical question: Will public wonder why brand-name firms, with great businesses to protect and reputations to maintain, don't make color sets or converters? Will that confuse buyers to point of no sales?

Or will some "upstart" firms, as Coy suggested, seize leadership away from established leaders in the "rush for color" so confidently expected by proponents?

Or will some big boys get on CBS bandwagon without waiting for compatible systems promised by RCA, Hazeltine, GE, Philco, DuMont, Sylvania, other top names?

* * * *

Organized manufacturers' RTMA meets in Chicago next week for annual convention, but they won't do anything giving semblance of "conspiracy" against edict. CBS's Hytron (Air King) is member of RTMA, thus has voice in its affairs. Air King, it's said, also has inventory problem -- and of course Hytron has big stake in receiving and picture tube business, now taking beating due to lowered demand for TVs.

CBS's Hytron ownership, it's clear, means that company, with its "Columbia" brands, will strive to be major factor in TV-radio trade. Yet it could slip into same trade desuetude as others, if confusion means less buying of any kind of TVs.

It's rags or riches for CBS no less than for rest of industry, since it elected to go into the manufacturing field.

STATEMENTS BY PRINCIPALS IN THE SUPREME COURT LITIGATION

COLUMBIA BROADCASTING SYSTEM—"The decision of the Supreme Court removes the last road block to the public's enjoyment of color television in the home. CBS will shortly expand its present color broadcast schedule in New York, and within a few months expects to be producing a substantial schedule of color programs. Many of these will be sent over existing circuits to stations in other cities of the Columbia Television Network. The enthusiasm which both the public and important national advertisers have shown for color television gives great encouragement that this exciting new medium will grow rapidly."

EMERSON RADIO (Benjamin Abrams, president)—"We will not make CBS color sets because we don't think it's the right system. The right system will be a compatible system, and it will be here in 2 years. The Supreme Court decision will have a momentary effect on sales of black-and-white TV sets, but it will be a 7-day wonder. Even Air King [due to be CBS-owned] won't be able to get samples to the trade for 6 months, and mass production is at least 2 years away. Right now, color TV is a great mystery to the public; when dealers begin getting CBS color sets, the public will be able to see the limitations of the CBS system."

RCA (David Sarnoff, Chairman)—"The RCA has always maintained the policy that what is best for the public and the industry is best for its own welfare. That policy we shall always adhere to. We continue to be convinced that the best color TV system for the public and the industry is a compatible, all-electronic, non-degraded system. We have such a high quality system, and we shall demonstrate it to the public within the next few weeks. The public will be given the opportunity to judge for itself."

Statement by RCA May 28

"Now that the Supreme Court has made its decision, RCA will go ahead with public demonstrations of its improved compatible all-electronic system of color television.

"Everyone concedes that a compatible system is more in the public interest than a non-compatible system.

"At the time the FCC made its decision last year, it took the position that there was no satisfactory compatible system. Therefore, it adopted the less desirable non-compatible system.

"RCA has developed a fully compatible, all-electronic color system which provides reception of color broadcasts in black-and-white on the nearly 13 million existing sets, without any change whatever.

"Present set owners cannot receive any picture whatever from the non-compatible color system without buying an expensive adapter. Even with such an adapter they would only receive a black-and-white picture degraded in quality.

"To receive color they would also need to buy an expensive and cumbersome converter.

"Approval of the compatible system would save present set owners about a billion dollars, and would avoid waste of material and labor, which it is vital to conserve in these critical times."

Most Still Oppose Incompatibility

Industry Comments on Plans for Color Television

Following U. S. Supreme Court Decision Upholding FCC Adoption of CBS System

Full Text of Supreme Court Decision Published by Television Digest as Special Color Report of May 28, 1951

SURVEY OF THE TV RECEIVING EQUIPMENT MANUFACTURERS

(Replies to requests for comment, plus digests of comments published in other periodicals)

ADMIRAL CORP. (Ross Siragusa, president)—"There will be color eventually—at a cost, of course—but black-and-white will be with us as the mainstay of TV for at least the next decade. Our own feeling is that compatibility is still basic. It is too early to estimate the whole industry picture yet, but we can say again that we continue to have faith in today's excellent black-and-white television and tomorrow's compatible color."

AIR KING (David H. Cogan, president)—This company will shortly become a subsidiary of CBS, under recent Hytron merger deal (Vol. 7:15, 20), due to be completed next week when it's expected CBS will issue official statement—presumably regarding new "Columbia" brand receivers. Meanwhile, Mr. Cogan told newsmen models of color receivers will be shown at Chicago Furniture Show, disclosed plans for press showing of combination color and black-and-white receiver at company's Brooklyn plant, Mon., June 4.

"We're pretty well along in our tooling for such a set," Mr. Cogan is quoted in May 29 *Wall Street Journal*. "Material problems made it difficult to say when they'll hit the market. Under normal circumstances, it might be 90 days; we may possibly get some sets out by early fall."

How much will they cost? *Wall Street Journal* quotes Mr. Cogan as saying quite a bit more than black-and-white models. He put it this way:

"A color set probably will cost anywhere from 50% to 75% more than a black-and-white receiver with a comparable screen. In other words, a console color receiver with 12½-in. picture screen might run as high as $499; a similar size black-and-white set would retail for about $299." Story continues:

"As for converters, Mr. Cogan says he's not completely sold on them, but his firm may make a couple of thousand later on to see how the public responds to them . . . Mr. Cogan said, too, that Air King probably would make 'adapters,' but the quantity would depend on consumer responses . . . [He] estimates adapters will sell around $39 to $49."

CROSLEY (John W. Craig, executive v.p.)—"We have no plans to manufacture CBS color receivers at this time and are studying the overall aspects of this situation." Crosley had previously announced it has made provisions in some 1951 models for plug-in of converter units, can make converters if there is public demand. In trade press, Mr. Craig was quoted as stating: "We are still not convinced that the CBS system will be the ultimate one."

DuMONT (Allen B. DuMont, president)—"This decision does not alter the general situation in color in so far as we are concerned. We still feel the CBS mechanical color system is not suitable for the public. When acceptable color is ready, it will be an all-electronic system, which is still years away, despite all the progress made in that direction. We have no present plans for the manufacture of CBS-type color receivers."

FREED RADIO (Arthur Freed, president)—Told *New York Times* May 31 that "until consumer demand indicates public acceptance of CBS color, no Freed-Eiseman color receivers will be marketed." Also stated "dollars-and-cents minded" consumer is not now even buying black and white sets in volume. Washington ruling, Mr. Freed stated, cannot in itself make color TV a reality because a successful color transmission service must depend on the huge electronics industry that will manufacture the receiving and transmitting equipment and on TV broadcasters as well as the consumer.

GENERAL ELECTRIC (Dr. W. R. G. Baker v.p. and gen. mgr., Electronic Dept.)—"This [Supreme Court] decision came in same month that NPA placed restrictions on all TV construction projects; when CMP regulations were issued which exclude TV set production from any assurance of having steel, copper or aluminum after July 1; and when the Federal Reserve Board finally refused to ease Regulation W restrictions, which had effectively dropped consumer ability to purchase standard TV receivers to an all-time low.

"Against this background, it is impossible for [GE] to reach any immediate conclusion on its future plans in the color TV field . . . There is bound to be an extended period before the public can expect to have any substantial number of color programs available to it. It is possible [that] during this period a fully compatible system will gain acceptance by the Commission—a system which, unlike the CBS system, will give a black and white picture on every standard TV receiver, of which there are now over 12,000,000 owned and used in the American homes. Both the FCC and the Supreme Court have stated their preference for such a compatible system; the FCC has kept the door open for its consideration and possible adoption. Substantial progress has been made toward its achievement since the FCC color hearings closed.

"If this compatible system is achieved and should ultimately be adopted, then the CBS System will have been, in fact, an interim system, approved by the FCC in order to insure color during this transition period to those who desire to make the necessary investment in this type receiver.

"Against the present background of material, construction and credit restrictions, our company is in no position to estimate the number of persons who can and will buy the CBS type of color TV set. If there are a substantial number we will, as always, be guided by public demand. However, such receivers cannot be reasonably expected in production in the near future, due to needed development time, material controls, and the limited facilities available to us after meeting the requirements of our defense contracts and commitments. Transmittters and, particularly,

studio equipment cannot be realistically anticipated on a production basis at this time.

"To those who now own or may purchase a General Electric television receiver during this interim period, we do make this reassuring statement: If the CBS color system does gain general acceptance, we guarantee that there will be made available at competitive prices for use in conjunction with any television receiver General Electric manufactured after July 1, 1949, a means for receiving color programs originating in your local stations. That is a responsibility which we gladly recognize and which we will make every effort to fulfill within the limitations placed on industry by the present national emergency."

HALLICRAFTERS (Wm. J. Halligan, president)—Statement to press says company "will stand by until we see what the public wants." To *Wall Street Journal*, Mr. Halligan added: "We believe there may be a non-mechanical system soon, either RCA's or somebody else's, and we'd hate to go ahead with new sets or converters that would be obsolete in a short time. We'd be breaking faith with the public if we gave them something they couldn't use for long." To *Retailing Daily*, he said: "We're afraid that the new tooling to produce a color wheel or drum may take a lot of money and, once production is under way, CBS or RCA may come out with a color tube that will render the mechanical apparatus obsolete. I think you'll find every manufacturer in the same boat." Hallicrafters starts fall production line in latter July, with only slight model changes, plans 25-30% lower ouput than last year.

MAGNAVOX (Richard A. O'Connor, chairman)—"We will make color receivers when we can be convinced that the design will give value received to the consumer. We do not feel that the CBS system falls into that category unless some revolutionary improvements have been made since it was last demonstrated."

MATTISON (Richard Mattison, president)—Quoted in N. Y. *Herald-Tribune* as having already started production of "slave unit" converters to receive CBS color on existing sets, with 50 samples ready to go to dealers next week and 1000 per week production planned starting mid-June. Units will have 12-in. screens, will sell for $60 to $75, Mattison stated.

JOHN MECK INDUSTRIES and SCOTT RADIO (John Meck, president)—Via telegram: "Material controls make immediate production color units impossible. Further study required before decision as to exactly when production can begin." Press releases May 28 state all Meck and Scott receivers made since Jan. 1 equipped with adapter circuits for connection to color adapters, quotes Meck as welcoming Court decision as "end to one of the uncertainties that has beset the TV industry" and saying his companies will begin production of auxiliary color units "as soon as possible."

MOTOROLA (W. H. Kelley, sales mgr.): "No comment now."

MUNTZ TV (Don Adams, national sales mgr.)—Quoted in trade press as having already made pilot models and "probably will bring out color receivers in the near future."

OLYMPIC (A. A. Juviler, president)—"We have included converter devices in all of our sets for the past several months, so it would create no great problem in adapting them to receive either CBS or RCA color." Mr. Juviler told *Retailing Daily* Olympic has no plans for producing color equipment right now, but will make adapters and converters if there's definite demand. He added he thought current controversy is "academic" because critical materials restrictions will keep production of color equipment to a minimum.

PHILCO (James H. Carmine, executive v.p.)—"Current Philco TV receivers are engineered for adaptation to receive the color signals in black and white. We have no immediate plans beyond that, but we are continuing our work on an all-electronic system with direct-view pictures."

STEWART-WARNER (E. L. Taylor, sales mgr.)—Press release states all Stewart-Warner sets shipped since last November have been equipped with adapter jack, Mr. Taylor stating: "We will have an adapter to be used with our sets by the time color broadcasting is in general use."

STROMBERG-CARLSON (R. W. Tait, president)—"We have no specific plans in relation to CBS color and believe color telecasting is still a long way off. In any case, it will not replace the present black-and-white."

SYLVANIA (Max Balcom, chairman)—"It's too early to make any plans yet. At the moment it would seem that nothing really has been changed."

TELE KING (Harvey L. Pokrass, executive v.p.)—Announced development of "startling new method of receiving color telecasts on the field-sequential system" with patented unit called "Fadrak" described thus: "No wheel or drum is used, no motors or moving parts, and it can be adapted to present sets without enlarging the size of the cabinet." Mr. Pokrass is quoted as saying the unit will be cheaper than any type of color adapter currently on the market (though no price is indicated), adaptable either inside or outside the set, fitting any size screen. "We will produce Fadrak for use by the public long before there are any appreciable number of color TV shows on the air," he stated, "There would be no point in our going into large-scale production with the development until there is a market for it."

TELE-TONE (S. W. Gross, president)—Told *Retailing Daily* May 31 his firm will begin immediate production of converters "which will enable present black-and-white TV receivers to receive telecasts on the CBS system." Added: "In view of current materials shortages engineers at our Bayway, N. J. plant cannot estimate how soon converters will be ready for sale by our dealers. As of today, we are setting up to produce our adapter-converter combination. Our dealers have been and are receiving detailed instruction labels telling how simple it is to convert present Teletone receivers to receive color programs."

WEBSTER-CHICAGO (C. P. Cushway, executive v.p.)—"We will start, in a modest way, based on demand, to make (1) companion or 'slave' units, under our own name, no private label, and (2) color units for other manufacturers to put in own sets and in companion units." Mr. Cushway stated units will be 10 & 12-in., using lenses to magnify 7 & 10-in. tubes, will sell for about $175. Larger sizes, including drum types, are still in engineering stages, he said. Could produce units "no sooner than 60-90 days." Can't judge materials situation but problems, though difficult, aren't insoluble. Special materials, such as special motors, are needed, which Webster-Chicago won't make but will get from other manufacturers. Company has no plans for adapters to get colorcasts in black and white.

WESTINGHOUSE—No comment because of absence of F. M. Sloan, TV-radio plant manager.

ZENITH—No reply, but spokesmen reported in trade press as having no plans as yet to make color sets or converters.

Color Report Published as Separate Section of This Issue

O'NEIL BUYS KFI-TV FOR $2,500,000: This week's sale of KFI-TV, Los Angeles, like the ABC-United Paramount Theatres merger, may be forerunner of still another major change in management pattern of American broadcasting -- for purchaser General Tire & Rubber Co. is looking to an eventual Mutual Broadcasting System TV network.

Deal to buy Earle C. Anthony's KFI-TV for $2,500,000 cash was negotiated in Washington by 35-year-old Tom O'Neil, chairman of MBS board, son of General Tire's president and manager of its subsidiary Yankee and Don Lee networks and stations. Mr. O'Neil recently negotiated unsuccessfully to buy ABC (Vol. 7:19).

Cash purchase turns over Channel 9 outlet to Thomas S. Lee Enterprises, subject to FCC approval by next Dec. 31. It does not include 50-kw KFI (AM), an NBC affiliate which may or may not be on market and which NBC itself once wanted to buy. Don Lee couldn't buy KFI since it already has an AM in Los Angeles (KHJ).

Purchase does include all leasehold rights, Mt. Wilson transmitter, tract on Mt. Harvard, realty known as Hollywoodland. When General Tire bought Don Lee last year (Vol. 6:52), it sold off TV outlet KTSL to CBS for approximately $3,600,000 -- $300,000 down, $278,000 "rental" per year for 10 years, $50,000 taxes per year.

Tom O'Neil's plans envisage eventual network built around nucleus of Yankee Boston outlet WNAC-TV, New York's WOR-TV, Chicago's WGN-TV, the Los Angeles station (call to be changed); and such other outlets as may be lined up after freeze thaws.

It's highly unlikely, though, any such "fifth network" would be mutually owned, as is MBS, which some have long wanted to convert to private operation.

Costs of TV outlets are coming higher -- at least, those among the 107 pre-freeze pioneers being sold. It's a far cry from the $375,000 paid for Seattle's KRSC-TV, now KING-TV, to CBS's recent $6,000,000 deal for Chicago's WBKB (Vol.7:21), its $3,600,000 purchase of KTSL (Vol. 6:52), and now the KFI-TV sale. KING-TV was sold in May 1949 after owner felt he couldn't continue taking $1000 per month loss (Vol. 5:20). WBKB and KTSL were bought because CBS needs own key-city outlets. And Anthony is selling station that only recently began to show small operating profit.

Only other TV station sales into 7-figure sums were Grand Rapids' WLAV-TV to Bitner group for $1,300,000 (Vol. 7:19) and Washington's WOIC (now WTOP-TV) to Washington Post-CBS (55 & 45%, respectively) for $1,400,000 (Vol. 6:25).

FCC MULLS ALLOCATION LEGALITIES: FCC hasn't yet answered Sen. Johnson's sharp letter regarding legality of TV allocation procedures (Vol. 7:22), but it's likely to do so next week. Commission may not give clear-cut "yes" or "no" reply he wants, but it certainly won't give him delay treatment accorded industry petitioners.

Text of Johnson's letter makes it pretty obvious he doesn't want merely a legal opinion. He wants support for "allocation-by-application" principle, rather than "allocation-by-rule-making" concept now being pursued.

"It seems to me that only chaos can follow procedures which are legally doubtful," he stated. "By persisting in adopting its present plan, the Commission

Copyright 1951 by Radio News Bureau

JUN 11 1951

invites all disappointed parties to take their cause to court, thereby creating further unpredictable delay in lifting of the 'freeze'."

Chaos would follow the Johnson concept, say some of FCC's legalists -- regardless which procedure is legal. Here are the two arguments:

PRO-FCC PROCEDURE: If you have no fixed plan, everyone and his brother will apply for any channel he wants. Neighboring cities will get into the act. Their neighbors will be affected. Soon, each comparative hearing in each city will amount to a complete allocation hearing for whole region, if not most of U.S. This will be an impossible mess, creating more delay than imaginable. Argument goes on:

Upcoming hearing -- starting July 9 and probably lasting all through summer (Vol. 7:20) -- will give everyone chance to poke holes in proposed allocation, show how to correct inequities if they exist. If we persist in faulty allocation despite these hearings, say FCC people, aren't we just as likely to allocate poorly with any other procedure? Why not set a pattern for the whole nation at one time? Our rules permit changes if they're needed.

ANTI-FCC PROCEDURE: The only realistic allocation is one based on assignments where stations will be built. And you don't know where they'll be until people apply. Sure, this will mean some rugged hearings, but not as bad as the FCC thinks. After all, the 107 stations are concentrated in areas of greatest demand; they'll limit "chain reaction" of channel shifts. This argument goes on:

What's more, applicants will have to go through only one hearing, not an allocations hearing and a comparative hearing. And they'll cooperate -- as they did in AM -- to reduce complexity of hearings. Meanwhile, there's big risk someone will take whole allocation to court, tieing up whole nation for years.

So the arguments run, with every applicant fretting to see it settled, once and for all -- and quickly -- because all are now anxious for end of freeze.

* * * *

Sen. Benton (D-Conn.) introduced his revised "educational study" resolution this week (Vol. 7:22). Also backed by Senators Hunt (D-Wyo.), Bricker (R-O.) and Saltonstall (R-Mass.), S.J. Res. 76 includes some remarkable "whereases," such as:

"Whereas television is proving so costly in all its phases, to the point where the public has already invested nearly $4,000,000,000 in receiving sets which may become quickly obsolete, and the broadcasting industry has spent at least another billion in trying to cope with programming costs." Resolution asks:

(1) No grants for 6-12 months, while educational and subscription TV are explored by everyone concerned.

(2) TV licenses to be granted for one year only.

(3) FCC to be "encouraged" to explore subscription TV and, in turn, should "encourage its development in every legitimate manner."

(4) Establishment of a National Citizens Advisory Board on Radio and TV.

UHF EQUIPMENT OUTLOOK STILL BRIGHTER: Uhf enthusiasts got another lift this week as Standard Coil Products Inc., biggest tuner maker, showed off its "easy conversion" strips in Bridgeport, and GE divulged latest station equipment developments.

Standard's week-long showings to its customers and press were probably not only to reveal what it has developed but also to provide its many set-manufacturing customers with ammunition to counter full-page Zenith ads implying Zenith alone can accomplish conversion via strips. Standard's showings were latest in series of tuner demonstrations in range of RCA-NBC "guinea pig" uhf station -- last previous one we saw having been Crosley's (Vol. 7:15).

Uhf strips we saw in Bridgeport are based on precisely same principle as Zenith's, work just as well, as far as we can tell. Two small bakelite strips from unused vhf channel are snapped out of tuner, 2 uhf strips are snapped into their place. Nothing else is added to set.

Strips for top of uhf band -- 890 mc -- offer no more problem than low end, Standard says. And oscillator radiation, once a real uhf bugaboo, is said to be no worse than in vhf where it has been drastically reduced.

Cost of strips wasn't estimated, except that they would be "nominal". Shipments could begin in "few weeks" if orders were received.

List of 66 set makers which have used Standard's tuners was handed out -- including Admiral, Capehart, Emerson, Hallicrafters, Hoffman, Olympic, Packard-Bell, Philco, Stewart-Warner. But company made it clear all these haven't used its tuners exclusively. Nevertheless, it reports that 4,500,000 sets include its tuner.

* * * *

Success in licking vhf oscillator radiation, reported by Standard engineers, makes possible following limits in average sets: 30 uv/m at 100 ft. for Channels 2-6, 60 uv/m for Channels 7-13 -- well under RTMA-recommended 50 uv/m and 150 uv/m.

Zenith engineers were among guests, are tremendously optimistic about uhf. They report good pictures all over Bridgeport, even at New Haven, 17 miles away. Of 60 installations in Bridgeport, majority get good results with vhf antenna, they say. For locations needing vhf and uhf antennas, Zenith has small device, about 2x3x4-in., which acts as automatic switch when signals from both are fed into it.

We also saw new RCA converter which seems to work as well as any. RCA also is reported having designed new broad-band uhf antenna -- a "bow-tie" and parabola combination -- said to be good for whole uhf spectrum.

All engineers long for station at 890 mc. Then, they say, you'd be able to make real comparisons. Apparently, it's no great trick to show good results on single low channel -- but it takes real engineering to run the complete uhf gauntlet.

* * * *

GE now says "12 kw" for its klystron-powered uhf transmitter (Vol. 7:16,18). Originally, it was 5 kw, then 10 kw. In Washington dinner session June 7, attended by heavy turnout of FCC members and staff, consulting engineers and radio attorneys, GE gave full technical and price details on all uhf and vhf equipment.

Cost of 12-kw transmitter is $125,000, including tubes; 20-gain antenna, to provide 200-kw ERP maximum proposed by FCC is $18,000. Total cost of monitoring equipment and accessories isn't estimated, but it runs $13,000-$16,000 for vhf.

For small towns, GE offers 100-w driver of 12-kw transmitter for $37,000.

GE has, for vhf Channels 2-6, 5-kw transmitter at $65,000, 35-kw unit at $140,000. Antennas range from $11,850 for 3-bay to $90,000 for 12-bay.

For Channels 7-13, 5-kw transmitter costs $69,000, 20-kw runs $134,000. And antennas go from $11,630 for 3-bay to $36,750 for 12-bay.

Studio equipment costs for 3 typical stations were given. For station primarily network, also handling films, it's $38,779. For station with 2 sources of live program material and 2 film sources, it's $114,655. Elaborate setup, such as used for network originations, runs $195,186.

"No insurmountable hardships" were foreseen in getting materials during next 6-12 months. As GE engineers put it: A station's equipment takes about same amount of copper needed to wire 3-5 homes, motors to provide fans in a few homes, magnets for a few receivers. Company reports taking uhf orders "every day."

TV-AM FORCES MEET ON COMMON GROUND: How broadcaster-telecaster interests overlap -- not only because of parent-offspring relationships, but because of their many operating and regulatory problems in common -- was exemplified this week at NARTB's separate and joint radio and TV board meetings under old NAB's "one big tent".

Lessened antagonism between radio and TV was indicated in this line from banquet speech by veteran broadcaster Paul Morency, WTIC, Hartford: "History gives no example of one major advertising medium destroying another."

Radio business is holding up proudly, by and large -- so the AM directors reported, though bitterness toward networks for rate cuts still smoulders. The TV youngster, of course, is now flourishing beyond fondest hopes of this time last year -- nearly all stations in operating black, some doing exceptionally well, most being ardently wooed by networks, film interests and, in several cases, would-be buyers.

Overall impression at meetings was that nearly all major radio broadcasters

and quite a few smaller ones still outside TV entertain hopes that end-of-freeze will eventually get them into telecasting field, too.

NARTB's new president is Harold Fellows, ex-WEEI, Boston, and autonomous TV board picked for $15,000 job of TV operations manager 34-year-old Thad H. Brown Jr., son of a late FCC commissioner, Princeton and Harvard law graduate, recently with big Washington law firm. Some 60 of the 107 existing TV stations are now members, providing budget of about $100,000, and drive will continue to get rest to join.

TV board's topmost problem was seen as excess profits tax, which imposes gross inequity on stations because it fixes as their base periods first several years of their existence -- when, without exception, they operated at huge loss. George B. Storer was named to head committee to get better terms for TV.

In session with Ford Foundation's James Young, former J. Walter Thompson executive, agreement was reached on joint effort to build public service shows on workshop basis -- Foundation to pay writers and producers, shows to be offered live or film, sponsored if salable.

Foundation's recent $90,000 grant to educators does not necessarily mean support of FCC Comr. Hennock's current crusade for educationally-owned stations. Nor does it mean Foundation intends to underwrite such stations. Grant was merely to help educators explore educational TV possibilities and present their case.

Board also prepared for "program code" session June 22, to be addressed by Sen. Johnson and FCC Chairman Coy, looking to self-regulation as means of precluding govt. interference. At another session, Sen. Johnson, who is president of Western Baseball League, explained his anti-trust baseball bill, which some feared might be used to block telecasting and broadcasting of baseball; there were assurances no such restraints are intended, indeed that Dept. of Justice would be urged to stop any combined effort to prevent sportscasts of any kind.

Among other subjects considered by the 2 boards (radio board for first time under chairmanship of retiring president Justin Miller, now also general counsel) were the Benton Bill to provide for educational TV and super-board over programs, which NARTB opposes; transit FM, declared illegal by Court of Appeals (Vol. 7:22), appeal to Supreme Court supported by association; Broadcast Advertising Bureau, now embarking on new studies to prove "basic values" of radio; 1952 convention, to be held in Chicago's Stevens Hotel next April; membership, totaling 1461 as of May 17, with hopes still held that ABC and CBS will soon return to fold.

THE CHALLENGE OF FEE-TV TO FREE-TV: Battle royal appears to be shaping up between free home TV and paid-admission TV. First significant shot was fired this week with announcement that June 13 Joe Louis-Lee Savold heavyweight bout in New York will be televised exclusively by theatre TV cable "network".

And there were significant indications that protagonists of the various home subscription TV systems will put on heavy pressure this fall -- with hints even of possible tie-ups between theatre and subscription TV systems.

It's not news that TV has rearranged amusement habits of millions of Americans -- and that motion picture industry has been chief victim of this TV revolution. Sports promoters and college athletic directors, too, in many cases have bemoaned the "effect of TV" on gate receipts.

Yes, TV has made inroads. And now the movie exhibitors and producers, aided by some of the sports promoters, are trying to make inroads on TV -- using TV itself as their weapon.

Until this week, their fight has been passive. Big film producers refused to release films to TV. Some professional and amateur athletic groups laid down rules to govern telecasting of sporting events. But TV continued to make gains at expense of movies, and public continued to get good share of top-flight athletic contests free for the viewing. And this week the dike broke on National Collegiate Athletic Assn.'s "controlled TV experiment" in football, with U of Pennsylvania's announcement that it doesn't care what Mama don't allow, it's gonna have TV anyhow.

Attendance at boxing matches has dipped heavily since TV became fixture in American homes. And as boxing promoters watched the gate drop they hiked video

rates to compensate. Ezzard Charles-Joey Maxim heavyweight championship bout May 30 brought in mere 7,226 spectators who paid $77,319, while Pabst Brewing Co. paid $100,000 for right to telecast fight over CBS-TV.

But the coming Louis-Savold bout at New York's Polo Grounds was snatched right from under Pabst's nose by group of movie exhibitors (including Fabian, Loew's, RKO, United Paramount) represented by Nathan Halpern. Details of deal with International Boxing Club weren't disclosed -- but club won't get anything like $100,000 for rights, unless theatres take a loss, which isn't likely.

Fight won't be carried in New York theatres. In other cities -- including Washington, Baltimore, Albany, Cleveland, Chicago -- picture will be piped directly by coaxial cable to TV-equipped theatres, in effect a giant closed circuit.

Even if all 13 TV-equipped theatres outside New York carry the fight, and charge $1.50 admission, they couldn't take in more than $40,000, New York Times estimates. Actually, most don't plan to hike price, will throw bout in as bonus.

Next week's show, as well as rest of the "series of outdoor fights this summer" announced by Halpern, is being viewed by theatre and sports people as a "trial run" rather than a money-maker. But deals of this type eventually could be very profitable, if public takes to them. Halpern estimates that as early as end of this year more than 100 theatres in 50 cities will have TV installations, with total seating capacity of some 200,000 (Vol. 7:20).

* * * *

Home subscription TV is another contender in fee-TV vs. free-TV contest -- perhaps destined to be a partner of theatre TV. Paramount Pictures, which last week bought half interest in Telemeter coin-operated system (Vol. 7:22), is known to be looking toward eventual tie-up whereby home subscribers could see same shows being transmitted over theatre TV hookups.

Trend toward exclusive theatre TV showings will accelerate until home TV gets a "boxoffice," in view of Zenith's president E.F. McDonald Jr., developer of Phonevision. "If Phonevision is established as a commercial service," he predicts, "the 2 systems -- theatre and home TV -- can together bring these great sports events to millions and at the same time bring new prosperity to promoters."

Another subscription system, Skiatron's coded-card Subscriber-Vision, has high hopes for test run in New York this fall, similar to Phonevision's Chicago tests. Telford Taylor, Skiatron counsel, reportedly visited FCC chairman Coy June 6 to discuss tests, which would go "far beyond" mere use of motion picture films. Plans include at least one Broadway show direct from stage, and lots of sports.

Subscription TV people, as well as theatre TV folk, got plenty of encouragement from NCAA's TV committee, which saw these systems fitting in perfectly with its "controlled TV experiment" -- permitting live telecasting of only one college football game in each area each week, no one college to be featured twice.

But whole structure of NCAA's "experiment" may collapse as result of U of Pennsylvania's defiance. ABC is supposed to have contract to carry 8 home games at price in neighborhood of $200,000, sponsor not revealed.

Penn's defection will probably result in similar action by other NCAA members. Notre Dame, possibly Army, are likely to follow suit. And teams which play Penn this fall before TV cameras run risk of being read out of NCAA, along with Penn. At week's end, Wisconsin, Army and William & Mary said they'd probably play Penn, TV or no TV; Cornell and Navy hadn't made up their minds; Columbia, California and Dartmouth talked about canceling games.

Breakdown of NCAA ban would be blow to theatre TV folk, who were planning to capitalize on shortage of live football TV this fall. But regardless of outcome of this particular skirmish, there are indications a real battle is on. New York Herald-Tribune in editorial June 7 summed up issue thus:

"The success of an extra-charge system...will, of course, depend on the reaction of the public. It is entirely conceivable that people will be willing to pay a special price to see a special event. But it certainly isn't what most of them had in mind when they purchased their seats."

Personal Notes: Don Stewart, mgr. of WDTV, Pittsburgh, assigned to New York to handle film-buying for the 3 DuMont-owned stations; successor not yet appointed . . . John H. MacDonald, NBC v.p. and treasurer, has resigned to become asst. to Ben Tobin, of Hollywood, Fla., big hotel operator and one of group of purchasers of Empire State Bldg.; his duties will be taken over by Joseph V. Heffernan, ex-RCA v.p., recently named NBC v.p. . . . Robert W. Sarnoff, NBC-TV director of unit productions, elected v.p. . . . Henry Ginsberg, ex-Paramount Pictures v.p. in charge of studio productions and operations, joins NBC Hollywood as consultant to John West, v.p. in charge . . . Donn B. Tatum, ex-Don Lee, onetime Blue Network executive, joins ABC as TV director, Western Div., Hollywood, replacing Richard A. Moore, who becomes mgr. of KTTV, Los Angeles; Ernest Felix, asst. treas., named acting mgr., ABC Western Div. . . . Murray B. Grabhorn, ex-ABC sales mgr. and ex-mgr. of WJZ, on June 15 becomes gen. mgr., WPTR, Albany, succeeding Robert L. Coe, who has been acting as management consultant for Schine theatre interests . . . Paul W. White, onetime CBS news chief, recently with *San Diego Journal*, has joined KFMB & KFMB-TV, San Diego, as executive editor . . . Arthur J. Daly, ex-Peck Adv., joins Geyer, Newell & Ganger as TV program mgr. . . . Harold Kaye named head of new TV-radio dept., Dorland Inc. . . . Burke Crotty quits ABC-TV to go into package producing on own, succeeded as executive producer by Ward Byron . . . Oliver Trayz named ABC director of research and sales development in newly consolidated research dept. with sales promotion div., under which separate divisions will handle TV and radio . . . Gilbert I. Berry, Chicago sales mgr. of DuMont Network, resigns June 30 to become sales mgr., WIBC, Indianapolis . . . Richard L. Palmer, ex-CBS-TV, joins N. W. Ayer New York TV-radio dept. as traffic mgr. . . . Wayne Kearl, public service editor, promoted to promotion mgr., KSL & KSL-TV, Salt Lake City, succeeding Sherril W. Taylor, now with CBS Hollywood . . . Leo Fitzpatrick, co-owner of WGR, Buffalo, leaves for Athens June 15 on special mission for State Dept. related to broadcasting . . . Maurice B. Mitchell, v.p. & gen. mgr. of Associated Program Service, elected to board of Muzak Corp. . . . Murry Harris, ex-NBC, recently with *TV Guide*, joins A. C. Nielsen Co. as TV-radio public relations director . . . Roy McLaughlin, ABC central div. sales mgr., elected president of Chicago Television Council; George Harvey, WGN-TV, v.p.; Edgar Greenebaum Jr., TV Shares Management Co., secy-treas.

Station Accounts: Using TV only, sharing time with 4 other products, Bosco milk amplifier increased sales 238% in Cleveland area after just 26-week participation in *Uncle Jake's House* on WEWS, Mon.-Fri. 5:-5:30; end of second 26-week period found sales at plus-346% where they now stand. Bosco Co. has renewed for second year, thru Robert W. Orr & Associates, N. Y. . . . Ruppert's current campaign for its new Knickerbocker brand beer so successful it's planning to increase TV-radio budget and expand coverage of New York, New Jersey, New England, northeast Pennsylvania markets . . . Block Drug Co. (Amm-i-dent toothpaste & powder), in addition to present network TV, plans expanded summer ad schedule, including TV-radio spots, thru Cecil & Presbrey . . . CBS Radio Sales reports sale of *The Cases of Eddie Drake*, film series starring Don Hagerty and Patricia Morison, to WPTZ, Philadelphia, for sponsorship by Old Reading Brewery Inc.; WBEN-TV, Buffalo, O'Keefe's Ale; WTMJ-TV, Milwaukee, Blatz; KPHO-TV, Phoenix, Clark Smith Cars; WDTV, Pittsburgh, Ford Dealers; WNBW, Washington, Ford Dealers; KRON-TV, San Francisco, Tru-l'ak Foods . . . Statler Tissue Corp. (paper products), thru Chambers & Wiswell, and Groveton Papers Co. (Vanity Fair tissues, Blue Ribbon paper napkins), thru John C. Dowd, are sponsors of WNAC-TV, Boston—latter buying *Buster Keaton Show* . . . *Inga's Angle* is twice weekly TV beauty school on WNBW, Washington, sponsored for last 26 weeks (13 each) by Hecht's and Woodward & Lothrop dept. stores, with following cosmetic firms participating: Elizabeth Arden, Dorothy Gray, Harriet Hubbard Ayer, Charles of the Ritz, Helena Rubenstein, Lentheric, Dana, Bourjois, Marie Earle, Revlon, Frances Denny, Barbara Gould, Lanolin Plus, Tussy, Duart, Bonnie Bell, Milkmaid, Corday, Goubaud . . . National Iced Tea Time, July 13-20, conducted by the Tea Council, contemplates TV-radio tie-ins by food advertisers, in addition to heavy use of magazine and newspaper space . . . Bulova Watch, thru Biow Co., to provide dealers with film commercials of varying lengths for use in locally placed TV sponsorships . . . Swift & Co., network TV user, planning to test spots for premium chicken, thru McCann-Erickson, Chicago . . . Among other advertisers reported using or preparing to use TV: Phillips Petroleum Co. (gasoline & motor oil), thru Lambert & Feasley, N. Y.; Jost Jewelry Mfg. Corp. (gold jewelry), thru William Warren, Jackson & Delaney, N. Y.; Perfex Mfg. Co. (cleaning products), thru Buchanan-Thomas Adv. Co., Omaha; Bayuk Cigars Inc. (Phillies cigars), thru Neal D. Ivey Co., Philadelphia; Nunn-Bush Shoe Co. (men's shoes), thru W. Earl Bothwell-Hamilton Adv. Agencies (formerly handled by Calkins & Holden, Carlock, McClinton & Smith Inc.); Miller-Becker Co. (Cotton Club beverages), thru Lang, Fisher & Stashower, Cleveland (WEWS); Little Crow Milling Co. (Coco-Wheats cereal), thru Rogers & Smith, Chicago (WEWS); Locatelli Inc. (cheese importer), thru H. C. Rossi, N. Y. (WOR-TV); Rolley Inc., San Francisco (perfumes) (KPIX); Polaroid Corp. (cameras), thru BBDO, N. Y. (WABD); Royal Crest Sales Co. (household appliances), thru Product Services Group, N. Y. (WABD); Oscar Mayer & Co. (sandwich spread), thru Sherman & Marquette, Chicago.

Network Accounts: Minnesota Mining & Mfg. Co. (Scotch tape), starting June 19, sponsors *Juvenile Jury* on NBC-TV, Tue. 8:30-9, thru BBDO, Minneapolis, occupying last half-hour of time of *Texaco Star Theatre* during summer hiatus . . . Longines-Wittnauer Watch Co. June 11 starts sponsorship of *Longines-Wittnauer Chronoscope*, with Frank Knight as host, on CBS-TV, Mon. 11-11:15 p.m., thru Victor A. Bennett Co., N. Y.; time is vacated by Masland's *At Home Show* . . . Debut of Blatz's *Amos 'n Andy* film series on CBS-TV June 24, on as many stations as can be cleared for Thu. 8:30-9, will be heralded by $250,000 promotion campaign, including ads in *Life*, *Look*, *American Weekly*, *Ebony*, plus tune-in newspaper ads in all cities carrying show . . . American Safety Razor Corp. moving *The Show Goes On* from Thu. 8:30-9 to Sat. 9:30-10 on CBS-TV starting June 16, Thu. time being taken by *Amos 'n Andy* . . . Brown Shoe Co. (Naturalizer shoes) moving *Say It with Acting* from NBC-TV alt. Sat. 6:30-7 to ABC-TV, Fri. 7:30-8 weekly for 5 weeks starting Aug. 3; beginning Sept. 14, show will alternate with *Life with Linkletter*, sponsored by Green Giant Co., during same Fri. time . . . Budweiser replacing *Ken Murray Show* for summer with film series titled *Budweiser Summer Theatre* starting June 9 on CBS-TV, Sat. 8-9, thru D'Arcy Adv. Co., St. Louis; Murray returns Sept. 8 . . . Lambert Pharmacal Co. (Listerine) has bought 7-7:30 Sat. on CBS-TV for fall sponsorship of unnamed show, thru Lambert & Feasley, N. Y. . . . Jessie DeBoth on June 19 starts *Jessie's TV Notebook* on ABC-TV on participating basis, with these sponsors already signed: Clorox Chemical Co., thru Honig-Cooper Co.; Crosley Div., Avco, thru Benton & Bowles; LaChoy Foods Div., Beatrice Foods Co., thru Foote, Cone & Belding.

Television Digest WITH AM-FM REPORTS
1519 CONNECTICUT AVE. N.W. WASHINGTON 6, D. C. • TELEPHONE MICHIGAN 2020
Trade Report
June 9, 1951

TV OUTPUT FALLS TO 1950-51 LOW: Receding tide of TV production, expected to fall to still lower ebb in ensuing weeks, is indicated by output of only 53,966 units (2715 private label) during week ending June 1 -- lowest for any week since start of 1950, with exception of one vacation week last summer. Factory inventory was 593,633, only about 4500 less than at end of preceding week (Vol. 7:22).

Thus, total production first 5 months of 1951 was approximately 3,050,000 sets, as against 2,592,000 same months of 1950. Difference, though, is that sets moved all last year as fast as produced; now, total trade inventories are estimated up to 2,000,000 -- boding tough going for manufacturers rest of this year.

Radio output week ending June 1, according to RTMA, fell to 235,236 sets as against 350,323 the preceding week. Radio inventory totaled 307,728 vs. 299,399 week before. Week's radios were: 100,261 home, 110,748 auto, 24,227 portables.

* * * *

Ticklish cash position of some producers is indicated in reports current at RTMA convention this week (verified in cases of 3 companies) that some factories were selling large amounts of components to jobbers. Manufacturers get components at much lower cost than do jobbers, so latter get good deals. Such sales presume parts won't be short this fall and winter, still matter of conjecture.

There was talk at Chicago, too, that several TV-radio factories had shut down receiver production entirely, may stay shut down through usual summer vacation periods in July, then resume only warily if inventories go down and trade outlook improves. On other hand, GE was said to be turning TVs out at high rate, and warehousing them against expected shortages. And Packard-Bell was put in "top producer" category by envious colleagues when it reported one line still going day and night.

Notes from This Week's RTMA Chicago Convention

More than 80% of RTMA members belong in small business category—employing less than 500 men. Thus, small business conference at RTMA convention had wide interest, resulted in setting up task group to study problems and recommend steps RTMA might take to aid members. Among suggestions: (1) Compilation of history book for each company to show military services what its facilities are, what products it makes, what it did in World War II. (2) Establishment of panels of industry experts in various fields to which smaller entities could take their problems for advice.

Newly elected RTMA directors are Harlan B. Foulke, Arvin, and Robert S. Alexander, Wells-Gardner. Robert C. Sprague was renamed chairman, all other officers re-elected. New division chairman are: Set Div., John W. Craig, Crosley, succeeding Glenn W. Thompson, Arvin; Tube Div., R. E. Carlson, Tung-Sol, succeeding Max F. Balcom, Sylvania; Amplifier & Sound Equipment Div., A. K. Ward, RCA, succeeding A. G. Schifino, Stromberg-Carlson. Remaining as division chairmen are H. J. Hoffman, Machlett, transmitters; R. G. Zender, Lenz, parts.

Prestige and morale advertising in trade papers—similar to now-famous Bendix ad (Vol. 7:19)—will henceforth be undertaken by RTMA. Industry leaders feel this type of advertising is needed to hold dealer confidence, will look better over RTMA imprimatur.

RTMA is setting up own statistical dept., will handle all paper work involved in industry reports—set production, tube sales, etc. Association is dispensing with services of Haskins & Sells, which heretofore handled reports.

TV isn't anywhere near saturation, said RTMA chairman Robert Sprague at June 7 luncheon meeting. By early 1952, he foresaw lifting of freeze and, unless materials shortages prevent, an expansion of TV. He recalled 1930 ownership of 13,000,000 radios by 40% of the then 29,000,000 families, yet in 1950 the manufacturers turned out 14,500,000 radios. "With a normal replacement market for TV sets, the establishment of 1,500,000 new families a year, the desire for larger screen by those who originally bought small screens, and the purchase of second and even third TV set for the home, the future looks bright indeed."

Of 14 electronics manufacturers failing during last 12 months, 6 were TV-radio makers, according to H. N. Henrye Saller, credit mgr., John E. Fast Co., chairman of RTMA credit committee. Liabilities of 14 bankrupts totaled $4,125,653. Since January, following TV-radio manufacturers have been reported as going through wringer: Freed (Vol. 7:10), Richmond Television (Vol. 7:7, 10, 17), S.M.A. (Vol. 7:18), Vidcraft (Vol. 7:7, 9).

President Glen McDaniel sees 2 major long-range policies for RTMA during next several years: (1) Solidify friends and overcome "suspicions" of Washington officials—in Congress, FCC, other govt. agencies. (2) Work closer with telecasters and broadcasters on mutual problems, since manufacturers "aren't just selling TV-radio sets but are really selling programs."

Canadian RMA has voted to change name to Canadian Assn. of Radio & TV Manufacturers—though cumulative TVs turned out to May 1 has been only 56,284 (Vol. 7:22).

Topics & Trends of TV Trade: "Good old days of 1950" were fondly recalled by manufacturers when RTMA statistics committee chairman Frank Mansfield (Sylvania) officially reported 7,463,800 TV sets were turned out last year at factory value of $1,356,097,822—meaning probable retail plus installation-warranty-servicing trade of at least $3 billion. Also produced were 9,849,300 home and portable radios at factory value of $237,959,088, and 4,740,600 auto radios valued at $123,018,570.

TV unit price last year averaged $181.69 at factory, home and portable radios $24.16, auto radios $25.95.

Picture tube sales last year totaled 8,057,759, up 225% from 1949. Receiving tubes totaled 382,960,599, up 193%.

Beginning July 1, RTMA will handle own inventory-sales statistics, will provide complete figures on factory, distributor, dealer sales. Dealer survey will be conducted by Dun & Bradstreet. Figures will be issued on national basis, won't show city-by-city sales. First dealer inventory figures may be ready July 25, sales Aug. 5.

* * * *

Senate Banking Committee, listening to Stromberg-Carlson's Robert C. Tait repeat plea June 5 for 90-day moratorium on Regulation W, then same 15% down payment terms as housefurnishings, indicated such sympathetic reaction that hopes were lifted that something may yet be done to help TV-radio trade out of present inventory troubles. Several committeemen said they would ask Federal Reserve Board what can be done. Mr. Tait's testimony, as spokesman for RTMA, was heard by Senators Maybank (D-S. C.), chairman; Capehart (R-Ind.), Benton (D-Conn.), Schoeppel (R-Kan.). It was generally same testimony he gave before House committee the week before (Vol. 7:22).

Mr. Tait indicated that as of May 11 ratio of factory inventory to TV sales was 4.99, up from end of April's 1.17, March's 0.35, February and January's 0.25 each; ratio never went beyond 0.53 in all 1950.

The Tait testimony is contained in 19-page statement, with graphs and tables, that sets forth case for TV industry with most detailed economic data yet compiled—copies available from RTMA, 1317 F St. NW, Washington.

* * * *

Misleading TV ads is subject of special bulletin issued June 6 by New York Better Business Bureau president Hugh R. Jackson, pointing out that advertisements by some retailers and distributors don't state what extra charges must be paid for warranty and federal taxes—thereby featuring prices at which TV sets can't actually be bought. Jackson warned that this practice is violation of Federal Trade Commission's radio trade practice rules, which provide that statement describing additional charges must be prominently featured "in immediate conjunction" with advertised price.

———▪———

World-wide patent pool covering entire field of telecommunications was set up June 6 by agreement between Western Electric, AT&T and subsidiaries and IT&T and its subsidiaries throughout the world. Agreement means any patents held by any one of signatories may be freely used by any or all of them. Some of the fields said to be covered by pact: TV (including color); radio, wire & cable transmission; radio transmitters & receivers; radio indication (including radar), direction finding, aerial navigation, instrument landing of aircraft; vacuum tubes, crystals & condensers; automatic telephone switching. IT&T subsidiary, International Standard Electric, owns 33 factories in 22 countries. Only 4 are in U. S. Capehart-Farnsworth is home TV-radio manufacturing subsidiary of IT&T. Agreement runs for minimum of 6 years, may be terminated at end of 1956 by one year's notice.

Merchandising Notes: Price wars this week moved some sets by reason of heavy store traffic, but prices weren't much lower (if at all) than previous inventory-unloading sales had been offering . . . **Macy-Gimbel** price markdowns were mainly consoles and combinations, these being some of June 1 offerings by Macy's: RCA 17-in. combination, cut from $595 to $465; Emerson 19-in. console, $289.95 to $224; DuMont 19-in. console with doors, $589.95 to $499; Stromberg-Carlson 24-in. combination, $975 to $774; Philco 17-in. console, $349.95 to $276 . . . **One sign** in TV-radio section of Macy's read "$10 to $211 off manufacturer's list price—complete line of Admiral TV" . . . **Davega** store in Flatbush, says *Retailing Daily*, displayed Emerson 19-in. in original carton, marked down from $439.95 to $239.95; store spokesman said same set at same price had been displayed for some time but before price war nobody even looked at it. "Now it stops dozens of people and brings them into the store" . . . **Lowering prices of 20-in.** table models indicated in Vim chain's ad in New York June 8 offering unidentified make for $149.95; **Muntz's** same day for $159.95; **American Television**, Chicago, June 7 for $169.50 . . . **American Television** also quoted 17-in. table at $99.50, console $129.50; 20-in. console $189.50 . . . **Raytheon** now giving lifetime guarantee on all parts, except tubes, of TV tuner stage in its receivers . . . **Plesser's** chain, on Long Island, sends truck loaded with TVs through area's big housing developments, offers free trial installations to homes not showing antenna . . . **Good word for auctions** in article in June *Electrical Merchandising* titled "TV Auctions Move Trade-ins Fast"; tells how Chicago northside retailer R. H. Television Sales advertised 7-in. trade-ins as low as $29.95 but couldn't move them, then had auctioneer come in and sold some as high as $80 (good for color conversion, was pitch) . . . **E. F. Hutton & Co.**, brokers, states "market for air-conditioning in metropolitan New York is reported to be less than 8% saturated, compared with 65% for TV".

* * * *

Extent of installment credit drop is indicated in Federal Reserve Board report for April, showing fourth consecutive month of decline. Installment credit by TV and other household goods dealers dropped $79,000,000 from month before, by auto dealers $16,000,000. In contrast, there was $25,000,000 rise in loans repayable in installments made to finance retail purchases. April drop meant that 6 months since October showed nearly $500,000,000 decline in total debt for retail installment purchases, as against more than $2,000,000 increase in preceding 6 months. At beginning of May, FRB states, total volume of consumer credit outstanding was $19,121,000,000 vs. peak of $20,093,000,000 last Dec. 31.

RTMA Trade Practices Committee, scheduled to meet with Federal Trade Commission June 21 (Vol. 7:22), will recommend that new rules include definition of what constitutes false advertising of color sets and uhf. Committee headed by Emerson's Benjamin Abrams got board go-ahead on this and number of other proposals.

* * * *

Hearing on community antenna system (Vol. 7:2, 7, 11, 21) by a state public utilities commission, first yet, has been scheduled in Wisconsin. System involved is that proposed for Rice Lake by Edwin F. Bennett, 511 W. Knapp St.

Admiral assures trade in page ad in June 11 *Electrical Merchandising:* "No New Midseason Line—Present models will be continued until introduction of new 1952 line next January".

Philco has joined Rensselaer Polytechnic Institute's cooperative program for training scientific personnel; also has tieup for training and exchange of technological data with MIT.

Financial & Trade Notes: Among officers' and directors' stock transactions reported by SEC for April: **William W. Trench** gave 10 GE as gift, holds 252; **Frank A. Hayden** bought 100 Indiana Steel Products, holds 1500; **Joseph V. McKee Jr.** bought 1000 National Union (Nov., 1950), holds 1000; **Kenneth C. Meinken** bought 7500 National Union (March), holds 35,000; **Adolphe A. Juviler** gained 8240 Olympic through stock dividend, holds 90,640; **Richard C. Noel** gained 121 Olympic through dividend, holds 1333; **Percy L. Schocnen** sold 200 Olympic, gained 2240 through dividend, holds 24,700; **Morris Sobin** sold 800 Olympic, holds none; **Herbert J. Allemang** bought 100 Philco, holds 100; **James T. Buckley** gave 200 Philco as gift, holds 22,385; **Thomas A. Kennally** sold 500 Philco (March), hold 25,474; **Fred W. Rombach** gained 255 Philco through dividend (Dec., 1950), holds 5328; **William B. Yoder** gained 57 Philco through dividend (Dec., 1950), holds 1181; **Herbert I. Markham** sold 100 Sangamo Electric, holds 2500; **Richard L. Bowditch** bought 85 Sylvania (Dec. & March), holds 100; **James P. Hale** bought 50 Sylvania (Dec., 1949), hold 175; **John B. Merrill** gained 34 Sylvania through profit-sharing plan (March), holds 254.

SEC also reported that in April **Isaac D. Levy**, CBS director and one of its founders, sold 5000 CBS Class A, retaining 26,826 Class A and 20,475 Class B. This week, New York Stock Exchange reported that in May he sold the 26,826 Class A and 15,179 Class B, retaining 5296 Class B. He has resigned as CBS director (Vol. 7:22).

* * * *

Dividends: **Admiral**, 25¢ payable June 30 to holders of record June 18; **Bendix Aviation**, 75¢ payable June 30 to stockholders of record June 6; **Avco**, 15¢ payable June 20 to holders June 1; **Muter Co.**, 15¢ payable June 30 to holders June 15; **Indiana Steel Products Co.**, 20¢ payable Sept. 10 to holders Aug. 8; **Corning Glass**, 25¢ quarterly, 87½¢ quarterly preferred, both payable July 2 to holders June 18; **Arvin Industries**, 50¢ payable June 30 to holders June 18; **Zenith**, 50¢ payable July 31 to holders July 10; **WJR The Goodwill Station Inc.**, 10¢ payable June 20 to holders June 14.

Cornell-Dubilier reports sales of $17,221,493 for 6 months ended March 31, up 68% from $10,237,040 same period year before. Net profit was $940,217, or $2.13 per share, vs. $554,349 ($1.21). For March 31 quarter, sales were $9,224,746, profit $606,508 ($1.39) vs. $5,436,316 and $246,141 (53¢) same 1950 quarter.

———■———

Trade Miscellany: **Fire at Hoffman** No. 3 plant in Los Angeles June 5 caused estimated $300,000-$500,000 damages, started in incoming inspection quarters, raced through shipping and administrative areas, demolished stockroom . . . **Raytheon** has sold its subsidiary Russell Electric Co., Chicago manufacturer of fractional horsepower motors, heating elements, thermostats, etc., to Charles Frost, New York City . . . **Crosley** plant at Richmond, Ind. (refrigerators) lays off 122 workers, about third of force, due to cutbacks in materials; early in May 800 were laid off, and TV-radio plant in Cincinnati for several months has been working at much reduced capacity . . . **Allied Electric Products** reports summer vacation shutdown June 30-July 16 . . . **Sylvania** TV-radio div., Buffalo, reports 25% expansion of space to meet backlog of defense electronics orders, now some $20,000,000; $275,000 addition is near completion and $400,000 plant is in planning stage.

RTMA now has 330 members, compared with 314 last year, took in $249,690 in dues, spent $268,212 during fiscal year ending July 31. Budget for next fiscal year is set at $440,000—with $485,000 expected from increased dues, more members. During last fiscal year, RTMA spent some $40,000 in connection with FCC color hearings.

Mobilization Notes: First definitive military procurement figures for electronics-communications were revealed June 7 by DPA acting administrator Edwin T. Gibson to RTMA Chicago convention. As of May 1, he stated, military had obligated $2.482 billion under 1951 fiscal appropriations (out of approximately $4.1 billion set up for this category). Estimates for fiscal 1952 (July 1, 1951-June 30, 1952), based on overall military budget of $60.65 billion, of which $29.7 billion is for procurement, come to $3.6 billion (Vol. 7:18).

Backlog of orders as of May 1, said Gibson, totaled $2.784 billion, including pre-Korea orders with long lead time. Expected rate of deliveries will be $881,000,000 during fourth quarter this year—"with much, much more to come in 1952." (RTMA chairman Robert Sprague has said electronics-communications deliveries will hit peak of $2.5 billion in 1952, recede to $1.5 billion thereafter; Vol. 7:12.)

Speaking of overall military orders, Gibson said: "The flood of deliveries is beginning now; it will increase in volume in the last quarter of this year and reach its peak next year." He added: "The full impact of materials shortages will be felt next year." Nevertheless, he saw brighter outlook for materials:

Steel capacity, 100,000,000 tons last June, is now up 5% and well on way to 20% increase planned. Aluminum, 750,000 tons last June, is now up 14% and on way to 75% increase planned.

Difference between military dollar and civilian dollar, as applied to electronics, was illustrated for first time by Mr. Gibson. Citing "typical 17-in. TV set" as example, he said 86% of its price represents materials costs, only 14% labor and engineering. But: "For a modern airborne fire control equipment, only 49% represents materials, the balance represents the value of labor and engineering." Thus, he noted:

"Price-wise, this complex electronic equipment requires a vastly greater investment of labor and engineering by the end-product manufacturer than a comparable home television combination."

* * * *

Approximately 20% of total supply of nickel is earmarked by NPA for non-defense use in June. Electronic tube industry is scheduled to get 180,000 lbs. this month for both military and civilian use, as compared to 200,000 last month and average 283,000 lbs. monthly last year. For TV-radio use, magnet manufacturers will get about 20,000 lbs. in June—unchanged from May—enough to match their 30,000-lb. ration of cobalt, or about 25% of average 1950 monthly use.

Some 600 applications for allocations of steel, copper and aluminum under Controlled Materials Plan had been received from electronics manufacturers at week's end by NPA Electronics Div., with possibly 300 more expected. No allocations have yet been made by the division, although it was understood that they may begin next week.

Trade Personals: Henry T. Roberts, manufacturers representative, appointed Majestic Radio v.p. in charge of private-brand contract sales, with offices at 743 N. LaSalle St., Chicago, and at Wilcox-Gay plant in Charlotte, Mich. . . . **Ovid Riso**, Philco International adv. & sales-promotion mgr., appointed v.p. in charge of adv. . . . **Jack L. Hobby**, ex-Capehart-Farnsworth and Andrea, appointed public relations asst. to Raytheon president Charles F. Adams . . . **David P. Higgins** elected Hallicrafters v.p. in charge of govt. contract div. . . . **Joseph Grossman** appointed mgr. of Sentinel TV Sales Distributing Corp., succeeding v.p. Joseph Bonnem, resigned because of ill health . . . **Tom Jacocks** named GE tube div. special representative in Washington.

Telecasting Notes: United Auto Workers (CIO) wants in on TV, too, plans to apply for Detroit outlet (presumably one of 3 uhf proposed, since all vhf are already occupied); meanwhile, it's buying weekly documentary on WWJ-TV, Tue. 7:30-8, conducted by own commentator Guy Nunn, starting June 19. UAW went heavily into FM, now wants to drop Cleveland FM, saying its Detroit WDET-FM provides ample coverage there. It also contemplates other TV applications . . . NBC-TV network billings for May expected to exceed AM network billings first time; PIB figures due in few weeks. *Variety* reports NBC-TV now sure to move into black ink by end of this year, as against $2,500,000 loss last, thanks to SRO on time commitments for fall-winter, good summer schedules, 30% rate hike effective July 1 . . . Bernice Judis, who runs big New York AM independent WNEW, never has liked TV anyhow, really got riled this week when Xavier Cugat, on DuMont, grimaced and made remarks that seemed derogatory to radio—so she has ordered his recordings banned from all WNEW disc shows; Cugat, contrite, told UP: "I am only a band leader who tries to make with the jokes sometimes. I certainly meant no harm, as some of my best friends are in radio" . . . Overflow crowd at this week's commencement exercises at Washington U, St. Louis, watched ceremonies on battery of 8 TV sets on campus, featured pictorially in newspapers this week . . . Baltimore Markets chain's "last word" in super-market, in Philadelphia, includes TV lounge for tired shoppers as well as haberdashery, gas station, glass-enclosed bakery, etc. . . . WNBT begins telecasting June 11 from new Empire State Bldg. multiple antenna (Vol. 7:2, 19), WJZ-TV due to start June 26, other 3 (WCBS-TV, WABD, WPIX) due by end of July; date for WATV is undetermined. Engineers say that at least 3 uhf stations (total proposed for New York) can also be handled . . . ABC increases night rates of its own TV stations, as of Aug. 1: WJZ-TV, from $3100 to $4000; WENR-TV, $1650 to $2000; WXYZ-TV, $1100 to $1350 KECA-TV, $1650 to $2000; KGO-TV, $600 to $850 . . . Milton Berle's third "telethon" for Damon Runyon Memorial Fund was to run from 12 noon Sat., June 9, to 10 a.m., Sun., June 10, from NBC studio 6B.

Two vhf and one uhf application filed this week brought total pending to 410, as WHEB, Portsmouth, N. H., voluntarily dropped application for Channel 5. John L. Booth's WJLB, Detroit, applied for Channel 6; KRIS, Corpus Christi, also seeks Channel 6; WEXL, Royal Oak, Mich., asks for uhf Channel No. 62. New application for experimental TV was filed by Conestoga Television Assn., Lancaster, Pa., group of RCA engineers who once relayed Philadelphia programs to members with TVs but whose license was revoked last February (Vol. 7:5). [For details about foregoing applications, see *TV Addenda 12-V* herewith; for all TV applications, see *TV Factbook No. 12* with Addenda to date.]

Applications for construction of TV-radio stations under NPA order M-4 (Vol. 7:19-20, 22) will be processed in Washington, NPA announced June 4—correcting previous announcement that certain field offices would be authorized to act on applications for this type of construction which involve less than 50 tons of steel or less than $1,000,000 in construction costs. Applications may still be submitted at field offices, but will be forwarded to Washington for action.

TV has depressed attendance at college football games, U of Chicago National Research Center concludes in survey prepared for National Collegiate Athletic Assn. Survey, made public June 8 by NCAA, found that last year "colleges in TV areas dropped about 4% from their normal attendance, while colleges outside those areas gained 4%."

"I did not become president of NBC to preside at the dissolution of the NBC radio network." Thus, NBC's Jos. McConnell answered June 7 demand of Affiliates Committee, organized following network rate cuts (Vol. 7:16-17), that networks state their position on radio (Vol. 7:20). Supporting stand that NBC intends to "maintain network radio at highest possible level," McConnell cited huge investment NBC has made in Sunday night Tallulah Bankhead *Big Show* extravaganza, recent sales promotion activities, forthcoming economic study of network radio by committee of affiliates (Vol. 7:20).

Further reassurance that United Paramount has no thought of dumping ABC radio in favor of TV after projected merger gets FCC approval (Vol. 7:21) is this statement by President Leonard Goldenson to June 4 *Sponsor Magazine:* "Despite any rumors you may hear, we definitely will not get rid of the radio network. On the contrary, we will devote our energies to building the radio network. We will not sell radio short . . ." On June 6, United Paramount board approved merger, set July 27 for stockholders' ratification meeting.

FCC closed down illegal TV station in Madisonville, Tex., suspended licenses of 2 amateurs involved—Henry W. Menefee, Madisonville, and Lawrence W. Peay, Ada, Okla. Station had been picking up and rebroadcasting signals of KPRC-TV, Houston, some 60 miles away. Commission was ready to crack down on another outfit in area but dropped action when it learned operation was community antenna.

Radio Writers Guild, in letter to FCC chairman Coy June 1, called for FCC investigation of "blacklist" it claims is maintained by "some networks, agencies and sponsors," allegedly depriving TV-radio writers of jobs for reasons "unrelated to writing ability or professional experience." Specifically named in letter are CBS loyalty questionnaire and "Red Channels" pamphlet.

WJR, Detroit, has elected 3 new directors, following May 28 death of G. A. (Dick) Richards, chief owner (Vol. 7:22). President John F. Patt announced them as follows: Worth Kramer, v.p. & gen. mgr.; Selden S. Dickinson, gen. counsel; F. Sibley Moore, son-in-law of Mr. Richards, also elected asst. treasurer.

Fraud by TV, radio or wire is placed in same category as postal fraud in H.R. 2948, amending title 18, U. S. Code, passed by House June 4 and now before Senate. Maximum punishment is 5 years imprisonment, $1000 fine.

———■———

Trade journal of newspaper business, *Editor & Publisher*, in June 2 editorial warns comic strip syndicators they better think twice before allowing dramatization of their comic strips on TV. "The newspaper-TV battle," it states, "is not merely a fight for the advertisers' dollar, as was the radio-newspaper fight primarily. This is a contest for the readers' time in which no holds are barred" *Editor & Publisher* itself has published numerous surveys and statements to show TV's effect on newspaper reading has been nil, as has *Television Digest* (Vol. 6:19, 38; Vol: 7:5). Its editorial grows out of May 26 story that *Bayonne* (N. J.) *Times* billed United Features for fee after Al Capp's *Li'l Abner* mentioned recent Milton Berle TV show. Note: Comic book publishing house, Whitman Publishing Co., has signed contract for new monthly comic book titled *The Range Rider*, based on CBS-TV show of same name.

Study of 168 newspapers in 62 TV cities indicates circulation gains since 1948—75% of morning papers and 81% of evening showing increases. In 1950, record TV set sales year, total circulation of newspapers studied went up to 31,000,000 as against 30,360,000 in 1948, according to Geyer, Newell & Ganger Inc., which made study.

Color Report
June 9, 1951

COLOR WAR AWAITS SETS, SHOWS, SALES: Basic color picture hasn't changed much in the fortnight since Supreme Court decision. It shapes up as series of running publicity skirmishes until CBS unleashes its biggest guns when it goes commercial June 22, or thereabouts, and RCA counters with public demonstrations of its own system "in early July." Main battleground will first be New York area.

But all this will still be just publicity. A realistic showdown isn't seen likely until people can walk in and buy color apparatus and make clear, by their purchases over a period of time, whether CBS-type color warrants a mass production industry -- and can stand the gaff in a "price market."

Even then, a compatible system may be placed before FCC in such an attractive package that the Commission must carry out its promise to reopen whole issue, regardless of incompatible system's status at the time. Meanwhile --

* * * *

(1) It's obvious that color sets aren't here yet, won't be cheap when they do come. Authority for that is Air King itself, soon to be "CBS Columbia Inc., consumer products division of CBS."

(2) CBS is counting on slim initial colorcasting fare to precipitate big promised demand for sets. That's apparent in its proposed color schedule, which is carefully set up to minimize black-and-white dislocation.

(3) Mass of manufacturing industry, despite fact current trade is badly shot (see Trade Report), has become sold on all-industry compatible system, hasn't been panicked into climbing on CBS bandwagon.

* * * *

Price of Air King's color sets, shown to press June 4, came as surprise, in light of CBS's consistent "inexpensive" talk. TV-only 10-in. consoles, with magnifiers giving 12½-in., will run $400 & $500, depending on style. And these have only manual switch to go from color to monochrome.

"Early September" deliveries of sets, to be called "CBS Colorvision," are promised. Company says it recognizes gamble in tooling for color in face of possible materials shortages. It has no present plans for converters or slave units.

Black-and-white sets will remain basic, because of price, even Air King officials are telling trade. Though confident color sets will sell like hot cakes, they're no less positive than rest of industry in saying that black-and-white will continue to be industry's main product for long time to come. Adapters, to enable past and present black-and-white sets to receive CBS color in monochrome, will be built -- cheap, they say.

When new CBS subsidiary will make drum sets instead of disc type, so as to get bigger pictures, wasn't indicated. Air King also takes dim view of tri-color tube, saying Hytron is working on one of its own to be used whenever practical.

Color demand is enormous, says Air King, but it also reports great increase in black-and-white business and dealers clamoring for franchises. Company reports it now has 35 major distributors, and is "closing up weak spots" elsewhere. About 35% of business is private label, including Sears Roebuck.

* * * *

Paramount's "Chromatic TV" seems to promise earliest date, July 1, for combination color-monochrome sets. These will be built around Lawrence tri-color tube (Vol. 7:22), which officials admit doesn't give quite as sharp a picture as disc but permits pictures 17-in. and 21-in. or larger.

Chromatic's plans don't seem very clear. It has no distribution setup, is cagey about production facilities. Tieup with big department stores is possible.

Copyright 1951 by Radio News Bureau

First offering may be AM-FM combination which could cost up to $1000. New York will be first market -- for "several thousand."

Company says CBS has spurned offer of tube. CBS denies that, says it was never offered. But Paramount feels some big firms will be buying it soon, claims it can be mass-produced much more easily and cheaply than RCA's.

Among other manufacturers in the CBS color act: Tele-tone reports that slave converters will be available for "under $100" by Aug. 1; Tele King says it will go into production "soon" on color-producing "Fadrak," described only as a plastic panel that is "wired directly to the body of the receiver"; Muntz claims that color production activity has already begun. And there's the inevitable flock of fringe operators, unknowns who promise everything -- including one advertising "color adapter" for $14.95 "to convert black and white TV to color."

* * * *

CBS's colorcasting schedule, as tentatively proffered affiliates, starting June 22, date of Supreme Court mandate: 10:30-11 a.m. & 11:15-11:45 p.m. daily plus 2:30-3 p.m. Saturdays. Among shows reportedly planned are color repeats of portions of regular Godfrey, Big Top, Ed Sullivan shows.

Some 25 sponsors are said to be lined up, to pay $300-$400 an hour for time and facilities. Included are major advertisers, many of whom have been given color demonstrations of their products (Vol. 7:11,14).

CBS's problem is how to make these sponsors stick when publicity value peters out -- which many think is bound to happen before size of audience can grow to anything worthwhile.

* * * *

No break in industry front was apparent at RTMA convention in Chicago this week. Top-level executives heard GE's Dr. W.R.G. Baker and Philco's David Smith describe work of NTSC's Ad Hoc color committee (Vol. 7:1,18,22), agreed to throw weight into development of projected all-industry "composite" system.

Some companies have their own ideas about methods for building upon basic principles of NTSC plan, which majors have accepted as better method of producing color -- giving rise to speculation about schism among manufacturers. Actually, no break is apparent between RCA and others on Ad Hoc committee -- DuMont, GE, Philco, Hazeltine, Sylvania -- but it's apparent the others don't want system to bear "onus" of FCC attitude toward RCA.

Hence they refer to "composite, compatible, all-electronic system," though it is said by members to be basically the same one RCA promises to show in July.

No one knows when FCC will be asked to reconsider compatible system. Field testing certainly will take some months, and public reaction to demonstrations of RCA system, which embraces Ad Hoc's recommendations, will be watched closely.

GE announced that it will begin test colorcasts, in Syracuse, "as soon as possible," using still pictures at first, live programs later. NTSC will be reorganized into 8 panels June 18, for coordinated attack on problems. Plan is to bring perfected system to Commission's attention by end of this year.

Added impetus for other manufacturers will come with RCA's June 19-20 New York symposium on tri-color tube (Vol. 7:22), right after which 17-in. samples will be made available to licensees and during which 21-in. model will be shown. RCA will telecast its system for many showings to public, press, technical bodies -- first in New York, then in other cities via coaxial and microwave. RCA Chairman Sarnoff sails for Europe June 15, leaving direction of company's "color campaign" in hands of committee headed by president Frank Folsom.

But "it's a race against time," as chairman Robert Sprague frankly warned RTMA members. He pointed out that if CBS sets or converters sold in any quantity, compatible system would face problem of being "incompatible" with CBS system -- as FCC's own decision said in declaring "open door policy" on compatibility.

This time factor may induce RCA, or someone else -- if industry progress seems too slow -- to go to Commission on its own system even before whole industry agrees on all system details.

No RTMA-sponsored anti-CBS advertising campaign is in the works, though RTMA plans brochure to give dealers its evaluation of color situation. Individual manufacturers say they intend to slap back hard in big ads, if CBS "plays rough" in its promotion campaign and further depresses their already moribund sales.

Sample of industry ammunition, at this stage of game, comes from Philco's James Carmine, one of industry's savviest merchandisers. In statement to Philco distributors and dealers, he said:

"The situation is exactly as it was last October when the FCC first issued its ruling...We advised all Philco distributors and dealers that even though FCC had approved a color system, actual color signals would be on the air during fringe hours and on a very limited basis. These limited color broadcasts will not interfere with the great TV programs of today...The present firmly-established black-and-white TV service will continue to be the basic system of commercial TV for years to come. [A compatible system], in the very near future, should be ready for field-testing. It will require, however, refinements of the receiver as well as refinements of the color picture tube before it can be presented to the Commission...We firmly believe that this all-electronic color system [will] become the very finest color TV system in the world."

He went on to say that Philco sets now being made are equipped for easy adaptation, thus enabling customers to buy with assurance of protection.

* * * *

Talk of "immediate" color production on any sizable scale by CBS adherents is pooh-poohed by major manufacturers. Sure, they say, anyone can build samples, but it takes 6 months for any serious start on mass production. They point to critical shortage of engineers, who are wrapped up in military developmental work on 5 times as many kinds of electronics gear as in last war. You can't sustain an industry, they say, by a few thousand sales to gadget fans and wealthy novelty-seekers.

Idea of cheap color sets, converters or adapters is just day-dreaming, as far as top manufacturers are concerned. Even Zenith engineers, who built CBS sets for medical demonstrations, claim mere adaptation means almost complete rebuilding of sets now in hands of public, with scarcely any servicemen able to handle the job. CBS disagrees, contends a few adapter designs can take care of all existing sets.

Sets now being built are something else. They can be designed to take adapters later. Matter of fact, Philco's new line (Vol. 7:22) was built just that way. Company says it has adapters for anyone who wants them.

* * * *

Color's impact on sales is hard to figure, simply because business is so bad anyway (see Trade Report). Some say customers' color queries have petered out. Others claim it's just beginning, is one more factor keeping people away.

CBS's forthcoming campaign, countered by RCA demonstrations and possible other counter-campaigns, may leave color-impact element impossible to segregate.

It's not likely FCC will give forth with any "advice to the consumer" -- not in near future, at least.

FCC hasn't distinguished itself in past for acumen about economic trends, or for its knowledge of manufacturing costs or its awareness of current demands on electronics industry. At moment, its policy is also "wait and see," and members now apparently appreciate it too has tremendous responsibility not to dry up an industry. "Gradual evolution" is attitude, and "open door" to compatibility is policy.

* * * *

Press handling of color story remains quite accurate, with few exceptions. One egregious slip was May 29 Chicago Sun-Times headline, reading: "Court Backs CBS, Next Week--Color Video." But later editions read: "Color TV Here But Sets Aren't."

RCA is distributing brochure of reprints of stories and editorial comment from newspapers and trade press throughout country, most showing remarkable grasp of intricacies and implications of complex color issue. It's designed to help distributors and dealers explain things to buying public.

CBS keeps up flow of publicity pending Big Day, carrying on demonstrations

for fashion groups and the like. It is even reported sending Dr. Peter Goldmark to Geneva, where international TV standards are under discussion, in effort to sell other nations on CBS color.

* * * *

Stations haven't had much to say, still sit tight. CBS is undoubtedly getting more gear from Remington Rand to equip its KTSL, Los Angeles, and partially-owned WTOP-TV, Washington, possibly also other outlets.

Remington Rand says it's in good shape to handle orders, has had lots of inquiries lately, but no firm station commitments yet. Company says it has already got its initial costs out, believes potential competitors would have tough time catching up. Delivery of camera ordered now could be made in 120 days, it says.

DuMont says it will accept orders for CBS camera chain, has been building new one easily adaptable to system. GE likewise reports simple adaptability of new equipment. RCA, which once made color camera for CBS, says "no comment" at present.

CANADA'S TV and radio will remain under control of Canadian Broadcasting Corp. if Parliament follows recommendations submitted this week by Massey Commission on Arts, Letters & Sciences. For TV—only 2 stations yet authorized being CBC's (Vol. 7:22)—Commission proposes:

(a) No private stations be licensed until CBC national programs are available, and private stations be required to serve as CBC program outlets.

(b) Financing of CBC's TV programming to come from Federal treasury, with commercial revenue and TV license fees to pay operating expenses.

(c) CBC to exercise strict control over TV stations to avoid excessive commercialism and encourage use of Canadian talent.

(d) Entire question of telecasting in Canada be re-examined by independent body within 3 years after start of regular service.

Commission gave CBC administration 4-1 confidence vote, rejected broadcasters' appeals for separate board to control both CBC and private stations. Report recommended private broadcasters' licenses run for 5 years instead of present 3, and that private broadcasters be granted right to appeal CBC rulings to Federal courts. Commission wants present $2.50-per-set radio license fee unchanged, didn't recommend any specific TV fee.

———■———

Census Bureau's count of 5,120,000 homes with TVs as of April 1950, though more than year old, establishes sort of bench-mark for industry statisticians. Preliminary *1950 Census of Housing Report*, released this week, discloses this number of TV homes (census takers also counted refrigerators, heaters, etc.): 4,376,000 urban dwellings with sets, or 15.8% of urban total; 571,000 rural non-farm homes, 6.8%; 174,000 rural-farm, 3%. Northeast and North Central areas had about 75% of all. Census Bureau count compares with NBC's April 1, 1950 sets-in-use figure of 5,343,000 (Vol. 6:16), May 1 figure of 5,846,000 (Vol. 6:20). Census takers found radios close to saturation—40,093,000 out of 45,875,000 homes (95.6%).

Republic Pictures opens film vaults to TV in deal very much like Lippert's (Vol. 7:17), whereby Petrillo's AFM agrees to release of either old or new films if new musical scores are recorded for TV and 5% of gross receipts from TV is paid to union. Move is first by any member of big MPA. President Herbert Yates has assured exhibitors releases will be only old films, depending on TV revenue potential. Meanwhile, Lippert is leasing 26 films to WCBS-TV in New York, KTLA in Los Angeles (owned by Paramount Pictures) and WGN-TV, Chicago, for reported $70,000, $69,000 & $67,500, respectively.

Paramount Pictures' net earnings for first quarter were estimated at $1,411,000, as against $1,441,000 in first quarter 1950, by president Barney Balaban at June 5 stockholders meeting. Figure doesn't include $205,000 (vs. $597,000 first quarter 1950) in profits from partially-owned companies, principally DuMont in which Paramount has 29½% interest. Paramount also holds half interest each in Chromatic Television Laboratories (Lawrence color tube; 7:22) and International Telemeter Corp. (fee-TV; Vol. 7:22). Balaban said increase in foreign revenues "in the face of a contraction of our domestic market" may be enough to offset higher taxes and amortization charges.

As to TV's impact, Balaban said: "It is now clear that TV has had its unmistakable effect upon our grosses, particularly in those areas of high TV concentration such as New York, Chicago, Detroit and Los Angeles." But change from wartime to peacetime economy—not TV—has been principal cause of movie slump, he added. "With further expansion of television, we can expect its increasing influence on our business," Balaban said, adding that "it need not be an adverse influence." He gave "beneficial interrelationship" between film and TV industries as Paramount's aim, cited successful operation of its TV station KTLA, Los Angeles. Stockholder Benjamin M. Corey charged "bungling" in Paramount's TV and research department had cost company more than $4,000,000 a year, but company officials said only $1,500,000 had been invested in TV research in 7 years.

———■———

Extension of TV network to Miami will take "at least a year," reports AT&T official following ABC announcement this week that it had asked phone company to interconnect Miami's single outlet, WTVJ (Wometco theatres). Meanwhile, further extensions seem to be in prospect between U. S. and Canada. Tests to determine best sites for microwaving TV signals from Buffalo to Toronto were reported in April *Electrical Digest*, Toronto, quoting Harold G. Young, Canadian Bell western area gen. mgr.: "We know we can bring TV in and provide good quality reception, whenever the time comes for its authorization." CBC's Toronto station is due on air in early 1952 (Vol. 7:22). And, NBC has asked that following cities be interconnected next year: Tulsa, Oklahoma City, Fort Worth-Dallas, San Antonio, Houston—microwave route now under study by AT&T engineers (Vol. 7:6, 20).

June 1 sets-in-use reported since NBC Research's "census" of May 1 (Vol. 7:21): St. Louis 293,000, up 4000; Washington 265,250, up 4250; Fort Worth-Dallas 120,736, up 3736; Memphis 87,871, up 2871; Omaha 79,098, up 2298; Miami 70,000, up 5000; Greensboro 69,556, up 2556; Norfolk 69,130, up 1830; Utica 43,500, up 1500.

HIGH TV PRODUCTION OUT FOR DURATION: It isn't "just talk" any more.

Even if demand for TVs should suddenly snap back....even if by some miracle today's inventory glut were to be wiped out....even if buyers began clamoring for every new TV receiving set produced --

Production couldn't begin to approach last winter's boom proportions. Output at 150,000 to 200,000-per-week level is out for the duration of the mobilization build-up period. Here's why:

"Military production is just now getting under way on a big scale. The output of civilian goods is just now beginning to be seriously cut back."

The words are President Truman's, from his June 15 TV-radio address, and they point a finger at the TV-radio industry particularly. Materials limitations and shortages, from here on in, will be every bit as drastic as predicted.

Shortages have slipped in the back door, while trade slump held production down. If demand picks up, present rate of TV production can go up -- but not much.

* * * *

Military orders and production generally are moving forward and the volume is big (Vol. 7:23), albeit not all TV-radio manufacturers are getting enough defense work to offset their civilian dropoff.

The condition is underscored by RCA's announcement June 15 that its big Camden TV plant will be entirely converted to military production after 2-week vacation that begins June 29. And GE, in revealing layoff of 300 of the 900 workers at radio receiver plant in Utica, stated it was due to govt. materials restrictions.

Camden plant employs 1200, begins radar output this fall after engineers have reconverted it. Until then, about 450 workers will go into other jobs, starting July 17; others will be recalled as military production progresses. RCA plants at Indianapolis and Bloomington, Ind. will continue to turn out TVs.

"Govt. orders for critical electronic equipment have reached a volume which requires a substantial increase in manufacturing space and facilities." This statement by RCA Victor v.p., Admiral W.A. Buck, brings President's words closer home.

Signs are same throughout all industry, indicating defense production is beginning to take some of factory space -- and vast gobs of materials -- which would normally be used in TV-radio production. Although wholesale conversion of TV-radio plants to defense is still months off, the big cutbacks in strategic materials are here now and are destined to get progressively tougher.

* * * *

You don't have to be a soothsayer to get an idea of the terrific potential value of the 2,000,000 or so TVs now languishing in inventory -- in light of this drastically curtailed production.

President of Associated Warehouses Inc., Curtice Robertson, estimates that the nation's warehouses are filled to 95-100% capacity, largely with appliances,

Copyright 1951 by Radio News Bureau

JUN 19 1951

including TVs. These may be a drug on the market now, but what will they be worth next Christmas season?

Toughest problem for TV trade during this eerie reconversion period is how to hold onto these sets, prevent distress selling, until that oft-predicted day when they're "worth their weight in gold."

Factory inventories climbed to new high of 621,299 as of June 8, up from 593,299 preceding week's end, RTMA reports. Production of TVs for week was 73,470 (3160 private label), up from 53,969 week ending June 1 (Vol. 7:23), which included Memorial Day hiatus. Radios for week went up to 326,867 from 235,236 preceding week, factory inventory rising to 377,625 from 307,728. June 8 week's radios were 145,131 home receivers, 144,123 auto, 37,613 portable.

* * * *

If you have any doubts about potentialities of trade's big inventories, consider these facts of life about TV production:

Lack of demand has dictated production cuts since March. You didn't hear much squawking about material shortages. But they weren't far behind. If demand had been at peak -- even then there would have been steady decline in TV production through the second quarter. Consumer resistance applied the brake just as material shortages were about to do it.

Future TV production will be dictated by govt. defense production plans -- and, regardless of trade conditions, regardless of war or peace in Korea, the pinch will get tighter and tighter. You can expect this until late 1952, when planners expect mobilization to pass peak, and civilian production to hit comeback trail.

What of the rest of this year? On basis of third quarter curbs, industry couldn't conceivably average even close to 100,000 TVs a week. And fourth quarter can't possibly be better -- overwhelming odds are that it will be worse.

All-out Controlled Materials Plan for fourth quarter will probably cover TV-radio and other consumer durable goods. But it won't mean bigger share of materials. It will simply allocate to manufacturers the metal the Govt. doesn't need for defense production. But consumer goods will still be at the end of the line.

* * * *

Here's the score for third quarter, as adduced from careful checks with govt. production control authorities:

Cutbacks in steel, copper, aluminum -- the basic controlled metals -- will hit directly at TV set manufacturers. But shortages of the rare metals used in TV and radio components -- nickel, cobalt, tungsten -- may hit the hardest.

"Rough, tough and nasty," is how one high control official described the nickel situation. Just this week, NPA sharply stepped up amount of nickel-bearing alloy steel the mills must reserve for defense orders. This leaves less nickel for tubes, speaker magnets, focus devices. And they tell us it's only the beginning.

Tube makers are getting less and less nickel -- and they must use it to make more and more military tubes. What's left goes into civilian tubes. They're scheduled to get 150-180,000 lbs. of nickel in July, compared to 180,000 in June, 200,000 in May, average 283,000 a month in 1950.

Whether tube shortage can be averted this year rests on answers to these questions: (1) How many tubes will set manufacturers require? (2) How big a supply of unbranded stock are tube makers setting aside for future sale?

* * * *

On basis of copper supply alone -- ignoring nickel and the other rare metals -- third quarter outlook isn't rosy. Set manufacturers will be limited to 70% of steel, 60% of copper, 50% of aluminum they used during average quarter of first-half 1950 base period. This includes metal in parts as well as raw metal.

Assuming that 60% copper cut will be the limiting factor -- and, for the moment, disregarding conservation measures -- restrictions would permit production of about 934,000 TVs during third quarter. This is an annual rate of 3,737,000, or 72,000 a week -- based on a flat 60% of average base period quarterly output of 1,557,000 sets.

But conservation will surely enter the picture. So, assuming that conservation, together with concentration on smaller low-end lines, could save 25% of copper used per set during base period -- third quarter could see maximum output of 1,125,750 TVs, an annual rate of 4,503,000, or 86,000 a week. Greater conservation could possibly bring this figure up a few notches -- but, by the same token, other shortages and restrictions could drag it way down.

And there's another joker in the deck. Since consumer goods won't come under CMP third quarter, the 70-60-50% limitations on steel, copper, aluminum may be just another fishing license. They're maximums, not firm allocations.

Govt. production planners say they've cut down CMP allotments of metals in order to leave enough for consumer goods. But if there's a slip-up in their figuring, the cuts may go much deeper.

SPEEDIER END OF FREEZE NOW FCC AIM: Now really bent on hastening freeze thaw, FCC batted vexing freeze problems back and forth almost all this week -- finally assented to hear oral arguments June 28 on legality of its predetermined allocation plan prior to scheduled July 9 city-by-city hearing.

Not that Commission has much doubt about legality -- or wisdom -- of its proposed rule-making and allocating course (see Allocation Report, March 24, 1951). But it insists it has open mind -- "will consider better ideas, if any are offered," to use the words of Chairman Coy.

Looking beyond oral argument, Commission racked its collective brains for techniques enabling speedup. So far, only one idea has gained strong support, but it's doubtful FCC will try it without considerable industry backing. It's this:

Dispense with city-by-city hearing. Let FCC make final allocation on basis of written comments, perhaps after another round of comments wherein all parties fire all guns they've been saving for hearing.

Legality of this procedure is quite sound, say Commission sources. But, as one commissioner puts it: "We'd be called 'a bunch of arbitrary bastards' if we did that by ourselves. It would be pretty hard to get 7 rather gun-shy commissioners to do it. But if the industry liked the idea, there would be no trouble."

Four weeks of scrutinizing comments would produce a final allocation, according to some commissioners.

Whether much of industry would go along with such procedure, is hard to say. Lawyers always incline towards hearings, like to "make a case," to embarrass the opposition, to feel out commissioners. And educational issue probably increases reluctance to drop hearing, because applicants thus have a "common enemy".

Answer to Sen. Johnson's letter (Vol. 7:22) is implicit in grant of oral argument. Also implicit is fact that partial freeze-lifting (Vol. 7:13) becomes impossible pending disposition of legalities.

FCC's authority to allocate by rule-making and to reserve channels are only questions to be argued, Commission ruled. Other contentions were dismissed, such as those of WKMH, Dearborn, Mich. (Vol. 7:18) to effect that parties didn't have full opportunity to participate in rule-making and that proper quasi-judicial hearing hasn't been given the 31 stations involved in channel shifts.

* * * *

Opposition comments filed this week numbered 300-odd, are just about what was expected: Everyone wants a vhf channel, will even quote FCC rules to get it.

[For digests of oppositions, see Supplement No. 72-B sent herewith to all full-service subscribers. Any we've missed will be reported next week.]

Ramifications of original comments (Supps. 72 & 72-A) and oppositions impel people in Commission to contend procedures proposed by FCC Bar Assn., et al., are impractical, legal or not. They insist you can't combine allocations and competitive hearings and still confine them to specific cities, that there aren't enough "fire breaks" (existing stations) to keep such hearings within workable limits.

* * * *

Educators have suffered couple setbacks. (1) Their FCC champion, Comr. Hennock, was nominated to be Federal judge (see p. 4), which may take some of steam

out of their cause. (2) Views of Ford Foundation consultant James Young, favoring use of commercial stations for education (Vol. 7:23), were widely disseminated.

Though educators haven't always been happy with Comr. Hennock, they appreciated value of her vociferous advocacy via public speeches and on FCC bench.

They're plenty disturbed over Young's statement, in letter released by NARTB. He wrote:

"There may develop specialized uses for TV in instructional and cultural material for which we need non-commercial support, just as we need it in other institutions of our society, but the important fact remains that we are committed to a commercial, competitive system of broadcasting in this country, and that through it we will eventually be spending not less than a billion dollars a year in time and talent costs for commercial TV.

"It is this powerful stream of commercial broadcasting which, in my opinion, will be the real impact of TV on this country -- on its level of information, its emotional maturity, and its unconscious behaviour pattern."

Reluctant to bite hand which has fed educators to tune of some $500,000 to date, Joint Committee on Educational TV insists educators mean business. New associate director Ralph Steetle estimates that 10 institutions would be ready to build today, if they could get channels, that another year would bring 10 more.

BETTER FCC-INDUSTRY RELATIONS SEEN: It remains to be seen whether FCC changes mean end to big-stick era of TV-radio regulation and improved relations between the Commission and the broadcasting-telecasting and related industries.

Comr. Frieda Hennock's appointment to a Federal judgeship, resignation of asst. general counsel Harry Plotkin to join top-hole Washington law firm, unopposed confirmation of Chairman Coy by Senate -- all happened this week.

Add promising staff setup of newly established Broadcast Bureau (Vol. 7:18), and it would seem the outlook for fewer brickbats is good. But anything can happen.

Miss Hennock stays until confirmed by Senate, which may take quite a while, inasmuch as New York City bar association is opposing her as "unqualified" for the district judgeship there, to which President Truman appointed her. But Federal nominations aren't usually beaten by such local opposition -- so the radio fraternity is already playing the usual guessing games about her successor.

* * * *

Miss Hennock's departure is frankly welcomed by radio folk -- though her FCC voting record is good. But she's author and prime mover in "educational allocation" plan whereby sizable number of scarce and now-eagerly-sought TV channels, particularly vhf, would be held for institutions of learning. This means that many less available for commercial stations, and probable slowdown of end of freeze.

The brilliant Mr. Plotkin, credited with being architect of some of FCC's get-tough policies, the man who drafted its bitterly controversial color reports, joins Arnold, Fortas & Porter law firm to work mainly on litigation and appellate cases. Former FCC chairman (ex-OPA administrator) Paul Porter is partner in this firm, whose clients include many TV-radio and related interests -- among them ABC, Paramount Pictures, Muzak, Western Union.

Scuttlebutt has Hennock job going to Robert T. Bartley, aide to his uncle Speaker Sam Rayburn and onetime employe of NAB and Yankee Network. But at Democratic National Committee the women's division says the post definitely is earmarked for a woman, though no candidates were indicated. Mrs. Fanny Litvin, with FCC and old FRC since 1928, now an examiner, is supported by Senator Murray, of Montana, her home state, and trade talk has mentioned these other possible candidates:

Neville Miller, onetime mayor of Louisville, ex-NAB president, now practicing radio law in Washington; Edward Cooper, former communications asst. to Senator Johnson's Committee on Interstate & Foreign Commerce, now aide to majority leader McFarland (D-Ariz.); Benedict Cottone, FCC general counsel; Theodore F. Granik, who moderates NBC's American Forum of the Air; Don Fink, editor of Electronics Magazine. Only certainty about appointment is that Senator Johnson will have decisive voice.

MANEUVERING OF THE COLOR PRINCIPALS: Color showdown -- or a series of them -- is yet to come. Crescendo of activity and publicity continues to rise:

June 18: National Television System Committee (RTMA-IRE) reorganizes into panels for all-out assault to perfect details of all-industry system (Vol. 7:23).

June 19-20: RCA reveals all its latest know-how on tri-color tube manufacture to 231 patent licensees, including CBS-Hytron, in New York's Waldorf-Astoria.

June 25: CBS inaugurates commercial color with an all-star show, featuring Arthur Godfrey and piped to Boston, Philadelphia, Baltimore, Washington.

July 9, or thereabouts: RCA begins public demonstrations of its system -- locations and schedules yet undisclosed.

From then on, it's up to public to answer these questions:

(1) What happens to black-and-white sales before color sets appear?

(2) How well will color sets sell when they begin trickling through in couple of months? And how will they affect black-and-white market?

* * * *

But status of compatible system may be an even bigger imponderable. That's up to FCC and probably RCA -- since rest of industry, through NTSC, isn't expected to place its system before FCC prior to fall or winter.

FCC's position was reiterated in question-answer statement released this week. Commission indicated that CBS system is "law of the land," that compatible system will be considered only when it completely fulfills all requirements laid down in original color decision, namely -- petition for hearing must be filed; receiver must be delivered to Commission; signal must be put on air in Washington; system must meet 7 rigid performance criteria (see Oct. 14 Special Color Report).

Nothing new or unexpected in that. But various interpretations have been put on this statement: "Persons with genuine programs of experimentation...may carry on their experiments by securing [appropriate authorizations]. Such authorizations, however, do not permit the rendition of a regular broadcast program service nor may any of the programs be sponsored."

Whether this cramps RCA's style in its off-air public showings remains to be seen. Closed-circuit demonstrations are something else; FCC admits it has no jurisdiction there. Extent and nature of off-air showings will undoubtedly determine Commission's attitude. At least one commissioner has made it clear he doesn't want demonstrations used for "exploitation" purposes (Vol. 7:22).

Comr. Hennock's attitude toward compatible system was reiterated on June 10 Meet the Press telecast when she said she thinks such system is ultimate answer, and wondered whether "it might be a good idea to have dual standards and let the public provide the answer." She also said that present sets won't be obsolete for 5-10 years. Nevertheless, she defended CBS system as a "very great improvement that shouldn't be kept from the public."

RCA's intensity can't be underestimated. Although it goes along with NTSC on color system principles, it apparently feels it's way ahead of the pack, may well come to Commission on its own in near future. But it isn't saying so, yet.

RCA has set up top-echelon committee to handle color in absence of chairman Sarnoff, who left June 15 for 2 months in Europe. It comprises RCA's Frank Folsom, D.F. Schmit, C.B. Jolliffe, Mannie Sacks, NBC's Charles Denny and Frank Russell. And NBC-TV has temporarily detached program manager Ernest Walling for full-time supervision of color programming.

Gen. Sarnoff predicted, in June 13 speech at Chicago's Mundelein College, that black-and-white "will remain the backbone of the TV industry for a number of years to come," said "we hope and believe" FCC will eventually approve RCA system.

* * * *

CBS's gala June 25 color opening, set for 4:30-5:30 p.m., will feature FCC Chairman Coy, CBS's Wm. Paley and Frank Stanton, in addition to network's top stars -- Godfrey, Ed Sullivan, Faye Emerson, Garry Moore, Sam Levenson, et al. Show will be sponsored, participation, probably by stars' regular sponsors.

Regular daily schedule begins June 27, 10:30-11 a.m. & 4:30-5 p.m. with

early afternoon shows added on Saturdays. CBS is said to be dickering with General Mills for regular sponsorships.

Programs will be offered to WMAR-TV, Baltimore; WNAC-TV, Boston; WCAU-TV, Philadelphia; WTOP-TV, Washington.

E.K. Jett, director of Baltimore Sun's WMAR-TV, says he'll carry only morning schedule, can't clear afternoon, will use occasional early Saturday afternoon show. Station has borrowed two 10-in. table sets from CBS, will display them in lobbies of old and new Sun buildings. It has also ordered color monitor from Gray Mfg. Co. No big promotion is planned, Jett says, but newspaper will carry small box inviting public in and will feature news stories on color.

John Hayes, manager of WTOP-TV (55% owned by Washington Post, 45% by CBS), says station will carry morning programs only, will have couple sets for display in station lobby, doesn't plan heavy newspaper promotion.

Expected CBS publicity campaign hasn't broken in full force yet. However, Retailing Daily has story to effect that $12,000,000 promotion was to start June 16, on CBS's own facilities, newspapers and magazines. Story came from Los Angeles, was based on interview with Jack Covel, head of Exclusive Sales Corp., Air King distributor. He said he had conferred with CBS officials, believed that color would be on air in Los Angeles in 60 days, that 12½-in. converter would be available for "about $200," that "we will guarantee in writing, if necessary, that converter units can be installed in a matter of minutes by a serviceman."

Meanwhile, CBS issues news releases daily, quoting glowing tributes from Walt Disney, members of Japanese radio delegation, CBS programmers, etc.

* * * *

Aside from RCA, most outspoken critic of Commission among major manufacturers seems to be Emerson's Ben Abrams. In June 12 talk to Assn. of Customers' brokers in New York this week, he said:

"The CBS system is an imposition on the public. With all its other drawbacks, it will be at least 2 years before color sets can be available to the public generally, allowing for the time required to tool up for mass production. A few sets may be seen next fall, but they will be for demonstration purposes only. Furthermore, to adapt present sets to receive CBS color broadcasts in black-and-white would cost the owner $50 to $100 for an adapter, plus $150 to $200 for a converter to receive color." And he said that such equipment might not pass underwriters' approval.

As for compatible system, Mr. Abrams said: "Its advantages will be concretely demonstrated to the public through comparison of the limited entertainment value of the mechanical color system with great strides made in black-and-white."

Another strong-minded manufacturer, H.L. Hoffman, after attending RTMA Chicago convention (Vol. 7:22), stated: "It would appear that the prospects of harnessing the entire know-how of the electronic industry in the NTSC system is a very good one, and one that will not only protect the retail customer, but give the industry sufficient latitude for future technical developments."

* * * *

The few manufacturers going along with CBS apparently have settled down to carry out color production promises or have merely settled down. Air King, now officially a CBS subsidiary (see Financial Notes), is still promoting its black-and-white sets to the trade, saying they're adaptable to color and uhf. Its color sets, when they do come, will all be disc-type initially, not drum, since company still has to lick problem of splitting or folding up drum for black-and-white reception.

Paramount's "Chromatic Television Labs" hasn't said any more about sets since it promised demonstrations of combination color-monochrome receivers July 1 (Vol. 7:22), but it did announce signing research and development contract with Air Force, covering tri-color tube and "general electronic projects."

Really unusual color angle is that of Majestic. In full-page ad June 14 in Retailing Daily, it announced: "Coloramic" TV -- "It's Magical! It's Spectacular! It's Colorific! You don't need color telecasting in your city to see color on Majestic TV." Majestic turns out to have red-blue-green piece of film which is

placed in front of tube. Colors don't change, have no relation to subject matter, according to company officials. Majestic says it also expects to make film available to trade, to sell for about $10 for 16-in. tube.

A "color guarantee" was offered in New York by big Vim chain -- a contract to supply current set purchasers with adapters and converters at cost. Terms of contract leave Vim well-protected against almost every contingency of price, availability and performance.

Both FCC and RTMA agree that color and uhf should be among subjects of fair trade practices conference scheduled June 22 by Federal Trade Commission (Vol.7:23). It remains to be seen what FCC will recommend, but it's to be noted that Commission offered no "to buy or not to buy" advice in its question-answer statement.

THEATRE-TV 'PREMIERE' SCORES A HIT: America's first theatre TV "network" experiment was a terrific success -- judging from our own observations and from newspaper comments. All 9 theatres in 6 cities presenting the June 15 Joe Louis-Lee Savold heavyweight bout were packed to overflowing, with thousands turned away.

Madison Square Garden, too, was filled near capacity -- 18,000 spectators, an unusual crowd for a non-title fight these days. But success of initial International Boxing Club-movie house effort doesn't fully secure theatre TV's standing as substantial rival to free home TV (Vol. 7:23).

Tremendous publicity attending this "premiere" -- together with fact that bout was postponed twice because of rain to Friday night, normally a good theatre and fight night -- may have had considerable effect on attendance. Ticket sales for fight itself, not telecast at all nor shown in New York theatres, lagged when bout was originally scheduled at Polo Grounds June 13, picked up Friday when it was moved indoors. The 18,000 crowd wouldn't have been very impressive at Polo Grounds.

Nathan L. Halpern, who set up the cable-microwave network, said after show: "This is strong evidence that the public will pay to see programs they want on TV, film or whatnot. This will encourage further development of theatre TV."

Fight was shown in Albany, Baltimore, Washington, Pittsburgh, Cleveland and Chicago. Theatres in Boston, Binghamton, Detroit, Minneapolis were unable to get coaxial line clearances. IBC got percentage of theatres' take, varying from house to house. It didn't amount to much compared to the $100,000 offered by home-TV sponsor Pabst, but all parties emphasized hookup was purely experimental.

* * * *

We saw the show at RKO Keith's in Washington. Line in front of boxoffice began 4 hours before 10 p.m. fight time. By 9:45 it extended more than a city block. We selected 12 people at random, found that 9 of them had TVs at home. Some grumbled about having to pay to see TV -- nevertheless they were waiting in SRO line.

Crowd was cool at first, but warmed up quickly when real action began in second round. By knockout round (sixth) there was much of the vocal enthusiasm of a fight arena in the theatre audience. Most of the audience didn't stay to see the feature picture, although it was shown as part of the bill.

Enthusiasm for theatre TV was apparent in the crowds leaving the theatre. The 15x20-ft. picture, while dim, fuzzy and lacking in depth by movie standards, was superior to home TV, in opinions we heard after the show. And there was certainly more of a feeling of "being in the arena" than with home set.

But theatre TV hasn't established itself by this one event as a big-time competitor to free home TV. More experiments are to follow. Same "network" will screen 2 more IBC bouts in next few weeks: Jake LaMotta-Irish Bob Murphy June 27, Rex Layne-Rocky Marciano July 11. Time alone will tell whether the public will pay to see events which have been kept off their TV screens at home.

* * * *

Surprising angle in fight telecast was fact NBC camera crews shot the fight for the theatres. This plug appeared on theatre screens: "This theatre telecast has been made with the technical facilities of the National Broadcasting Co."

Apparently NBC doesn't want to be left out in the cold if theatre TV does become important factor on the American entertainment scene. It's known also, that

NBC's parent RCA, chief manufacturer of theatre-TV equipment, is developing its own system of home subscription TV.

Leaping into the theatre vs. home TV fray was Zenith's E.F. McDonald, promoter of Phonevision, this week who wrote to CBS president Frank Stanton: "Is the TV industry, manufacturing and advertising fraternity going to sit idly by and do nothing while theatre TV gains a monopoly on the showing of great events? Or are you going to help us establish subscription TV, which will give you a box office?"

Network Accounts: Curtis Circulation Co. *(Saturday Evening Post, Holiday)*, starting June 19 sponsors second edition of *Meet the Press* for 13 weeks on NBC-TV Tue. 8-8:30, thru BBDO, N. Y., occupying first half-hour of *Texaco Star Theatre* time for summer; Sun. edition of *Meet the Press* July 1 moves from 4-4:30 to 7:30-8, will continue to be sponsored by Revere Copper & Brass Co. . . . International Shoe Co. (Red Goose shoes), starting Sept. 1, will sponsor *Kids & Co.* on DuMont Sat. 11-11:30 a.m., thru Westheimer & Block, St. Louis . . . Mennen Co. (shaving products), starting July 6, sponsors *Twenty Questions* on DuMont Fri. 8-8:30, thru Duane Jones Co., N. Y. . . . Walter H. Johnson Candy Co. (Powerhouse candy bar) starts sponsorship of *Flying Tigers* July 29 on DuMont, Sun. 12:30-1, thru Franklin Bruck Adv. Corp., N. Y. . . . National Biscuit Co. (crackers & cookies) in fall takes over sponsorship of Wed. portion of *Kukla, Fran & Ollie* on NBC-TV Mon.-Fri. 7-7:30, thru McCann-Erickson, N. Y.; time being vacated by Ford at end of current run . . . Pall Mall July 6 replaces *Big Story* on NBC-TV Fri. 9:9:30 with *Door with No Name* for summer . . . Kate Smith starts new weekly show Sept. 19 on NBC-TV, Wed. 8-9, with Congoleum-Nairn Inc. signed as first sponsor taking half-hour alt. weeks . . . Gulf Oil July 6 replaces *We The People* with *The Cloek* on NBC-TV Fri. 8:30-9 for summer.

Station Accounts: "Daytime TV's oldest continuously sponsored program," is claim made for Philadelphia Electric Co.'s *Television Kitchen*, cooking show, on WPTZ Wed. 2-2:30, just renewed for another 6 months; it has been running since 1947 . . . Brooklyn Union Gas Co. takes additional half hour, Tue. 2-2:30, on *Market Melodies* on WJZ-TV, New York . . . Coca-Cola Bottlers of N. Y. embark on summer "saturation" campaign on TV-radio, aiming at housewives and teen-agers; using TV stations WCBS-TV, WNBT, WABD . . . Some 52,000 dogs, cats and other pets have been placed in good homes via *Calo Pet Exchange*, oldest sponsored show on KTTV, Los Angeles, Fri. 7:30-8 . . . Continental Oil Co., to promote Conoco N-Tane gasoline & Super Motor Oil, using TV-radio along with some 1000 newspapers in its 22-state distribution area (Midwest & Southwest) in campaign starting this month, thru Geyer, Newell & Ganger Inc. . . . Owl-Rexall drug chain buys *Jeanne Gray Show* on KTSL, Los Angeles, 3-3:30 Mon. thru Fri., thru BBDO, and Cunningham drug chain buys daily *Telenews Ace* plus 2 other daily newscasts on WJBK-TV, Detroit, thru Simons-Michelson . . . Forest City Products Inc., for new Adhesa-Foam food aid, testing TV before national campaign, thru Foster & Davies, Cleveland . . . Lutz & Schramm Inc. (jellies & preserves) using WDTV, Pittsburgh, preparatory to possible expansion later, thru Wasser, Kay & Phillips Inc., Pittsburgh . . . Among other advertisers reported using or preparing to use TV: Special Foods Co. (Jays potato chips), thru Olian Adv., Chicago; Beauty Sales (Shampoo-Curl), thru Barton A. Stebbins Adv. Agcy., Los Angeles; Regens Lighter Corp. (lighters), thru Alfred J. Silberstein-Bert Goldsmith Inc., N. Y. (WOR-TV); Gordon Strubler Inc. (Lathercap shaving brush), thru Sid Robbins Adv., N. Y. (WOR-TV); Mrs. Drenks Foods Inc. (Mrs. Drenks potato chips), thru Stone-O'Halloran Inc., Milwaukee; Jet Wax Co. (spray wax), thru Al Herr Adv. Agcy., Milwaukee (WTMJ-TV); Sheerr Bros. & Co. (Armo apparel interfacing), thru Lane Adv. Agcy., N. Y.

BEST way to stretch TV advertising dollar is to buy into a multiple-brand show, costing more than $17,000 per hour weekly to produce and rating 20 or better. That's one of the significant things NBC learned in its second Hofstra College study of TV audience, announced June 11.

Average TV program produces 15.6 extra customers per product for each dollar invested compared to pull of non-TV advertised item, report indicates. Program that costs more than $17,000 an hour weekly delivers 19.5 extra customers. A show with a rating of 20 or higher delivers 23.5 extra customers. And a multiple-brand show like *Kate Smith Show* or *Show of Shows*—where several brands are advertised on a single program—produces 38.8 and 36.8 extra customers respectively.

Study was based on 5067 completed interviews, including 3648 TV homes, made during last December and January in 16 counties of the 51% TV-saturated New York market. It is chockful of facts reiterating what first study showed last year (Vol. 6:18)—that TV sells merchandise. Some new details about TV audience extracted from study, which NBC plans to take on road soon:

(1) Adult TV set owners spend 135 minutes a day on TV—more time than they spend on radio-newspapers-magazines combined. Set owners spend 61 minutes on radio, 47 minutes on newspapers, 11 minutes on magazines. Non-TV owners spend 16 minutes a day on magazines; therefore, TV cuts magazine reading down by 31.3%. Average of *all* New York family heads—TV owners and non-owners—spends 90 minutes a day listening to radio, 73 minutes watching TV, 45 minutes reading newspapers, 13 minutes reading magazines.

(2) TV families are larger and have a higher income than non-TV families. There are 62 more people per 100 families in TV homes. Annual income of TV families is $664 more than non-TV owners. That adds up to $1.5 billion more income in New York's 2,350,000 TV-owning families (as of May 1). NBC points out that 73.2% of all new cars sold in New York last 6 months were bought by TV families.

(3) TV advertisers on air less than 13 weeks got 9.9 extra customers per month for each dollar invested; those on air more than 15 months got 20 extra customers.

(4) Daytime TV delivers 18.7 extra customers per dollar invested, while night time delivers 18.6 extra customers.

* * * *

TV saturation of at least 51% will have been reached in 25 top markets by October 1951 when total set population will be 14,000,000, NBC estimates in its new Hofstra College study. These are the cities, listed in descending order of set saturation: New York, Buffalo, Dayton, Minneapolis-St. Paul, Albany-Schenectady-Troy, Boston, Chicago, Detroit, Philadelphia, St. Louis, Baltimore, Cincinnati, Erie, Richmond, Syracuse, Los Angeles, Cleveland, Lancaster, Salt Lake City, Washington, Binghamton, Columbus, Milwaukee, San Diego, Wilmington.

Personal Notes: Harry S. Ackerman reelected v.p. in charge of CBS Hollyood network programs (TV & AM), resuming post he relinquished year ago to become production chief and, under his contract, still be able to collect royalties on show packages he created; Howard S. Meighan, heading Hollywood operations, returns to New York shortly . . . Fred Kilian resigns as ABC central div. program director as of July 1 to join Young & Rubicam, Chicago . . . Murray Grabhorn, ex-ABC sales mgr., has reconsidered taking managership of WPTR, Albany (Vol. 7:23), instead will be managing director, National Assn. of Radio & TV Station Representatives, headquartering at 101 Park Ave., New York; he succeeds T. P. Flanagan, resigned because of ill health . . . Don L. Kearney appointed to newly created post of TV program mgr., Katz Agency, major rep firm, devoting time to selling TV film programs and station-produced programs on national spot basis . . . Walter B. Emery, ex-chief of renewals & revocation branch, FCC Law Dept., has been appointed legal asst. to Comr. Paul Walker . . . John S. Hayes, gen. mgr., named president of WTOP Inc., Washington, operating WTOP & WTOP-TV (55% owned by *Washington Post*, 45% by CBS); George Hartford named sales v.p., Clyde M. Hunt engineering v.p. . . . George Castleman, ex-v.p., Bermingham, Castleman & Pierce, joins CBS Radio Sales . . . Charles F. Gannon, Benton & Bowles v.p., resigns to form Armstrong, Gannon & Associates, 280 Madison Ave., N. Y., with Spencer Armstrong, director of Opinion Leaders of America . . . David Kees, technical director, promoted to production mgr., KPIX, San Francisco, succeeding Forrester Mashbir, resigned . . . Dick Oberlin, news director, WHAS & WHAS-TV, Louisville, on 3 months leave to act as consultant on UNESCO education project . . . Victor Forkner resigns as adv. mgr., WPIX, New York . . . Laura Eggleston promoted to TV-radio timebuyer, Henri, Hurst & McDonald, succeeding Mary Poloson . . . Clarke A. Snyder, recently with Bulova and Biow, named field representative of CBS-TV sales service dept., handling station contacts . . . Jacob A. Evans, adv.-promotion mgr. of NBC spot sales, appointed mgr. of radio adv. and promotion for the network, succeeding George W. Wallace, resigned to join *Reader's Digest International.*

Comdr. Mortimer Loewi, retiring as director of DuMont Network this week, announced appointment of gen. mgr. Chris Whitting to that top network post while he resumes position of executive asst. to Dr. Allen B. DuMont. Mr. Whitting said staff shifts are now being worked out, will be announced next week.

———■———

TV was third biggest money-maker for TV-radio appliance dealers in 1950, according to NARDA's fifth annual "Cost of Doing Business" survey. Refrigerators were first, accounting for 28.3% of total dollar sales volume, washing machines were second, and TV accounted for 13.7% of sales, up 2.4% from 11.3% in 1949. In 1948, TV represented 4.4%. Order of first 3 items was unchanged from 1949 to 1950. Significant is fact that 13% of all respondents' TV sales were made on trade-in basis. Some 92% of the responding dealers reported net dollar operating profit in 1950, as compared with 87% in 1949.

Packard-Bell preliminary report shows $992,000 earnings for fiscal Oct. 1, 1950, to May 31, 1951, compared with $775,000 for corresponding period year before. Sales for the 8 months totaled $16,000,000 as against $8,000,000. Before taxes, earnings were $2,672,000 vs. $1,191,000. Total of $143,735 in profit-sharing checks was distributed June 14 by Packard-Bell at Silver Anniversary ceremonies at Los Angeles plant. All hourly and salaried employes who were employed previous to March 31, 1951, were eligible. High man got $654.

Financial & Trade Notes: CBS-Hytron merger, whereby former pays 31 shares of its stock for each 100 of Hytron, was approved June 13 by stockholders of both companies on terms previously reported (Vol. 7:20)—and CBS added as vice presidents Lloyd H. Coffin, Hytron chairman; Bruce A. Coffin, Hytron president; David H. Cogan, Air King president. They will be elected to CBS board at July meeting, along with Frederick L. Chapman, Hytron director. CBS board filled vacancy caused by recent resignation of Isaac D. Levy (Vol. 7:22) by electing James B. Conkling, president of Columbia Records Inc.

Name of Air King Products Inc., Hytron subsidiary, has been changed to CBS-Columbia Inc., David H. Cogan continuing as president, and its receivers marketed under label "CBS-Columbia". Hytron Radio & Electronics Co., major tube manufacturer, continues under chairmanship of Lloyd Coffin, with Bruce Coffin as president. It's name may be changed, depending upon clearance with Secretary of State of New York, or it may simply be called Hytron Division of CBS.

* * * *

Top compensations paid in 1950 as salaries plus bonuses and/or profit-sharing to executives-directors of TV-radio and related electronics fields, as reported by SEC, included following over $50,000: Admiral—Ross D. Siragusa, $127,703; John B. Huarisa, $151,742; Wallace C. Johnson, $60,576. Avco—Victor Emanuel, $177,000; James D. Shouse, $131,000. DuMont—Dr. Allen B. DuMont, $364,-239. CBS—William S. Paley, $100,000; Frank Stanton, $151,597; Edward R. Murrow, $135,086. RCA—David Sarnoff, $200,000; Frank M. Folsom, $154,000; Charles B. Jolliffe, $101,000; Niles Trammell, $100,000; Walter A. Buck, $82,500. Philco—William Balderston, $193,750; James H. Carmine, $155,000; James J. Buckley, $96,875; Larry Hardy, $108,750; Leslie Woods, $106,500; Thomas Kennally, $106,250; John Otter, $97,000; Harold W. Butler, $82,250; Joseph H. Gillies, $92,350; Robert F. Herr, $64,833; Courtnay Pitt, $61,250; David B. Smith, $54,000. Sylvania—Don G. Mitchell, $104,679; Max Balcom, $70,103; H. Ward Zimmer, $64,239. Motorola—Paul Galvin, $75,-881; Robert W. Galvin, $50,881; Elmer H. Wavering, $52,-081; Frank J. O'Brien, $50,881; Walter H. Stellner, $50,881; Daniel E. Noble, $50,881; George R. Macdonald, $50,881. Zenith—E. F. McDonald Jr., $148,190; Hugh Robertson, $151,523; H. C. Bonfig, $83,492.

* * * *

Davega Stores Corp., which this month opened 27th store, reports net earnings of $718,340, equal to $2.48 per share after preferred dividends, on sales of $28,842,269 during fiscal year ended March 31. Provision for Federal taxes amounted to $637,000. This compares with net profit of $649,074 ($2.44) on sales of $24,359,215 for preceding fiscal year, when taxes were $403,541.

Dividends: Raytheon pfd., 60¢ payable July 1 to holders of record June 15; Reeves Ely, 10¢ payable June 25 to holders June 15, 15¢ on pfd. payable July 2 to holders June 15; Packard-Bell, 50¢ payable July 25 to holders July 10; Davega, 25¢ on common, 25¢ on pfd., payable June 25 to holders July 5; Motorola, 50¢ payable Aug. 1 to stock of record July 16.

IT&T reports consolidated net income of $4,136,256 on gross of $21,095,199 for quarter ended March 31 vs. $2,064,045 on $16,777,976 for same 1950 quarter.

Monarch Radio & Television Corp., Brooklyn, specializing in coin-operated TVs and radios, has declared dividend of one cent per share, payable April 30.

Erie Resistor Co.'s offering of 84,000 common shares (Vol. 7:21) is being made at $12 a share through Fulton, Reid & Co.

Topics & Trends of TV Trade: TV-radio industry feels it's lost another round in efforts to get Regulation W relaxed, now that Federal Reserve Board chairman William McChesney Martin has publicly told Senate Banking Committee there isn't going to be any modification. But some industry observers feel that FRB hasn't closed door completely, and that perhaps in month there may be chance to try again.

Despite pressures from Congress and industry to get 90-day moratorium on credit restrictions, FRB after 2 meetings this week decided to let things stand. Not the least of reasons for its adamant stand, in belief of many, was fact President asked continued measures against inflation in TV-radio speech June 14 and Board couldn't very well relax restrictions at same time.

It must be borne in mind that FRB looks at economy as whole and feels, according to informed sources, that Regulation W has halted upward spiral of installment credit, that any relaxation might "open up the floodgates" to inflation.

As to TV slump, FRB's attitude is: "You can't say Regulation W is the sole or even primary cause of your distress. There's usual summer slump, color, saturation. Therefore, we can't do anything for you." It's much same attitude as was originally taken in turning down RTMA petition (Vol. 7:19).

Any revisions of Regulation W on basis of hardship would have to apply to complete segments of the national economy, not to any specific industry which might be suffering, according to FRB experts. As for putting TV under household furniture category, which requires down payment of 15% compared to 25% for TV, FRB officials claim that TV, like any other durable, is a "deferrable" item—meaning that the consumer doesn't have to have it immediately but can wait and save up down payment. Furniture, they say, is a "non-deferrable" item—meaning consumer must have it at once.

Only alternative seems to be Congressional action—but Senator Capehart (R-Ind.), a former radio manufacturer who has been active in seeking revision of Regulation W, thought it would take 30 days for Congress to do anything, and "by then the whole picture probably would be changed."

* * * *

Not much excitement about TV-radio exhibits at June 18-28 Chicago Furniture Show, though usual exhibitors will be on hand both in Furniture Mart and Merchandise Mart. Advance reports indicate current lines will be shown mainly, with few if any new models on tap.

Air King (now CBS) has been advertising to trade that it will show its "Colorvision" sets (Vol. 7:23) in Trading Post Room, Merchandise Mart Bldg., July 18, 19 & 20, at 10 & 11 a.m., 12 noon, 1:30, 2:30, 3:30 & 4:30 p.m. But its ads play up standard black-and-white line.

Philco has already shown its new low-end models (Vol. 7:22), doesn't call them "new line" since more are to come later. Zenith is reported readying new line for August. Sparton, Pathe and Jackson have several new models to show in Chicago, and Stromberg-Carlson will have some too at its own Chicago branch office. Arvin holds distributor mectings July 29-Aug. 1 in Moraine Hotel, Highland Park, Ill., where new sets will be shown.

* * * *

DeForest Pioneers, club formed by alumni of various DeForest radio companies, met at Yale Club June 14—including Dr. Allen B. DuMont, DuMont Laboratories; Admiral Ellery W. Stone, American Cable & Radio Corp.; Frank Andrea, Andrea Radio; Wm. J. Barkley, Collins Radio; Louis Pacent, Pacent Engineering. Dr. DeForest, 78, now living in Los Angcles, was unable to bc present.

Trade Miscellany: Nearly 2000 Crosley TV sets were destroyed in fire that razed warehouse in Carrollton, Ky., this week; loss is estimated at $350,000 in merchandise, $125,000 building . . . Aladdin Industries Inc., makers of radios, moving out of Chicago plant, going to new quarters in Nashville . . . TV credited with increasing Sears Roebuck's overall sales in Cuba by 20%, though offered only since last October, reports *Retailing Daily* . . . Unconfirmed reports are that Simon Distributing Co., which gave up Washington-Baltimore Motorola distributorship recently, will soon handle Zenith lines . . . DuMont has penchant for All-American grid stars—has Kyle Rote, ex-SMU star, working for distributor S. H. Lynch & Co., Dallas, pending return to N. Y. Giants squad in July; Sid Luckman, former Columbia and Chicago Bears star, is Chicago DuMont distributor, and at network Les Arries is a onetime Northwestern All-American . . . Scott Radio and Hoffman first to announce that they will show new TVs and radios at Music Industry Trade Show in Chicago's Palmer House, July 16-19.

Merchandising Notes: Illustrating how auto sales are suffering trade lapse, too, was offer of Chicago dealer to give away 20-in. table model TV listing at $199.95 (Jackson) with every new car purchase; dealer says traffic increased 25% . . . Buyers of any brand TV, radio or appliance at list were offered specified new appliances for only $1 more in June 15 sale at Washington's Electrical Center . . . Arvin advertising 8½-in. table model at $129.95 for "summer outdoor living"; trade ad headline reads: "When America Moves Outdoors Sell the TV They Can Take Along" and urges small set as "perfect for porch, patio or terrace" . . . Emerson 17-in. table model included in interior decor of deluxe trailer exhibited by General Coach Works at Chicago Sportsmen's Show.

Plant Expansions: Sylvania plans new metallurgical lab at its research plant at Bayside, N. Y., costing $1,000,000-2,000,000, to be housed in 50,000-sq. ft. building scheduled for mid-1952 completion . . . Lear Inc., California Div., making aircraft radio equipment, to start $400,000 factory and hangar in Los Angeles.

* * * *

Hallicrafters' opinion of mechanical color sets is being shown at Chicago Furniture Show. It's demonstrating slave converter with 8½-in. tube, magnified to 10-in., alongside 20-in. standard set, latter as example of what electronic system will look like with tri-color tube. Card beside first set asks: "Will your customers be satisfied with this?" Card beside other asks: "Or is this worth waiting for?" Disc set is fed with slide picture from flying-spot scanner; other has no picture.

Harking back to lusher days of not so long ago, Bureau of Labor Statistics reports TV-radio factory workers totaled 183,400 in March, up from 181,500 in February, 180,500 in January. Average weekly wage was $57.49 in March, holding about same level as preceding months. Average hourly wage was $1.42, average hours worked 40.4. Figures are latest from Govt., but it's estimated in trade that TV-radio factory payrolls are now down as much as 65%.

TV-radio firms exhibiting at American Furniture Mart June 18-28 are: Admiral, Arvin, Belmont, Bendix, Hallicrafters, Jackson, Motorola, RCA Victor, Sparton, Westinghouse. At Merchandise Mart: Air King, Crosley, Capehart-Farnsworth GE, Magnavox, Murphy Radio Ltd., Rauland, Westinghouse.

RTMA county-by-county TV shipment report (available on request) shows April shipments to dealers down to 261,357 sets from 595,042 in March. First 17 weeks of 1951 shipments totaled 2,071,124. Monthly reports cover all counties to which as many as 25 sets have been sold.

Mobilization Notes: What are your chances of getting a satisfactory adjustment right off the bat when you appeal to NPA for "hardship relief" under material limitation orders? An official of NPA's last-word Appeals Board says it appears that approximately 90% of the complaints are "satisfactorily adjusted" at the NPA industry division level—at least satisfactorily enough so that appeals don't go any further. He said manufacturers of electronic equipment probably have even a better batting average, as indicated by the small number of their appeals which have reached the board.

Three-man Appeals Board, which set up shop April 1 under T. Munford Boyd, U of Virginia law professor, has more than 70 cases on its docket, of which about 30 have been heard. Among appeals pending hearing is one from Sylvania, asking permanent adjustment of its base period copper usage for TV-radio production. The appeal was turned down by Copper Div., then brought before Appeals Board by Sylvania.

* * * *

TV-radio and other consumer goods manufacturers will receive Controlled Materials Plan application forms from NPA by the end of this month. Although Govt. hasn't made up its mind whether to include civilian hard goods in CMP during fourth quarter, it's asking all manufacturers to fill out form CMP-4B. Form must be returned by July 31. Probability is that all segments of American industry will come under the steel-copper-aluminum curbs in October.

Manufacturers who are now under CMP—and this includes all who made out third quarter CMP forms—will receive allocations of the 3 basic metals in time to place orders for September delivery. But they must stay within their CMP quotas for all 3 months of third quarter.

First CMP allotments to electronics manufacturers will be sent out next week. It was learned that many parts manufacturers didn't file CMP applications. Although TV-radio doesn't come under CMP, all parts for TV-radio are CMP items, and their manufacturers must file applications to get materials. Manufacturers of CMP items must get their allocations from Govt.; they're not allowed to buy metals on the "free" market.

Record-keeping required of manufacturers operating under CMP is spelled out in new NPA booklet, *Allotment Accounting for Consumers under CMP*. It's illustrated and details suggested methods of accounting for allotments of steel, copper and aluminum. It's available from National Production Authority, Washington 25, D. C., and Commerce Dept. field offices.

* * * *

One certificate of necessity for expansion of electronic production facilities was issued by DPA during week ended June 8, out of total of 109 certificates issued during the period for facilities to cost $207,110,690. Certificate went to National Electrical Machine Shops Inc., for $158,364 in expansion of facilities to produce electronic equipment and instruments at Silver Spring, Md. Certificate provides rapid tax amortization on 80% of this amount.

Sylvania has $75,000,000 backlog of military orders, has put $39,000,000 into postwar plant expansion, according to June 18 *Time Magazine* report on president Don G. Mitchell. Article deals with Sylvania's recent introduction of "Electro-Luminescence," new method of lighting which makes whole panels glow when electric current excites chemical sprayed on glass.

Avco, which years ago sold holdings in Pan American World Airways and recently sold its 48.6% interest in ACF-Brill Motors (Vol. 7:20), this week sold its 257,690 shares of American Airlines (4% of total) as another step in transition from holding to operating company.

Trade Personals: E. L. Hulse, former GE electronics dept. comptroller, heads new components div., comprising GE-owned Illinois Cabinet Co., Rockford, Ill.; Precision Laboratories Inc., Irvington, N. J.; Wabash Cabinet Works, Wabash, Ind. G. L. Chamberlin, ex-electronics dept. auditor, is new comptroller . . . Robert E. Noth, ex-sales training mgr., GE receiver div., appointed St. Louis district mgr. . . . Carl Duffy, ex-San Francisco service mgr. for Northern California, named Packard-Bell service div. mgr., his asst. Bob Clark promoted to his San Francisco post; Duffy succeeds Thomas L. Stevens, now Los Angeles distributor . . . Jack Kramer has resigned as sales mgr. of Mattison . . . Emerson Dickman, Princeton baseball coach and former big league ball player, resigns that job to devote fulltime to sales position with Capehart-Farnsworth . . . Sarkes Tarzian, Indiana parts manufacturer and TV broadcaster (WTTV), was subject of laudatory June 14 column on foreign-born scientists by Scripps-Howard columnist Robert C. Ruark . . . Peter H. Cousins promoted to RTMA director of information, succeeding John Koepf, resigned to join Treasury bond div.

———■———

TV programming has fallen far short of its potentialities, critic Jack Gould writes in June 10 *New York Times Magazine*. To "broaden TV's base," he suggests: (1) Broadcasters stop using TV as "second or third run house for products of stage and screen," but begin to develop their own new material and art forms. (2) Programming structure be varied to "meet the convenience more of the viewer than of the broadcaster," avoiding sameness which now marks most programs at any given time of day. (3) Commercial broadcasters should welcome educational interests into the TV field, for "whatever will expand the audience of the medium [and] reach those persons who are not viewers can only mean added strength and security for all broadcasters . . . " In separate article in Sunday *Times*, Gould hails possibilities of home subscription TV as ideal means of catering to minority cultural tastes and supporting cultural institutions at same time.

Mercurial elder statesman of radio invention Dr. Lee DeForest this week expressed great concern over his TV "grandchild." Said he: "I'm sorry to say that this medium, for which I had such high hopes a few years ago, seems to me already to have become more an influence for bad than for good." On May 17, he had written *New York Times:* "I am a proud parent today. In the past I have complained bitterly about some of the uses to which 'my children,' radio and TV, have been put. I am delighted to see the splendid way these media were employed in bringing to the public the living history of General MacArthur's return and subsequent discussion . . ."

Tallest tower in the world, built for Loran studies, was recently completed near Rome, N. Y., by Truscon Steel Co. It's a 1212-ft. guyed structure, will be used by scientists of Griffiss Air Base. Tower took 772 tons of steel, 4 miles of guy cables, 1400 cubic yards of concrete. Only taller man-made structure is Empire State Bldg.

St. Louis Star-Times ceased publication June 15, victim of mounting labor and material costs. It was sold to *St. Louis Post-Dispatch*, but publisher Elzey Roberts is retaining its radio station KXOK (ABC) which is applicant for TV.

More June 1 sets-in-use reported since NBC Research's "census" of May 1 (Vol. 7:21): Baltimore 301,043, up 4043; Kansas City 121,832, up 2832; Johnstown 93,143, up 5843.

Tide Magazine, advertising weekly, was sold this week to Magazines of Industry Inc., publisher of *Modern Industry*. Reginald Clough continues as editor.

Telecasting Notes: New Orleans WDSU (5 kw on 1280 kc) switches from ABC to NBC, probably in fall, while longtime NBC affiliate WSMB (5 kw on 1350) presumably goes ABC—result (1) of WDSU's ownership of city's first and only TV affiliate, and (2) fact that Gulf Theatres owns half of WDSU, with Maison Blanche dept. store, and United Paramount Theatres, about to merge with ABC (Vol. 7:21), owns Gulf Theatres . . . WDSU-TV principally owned by Lt. Edgar Stern Jr., now on duty at Pentagon, managed by ex-ABC & MBS v.p. Robert Swezey, will continue to take service from all TV networks, however, until New Orleans gets more outlets; city is due to get coaxial link in summer of 1952 (Vol. 7:12) . . . Paramount Pictures hasn't released any of its vault-bound films, but that doesn't deter its own station KTLA, Los Angeles, from publicity splurge on fact it's carrying 26 Lippert features of 1946-50 vintage (Vol. 7:17) and billing them as "the newest block of American films ever released for TV" . . . Not many network TV programs originate outside New York, Chicago or Los Angeles—but NBC-TV is picking up *Ruth Lyons' 50 Club* from WLWT, Cincinnati, starting Oct. 1, Mon.-thru-Fri. 12-12:30 p.m., folksy-chatter type show with music and singing; also, from same station, it's now carrying *Midwest Hayride*, Sat. 9-10 . . . ABC-TV signs Frances Langford and Don Ameche for Mon.-thru-Fri. noon-1 p.m. show starting Sept. 10, to be sold in 15-minute segments at $2500 per segment; it will originate in Times Hall, on West 43rd St., New York, being leased from *New York Times* . . . CBS-TV has leased 300x152-ft. Keywest Studios, Hollywood, for building and storing scenery and props . . . Caroline Burke, NBC producer, reports she has backing and plans to file for new TV station in Portland, Ore., her home; 5 applications are already pending for that city (see *TV Factbook No. 12*) . . . CBS has signed Jack Donohue, film and dance director, to long-term contract; his recent chore was *Frank Sinatra Show*, and his first under new contract will be Faye Emerson's new show . . . Milton Berle's 22-hour "telethon" on 41 NBC-TV stations June 9-10 brought in $1,127,211 in pledges to Damon Runyon Cancer Fund . . . George A. Cameron Jr., oilman-owner of KOTV, Tulsa, and movie actor Russell Wade have organized Cameron-Wade Television Productions, with headquarters in Beverly Carlton Hotel, Hollywood, to make "films in color" for TV.

U of Pennsylvania's defiance of live football ban by National Collegiate Athletic Assn. (Vol. 7:23) may cost Penn 5 top opponents this fall. California, Dartmouth, Princeton, Columbia, Cornell notified Penn this week they won't play at Philadelphia if TV cameras are there. Nevertheless, ABC is seeking sponsor for Penn's 8-game home schedule at $750,000 for package. *Billboard* reported June 16 that Southwestern Conference will join the bolt from NCAA, televise all sellout games, as it did last year. Most Southwestern Conference games in recent years have been sellouts, and 2 games to be played in Cotton Bowl are already sold out—so plenty of live telecasts are practically assured in that area. With NCAA's blessing, Pacific Coast Conference okayed live telecasting of next New Year's Rose Bowl game, and signed contract with Sportsvision Inc., San Francisco firm headed by W. J. Parry, to film conference games for delayed transmission. Parry says Sportsvision will film and telecast some 93 games throughout nation this year.

Both United Paramount and ABC stockholders meetings are set for July 27 to vote on proposed merger (Vol. 7:21), but application to FCC may be filed sooner by counsel in hopes that approval will be forthcoming before start of fall telecast season. Both companies have already filed prospectuses with SEC. United Paramount is represented by Hogan & Hartson, ABC by Arnold, Fortas & Porter.

SAVING to telecasters of nearly $3,000,000 in taxes is goal of all-industry TV Broadcasters Tax Committee, which as new growth industry goes before Senate Finance Committee on or about June 25 to ask for relief from excess profits provisions of new revenue bill. Headed by Fort Industry's George Storer, committee is asking all TV stations for contributions equaling onetime one-hour rate.

Appeal to Senate will be predicated on fact that base years 1946-49 for excess profits credit were years of heavy losses in TV ($851,000 loss in 1946, $2,015,000 in 1947, $8,556,000 in 1948, $13,520,000 in 1949), so that there actually is no realistic base. They propose formula which would fix credit base on rate of profit on total assets (AM-TV combined) in 1946, considered as representative year in AM broadcasting, which then showed profit of $14,869,000.

The 1946 profit rate would be applied to total assets at end of 1949, which committee thinks would give true credit base. To qualify under proposed formula, telecaster must show that 30% of his gross revenue in December 1950 came from TV. As alternative proposal, Secy. of Treasury would be entrusted to determine telecasting industry's 1946 rate of return as the tax base.

Committeemen are: Dwight Martin, Crosley, vice chairman; Clair McCollough, WGAL-TV & WDEL-TV; Campbell Arnoux, WTAR-TV; Frank M. Russell, NBC; Earl H. Gammons, CBS; Donald W. Thornburgh, WCAU-TV; John Poole, Fort Industry tax counsel. Committee counsel is Lovell H. Parker, ex-chief of staff, Joint Committee on Internal Revenue Taxation.

———■———

Blistering indictment of televised Congressional hearings as "new form of public inquisition" bordering on "mob justice" comes from Thurman Arnold, ex-asst. Attorney General and former Federal judge, in June *Atlantic Monthly*. Arnold says TV makes probe "more of a trial than an attempt to obtain information for legislative action," and thereby (a) distorts govt. objectives by making the most dramatic issues appear to be most important ones; (b) nullifies basic judicial traditions that trial must not be publicity device and must protect the innocent even at cost of letting the guilty escape. Meanwhile, one of the stars of the Kefauver hearings, Rudolph Halley, former chief committee counsel, predicted that the TV audience which viewed the Kefauver hearings will sway this year's elections, presumably in his favor. He's Liberal Party candidate for president of New York City Council.

Dismissal of charges of bias in handling of newscasts leveled by FCC against G. A. (Dick) Richards stations (KMPC, Los Angeles; WJR, Detroit; WGAR, Cleveland) was recommended June 14 by FCC Examiner Cunningham. Death of Richards (Vol. 7:22) renders questions of Mr. Richards' eligibility as a broadcaster moot, Cunningham held. It's believed FCC will affirm examiner's recommendations, but on June 15 Broadcast Bureau chief Plummer, general counsel Cottone and counsel Ford petitioned FCC that Cunningham's initial decision be remanded to him for "proper" decision in case on grounds he had no authority to dismiss.

Not only has Petrillo made deal with Republic for release of old films to TV (Vol. 7:23), but he also has signed Monogram Pictures and is negotiating with independent producer David O. Selznick. Petrillo revealed this in speech to AFM convention in New York last week. Republic has informed telecasters its films will be available in blocks of 13, 26 or 52 weeks, including such featured players as Gene Autry, Johnny Mack Brown, Bob Steele, Roy Rogers.

More community antenna installations (Vol. 7:2, 7, 11, 21), reportedly in operation or planned: Pikeville, Jenkins and Frankfort, Ky.

Hearing Scheduled to be Conducted before FCC en banc Starting July 9, 1951; Docket No. 8736

For proposed rules and table of allocations, see TV Allocation Report issued by FCC March 22, 1951 and published in full text by Television Digest March 24, 1951

ALABAMA

Giddens & Rester, Mobile (WKRG)—Opposes proposal of Lamar Life Insurance Co., Jackson, Miss., to substitute Channel 10 for 5 in Mobile. (George O. Sutton.)

Pape Broadcasting Co., Mobile (WALA)—Opposes proposal of Tuscaloosa Broadcasting Co., Tuscaloosa, Ala., to assign Channel 8 to Tuscaloosa. (Dow, Lohnes & Albertson.)

U of Alabama, University—Opposes proposal of Voice of Dixie Inc., Birmingham, Ala., to delete reserved Channel 7 from University and assign 2 to University or Tuscaloosa.

ARKANSAS

Harold L. Sudbury, Blytheville (KLCN)—Opposes proposals of: (1) WREC Broadcasting Service and WMPS Inc., Memphis, to assign Channel 3 to Memphis from Blytheville. (2) Allen B. DuMont Laboratories Inc., New York, which lists no uhf assignment for Blytheville. (Harry J. Daly.)

CALIFORNIA

American Broadcasting Co. Inc., Los Angeles (KECA & KECA-TV)—Opposes proposals of: (1) Airfan Radio Corp. Ltd., Charles E. Salik and San Diego County Board of Education, San Diego, to assign Channel 6 or 12 to San Diego. (2) Television Broadcasting Co., San Diego, to assign 12 and 15 to San Diego. (3) Allen B. DuMont Laboratories Inc., New York, to assign 7 and 9 to Phoenix, Ariz., 13 to Yuma, 6 to San Diego, 7 to Mexicali and 12 to Tijuana. (Haley, McKenna & Wilkinson.)

Earle C. Anthony Inc., Los Angeles (KFI & KFI-TV)—Opposes proposals of: (1) Radio KIST Inc., Santa Barbara, Cal., to assign Channel 8 to Santa Barbara; (2) Airfan Radio Corp., Television Broadcasting Co., and Charles E. Salik, San Diego, to assign 6 or 12 to San Diego from Tiajuana, Mexico. (Caldwell-Rollo-Russell.)

Monterey Radio-Television Co., Monterey (purchase of KMBY pending)—Opposes proposals of Salinas Broadcasting Co., Salinas, Cal.; Harmco Inc. and KCRA Inc., Sacramento, Cal.; KROW Inc., Oakland, Cal., to substitute uhf channel for Channel 8 in Monterey. (Dow, Lohnes & Albertson.)

KCRA Inc. (KCRA), Harmco Inc. (KROY), Sacramento—Oppose proposals of following as in conflict with their comments: California Inland Broadcasting Co., Fresno; Monterey Radio-Television Co., Steven A. Cisler, Monterey; Tribune Building Co., KROW Inc., Oakland; Salinas Broadcasting Co., Salinas; Columbia Broadcasting System Inc., Television California, San Francisco; Keynon Brown, Reno, Nev. (Loucks, Zias, Young & Jansky.)

Kenncdy Broadcasting Co., San Diego (KFMB & KFMB-TV)—Opposes proposals of: (1) American Broadcasting Co., New York, to permit operation of KECA-TV, Los Angeles on Channel 7 with effective radiated power of 23 db and antenna height in excess of 500 ft. (2) Radio KIST Inc., Santa Barbara, to assign 8 to Santa Barbara. (Cohn & Marks.)

Public Library, San Diego—Favors reservation of Channel 3 to San Diego for educational use.

American Broadcasting Co. Inc., San Francisco (KGO & KGO-TV) Opposes proposals of DuMont Laboratories Inc., New York, KARM, The George Harm Station and McClatchy Broadcasting Co., Fresno, to assign Channel 7 to Fresno. (Haley, McKenna & Wilkinson.)

Chronicle Publishing Co., San Francisco (FM station KRON & KRON-TV)—Opposes proposals of: (1) Tribune Co., Oakland, to assign Channel 3 to Stockton, 4 to Reno. (2) Harmco Inc. and KCRA Inc., Sacramento, to assign 3 to Sacramento, 4 to Reno. (3) McClatchy Broadcasting Co., Sacramento, to assign 3 to Sacramento, 4 to Reno. (Krieger & Jorgensen.)

San Jose Television Broadcasting Co., San Jose—Opposes proposal of Columbia Broadcasting System, New York, to delete Channel 11 from San Jose. (St. Clair, Connoly & Cerini and Wheat, May & Shannon.)

McClatchy Broadcasting Co., Stockton (KWG)—Opposes proposals of: (1) Columbia Broadcasting System, New York, and Television California, San Francisco, to substitute Channel 6 for 13 in Stockton; (2) KROW Inc., Oakland, to substitute 8 for 13; (3) Tribune Bldg. Co. to substitute 3 for 13. (Dow, Lohnes & Albertson.)

E. F. Peffer, Stockton (KGDM)—Opposes proposals of: (1) KROW Inc., Oakland, to substitute Channel 6, 8 or 58 for 13 in Stockton; (2) Television California, San Francisco, to substitute 6 for 13; (3) Tribune Bldg. Co., Oakland, to substitute 3 for 13; (4) Columbia Broadcasting System Inc., New York, to substitute 6 or uhf channel for 13. (Fisher, Wayland, Duvall & Southmayd.)

Radio Diablo Inc., Stockton (KSBR-FM, San Bruno)—Opposes proposals of: (1) Television California, San Francisco; KROW Inc., Tribune Building Co., Oakland, Cal., and Columbia Broadcasting System, New York, to remove Channel 13 from Stockton; (2) Allen B. DuMont Laboratories, New York, to assign 12 to Monterey. (Loucks, Zias, Young & Jansky.)

Note: Following California educational institutions and organizations filed oppositions to proposals of KROW Inc., Oakland, Cal., and Columbia Broadcasting System Inc., New York, to classify Channel 9 for commercial use in San Francisco-Oakland: Acalanes Union High School, Canyon; State Dept. of Education, Sacramento; Campbell Union School District, Campbell; Castro Valley School District, Castro Valley; Contra Costa County Schools, Martinez; Hayward Elementary Schools, Hayward; Hayward Union High School District, Hayward; Irvington Elementary School, Irvington; Los Gatos Union High School, Los Gatos; Marin County Superintendent of Schools, San Rafael; Mt. Eden Elementary School, Mt. Eden; Oakland-San Francisco Bay Area Public Schools TV Council, Oakland; Piedmont Public Schools, Piedmont; Ravenswood Elementary School District, Palo Alto; Richmond Schools, Richmond; San Lorenzo Elementary Schools, San Lorenzo; San Mateo County Schools, Redwood City; San Rafael City Schools System, San Rafael; Sonoma County Schools, Santa Rosa; John Swett Union High School, Crockett; Walnut Creek School District, Walnut Creek.

COLORADO

Northwestern Colorado Broadcasting Co., Craig (KRAI)—Favors, in part, proposals of Sen. Edwin C. Johnson; suggests alternatives where conflicts arise. (Fletcher & Midlen.)

Board of Education, Denver—Opposes proposal of Sen. Edwin Johnson to classify Channel 6 for commercial use.

Western Slope Broadcasting Co., Grand Junction (KFXJ)—Same as Northwestern Colorado Broadcasting Co., Craig, Colo.

Uncompaghre Broadcasting Co., Montrose (KUBC)—Same as Northwestern Colorado Broadcasting Co., Craig, Colo.

CONNECTICUT

Travelers Broadcasting Service Corp., Hartford (WTIC)—Opposes proposals of: (1) Columbia Broadcasting System, New York, to assign Channel 10 to Albany. (2) WTAG Inc., Worcester, Mass., to assign 12 to Worcester. (3) Hampden-Hampshire Corp., Holyoke, Mass., to assign 3 or 10 to Springfield-Holyoke. (4) Thames Broadcasting Corp., New London, Conn., to support FCCs assignment of 3 and 63 to New London. (5) Cherry & Webb, Providence, R. I., to support FCC's assignment of 10, 12, 16 & 22 to Providence. (6) Outlet Co., Providence, R. I., to support FCC's shift of WJAR-TV to 10 in Providence. (7) Matheson Radio Co., Boston, to assign 10 to Springfield. (8) Regional TV Corp., Springfield, Mass., to add 3 to Springfield. (9) Greylock Broadcasting Co., Pittsfield, Mass., to add 3 to Pittsfield. (10) Allen B. DuMont Laboratories, New York, for failure to add vhf and uhf channels to Hartford, for assignment of 3 & 10 to Albany-Schenectady-Troy. (11) Elm City Broadcasting Corp., New Haven, Conn., to support FCC's Connecticut allocations. (12) Brockway Co. to substitute 8 for 7 in Montreal-Verdun. (Caldwell-Rollo-Russell.)

Elm City Broadcasting Corp., New Haven (WNHC & WNHC-TV)—Opposes proposals of: (1) American Broadcasting Co. and General Teleradio Inc., New York, to increase power without reference to adjacent-channel interference. (2) Pennsylvania Broadcasting Co. and Chamber of Commerce, Philadelphia, to substitute Channel 8 for 7 in Wilmington. (Fisher, Wayland, Duvall & Southmayd.)

WAVZ Broadcasting Corp., New Haven (WAVZ)—Opposes proposal of Hartford Times Inc., Hartford, Conn., to substitute Channel 75 for 59 in New Haven. (Greenbaum, Wolff & Ernst.)

DISTRICT OF COLUMBIA

Joint Committee on Educational Television, Washington—Opposes: (1) Petition of Federal Communications Bar Assn. (2) Proposal of Columbia Broadcasting System Inc., New York, to substitute uhf for vhf for educational use in Chicago, San Francisco and Boston. (3) NARTB's comments. (4) Proposal of Allen B. DuMont Laboratories Inc., to eliminate channel reservations. (Telford Taylor, Seymour Krieger.)

National Assn. of Radio & Television Broadcasters, Television Board, Washington—Requests permission to participate in hearin in respect to assignment of 470-500 mc and issue of educational reservations in specific communities. (Thad H. Brown Jr.)
